Cutting off from the People (קָטַע מִן הַעָם, * LXX ἐξολοθρευώ).—A term used in Gn 17¹⁴ as penalty for neglect of circumcision, and in the law to be employed as a punishment for certain breaches (1) in morals, (2) in the Abrahamic covenant, and (3) in the Levitical ritual. For immorality such as filial irreverence, incest, and unclean connexions, the offender, in at least seven cases, was unquestionably exposed to death (Lv 18²⁹ 20⁹⁻²¹). In like manner he who does aught presumptuously (RV 'with a high hand'), that is, wilful sin in general, was liable (Nu 15³⁰⁻³¹). In the breach of the covenant it may be doubted whether the extreme penalty of death was invariably inflicted, as in Ex 30³³, Lv 23^{29, 30}, and Nu 9¹³. There are instances where the punishment for offences that were kindred to such as are expressly designated as a breach of ritual, meant death. Such are the cases of (1) Nadab and Abihu (Lv 10¹⁻²); (2) Korah, Dathan, and Abiram (Nu 16³³). These 'perished from the congregation' (see Nu 12¹², in which it is stated that Miriam, for leprosy, was 'as one dead' in her temporary exclusion). The punishment in general seems so severe that it has been suggested that it was possibly voidable either by an elaborate atonement on the offender's part (Nu 15²⁷⁻³¹), or by a divine commutation, the penalty being recorded but not executed. In some instances it meant, perhaps, only deprivation of certain civil and social privileges. There are two such cases: (1) when the people ate of the blood in one of Saul's campaigns (1 S 14³²); (2) when king Uzziah offered incense (2 Ch 26^{19, 20}). On the other hand, in Ex 31¹⁴, the meaning of the penalty as attached to Sabbath-breaking is interpreted as death.†

* The plural קָטַע apparently means 'kinsfolk,' 'relatives,' so that 'cut off from his (their) people' is a better rendering than 'from the people.'

† It may be questioned whether, when 'cut off from his people' stands alone, anything more is intended than to express strongly the divine disapproval under threat of excommunication. Cf. 'I will cut off,' Lv 17¹⁰ 20^{8, 5, 6} [all H], and see Nowack, *Heb. Arch.* i. 333 f. and Dillm. on Gn 17¹⁴.

Divine Visitation.—In the theocratic economy there were certain sins for which the nation at large suffered. The punishment was considered as inflicted by the divine hand, the visitation itself being manifestly due to no human instrumentality, though man was sometimes the executioner of God's will. Divine condemnation was executed against idolatry, Sabbath-breaking, oppression of the poor, covetousness, and other sins which betokened a rebellious or unholy spirit, or for which an individual could not obtain redress. Human agencies might be employed in the administration of the penalty, but God Himself was regarded as the avenger of the wrong. He it was who led the people, for their wickedness, into captivity (Ezr 9⁷, Jer 15², Am 9⁴), threatened them with the curse (Dt 28¹⁵⁻²⁰, Jer 24⁹), with consumption and fever (Lv 26¹⁶), and inflammation and fiery heat (Dt 28²²), caused the drought (Dt 11¹⁷ 28^{23, 24}, Is 5⁸, Jer 14¹⁻⁷ 50³⁶, Hag 1^{10, 11}), and famine (Lv 26²⁶, Jer 24¹⁰ 34¹⁷, Rev 6⁸), kindled a consuming fire (Dt 4²⁴, Is 66¹⁶, He 12²⁹), showed His indignation by hail and tempest (Is 30³⁰, Hag 2¹⁷), inflicted pestilence and plague (Ezr 6¹¹ 7¹⁸), exposed to the taunt of proverb and reproach (Dt 28³⁷, 2 Ch 7²⁰, Jer 24¹⁰), smote with scourge (Is 10²⁶ 28^{15, 18}), and with the sword in the hands of enemies, as shown in so many passages that the reader may consult a concordance for a complete view of these and all other providential punishments named. His displeasure at Korah was shown by the earthquake (Nu 16³⁰). Idolatry was punished by captivity. Delay of justice provoked war. Perjury invited wild beasts. Neglect of tithes was attended with drought and famine (Schürer, *HJP* II. ii. 91).

Drowning was not distinctively a Jewish punishment. It was the penalty in Babylonia for the wife who repudiated her husband (*Encyc. Brit.* art. 'Babylonia'). Jerome, however, says that offenders were thus sometimes put to death among the Jews as well as among the Romans. There is an allusion to this mode of dying in Mt 18⁶, Mk 9⁴². Jos. (*Ant.* XIV. xv. 10) states that some Galileans revolted and drowned the partisans of Herod.

Exposure to Wild Beasts.—Daniel and his enemies were cast into a den of lions (Dn 6), and the practice of thus dealing with offenders is said to be still in vogue in Fez and Morocco. In the use of a strong figure in Mic 4¹³ human beings are represented as being gored or trodden by beasts. The lion from whom St. Paul was said to be delivered (2 Ti 4¹⁷) undoubtedly means Nero. No conclusive exegesis has been given of 1 Co 15⁵². Many are of the opinion that human foes are described, but there is some plausible argument in favour of the literal view. The inroads of wild animals, as by an act of God, are to be regarded as a punishment of Israel for unfaithfulness (Lv 26²², Dt 32²⁴, 2 K 17²⁶). The disobedient prophet, named Jadon according to Jos. (*Ant.* VIII. ix. 1), met death from God by a lion (1 K 13²⁶). Contrariwise, the righteous are protected (Job 5²³, Hos 2¹⁸).

Fines were permitted at the option of the injured party as a special privilege to freedmen (slaves being punished), and in earliest times the money was presented to the priest or at the sanctuary. It was not in accordance with Sem. doctrine to compel the aggrieved to accept material compensation (W. R. Smith, *RS* 329, 378). In the case of a mortal result, the mulct which might be in lieu of corporal penalty was called 'ransom (RV 'redemption') of life' (Ex 21³⁰), but was never allowed for wilful murder (Nu 35^{31, 32}). The specific amount was generally left to be determined by the judicial tribunal (Ex 21^{22, 30}), but the sum for fatal injury by an ox to a servant was fixed at 30 shekels (Ex 21³²), for humbling an unbetrothed virgin at 50 shekels (Dt 22²⁹), and the highest amount named

is for slander against a wife's chastity, 100 shekels (Dt 22¹⁹). See *Restitution*.

Flaying is mentioned (fig.) Mic 3^{2,3}. It was a practice in Assyria, though the victim may have previously died (Rawlinson, *Anc. Mon.* i. 478; Layard, *Nin. and Bab.*; *Mon. of Nin.*). The Persians would flay and then crucify (Rawlinson, iii. 246; also recognized in the *Zendavesta*). Herodotus (iv. 64, v. 25) states that Persians and Scythians used the skins so obtained.

Hanging consisted usually in the suspension of the lifeless form as a mark of reproach. By this David showed his disapproval of the slaughter of Ishbosheth (2 S 4¹²). The person whose body was so exposed was 'accursed of God' (Dt 21²³, Gal 3¹³), and for this reason it might not remain in view over night (Jos 8^{29, 10²⁶}). This word is used for the act of impaling (*ἀνασκολοπιζειν*, Ezr 6¹¹), a common custom in Assyria. A sharp-pointed stake in a perpendicular position penetrated the body just below the breast-bone (Rawlinson, *Anc. Mon.* i. 477). It was frequent in Persia. Darius impaled 3000 Babylonians (Layard, *Nin. and Bab.* 295 n.; Herodotus, iii. 159). The Philistines gibbeted (on crosses, Jos. *Ant.* vi. xiv. 8) the dead bodies of Saul and Jonathan (1 S 31¹⁰, 2 S 21¹²⁻¹³). Other Greek words used to represent this act are *ἐξηλάθειν* and *παρεγγυαρίζειν*, for which the Vulg. uses *crucifigere* (see *Cross*); and so St. Paul, according to the accepted exegesis of the time, applied Dt 21²³ to the ignominy of Jesus. Execution on the gallows was not prescribed for any crime in the Mosaic code. There is a difference of opinion whether the chief baker (Gn 41¹⁸) lost his life by being hanged by the neck, or whether his body, after being despatched, was exposed to shame (Wilkinson, *Anc. Egyptians*, ii. 213). In later history offenders were hanged by the hands (La 5¹², Targ. 12), and in 1 Mac 1⁶¹ it is stated that dead children were hanged to the necks of their mothers. Ahithophel (2 S 17²³) and Judas (Mt 27⁵, Ac 1¹⁸) voluntarily, in chagrin and remorse, took their lives by hanging. There is an apparent allusion to this form of punishment in 1 K 20³¹). The Gibeonites may have adopted this method of avengement on the sons of Saul (2 S 21⁹), because it was in vogue among the aboriginal nations of the land. Stanley (*Hist. Jew. Ch.* ii. 37) says the victims were first crucified, then suspended. Under the Persian rule there was resort to the gallows (γυ, but called 'tree' in Gn 40¹⁹, Dt 21²²) for punishing the conspirators against Ahasuerus (Est 2²³), Haman (7^{9, 10}) and his ten sons (9¹⁴); possibly the same as impalement.

Imprisonment.—Offenders were confined by the Israelites as well as other nations. The prison was often used merely for keeping a person in ward until the pleasure of the judicial power should be known. So Joseph by Potiphar (Gn 39^{20, 21}); the son of Shelomith, for blasphemy (Lv 24¹²); the man who gathered sticks on the Sabbath (Nu 15³⁴); the apostles after healing the lame man (Ac 4³); St. Peter, by order of Herod, till a convenient time for his execution (Ac 12⁴). Incarceration was often accompanied with other punishments (cf. Samson grinding for the Philistines, Jg 16²¹), or it was regarded as an alternative (Ezr 7²⁶). Jeremiah was smitten as well as imprisoned (Jer 37¹⁵). The murderer and debtor might be delivered both to prison and the tormentors (Mt 18³⁰). Zedekiah used the prison for the protection of Jeremiah from his enemies (Jer 37²¹). He was then transferred to the princes, who cast him into the dungeon or pit (Jer 38⁶). For the Eng. word 'dungeon' or 'prison' in Gn 40^{15, 39²⁰}, 1 K 22²⁷, 2 K 25²⁸, 2 Ch 16¹⁰, Ps 142⁷, Ec 4¹⁴, Is 24^{22, 42⁷}, Jer 37^{4, 15, 52¹¹}, there are eight different roots in the Heb. which would imply that detention of those under accusation or in disfavour was regular and quite common,

the confinement itself being for the purpose of punishment. Confinement in jail was inflicted as a preliminary punishment by Ahab on Micaiah, accompanied with spare bread and water diet (1 K 22²⁷); by Asa on Hanani (2 Ch 16¹⁰). The motive of Herod in imprisoning John the Baptist is uncertain (Mt 4¹²). Barabbas was committed for insurrection, and it would appear as if this were intended to be final (Lk 23¹⁹). In the prison-house, which might contain cells (Jer 37¹⁶), there was sometimes a pit with or without water (Jer 38⁶, Zec 9¹¹), and the court of the prison is mentioned in Jer 37, 38, 39, and elsewhere. In some prisons there were stocks (Jer 20^{2, 29²³}, Ac 16²⁴). To the Rom. prison there were three parts: *communiōra*, *ulteriora*, where Paul and Silas were kept, and the *Tullianum* or dungeon, the place of execution (Conybeare and Howson, *St. Paul*, i. 304 n.). There is an allusion to prisoners at labour in Job 3¹⁸, and they might be held in chains (Ps 105^{18, 107¹⁰}, Jer 40⁴).

Indignities.—There was resort to various means of heaping contumely on an offender; such as ignominious or obscure burial for a blasphemer (Jos. *Ant.* iv. viii. 6; 1 K 14¹³, 2 K 9^{10, 21^{18, 26}}, 2 Ch 24²⁵, Jer 22¹⁹). Some victims were slain and left in the street or cast behind the walls (Ps 79^{2, 3, 10}). Heads of the slain were removed and carried in triumph (1 S 17^{57, 31⁹}). Dead bodies were burned (Jos 7^{15, 25}, Lv 20¹⁴, Am 2¹). See *Burning*) or hanged (2 S 4¹², Gn 40¹⁷⁻¹⁹ [see *Hanging*], Nu 25^{4, 5}, Dt 21^{22, 23}). Stones were thrown on the corpse, as on that of Achan (Jos 7^{26, 26}), the king of Ai (Jos 8²⁹), and on the tomb of Absalom (2 S 18¹⁷). Mohammedans still maintain the custom when passing by its supposed site (Thomson, *Land and Book*, i. 61); but Harmer plausibly suggests that the 'heap of stones' was erected in honour. Some forms of execution were regarded as more disgraceful than others, as crucifixion (Jn 19³¹), but it was not the design of the Mosaic law to cover a sufferer with perpetual infamy. In Egypt a calumniator of the dead was subject to severe punishment (Wilkinson, *Anc. Egypt.*).

Mutilation was practised, but not under direct sanction of the covenant law. The thumbs and great toes of Adonibezek were severed (Jg 16⁷). The slayers of Ishbosheth (2 S 4¹²) lost their hands, but possibly after death. Nebuchadrezzar threatened to cut in pieces his offending counsellors (Dn 2⁵). At the command of Antiochus Epiphanes (acc. to 2 Mac 7¹⁻⁴⁰), seven brothers suffered horrible outrages, among others that of tearing out the tongue, a very common cruelty among the Assyrians. In Egypt robbers were sometimes deprived of the right hand for the first offence, the left foot for the second, and the left hand for the third; though the theft of food not quickly perishable was not so severely punished (Lane, *Mod. Egypt.*). To this act our Saviour's statement in Mt 24⁵¹, Lk 12⁴⁶, seems to allude. An Egyptian victor was known to display severed hands as proof of the number of his trophies (see 1 S 18²⁷). The town of Rhinocolura was said to be peopled by robbers who had lost their noses. The nose and ears of an adulterer were cut off (Diod. Sic. i. 78), and from Ezk 23²⁵ it appears that the usage was in vogue among the Babylonians. (On the horrible cruelties of Assurbanipal, as recorded on his cylinder, see *RP* iii. 39-50.) Rings were put in the lips or noses of captives (2 Ch 33¹¹ 'among the thorns,' RV 'in chains,' Is 37²⁹, Ezk 19^{4, 9}; Rawlinson, *Anc. Mon.* iii. 7; and see Am 4²).

Plucking off the Hair was a punishment inflicted on Jews who had indulged in mixed marriages (Neh 13²⁸). It may have been intended simply for disfigurement. The prophet in Is 50⁶ alludes to the judicial practice as common in his time. The effort was so vicious as described in 2 Mac 7⁷, that the skin was torn off with the hair; but in scalping,

as practised by the N. American Indians, a knife was used. As an insult to David's servants, half of the beard was shaven off (2 S 10⁴). The head was subjected to other indignities (Job 30¹⁰, Mt 27³⁰, Mk 12¹).

Precipitation.—It is stated in 2 Ch 25¹² that 10,000 Edomites were cast from a rock by the children of Judah. So two Jewish women are said to have suffered (2 Mac 6¹⁰). Of the same sort are the acts mentioned in 2 K 8¹², Hos 10¹⁴ 13¹⁶. On column iv. 100, 101 of Assurbanipal (G. Smith), it is stated that certain persons were thrown on the stone lions and bulls in a quarry, the fall designed to be fatal. Calmet is of opinion, with Jerome as authority, that this was the fate of Oreb and Zeeb (Jg 7²⁵). An attempt after this manner was made on the life of Jesus (Lk 4²⁹).

Restitution.—There was enacted an elaborate system for compensating an injured party under the sanction of Mosaism. As far as possible the restoration was identical with, or analogous to, the loss of time or power (Ex 21¹⁸⁻³⁶, Lv 24¹⁸⁻²¹, Dt 19²¹). He who stole and then slew or sold a live ox had to restore fivefold; if it was a live sheep fourfold. The penalty was designed in part to be prohibitory, because sheep were more exposed in the desert, while oxen were necessary and not so easily taken. In later history it appears as if sevenfold might be exacted (Pr 6³¹). See also the LXX tr. of 2 S 12⁹, where seven is substituted for four. If the identical animal was restored, another of equal value was all that the law required besides. Burglary doomed the culprit to unrequited death or to slavery. For breach of trust or for trespass, twenty per cent. additional to the original sum was demanded (Lv 6¹⁻⁵, Nu 5⁸⁻¹⁰). He who was detected in the theft of a pledge, or was found guilty in the matter of trespass while the property was in his hand, must pay double. Pecuniary compensation must be furnished for damages by an animal, when not on its own ground (Ex 22⁵); and when a fatality occurred in the case of a servant, thirty shekels must be paid to the loser (Ex 21³²; see Dt 22¹⁹). One case only is mentioned of permitted commutation for bull-goring (Ex 21²⁸⁻³²). In case a married woman was killed, the fine was paid to her father's (instead of her own) family (Lewis, *Heb. Ant.*). Akin to restoration is redemption, referred to in Lv 25²⁷⁻²⁸, Ezk 18⁷⁻¹². Remuneration was expected for loss by fire, through negligence, of a standing grain field; or for the loss or damage of a pledge (Ex 22⁵⁻¹²⁻¹³). Under Rom. law a jailer losing his prisoner was liable to the punishment which was to be inflicted for the crime on which the arrest had been made (Ac 12¹⁹ 16²⁷). In NT morals it was taught that the guilt of theft could not be compounded by restitution. 'Let him that stole steal no more' (Eph 4²⁸); but Zacchæus, on the occasion of his pardon, proposed to restore fourfold (Lk 19⁸).

Retaliation was authorized in the code of Ex 21²⁴⁻²⁵. It was in use among other nations, esp. the Egyptians (cf. the *lex talionis* of the Romans). It was not unequivocally approved by ancient authors, because it was apt to degenerate into mere revenge and would often be unfair in its operation. The possibility of its baneful consequences is shown by Thomson (*Land and Book*, i. 447, 449). Diodorus Siculus instances a one-eyed man as suffering more than the victim with two eyes. Favorinus shows the injustice of this principle in operation as contained in one of the Twelve Tables, in that the same member may be worth more to one man than to another, as the right hand of a scribe or painter compared with that of a singer. Hence it had to be administered with certain modifications. Thus Heb. law adopted the principle, but lodged the application with the judge (Ex 21^{22^{ff}}, Lv 24¹⁹⁻²²); and an

aggressor, by the payment of a ransom, could compound with the aggrieved and be relieved from the full penalty of the law. A false accuser was required to suffer the same penalty that he proposed against the accused (Dt 19¹⁵). Heb. law was milder in spirit than that of heathen jurisprudence. Moses would not allow parents or children to suffer for the offences of each other (Dt 24¹⁶). This equitable exemption was not regarded by the Chaldeans (Dn 6²⁴), or even by the kings of Israel (1 K 21²¹, 2 K 9²⁶).

Sawing Asunder.—In He 11³⁷ the term is used to describe an ancient form of punishment, which was possibly a crushing under instruments of iron (Am 1³); and it is said, on the authority of Justin Martyr (*Dial. with Trypho*), to have been practised on Isaiah. There is an allusion to something of this sort in Pr 20²⁶ (RV) 'He bringeth the threshing wheel over them' (cf. Is 28²⁷⁻²⁸). Saws are mentioned in 2 S 12³¹, 1 Ch 20⁸; and while it is painful to admit that David may have been guilty of such severity, the literal interpretation is the most plausible and accords with the usages of the times. (See, however, Driver, *Heb. Text of Sam.* 226 ff.). In Shaw's *Travels* a case is described where the victim was placed between two boards and dismembered longitudinally (Smith, *DB*), and another case is mentioned by Harmer (*Observations*) as occurring on Stewart's journey to Mequinez.

Scourging with Thorns (see also **Stripes**).—In the marginal reading of Jg 8⁷, Gideon is represented as threatening to thresh the men of Succoth with thorns and briers, and in the margin to 8¹⁶ it is stated that they were thus punished, as Stanley (*Hist. Jew. Ch.*) suggests, with the acacia. The scorpions (עקרבִים) mentioned in 1 K 12¹¹ may have been knotted sticks, or ropes into which wire was plaited, or iron points or nails or cutting pieces of lead were inserted. Calmet guesses that David so treated the Moabites (2 S 8³). Some attempt to solve the much-mooted difficulties of 2 S 12³¹ by a reference to this mode of punishment.

Slavery.—In Heb. law it was possible for a person to fall into servitude for a limited time. A thief, when unable to make restitution, was sold with wife and children (Ex 22³). The misfortune of debt led to the same result (2 K 4¹, Neh 5⁵). The statute of limitations mercifully provided against oppressive usage and permanent enslavement (Lv 25³⁹⁻⁴³, Dt 15¹², Jer 34¹⁴). The Rabbins say a woman could not be sold for theft. Joseph proposed, as an Egyptian procedure, to make a slave of the detected pilferer of his cup (Gn 44¹⁷). See separate article.

Slaying by Spear or Sword.—This was an expeditious method, sometimes adopted in an emergency. The spear, javelin, or dart (He 12²⁰) was to be used on trespassers at the foot of Sinai (Ex 19¹³). Phinehas went so armed in eager and immediate punishment of the man found with a Midianitish woman (Nu 25⁷⁻⁸). The sword was taken by the Levites against the worshippers of the golden calf (Ex 32²⁷), and in Dt 13¹³⁻¹⁵ authority is given for its use in the wholesale slaughter of a city for idolatry. Some cutting instrument was employed by Abimelech in the murder of his brethren (Jg 9⁵). Samuel hewed Agag to pieces with the sword (1 S 15³³), and with the same Doeg massacred the priests in Nob (1 S 22¹⁸⁻¹⁹). According to the *lex talionis*, the young Amalekite who claimed that he drew the sword to kill Saul was put to death with the same kind of implement (2 S 1¹⁵), with which or the spear Ishbosheth was assassinated (2 S 4⁶⁻⁷). The sword was used in the summary executions ordered by Solomon (1 K 2²⁶⁻²⁹⁻³¹⁻³⁴). By it Elijah slew the prophets of Baal (1 K 19¹), and it was common in regal and martial proceedings, becoming still more prominent in post-Bab. times. The sword or axe was employed to carry out the order of Jehu on Ahab's

sons (2 K 10⁷) (see **Beheading**). Thus Jehoram murdered his brethren (2 Ch 21⁴), and Jehoiakim despatched Urijah (Jer 26²³). The sword as an instrument of punishment is specifically mentioned in Job 19²³. See also **Divine Visitation**.

The Stocks (σπαστήρ, ξυλὸν πεντεσύργων). This machine, though probably of Egypt. origin, is not described in the Mosaic legislation, but in it Hanani, the seer, was put by Asa (2 Ch 16¹⁰), and Jeremiah was punished (Jer 20²). In Jer 27² RV uses 'bars' for AV 'yokes,' and in Jer 29²⁶ changes 'prison' to 'stocks,' and 'stocks' to 'shackles,' that is, the pillory. It usually contained five holes for the neck, arms, and legs, which sometimes were inserted crosswise. One form (ῥῆ) was designed for the legs only. The word 'stocks' is employed in Job 13²⁷ 33¹¹ and Pr 7²², and this form of torture was probably in mind when Ps 105¹⁸ was written. It was an infliction among the Romans as indicated by Ac 16²⁴.

Stoning was the ordinary formal and legal mode of inflicting punishment in the earlier history of the children of Israel, and was in vogue before the departure from Egypt (Ex 8²⁶). Even beasts might be the victims, evidently as a spectacular example (Ex 19¹³ 21²⁸, 29, 32). Stoning was the penalty for taking 'the accursed thing' (Jos 7²⁵); for adultery and unchastity, the death sentence being pronounced in Lv 20¹⁰, and the means of carrying it out stated in Dt 22²¹⁻²⁴, Jn 8⁵⁻⁷; for blasphemy (Lv 24¹⁰⁻²⁴), and on this specious charge Naboth (1 K 21¹⁰) and Stephen (Ac 7⁵⁶) suffered, and an effort was made to show Jesus guilty by a feint to stone Him (Jn 10⁸¹); for divination (Lv 20^{6, 27}), idolatry (Dt 13¹⁰), dishonour to parents (Dt 21²¹), prophesying falsely (Dt 13^{5, 10}), and Sabbath-breaking (Ex 31¹⁴ 35², Nu 15^{35, 36}). Doubtless other capital crimes would thus be punished, and the city of Jerusalem was so threatened as if it were an individual culprit (Ezk 16⁴⁰). In an orderly proceeding the witness was to cast the first stone (Dt 17⁷, Jn 8⁷), and as the Rabbins say, on the chest; and if others were necessary to produce death, the bystanders hurled them. Lawless movements are mentioned or suggested, like that to which Moses thought himself exposed (Ex 17⁴), the accomplished acts on Adoram (1 K 12¹⁸) and Zechariah (2 Ch 24²¹), in the danger dreaded by the priests on account of their estimate of the Baptist (Lk 20⁶), and the assault on St. Paul in Iconium (Ac 14⁵). Poisoners among the Persians were laid on one stone and crushed by another (Rawlinson, *Anc. Mon.* iii. 247; see Mt 21⁴⁴, Lk 20¹⁸).

Strangling was a later form of capital punishment among the Jews (W. R. Smith, *BS* 398), but there is no scriptural authority for it. The convict was immersed in clay or mud, and a cloth was twisted around the neck and drawn in opposite directions by two lictors, so as to take the breath. During the operation molten lead might be poured down the throat (Sanhedr. 10. 3). The proposed humiliation of the Syrians before Israel (1 K 20³¹) may hint at the practice. See **Hanging**.

Stripes.—The Mosaic economy ordained that an offender might be punished with stripes (Lv 19²⁰, Dt 22¹⁸), not exceeding forty (Dt 25³); and this limit was carefully observed, as on St. Paul (2 Co 11²⁴), for a single stroke in excess subjected the executioner to punishment. The scourge was composed of three thongs, of which 39 was the largest multiple within the limit. It was the most common mode of secondary punishment, and the idea of disgrace did not seem to attach to it (but see Jos. *Ant.* iv. viii. 21). No station of life was exempt (see from Pr 17²⁶, indicating that the noble may be smitten, and 10¹³ that a rod is proper for the vacant-minded). The bastinado may have been used on Jeremiah (20³ 37¹⁰). Scourging was in-

flicted on a bondmaid overtaken in illegal intercourse (Lv 19²⁰), on a husband who falsely accused his wife, on a person who used abusive language (Jos. *Ant.* xiii. x. 6), on ecclesiastical offenders in the synagogue (Mt 10¹⁷, Ac 26¹¹), and it might be used on the debtor (Mt 5²⁵ 18³⁴). As to the method: the culprit lay on the ground while under castigation, in the presence of the judge, who during the infliction proclaimed the words in Dt 28^{58, 59}, and concluded with those in Ps 78³⁸. In later times an adult male was stripped to the waist and in a bending posture lashed to a pillar; a female received the stripes while sitting with head and shoulders bent forward; and a boy was punished with his hands tied behind him. The Mosaic regulations were in pleasing contrast with those of the Zendavesta, which authorizes as many as 10,000 stripes for the murder of a water dog (Darmesteter, *Intro.*). The Porcian law forbade the scourging of Rom. citizens (Cic. in *Verr.* v. 53, Ac 16³⁷ 22²⁶). Nevertheless, it was regarded as a wholesome punishment, and is zealously advocated in Pr 13²⁴ 23^{13, 14}; see also Sir 30¹⁻¹³. It is a symbol of divine correction (Ps 89³²), and is regarded as a purifier (Pr 20³⁰). The Moslems have a proverb that the stick is from heaven, a blessing from God.

Suffocation was a recognized Pers. mode of dealing with offenders. A case is described (2 Mac 13⁴⁻⁸): Menelaus was fastened to a revolving wheel in a standpipe 50 cubits high, filled with ashes, in which he was repeatedly immersed, until death ensued. Another description attributes a similar method to the Macedonians, the victim being placed on a beam, under which the ashes were constantly stirred until he was overcome with heat and dust (see Rawlinson, *Anc. Mon.* iii. 246).

LITERATURE.—In addition to the authorities cited in the art., the reader may consult Hamburger, *RE*, art. 'Lohn u. Strafe' (pp. 691-708) and 'Vergeltung' (pp. 1252-57); art. on the various crimes and punishments enumerated above, in Riehm, *HWB*, Herzog, *RE*, and Schenkel, *Biblex.*; Saalschutz, *das Mosaische Recht*; the *Bib. J. POUCHER.

CRIMSON.—Two words are tr. 'crimson' in both AV and RV, תִּלְלָהּ *tillāh* (Is 1¹⁵), לִצְמֵר *litzmer*, and קַרְמִיל *karmil* (2 Ch 2¹⁴ 3¹⁴). *Karmil* is a later word used in place of the earlier שָׁחֹרֶת *shāhōrēth*. *Shāhōrēth* is rendered once (Jer 4³⁰ AV) *crimson*. In the same passage in RV, and in all other passages where it occurs in both VSS, it is rendered *scarlet*. In Is 1¹⁸ צִנְוִים is rendered *scarlet*, LXX φοινικκόν, and תִּלְלָהּ *crimson*, LXX κόκκινον. It is probable that the distinction of these two colours was not accurately made at that time, as indeed it has not been preserved in the VSS. See COLOURS; and for the insect producing both these colours see SCARLET.

G. E. POST.

CRIPPLE.—See MEDICINE.

CRISPING PINS (סִפְסִיפִים, Is 3²³, RV 'satchels,' and 2 K 5²³, AV and RV 'bags'; see BAG 36).—To 'crisp' is in mod. language to 'crimp,' that is, curl in short wavy folds. The word is often used in Shaks., Milton, and others, of the curl a breeze makes on the water, as *Par. Lost*, iv. 237, 'the crisped brooks'; cf. Byron, *Child Harold*, iv. 211, 'I would not their vile breath should crisp the stream.' But the earliest ref. is to the hair; and a 'crisping pin' is an instrument for crimping the hair. Cf. Pocklington (1637), 'Fetch me my Crisping pinnes to curle my lockes.'

J. HASTINGS.

CRISPUS (Κρίσπος).—The chief ruler of the Jewish synagogue at Corinth (Ac 18⁸). Convinced by the reasonings of St. Paul that Jesus was the Messiah, he believed with all his house. The

apostle mentions him (1 Co 1⁴) as one of the few persons whom he himself had baptized. Tradition represents him as having afterwards become bishop of Ægina (*Const. Apost.* vii. 46). R. M. BOYD.

CROCODILE (RVm Job 41¹).—The crocodile is doubtless meant by leviathan in the above passage and Job 3⁸. In Ps 74¹⁴ leviathan refers to Pharaoh, under the simile of a crocodile. Cf. Ezk 29², where Pharaoh is called 'the great dragon (*tannim*, for the usual *tannin*) that lieth in the midst of his rivers,' and 32², where he is compared to a 'whale (also *tannim* AVm, RV text 'dragon') in the seas,' the reference being to the crocodile of the river (Arab. *bahr*=sea, the usual Arab. way of speaking of their great river the Nile). See LEVIATHAN, DRAGON. The crocodile is a saurian, sometimes attaining a length of 20 feet. His back and sides are covered with an armour, impenetrable to spears, swords, slingstones, and arrows (Job 41^{7, 10-17, 26, 28, 29}); not to be injured by clubs (RV for AV 'darts' v. 29), or even spherical bullets. The scales of which this armour is composed are beautifully marked. His jaws are set with numerous sharp-pointed teeth (v. 14). His neck is extremely powerful (v. 22). His tail is also very muscular, and a blow from it will crush a man. His legs are short. The toes of the fore feet are five, and of the hind feet only four. The inner two toes of the fore feet and the inner one of the hind feet are destitute of claws. The rest have strong claws (v. 30). The crocodile is well characterized as 'a king over all the children of pride' (v. 34). In one other passage (Jer 14⁶) RVm gives 'crocodile' for *tannim*, AV 'dragons.'

The Land Crocodile (Lv 11³⁰ RV) is not a crocodile, but probably the MONITOR (see CHAMELEON).

G. E. POST.

CROOKBACKT (Amer. RV 'crook-backed'), Lv 21²⁰. See MEDICINE.

CROSS is the tr. of the Gr. *σταυρός*, the name applied in NT to the instrument upon which Jesus Christ suffered death. Owing to the variety of the methods in which crucifixion might be inflicted, and the indefiniteness of the terms employed, it is impossible to determine with certainty the exact nature of the cross used in His case. *σταυρός* means properly a stake, and is the tr. not merely of the Lat. *crux* (cross), but of *palus* (stake) as well. As used in NT, however, it refers evidently not to the simple stake used for impaling, of which widespread punishment crucifixion was a refinement, but to the more elaborate cross used by the Romans in the time of Christ. Besides the *crux simplex*, or simple stake, we may exclude from consideration the so-called cross of St. Andrew, shaped like an X, the origin of which is much later, and concerning the actual use of which there is much doubt. There remain of the four varieties of cross usually enumerated only two, between which the choice must lie—the *crux commissa* or St. Anthony's cross, shaped like a T, and consisting of a single upright post, across the top of which is fastened a horizontal cross-bar; and the *crux immissa* or Lat. cross, in which the top of the upright shaft projects above the cross-bar, as in the form with which we are most familiar. In favour of the latter is not only the testimony of the oldest tradition, which in such a matter is entitled to great weight, but also the statements of the evangelists concerning the title nailed to the cross (Mt 27³⁷, Mk 15²⁶, Lk 23³⁸, Jn 19¹⁹⁻²²).

The upright post to which alone the name properly belongs, was usually a piece of some strong, cheap wood, pine or oak, of such length that when firmly planted in the ground the top was from 7½ to 9 ft. high. Most modern illustrations err in making the upright much too high.

It was erected on some spot outside the city, convenient for the execution, and remained there as a permanent fixture, only the cross-bar or *patibulum* being carried to the spot, usually by the person who was to suffer death. This consisted sometimes of a single piece of wood, more often of two parallel bars joined at one end, between which the head of the victim passed, and to the ends of which his hands were fastened. The cross which Jesus carried was doubtless simply the cross-bar in one of these two forms. Keim argues in favour of the simpler, partly because Jesus is represented as clothed, which would hardly have been the case had He carried the double *patibulum*; partly because of the carrying of it by Simon, which he regards rather as a rude joke of the soldiers than as rendered necessary by the weight of the cross-bar, which could in no case have been very heavy (*Jesu von Nazara*, iii. 398, Eng. tr. vi. 125). Besides the *patibulum*, the cross was furnished with a support for the body called the *sedile*. This was a small piece of wood projecting at right angles from the upright, upon which the victim sat as upon a saddle. It was designed to bear part of the weight of the body, which would otherwise have been too great to be supported by the hands alone. Whether there was also a support for the feet, the so-called *ὑποπόδιον*, is still in dispute.

The origin of crucifixion must be sought in the E., probably among the Phœn., from whom it passed to the Greeks and Romans. The long list of peoples given by Winer (*RWB* i. 680), and often copied, includes many cases which prove no more than impaling (so the Persians, Egyptians, Indians). For the practice among the Phœnicians, Carthaginians, and Numidians we have good authority. We hear of Alexander on one occasion crucifying as many as 2000 Tyrians. Among the Romans this was a very common punishment. At first they confined it to slaves and seditious persons, but gradually extended its use, especially in the provinces, here following Punic examples. In Sicily, Verres crucified even Roman citizens. The same was done by Galba in Spain. But these were rare exceptions, and excited universal indignation. In Judæa the punishment was frequently used. Thus Varus crucified 2000 rioters after the death of Herod the Great (Jos. *Ant.* xvii. x. 10). Under Claudius and Nero, various governors, Tiberius Alexander, Quadratus, Felix, Florus, crucified robbers and rioters of political and religious character, including two sons of Judas Galilæus (*Ant.* xx. v. 2; *BJ* ii. xii. 6, ii. xiii. 2), and even respectable citizens and Roman knights (*BJ* ii. xiv. 9). Titus crucified so many after the destruction of Jerus. that there was neither wood for the crosses nor place to set them up (*BJ* v. xi. 1). Especially under Tiberius, who held that simple death was escape, was this method of punishment frequent.

The Jews did not practise the crucifixion of living persons. The case of Jannæus, referred to by Jos. (*BJ* i. iv. 6), was an exception which called forth universal reprobation. But the hanging up of dead bodies meets us frequently in OT. See Jos 10²⁶ (the five kings), 2 S 4¹² (the murderers of Ish-bosheth), 1 S 31¹⁰ (the Philistines and Saul, cf. 2 S 21¹²), Ezr 6¹¹ (the decree of Darius), and is distinctly authorized in the law (Dt 21²², cf. Nu 25⁴, where J' commands this punishment in the case of the men who have led the people away to Baal-peor). In such cases the dead body became accursed, and must be buried before nightfall, that the land might not suffer pollution (Dt 21²²). Those who suffered crucifixion came under this curse, and hence the passage in Dt is applied to Jesus not only in the Talm., but also by NT writers. This explains the frequent reference to the cross in NT as the tree (*ξύλον*), that being the LXX tr. of the

Heb. קֶרֶב. (Cf. Ac 5³⁰ 10³⁹ 13²⁹, 1 P 2²⁴, and esp. Gal 3¹³ 'Christ redeemed us from the curse of the law, having become a curse for us; for it is written, Cursed is every one that hangeth on a tree.')

The method of crucifixion is clearly described in NT. After condemnation, the victim was scourged with the *flagellum*, a punishment so terrible that men often died under it. In Jesus' case the scourging seems to have taken place before rather than after, possibly to excite pity (Jn 19¹). The cross-bar was then bound on the victim's back, or his head inserted in the *patibulum*, and he was led through the city accompanied by the centurion and four soldiers detailed to conduct the execution. The title, a piece of wood covered with white gypsum on which the nature of his offence was set forth in letters of black, was usually carried before the condemned person, so that all might know the reason for which he was to die. This custom of carrying the cross gave rise to 'the proverb *ἀλφειν* or *λαμβάνειν* or *βαστάζειν τὸν σταυρὸν αὐτοῦ* which was wont to be used of those who on behalf of God's cause do not hesitate cheerfully and manfully to bear persecutions, troubles, distresses, thus recalling the fate of Christ, and the spirit in which He encountered it' (Thayer, *Lex.* p. 586). In this sense it is used by Jesus Himself in the well-known saying, 'If any man would come after me, let him deny himself, and take up his cross and follow me' (Mt 16²⁴, Mk 8³⁴, Lk 9²³; cf. Mt 10³⁸, Lk 14²⁷). Arrived at the place of execution, the prisoner was stripped, his garments falling to the soldiers as their booty. He was then bound to the *patibulum*, and both were raised on ladders until the cross-bar rested on the notch prepared to receive it. This was the more common custom. In a few cases the cross piece was fastened to the upright lying on the ground, and the whole then raised together. After the *patibulum* was firmly fastened, the hands were nailed to its extremities, and possibly the feet to the upright, although this was less frequent. Afterwards the title was fastened to the head of the cross, and the victim was left to the slow agonies of a death which might endure many hours, and even days.

All authorities agree that of all deaths crucifixion was the most abhorred. This was due not only to its pain, which was of the most intense character (see the account of Richter, quoted in Smith, *DB*), but also to its shame, which in the case of the Roman was due to its servile association, in that of the Jew to its rendering the sufferer accursed. Cicero in his oration against Verres (v. 66) declares that it is impossible to find a fit word to describe such an outrage as the crucifixion of a Roman citizen. '*Facinus est vinciri civem Romanum: scelus verberari: prope parricidium necari; quid dicam in crucem tolli? Verbo satis digno tam nefaria res appellari nullo modo potest.*'

The shame of this death is often referred to in NT. So He 12⁹ 'Jesus, who endured the cross, despising shame'; He 13¹³ 'Let us therefore go forth unto him without the camp, bearing his reproach'; cf. He 11²⁶. With more particular reference to its relation to the ceremonial law, Gal 3¹³ 'Christ redeemed us from the curse of the law, having become a curse for us; for it is written, Cursed is every one that hangeth on a tree'; 1 Co 12⁹ 'No man speaking in the Spirit of God saith Jesus is anathema.' Because of this character, the death of Jesus upon the cross, viewed in the light of His Messianic claims, became not merely foolishness to Greeks, but a stumbling-block to Jews (1 Co 1^{18, 23}, cf. Gal 5¹¹). It was an outrage to Jewish propriety that He who had become accursed in the sight of the law by His death on the cross should claim to be the Messiah in whom the law was fulfilled. This element of ceremonial defilement has

been particularly emphasized by C. C. Everett in *The Gospel of Paul* (Boston, 1893), as a clue to the understanding of St. Paul's view of the significance of Christ's death. This significance he finds not at all in its penal character, but in its character as ceremonial defilement. Christ by His death on the cross became accursed (anathema). Those Christians who accepted this accursed sufferer as the Messiah of God, shared His curse, and were in like manner cut off by the law. But this cutting off by the law brought with it also freedom from the law, since those who were thus outcast were no longer within its realm. Thus Christ's death under the law, followed by His resurrection, was God's way of showing that the Jewish law was done away, and a new method of salvation, even that through faith in Christ, ushered in.

The use of the word 'cross' in a theological sense, as a brief designation of Christ's saving work, is characteristic of St. Paul. The gospel of salvation is 'the word of the cross' (1 Co 1²⁸). Those who suffer persecution because of their faith in the saving efficacy of Christ's death, do so 'for the cross of Christ' (Gal 6¹²). They who refuse this gospel are 'enemies of the cross of Christ' (Ph 3¹⁸). The cross is not only the instrument of the reconciliation between God and man (Col 1²⁰, Eph 2¹⁶), through the death of Him who there suffered (Col 1²⁰ 'the blood of the cross'), but also between Jew and Gentile (Col 2¹⁴ the bond nailed to the cross), since by it the 'bond written in ordinances,' which up to that time had barred the way of the Gentiles to God, is put out of the way. It was through the cross, *i.e.* acceptance of the crucified Christ as Saviour, that the world was crucified to Paul, and Paul to the world (Gal 6¹⁴). Thus crucifixion becomes not merely the means of salvation, but the type of that absolute renunciation of the world which characterizes the true Christian life (Gal 5²⁴).

LITERATURE.—The articles on *Cross* and *Crucifixion* in Smith, *DB* and in Herzog, *RE*. Monographs by Lipsius, *De Cruce*, Antwerp, 1595; Nicquetus, *Titulus s. Crucis*, Ant., 1670; Curtius, *De Clavis Dominicus*, Ant., 1670; Bartolinus, *De Cruce*, Amsterdam, 1670; and more recently by Zöckler, *Das Kreuz Christi*, 1875, and Fulda, *Das Kreuz und die Kreuzigung*, 1878. Much information is contained in the Lives of Christ of Keim and Hase. On the theological significance of the cross, cf. besides the *Biblical Theologies*, Everett, *The Gospel of Paul*, Boston, 1893.

W. ADAMS BROWN.

CROW occurs once in Apoc. (Bar 6⁶⁴), where the helplessness of idols is illustrated by the remark that 'they are * as crows (*κορώναι*) between heaven and earth.' In Jer 3² the LXX has *ὡσεὶ κορώνη ἐρημουμένη* for MT *כְּעֶרְבִי כְּעֶרְבִי* ('as an Arabian in the wilderness,' RV), which implies the punctuation עֶרֶב ('raven') instead of עֶרְבִי ('Arabian'). The common LXX equivalent of עֶרֶב is *κόραξ*. See RAVEN.
J. A. SELBIE.

CROWN.—In OT (both AV and RV) *Crown* is used to translate several Heb. words, the particular meanings of which must be distinguished. 1. The golden fillets or mouldings placed around the ark of the covenant (Ex 25¹¹ 37²), the table of shewbread (Ex 25²⁴ 37¹¹) and its border (Ex 25²⁵ 37¹²), and the altar of incense (Ex 30^{3, 4} 37^{26, 27}) in the Mosaic tabernacle are called Crowns (RVm 'rim or moulding'). The Heb. word (קִרְיָה) means a cincture like a wreath, and describes rather the foliated appearance of the band than its position on the object to which it was attached. (LXX tr. it by a phrase meaning 'twisted golden wavelets' [*κυματρία χρυσά στρεπτά*] or 'twisted golden crown' [*στρεπτήν στεφάνην χρυσήν*]; Pal. Targ. by קִרְיָה a wreath; Vulg. by *corona*, whence Eng. translation. The later Rabbins also describe it as קִרְיָה a crown). The

* The Syr. VS reads 'are not.'

brevity of the description in Ex has occasioned differences of opinion among archaeologists as to both its purpose and its position. Some imagine it a rim to prevent objects from falling off. But the border which passed round the table of shewbread, as well as the table itself, had a crown; nor would the ark need a rim for the purpose suggested. The crown therefore was ornamental. As to its position, Bähr (*Symbolik*, i. 377, 378) regards the crown of the ark as an ornamental design placed round its middle, but his arguments are not conclusive; and since the crown is said to be 'upon' (עָלַי) the ark, we should doubtless imagine it as placed round the top of the sacred chest as it was round the top of the table of shewbread (see Neumann, *Die Stiftshütte*, p. 127). Bähr, however, also denies that 'the border of a handbreadth round about' the table (Ex 25²⁰) had a crown of its own (*Symb.* i. 409, citing also the Rabbins Jarchi and Aben-Ezra; so Keil, *Archæol.* § 19, but not in his *Comm.*; Nowack, *Heb. Arch.* ii. 60), but the language of Exodus seems clearly to state that it had (Jahn, *Archäol.* p. 421; Abarbanal cited by Bähr; Neumann, p. 96; Bissell, *Bibl. Antiq.* p. 292). The crown of the altar of incense likewise is placed by some round its top (Carpzov, *Appar. Crit.* p. 273; Neumann, p. 120), by others round its middle (Bähr, i. 378, 419). But, whatever their positions, these crowns were evidently golden wreaths intended for decoration. Assyr. monuments afford examples of similar ornamentations (Neumann, p. 27; Layard, *Nineveh*, ii. 236, 354).

2. Another word tr. Crown (קִרְיָה) means consecration, and is applied to the symbolic ornament worn by the high priest upon his forehead over the mitre (Ex 29⁶ 39³⁰, Lv 8⁹ 21¹²); and to that worn upon the head by the Heb. monarch (2 S 1¹⁰, 2 K 11¹², 2 Ch 23¹, Ps 89³⁹ 132⁸, so also Zec 9¹⁶). It is also used figuratively for dignity or honour (Pr 27²⁴, Nah 3¹⁷ 'crowned ones'). The high priest's crown (LXX τὸ πέταλον, Vulg. *lamina*) was a narrow plate (פָּתָל) of pure gold, on which was engraved 'Holy to J'. Tradition represents it as about two fingers broad. It was fastened 'upon the mitre above' by a piece of blue lace (Ex 28³⁷ 39³¹). The Rabbin commentators suppose three ribbons of lace—two from the ends and one from the top of the front of the crown—all tied together at the back of the head. Jos. (*Ant.* III. vii. 6) describes the high priest's crown as of three rows, one above another, upon which were carved cups of gold like the calyx of the plant Hyoscyamus, while the plate with the inscription covered the forehead; but he probably refers to an ornamentation introduced at a late period. Acc. to 1 Mac 10²⁰ a crown was given to the high priest Jonathan by Alex. Epiphanes. Braunius (*De Vestitu Sacerd. Heb.* ch. xxii.) admits that Ex gives no support to Josephus' description. The crown was the symbol of the high priest's special consecration, as the people's representative, to make atonement for sin (Ex 28³⁸). The same term is also applied to the symbolic headtire of the Heb. king, but no description of it is given (LXX τὸ βασιλευον, ἰέξερ, ἕξερ, τὸ ἀγλασμα). It was prob. a light, narrow fillet of silk, perhaps studded with jewels, like the early diadems of E. kings (see DIADEM). It was light enough to be worn in battle (2 S 1¹⁰). The term indicates that the king, as well as the priest, was divinely consecrated to his office. Hence it is attributed to the ideal Davidic King (Ps 89³⁹ 132¹⁸), and His people are called the stones of their Saviour's Crown (Zec 9¹⁶).

3. The commonest use of *Crown* in OT (generally as tr. of קִרְיָה, LXX στέφανος, but in Est of קִרְיָה, Gr. κίδαρις or κίταρις, LXX διάδημα) corresponds with the use of the word in mod. times. It is applied to crowns worn by kings (2 S 12³⁰, 1 Ch 20², the crown of the king of Rabbah, which weighed a

talent of gold; Est 1¹¹ 2¹⁷ 6⁸ 8¹⁵, the tiaras of the king and queen of Persia, probably high, jewelled turbans; see also Is 62³, Jer 13¹⁵, Ezk 21²⁶); to wreaths worn at banquets (Ca 3¹¹, Is 28^{1.3.5}, Ezk 23⁴²); and fig. as an emblem of honour or victory (Job 19⁹ 31³⁶, Ps 8⁵ 21³ 65¹¹ 103⁴, Pr 4⁹ 12⁴ 14¹⁸ [קִרְיָה] 24 16²¹ 17⁶, La 5¹⁶, Ezk 16¹²). In Is 23⁸ Tyre is called 'the crowning city' because ruling over kingdoms and dispensing crowns. Some have supposed that the kings of Israel had two crowns—the light diadem mentioned above, and a heavier one for state occasions. It has also been inferred from 2 S 12³⁰ that the crown taken by David from the king of Rabbah became the state crown, and Jos. (*Ant.* VII. vii. 5) enlarges the biblical account by stating that 'this crown David ever after wore on his own head.' But there is no positive evidence for this, and only the term קִרְיָה is used in the Bible for the crown of the Heb. kings. In Zec 6^{11.14} a crown (קִרְיָה) is represented as placed on Joshua, the high priest, to indicate the union of the royal and priestly offices; but the usual word for the kingly crown of Israel is in this instance apparently avoided because it described also, as has been stated, that of the high priest. The crowns used at banquets were doubtless wreaths of flowers (see Is 28¹, also Wis 2⁸, 3 Mac 4⁸ 7¹⁶). Heroes were also received with them (Jth 3⁹), and dwellings decorated (1 Mac 4²⁷).

4. In 1 Mac 10²⁰ 11³⁵ 13³⁹ allusion is made to crowns due from the Jews to the Syrian kings, by which are meant, not coins so named, but money tribute, which represented allegiance as formerly the presentation of a crown had done (1 Mac 13³⁷, 2 Mac 14⁴; Jos. *Ant.* XII. iii. 3, στεφαντρης φόρος; see Levy, *Gesch. der Jüd. Münzen*; Madden, *Jewish Coinage*).

The Heb. has other words synonymous with those mentioned (as קִרְיָה head-dress; קִרְיָה turban; קִרְיָה diadem; קִרְיָה garland), but their consideration does not fall here. The later Jews spoke of three crowns, of the law, the priesthood, and the king, and added 'the crown of a good name' as best of all (Carpzov, *Appar. Crit.* p. 60; Braunius, *De Vestitu*, p. 634). The word is also used in AV for the top of the head (Gn 49²⁶, Dt 33²⁰, 2 S 14²⁶, Is 3¹⁷, Jer 2¹⁶ 48⁴⁰; tr. *pate* Ps 7¹⁶, *head* [RV 'crown of the head'] Dt 33¹⁶, *scalp* Ps 68²²).

In NT the AV gives 'Crown' for two words (στέφανος and διάδημα) which RV properly distinguishes. Στέφανος was not applied by the Greeks to a king's crown. 'It is the crown of victory in the games, of civic worth, of military valour, of nuptial joy, of festal gladness . . . the wreath in fact, or the garland . . . but never, any more than *corona* in Latin, the emblem and sign of royalty' (Trench, *Syn. of NT*, xxiii.; see, too, Lightfoot on Ph 4¹). Roman law likewise regulated the bestowment of special *coronæ* as rewards of military valour and civic service; and while it was customary to use crowns on ceremonial and festive occasions, they never symbolized royalty. The word for the latter was *diadema* (see DIADEM). This distinction is observed in NT, though not always in the LXX (see 2 S 12³⁰, 1 Ch 20², Ps 21(20)⁴, Ezk 21²⁶, Zec 6^{11.14}). In NT a crown is an emblem of victory or reward. It describes the Christian's final recompense (1 Co 9²⁵, Rev 3¹¹ 4^{4.10}), specifically called a crown of righteousness (2 Ti 4⁸), of life (Ja 1¹², Rev 2¹⁰), of glory (1 P 5⁴). St. Paul applies it to his converts as being his reward (Ph 4¹, 1 Th 2¹⁹). Hence in the Apoc. a crown is represented on the conquering Christ (Rev 6² 14¹⁴), on the symbolic locusts (Rev 9⁷), and on the 'woman' of ch. 12, as a sign of victory. In 12³ 13¹ 19¹², on the other hand, the 'dragon' and the 'beast' and the kingly Christ have diadems, the 'many diadems' signifying Christ's universal empire (see v. 18). Thus *Crown* in NT is the emblem of attainment, the

reward of service. Even the 'crown of thorns' was probably a mock symbol of victory, suggested to the soldiers by the *coronæ* of military or civic service; though Trench remarks that 'woven of such materials as it was, *διάδημα* could not be applied to it.'

While the use of crowns among the Greeks and Romans seems to have originated with the athletic games,—allusions to which are made by St. Paul in the places cited above,—and while the crown does not appear in Homer as an emblem of victory, later traditions attributed its invention to one or other of the gods. Those traditions are collected by Tertullian in his tract *De Corona*, in which he violently inveighs against the use of crowns by Christians.

CROWN OF THORNS.—See THORN. **CRUCIFIXION.**—See CROSS.

CRUELTY.—The habits and sentiments of Gentiles and average Israelites, both in OT and NT, are often tainted with gross cruelty. Even acts of divinely appointed leaders of Israel, utterances of the psalmists and prophets, and ordinances of the inspired Law, sometimes seem inhuman when judged by the highest standards of modern Christianity. These standards require the righteous man to treat human life as sacred, and to refrain scrupulously from inflicting unnecessary pain. But Christianity has only recently secured any widespread practical recognition of these principles, and even now they prevail only with minorities in a few of the most advanced communities. Moreover, civilization has developed a sensitiveness which often renders the punishment of a criminal really as severe as in ancient times; the mitigation of physical cruelty has been compensated for by the refinement of mental torture. The constant tendency of inspired teaching is towards humanity, and ordinances which seem inhuman often mitigate prevailing barbarity.

The facts are as follows. The extermination of enemies is frequently commanded, Dt 20¹⁷ etc., and such extermination is described with apparent approval, Jos 6²¹ etc. David massacred the Ammonites with great barbarity, 2 S 12³¹, 1 Ch 20³, cf. 2 K 15¹⁶. Amongst the Israelites themselves the Law ventures to impose only a moderate limitation of blood-revenge. Ex 21^{20, 21} (JE) forbids the actual beating to death of a male or female slave, but does not feel it possible to deal with cases in which the victim survives a day or two. Death is to be inflicted for a large number of offences, some of them slight, e.g. sabbath-breaking, Ex 35² (P). An incestuous person, Lv 20¹⁴ (H), and an unchaste woman of the priestly clan, Lv 21⁹ (H), were to be burnt to death. The OT records great cruelty on the part of Gentiles, barbarous outrages on women and children, 2 K 8¹², Hos 13¹⁶, Am 1¹³, and cruel mutilation, 2 K 25⁷. These are more than borne out by the sculptures of the Assyrians, who delighted to depict flaying alive and other tortures inflicted upon their enemies, e.g. on the Elamite prisoners on slabs 48–50 in the Kouyunjik Gallery of the British Museum. In the NT we meet with the barbarous Roman punishments of scourging and crucifixion. W. H. BENNETT.

CRUSE.—See FOOD. The English word, now archaic though not quite obsolete, is apparently of Scandinavian origin, and means an earthenware

jar for holding liquids; less freq. for drinking from, as Skelton (1526), 'Then he may drink out of a stone cruse.' In AV it holds water (1 S 26^{11, 12, 16}, 1 K 19⁶), oil (1 K 17^{12, 14, 16}), honey (1 K 14³), and salt (2 K 2²⁰). J. HASTINGS.

CRYSTAL.—1. In Job 28¹⁷ *יָסַדִּים* is rendered in AV 'crystal' (i.e. rock-crystal); and as it occurs in a passage descriptive of the treasures of mines, this is probably to be accepted as correct. (See, however, *Oxf. Heb. Lex.* and RV which tr. 'glass'). 2. In Ezk 1²² another word *קָרָדִּים* is also tr. 'crystal' (RVm 'ice'), and, in this case, there is no certainty whether rock-crystal or ice is referred to (cf. Davidson, *ad loc.*); the same remark applies to *κρυσταλλος* in Rev 4⁶ 21¹¹ 22¹; but this is immaterial in the case of poetic imagery, as the two substances are similar as regards transparency and absence of colour; hence the Greeks applied the same word (*κρυσταλλος*) to both. 3. In Job 28¹⁸ RV substitutes 'crystal' for 'pearls' of AV as tr. of *יָסַדִּים*.

Rock-crystal is pure quartz, crystallizing in hexagonal prisms with pyramidal apices, and is abundant in veins amongst the older rocks in nearly all countries. It was used in ancient times for ornamental purposes, and being softer, could be cut by the diamond or corundum. It is possible that the Heb. word (*קָרָדִּים*) tr. 'diamond' as one of the stones on the breastplate of the high priest was really rock-crystal, as it was engraved with the name of one of the tribes (Ex 28²¹). [See, however, art. STONES (PRECIOUS), and *Oxf. Heb. Lex.*, where the jasper or the onyx are suggested as equivalents of *קָרָדִּים*.] E. HULL.

CUB (*כּוּב*, AV **Chub**), in Ezk 30⁵, is almost certainly a corruption of *לִיב* (i.e. Lybia) as was read by LXX. The 'Lybia' of AV is a mistranslation of Put (see RV). Cf. Nah 3⁹, where Lybians are mentioned along with Cush (Ethiopia), Egypt, and Put, as here; also 2 Ch 12³ 16². Identifications which assume the correctness of the text lead to no satisfactory result, and hardly deserve notice. J. SKINNER.

CUBIT.—See WEIGHTS AND MEASURES.

CUCKOO (*קִיקִי* *shahaph*, *λάρος*, *Iarus*).—The Heb. word is from a root signifying *leanness*. It occurs only in Lv 11¹⁶ and Dt 14¹⁵, in the list of unclean birds. No scholar now renders it by *cuckoo* (*cuckoo*). Various slender birds have been proposed, as the *stormy petrel*, the *shearwater*, the *tern*, and the *gull* or *seamew*. The RV, following the LXX and the Vulg., has *seamew*. It is probably to be understood generically for birds of the *Laridæ*, the *gull* family. G. E. POST.

CUCUMBER (*קִישְׁשׁוּ'יִם* *kishshu'im*, *σικυοί*, *cucumeres*).—Cucumbers are universally cultivated in the E., and are a favourite article of food. Two species or varieties are common, *Cucumis sativus*, L., which is the ordinary green or whitish cucumber, and *C. Chate*, L., which is originally an Egyptian plant. The former is called in Arab. *khiyār*. It has a very delicate flavour, and is more wholesome than the European variety. The latter is known by the name *kiththā* or *miktī*, which is a modification of the Heb. *קִישְׁשׁוּ'יִם*, and is doubtless the vegetable referred to as one of the good things of Egypt (Nu 11⁵). It is longer and more slender than the common cucumber, being often more than a foot long, and sometimes less than an inch thick, and pointed at both ends. It has a thick, hairy, mottled or striped green rind, with a less juicy pulp than the *khiyār*, but a similar, though less delicate, flavour. Although originating in Egypt, it is everywhere

cultivated in the East. It is esteemed coarser than the *khiyār*, and sold cheaper.

A cardinal difference between the *kiththā* and the *khiyār* is that the latter cannot be cultivated without constant irrigation. The *kiththā*, while often cultivated on watered soil, and then attaining a large size, grows on perfectly dry soil also, without a drop of water through the hot summer months, during which it flourishes. The word *khiyār* is said to be of Persian origin.

A 'LODGE IN A GARDEN OF CUCUMBERS.'

The expression 'garden of cucumbers' (Is 1⁸) is *מִקְשָׁה* *mikshāh*, a noun of place, meaning the place of *kishshu*, and is exactly reproduced in the Arab. *mikthā'at*. The lodge is the booth of the man who watches the patch. This booth is made of four upright poles, 6 or 8 ft. high, planted in the ground, and tied by withes of flexible bark to four horizontal poles at their tip. Over the frame made by these horizontal poles are laid cross poles, and, over all, branches of trees. Sometimes a floor is made by tying four other horizontal poles at a few inches or feet above the ground, and laying over them a flooring of cross poles. Walls are sometimes made of wattled branches, more or less enclosing the frail tenement. Such booths are to be seen in all the cucumber and melon patches, and in vineyards and other cultivated land which requires watching. They are fitting emblems of instability, as the withes with which they are tied together give way before the winds of autumn, the branches are scattered, and the whole structure soon drops into a shapeless heap of poles and wattles, themselves soon to be carried off and used as firewood, or left to rot on the ground.

G. E. POST.

CULTURE.—Only 2 Es 8⁸ AV and RV, 'give us

seed unto our heart, and culture to our understanding, that there may come fruit of it.' The Eng. word is a direct and accurate tr. of the Lat. (*cultura*), and is used in its own earliest sense of the cultivation or tillage of the soil. Coverdale, Matthew, and the Bishops have 'build,' Geneva 'prepare,' but Douay 'give tillage to' the understanding. J. HASTINGS.

CUMBER (from old Fr. *combrer*, 'to hinder,' which is from low Lat. *cumbrus*, i.e. *cumulus*, 'a heap'; thus c. = 'put a heap in the way').—1. To harass, worry, Lk 10⁴⁰ 'Martha was cumbered about much serving.' Cf. Coverdale's tr. of 1 K 21⁵ 'What is ye matter that thy sprete is so combred?' The usual prep. is 'with'; here 'about' is a lit. tr. of the Gr. *περί* (*periespato* *perī pollōn diakoniar*). RVM gives 'distracted,' like Ostervald's *distracte*, and as 1 Co 7³⁵ 'without distraction,' AV and RV (*ἀπεροσπόσως*). 'Cumbered' is Tindale's; Wyclif has 'martha bisied aboute the oft seruyse'; Coverdale, 'Martha made hir self moch to do to serue him.' 2. To 'block up,' 'burden,' Lk 13⁷ 'Cut it down; why cumbereth it the ground?' again from Tindale (and scarcely obsolete in this sense); Wyclif 'ocupieth,' fr. Vulg. *occupat*; Geneva, 'why kepeth it the ground baren?' a better tr. of the Gr. here (*καταργέω*, a favourite word with St. Paul, elsewhere only in this passage and He 2¹⁴, AV 'destroy,' RV 'bring to nought'). Cf. Bunyan, *Holy War* (Clar. Press ed. p. 47), 'Thou hast been a Cumber-ground long already.' **Cumbrance**, only Dt 1¹² 'your c.' (*כִּמְבָרָה*), and Is 1¹⁴ RVM 'your new moons . . . are a c. unto me' (*כִּי עָלֵי לַפְּרָה*), AV and RV 'trouble'. The mod. forms 'encumber,' etc., are not quite equivalent, being too wholly passive. As Davies (*Bible Eng.* p. 211) remarks, Spenser's 'cumbrous gnattes' (*F. Q. I. i. 23*) seems now a singularly inappropriate epithet. J. HASTINGS.

CUMI.—See TALITHA.

CUMMIN (*קָמְוֹן* *kammōn*, *κύννον*, *cuminum*).—The seed of *Cuminum cyminum*, L., an umbelliferous plant cultivated in Bible lands. It is known in Arab. by the same name as in Heb., *kammōn*, and is used in cookery as a condiment, esp. in the dishes prepared during the fasts, which, being made without meat, require more seasoning to make them palatable. It has also carminative properties, and is used in poultices for the dissipation of swellings. It has a penetrating odour and savour, not over-agreeable to most Europeans. It is twice mentioned in Scripture. Once the reference is to the mode of threshing it (Is 28^{26, 27}) by a rod instead of the *mōrag*. This is still practised with this and other seeds of plants cultivated in small quantities. It is also mentioned as subject to tithe (Mt 23²³). G. E. POST.

CUN (*כָּן*), 1 Ch 18⁸.—See BEROETHAI.

CUNNING.—The Anglo-Saxon *cunnan* meant both 'to know' and 'to be able,' whence both *can*, which Bacon uses as a finite verb, *Essays* (Gold Treas. ed. p. 40), 'In Evill, the best condition is, not to will; The Second, not to Can'; and also *cunning*, which is really the pres. ptep. of the A.-S. *cunnan* as it appears in its Middle-Eng. form *cunnen*, to know. 'Cunning,' then, up to and after 1611, is generally knowledge, skill. Cf. Purvey's Preface to the Wycliffite Version of 1388, 'the Holy Spyrit author of all wisdom and cunnyng and truth'; Bp. Barlowe's translation of Ja 3¹³ (*Dialogue* [1531], ed. of 1897, p. 34), 'Who that among you is wyse endued with connyng'; and Shaks. *Othello*, III. iii. 50, 'That errs in

ignorance, and not in cunning.' In AV the subst. 'cunning' occurs only Ps 137⁶, 'If I forget thee, O Jerusalem, let my right hand forget her cunning.*' The adj. is common, applied to men who are skilful in some work, or to the work they do skilfully. Thus Ex 35³⁵ 'the c. workman . . . and . . . those that devise c. work.' Once to women, Jer 9¹⁷, in ref. to their skill as hired mourners (on which see Thomson, *Land and Book*, iii. 403). But in Eph 4¹⁴ 'c. craftiness,' 2 P 1¹⁶ 'cunningly devised fables,' the meaning is probably 'wily,' 'deceitful.' Amer. RV prefers 'skilful' where cunning has that meaning (except Is 3³ 'expert').

J. HASTINGS.

CUP.—1. In OT the rendering of various words, the precise distinction between which, either as to form or use, is unknown to us. The usual word is כוס *kôs* (ποτήριον, *calix*), the ordinary drinking-vessel of rich (Gn 40^{11, 13, 22}) and poor (2 S 12²) alike, the material of which varied, no doubt, with the rank and wealth of the owner. Numerous illustrations are found on the reliefs of the Assyrian palaces, such, e.g., as the cups in the hands of Assurbanipal and his queen, in a scene often reproduced. With these compare the specimens of pottery actually found on Jewish soil, in Bliss, *Mound of Many Cities*, Nos. 174, 181, etc., and the illustration cited below.

Joseph's divining cup (כוסות Gn 44²⁰) was of silver, and, we may infer, of elaborate workmanship, since the same word is used for the bowls (AV) or cups (RV), i.e. the flower-shaped ornamentation, on the candlestick of the tabernacle (which see for details, also BOWL). That the כוסות was larger than the *kôs* is clear from Jer 35⁵. The כוסות *kôsâvôth*, of 1 Ch 28¹⁷ (Phoen. כוס, see Bloch's *Phoen. Glossar*, *sub voce*), were more probably flagons, as RV in Ex 25²⁹ 37¹⁶ (but Nu 4⁷ RV cups). The 'aggân (כוס Is 22²⁴) was rather a basin, as Ex 24⁶, than a cup (EV).

In NT ποτήριον is the corresponding name of the ordinary drinking-cup (water Mt 10⁴² etc., wine 23²⁸ etc.). The 'cup of blessing' (1 Co 10¹⁶) is so named from the כוסות *kôs habbêrâkhhah* of the Jewish Passover (which see, also LORD'S SUPPER). The cup represented on the obverse of the so-called Maccabæan shekels may be a cup such as was used on this occasion.

2. The word cup has received an extended figurative application in both OT and NT. (a) As in various other literatures, 'cup' stands, esp. in Psalms, for the happy fortune or experience of one's earthly lot, mankind being thought of as receiving this lot from the hand of God, as the guest the wine-cup from the hand of his host, Ps 16⁵ 23⁵ 73¹⁰ etc. But also conversely for the bitter lot of the wicked, Ps 11⁶ (cf. c. below), and in particular for the sufferings of Jesus Christ, Mt 20^{22, 23}, Mk 10^{38, 39} 14³⁶, Lk 22⁴², Jn 18¹¹. (b) Another figure is the 'cup of salvation' (lit. 'of deliverances'), Ps 116¹³. The reference is to the wine of the thank-offerings (כוסות), part of the ritual of which was the festal meal before J' (cf. vv. 14a. 17a.). A striking parallel is found in the inscription of יחזקאל

* The Heb. is simply 'let my right hand forget' (ימי ימיני חשכתי), which may be dealt with in three ways. 1. As a passive: so LXX, ἐπιλησθῆναι ἢ δεξιᾶ μου; Vulg., oblivioni detur dextera mea; Luth., so werde meiner Rechten vergessen; Ostervald, que ma droite s'oublie elle-même; Coverdale, 'let my right hand be forgotten.' But the Heb. as it stands cannot be tr'd passively. 2. As a corrupt text. The simplest emendation is proposed by Delitzsch, כוסות, which gives the pass. at once, and with which may be compared Jer 23⁴⁰. Other suggested emendations will be found in Cheyne, *Book of Psalms*, crit. n. *in loc.* But Wellhausen (in Haupt) leaves the Heb. untouched and unnoticed. 3. As an ellipsis. So Del. as an alternative, 'let my right hand show itself forgetful' (cf. Wyclif's tr. 'my right hond be gounn [given] to forgetting'); Cheyne, 'let my right hand deny its service' (but in parchment ed. 1884, 'let the strength of my right hand dry up'); Geneva, 'forget to play'; Bishops' Bible, AV, and RV 'forget her cunning.'

of Gebal (Byblus), who is figured on his stele in the act of presenting such a cup of thanksgiving to the local deity (see his inscription in *CIS* i. 1). (c) By a still bolder figure the punitive wrath of the offended Deity is spoken of as a cup which the guilty, Israelites and heathen alike, must drain to the dregs. So Jer 25^{15a} (the wine-cup [of] fury), Ezk 23³²⁻³⁴, Is 51^{17a} ('the cup of trembling' RV 'staggering'), Zec 12² (RV 'cup of reeling'), Ps 75⁸, Rev 14¹⁰ 16¹⁹ 18⁶, for all which see the commentaries. (d) Lastly, we have 'the cup of consolation (ποτήριον εἰς παράκλησιν)' offered to the mourners after the funeral-rites were performed, Jer 16⁷ (cf. Pr 31⁶ and see Commentaries *in loc.* and Schwally, *Das Leben nach d. Tode*, § 8).

A. R. S. KENNEDY.

CUPBEARER (כוסבאר).—An officer of considerable importance at Oriental courts, whose duty it was to serve the wine at the table of the king. The first mention of this officer is in the story of Joseph (Gn 40¹⁻¹⁵), where the term rendered 'butler' (wh. see) in EV is the Heb. word above, rendered in other passages *cupbearer* (Arabic *es-sâkî*). The holder of this office was brought into confidential relations with the king, and must have been thoroughly trustworthy, as part of his duty was to guard against poison in the king's cup. In some cases he was required to taste the wine before presenting it. The position of Nehemiah as cupbearer to Artaxerxes Longimanus was evidently high. Herodotus (iii. 34) speaks of the office at the court of Cambyses, king of Persia, as 'an honour of no small account,' and the narrative of Neh. shows the high esteem of the king for him, who is so solicitous for his welfare that he asks the cause of his sadness (2²). The cupbearers among the officers of king Solomon's household (1 K 10⁵) impressed the queen of Sheba, and they are mentioned among other indications of the grandeur of his court, which was modelled upon courts of other Oriental kings. The Rabshakeh, who was sent to Hezekiah (2 K 18¹⁷), was formerly supposed to have been cupbearer to Sennacherib, but the word (כוסבאר) means *chief of the princes* (see Del. on Is 36², and Sayce, *HCM* p. 441). Among the Assyrians, the cupbearers, like other attendants of the king, were commonly eunuchs, as may be seen from the monuments; and such was the case generally at Oriental courts. The Persians, however, did not so uniformly employ eunuchs, and probably never so degraded their own people or the Jews who served them. Certainly, Nehemiah was not a eunuch. Herod the Great had a cupbearer who was a eunuch (Jos. *Ant.* XVI. viii. 1).

H. PORTER.

CUPBOARD (κυλίκιον, 1 Mac 15³²).—A sideboard used for the display of gold and silver plate. This is the earliest meaning of cupboard, a board or table for displaying cups and other vessels; cf. Greene (1592), 'Her mistress . . . set all her plate on the cubboorde for shewe.'

J. HASTINGS.

CURIOS.—Of the many meanings which once belonged to this word only two now remain, *inquisitive* and *peculiar*. Of these the first is found in Apoc., 2 Es 4²³ (*interrogare*) 9¹³ (*curiosus esse*), Sir 3²³ (μη περιεργάζου, RV 'Be not over busy'), 2 Mac 2³⁰ (πολυπραγμανοῦν). In OT curios occurs as a description of 'the girdle of the ephod' in Ex 28^{3, 27, 28} 29^{5, 20, 21}, Lv 8⁷, for which RV substitutes 'cunningly woven,' Amer. RV 'skilfully woven.' 'Curious girdle' (AV) or 'cunningly woven band' (RV) represents one word in Heb., כִּשְׁתֵּי *kêsheth*, which comes from כִּשְׁתָּה *kêshabh*, to think, devise, invent ingenious or artistic things; whence also כִּשְׁתָּה *kêshêbh*, tr'd 'cunning workman'; and כִּשְׁתָּה *ma'âshâbhah*, device, invention, tr'd 'curious works,' Ex 35³² (RV 'cunning works'),

'Crafty,' 'cunning,' and 'curious' were all used formerly in the sense of clever, ingenious; cf. Barbour (1375), *Bruce*, x. 359—

'A crafty man and a curious';

and as a good parallel to the passages in Ex, Shaks. *Cymb.* v. v. 361—

'He, sir, was lapp'd
In a most curious mantle, wrought by the hand
Of his queen mother.'

The same thought is found in Ps 139¹⁵ 'I was made in secret, and curiously wrought in the lowest parts of the earth.' The Heb. here (מְעֻלָּם) means 'variegated'; 'the body or the foetus is described as woven together of so many different-coloured threads, like a cunning and beautiful network or tapestry'—Perowne.

The only other occurrence of 'curious' is in Ac 19¹⁹ 'c. arts,' meaning 'magical arts,' as RVm (Gr. τὰ περίεργα, lit. 'superfluous things,' 'things better left alone' (Page); cf. Sir 3²³ above, and see BUSYBODY). 'Curious' here is due to Wyclif, 'curiose thingis,' a literal tr. of Vulg. *curiosa*; Tindale, 'c. craifts'; Geneva, 'c. artes' (Vulg. marg. *curiosas artes*). From this place it has passed into English literature, as Bacon, *Essays*, 35, 'the Q. Mother, who was given to Curious Arts, caused the King her Husbands Nativitie, to be Calculated, under a false Name.' J. HASTINGS.

CURSE.—Under this title an account is given of the ideas connected primarily with the Heb. words חֵרֶם and חֵרֵם (*hērem*), and with the Gr. word ἀνάθεμα (*anathema*), so far as it is representative of the latter. The Heb. words are variously rendered in AV: 'the accursed thing' in Jos 7¹¹ etc.; 'everything devoted' in Nu 18¹⁴; 'every dedicated' thing in Ezk 44²²; 'and I will consecrate their spoil' in Mic 4³. RV has in all these places 'devote' or 'devoted thing'; where the object is personal, it has usually 'utterly destroy' (see Driver on Dt 2³⁴ 7² or Sam. p. 100 f.). A thing which is חֵרֵם is irrevocably withdrawn from common use. This may be done in two ways, or at least may have two kinds of result. In the one case, the devoted thing becomes God's; it falls irredeemably to Him, or to His sanctuary or His priests. In this sense, as has been pointed out, to 'devote' a thing is to make a peculiar kind of vow concerning it. The most instructive passage, in illustration of this sense, is Lv 27²⁸. 'No devoted thing, that a man shall devote unto the Lord of all that he hath, whether of man or beast, or of the field of his possession, shall be sold or redeemed: every devoted thing is most holy unto the Lord. None devoted, which shall be devoted from among men, shall be ransomed; he shall surely be put to death.' In the second and third of the passages quoted above (Nu 18¹⁴, Ezk 44²²), it is said expressly that every devoted thing in Israel is the priest's: this might include the spoil of conquered nations, carried into the temple treasury, as perhaps in Mic 4³, or property of any other description which a man irrevocably alienated. But the last words in Lv 27²⁹ (he shall surely be put to death) point to the second, and much the commoner, use of the words חֵרֵם and חֵרֵם. To 'devote' a thing means to put it under the ban, to make and to execute a vow of extermination, so far as that thing is concerned. It is this meaning that has occasioned the Eng. rendering for חֵרֵם—the accursed thing. Whatever is devoted to utter destruction is regarded as under a curse. Things which are so devoted are in a sense inviolable; in the old, morally neutral sense of holiness, it may be said that a peculiar degree of holiness attaches to them. The thing called חֵרֵם is at the same time לִיָּהּ (compare the seemingly opp. meanings of *sacer* in Latin, and the idea of *taboo*). It

was common in ancient warfare to 'devote,' or put under the ban, the enemy and anything or everything which belonged to him. All wars were holy wars; warriors were consecrated (Is 13²); and the ban, which seemed natural in the circumstances, might be of greater or less extent. In Dt 2³⁴, which speaks of the conquest of Sihon's kingdom, we are told that Israel 'utterly destroyed (devoted) every inhabited city, with the women and the little ones,' and the same terrible account is given in Dt 3⁶ of Og and Bashan. In Dt 7² this is even laid down as the law for the conduct of the sacred war against the Canaanites. But it is only human beings that are here put under the ban: 'The cattle we took for a prey unto ourselves, with the spoil of the cities which we had taken.' In some cases the ban was more stringent. In Dt 7²⁵ it is specially extended to the precious metal on the images of the Canaanites: this is an abomination to J'; and 'thou shalt not bring an abomination into thy house, and become a devoted thing (חֵרֵם) like it . . . for it is a devoted thing.' It was a ban, or curse, of this stringent type which Achan violated at the conquest of Jericho, and Hiel the Bethelite, long afterwards, when he rebuilt the town. He who appropriates what is חֵרֵם, as Achan did, becomes himself (Dt 7²⁵, Jos 6¹⁸) חֵרֵם: the ban, or sentence of extermination, is extended to him, and he is ruthlessly destroyed, with all the persons and property that attach to him. It was a similar ban which Saul violated, or allowed the people to violate, in the war with Amalek; and his action is represented as equally serious, though not followed on the instant by such tragical results. In point of fact, it was not practicable for the Israelites to 'devote' the Canaanites wholesale (1 K 9²¹); and the proclamation of ruthless warfare, under the auspices of a god, was no peculiarity of theirs. The same thing is affirmed of the Assyrians in 2 K 19¹¹, and of Mesha on the Moabite stone. It is more interesting to note that God Himself is sometimes the subject who proclaims this war, or pronounces this sentence of destruction. Thus in Is 34³ 'The Lord hath indignation against all the nations . . . He hath devoted them (חֵרֵם), He hath given them up to the slaughter.' So in v. 5 Edom is חֵרֵם חֵרֵם the people whom I have devoted. And in Mal 4⁵ God threatens to come and lay the earth under a ban.

It is usual to point to Ezr 10⁸ as an instance marking the transition between the ancient and awful use of חֵרֵם, and that post-biblical use in which it is equivalent to **Excommunication**. We are told here that all the substance of a man who did not answer a certain summons should be forfeited (חֵרֵם), and he himself separated (חֵרֵם) from the congregation. Probably this is the first trace of Jewish ecclesiastical usages, of which hints are to be found in NT in such passages as Mt 18¹⁷, Jn 9²² 12²² 16², Lk 6²². Though such usages, no doubt, would influence the practice of the Christian Church, it is not likely that they have anything to do with that 'delivering' of offenders 'to Satan,' of which we read in 1 Co 5⁵, 1 Ti 1²⁰. The suggestion in both these cases, and especially in the first, which has been interpreted of a sentence of death, is rather of a severity resembling that of the ancient 'ban'; but with the significant difference, that in both the purpose of this solemn exclusion from the Christian community is remedial. Both the incestuous person at Corinth, and Hymenæus and Alexander in Asia, are to profit eventually by their discipline.

The true succession to חֵרֵם is represented in NT by those passages in which ἀνάθεμα (*Anathema*) is found. This is the usual LXX rendering of the word. Thus in Dt 7²⁶ referred to above, the Gr. is ἀνάθεμα ἕως ὄψεσθαι καὶ τοῦτο: thou shalt be 'accursed' like the accursed thing which thou takest. Cf. Jos 6¹⁷, Zec 14¹¹.

Even the place-name Hormah (Nu 21³) is rendered *ἀνάθεμα*; a variant is *ἐξολέθρευσις*. In NT the word is used only by St. Luke and St. Paul (Rev 22³ quotes Zec 14¹¹, but with the form *κατάθεμα*). In Ac 23^{12, 14, 21} we read of men who *ἀναθέματι ἀνεθεματίσαμεν ἐαυτούς*—bound themselves with imprecations on their own heads—neither to eat nor to drink till they had killed Paul. The same verb is used in Mk 14⁷¹ with *ὀμνῶναι* to describe Peter's profane denial of Christ: he wished he might be cursed or damned if he knew the man. But the serious passages are in St. Paul. In 1 Co 12³ we have, No man speaking in the spirit of God says, Jesus is *ἀνάθεμα*. This *may* mean that no man speaking in the spirit of God can do what Paul once tried to get Christians to do—blaspheme Christ, i. e. speak profanely of Him, without defining more precisely how (Ac 26¹¹). Or it may mean that no one speaking in the spirit of God can speak of Christ as an object of hatred to God, as Jews with the cross in their minds might do. For illustrations of the passage, see Edwards, *ad loc.* (Com. on 1 Cor.), and Harnack's note on *Didache*, xvi. 5 (*ὅτι αὐτοῦ τοῦ καταθέματος*). In Ro 9³ St. Paul says he could wish himself to be *ἀνάθεμα* from Christ for his brethren's sake. This is exactly the *עָרָא* of OT: he could wish to perish that they might be saved—a spark from the fire of Christ's substitutionary love. It is only the other side of this passion which is seen in the other passages where the word is used: 1 Co 16²², Gal 1⁸. 'If any man love not the Lord Jesus Christ, let him be *ἀνάθεμα*': the apostle assents to God's will that no part in bliss, but only utter perdition, can be his who does not love the Saviour. So again, when he says, and says deliberately and repeatedly, of the man or the angel who preaches another gospel than he has preached, 'let him be *ἀνάθεμα*,' he expresses in the strongest possible style his assurance that the gospel he preaches is the one way of salvation, that to preach another is to make the grace of God vain, to stultify the death of Christ and to delude men, and that for such sins there can be nothing but a final irremediable judgment, to which he assents. The vehemence is like that with which Christ says, that better than a man should make one of His little ones stumble would it be for that man to have a millstone hanged about his neck, and be cast into the depths of the sea. In both cases the passion of indignation is the passion of sympathy with the love of God, and with the weak, to whom an irreparable injury is being done.

The word 'curse' is also used in the English Bible as the tr. of *קָלָה* and *κατάρα*. The interest of this centres in the passage Gal 3¹⁰⁻¹³, and in the ref. there to Dt 21²³. The non-observance of the law, St. Paul teaches, puts men (some limit it to the Jews) under a curse; from this curse Christ redeems them by becoming Himself a curse (*κατάρα*) on their behalf. The proof that Christ did become a curse is given in the form of a reference to the Crucifixion: it is written, 'cursed is every one that hangeth on a tree' (Dt 21²³). The Heb. is *עֲלֵהוּ עֲלֵהוּ קָלָה*, the LXX *κεκατηραμένος ὑπὸ θεοῦ*; and it has been often remarked that St. Paul does not introduce 'by God' into his quotation. Some seem to think that he shrank from doing it, as if it would have been equivalent to saying *ἀνάθεμα Ἰησοῦς*. But he does not shrink from saying that God made Christ to be sin for us (2 Co 5²¹), which, in its identification of Christ with, or its substitution of Christ for, the sinner, is exactly the same as His becoming a curse in Gal 3¹³. The important thing is not that St. Paul omits the *ὑπὸ θεοῦ*, but that, as Cremer remarks, he avoids the personal *κεκατηραμένος* of the LXX, and employs the abstract *κατάρα*. In His death on the cross He

was identified under God's dispensation with the doom of sin: He became curse for us; and it is on this our redemption depends. See CROSS.

K. Smith, *RS*, p. 434 f.; Weber, *Die Lehren des Talmud*, 137-139; Schürer, *HJP* II. ii. 60 ff., 157.

J. DENNEY.

CURTAIN.—1. The ordinary tent of the Semitic nomad, in modern times, is made by sewing together a number of narrow lengths of a water-resisting material, as a rule cloth woven from yarn of goats' and camels' hair mixed with sheep's wool. And so it must have been in ancient times.* Hence we read of a Heb. country maid being 'black as the tents of Kedar' (Ca 1⁵). The name of these lengths of tent-cloth was in the Heb. *קַרְיָרָה* (AV and RV 'curtains'). The weaving of them, as well as the previous spinning of the yarn, was and is one of the chief occupations of the women of the tribe (Ex 35^{25, 26}; Palmer, *Desert of the Exodus*, i. pp. 81, 125; Doughty, see footnote). With a more advanced civilization men also took to weaving as a trade (1 Ch 4²¹); indeed this particular branch, the weaving of goats' hair cloth, is well known to have been one of the staple industries of Tarsus, which has led many scholars to interpret *σκηνοποιός* (Ac 18³) as 'a weaver of tent-cloth' (see art. 'Paulus' in *PRE²* xi. 359).† In OT we find that ten of these *yē'îôth* or curtains, of special width and workmanship, were to be 'coupled together,' in two sets of five, to form the innermost covering of the tabernacle proper (the *Mishkân*), as given in detail Ex 26¹⁴. Above this was a more ordinary covering, composed of eleven curtains of the usual goats' hair, and constituting the *קֹלָה* or tent of the tabernacle (Ex 26¹⁵). For further particulars about these curtains see TABERNACLE. *Yē'îôth* is also used in OT of the curtains or tent-cloth of ordinary nomad tents (Jer 49²³) and of the gala-tents of king Solomon (Ca 1⁵), and often stands in poetic parallelism with *קֹלָה* 'tent,' Is 54², Jer 4²⁰ 10²⁰, Hab 3⁷. The sing. *קַרְיָרָה* is even used of the tent erected by David for the ark on Mt. Zion, 2 S 7² (LXX *ἐν μέσῳ τῆς σκηνῆς*, but 1 Ch 17¹ *קַרְיָרָה* plur.).

2. In AV the portière (*קַרְיָרָה*) which closed the entrance to the Holy Place of the tabernacle, and is elsewhere in AV tr^d 'hanging,' is once rendered curtain (Nu 3²⁶). The same Heb. word is also applied to the similar curtain at the entrance of the court of the tabernacle. The uniform tr^a in RV is 'screen,' even when the name is applied to the 'veil of the screen' which separated the Holy Place from the Holy of Holies, cf. Ex 26³⁶ 35¹² etc. See further TABERNACLE.

3. Is 40²² the word tr^d curtain (*קַרְיָרָה*) seems from its etymology to denote some fine material such as gauze (so RVm, Dillm., Duhm).

4. In the Book of Judith we read of Holofernes possessing a very magnificent *κωνωπέιον* (EV 'canopy,' Jth 10²¹ 13^{9, 15} 16¹⁹) 'of purple and gold and emerald and precious stones inwoven.' This, as the name and the context of 10²¹ imply, must have been a mosquito-curtain. See CANOPY.

A. R. S. KENNEDY.

CUSH (שֹׁשׁ).—1. In the hieroglyphs Kash, Kaish, Kish, Keshi, Kesh, or Keshah, a nation to which frequent reference is made in the Bible. Its

* The tent-stuff is seamed of narrow lengths of the housewives' rude worsted weaving; the yarn is their own spinning, of the mingled wool of the sheep and camels' and goats' hair together. Thus it is that the cloth is blackish, Doughty, *Arabia Deserta*, i. p. 225.

† *σκηνοποιός*, loc. cit., is more probably a synonym of *σκηνοθήτης*, one who prepared and put together the lengths supplied by the weavers. See Ramsay and Nestle in *Expos. Times*, viii. (1897) 109, 153, 286.

founder is given in the ethnological tables of Gn (10⁶) as son of Ham, and brother of Mizraim (Egypt), Put, and Canaan. Though the form Kush is not found in the hieroglyphs, there is no doubt of the identity of the nation ordinarily referred to in the Bible, and located by Ezk 29¹⁰ S. of Egypt, with the *Kesh*, whose home was in Ethiopia, but who were known to the Hebrews through the prominent part they played in Egypt. This country, embracing the territories S. of Egypt originally inhabited by negro tribes called Nahs. u' (Brugsch, *Geographie der Nachbarländer Egyptens*, p. 4), and extending S. from the first cataract, though repeatedly invaded by Egypt. kings of the early dynasties, was formally enrolled in Egypt by Tahutmes I. of the 18th dynasty, and put under a governor called the prince of Kesh (Egypt. *seten-si en Kesh*, king's-son of Cush), who from the 18th dynasty regularly figures in the Egypt. records by the side of the king of Egypt. Somewhere about 1000 B.C., during the wars between the high priests of Amon (descendants of Hrihor) and the Tanites, the Upper Nile was lost to Egypt, and it is probable that descendants of Hrihor, escaping to Napata, on Mt. Barkal (according to some authorities, the Heb. η , which is more probably to be identified with Memphis), founded a dynasty. These kings took the same titles as the Egypt. monarchs; at about B.C. 800, at the end of the reign of Sheshonk II., they occupied Thebes; and about 775, under the king Pi'anchi, they had spread as far S. as Hermopolis, while all important towns had Eth. garrisons. An attempt made by Tefnaht of Sais (whose name survives in Gr. authors under the form $\tau\acute{\nu}\epsilon\phi\alpha\chi\theta\omicron\varsigma$) to unite the petty princes under whose rule Lower Egypt had now fallen, in resisting them, was defeated at Memphis, (the great stele of Pi'anchi, edited by Mariette, *Monuments Divers*, and tr. by Brugsch, *Gesch. Egypt.* 682-707, in which this event is described, is one of the most important of the hieroglyphic monuments), although for reasons not known Pi'anchi afterwards made terms with Tefnaht, whose son Bokenranf, or Bocchoris, is represented by Manetho as the founder of the 24th dynasty. During the reign of this king (about B.C. 728), a successor of Pi'anchi (probably after some intermediate reigns), Shabaka, son of Kashtu, called in the Bible $\kappa\omega\varsigma$ So' (2 K 17⁴, which should rather be read Sava, representing the name without the definite article), himself on the mother's side a descendant of Osorkon III. of the 23rd dynasty, invaded Lower Egypt, defeated Bocchoris, and put him to death; and, unlike his predecessor Pi'anchi, succeeded in obtaining a permanent hold on the country, whence he and his two successors are regarded as constituting a 25th, or Eth. dynasty. The conspiracy between this king and Hosea of Isr. against the Assyrs. led to the defeat of the former at Raphia in 720, and to the captivity of the ten tribes; and the identification of Egypt with Ethiopia at this time is alluded to in Is 7¹⁸, where the 'fly that is in the uttermost part of the river of Egypt,' i.e. Ethiopia, is made co-ordinate with Assyria as a first-rate power; and in Is 20⁴⁻⁶ the names Cush and Mizraim are used as synonyms. (See especially Lenormant, 'Mémoire sur l'époque Eth.' *Rev. Archéologique*, 1870). Under Shabaka's son Shabataka, or Sebichos (perhaps the *Sabteca* of Gn 10⁷), it is probable that anarchy again broke out in the Delta, a state of things reflected in the prophecy of Is 19. The king Shabataka, who had acceded in 716, was followed in 704 by Taharka (the $\tau\acute{\alpha}\rho\kappa\eta$ of the Bible, 2 K 19⁹), who is said to have murdered his predecessor and to have married Shabaka's widow, acknowledging her son as co-regent. As in 2 K 19⁹ he is officially described as king of Cush only, it is probable that his authority was not at first recognized in Egypt. During his reign occurred the famous conspiracy which led to Sennacherib's

invasion of Pal., terminating most probably in the defeat of the Egypt. forces at Altaku, although, as the Assyrs. were unable to follow up their victory, peace was made between the two powers, giving Taharka time to consolidate his authority; until in 671 a fresh quarrel with the Assyrs. led to the invasion of Egypt by Esarhaddon, who conquered the country as far S. as Thebes; and a fresh attempt of Taharka to turn out the Assyrs. at the accession of Assurbanipal in 668 led only to a fresh invasion and renewed disasters in the following year. Taharka's son and successor Tanuatama, or Urdamani, who acceded in 664, would seem to have made one more attempt to free the country from the Assyrs., but without more success than his predecessors, and in the following year the Eth. rule came finally to an end. Their own country was invaded by Cambyses in B.C. 525, whence in the lists of Darius the Cushiya figure as a subject race. Though the Persians could not permanently occupy the country, they would seem to have destroyed Napata, the chief town after this time being Meroë or Barua, slightly N. of Shendi on the Upper Nile, which Herodotus regards as the chief city, although Napata was long regarded as the sacred city. The ancients tell us about the elective nature of the Eth. monarchy, their statements being, in part, confirmed by the monuments of Napata; and it would seem that the kings were chosen out of certain families by the god, i.e. by the priests, who also had the right to command the king to put an end to his life if they thought fit—a right which was finally abolished by king Erkamon, or Ergamenes, early in the 3rd cent. B.C. This custom, which has been illustrated from the practice of tribes still existing in Africa, may be regarded as specifically Eth., as also the female rule, which at most periods of Eth. history seems to have had theoretical or practical recognition; in Rom. times they were governed by queens, called always Candace (cf. Ac 8²⁷), apparently associated with their sons; but even in their earlier history the important position given to the kings' mothers and sisters anticipates this practice. Otherwise, Eth. culture, art, and religion, as well as the official language, would seem to have been directly borrowed from Egypt; and while the idea that Egypt. culture was Eth. in origin must be distinctly rejected, the theory of Lepsius, that the Cush were the nation who circulated that culture through the ancient world, would seem to rest on no secure foundation. 2. The fact that Cush in Gn 10⁶ is represented as the father of Nimrod, probably comes from the confusion of the Kesh with the *Cossæi*, or Kashshu, a tribe who had possession of Babylonia between the 16th and 13th cent. B.C.* 3. For the names of the sons of Cush in Gn 10⁷, see SEBA, HAVILAH, SAETAH, RAAMAH, and SAETACA.

D. S. MARGOLIOUTH.

CUSH ($\kappa\omega\varsigma$, LXX $\chi\omicron\upsilon\sigma\sigma\epsilon\iota$).—Mentioned only in the title of Ps 7. The older translators appear to have read $\kappa\omega\varsigma$ (Aq. Symm. Theod. Jer.). 'As the name of a person, the word is of uncertain meaning' (Delitzsch). Cush is described as a Benjamite, and was probably a follower of Saul who opposed David. The seventh psalm sheds no light on name, person, or character.

W. T. DAIVSON.

CUSHAN-RISHATHAIM ($\kappa\omega\upsilon\sigma\sigma\alpha\tau\alpha\iota\mu$, AV Chushan-rishathaim), king of Mesopo-

* Hommel, however (*Expository Times* [1897], viii. 378) would regard the tribe mentioned here as one existing in Central Arabia, to which he finds further reference in 2 Ch 14⁹, where Zerah the Cushite is said to have invaded Judah in the days of Asa (cf. LXX both here and in 2 Ch 21¹⁶, where he finds the Arab. tribe *Maarivai*, *Mazin*, mentioned). The name Zerah (or Dirrih) is found as a title of early Sabaean kings. It may be doubted, however, if the LXX readings really preserve either the original text or an ancient tradition respecting its meaning.

tamia or Aram-naharaim, was the first of those oppressors into whose hands God delivered Israel for their apostasy in the days of the Judges (Jg 3⁸⁻¹⁰). For eight years they were in bondage to this king, till they were delivered by Caleb's younger brother Othniel. Of Cushan-rishathaim nothing more is known directly, and his name has not yet been found on the monuments. The country over which he ruled, 'Aram of the Two Rivers,' was in all probability the territory lying between the Euphrates and the Chaboras, the last of the tributaries of the Great River. (See Aram-naharaim in art. ARAM, p. 138^b.) Its two cities mentioned in Scripture are Haran (Gn 28¹⁰) and Pethor (Dt 23⁴, Nu 22⁵). It is known as Nahrina on the Egyptian monuments, and Nahrina in the Tel el-Amarna tablets, the native name of its people being Mitanni. Sayce (the soundness of whose argument, however, is denied by Moore and Driver) finds a remarkable correspondence between the notice of Cushan-rishathaim in Jg and the history of the reign of Ramses III. 'The eight years,' he says, 'during which the king of Aram-naharaim oppressed Israel would exactly agree with the interval between the beginning of the Libyan attack upon Egypt and the campaign of the Pharaoh against Syria. We know from the Egyptian records that Mitanni of Aram-naharaim took part in the invasion of Egypt; we also know from them that the king of Mitanni was not among those who actually marched into the Delta. He participated in the southward movement of the peoples of the north, and nevertheless lingered on the way. What is more probable than that he again sought to secure that dominion in Canaan which had belonged to some of his predecessors?' See further OTHNIEL.

LITERATURE.—Moore, *Judges*, pp. 84-89; Driver, *Contemp. Rev.* (1894), p. 420 ff.; Sayce, *HCM*, pp. 297-304.

T. NICOL.

CUSHI, CUSHITE (כּוּשִׁי, כּוּשִׁית).—The word occurs with the article in Nu 12¹, 2 S 18²¹; without the article in Jer 36¹⁴, Zeph 1¹. 1. With the article it is probably merely an expression of nationality, 'the Cushite' (see CUSH). That in both instances it was a sufficient designation of the person in question, seems to show that there were but few Cushites among the Israelites. In both, the foreign character of the person intended is indicated by the narrative. It was looked upon as a disgrace that Moses should have married a Cushite. In 2 S 18²³ the stranger is unacquainted with the short-cut made use of by Ahimaaz. 2. Without the article the word is used merely as a proper name. It is borne by (1) the great-grandfather of Jehudi, the latter one of Jehoiakim's courtiers (Jer 36¹⁴); (2) the father of the prophet Zephaniah (Zeph 1¹).

F. H. WOODS.

CUSTOM (τέλος, Mt 17²⁵, Ro 13⁷, comp. 1 Mac 10³¹ 11²⁵), toll, tax upon goods, generally *ad valorem*, as distinguished from κῆνος and φόρος, tribute, an annual tax on houses, lands, and persons. Custom ordinarily went into the treasury of the native government. Thus in Palestine the Herods in Galilee and Peræa received the custom, whereas in Judæa it was paid to the procurator for behoof of the Roman government. The custom (τέλος) was collected by the tax-gatherer (τελώνης). For full details see PUBLICAN and TAXES.

J. MACPHERSON.

CUTH, CUTHAH (כּוּתָּה, כּוּתָּה; B Χουθά, Χουθ; A Χουά).—One of the cities from which Sargon brought colonists to take the place of the Israelites whom he had deported from Samaria, B.C. 722 (2 K 17^{24, 30}). These colonists intermingled with the Israelite inhabitants who were left by Sargon; and their descendants, the Samaritans, were in consequence termed by the Jews Cuthæans

(כּוּתָּה). According to the old Arabic geographers, Cuthah was situated not far from Babylon, and there seem to have been two cities of the same name close to each other (de Sacy, *Chrest. Arab.* i. 331). This view as to the site of Cuthah is borne out by the Assyrian inscriptions, from which we learn that *Kutî* (or *Kutû*) was a city of Middle-Babylonia. It has now been identified with the modern *Tell-Ibrâhîm*, N.E. of Babylon, where remains of the temple of Nergal (cf. v. 30) have been discovered (see Schrader, *COT*, i. 270 f.). Cuthah has also been identified as the name of a country near Kurdistan, possibly = *Ur Kasdim* (Gn 11³¹)—Neubauer, *Géogr.* p. 379; while others consider 'Cutheans' to be another form of 'Cossæans,' a tribe dwelling in the Persian province Jutpa, the modern Khuzistan, E. of the mouth of the Tigris. J. F. STENNING.

CUTHA (A Κουθά, B om., AV Coutha), 1 Es 5³².—His sons were among the temple servants who returned from Babylon with Zerubbabel. There is no corresponding name in the lists of Ezra and Neh. The name may be taken from the Babylonian town Cuthah or Cuth (2 K 17^{24, 30}).

H. ST. J. THACKERAY.

CUTTINGS IN THE FLESH.—i. In the legislation of Dt (D) and in the *corpus* known as the 'Law of Holiness' (H), the Hebrews are forbidden to 'cut themselves' (לֹא תִקְרְוּ Dt 14¹) or to 'make any cutting' (lit. an incision יָקַר Lv 19²⁸, נָקַר Lv 21⁵, LXX ἐτρούϊς) in their flesh 'for the dead.' The prohibition in question is aimed at one of the most widely-spread tokens of grief at the loss of relatives or friends. To scratch and beat one's self to the effusion of blood, nay, to gash and hack one's self of set purpose, may be said to be an all but universal custom among uncivilized and semi-civilized races at the present day. It must suffice to refer to such well-known works as Waitz's *Anthropologie der Naturvölker* (*passim*), and H. Spencer's *Principles of Sociology*, 3rd ed. vol. i. pp. 163 ff., 277, 292, etc. (see also authorities named at the close of this art.). The prevalence of the custom is equally attested for nearly all the nations of antiquity, the Egyptians being the most notable exception (Herod. bk. ii. 61, 85; Wilkinson, *Anc. Egypt.* [1854] vol. ii. p. 374). Thus Herodotus tells us that the Scythians of his time on the death of their king 'cut off their ears, shear their hair, and make incisions all over (περιτάμνονται) their arms' (iv. 71). Xenophon gives a similar account of the Armenians and Assyrians (*Cyrop.* iii. 1. 13). The legislation of Solon, acc. to Plutarch, forbade the women of Athens to beat themselves to the effusion of blood (ἀμυχὰς κοπτομένων . . . ἀφείλεν, Sol. 21), and the same is affirmed of the laws of the Twelve Tables ('mulieres genas ne radunto'—quoted by Cicero, *de Leg.* ii. 23). Among the ancient Arabs, further, the practice forbidden at Athens and Rome was associated, as it was among the Heb. (see below), with the cutting off of the hair (*Kitâb al-Aghâni*, xiv. 101, 28—this and other reff. in Wellh. *Skizzen*, iii. 160 f.). Thus the poet Lebîd 'says to his daughters, When I die, do not scratch your faces or shave off your hair,' xxi. 4 [ed. Huber and Brockelmann].* The earliest reference to this custom of making cuttings in the flesh among the Hebrews is in what appears to be the orig. reading in Hos 7¹⁴ (see RVm), where several MSS (see De Rossi, *Var. Lectt. Vet. Test. in loc.*) have יִקְרְוּ, which was also the reading of the Greek translators (*κατατέμνονται*). It was widely prevalent in the time of Jeremiah, not only among his countrymen of the South (16⁹) and those of the central highlands

* Quoted by Driver, *Comm.* on Deut. 14¹, p. 156, from a MS note of the late Professor W. E. Smith.

(41⁵), but also among the neighbouring Philistines (47⁵), and Moabites 'upon all the hands shall be cuttings' בְּכָל־יָדָיִם 48³⁷. The passages cited, taken along with the abundant evidence for the usually associated practice of shaving the head (Am 8¹⁰, Is 3²⁴ 15² 22¹², Mic 1¹⁶, Jer 48³⁷, Ezk 7¹⁸), clearly prove that the customs in question were universally practised by the Hebrews in pre-exilic times. And further, the remarkable phraseology of Is 22¹² 'J' called to weeping and to mourning and to baldness' (with which cf. Mic 1¹⁶), seems to show that the prohibition of D was unknown in the age of Hezekiah. The attitude of this code to both the above-mentioned practices is very decided: 'Ye shall not cut yourselves, nor make any baldness between your eyes for the dead' (Dt 14¹). H, incorporated in the priestly legislation of P, re-states the prohibition in more technical language, both for the people generally (Lv 19²⁸) and *a fortiori* for the priests in particular (21⁵).

ii. When we inquire as to the *raison d'être* of these prohibitions we find considerable difference of opinion. We may, however, at once set aside as entirely inadequate the view that their purpose was to restrain that exuberance of emotion which the Hebrews shared with other Oriental peoples; in other words, to prohibit certain extravagant manifestations of grief as such. To say, for example, that 'the practices here (Dt 14¹) named seem to be forbidden . . . because such excesses of grief would be inconsistent in those who as children of a heavenly Father had prospects beyond this world' (*Speaker's Comm.* on Dt 14¹), is quite unscientific, inasmuch as considerations are here introduced altogether foreign to this stage of revelation. Nor yet is it sufficient to regard these prohibitions—for we must remember that artificial baldness and tattooing the skin (see below) stand in the same category with the more drastic cuttings in the flesh—as *primarily* directed against the disfigurement of the human body which is God's handiwork. It cannot be denied that both the explanations just adduced have a certain amount of force and truth, but they do not seem to reach the original significance of the prohibitions in question.

In our search for the real origin of the latter, two points have to be kept in mind: both the cuttings and the baldness are expressly stated to be 'for the dead,' and, not less explicitly, to be incompatible with Israel's unique relation to J', a relation at once of sonship (Dt 41¹) and of consecration (לְיְהוָה 14²). Now it is admitted on all hands (1) that such mutilations of the body as are here condemned have in almost all countries formed part of the religious rites of heathenism. And, in particular, they must have been familiar enough in the Pal. of those days where such self-inflicted bloodshed formed part of the everyday ritual of the Canaanite Baal (see 1 K 18²⁸, the only passage not already cited where the Heb. word has this signification, and note 'after their manner'). (2) Both the shedding of the blood and the dedication of the hair are found, as we have seen, in the most intimate connexion with the ritual of heathen burial and the belief in the necessity of propitiating the spirit of the deceased. Thus (to give but a single example) we are told that 'a Samoan ceremony, on the occasion of a decease, was "beating the head with stones till the blood runs"; and this they called "an offering of blood" for the dead' (quoted from Turner's *Samoa* by Spencer, *Princip. of Sociol.* p. 166).

In view of the facts now stated, we are led to the conclusion that both the tokens of grief prohibited by the Heb. legislation were so prohibited because they carried with them associations of a character incompatible with the pure religion of J'. Whether we hold with Stade and others that a

developed ancestor-worship was practised by the primitive Hebrews or not, there can be little doubt that the gashing of the body and the shaving of the head as practised by the Semitic peoples generally must, *in the last resort*, be traced to the desire to propitiate the *manes* of the departed, and 'to make an enduring covenant with the dead' (W. R. Smith, *RS* p. 305). But while we are forced by the evidence to this conclusion as to the ultimate origin of the practices in question, we would not have it supposed that any such animistic conception was present to the minds of the contemporaries of Isaiah and Jeremiah. In nothing is mankind so conservative as in all that concerns the respect due to the dead, and so, to the spiritually-minded at least, the practices prohibited were but the wonted outward signs of excessive grief. All excesses, then—so we conclude—such as making incisions in the hand (Jer 48³⁷) or other part of the body to the effusion of blood, and shaving the head in whole or in part, were strictly forbidden by the legislation of D and of H, not merely or even chiefly *quod* excesses, but as being alike in origin and association unworthy of those who had attained to the dignity of the sons of J'.

iii. Under the head of 'cuttings in the flesh' falls to be considered also the particular practice forbidden in Lv 19^{28b} [Ye shall not] 'print any marks (קְטָעֵי קַרְטָם , LXX $\text{\u0393\rho\alpha\mu\mu\alpha\tau\alpha\ \sigma\tau\iota\gamma\mu\alpha\tau\alpha}$, Vulg. *stigmata*) upon you.' The expression does not occur elsewhere, but we may be sure that the reference is to the ancient and widely-spread custom of tattooing or branding. Which of these two modes of marking is to be understood here it is impossible to say with absolute certainty, the verbal stem, קָטַע , having both meanings in post-biblical Heb., while the same ambiguity attaches to סִיגְמו and its derivatives, סִיגְמָה , etc. In favour of tattooing, however, the following may be urged: (1) the exegetical tradition; Rashi, for example, explains the marks in question as made with a needle (*Comm. in loc.*); (2) the probable origin of the custom, as advocated by the acute author of *RS*. 'In Lv 19²⁸, where tattooing is condemned as a heathenish practice, it is immediately associated with incisions in the flesh made in mourning or in honour of the dead, and this suggests that in their ultimate origin the *stigmata* are nothing more than the permanent scars of punctures made to draw blood for a ceremony of self-dedication to the deity' (p. 316, note 1).

The best-known illustration of the prevalence of the practice of tattooing or making *stigmata* in Syria is supplied by the priests of 'the Syrian goddess' in Lucian's treatise of that name, who were tattooed on wrist and neck (ch. 59—on which cf. the classical work of John Spencer, below). Philo (*De Monarch.* i.) refers to the allied practice of branding, familiar to us in the case of slaves and criminals, as practised by certain misguided idol-worshippers in his own time. In 3 Mac, also, Ptolemy IV. (Philopator) is represented as having the contumacious Jews branded with the ivy-leaf, the symbol of Dionysus (2²⁹). These passages, then, show that it was not an unusual practice to have tattooed or branded in one's flesh the name or symbol of the deity to whom one was specially devoted—a practice which at once gives us the true explanation of the interesting passage, Is 44⁵ (another shall mark on his hand 'Yahweh's,' cf. RVm, also Gal 6¹⁷ $\text{\u0391\rho\tau\iota\mu\alpha\rho\alpha\ \text{I}\u0397\sigma\theta\upsilon}$). Jewish tradition, we may add, has it that the obscure phrase of the Chronicler with regard to Jehoiakim, 'that which was found in him' (2 Ch 36⁵), refers to his breach of the command in Lv 19^{28b}, letters having been discovered tattooed on his flesh, presumably the name of some heathen deity (Midrash *Levit. Labba* 19—quoted by Strack, *Comm. in loc.*; Jerome, *Quest. Heb. in Paralipom. l.c.*).

Here, then, we have another heathen custom forbidden to the worshippers of J^h; and the unmistakable evidence of its unworthy associations being the cause of its prohibition—although in itself a thing indifferent (Dillm. *Theol. d. A.T.* p. 428)—strengthens the view above advanced as to the historical *raison d'être* of the ancient custom, here (Lv 9^{28a}) forbidden along with it, as alike incompatible with whole-hearted loyalty to J^h.

LITERATURE.—Martin Geier, *De Ebraeorum Luctu* (ed. 3, 1683), and (esp. for the *stigmata*) John Spencer, *De Leg. CYAMON (Κυαμών), Jth 7^s.—The same as JOK-NEAM, which see.

CYMBAL.—See MUSIC.

CYPRESS (קִרְסָן *tirzäh, ilex*).—As in the case of the box tree (*téashshár*), there is nothing in the philology to indicate what tree is signified. The root, which is obsolete in Heb., signifies in Arab. to be *strong* or *hard*. The tree is mentioned (Is 44¹⁴) in connexion with the cedar and the oak. It might be any of the numerous coniferous or cupuliferous trees of Bible lands, but there is no means of telling which. The LXX gives us no help, the sentence being confused, and not a tr. of the Hebrew. The cypress, *Cupressus sempervirens*, L., is abundant, and suitable as to hardness, but we have no certainty that it is intended. Furthermore, it is probable that *Cupressus sempervirens* is the *fir*. See FIR. Under these circumstances, the best way would be to transliterate, as in the case of the *algum* and *almug*, and call the tree *tirzah*.

G. E. POST.

CYPRUS lies in the N.E. corner of the Levant (34° 33'—35° 41' N. lat., 32° 17'—34° 36' E. long.), between the convergent coasts of Cilicia and Syria. On its N. coast Cape Kormakiti is only 46 Eng. miles from Cape Anamur, in Cilicia, and its E. extremity, Cape Andrea, only 60 (miles) from Latakia on the Syrian coast. Consequently, the whole line of the Cilician coast is easily visible from the sea-level in C., and *vice versa*, while the Lebanon can be seen at sunrise even from Stavrovúni near Larnaka (2260 ft.).* Its greatest breadth, from Cape Gata to Cape Kormakiti, is 60 Eng. miles, and its extreme length, from Cape Drepano to Cape Andrea, is 145; but the latter includes the Karpass promontory, which, though 45 miles long, is nowhere more than 10 miles across. The nearly straight N. coast from Cape Kormakiti to Cape Andrea measures about 100 miles. The area of C. is 3707 square miles, or about equal to that of Norfolk and Suffolk; it is larger than Corsica or Crete, but smaller than Sicily or Sardinia.

C. consists of two mountain masses, separated by a broad low-lying plain: (1) The S.W. half of the island is occupied by a range composed of crystalline and metalliferous rocks, which in its western and highest section is called Tróodos (6406 ft.), and is continued through Mádhari (5305 ft.), Papútsa (5124 ft.), and the Mákhaera range (4674 ft.) to the almost isolated Stavrovúni (2260 ft.), about 12 miles from Larnaka. The same rocks reappear in the plateau of limestone and gypsum beds between Larnaka and Famagústa, but never rise to more than 300 ft. (2) The Messaorià or 'midland'

* Cf. Is 23¹, where the homeward-bound merchantmen first see the smoke of burning Tyre from their last anchorage at Kitíon: 'from the land of Kitíim it is revealed to them.'

plain extends along the N. and N.E. side of Mákhaera from the Bay of Mórphu to that of Famagústa. A very low watershed divides the basin of the Serákhis, flowing towards Mórphu, from that of the Pedías (Πεδίαιος) and Yaliás, which rise from the N. side of Mákhaera and reach the sea at Salamis through extensive marshes. (3) The N. range is a straight, narrow, and abrupt ridge of the Anatolian limestone, and extends 100 miles from Cape Kormakiti to Cape Andrea. Its highest peak is Buffavénto (3135 ft.), crowned by a Byzantine fortress. H. Elias or Kórnos (3106 ft.) and Trýpa Vunò (3085 ft.) are conspicuous peaks in the West. Pentedáktylo, farther E., rises to 2405 ft., and Olymbos to 2431 ft.; but in the Karpass nothing is higher than Sina Óros (2380 ft.), close to the fortress of Kantára (161 ft.). Pámbulos, near Rhizokárpaso, reaches only 1194 ft. The northern coastland E. and W. of Kerynia is narrow, but well watered and very fertile.

The only accurate map of C. is the Government Trigonometrical Survey (Stanford, 1885), incorporated in the subsequent editions of the Admiralty Chart of Cyprus (No. 2074).

The principal resources of C. in ancient and mediæval times were copper and timber. The former, which in fact derives its name from that of the island, was worked in great abundance on the N. side of Tróodos and Mákhaera, from Limni near the Bay of Khrysokhu, to Frángissa (Tamassòs) and Lithrodóna; and in less quantity near Tremithushà (Tremithus). The principal centres of export were Soloi (Karavostási) and Marion (Póli dis Khrysokhu). The supply was finally exhausted some time in the Middle Ages. Iron was worked from the 9th cent. B.C. onwards in the country about Mákhaera, though it never rivalled copper in commercial importance. Pliny (xxxiv. 2) says that only inferior qualities were worked in his time. Much glass was made in Roman times at Tamassos and elsewhere (Pliny, xxxvi. 193).

The forests of C. had not wholly disappeared even in imperial times, though they were already very much reduced in area by the continuous export of timber (Strabo, xiv. 5). The cypress (AV 'fir') or Karamanian pine is the principal forest tree; and the juniper (? the 'cypress' [*tirzah*] of Is 44¹⁴) probably formerly attained great size in C., and still grows freely between Larnaka and Famagústa. Besides these, C. has always produced much wine and oil; and carobs, anise, and madder are considerable crops. It grew enough corn for its own population in the time of Augustus (Strabo, xiv. 5), and exports it now. Ladanum and resin were exported under the Roman Empire (Pliny, xii. 74, xiv. 123, xxiv. 34). Both Pliny (xxvii. 23. 58. 121, etc.) and Strabo (iii. 15) record the occurrence of precious stones; and the former, mines of alum and gypsum (xxxvi. 183). Salt is made in lagoons near Larnaka (Kitíon), and Pliny records the manufacture here (xxxv. 75) and at Salamis (xxxv. 84).

HISTORY.—The copper and the timber of C., so long as the supply lasted, gave the island an importance in commerce and civilization out of all proportion to its size. From the earlier part of the Bronze Age Cyprus maintained a large population and an art and culture distinct and in many respects highly developed, and exported copper to Syria, Cilicia, and probably to Egypt, to the farther parts of Asia Minor, and even to Central Europe. The influence also of Cypriote pottery was felt in Syria, and widely in Asia Minor; some of the finer varieties have been found in Egypt, South Palestine, Thera, Athens, and the Troad.

C. was invaded by Tahutmes III. of the 18th dynasty of Egypt (B.C. 1503–1449), and appears to have remained tributary to Egypt for some time.

It has been suggested by Maspero and others that the Keftiu (cf. OT 'Caphtor') include the inhabitants of C.; but the usual Egypt. name for C. is Asi (Flinders Petrie, *Hist. Eg.* ii. 118, 124).

The next period of Cypriote art and civilization is of great importance, but very obscure. Mycenaean settlements have been found on a number of sites, and the contact with their higher art and culture brought about a profound change in that of Cyprus. About the same time the abundant deposits of iron began to be worked, at first for ornaments, but very soon for weapons and tools. Greek tradition asserted a very early colonization of C., and esp. of Kurion and Salamis, both of which are now known to have been Mycenaean centres; and tradition is confirmed by the primitive 'Aeolic' dialect of Greek which was spoken, and the peculiar syllabic script, which was not displaced by the Greek alphabet until the 4th cent. On the other hand, Phoen. inscriptions have been found in C. of the 9th cent. and onwards, and there are indications that the culture of the Syrian coast had influence in C. even earlier. The natural centre of Phoen. influence was Kition (mod. Larnaka), but Phoenicians and Greeks seem to have settled side by side all over the island. Kition (and perhaps all C.) appears to have been irregularly tributary to Tyre in the 10th to 8th cent. (*Jos. c. Ap.* i. 18; *Ant.* viii. v. 3, x. xiv.). Consequently, C. was involved in the conquest of Phoenicia in 709 by Sargon, an important inscription of whom has been found at Kition (Berlin Museum). Later, Esarhaddon and Assurbanipal record tribute received from twelve kings of C., some of whom appear to bear Greek names, while the island itself appears as *Javnán* ('Ionian').

About 560 C. was conquered and attached to Egypt by Amasis (Hd. ii. 182), and on his fall in 525 passed, with Egypt, to Cambyses of Persia (*id.* iii. 19, 21). In 501 the Greeks of C., in sympathy with those of Ionia, rebelled against Persia (*id.* v. 105 f.), but in so mixed a population united effort was impracticable; the revolt was soon put down, and in 480 C. furnished 150 ships to the fleet of Xerxes (*id.* vii. 90). During the 5th cent. C. remained under Persia, in spite of Cimon's repeated attempts to attach it to the Athenian League; but a brisk copper trade was maintained with Athens, which sent fine pottery and bronze work in return. Early in the 4th cent. Evagoras succeeded in making Salamis the leading state in C., and in 387 openly revolted from Persia. But the Phoenician interest was wholly against him; the Greeks, as usual, were divided, and the attempt failed. Alexander the Great, however, received the voluntary submission of all the states of C. after the battle of Issus, and efficient help at the siege of Tyre from their fleets, and supplies of timber. At his death (323) C. fell, with Egypt, to the share of Ptolemy, but was seized by Demetrius Poliorcetes, after a desperate sea-fight (Diod. Sic. xx. 759-761) and vigorous siege of Salamis. In 295, however, Ptolemy reconquered the island, which long remained closely attached to Egypt. It is under this régime that we first hear of Jewish settlers in C. (1 Mac 15²³). It was for a few years (B.C. 107-89) a separate but dependent kingdom under Ptolemy Lathyrus, but in B.C. 58 was annexed by Rome, as security for financial loans to the bankrupt Ptolemy Auletes. After reorganization by M. Cato it was first attached to the province of Cilicia, but was made a separate province by Augustus after Actium. As long as serious danger was to be apprehended in the East, the new province, with its neighbours, remained imperial, and was governed by a propraetor (Dio. Cass. liii. 12; Strabo, xiv. 683 [καὶ νῦν]). No monuments remain of this period. But very soon afterwards C. was

transferred to the Senate (Dio. Cass. liii. 12, liv. 4); consequently, Ac 13⁷ is strictly accurate in describing Sergius Paulus as proconsul (ἀνθύπατος) in A.D. 46. Of this Sergius Paulus no coins are known, but an inscription exists at Karavostasi, which is dated ἐπὶ Παύλου [ἀνθ]ύπ[α]του (Hogarth, *Devia Cypria* p. 114). Several other names of proconsuls are known, e.g. Julius Cordus, *CIG* 2631, L. Annius Bassus, his successor, A.D. 52, *CIG* 2632 (quoted Conybeare and Howson, i. p. 187). See Hogarth, *Devia Cypria*, Appx., for a complete list.

The seat of government was at Paphos (wh. see), which had been the capital of the Ptolemaic priest-king, deposed in B.C. 58, and was most easily accessible from the west, though Salamis (wh. see) was by far the largest and most important town in the island, owing to its proximity to the Syrian coast. Paphos was connected with Salamis by two roads—one inland and north of Tróodos, *viâ* Soloi, Tamassos, and Tremithus, about four days' journey; the other easier, and along the south coast, *viâ* Kurion, Amathus, and Kition, about three days.* Neither of these was a Roman military road, but both followed well-worn native tracks.

Jews appear to have settled in C. in large numbers under the Ptolemaic régime, and probably more were attracted thither under the early Empire by the fact that Herod the Great farmed the Cypriote copper mines (*Jos. Ant.* xvi. iv. 5, cf. xix. 26, 28). They seem to have had more than one synagogue in Salamis (Ac 13⁵).

The dispersion after the death of Stephen carried Christians as far as Cyprus (Ac 11¹⁹), and shortly afterwards Cypriotes were preaching in Antioch (Ac 11²⁰). Of Cypriote Christians, two are known by name: Mnason, 'an original convert' (ἀρχαῖος μαθητής, Ac 21¹⁶), and Joseph the Levite, surnamed Barnabas, the friend and companion of St. Paul (Ac 4³⁶).

In A.D. 117 the Jews of C. revolted, massacred 240,000 pagans, and destroyed a large part of Salamis. Hadrian, afterwards emperor, suppressed the disorder, and expelled all Jews from Cyprus (Milman, iii. 111, 112).

The Christian Church of C. was divided into thirteen bishoprics; in the 4th cent., in consequence of the supposed discovery at Salamis (wh. see) of St. Matthew's Gospel in the tomb of Barnabas, it was made autonomous, and the Patriarch has ever since enjoyed the right to sign his name in red ink. The Council of C. in 401 was summoned, on the suggestion of Theophilus of Alexandria, to prohibit the reading of the works of Origen.

The word 'Cyprus' does not occur in OT, but the island and the town Kition are frequently alluded to as 'Kittim,' which is identified with Cyprus by *Jos.* (*Ant.* i. vi. 1), *Χέτιμα* . . . Κύπρος αὐτῆν νῦν καλεῖται (cf. *Epiph. Hær.* xxx. 25). See KITTIM.

CYRENE (Κυρήνη), the chief city in Libya in N. Africa, about half-way between Carthage and

* The Peutinger Table gives (α) Paphos—xi—Palaephato (Palaephatos)—xxii—Curio—xvi—Amathus—xxiii—Cito—[xxiii]—Salamina: (xcvi in all). (β) Paphos—xxiii—Solos—xxix—Tamiso—xxiii—Thremitus—xviii—Cito—[xxiii]—Salamina: (xcvi in all).

Alexandria, was the capital of a small province corresponding to the modern Tripoli. Although in Africa, it was a Greek city, dating from B.C. 631. It was famous for its beauty of situation, its commerce, and its culture. Alexander the Great granted the rights of citizenship in it to Jews on equal terms with Greeks, and it became an important centre of the Jews of the Dispersion, the fourth of the population being Jewish according to Josephus. In the reign of Manasseh, Psammitichus, king of Egypt, carried off many Jews and settled them in the parts of Libya about C., while one of the Ptolemies transported 100,000 Jews to Pentapolis in the same district. Like other communities of the Hel. Jews, the Cyrenians had a synagogue of their own in Jerus., and seem to have been more Jewish than the Jews themselves (Ac 6⁹). There were Cyrenians among the first preachers of the gospel, and they were associated with the great forward movement of preaching it for the first time to the Gentiles (Ac 11¹⁹⁻²¹).

Lucius of C. (Ac 13¹) is said by tradition to have been the first bishop of his native district. Tradition also connects St. Mark with the first establishment of Christianity in this part of Africa. An interesting speculation gathers round the name of Simon of C. (Mt 27³²). He is referred to as the father of Alexander and Rufus, evidently well known to Mark's readers (Mk 15²¹); while St. Paul in his Epistle to the Romans refers to one Rufus as holding an honourable position among the brethren there, 'Salute Rufus, chosen in the Lord, and his mother and mine' (Ro 16¹³). From this it has been conjectured that while St. Paul was studying at Jerus. he enjoyed the motherly care of Simon's wife.

After Alexander's death, the district of which C. was capital became a dependency of Egypt. Under the Rom. rule it was called Cyrenaica, and was politically connected with Crete. In the 4th cent. the city was destroyed by the Saracens, and is now desolate.

Cyrenian (Κυρηναίος).—Two Cyrenians are mentioned in Scripture: Simon who bore our Lord's cross (Mt 27³²), and Lucius a Christian teacher (Ac 13¹).

W. MUIR.

CYRENIUS.—See QUIRINIUS.

CYRUS (שִׁירָא, Κύρος).—The name of Cyrus is written Kuras in Bab. cuneiform, Kurush in Old Persian. Ctesias stated on the authority of Parysatis, the wife of the Persian king Ochus, that her younger son was named Cyrus from the sun, as 'the Persians call the sun Κύρος' (*Epit. Phot.* 80; *Plut. Artax.* 1). In Zend, however, the 'sun' is *huware*, which could not take the form Κύρος in Old Persian, though in modern Persian it is *khur*, and in certain Aram. dialects of the Pamir it is *khir* and *kher*. According to Strabo (xv. 3), the original name of Cyrus was Agradates, his later name being adopted from that of the river Cyrus. But this is contrary to the fact that his grandfather's name was also Cyrus.

The classical writers have given contradictory accounts of his birth and rise to power. Herodotus (i. 95) says that he knew of three accounts different from the one he himself adopted, which was that Cyrus was the son of a Persian nobleman named Cambyses and Mandanê, a daughter of the Median king Astyages, who had caused her to marry beneath her station in consequence of a dream which the magi interpreted as predicting danger to himself from her son. A second dream induced him to order his relative Harpagus to kill the child. Harpagus gave it to the herdsman Mithridates to expose, but he and his wife Spako brought it up as their own. Subsequently Cyrus was recognized by Astyages, who, in consequence of the advice of the magi, sent him back to his parents, but punished

Harpagus by giving him the mutilated limbs of his own son to eat. Harpagus therefore persuaded Cyrus to lead the Persians into revolt; after which the infatuated Astyages appointed him the general of the Median army. The result was an easy victory on the part of Cyrus; Astyages, however, impaled the magi who had advised him to let his adversary go, raised another army, and himself led it into the field. But he was defeated and captured, though his life was spared, and Cyrus became king of Media as well as of Persia.

Xenophon, in the romance of the *Cyropædia*, gives a wholly different account. He makes Cambyses, the father of Cyrus, king of Persia. Cyrus is educated first in Persia and then by his grandfather Astyages; and when the latter is succeeded by his son Cyaxares, Cyrus acts as his general, subduing the Lydians, Babylonians, and other nations, and finally succeeding him in the natural course of things. His first victory over the Babylonians was when he was sixteen years old, when Evil-Merodach wantonly invaded Media; the second when he was forty, when Neriglissar, the ally of Cræsus of Lydia, attacked Cyaxares. His final conquest of Babylonia took place before the death of the king of Media.

Nicolaus of Damascus (vii. fr. 66) asserts that Cyrus was the son of a Mardian bandit named Atradates, whose wife Argostê tended goats. He began his career as a servant in the palace of Astyages. Here he was adopted by Artembares, the cupbearer, and recommended to Astyages, who raised him to power and wealth. Cyrus now made his father Atradates satrap of Persia, and urged by a 'Chaldæan' began to plot against Astyages, with the help of Ebares a Persian. Eventually, after obtaining leave to visit Persia, where everything had been prepared for a revolt, he defeated at Hyrba the troops which had been sent against him. In a battle before Pasargadæ, however, he and his general Ebares were driven within the walls, and his father was captured and soon afterwards died. The Persians now fled to the precipitous mountain-peak where Cyrus had been reared, and there, excited by the taunts of their wives, they utterly overthrew their Median assailants and destroyed the kingdom of Astyages.

Ctesias calls Astyages Astyigas, and states that after his defeat by Cyrus he fled to Ecbatana, where he was concealed in the palace by his daughter Amytis and her husband Spitamas, whom Cyrus ordered to be tortured, along with their children Spitakes and Megabernes, to make them confess where he was. Astyages was put into fetters by Ebares, but released by Cyrus, who married Amytis after putting her husband to death.

All these versions have been shown to be unhistorical by contemporaneous cuneiform inscriptions. The most important of these are—(1) a cylinder inscription of Nabonidus, the last king of the Bab. empire, from Abu Habba (Sippara); (2) an annalistic tablet written shortly after the conquest of Babylonia by Cyrus; (3) a proclamation of Cyrus of the same date.

The inscription of Nabonidus was composed soon after the conquest of Astyages by Cyrus in B.C. 549. Nabonidus calls Astyages (Istuvigu) king of the Manda or 'Nomads,' whom the Assy. texts identify with the Gimirra or Cimmerians. He states that the temple of the moon-god at Harran had been destroyed by the Manda, but that Merodach had ordered him in a dream to restore it, assuring him that within three years 'Cyrus the king of Anzan, their little servant, with his small army, shall overthrow the widespread people of the Manda; Istuvigu, the king of the people of the Manda, he shall capture, and bring him a prisoner to his own country.'

The annalistic tablet, which, when complete, began with the first year of the reign of Nabonidus, tells us that in the seventh year of the latter's reign (B.C. 549) Astyages had marched against 'Cyrus, king of Ansan,' but that his army revolted against him and delivered him to Cyrus, who then marched to Ecbatana, captured it, and carried its spoil to Ansan. Three years later (B.C. 546), Cyrus bears for the first time the title of 'king of Persia,' so that he must have gained possession of Persia between B.C. 549 and 546. In the latter year he crossed the Tigris below Arbela and conquered northern Mesopotamia as well as Armenia.

In B.C. 538, aided by a revolt in southern Babylonia, he attacked Nabonidus from the north. A battle was fought at Opis, which resulted in the defeat of the Bab. army; and a few days later, on the 14th of Tammuz (June), 'Sippara was taken without fighting.' Nabonidus fled and concealed himself in Babylon, followed by Gobryas, the governor of Kurdistan, with the army of Cyrus. On the 16th, Gobryas entered Babylon without resistance, and Nabonidus was captured. The daily services went on as usual in the temples of the city, and the contract-tablets show that there was no disturbance of trade. On the 3rd of Marcheshvan (October), Cyrus came to Babylon, and henceforth bore the title of 'king of Babylonia.' 'Peace to the city did Cyrus establish; peace to all the province of Babylon did Gobryas his governor proclaim. Governors in Babylon he appointed.' On the 11th of the month the wife* of Nabonidus died, and for six days there was mourning for her. On the 4th of Nisan, Cambyses conducted her funeral in the temple of Nebo. After this, offerings to ten times the usual amount were made to the Bab. deities.

The proclamation of Cyrus justifies his seizure of the Bab. crown, and declares that he had been called to it by Bel-Merodach, who was angry with Nabonidus. He describes himself as 'king of the city of Ansan,' the son of Cambyses, king of Ansan, grandson of Cyrus, king of Ansan, and great-grandson of Teispes, king of Ansan, and says that he had restored to their homes the exiles who were in Babylonia as well as their gods. He concludes by praying that the deities he has thus restored may daily intercede for him before Bel-Merodach and Nebo, whose 'worshipper' Cyrus professes himself to be.

It is clear that the Greek writers have confounded the Manda or nomad Scyths and Cimmerians with the Madá or Medes. Cyrus, moreover, like his ancestors, was not king of Persia, but of Ansan or Anzan, one of the most important divisions of Elam, which is stated in a cuneiform tablet to be the equivalent of Elam, and of which the native kings of Susa called themselves rulers. Teispes, the son of the Persian Achæmenes, seems to have conquered it at the time of the fall of the Assyr. empire. The fact explains Is 21², as well as the use of Susian as one of the three official languages of the Persian empire. At Behistun, Darius states that eight of his ancestors had been kings 'in a double line.' As Teispes was the father of his great-grandfather Ariaramnes, we should have exactly the eight kings, if we suppose that while the line of Cyrus was ruling in Anzan, that of Darius was reigning in Persia.

Another fact which is due to the cuneiform texts is, that the account of the siege of Babylon by Cyrus, given by Herodotus, is a fiction, derived probably from one of the sieges of the city by

* Or, according to the reading of Pinches, the son.

Darius Hystaspis. The date of the conquest of Astyages is also fixed. The conquest of Croesus and the Lydian empire probably took place before that of Babylon, as well as the reduction of the Greek cities in Asia Minor by the Medes, Mazares and Harpagus.

Before his death the empire of Cyrus extended from the Mediterranean to Bactria, and was thus larger than that of the Assyrians. Different stories are told of his death. Herodotus, who knew of more than one, says that he was slain when invading the Massagetæ. According to Ctesias, he had invaded the Derbikes, and after gaining a victory over them by stratagem, and capturing the son of their queen, Tomyris, was killed in a second engagement in which his troops were defeated. Diodorus asserts that he was taken prisoner by Tomyris, who crucified him; while Xenophon makes him die peacefully, and be buried at Pasargada, seven years after the death of Cyaxares.

The Bab. contract-tablets, on the contrary, prove that he reigned nine years over Babylon and 'the empire,' dying in July B.C. 529. A year before his death he had made his son, Cambyses, king of Babylon. According to Herodotus, Cambyses was the son of Cassandana, the daughter of Pharnaspès. The supposed tomb of Cyrus at Murghâb can hardly belong to the great conqueror: it is difficult to reconcile its character and position with the account given by Arrian (vi. 29), and the figure on a neighbouring column, above whose head is the inscription, 'I am Cyrus, the king, the Akhæmenian,' is that of a winged demi-god who wears an Egyptian head-dress. It can hardly, therefore, have been sculptured before the conquest of Egypt by Cambyses. The most probable view is that it represents Cyrus the younger.

The proclamation of Cyrus shows that he was not a Zoroastrian like Darius and Xerxes, but that as he claimed to be the successor of the Bab. kings, so also he acknowledged the supremacy of Bel-Merodach the supreme Babylonian god. Hence the restoration of the Jewish exiles was not due to any sympathy with monotheism, but was part of a general policy. Experience had taught him the danger of allowing a disaffected population to exist in a country which might be invaded by an enemy; his own conquest of Babylonia had been assisted by the revolt of a part of its population; and he therefore reversed the policy of deportation and denationalization which had been attempted by the Assyr. and Bab. kings. The exiles and the images of their gods were sent back to their old homes; only in the case of the Jews, who had no images, it was the sacred vessels of the temple which were restored (Ezr 1⁷⁻¹¹). See *RP*, New Series, v. pp. 143 ff.

D

D.—In critical notes on the text of the Gospels and Acts this symbol is used to indicate the readings of *Codex Beza*, a Græco-Latin MS of the 6th cent. preserved in the Cambridge University Library. The text, both Greek and Latin, is written stichometrically, *i.e.* in lines of unequal length, divided according to the sense—the Greek on the left, the Latin on the right hand page of each opening.

The Gospels are arranged in the order, Mt, Jn, Lk, Mk—an order found also in many old Latin MSS, the Gothic version, and in *Const. Apost.* ii. 57.

Between Mk and Ac there is a gap which, according to the original numbering of the quires, must have contained 67 leaves (8 quires and 3 leaves). It closes with a fragment of a Latin version of 3 Jn 11-15. Clearly, therefore, the Epp. of Jn occupied part of the vacant space (14 or 15 leaves). What else the missing leaves contained it is impossible to say. The other Catholic Epistles, if they were all present, would require about 36 leaves. This would leave 16 leaves (=2 quires) unaccounted for; and it is possible, though not very likely, that, as Scrivener suggests, the scribe had made a mistake of 2 in numbering his quires at this point in the MS.

About 37 leaves are missing in other parts of the MS, and 12 are more or less mutilated. It is also mutilated at the end. The following passages are in consequence wanting in the Greek Text—Mt 11-20 [37-16] 6²⁰-9² 27-12, Jn 1⁶.3²⁶ [18¹⁴-20¹²], [Mk 16¹⁵-20], Ac 8²⁹-10¹⁴ 21¹⁵-18 22¹⁰-20 22²⁹ end. The gaps in the Latin are Mt 11-11 6⁸-8²⁷ 26⁶⁵-27¹, Jn 1¹-3¹⁶ [18²-20¹], [Mk 16⁶-20¹]. The passages in square brackets have been supplied by a 9th cent. hand.

The MS was written in all probability in Gaul, and Rendel Harris has given good reason for believing that it did not travel far from its birth-place for the first 1000 years of its existence. During this period it was corrected at various times by eight or nine different hands.

Its modern history begins with the Council of Trent, whither apparently it was taken in 1546 by the Bishop of Clermont in Auvergne. Stephens, in his 1550 edition, published readings from it derived from collations made for him by his friends in Italy—perhaps during this visit to the Council. When Beza presented the MS to the University of Cambridge in 1581, he stated that it had been taken from the Abbey of St. Irenæus in Lyons at the sack of that city in 1562. It is for the most part the only witness among Greek MSS to a type of text which we know from the evidence of patristic quotations and the earliest versions to have been widely current as early as the 2nd cent. It has in consequence, especially in recent years, received a great deal of attention, notably in a most ingenious work by J. Rendel Harris, *A Study of Codex Beza* ('Texts and Studies'), 1891, and in two careful but not altogether convincing volumes, *The Old Syriac Element in Codex Beza*, 1893, and *The Syro-Latin Text of the Gospels*, by F. H. Chase, 1895. The problems raised by these writers will require fuller treatment in connexion with the whole subject of the Textual Criticism of the New Testament.

An excellent edition of the MS, including a complete transcription of the text and a full introduction, was published by Scrivener in 1864, and this year (1897) the University of Cambridge has undertaken to bring out an edition in photographic facsimile.

D₂.—In the Epistles of St. Paul the same symbol—written more properly D₂ to avoid confusion—is used to denote the readings of the MS in the National Library at Paris, the *Codex Claromontanus*. This is also a Græco-Latin MS of the 6th cent. written stichometrically. It seems clear that it was the work of a Greek scribe, and that it remained for some time in scholarly Greek hands; but there seems no decisive evidence to fix either the place where it was written or its first home. The remarkable list of the canonical books of OT and NT inserted between Philemon and Hebrews—known as the Claromontane stichometry—points on the whole to a Western origin,—Carthage, Rome, or Gaul. The Latin version is of great importance throughout. In Hebrews it is the main representative of the old Latin version of the epistle.

It contains all the Pauline epistles virtually complete—including Hebrews. It has been most carefully collated both by Tischendorf and Tregelles, and sumptuously edited by Tischendorf, 1852.

J. O. F. MURRAY.

D.—The symbol ordinarily used in criticism of Hex. to signify the work of the Deuteronomist; often so as to include also his school, although this creates confusion, which may be avoided by using for this sense D², D³, and similar symbols. See HEXATEUCH.

F. H. WOODS.

DABBESHETH (דַּבְּשֶׁת), Jos 19¹¹.—A place on the borders of Zebulun. The line is difficult to follow, but the extreme limits on N. and S. seem to be defined by the names Dabbesheth and Jokneam. In this case the ruin *Dabshek*, on the hills E. of Acco, may be intended, the only place where this name (meaning 'hump,' cf. Is 30⁶) occurs. See *SWP*, vol. i. sheet iii.

C. R. CONDER.

DABERATH (דַּבְּרָת), Jos 19¹² 21²⁸, 1 Ch 6⁷².—A city of Zebulun given to the Levites, noticed as the extreme point on the S.E. border; now the village *Debarieh* at the foot of Tabor on the W. In the record of the conquests of Ramses II. (Brugsch, *Hist.* ii. p. 64) we learn that, about 1325 B.C., he attacked places in the Amorite country, named Dapur, Shalama (Shunem), Maroma (Meirûn), Ain Anamim, Kalopu (perhaps Shalabûn), and Beitha Antha (Beth Anath); and of these places Shunem was in Lower Galilee, and Beth Anath and Meirûn in Upper Galilee. Dapur is thought to be Tabor or Daberath, and is represented as a walled town. But in Egyptian the letters L and R are not distinguished, and the name may have been Dapul. In the latter case *Dibl* in Upper Galilee would be the site. See *DIBLAH*. The site of Daberath on Tabor was known in the 4th cent. A.D. (*Onomasticon*, s.v. Dabira), but wrongly identified with Debir. See *SWP* vol. i. sheet vi.

C. R. CONDER.

DABRIA.—One of the five scribes who wrote to the dictation of Ezra (2 Es 14²⁴).

DACUBI (Α Δακουβί, B om., AV *Dacobi*) = **AKKUB**, Ezr 2⁴², Neh 7⁴⁵.

DAGGER (Jg 3¹⁶ AV, 'sword' RV, Heb. דָּגֶר *herebbh*).—The Heb. word means in most cases a short weapon used for stabbing (cf. 2 S 20^{8, 10}). The Arab '*khanjar*,' still in use E. of Jordan, has a curved blade, and inflicts by a downward stab

just such a horrible wound as is described in 2 S 20¹⁰. See SWORD. W. E. BARNES.

DAGON (דַּגּוֹן, *Daḡōn*).—The principal deity of the Philistines, whose worship, however, seems to have extended beyond the Phil. country, as is proved by the geographical name Beth-dagon (which see), and perhaps by the later name Dagon (*Jos. Ant.* XIII. viii. 1; *Wars*, i. ii. 3).

It has commonly been held by scholars that the name is a diminutive, and so a term of endearment, from *dag*, which signifies fish, and hence that D. was worshipped under the form of a fish. He has been generally identified with a Bab. god who is represented on seals and elsewhere as having in part that form. And though there is nothing in the biblical account to confirm this view, there is also nothing to contradict it. D. had face and hands, and, according to the Sept., feet also (1 S 5⁴); but this is not inconsistent with his having in part the shape of a fish. The pictures of the Bab. fish-god show face and hands, and in some instances feet. Indeed, one is strongly tempted to find in the phrase 'only D. remained,' the meaning 'only little fish remained,' the point being that, after the head and hands of D. were cut off, nothing was left of him save the fish-shaped part. Nevertheless, Sayce and others now insist that D. was not a fish-god, and that the resemblance of name is a mere coincidence. The Bab. fish-god was Ea, the patron god of the city of Eridu, the god of the ocean, of water, of wisdom. In some sense Ea was god of the sea, Anu of the sky, and Bel (Baal) of the earth and the under-world. Bel is closely associated with Anu, but not with Ea. And D. appears in the inscriptions as one of the names or one of the forms of Bel.

The name and worship of D. were upon either theory imported into Pal. from Babylonia. The name is held to have been originally Sumerian, but a Semitic derivation was found for it in connexion with its use to designate the god of *agriculture*. D. was identified with *dagan*, the Heb. word for corn, when corn is thought of as an agricultural product.

Presumably, D. was worshipped in Phœnicia as well as in Philistia. There is a Phœn. cylindrical seal of crystal now in the Ashmolean Museum at Oxford, on which, according to Sayce, the name Baal-dagon is written in Phœn. letters, with an ear of corn engraved near it, and other symbols, such as the winged solar disc, a gazelle, and several stars, but no figure of a fish. Eusebius (*Præp. Evang.* i. 6) quotes Philo Byblius of the 2nd cent. A.D. as citing the ancient Phœn. legends that go under the name of Sanchoniathon, to the effect that Ouranos (Anu) married his sister the earth, 'and by her had four sons, Ilus (El), who is called Kronos, and Betylus, and D., which signifies "corn," and Atlas.' 'D., after he had discovered bread-corn and the plough, was called Zeus Arotrios.'

The Phœn. Dagon, then, like the Bab., is properly 'Zeus of the plough.' With this agree all the notices found in OT in regard to the Phil. Dagon. He had temples in Gaza and Ashdod (*Jg* 16²³, 1 S 5¹⁻²), and presumably in the other Phil. cities. His worship among the Philistines was national, and not merely local (1 Ch 10¹⁰, 1 S 5²⁻⁶¹⁸). His worship did not exclude that of other Baals (2 K 12³). The Philistines regarded him as giving them victory over their enemies, rejoicing before him when Samson was in their power, and placing Saul's head in his temple (*Jg* 16²³, 1 Ch 10¹⁰). But he was eminently the god of agriculture; they acknowledged J^h's victory over him through the mice that marred their fields, and offered golden mice in token of the acknowledgment (1 S 6⁴⁻⁵).

Apparently, the worship of D. among the Philistines was conducted with a highly developed and technical ritual. We may infer this from the elaborate discussions and arrangements for returning the ark, as described in 1 S 5. 6, the golden mice and golden tumours as a guilt-offering, the new cart, the new milch kine with their calves shut up at home. The worship of D. at Gaza continued to a late period. During the Maccabæan wars Jonathan destroyed the temple of D. there (1 Mac 10^{83, 84} 11⁴; *Jos. Ant.* XIII. iv. 4, 5).

LITERATURE.—Sayce, *HCM* 325-327; Sayce in *SS Times*, May 27, 1893; Smith, *HGHL* 164; Moore, *Judges*, 358 f.; Welh. and Driver on 1 S 5⁴; *Oxf. Heb. Lex. s.v.* W. J. BEECHER.

DAISAN (B Δαισάν, A Δεσ-), 1 Es 5³¹.—Called REZIN, *Ezr* 2⁴⁸, *Neh* 7⁵⁰. The form in 1 Es is due to confusion of ρ and τ.

DALAN (A Δαλάν, B 'Ασάν, AV Ladan), 1 Es 5⁵⁷ = DELAIAH, *Ezr* 2⁶⁰.

DALE.—See KING'S DALE.

DALETH (ד).—Fourth letter of Heb. alphabet, and as such used in the 119th Psalm to designate the 4th part, each verse of which begins with this letter.

DALLY.—Only Wis 12²⁶ 'correction, wherein he dallied with them.' By a bold anthropomorphism God is described as only sporting with the Egyptians in the lighter plagues that fell on them. The Gr. is *παίγνιαις ἐπιτιμήσεως*, lit. 'play-games of correction'; Vulg. *ludibriis et increpationibus*, Cov. 'scornes and rebukes,' Geneva 'scornful rebukes,' RV 'a mocking correction as of children.' 'Dally' has now chiefly the sense of 'delay,' which easily arose from the older sense of 'sport,' as in Milton, *Of Reformation* (Prose Works, ii. 410), 'Let us not dally with God when he offers us a full blessing'; and Bunyan, *Heavenly Footman* (Clar. Press ed. p. 270), 'it is not good dallying with things of so great concernment, as the Salvation or Damnation of thy Soul.' J. HASTINGS.

DALMANUTHA (Δαλμανουθά) is mentioned only in Mk 8¹⁰. The corresponding statement of Mt (15³⁰ RV) gives Magadan. In Tatian, *Diatessaron* (Hill's ed. p. 134), it is Magheda. Rendel Harris (*Study of Codex Bezae*, p. 178) suggests that Dalmanutha may be simply a corruption from the Syriac; but see Chase, *Bezan Text of the Acts*, p. 145 n². On the variants in Mk see Chase, *Syro-Latin Text of the Gospels*, p. 97 f. The common reading Magdala is probably a substitution of a better for a less known place. Ewald suggested that Magadan stands here for Megidon = Megiddo; but Eusebius says this Magadan was near Gerasa. Thomson places Dalmanutha at Ed-Delemiyeh, one mile N. of the Jarmūk, at the S.E. corner of the Sea of Galilee. As the scene of the second Feeding of the Multitude is uncertain, and as there is nothing said to indicate in what direction the boat into which our Lord went was steered, the site of Dalmanutha cannot be determined with certainty. Tristram suggests a site 1½ mile from Migdel (Magdala), and Sir C. Wilson thinks it was not far from that.

LITERATURE.—Besides the works mentioned above, consult Keim, *Jesus of Nazara* (Eng. Tr.), iv. 238 n.; Edersheim, *Jesus the Messiah*² (1887), ii. 67 ff.; Andrews, *Life of our Lord*, ed. 1892, p. 338; Herz and Nestle in *Expos. Times*, vii. 563, ix. 45, 95. A. HENDERSON.

DALMATIA (Δαλματία) in apostolic times was an ill-defined mountainous district on the E. coast of the Adriatic, stretching towards Macedonia. In its more exact use, the name, which is not known

to the earlier Greek writers, was used of the S. portion of the Rom. province Illyricum, between the Drinus and the sea. In its more indefinite use it was practically another name for Illyricum. St. Paul preached the gospel in the district, or, at any rate, in its neighbourhood (Ro 15¹⁹), and during his last imprisonment in Rome it was visited by Titus (2 Ti 4¹⁰). In our ignorance of the place where the apostle was arrested, we cannot determine either the exact time when Titus was sent to D. or the reason why he was sent; but it has been conjectured that, having failed to find St. Paul at Nicopolis as he expected (Ti 3¹²), he went on to Dalmatia. W. MUIR.

DALPHON (דלפון, Est 9⁷), the second son of Haman, put to death by the Jews. In the LXX Δελφών.

DAMARIS (Δάμαρις). — The name of a woman who, with Dionysius the Areopagite and certain others, is mentioned as having been converted by St. Paul at Athens (Ac 17³⁴). Ramsay (*St. Paul the Trav.* p. 252) points out that it is not stated that she was of good birth (in contrast with 17¹² and 13⁵⁰); that this arose from the fact that women of social position in Athens would certainly not have the opportunity of hearing St. Paul; and that her name suggests that she was a foreigner, perhaps 'one of the class of educated *Hetairai*.' This suggestion seems to go rather beyond the evidence. The name is said to be a corruption of δάμαλις, a heifer, which is the reading of one Lat. MS (*et mulier nomine Damalis*, Flor.). Chrys. (*ad loc.*) suggests quite erroneously that she was the wife of Dionysius; this could not be the tr. of καὶ γυνὴ δνόμαρι Δ. These words and all mention of this woman are omitted by Codex Bezae. Ramsay (*Church in Rom. Emp.* p. 161) quotes this in proof of his assertion that the reviser to whom we owe the Western text was a Catholic who objected to the prominent position assigned to women in the Acts; 'this was, firstly, pagan rather than Christian; and, secondly, heretical rather than Catholic.' (See also 17¹² and the variation there.) A. C. HEADLAM.

DAMASCUS (דמשק, Δαμασκός).

This city is the contemporary of all history. Its origin is lost in antiquity. Jos. (*Ant.* i. vi. 4) says it was founded by Uz, grandson of Shem. It is first mentioned in connexion with Abraham's pursuit of the defeated Chedorlaomer (Gn 14¹⁵). Then (Gn 15²) his servant is called Dammesek Eliezer, where both the Chaldee and the Syr. have 'Eliezer the Damascene.' It occurs in 28³⁶ as דמשק דמשק, Aram Dammesek, which suggests comparison with the modern Arabic name, *Dimashk esh-Shām*. As it was the capital of Aram, so it is the chief city of *esh-Shām*, the modern Syria. *Esh-Shām* = 'the left,' i.e. the country on the left; as *el-Yemen*, Arabia Felix, is on the right of the Arabian looking northward. A Moslem tradition makes Eliezer the founder of the city, and Abraham king for some years before he went south to Palestine. So also Nicolaus of D., quoted by Jos. (*Ant.* i. vii. 2). He mentions a village called 'the Habitation of Abraham,' which may be identical with *el-Burzeh*, 3 miles N. of the city, where there is a *wely* sacred to the patriarch.

i. HISTORY.—The history of D. really begins for us with its capture by David. Coming to succour Hadadezer, king of Zobah, the Damascenes were themselves overthrown. David smote of the Syrians 22,000 men, took and garrisoned the city, and 'the Syrians became servants to David, and brought presents' (2 S 8³⁻⁶). Nicolaus of Damascus says the battle was fought on the Euphrates. Rezon, son of Eliada, a follower of Hadadezer, escaped, gathered a company around him, possibly fugitives like himself, and obtained possession of Damascus. 'He was an adversary to Israel all the days of Solomon.' His experience on the Euphrates possibly led him to abhor Israel (1 K 11²³⁻²⁵). But soon again the sceptre passed to the family of

Hadad. Syria and Israel were in league against Judah. Hard pressed by the king of Israel, Asa bought the friendship of Benhadad with costly presents, and induced him to break with Baasha and invade his territory. A successful raid into the northern dominions of Israel called off Baasha and relieved Judah (1 K 15¹⁶⁻²¹). Benhadad seems to have followed up his advantage in the reign of Omri. Retaining the captured cities, he held the right to 'make streets' in the new capital, Samaria (1 K 20³⁴). 'Streets' may have meant quarters for a permanent embassy, or simply accommodation for Syrian merchants, who, like the Tyrians in Memphis, would congregate in one quarter. It was a concession to a power which could enforce it if necessary. Benhadad, son of this monarch, led a great expedition against Samaria. There were with him thirty-two subject kings, with horses and chariots. Conducting the siege with a contemptuous carelessness, born of a sense of absolute superiority, he was surprised by a sudden attack, and his army routed, he himself escaping with difficulty on horseback. Meeting Israel again at Aphek, he was defeated and his army destroyed. Taken by Ahab, his freedom was granted on most humiliating terms (1 K 20). In about three years' time we find them again at war, fighting for possession of Ramoth-gilead; and there Ahab was slain (1 K 22). From D. came Naaman, to be healed of leprosy (2 K 5). Again the Syrians invaded Israel, and a company sent to arrest Elisha at Dothan was led by him, blinded, into Samaria (2 K 6²⁸⁻²⁹). Unaffected by their chivalrous treatment, we find Benhadad directly again besieging Samaria. The city was reduced to the most appalling straits by famine, when, by a miraculous discomfiture of the Syrians, it was delivered, and plentiful supplies provided (2 K 6^{24-7²⁰}). From the cuneiform inscriptions we learn that the Assyrians also harassed Benhadad, and were too strong for him and his allies. His reputation suffered heavily from these disasters, making it easier for a strong man to usurp his place. Falling sick, he sent a messenger laden with gifts to consult Elisha. To this man, Hazael, the prophet promised the kingdom. On his return he secured the swift fulfilment of the promise by the murder of his master (2 K 8¹⁵). In his encounters with the great Assyrian power, the new king was not more fortunate than his predecessor; but elsewhere success waited upon his standards. Jehoram of Israel and Ahaziah of Judah attacked Ramoth-gilead. Hazael repulsed them, the former being seriously wounded (2 K 8^{28, 29}). He then laid waste the whole country east of the Jordan (2 K 10^{22, 33}). He captured Gath (*ib.* 12¹⁷), and threatened Jerusalem. Jehoash purchased immunity from attack, stripping the temple and the palace of all valuables for this purpose (*ib.* 12¹⁸). Hazael also prevailed against Israel, and superiority was maintained by his son Benhadad (*ib.* 13²). Ultimately Jehoash, son of Jehoahaz, asserted his independence, and recovered the cities Hazael had taken (*ib.* 13²⁵). Jeroboam II., son of Jehoash, the great warrior-king of the northern monarchy, extended the borders of Israel, recovering D. and Hamath, probably making their kings tributary to Israel (*ib.* 14²⁸). D. and Samaria next appear in league against Jerusalem (2 K 15³⁷ 16⁵). Rezin of D. reconquered Elath, driving out 'the Jews.' Meantime the Assyrians, under Tiglath-pileser III., whose Bab. name was Pul or Pulu (2 K 15¹⁹), were rapidly extending their sway, threatening the independence of D. and Samaria alike. To consolidate their power against Assyria, Rezin and Pekah sought to attach Judah to their cause by dethroning Ahaz, and setting up 'a king in the midst of it, the son of Tabeel' (Is 7⁶). The

attempt not only failed: it hastened the disaster they wished to avert. Ahaz appealed to Tiglath-pileser, who at once 'went up against D. and took it, and carried the people of it captive to Kir,' Rezin himself being slain (2 K 16⁹); and Assyrian colonists were placed in it (Jos. *Ant.* ix. xii. 3). This was the heaviest blow the city had yet received, and for a time she seems to have been crushed by it. To this period probably refer the prophecies of Isaiah and Amos, 'The riches of D. . . shall be carried away before the king of Assyria' (Is 8⁴), 'Behold, D. is taken away from a city, and it shall be a ruinous heap' (Is 17¹), 'I will send a fire into the house of Hazael, and it shall devour the palaces of Benhadad . . . and the people of Syria shall go into captivity to Kir, saith the Lord' (Am 1⁴⁻⁵; see also Jer 49²³⁻²⁷). Ahaz came to D. to do homage to Tiglath-pileser. Here he saw the great altar, of which, at his order, a duplicate was made by Urijah the priest, and put in the temple to supplant the brazen altar (2 K 16¹⁰⁻¹⁶). For the important issues of this act see W. R. Smith, *OTJC*² 265, 443, *BS* 359, 466 ff.

A city occupying the position of D. could not be permanently overwhelmed. During the Persian period she displayed afresh her perennial vigour, playing a distinguished part (Strabo, xvi. 2. 9). When Darius advanced against Alexander at Issus, he sent his harem and treasures to D. for safety. After his defeat and inglorious flight, the city was treacherously surrendered to Alexander's general, Parmenio (Arrian, *Exped. Al.* ii. 11). During the Greek occupation D. yielded to Antioch on the Orontes the rank of first city in Syria. In the course of the wars with Egypt, D., with Palestine and Coele Syria, fell at times into the hands of the Ptolemies. On the division of Syria (B.C. 111) between Antiochus Grypus and Antiochus Cyzicenus, D. fell to the latter. Against this prince Hyrcanus made a successful stand (Jos. *Ant.* XIII. x. 1-3). The next king was Demetrius Eucærus, who, assisted by Ptolemy Lathyrus, established himself in D., and divided the rule of Syria with his brother Philip (*Ant.* XIII. xiii. 4). Invited by discontented Jews, he marched against Alexander Jannæus, and defeated that prince near Shechem, returning immediately to war with Philip. The latter, assisted by Arabs and Parthians, was victorious. Demetrius was sent to Mithridates, king of Parthia, and remained with him till his death. A younger brother, Antiochus Dionysus, now seized the throne of Damascus. He fell in an encounter with Aretas, king of Arabia; and this monarch, invited by the inhabitants, entered D. and assumed the reins of government. Against Ptolemy Mennæus, 'who was such a bad neighbour to the city,' Alexandra, widow of Jannæus, sent an expedition to D., under her son Aristobulus, which achieved nothing (*Ant.* XIII. xvi. 3). Tigranes, king of Armenia, obtained temporary possession. The Romans under Metellus took the city, and here, B.C. 64, Pompey received ambassadors from the neighbouring kings, who brought him presents; among others, a golden vine from Aristobulus, valued at 500 talents. In B.C. 63 the whole of Syria became a Roman province; and, while the proconsul usually resided in Antioch, D. began to assume her old ascendancy. Herod, while still a young man, escaping judgment from the Sanhedrin, came here to visit Sextus Cæsar, and was made by him general of the army of Coele Syria (*Ant.* XIV. ix. 5). Later, according to Jos. (*BJ* I. xxi. 11), he showed his magnanimity by adorning many cities, not only within but also beyond his own dominions. To D. he added the attractions of a gymnasium and a theatre. It was on the way to D. that the

miraculous event occurred through which Saul of Tarsus was converted to Christianity; and in this city he first testified for Christ (*Ac* 9²⁷). It was then under the Arabian Aretas, and governed by an ethnarch, whose vigilance Paul escaped, being let down over the wall in a basket (2 Co 11³²). Hither the apostle returned, after his sojourn in Arabia (*Gal* 1¹⁷). It was reckoned to the Decapolis (Pliny, *HN* v. 16). Josephus curiously remarks that Scythopolis was the greatest of these cities. After Herod's time he says little of D.; but there must have been a strong Jewish colony there: at one time some 10,000 of these were slain by the populace (*BJ* II. xx. 2). Under Trajan, D. attained the rank of a Roman provincial city. Since that time, although she has often changed hands, her career of prosperity has hardly been interrupted, save perhaps when she fell before the ferocious Tamerlane (1399). D. is still the chief city in Syria, with a population of not less than 150,000. Christians have always been fairly numerous in the city. Theodosius transformed the great temple into a Christian church. On the advent of Islam it was changed into a Moslem mosque. D. was originally subordinate to Antioch, which was the seat of the patriarch; but this official, still taking his title from Antioch, now resides in Damascus. The darkest blot on the history of the city is the massacre of some 6000 Christians in the summer of 1860.

ii. GEOGRAPHY.—One of the most beautiful and fertile plains in the world is that which lies to the east of the Anti-Lebanon range, at an elevation of about 2200 ft. above sea-level. Great Hermon, *Jebel esh-Sheikh*, a vast snowy bank filling all the horizon, forms the western boundary. A chain of hills, thrown off to eastward from Anti-Lebanus, runs along the northern edge. *Jebel el-Arwad* and *Jebel Mâni* shut it in on the south. Three marshy lakes mark the eastern frontier of fertility; and away beyond them rises a range of low hills, which definitely cuts off this district from the sandy wastes of the Arabian desert. These surrounding hills, all bare and forbidding, save in the deeper and shadier wadies, enclose within their rocky arms a broad expanse of rich waving green.

This plain owes its fertility almost entirely to the river *el-Barada*, 'the cool,' which bursts through the limestone ramparts on the north, to fling itself in many a refreshing stream over its surface; and to the waters of *el-A'waj*, 'the crooked,' which, coming down from the eastern slopes of Gt. Hermon, flows through the southern meadows. Something is also due to the protection of the desert hills in the east, which in a measure bar the way against the drifting sand-storms from the wilderness. In the plain the natives distinguish five districts. The western portion, extending about two hours east of the gorge of the *Barada*, is divided by that river into the northern and southern *Ghautah*. To the east is the *Merj*, also divided by the *Barada* into north and south; while all lying between these districts and *Jebel el-Arwad* and the valley of *el-A'waj*, is known as *Wady el-Ajam*. Scattered over this tract are some 140 villages. A population of about 50,000 are engaged almost exclusively in agricultural pursuits. Clumps of olives, and many varieties of fruit trees pleasantly diversify the landscape, while between them, in season, far and wide, wave seas of golden grain. On the edge of the plain, east of *el-Barada*, just under *Jebel Kasûm*, which rises some 1700 ft., lie the famous orchards, some 30 miles in circumference, which encircle with luxuriant foliage the ancient city of Damascus. From afar are seen the white roofs, domes, and minarets, in striking relief against the green. The scene of rich beauty here

presented, with the shade of fruitful trees, and on every hand the music of running water, has ever inspired the Arab with admiration; and when he dreamed of Paradise—'the garden' *par excellence*—his imagery was drawn from the gardens and streams of Damascus. Nor need we wonder if, coming from the dreary monotony of the burning desert, the Bedawi, fascinated by its delights, thinks himself in the midst of an earthly Paradise. Even for the eye accustomed to the fresh beauty and fruitfulness of the West, it possesses many a charm, although the descriptive language of the Arab may appear somewhat exaggerated. There are few places where so rich a variety of fruits is brought to maturity within a similar area. In the vicinity of the city are large vegetable gardens; and in the fields beyond different kinds of grain, tobacco, cotton, flax, hemp, madder-roots, and vicinus are grown. The olive is plentiful, and much of the oil used in the city is made in the neighbourhood. Tall, graceful poplars line the banks of the streams, yielding excellent timber for building purposes. Firewood is mostly made of the olive and the apricot. There are also the cypress, the plane tree, and the stately palm. But the charm of D. is felt chiefly in her gardens, and under the shadow of her far-stretching thickets of fruit trees. There, in generous rivalry, are found the orange, the lemon, and the citron; the apple, the pear, and the quince; plums and prunes, grapes and figs, pomegranate and mulberry, almonds and walnuts, hazel-nuts and pistachios.

D. is situated about 60 miles from the coast. Its exact position is 33° 30' N. lat., 36° 18' E. long. It is now most easily approached by the magnificent French diligence road from Beirut, which scales Mount Lebanon, crosses *el-Beka*, and then follows the easy passes through Anti-Lebanon to the plain of Damascus. The routes by which of old she communicated with the seaboard varied with political conditions. The way to Tripoli lay past *Ba'albek* and Béscherreh. That to Beirut followed closely the line of the present road; while the great height of the two Lebanons lay also between D. and Tyre and Sidon. When the way was clear, she found the most convenient outlet at Acre. This road led to the south-west past *Sa'sa'* and *Kuneiterah* over the *Jedâr* uplands, crossed the Jordan below lake *Hâleh* by *Jisr Benât Ya'kûb*, traversed the rolling downs of the upper Jordan valley, and splitting towards the west, one arm took the difficult but direct route by way of *Safed*; the other swept southward past *Khân Jubb Yusif* to the plain of Gennesaret at *Khân Minyeh*, and, following an easy line by the wadies to the north-west, joined the *Safed* road at *Er-Râmeh*. From Gennesaret a branch of this highway ascended the uplands west of the Sea of Galilee to *Khân et-Tujâr*, and, passing round the base of Tabor, crossed the plain of Esdraelon to Megiddo, and thence to the Philistine plain and Egypt. Another branch kept the valley along the shore of the lake, and southward past Bethshan to Jericho. This was crossed by a road, which, leaving D. in a more southerly direction, traversed the level reaches of the *Haurân*, came down into the valley from the *Jaulân* highlands east of the sea, by way of Apeh, and here dividing, one limb crossed the Jordan below the lake, climbed the hills to westward, and reached Acre by way of Kefr Kennah; the other passed up the vale of Jezreel, and again bifurcating, one branch went straight to the sea over Esdraelon: the other, bending to the south-west, is identified with the ancient caravan road from Gilead, which passes by Dothan, and comes down upon the plain of Sharon. The old gold and frankincense caravan road from Arabia the Happy

has frequently changed its course in the northern reaches. The traffic has long been confined to the passing of the *Haj*, the Moslem pilgrimage to and from *El-Haramein*, *El-Medînah*, and *Mecca*. The great road from Aleppo in the north is split as with a wedge at Emesa by the Anti-Lebanon ridge. It throws an arm round either side of the mountain, that on the west traversing the valley of Cœlesyria by way of *Ba'albek*, and unites again at Damascus. Eastward lay the highways across the desert to Palmyra and Baghdâd. Thus the great avenues of communication between north and south, east and west, along which flowed the commerce and marched the armies of the ancient world, lay through the heart of the city. Resting in the midst of a beautiful oasis on the edge of the changeless desert, surrounded by desert hills, she formed the natural harbour whither steered the argosies from the sea of sand, bearing the treasures of the East: whence again the sombre mariners set forth upon their dreary voyage homeward. Herein we have the secret of her perennial greatness. A strong position she never was, and often has she bowed beneath the stroke of the conqueror, becoming 'a servant to task work.' But, ever as the tides of war rolled back, she has arisen again, fresh and vigorous as of yore. She has been the meeting place and mart of the nations; and as she has been of use to all, to the desert nomad and to the more civilized and settled peoples alike, so the necessities of all have conspired to perpetuate her prosperity.

iii. TRADE.—It seems probable that the chief source of income to the people of D. would be the constantly passing caravans. But that they also traded on their own account is shown in *Ezk 27¹⁸*, the 'handyworks' of Tyre being exchanged for 'the wine of Helbon and white wool.' *Halbîn*, a village about 12 miles north of D., is still famous for its vine produce; and the mountain shepherds of Anti-Lebanon would always have a supply of white wool for the D. merchants. From *Am 3¹²* (RV) we may gather that the city was already known for silken manufactures. Our word 'Damask' is derived from a product of the looms of Damascus. At a later time her armourers also achieved wide fame, and the 'Damascus blade' was highly prized. They were carried off *en masse* by Tamerlane, and settled in Samarkand.

iv. ANTIQUITIES.—The main stream of *El-Barada*, the true creator of the city, enters from the N.W., and, passing under the great square, part escapes to water the gardens on the north, while the rest is carried off through multitudinous conduits to supply the houses of the inhabitants. The distribution of the water has always been a matter requiring the exercise of both care and tact among these excitable people: so it has come to be a common saying, that 'every drop of the water of *El-Barada* has to run according to law.' The ancient city was built on the southern bank of the stream. Much more ground is now covered to the north, and especially to the S. and S.W., while the long limb of *El-Médân*, terminating in the 'Gate of God,' *Bawwabet Ullah*, whence issue the pilgrims for *Mecca*, stretches far to the S. The old walls may be traced, however, along the edge of the stream, and through the centre of the modern city, in circumference about 4 miles. For a city of such extraordinary age, D. is not rich in antiquities. The castle, a rectangular building of great extent, standing at the N.W. corner of the old wall, probably dates only from the Middle Ages, although the substructures are ancient. To the S. of the eastern gate part of the wall is very old. The gate itself dates from Roman times; and the line of the *Via Recta*, 'the street called straight,' may be traced from this to the western gate. It is still called *Derb el-Mus-*

tašim, straight street, by the natives (*Derb es-Sultāny*, 'the king's highway,' is the name given to every important road in the country). This is the straight street common to all Syro-Greek and Syro-Roman cities, of which fine examples are still to be seen at *Bosrah* and *Shuhbah*. The great mosque possibly occupies the site of the temple of Rimmon (2 K 5¹⁸). It is in accordance with the conservatism of the Orient, that the spot has preserved its religious character under the dominion of successive faiths. It was a spacious Greek temple, then a Christian church, and finally it became a Moslem mosque; the only remaining evidence of Christian use being the Greek inscription over the southern gateway, 'Thy kingdom, O Christ, is an everlasting kingdom, and Thy dominion endureth for all generations.' The Moslems say that the head of John the Baptist was buried here; but Christian tradition has it that the church was dedicated to John Damascenus, whose tomb was within it; and there his body was miraculously retained, when an effort was made to remove it. Of this mosque, which for centuries had been the pride of the Moslem world, a large part was destroyed by fire in October 1893.

The traditions associating certain spots with Abraham, Naaman, and Elisha are of the most shadowy character. Hardly more reliable are those relating to the experiences of St. Paul. A spot about half a mile E. of the city is shown as the scene of his conversion. It is now the Christian burying-ground. But tradition has several times contradicted itself as to the scene of this miracle: in any case it could not be here, as the traveller from the S. would not enter the city from the E. Between this and the gate is the grave of St. George, the kindly porter who connived at St. Paul's escape, and suffered martyrdom. The spot where the apostle was let down over the wall in a basket, 'the house of Judas' in Straight street, and also the house of Ananias, are pointed out; but considerable uncertainty attaches to them all.

W. EWING.

DAMN, DAMNABLE, DAMNATION.—These words have in the course of time suffered a process of degeneration, for which, says Bishop Sanderson, 'we are not so much beholden to good acts as to bad manners.' The Lat. *damnare* signified 'to inflict loss on one,' 'to condemn.' But, under the influence of theology, the Eng. words thence derived soon acquired the sense of 'condemnation to eternal punishment'; and this special application ran alongside the orig. meaning from the 14th cent. to the 18th. In the 1619 ed. of the Bishops' NT, the translation of 1 Ti 5¹² is 'having damnation, because they have cast away their first faith'; and there is added this note: 'S. Paul doth not here speake of the everlasting damnation, but by this word damnation, doeth rather understand the shame that those wanton widows shall have in the world for breaking their promise.' Thus even then the sense to which the words are now wholly confined was the most familiar. But in earlier English it was not so. To Wyclif's ear the words must have had a very different suggestion, for he not only uses 'damn' freely in the sense of 'condemn,' as in his tr. of Job 9²⁰ 'If I wole make me iust, my mouth shall dampne me,' but even uses it of our Lord Himself, as in Mk 10³³ 'For lo! we stien to Jerusalem, and mannus sone schal be bitraied to the princis of prestis, and to scribis, and to the eldre men; and thei schulen dampne hym bi deith.'

In AV 'damned' occurs as tr. of *κατακρίνω* Mk 16¹⁶, Ro 14²³ (RV 'condemned'), of *κρίνω* 2 Th 2¹² (RV 'judged'). 'Damnable' is found only 2 P 2¹ 'damnable heresies,' Gr. *αἰρεσις ἀκαθάριας*, RV 'destructive heresies,' RVm 'sects of perdition.' 'Damnation'

is the tr. of *κατάδικη* Wis 12²⁷ (RV 'condemnation'); of *ἀπάληα* 2 P 2⁸ (RV 'destruction'); of *κρίσις* Mt 23³³, Jn 5²⁹ (RV 'judgment'), Mk 3²⁹ (RV 'sin,' reading *ἀμαρτηρία*); and of *κρίμα* Mk 12⁴⁰, Lk 20⁴⁷, Ro 3⁸, 1 Ti 5¹² (RV 'condemnation'), Ro 13², 1 Co 11²⁹ (RV 'judgment'), while Mt 23¹⁴ is omitted from RV. Thus the words are never used in AV in the sense now attaching to them, and they are completely banished from RV. See more fully Roberts in *Expos. Times*, iii. 549 ff., and the art. JUDGMENT.

J. HASTINGS.

DAMSEL, now archaic or poetical, is freely used in AV; and it is retained in RV, except where the Gr. is *παῖδιον* (Mk 5³⁹. 40 bis. 41 'child') or *παῖδισκη* (Mt 26⁶⁹, Jn 18¹⁷, Ac 12¹³ 16¹⁶ 'maid').* In Gn 34³ one word (נַעֲרָה *na'arah*) is twice tr^d in AV 'd.,' in v. 4 another (נַעֲרָה: *yaldah*); and again in Mk 5³⁹. 40 bis. 41 we have one word (*παῖδιον*), in vv. 41. 42 another (*κοράσιον*). RV preserves the distinction in St. Mark.

J. HASTINGS.

DAN (דָּן 'judge,' *Δάν*).—The elder of the two sons borne to Jacob by Bilhah, Rachel's handmaid. The origin of the name, given in Gn 30⁶ (E), is that, after her long barrenness, God had judged Rachel and had given her a son, the son of her handmaid counting as her own. No details of his history are given in the patriarchal narratives. Modern critics usually regard him as, like the other sons of Jacob, the eponymous ancestor of the tribe of Dan. These tribes are divided into two main branches, the Leah tribes and the Rachel tribes. Dan belongs to the latter; but the representation of Dan and Naphtali as sons of Bilhah implies that they were inferior members of the Rachel group. That the tribe was quite small appears from various indications. Only one son is mentioned in Gn 46²³ Hushim (in Nu 26⁴² Shuham), that is, the tribe consisted of a single clan. It is referred to as a 'family' in the important narrative of its migration to Laish, Jg 18². 11. 19. The fighting men on this expedition are only 600, and they seem to have been the majority of the tribe. It is unnecessary to attach much importance to the characteristic statement of P, which places the fighting men of Dan, during the wilderness wandering, at more than 60,000 (Nu 1³⁵ 26⁴²).

After the settlement in Canaan, the clan seems to have broken off from the main Joseph group in order to secure a district for itself. In this it was only partially successful. Its territory lay to the S.W. of Ephraim, and joined that of Benjamin and Judah. It seems to have stretched forward towards the fertile lowlands, but whether it ever occupied any portion of them or not is uncertain. The reference in the Song of Deborah (Jg 5¹⁷) is itself very obscure, and the chronology of the period so uncertain, that we learn little from it. We do not know whether it refers to the northern or the southern settlements. The most obvious sense of the words is that Dan had pushed forward to the sea. But we have no other evidence that it ever reached the coast. Nor is it certain that the words require this interpretation. Moore translates: 'Dan, why does he live neighbour to ships?' and explains—Why does he live as a dependent under the protection of Phœnician seafarers? He thinks the northern Danites are meant. G. A. Smith thinks Deborah may speak 'in scorn of futile ambitions westward, which were stirred in Dan by the sight of the sea from the Shephelah,' but admits that Dan may have reached the coast at some time (*Hist. Geog.* p. 220). RV, 'Dan, why did he remain in ships?' is not satisfactory. It is most probable that the tribe never reached the sea; but even if it did so, it

* The spelling of AV 1611 is never 'damsel'; 'damsell' occurs in Gn 24. 34, and Damsell Mt 14¹¹, while 'damsels' is found Gn 24⁶¹, Jg 19⁹. Elsewhere it is either 'damosel' or (most freq.) 'damosell,' with 'damosels' for plural and possessive. This is nearer the Lat. *dominicella*, dim. of *domina*, 'mistress,' and the Fr. *demoiselle*.

must have been soon compelled to retreat. Not only so, but we learn that it was forced back even from the lowlands by the Amorites (Jg 1³⁴⁻³⁸). Wellhausen thinks that it was really the Philistines who drove them back into the hill country. But it seems safer to accept the statement of the text, though possibly the Philistines forced back the Amorites, who, in turn, pushed Dan back. We find the tribe after this living in the vales of Aijalon and Sorek, in and about the towns of Zorah and Eshtaol (Jg 18, cf. 13). The lot of the tribe as given in Jos 19⁴¹⁻⁴⁶ includes very much more. But it cannot be taken as proving that Dan's territory ever included, even in idea, during its actual history, all the towns mentioned. It is the work of the Priestly Writer, and therefore very late. Not only so, but the general account of the territories of the tribes makes it clear that the whole land of Palestine was regarded as occupied by the Hebrews, though the actual history was very different. In this case the method of the writer has been to specify places actually occupied by Dan (Zorah, Eshtaol, Shaalabbin, Aijalon), and to add all the adjacent places which were not assigned to other tribes, though strangely Eshtaol and Zorah are assigned to Judah as border towns (15³³).

Although the tribe still retained this small district, it was so cramped in it that it became necessary to seek a new home. We have a most valuable account of this expedition in Jg 18. The narrative in this chapter and the preceding, of which it is a continuation, is probably composite. Budde prints his analysis (which has been followed in the main both by Kittel and by Moore) in his *Richter und Samuel*. It is not, however, important for our purpose to follow the analysis, as the outlines of the story are quite clear. A small party of spies was sent northward, and found in Laish (Leshem, Jos 19⁴⁷, which Wellhausen thinks was originally Lesham), a city which from the fertility of the district was very inviting, and from its isolation, and the peaceful, unsuspecting character of the inhabitants, was likely to fall an easy prey. Six hundred armed men with their families and goods set out for Laish. On their way they plundered the sanctuary of Micah, an Ephraimite, of its images, and took his priest with them. He pursued them with a few neighbours; but his remonstrance was met with a grimly humorous warning that unless he was silent he might irritate them into killing him and his family, a hint which Micah discreetly took. The Danites then moved on to Laish, which they captured and burnt, while they butchered the inhabitants. They built a new city and called it Dan. Probably only a small remnant was left behind in the south, but at least a remnant, with its home between Zorah and Eshtaol in the camp of Dan (Jg 13²⁵, in Jg 18¹² Mahaneh-dan is said to be in Kiriath-yearim, but this is less likely). That a remnant was left is made probable by the story of Samson, who belonged to this tribe. That it was small seems clear from the subsequent history. It plays no part in the later history of Israel. It is omitted from the tribes in the genealogies of Chronicles and in the list of the Apocalypse.

The character of the tribe is sketched in the blessings of Jacob and Moses. In the former we read—

* Dan shall judge his people,
As one of the tribes of Israel.
Dan shall be a serpent in the way,
An adder in the path,
That biteth the horse's heels,
So that his rider falleth backward.
I have waited for thy salvation, O Lord' (Gn 49¹⁶⁻¹⁸).

The first sentence has been variously understood, but probably the meaning is that Dan shall take

his part with the other tribes in defending Israel. The writer probably has Samson in mind. The comparison in v. 17 is to the stealthy tactics adopted by Dan in war or on marauding expeditions, by which, weak tribe though it was, it secured a victory over foes of superior strength. The attack on Laish is a good example. In the Blessing of Moses we read—

' Dan is a lion's whelp,
That leapeth forth from Bashan ' (Dt 33²²).

Here, too, the point of the metaphor is the suddenness with which the tribe would attack. The reference is not so much to war, probably, as to attacks on caravans, for which it would lie in wait. Although the second line refers to the 'lion's whelp,' yet the mention of Bashan makes it probable that the northern portion of the tribe is in the author's mind. From 2 S 20¹⁸, where we should probably read 'in Abel and in Dan,' it seems that Dan was regarded as a tribe that held fast to the good old Israelite customs.

The gentile name **Danites** (דַּנִּיטִים) occurs Jg 13² 18¹¹, 1 Ch 12³⁸. A. S. PEAKE.

DAN (דָּן, Δδν).—A city which marked the most N. point of Pal., and naturally became linked with Beersheba, the boundary town in the south. The phrase 'from Dan to Beersheba' was at once picturesque and suggestive of dimension, and in times of national crisis emphasized the fact that amid all tribal distinctions there was a common inheritance—the whole land of Israel (Jg 20¹, 1 S 3²⁰, 2 S 3¹⁰). The chief independent notice is the account of the Danite invasion given in Jg 18, where the change of name from Laish or Leshem is accounted for. In all likelihood it is the same place that is referred to in the census-journey of Joab as **Danjaan**, 2 S 24⁶. If the reading *ja'ar* instead of *ja'an* be accepted, it would indicate the first point of contact with the rocky ground and oak scrub of Lebanon, which the Arabs call *wa'ar*.

At Dan Jeroboam set up one of the calves of gold (1 K 12²⁹). Dan disappears from Scripture after the invasion of Benhadad (1 K 15²⁰, 2 Ch 16⁴). It is referred to by Josephus, Eusebius, and Jerome in terms that identify it with the present Tell el-Kadi (although G. A. Smith prefers to locate Dan at Banias). The mound rises out of a close jungle of tall bushes and rank reeds, with larger trees on the higher slopes, until an irregular oblong plateau is reached, about 40 ft. high on the N. side and 80 ft. on the S., and resting upon one of the broad fringe-like terraces with which the skirts of Hermon sweep down towards the plain of Huleh (L. Merom). On the W. side, amid the rough boulders and blocks of ancient masonry that cover the ground, there gushes out the immense fountain (Leddan) that forms by far the largest source of the Jordan current, where 5 miles down it meets the waters from the upper springs of Hasbeya and Banias.

LITERATURE.—Robinson, *BRP*; Thomson, *Land and Book*; Smith, *HGHL* 473, 480f.; Moore, *Judges*, 390; see also art. CALF (GOLDEN). G. M. MACKIE.

DANCING is, in its origin, an expression of the feelings by movements of the body more or less controlled by a sense of rhythm. It was practised, therefore, long before it was raised to the dignity of an art, being simply a natural development of the tendency to employ gesture, either as an accompaniment to, or a substitute for, speech. We may distinguish three stages in the early history of dancing, as exemplified in the practice of ancient nations: (1) Its rudest and most unstudied form, the outward expression of exuberant feeling; (2) the pantomimic dance, in which, *e.g.*, the movements of hostile armies were represented; (3) the dance pure and simple, the exhibition of

the poetry of motion, of all the grace of attitude and all the flexibility of which the body is capable. Social dancing, as we now understand it, was almost, if not altogether, unknown in ancient times.

Whatever view we may hold of the presence or position of Israel in Egypt, we have no evidence to show that the Hebrews borrowed thence their love or their methods of dancing. They never seem, in ancient times, to have reached the third of the stages which we have enumerated. We hear nothing of performances by professional artists, similar to those represented on the Egyp. monuments, and supposed by Lane to have been the direct ancestors of the modern Ghawazee. There is no mention of solo or figure dancing, of contradances (unless we attach this meaning to the *קולות* *קולות*, Ca 6¹³), or of anything approaching in elaboration the performances associated with the Feast of Eternity. Still less can we expect a reasoned appreciation of the exercise as a means of developing the mind and body, such as we have in Plato's Laws. All the allusions point to spontaneous movements; in processions these would be impromptu on the part of the leaders, and more or less closely imitated by the others. Three ideas are represented in the vocabulary: leaping, circling, and making merry. Thus *קָרַקַר* (Ec 3⁴, 1 Ch 15²⁹), to leap; *קָרַקַר*, to circle (2 S 6^{44.18}); *הוֹלִיל* (Jg 21²³, Ps 87⁷), to twist oneself; *קָסַח*, *קָסַח* (Jg 16²⁸, 1 S 18⁷, 1 Ch 15²⁹), *lit.* to laugh. It is self-evident that these words might be used in a looser and in a more technical sense. They were applied to the artless play of the children (Job 21¹⁴), as well as to the dancing of the adults.

Few as are the references in the Bible, they show that almost any occurrence might be associated with dancing: the return of the prodigal, the commemoration of an hist. event, the welcoming of a hero on his return from battle, the ingathering of the vintage,—whatever called for an expression of joy or excited the heart to gladness. Of dancing for its own sake, of its practice as an art, there is no trace. Leyrer sees a possible exception to this in Ca 6¹³, but the passage is too obscure to admit positively of such an explanation. Whether we should look on Mahanaim as the name of a place, or as descriptive of a dancing in which two rows of performers took part, or whether, with Delitzsch, we should understand an allusion to the angels, must remain a matter of doubt. The only unmistakable instance of artistic dancing is that mentioned in Mt 14⁶, the performance of Herodias' daughter 'in the midst' of the guests assembled on Herod's birthday. This was due, however, to the introduction of Greek fashions, through contact with the Romans, who had adopted them, and hardly belongs to our subject.

It is with dancing in connexion with the religious rites and ceremonies of the Hebrews that we are mainly concerned in this article. Their religion was, esp. in pre-exilic times, predominantly social and joyful. It found its proper æsthetic expression in a merry sacrificial feast, which was the public ceremony of a township or clan. Then the crowds streamed into the sanctuary from all sides, dressed in their gayest attire, marching joyfully to the sound of music. Universal hilarity prevailed; men ate and drank and made merry together, rejoicing before their god (W. R. Smith, *ES* 236 ff.). To such a religion dancing would be a natural adjunct. The cultus was not a system of rites, artificially contrived to express and maintain theological doctrines, but the free outcome of the religious feelings, which found vent in the way suggested by, and in harmony with, the disposition and genius of the people. It is not surprising,

however, that we find comparatively few references to this part of the cultus in OT, or that no provision is made for it in the regulations contained in the recognized standards of the priests. There is no trace of the existence among the Hebrews of any class of priests corresponding to the *Salii* of ancient Rome, and their vintage and other festivals are far from possessing the significance of the great carnivals of the pagan world. The fact seems to be that the priestly historians and legislators resolutely excluded, as far as possible, everything that could infer any similarity between the worship of J^h and that of heathen deities. Nevertheless, enough remains to show that dancing was practised and acknowledged as part of the Heb. ritual. The dancing of Miriam and the women of Israel (Ex 15²⁰) may have been due to an ancient ceremony connected with the Passover. In any view of it, the dance formed an essential part of an act of worship (cf. Is 30²⁹). At the annual vintage festival at Shiloh—'a feast of the Lord'—the maidens came out and joined in dances in the vineyards (Jg 21¹⁹⁻²¹). When David took part in the procession at the removal of the ark, he did so in a priestly capacity: he wore the linen ephod, the official dress of the priests (2 S 6¹⁴). These passages exhaust the list of religious dances in OT. But the allusions in the Psalms and Prophets, and the references to the rites in honour of idols, point in the same direction; e.g. the dance round the golden calf (Ex 32¹⁹), and at the altar of Baal (1 K 18²⁶).

The people retained in later times their fondness for dancing in connexion with religious rites, as is shown by the ceremonies connected with the Feast of Tabernacles and the Day of Atonement. On the latter day, and on the 15th Abib, the maidens of Jerus. are said to have gone in white garments, specially lent them for the purpose so that rich and poor might be on an equality, into the vineyards close to the city, where they danced and sang. The following fragment of one of their songs has been preserved, and is thus given by Edersheim—

'Around in circle gay, the Hebrew maidens see;
From them our happy youths their partners choose.
Remember! Beauty soon its charm must lose—
And seek to win a maid of fair degree.
When fading grace and beauty low are laid,
Then praise shall her who fears the Lord await;
God does bless her handiwork—and, in the gate,
"Her works do follow her," it shall be said.'

The other dance festival was held on the day preceding the Feast of Tabernacles, and is said to have been instituted by Judas Maccabæus. At the appointed time everyone went to the 'house of the Sho'ebah,' carrying branches with lemons attached, for the procession round the altar. In the court were large candelabra, each with four arms; four priests, or youths of priestly descent, climbed ladders, filled the vessels with oil, and lit the wicks, which were made of cast-off belts of the priests. All Jerus. was lighted from the fires. The whole multitude joined in the laudations that followed. Men famous for their piety and good works danced with lighted torches, and great scholars like Hillel were not above exhibiting their dexterity and agility to the admiring crowd. Meanwhile the Levites, standing on the steps that led from the court of the men to that of the women, accompanied the performance with psalms and canticles, and the sound of the *kinnôrs* and cymbals was heard, with trumpets and other musical instruments. The whole festival is proof of that irrepressible love of display and hilarity which revealed itself in the popular religion of Judaism.

LITERATURE.—Spencer, *De Leg. Rit.* iv. 4; Voss, *Gesch. der Tanzkunst*; Grove (etc.), *Dancing*, in 'Badminton Library'; Leyrer, *PRE* xv. pp. 206-208; Wetstein, *Zeitschr. für Eth-*

nologie, 1873, p. 285 ff.; Smith, *RS²* p. 432; Tristram, *Eastern Customs*, pp. 207-210; Delitzsch, *Iris*, pp. 189-206; Conder, *Tent Work*, pp. 306, 326, 346. J. MILLAR.

DANDLE (prob. from It. *dandola* or *dondola*, a doll), to 'toss gently,' is found Is 66¹² 'be dandled upon her knees.' Cf. Palsgrave (1530), 'I dandyll, as a mother or nourryce doth a childe upon her lappe'; and Bp. Hall (1614), 'If our Church, on whose lappe the vilest miscreants are dandled.' It is doubtful, however, if this tr. is accurate enough, though RV retains it. The Heb. (דנדל) is to stroke or caress, rather than to toss or dandle. The older versions have 'be joyful upon her knees'; except Wyc. 1380, 'daunte you,' 1388, 'speke plesauntly to you,' and Douay, 'speake you fayre.'

J. HASTINGS.

DANGER.—In Apocr. (Ad. Est 14⁴, Sir 3²⁶ 29¹⁷ 34¹² 43²⁴, 2 Mac 15¹) and in Ac 19²⁷,⁴⁰ 'danger' has its modern meaning; and so the adj. 'dangerous,' Sir 9¹⁸, Ac 27⁹. But in the other passages in which 'danger' occurs (Mt 5²¹,²² *ter*, Mk 3²⁹) it is used in the obsol. sense of 'power,' 'control'; Gr. *ἐπιτοχός*, fr. *ἐπι-εχω*, held in the power of some person or thing, hence (1) 'guilty of,' as Ja 2¹⁰, 1 Co 11²⁷; (2) 'liable to,' as here. RV retains 'in danger of,' except Mk 3²⁹ 'guilty of an eternal sin,' for AV 'in danger of eternal damnation,' reading *ἀμαρτήματος* for *κρίσεως*.

The Lat. *dominus* 'lord,' was contracted in old French in various ways, of which one was *dans*, and was thence adopted into Eng. in the form *dan*. Spenser, *F. Q.* iv. ii. 32, has—

'Dan Chaucer, well of English undefyld.'

Chaucer himself uses 'dan' freely as a title of respect=sir. From this word was formed *danger* (first in late Lat. or Fr., and then adopted into Eng.) by adding the term. *ger*, seen in passenger, messenger. This 'danger' became a great legal word in mediæval Eng., signifying a lord's rights or sway, the extent of his jurisdiction. Hence 'power,' 'control,' as Chaucer, *Prol.* 663 (Oxf. ed.)—

'In daunger hadde he at his owne gysse
The yonge gyles of the dioycse.'

Cf. More, *Utopia*, p. 116, l. 5 (Lumby), 'so disdainng to be in her daunger, that he renounceth and refuseth all her benefites'; and Shaks. *Mer. of Ven.* iv. i. 180—

'You stand within his danger, do you not?'

Thus 'to be in one's danger' passed easily into the meaning of 'be liable to' punishment or the like, and then 'be exposed to any harm, the mod. meaning. J. HASTINGS.

DANIEL, דניאל (in Ezk 14¹⁴,²⁰ 28³ דניאל, *keré* דניאל), meaning 'God is my judge,' occurs in OT as the name of three (or four) persons.

1. David's second son, 'born unto him in Hebron' 'of Abigail the Carmelitess' (1 Ch 3¹). In the parallel passage, 2 S 3³, the name is Chileab (צלהב); and since this is the evident source of the chronicler's list, the name D. probably arose from a corruption of the text. This apparently can be traced through the LXX, which in each passage has Δαλωιά (Β Δαμωνιά in 1 Ch 3¹) (דניאל, דניאל, דניאל) (Kittel on 1 Ch 3¹ in Haupt's OT).

2. A priest of the line of Ithamar who returned in the time of Artaxerxes with Ezra to Judæa (Ezr 8³), and sealed the covenant drawn up by Nehemiah (Neh 10⁶), unless two distinct persons are mentioned.

3. The hero and traditional author of the Bk. of Daniel. According to this book, D. was a youth of noble descent and high physical and intellectual endowments, carried by Nebuchadnezzar in the third year of Jehoiakim from Jerus. to Babylon, and with other Jewish youths, esp. three companions, Hananiah, Mishael, and Azariah, assigned for education at the king's court (Dn 1¹⁻⁷). D. and his companions refused to defile themselves with the royal food, and for their fidelity were rewarded by being fairer in appearance 'than all the youths which did eat of the king's meat,' and in their final examination before the king by being superior

in understanding and wisdom to all the magicians and enchanters of the realm (Dn 1⁸⁻²⁰). In the second year of Nebuchadnezzar, D. revealed and interpreted, on the failure of all the other wise men, the king's dream of the composite image, and was made ruler over the whole province of Babylon and chief ruler over all the wise men (Dn 2). He also interpreted the king's dream of the tree (Dn 4). After the death of Nebuch. he seems to have lost his high office and gone into retirement; but when the handwriting appeared on the wall of the palace during Belshazzar's feast (Dn 5¹⁻⁵), again D. was, on the failure of the other magicians, summoned at the instigation of the queen (vv. 10-12). He interpreted the writing, and was then clothed with purple, decked with a chain, and proclaimed the third ruler in the kingdom (v. 29). Under Darius the Mede, D. was appointed one of three presidents over 120 satraps, and was distinguished above all the others; 'and the king thought to set him over the whole realm' (Dn 6³). Through this favour he incurred the enmity of his fellow-officers, who, finding no occasion of accusing him, persuaded Darius to pass a decree that for 30 days no one should present a petition unto any god or man except himself on pain of being cast into a den of lions. As they expected, D. faithfully continued his custom of praying unto his God three times a day. Thus an accusation was brought against D.; and although the king tried to rescue him, yet he was cast into the den of lions (vv. 12-16), but was miraculously saved (v. 22). D.'s accusers were then cast into the den and quickly devoured, and the king decreed that all men should fear and tremble before the God of D. (vv. 24-27). 'So this D. prospered in the reign of Darius and the reign of Cyrus the Persian' (v. 28). This is the story of D. in Dn 1-6. In chs. 7-12 he appears as the recipient of a series of divine apocalyptic revelations respecting the future of Israel, for whose welfare he is extremely concerned. Two additional stories, that of Bel and the Dragon and that of Susanna, are also related concerning him in the Apocrypha.

This narrative of D. is evidently an example of Jewish *Haggadoth* (see next art.). Whether D. represents in any way a real hist. character cannot be absolutely determined. In Ezk 14¹⁴,²⁰ a D. is mentioned with Noah and Job as a pre-eminently righteous character, and in Ezk 28³ as an example of the highest wisdom. This association and allusion imply that the D. in the mind of the prophet was an ancient worthy in the traditions of Israel. (We can with difficulty conceive of Ezekiel speaking thus of a younger contemporary. See Cheyne in *Expositor*, July 1897, p. 25.) Of this D. of Jewish tradition we are entirely ignorant; yet probably he was the prototype of the D. of the Exile, and many features of this ancient character probably reappear in the later one. Ewald supposed that the D. of Ezk was a Jewish exile of the ten tribes who lived at the court of Nineveh and had acquired there a reputation for wisdom and righteousness, and whom later Jewish tradition transferred to Babylon. Or it is possible that there was such a distinguished Jew at Babylon, who enjoyed the favour first of Nebuch. and then of the Persian conquerors, who was actually named D., or owing to his wisdom and righteousness was so called by his countrymen after the ancient worthy alluded to by Ezk, and thus a real historical character may have been the basis of the hero of the Bk. of Daniel.*

The story of D. appears to have been written in imitation of that of Joseph—history, however, often repeats itself; yet, if the story is historical, it is strange that no reference is made to D. in the

* Cheyne suggests a connexion between D. and Zoroaster, the name having been coined out of the Zend *dānu*, 'wise' or 'wisdom' (*Bamp. Lect.* on Psalter, 105 ff.).

OT narrative of the restoration; that no post-exilic writer before the Maccabæan age knows anything about him; that no one else shared his expectations; and that he, with all his patriotism, did not avail himself of the opportunity of returning to Pal.; and that Ben-Sirach, writing about B.C. 170, should entirely omit him from the worthies of Israel, and also write (Sir 49¹⁵), 'Neither was there a man born like unto Joseph, a governor of his brethren, a stay of the people.' E. L. CURTIS.

DANIEL, THE BOOK OF, in the Heb. Canon, is placed among the Hagiographa, between Est and Ezr, but in the LXX, Vulg., and Eng. Bible as one of the four great prophets, immediately after Ezekiel. It falls into two divisions: chs. 1-6, the history of Daniel; chs. 7-12, visions and revelations given to Daniel. In the original, 2^{1b}-7²⁸ is written in Aramaic instead of Hebrew. In literary character the Bk. of Dn is mainly an apocalypse, representing in visions under symbolical forms various historical epochs. The beginning of this kind of writing appears in Ezk and Zec; but Dn is far more complete and elaborate, and exercised a great influence upon subsequent Jewish and Christian literature.

i. AUTHORSHIP AND DATE.—The visions (chs. 7-12) are represented as given in the words of Dn (7² 8¹ 9² 10²), hence the inference that he wrote the entire book. This was the ancient Jewish opinion,* and the prevailing Christian one, until within recent years.† Now, however, it has generally been abandoned, and in its place are quite a variety of views all agreeing in this, that the book in its present form must be assigned to the age of Antiochus Epiphanes (B.C. 175-163); and there is a growing consensus of opinion that the book as a whole belongs to that period, for the following reasons:—

1. Acquaintance with Ant. Epiphanes.—Ch. 11 shows a clear acquaintance with minor events in his reign and in those of his predecessors. In the veiled form of a revelation of the future it gives an outline of history from the time of Cyrus to near the death of Antiochus.‡ There are sketched the Persian period (v.³), the rise and conquest of Alexander the Great (v.³), the dismemberment of his empire (v.⁴), and then principally the varying relations of the Ptolemaic and Seleucid dynasties to each other and of the latter to the Jews (vv. 6-39). Attention is called in succession to Ptolemy I. and Seleucus Nikator (v.⁵), Ptolemy Philadelphus and Antiochus II. (v.⁶), Ptolemy Evergetes (vv. 7-9), Antiochus the Great (vv. 10-19), Seleucus Philopator (v.²⁰), and Antiochus Epiphanes (vv. 21-45). While, from the obscurity of the history and the difficulty of determining the meaning of the Heb. text, some references are not perfectly plain, yet it is easy to point out definitely the accessions of these sovereigns, their alliances, intrigues, campaigns, victories, defeats, bestowment of gifts, treacheries, acts of violence, and frequently untimely deaths. The older commentators regarded these details as signal examples of divine prediction; but since

* The Talm. statement (Baba bathra 15), that the men of the Great Synagogue 'wrote' Dn, does not necessarily imply the contrary or express the idea of a later editing: it may simply mean a 'recording' of the book.

† Porphyry, the Neo-Platonist († 303), wrote a treatise denying the genuineness of Daniel's prophecy. His views are known from the Commentary of Jerome, who refuted them. Porphyry had no followers in the Christian Church. The first systematic modern rejection of Daniel's authorship was by Corrodi in 1783 and 1792. He was followed by Bertholdt, Eichhorn, Gesenius, Bleek, De Wette, Ewald, et al.; while the genuineness was stoutly defended by Hengstenberg, Hävernick, Auberlen, Keil, Pusey, et al. Cf. for history of the criticism, Bleek's *Einleitung*; Zöckler's *Comm.* in the Lange Series, and Hengstenberg on *Genuineness of Daniel*.

‡ Vv. 40-45 are perhaps an ideal description of events which the writer expected.

such a revelation of the future is without analogy elsewhere in Scripture, and without any apparent moral or spiritual import, this chapter or insertions in it are now allowed, even by those who regard Daniel as the author of his visions or the rest of the book, to belong to the period of Antiochus Epiphanes.* Similar references elsewhere, however, seem to require these to be taken with their natural force, indicating the true date of the entire book, and not as later additions. In ch. 8 is a clear description of the conquests of Alexander (vv. 5-8, 21) and the division of his empire (vv. 8, 22), and of Antiochus Epiphanes (vv. 9-12, 23-25). These appear again, acc. to the most probable interpretation (see below), in ch. 7, the fourth beast representing Alexander's kingdom and its succession in the Seleucid dynasty (with which alone the writer here is concerned), culminating in Antiochus Epiphanes (vv. 8, 20-25). The descriptions are very exact. While the numbers of the kings, ten and three (v.²⁴), might be taken relatively or symbolically, yet the correspondence to the Seleucidæ is so precise that these kings seem evidently meant.† The eleventh corresponds exactly to Antiochus Epiphanes. Another clear reference to this sovereign seems also to appear in 9²⁶.‡ Thus throughout all these

* Zöckler in Lange's *Bibelwerk*, 1869; C. H. H. Wright, *Introd. to OT*, 1890; Köhler, *Lehrbuch der Biblischen Gesch.* vol. ii. p. 545, 1893.

† We do not know, of course, just how the author reckoned these kings. Two main schemes have been suggested: (a) (Hitzig, Kuenen, Cornill, Bevan, et al.), (1) Alexander, (2) Seleucus I. Nikator, (3) Antiochus I. Soter, (4) Antiochus II. Theos, (5) Seleucus II. Callinicus, (6) Seleucus III. Ceraunus, (7) Antiochus the Great, (8) Seleucus IV. Philopator, (9) Heliodorus, (10) Demetrius I. Soter, or an unknown elder brother; (b) (Bertholdt Von Lengerke, Delitzsch, Meinhold, et al.), (1) Seleucus I. Nikator, (2)-(9)=(3)-(10) of (a) (10) Ptolemaus VI. Philometor. (8) (9) (10) of either (a) or (b) fulfil the conditions of the three kings put down (v.²⁴). Seleucus IV. Philopator was assassinated (the Jews may have thought by the connivance of Ant. Epiphanes). Heliodorus, who seized the government, was overthrown by Antiochus; Demetrius, the rightful heir, was thrust aside, and Ptolemy, who laid claim to it, was bitterly humbled. For Demetrius, who never became king, Kuenen, after Von Gutschmidt (*Kleine Schriften*, vol. ii. pp. 175-179), was inclined to place an elder brother who acc. to a fragment of John of Antioch was put to death by Antiochus.

‡ Antiochus Epiphanes, to the Jewish mind, was the incarnation of wickedness, arrogance, and blasphemy (cf. 1 Mac 110. 21 262, 2 Mac 97-10. 225), and every term mentioned in the above references in Dn is most appropriate to describe him and his career. The eyes (78. 20) and 'understanding dark sentences' (828) indicate his vigilance and cunning; 'the look more stout than his fellows' and 'the fierce countenance' (720 823), the terror he inspired, and his cruelty; 'the mouth speaking great things' (78. 20 135), his boastful arrogance, seen in the assumption of the title Epiphanes, 'the illustrious'—changed to Epiphanes 'the mad' by his subjects,—and the title Theos, 'the god,' on some of his coins. His fearful persecution of the Jews and his suppression of their laws and sacred days are clearly indicated in 728 824. The following outline (abridged from *LOT* p. 461 f.) gives the leading events of his reign and the references to them in Dn:—

176. Accession (1 Mac 110), Dn 78. 11. 20 89. 23 1121.
175. Jason intriguing against Onias III. procures from Antiochus the high priesthood. Rise of Hellenizing party in Jerus. (1 Mac 111-15, 2 Mac 47-22).
172 [171]. Onias III. murdered (2 Mac 432-35), Dn 926a 1122b.
171. 1st expedition of Antiochus against Egypt (1 Mac 116-19), Dn 1122-24.
170. 2nd expedition against Egypt (1 Mac 120), Dn 1125-27. Antiochus on his return plunders the temple and massacres many Jews (1 Mac 121-23, 2 Mac 511-21, Dn 59b-10, 1123).
169. 3rd expedition against Egypt. Rom. legate Popilius Lenas obliges Antiochus to retire, Polyb. xxix. 1; Livy, xlv. 19, xlv. 12; Dn 1128-30a.
169-8. Fresh measures against Jerusalem. City surprised on Sabbath day. Many inhabitants slain or captured and sold as slaves. Syrian garrison placed in citadel. God-fearing Jews flee. All practices of Jewish religion prohibited. Temple worship suspended, and, on 15 Chislew, a.c. 168, 'the abomination of desolation' (a small heathen altar erected on the altar of burnt-offering). Books of the law burnt, and women who had their children circumcised put to death (1 Mac 129-64, 2 Mac 6-7, Dn 721. 24b. 25 811f. 13b. 24. 25 926b. 27a 1130b-32a (renegade Jews) 82b-35 (the faithful) 36-39 121. 7 11).
167. Revolt of the Maccabees (1 Mac 2), Dn 1134 (the little help).
165. After victories by the Maccabees (1 Mac 423-35), temple puri-

chapters there are indications of the same kind of knowledge of Antiochus and of previous history as in ch. 11. Antiochus and his persecution of the Jews and defilement of their sanctuary seem ever present before the writer (cf. 1 Mac 1). When, however, he touches upon a subsequent period he gives nothing which need be interpreted as referring to specific historical events, but only symbolizes the general Messianic hope of Israel (2^{44f.}, 7²⁷, 12^{12f.}). Hence the conclusion that chs. 7-12 belong to the age of Antiochus Epiphanes appears warranted, and then also chs. 1-6 if by the same author.

Unity of Authorship has been the prevailing view among scholars of all schools.* That chs. 1-6 belong to one author is evident. Ch. 1 is a necessary introduction to the others. Without it 2^{14f.} and 2⁴⁹ would be unintelligible, and 3²⁴ requires 2⁴⁹; and 5^{10f.} require chs. 2 and 4. Ch. 6 is closely connected with the preceding ones. The visions (chs. 7-12) require an account of D.'s personality and life, and the unity of the two sections is seen from the fact that the substance of the dream of the composite image (ch. 2) is repeated in the vision of the four beasts (ch. 7), and that 'they shall mingle themselves with the seed of men' (2⁴⁵) is evidently a reference to the unhappy marriages of the Ptolemies and Seleucidae (11⁶, 17). The homiletical or didactic purpose of each section is also the same.†

2. *Historical Statements.* Daniel, according to 1¹, began his career as a youthful student at the Bab. court in the 3rd year of Jehoiakim, and lived at least until the 3rd year of Cyrus, i.e. from 606 or 605 to 536 or 535 B.C. Within this period are mentioned as kings of Babylon, Nebuchadnezzar (2¹), Belshazzar (5¹, 30), Darius the Mede (5³¹ 6²⁵, 28), and Cyrus (6²⁹). Events are dated by the years of these kings (2¹ 7¹ 8¹ 9¹ 10¹), showing that the writer must have regarded all of them as reigning sovereigns, and not in any way as subordinate rulers. Belshazzar is further described as the son of Nebuchadnezzar (5¹¹, 19) and king of Babylon at its capture by the Medes and Persians, when (acc. to 5^{30f.}) he was slain and Darius received the kingdom. But history knows nothing of a Babylonian king Darius the Mede preceding Cyrus. The reigning monarchs within this period were Nebuchadnezzar, Evil-Merodach, Neriglissar, Nabunahid, and Cyrus. No Darius reigned in Babylon until a score of years later. The person whom Belshazzar represents was undoubtedly Bil-sar-usur, son of Nabunahid and commander of the Babylonian army during the last years of his father's reign (COT ii. p. 130f.). Being more active and energetic

than his father, he seems to have supplanted him in tradition as sovereign. In reality, however, he was never king. This is proved by the long series of contract tablets, 'which, dated month by month and almost day by day from the reign of Nebuchadnezzar to that of Xerxes,' make no mention of an intermediate ruler between Nabunahid and Cyrus (Sayce, *HCM* p. 528). Belshazzar also was not a son of Nebuchadnezzar even by descent, for his father, Nabunahid, belonged to a different family.* In introducing Darius the Mede the writer shows the same confused idea of the order of events as the Greek writers.† Cyrus, we now know from the cuneiform inscriptions, obtained possession of Babylon peaceably. During the reign of Darius (B.C. 521-486) Babylon rebelled, and Darius was obliged to besiege the city, and took it by stratagem. In the tradition followed by Herodotus this siege is transferred to Cyrus (Her. i. 191). In Dn both the king and the siege seem to have been transferred to the earlier period.‡

A further confusion about Darius appears in 9¹, where he is called the son of Ahasuerus or Xerxes. Darius I. was the father of Xerxes.

Another apparently inaccurate statement is that of Nebuchadnezzar's siege and capture of Jerus. in the 3rd year of Jehoiakim, B.C. 605 (Dn 1¹). The historical books relate no such event, and that it did not happen seems implied in Jer 25¹⁻⁹, and necessary from the movements of Nebuchadnezzar. Shortly after the battle of Carchemish (605) he returned to Babylon to secure his accession to the throne. The conquest of the West occupied four years more, since not until 601 or 600 did Jehoiakim begin to pay tribute (Tiele, *Bab. und Assy. Gesch.* p. 425 f.).§

A class of wise men or magicians are called Chaldaeans (2², 4¹⁰ 4⁷ 5⁷, 11). 'This signification is foreign to Assyrian and Babylonian usage, and did not arise till after the fall of the Babylonian empire' (COT ii. p. 125). These Chaldaeans are also represented as addressing Nebuchadnezzar in Aramaic (2⁴), which probably was not spoken then at the Bab. court, and, in no case, in the western Aramaic dialect which the writer gives.||

In 9² D. is said to have 'understood by the books the number of the years whereof the word of the Lord came to Jeremiah the prophet.' This expression

* The remote possibility that B. was a grandson of N. on his mother's side has been urged as an explanation of the author's statements. This, however, is highly improbable, and an unnatural interpretation (cf. Bar 11¹⁵).

† They have given four different accounts of the origin of Cyrus and his relation to the last king of Media, no one of which is entirely correct (art. 'Cyrus,' *Ency. Brit.* 9th ed.).

‡ Ch. 5 implies no peaceable surrender of Babylon, but its capture by assault or stratagem. That Darius should be called a Mede may have arisen from Is 13⁷, Jer 51¹¹, 28, where it is predicted that the Medes will conquer Babylon. The Medes also were allies of Cyrus, and Gobryas, to whom the city surrendered, and whom Cyrus placed in command, was governor of 'Gutium,' a Median province (*Beträge z. Assyriologie*, Delitzsch and Haupt, vol. ii. p. 223). The older commentators generally saw in Darius, Cyaxares II. of Xenophon's *Cyropædia*. This probably was the view of Jos. (*Ant.* x. xi. 4). But the *Cyropædia* is a romance, and modern hist. investigation has failed to find a place for this king. The story of festivities at the time of the fall of Babylon is given in Herodotus, i. 193. The cuneiform tablets mention a religious festival in connexion with the account of the capture of Babylon, but earlier than the entrance of Cyrus or Gobryas into the city.

§ The writer perhaps drew his statement from a combination of 2 K 24¹⁵ and 2 Ch 36, misunderstanding the three years in Kings and reckoning them from the beginning of Jehoiakim's reign. Or by reckoning backward he may have regarded the 3rd year of Jehoiakim as the beginning of the 70 years of captivity. That the author of Dn, both here and elsewhere, does not seem to have rightly apprehended or presented recorded facts of OT history, is no more surprising than the similar variations between the statements of Kings and Ch, and esp. the departures in NT from the Heb. text. Cf. Gn 11³¹ 12¹, 4 (Haran) with Ac 7² (Ur), Dt 10²² (70 souls) with Ac 7¹⁴ (75), Gn 23 (Ephron in Hebron) with Ac 7¹⁶ (Hamor in Shechem), Ex 12⁴⁰ (430 years in Egypt) with Gal 3¹⁹ (430 years in Canaan and Egypt).

|| The word מֵדִיָּה = 'in Aramaic' (v. 4 RvM), may be a gloss. So Lenormant, Bevan, Kautzsch-Marti, P. Haupt (*Bk. of Dn.*, Crit. Heb. Text, p. 16), et al.

fied and public worship re-established just three years after its desecration (1 Mac 4³⁶⁻⁶¹), Dn 8^{14b}.

164 [163]. Antiochus dies somewhat suddenly in Persia (1 Mac 6¹⁻¹⁶, but see also Polyb. xxxi. 11), Dn 7¹¹, 26 8^{14b}, 25 and 9^{26b}, 27b 11^{45b}.

(The explanation of 11²²⁻²⁴ is uncertain, for we do not know whether they refer to an Egyp. campaign or to conduct in Assyria. On Antiochus the student should consult J. F. Hoffmann, *Ant. Epiph.*, Leipzig, 1873.)

* That of Gesenius, De Wette, Bleek, Cornill, Kuenen, Driver, König, et al., as well as Hävernick, Hengstenberg, Keil, Pusey, Fuller, et al. Diversity of authorship has, however, been held, both by those holding the late authorship and by those regarding chs. 7-12 as genuine. Of the former, Bertholdt thought the book to have been written by nine authors. Strack and Meinhold regard 2^{4b-6} as by an earlier writer, about B.C. 300. Of the latter, Sir Isaac Newton thought Daniel wrote only chs. 6-12. Köhler (*Lehrbuch der biblischen Geschichte*, ii. p. 537, 1893) holds that chs. 1-6 were written some time after the reign of Cyrus by the editor of chs. 7-12.

† No reason is clearly perceptible why the book is partly written in Heb. and partly in Aramaic. The following have been suggested: (1) Diversity of origin (Strack, Meinhold, see fn. above); (2) portion of the original Heb. lost and replaced by the Aram. translation (Lenormant, Bevan, Haupt); (3) the Aram. language a secret sign that the Chaldaeans represented the Syrians, i.e. Antiochus and his followers (mentioned by König, *Einleit.* p. 382); (4) author preferred to give the speeches of the heathen in Aram. rather than in the sacred Heb., and being more at home in that language continued to use it (Behrman).

implies that the prophecies of Jer. belonged to a well-known collection of sacred books, and suggests (this is the prevailing interpretation) the second division of the Heb. Canon, which was formed a century or more after the Exile. See art. CANON.

Thus the Bk. of Dn contains a series of historical statements which imply a misconception of the exilic period, and that their author lived considerably later, and may well have written during the reign of Antiochus Epiphanes.

3. *The Language* of Dn points likewise in the same direction.* The Heb. is distinguished from that of the exilic Ezk and the immediately following Hag and Zec, and resembles more nearly that of 1 and 2 Ch written about B.C. 300, and certainly does not belong to an earlier period. The Aram. also, as far as can be determined, is of the same late date. Persian words appear in both sections, some in connexion with the description of Bab. institutions before the conquest of Cyrus (see list, *LOT* p. 469). This indicates a period long enough after that conquest for Persian words to have become a part of the Jewish language. Three Gr. words, the names of musical instruments (ᾠδὴ, κίθαρ, flute; ψαλτήριον, psaltery; and σὺμφωνία, dulcimer or bagpipe, 3⁵. 7¹⁰. 15), also occur. One of these, *συμφωνία*, as the name of a musical instrument, is peculiar to late Gr., and according to Polybius was a favourite instrument with Antiochus Epiphanes (Bevan, p. 41). This evidence brings the composition of Dn to a date at least later than the conquest of Alexander, unless the supposition be made that the Gr. musical instruments had at an earlier period through channels of trade found their way into the East, and their names become domesticated in the Aram. language. This, however, is unlikely.†

4. *The Doctrines* of Dn with respect to angels and the resurrection are the most developed in the OT. Angels have special personal names (8¹⁶ 9²¹ 10¹³. 21 12¹), special ranks (10¹³. 20 12¹), and the guardianship of different countries (10¹³. 20. 21). These representations go far beyond those of Ezk and Zec, and are relatively identical with those of Tobit and other Jewish writings of the 1st cent. B.C. Dn plainly teaches a personal resurrection both of the righteous and the wicked (12²). This also is a decided advance upon the doctrine elsewhere in OT, and is mentioned by later Jewish tradition in connexion with the Maccabees (cf. 2 Mac 12^{46ff.}). Thus, while the determination of the date of an OT writing from its religious doctrines is always a delicate procedure, yet, as far as a doctrinal development can be found in OT, the Bk. of Dn comes after all the other OT writings, and approximates most closely to the Jewish literature of the 1st cent. B.C.

5. *The Homiletical Purpose* of the Bk. of Dn is most agreeable to the Antiochian period. The narratives in chs. 1. 3. 6 are exhortations to keep the Jewish law and to remain faithful to the worship of J^h. While such teaching might be appropriate at all times, it was esp. so then in its peculiar form. The question of eating meat was at that time a test of faith. Then pious Jews 'chose to die that they might not be defiled with food, and that they might not profane the covenant' (1 Mac 16²⁴). The lessons of the 'fiery furnace' and the 'lions' den,' chs. 3 and 6, never could have been more fitly presented than when 'came there forth out

of Isr. transgressors of the law, and persuaded many, saying, Let us go and make a covenant with the nations that are round about us' (1 Mac 1¹¹), and when Antiochus commanded the worship of foreign deities on pain of death (1 Mac 1⁴¹⁻⁵⁰). The stories of the humbling of Nebuch. (ch. 4) and the fall of Belshazzar (ch. 5) would also be fraught with particular consolation when Israel was oppressed by the heathen. The visions (chs. 7-12), whatever view is taken of their date, are universally acknowledged to have been primarily designed for consolation during the reign of Antiochus Epiphanes.

6. *The External History* of the Bk. of Dn likewise favours its composition at the time of Antiochus. There is no evidence in any OT or Apoc. writing of its earlier existence. The testimony of Josephus, written near the close of the 1st cent. A.D., that the book was shown to Alexander the Great (*Ant.* XI. viii. 5), prob. represents only a Jewish legend, and historically is of no decisive value. The earliest possible reference is in the Sibylline Verses, iii. 388 ff. (about B.C. 140), where there may be an allusion to Antiochus Epiphanes and the ten horns (Dn 7⁷. 20. 24; Schürer, *HJP* div. ii. vol. iii. p. 280). The next reference is 1 Mac 2⁵⁹, where Matthias is reported in his dying exhortation to have said 'that Hananiah, Azariah, and Mishael believed and were saved out of the flame. Daniel for his innocency was delivered from the mouth of lions.' While this might simply indicate a knowledge of these stories, it is probable that the author of 1 Mac (about B.C. 100), who evidently composed the speech of Matthias, was acquainted with our book. From this period on there are abundant evidences of its being well known. Its influence is very appreciable in NT, esp. in Rev, but it is only once directly mentioned (Mt 24¹⁵).*

The place of the Bk. of Dn among the Hagiographa favours also its late composition. If it had been written during the Exile, notwithstanding its apocalyptic character, it naturally would have been placed among the Prophets.

The Conclusion, then, in favour of the Maccabæan date, in view of this accumulation of concurrent facts, seems abundantly warranted. The exact date of composition is usually placed within the year B.C. 165. The 'abomination of desolation,' 163, is clearly before the writer, and also the Maccabæan uprising in 167, but not the re-dedication of the temple in Dec. 165, and the death of Antiochus in 163.

The great difficulty, of course, in assigning the Bk. of Dn to the late date is the fact that chs. 7-12 are represented as revelations of the future given to Daniel during the Exile. But this difficulty vanishes the moment one considers how prevailing in OT and among Jewish writers was the custom of representing present messages as given in the past through ancient worthies. Thus the law of Deut. is given as though spoken by Moses in the land of Moab, and the legislation of P as though revealed to Moses in the wilderness. The Bk. of Eccles. is written as the experience of Solomon. While in 2 Es, Bar, the Bk. of Enoch, and the Jewish Apocalypses generally, this method of composition is abundantly illustrated, and was evidently a favourite one with the devout and pious of the centuries immediately preceding and following Christ.

Assigning the entire book to the Maccabæan period, destroys, it is true, the hist. reliability of chs. 1-6. These chapters must be regarded as a species

* Delitzsch, art. 'Daniel,' *PRE* (1878), Driver, *LOT* pp. 469-476 (1891); König, *Eintleit.* § 80 (1893); Bevan, *Com.* pp. 26-42 (1892); Behrman, *Komm.* pp. 1-x (1894).

† Additional evidence in language appears also in the proper names Nebuchadnezzar II, Belshazzar II, and Abed-Nego II, since their spelling and formation show a lack of acquaintance with the language and gods of Babylon during the Exile (*COT* ii. 124ff.; Sayce, *HCM* p. 532).

* This passage, like other similar NT ones, reflects the Jewish opinion of the 1st cent. A.D., but has no further weight in deciding the question of authorship. Christ or the writer of the Gospel naturally expressed himself according to this opinion, for we have no reason to believe that the Divine Spirit ever led either of them to instruct or correct their contemporaries on questions of literary and historical criticism.

of the later Jewish Haggada, or method of inculcating moral and spiritual lessons by tales of the imagination. Here, again, we meet with striking parallels in the OT Bk. of Jonah and in the Apocr. stories of Tobit and Judith. A quasi defence of chs. 1-6 is frequently made on the ground that the writer used authentic written material of the Exile which he revised. This, of course, is possible, but it is a mere hypothesis, and it is more probable that his material was only traditions or tales.*

The view which has been presented of the Bk. of Dn doubtless will appear to some to destroy its religious value and render it unworthy of a place within the sacred Canon. No one, however, under the modern view can read the book without being taught lessons of sublime faith, and having a firmer assurance of the ultimate triumph of the kingdom of God. The book has in the past been blessed as an instrument of the Holy Spirit for the strengthening of the Church, and, interpreted in the light of its real origin, this will continue and be enhanced. Great difficulties in receiving its lessons will be removed, and the Church will be spared endless profitless discussion and exegesis necessitated by the old view.†

ii. THE INTERPRETATION.—The Bk. of Dn contains three representations of the world's history more or less closely related to each other, which, with their interpretations, may be outlined as follows:—

Ch. 2	Ch. 7	Ch. 8	
A. Golden = The lion head			= Babylonian Empire.
Silver = The bear breast	= The ram	= Medo-Persian	„
Brazen = The leopard belly and thighs	= The he-goat	= Grecian	„
Iron legs = The fourth and iron beast and clay feet		= Roman	„

* An argument often repeated rests on the assertion that the whole colouring and character of the book are Oriental and esp. Babylonian, impossible to an age so unfamiliar with them as the Maccabæan, and reference is made to the colossal image, the fiery furnace, the martyr-like boldness of the three confessors, the decree of Darius, the lions' den, the dreams of Nebuch., and his demands of the Chaldeans, etc. (Fuller, art. 'Daniel,' Smith, *DE*²). Such a view had the countenance and authority of Lenormant (*La Divination*, pp. 169-267). The truth is, however, that the Bk. of Dn contains no allusions to Bab. customs which might not have been known to a Jewish writer of the 2nd cent. B.C. (who even might have visited Babylon), or have been preserved in the tales from which he drew his material; while, on the other hand, there are the statements already given which seem to prove the author's real lack of acquaintance with Babylon during the Exile. In addition to these may be mentioned the statement of Daniel's appointment as 'chief governor over all the wise men of Babylon' (2⁴⁸). This, owing to the exclusiveness of Bab. sacred caste, even Lenormant regarded as impossible, and hence held the words 'all the wise men' to be an interpolation. Indeed, Lenormant's or any similar theory of the composition of the book (*i.e.* an early work thoroughly revised in the Greek period) is worthless for a defence either of the truth of its narrative or of its genuineness, because the line of separation between the early and late contents cannot be determined. The account of Nebuchadnezzar's insanity (ch. 4) has been thought to receive confirmation by a story given in a fragment of the historian Abydenus (preserved in Eusebius, *Præp. Evang.* ix. 41). The story relates that Nebuch. on the roof of his palace was inspired by some god or other, and announced the future calamities of Babylon and then suddenly vanished. In this announcement there is a wish that the author of these calamities might be driven into the desert where the wild beasts seek their food, and wander among the mountains and rocks alone. The similarity between this and the biblical narrative is not very great, and yet enough perhaps to show that the same story originally was the basis of each (Bevan, p. 87 ff.; Schrader, *JPT*, 1881, pp. 618-629).

† The following from Farrar is worthy of quotation in this connexion: 'Though I am compelled to regard the Bk. of Dn as a work which in its present form first saw the light in the days of Antiochus Epiphanes, and though I believe that its six magnificent opening chapters were never meant to be regarded in any other light than that of moral and religious *Haggadot*, yet no words of mine can exaggerate the value which I attach to this part of our Canonical Scriptures. The book, as we shall see, has exercised a powerful influence over Christian conduct and Christian thought. Its right to a place in the Canon is

Ch. 2	Ch. 7	Ch. 8	
B. Golden = The lion head			= Babylonian Empire
Silver = The bear breast	= The ram	= Medo-Persian	„
Brazen = The leopard belly and thighs	= The he-goat	= Macedonian	„
Iron legs = The fourth and iron beast and clay feet		= Syrian	„
C. Golden = The lion head			= Babylonian Empire.
Silver = The bear breast	= The ram	= Median	„
Brazen = The leopard belly and thighs	= The he-goat	= Persian	„
Iron legs = The fourth and iron beast and clay feet	= The he-goat	= Grecian	„

The parallelism between the composite image (ch. 2) and the four beasts (ch. 7) shows that they were designed to represent the same world-powers. In this interpreters are generally agreed. The historic fact that after the fall of the Bab. kingdom there was no distinct Median kingdom, but Media was united to Persia, naturally gave the interpretation of Medo-Persian to the silver breast and the bear, and such a united kingdom appeared in the two-horned ram of ch. 8. The brazen belly and thighs and the leopard then well symbolized the Grecian kingdom of Alexander and his successors, who acc. to ch. 8 were represented by the he-goat. While the legs of iron and feet of iron and clay and the fourth beast with the ten horns, in connexion with which appeared the final everlasting kingdom (2⁴⁴ 7²⁷), would represent the Roman Empire in whose days the Christ appeared. Elsewhere, both in OT and NT, there were indications of great wars and distress, and even an Antichrist to precede the final consummation of the kingdom of J^u. Hence the interpretation A was most plausible, and became almost universal in the early Jewish and the Christian Church.*

The prevailing modern interpretation is C (B has had few advocates). The reasons for the adoption of C are as follows: Whatever may have been the facts of history, the author does distinguish between the Median and Persian kingdoms. After the Babylonian he places the Median represented in the reign of Darius (5³⁰² 6¹ 9¹), who has the position of an independent and absolute sovereign, and then follows the reign of Cyrus the Persian (6²⁸ 10¹). A Medo-Persian kingdom could scarcely have been designated by the writer as *inferior* to Nebuchadnezzar or the Babylonian (2³⁶), while this would aptly describe the short-lived Median of his scheme. This kingdom seems also well represented in the bear (7⁵). The kingdom of brass which shall rule over all the earth (2³⁸), or the leopard to which dominion was given (7⁶), with its four wings

undisputed and indisputable, and there is scarcely a single book of the OT which can be more richly profitable for teaching, for reproof, for correction, for instruction in righteousness, that the man of God may be complete, completely furnished to every good work. Such religious lessons . . . are not in the slightest degree impaired by those results of archaeological discovery and criticism which are almost universally accepted by the scholars of the Continent and many of our chief English critics. Finally unfavourable to authenticity, they are yet in no way derogatory to the preciousness of this OT Apocalypse' (*Bk. of Dan.* p. 31).

* Indeed it is difficult to see how a different interpretation could have been given according to the prevailing exegesis which ignored the original historical situation and meaning of OT prophecies, and sought some fulfilment agreeable to the actual history or expected future of the Church. Christ had applied to His second coming the words of Dn 7¹³ (Mk 13²⁶ 14²⁵), hence His parousia was regarded as preceded by the little horn of v. 8, which thus became the Antichrist. Many commentators sought hist. kingdoms to represent the 10 horns, and since the Reformation the papal power has very often been regarded as the Antichrist. The numbers three, four, and ten have also been freq. interpreted symbolically (so Briggs, *Mess. Propht.* § 105).

representing rapid and successive conquests, and with its four heads (corresponding to the four kings of 11²), symbolizes particularly well the Persian kingdom which advanced so widely and rapidly under Cyrus and Cambyses, and whose dominion was so great under Darius I. and his successors. It must also be noted that the two horns of 8³, one of which comes up last, which are interpreted as the kings of Media and Persia (8²⁰), can as well represent two successive kingdoms, the power of one of which entered into the other, as one consolidated empire. The fourth kingdom of the image, which shall be strong as iron and break in pieces and crush (2⁴⁰), and the beast terrible and powerful with great iron teeth, that devoured and brake in pieces and stamped the residue with his feet (7⁷), seem identical with the he-goat of furious power (8⁵⁻⁷) interpreted as Alexander (8²¹). The feet, part of clay and part of iron (2³²), represent well the successors of Alexander, often 'externally allied but inwardly disunited'; and the ten toes (2⁴²) seem to be reproduced in the ten horns, which fitly represent the Seleucidæ (see footnote, p. 552). The mingling of the seed seems to refer to the futile endeavours of the Ptolemies and Seleucidæ to form stable alliances by marriages (cf. 11^{6, 17}). *But the clear description of Antiochus Epiphanes in the little horn (7^{8, 20, 24}) is decisive for the modern interpretation.* The introduction of the Messianic kingdom immediately in connexion with or following events of the author's own time, is fully in accord with other OT representations. Isaiah places the advent of the Messianic king in immediate connexion with a deliverance from Assyr. oppression (Is 8¹⁶⁻⁹ 10³³⁻¹¹), likewise Micah (5⁴⁻⁶); and Deutero-Isaiah blends in one picture the release and restoration from Bab. captivity, and the final consummation of the divine purposes for Israel. The same principle is illustrated in Christ's eschatological discourse in Mt 24.

Corresponding with the interpretations of the four beasts are those of 'one like unto a son of man' (7¹³). The prevailing Christian and Jewish interpretation has referred these words to the Messiah. In favour of this view is their application by Christ to Himself (Mt 26⁶⁴, Mk 14⁶², Lk 22⁶⁹, cf. Mk 13²⁶, Lk 21²⁷, Mt 16²⁸, Lk 12⁴⁰ 13⁸, Rev 14¹⁴ *et al.*), and the repeated designation of Christ in NT by the term 'the Son of Man.' The Bk. of Enoch applies the same expression to the Messiah (46¹⁻⁶ 48¹⁻³ 62⁵⁻⁹ 69²⁶⁻²⁸), * and this is the general exposition of our passage by the Jewish Rabbins, also in the Talm. (*Sanh.* p. 98, col. 1). A growing modern view, however, finds in 7¹³ a symbolization of the kingdom of Israel, and this probably was the intention of the writer. The expression 'son of man' (Aram. ܫܢܝܢܐ = Heb. בן אדם) acc. to a common Heb. idiom is synonymous for man or one of mankind (cf. Ps 8⁴, Ezk 2¹ 3^{1, 4, 10, 17} *et al.*), and stands here evidently for one in human form representing Israel, in contrast with the beasts symbolizing the heathen powers. A striking parallel occurs in Ps 80, where in v. 17 'son of man' symbolizes Israel, and 'the boar' v. 13 the heathen. The interpretation in v. 27 seems also decisive for this view. The kingdom is given to 'the people of the saints of the Most High; his (the people's) kingdom is an everlasting kingdom, and all dominions shall serve and obey him (the people).' Again, no other possible similar Messianic allusion appears elsewhere in Daniel. The 'coming with the clouds of the heaven' is in evident contrast to the heathen kingdoms 'rising out of the sea' (7³). The latter appearance is fig., indicating earthly origin; the former indicates then, by parallelism, a source in the special power of

* The references given from the Bk. of Enoch are by some regarded as belonging to a Christian addition to the original Jewish work (see art. ENOCH, BOOK OF).

God, just as the stone cut out of the mountain without hands (2^{34, 45}) stands in contrast to the image, an evidently human or earthly product. That later writers, esp. those of the NT, should find in this passage a direct allusion to the Messiah, is in exact accord with their interpretation of other OT figures which primarily denote mankind or Israel (cf. Ps 8⁴, and He 2⁶⁻⁹, Hos 11¹ and Mt 2¹⁵, Gn 12⁷ and Gal 3¹⁶ *et al.*).

iii. THE 'TIMES' OF DANIEL (7²⁵ 8¹⁴ 9²⁴⁻²⁷ 12^{11, 12}) are difficult of interpretation. They are mainly an endeavour under the Antiochian persecution to answer the anxious thought and piercing cry, 'Lord, how long? When wilt Thou restore the kingdom to Israel? When will the Messianic hope be realized?' They express the thought that the time of the fulfilment of the divine promise is very near at hand. The glorious assurances of Is 40-66 had never been realized. The Jews, in their pitiful poverty and national smallness, and above all in this hour of persecution, seemed still in their captivity, still within the period of the seventy years mentioned by Jeremiah (Jer 29¹⁰), and an explanation of their duration and the announcement of their end is the evident endeavour of our author in 9²⁴⁻²⁷.

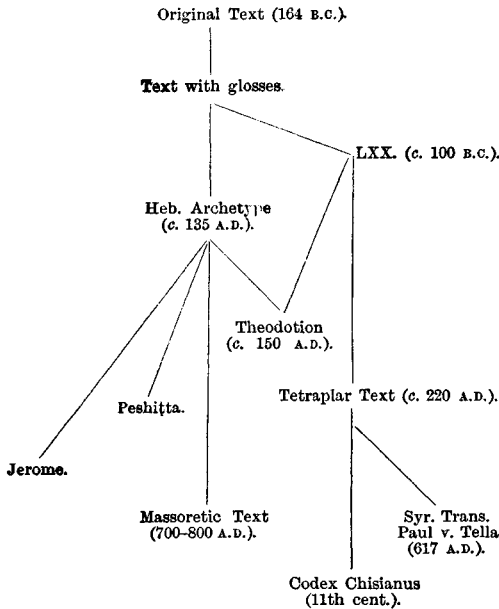

Of the weeks subdivided into 7 + 62 + 1 (9²⁵⁻²⁷), as in the case of the image (ch. 2), and the four beasts (ch. 7), there are two main interpretations differing generally according to the view taken of the Bk. of Dn as a whole, or esp. according to the historical and prophetic references in (a) 'the anointed one, the prince' (2⁶), (b) 'the anointed one cut off' (2^{6a}), (c) the destruction (2^{6b}), (d) the maker of the covenant (2^{7a}), (e) the desolation (2^{7b}). The prevailing view in the past in the Christian Church has seen in (a) (b) and (d) the Messiah, and in (c) and (e) the destruction of Jerus. by Titus, 70 A.D. The view received at present, agreeably to the Maccabæan date of Dn, refers (a) to Cyrus (cf. Is 45¹), (b) to Onias III. (2 Mac 4³⁴), (d) to Antiochus Epiphanes, (c) and (e) to the havoc and desolation wrought by Antiochus at Jerusalem. In the case of both interpretations a week has usually been held to represent seven years, but a difficulty has always been experienced in fixing the termini, and the various solutions proposed for adjusting the 49 + 434 + 7 years have been almost endless. The more prevailing one, in the old view, places the advent of Christ at the end of 69 weeks (v. 25 AV and RVm), and refers the commandment to the decree of the 7th year of Artaxerxes, B.C. 457 or 458 (cf. Ezr 7⁶⁻²⁶), and then 483 yrs. later is A.D. 25 or 26, the date usually assigned for Christ's baptism, which, from His anointing with the Holy Spirit, might represent His proper Messianic advent (Pusey, *Lect. IV.*). This view and all other similar ones presented by those holding the genuineness of the Bk. of Dn contain their own refutation, for the *termini a quo* must be later than the period of the prophet, who would have died many years at the latest before the commencement of the 490 years or the 70 weeks B.C., and such a date could not have been taken as the basis of his reckoning, unless the history of Israel after his death had been revealed to him in detail.

Under the other view the natural interpretation would be as follows: To the decree of Cyrus seven weeks (v. 25), *i.e.* 586 - 49 = 537. From this decree the city stands rebuilt during 62 weeks of 434 years, but after this period (v. 26) the anointed priest Onias III. shall be cut off in B.C. 171 (*i.e.* 537 - 434 = 103. This should be 171; see below). During the next seven years, the last week (v. 26^b), occur the havoc and ruin wrought by Antiochus. The sacrifice ceased, and the heathen altar was set up in the sanctuary. The latter event was in Dec. 168 (1 Mac 1⁵⁴); but the former, with the terrible

ruin and slaughter (1 Mac 1²⁹⁻⁴⁰), occurred probably some months earlier. The temple was re-dedicated in Dec. 165 (1 Mac 4⁵²). These three years and some months represent the half week of the ceasing of the oblation, mentioned in the time, times, and half a time (7²⁵), in the 2300 evenings and mornings (8¹⁴), i.e. 1150 days, and in the 1290 days (12¹¹) and the 1335 days (12¹²). The representations, of course, are not exact, i.e. the number of days exceed in each instance 3½ years, or half a week. Did we know all the circumstances of the times, we might see a clear solution, or possibly the author designed an enigmatic surplus or remainder to be interpreted only through the future course of events, even as he had endeavoured to interpret the 70 weeks.

In the above interpretation the actual period between the decree of Cyrus and the death of Onias is shorter than the 62 weeks, i.e. 366 years instead of 434. This probably has arisen from the defective chronology of the writer. He placed the reign of Cyrus too early* (Bevan, Cornill, Schürer). Owing to the great difficulty of finding any consistent explanation of the 'times' of Dn, many writers have regarded the numbers as entirely symbolical.

iv. VERSIONS.—The LXX text of Dn has been preserved only in one MS, Codex Chisianus, which cannot be older than the 9th cent., and is perhaps much later (Bevan). In place of the LXX the Greek VS of Theodotion was used (even by Irenæus, † 202). There is no Targ. on Daniel. The following diagram (from Behrmann, p. xxx) shows tentatively the relation of the VSS to the original text and to each other:—

v. ADDITIONS.—There are three Apocr. additions to Dn: (1) The Song of the Three Children, preceded by the Prayer of Azarias, in LXX and Vulg. at 3²⁴⁻³⁰; (2) The Story of Susanna, in Vulg. ch. 13, in LXX a separate book (?); (3) The Story of Bel and the Dragon, in Vulg. ch. 14, in LXX a separate book (?). (See sep. artt.)

LITERATURE.—The literature on Daniel is exceedingly voluminous. 'On no other book' (says C. H. H. Wright) 'has so much worthless matter been written in the shape of exegesis.' The most important Commentaries are those of Berthold, 1806-8; Von Lengerke, 1835; Hävernick, 1832; Hitzig (Kgf.

* Josephus fell into a similar error, also the Jewish Hellenist, Demetrius (Schürer, HJP II. vol. iii. p. 53 f.).

Hndb.), 1850; Stuart, 1850; Ewald (Proph. d. AB), 1867, Eng. tr., 1881; Keil, 1869, Eng. tr., 1872; Zöckler (Lange's Bibelwerk), 1870, Eng. tr. and add. by Strong, 1875; Fuller (Speaker's Com.), 1876; Meinhold (Kgf. Kom.), 1889; Bevan, 1892; Behrmann (Hand-Kom.), 1894; Farrar (Expositor's Bible), 1895.

Special Treatises and Articles.—Hengstenberg, Beiträge, 1831, Eng. tr., 1843; Tregelles, Defence of Authenticity, 1852; Auberlen, Der Prophet Daniel und Offenbarung Johannes, 1854-57, Eng. tr., 1857; Pusey, Dan. the Prophet, 1864, 3rd ed. 1869; Fuller, Essay on the Authenticity of Daniel, 1864; Lenormant, La Divination chez les Chald. (pp. 169-236), 1875; Cornill, Die Siebzig Jahrwochen Daniels, in Theol. Stud. u. Skizzen, 1889; Schrader, Die Sage vom Wahnsinn Nebuch. JPT, 1881; Kamphausen, Das Buch Daniel, in Neu. Geschichtsforschung, 1893; Margolouth in Expos. Apr. 1890; Fuller in Expos. 3rd series, vols. I. and II.; Sayce, ECM (pp. 495-537), 1892; Terry, Proph. of Dan. Expounded, 1893; C. Bruston, Études sur Dan. et l'Apoc. 1896.

In add. to these works, the student will find valuable material on Dn in Kamphausen's Daniel in Haupt's OT, in the OT Introductions of Cornill, Driver, König, Strack, et al., and the OT Theologies of Dillmann, Schultz, Smend, et al., and the Messianic or OT Prophecies of Briggs, Delitzsch, Hofmann (Weissagung u. Erfüllung), Orrell, Riehm, et al., and in the Histories of Israel or the Jews of Ewald, Grätz, Köhler, Kittel, Stade, Schürer, et al. See also art. AROCYNNA. E. L. CURTIS.

DAN-JAAN.—Joab and his officers in taking the census came 'to Dan-jaan and round about to Zidon' (דָּן וְקָרְיָן וְעַן וְקָרְיָן אֶל-צִיּוֹן), 2 S 24⁶. No such place is mentioned anywhere else in OT, and it is generally assumed that the text is corrupt. It has indeed been proposed to locate Dan-jaan at a ruin N. of Achzib which is said to bear the name Khan Dāniān; but this identification, although accepted by Conder, has not made headway. The reference is more probably to the city of Dan which appears so frequently as the northern limit of the kingdom. Three leading emendations of the text have been proposed. (1) Wellhausen (Sam. ad loc.) instead of the MT דָּן וְקָרְיָן would read וְעַן וְקָרְיָן ('They came to Dan) and from Dan they went about.' This is accepted by Driver (Sam. ad loc., cf. Deut. p. 421), Budde (in Haupt's OT), Kittel (in Kautzsch's AT). (2) Klostermann would read וְעַן וְקָרְיָן . . . 'and to Ijon and they went about.' Ijon and Dan are associated in 1 K 15²⁰ (cf. 2 K 15²⁹). (3) Gesenius would change דָּן into יַעַן . . . 'to Dan in the wood' (cf. Vulg. silvestria). After eis Adv LXX reads, B Εἰδὼν καὶ Οὐδῶν, A Ἰαπὰν καὶ Ἰουδῶν. This does not help us much, but Wellh. points out that it indicates at least that the translators found דָּן twice in their text and had a verb in place of קָרְיָן. J. A. SELBIE.

DANNAH (דָּנָה), Jos 15⁴⁹.—A town of Judah mentioned next to Debir and Socoh. It was clearly in the mountains S.W. of Hebron, probably the present Idhnah. This place is noticed in the 4th cent. A.D. (Onomasticon, s.v. Jedna) as six Roman miles from Eleutheropolis (Beit Jibrin). It is now a small village on the W. slopes. See SWP, vol. iii. sheet xxi. LXX has Pevrá. C. R. CONDER.

DAPHNE (Δάφνη).—A place mentioned in 2 Mac 4³⁸ to which Onias withdrew for refuge, but from which he was decoyed by Andronicus and treacherously slain. Its site, which has been identified with the mod. Beit el-Má, or House of Waters, is placed by Strabo and the Jerus. Itinerary at a distance of 40 stadia, or about 5 miles, from Antioch. This grove, which owed its establishment to Seleucus Nikator, was famous for its fountains, its temple in honour of Apollo and Diana, its oracle, and its right of asylum. (See Gibbon, Decline and Fall, c. xxiii.) R. M. BOYD.

DARA, דָּרָא 1 Ch 2⁶, Δάρα AB; but codd. Heb., Luc. Δαραδέ, Pesh., Targ. presuppose דָּרְדָּא DARDA (which see).

DARDA (דָּרְדָּא, Δαραδά B, Δαραά A, Δαραδέ Luc.)—Mentioned with Ethan the Ezrahite, Heman, and Calcol as a son of Mahol, and a proverbial type of

wisdom, but yet surpassed by Solomon (1 K 4³¹). In 1 Ch 2⁶ apparently the same four (Dara is probably an error for Darda. See DARA) are mentioned with Zimri as sons of Zerah, the son of Judah by Tamar (Gn 38³⁰). So Targ. in 1 K 4³¹ interprets 'the Ezrahite' as כִּי זֶרַח 'the son of Zerah.' This statement of Ch need not conflict with that of K, 'sons of Mahol,' since Zerah, as is suggested by the title 'the Ezrahite,' may have been the remoter ancestor, Mahol the immediate father. See MAHOL. C. F. BURNEY.

DARIC.—See MONEY.

DARIUS (דָּרְיָוֶש, Δαρείος).—1. Darius, the son of Hystaspes (Vistāshpa), written Dārayavaush in Old Persian, was the true founder of the Persian empire. The usurpation of the crown by the Magian Gaumāta, who pretended to be Smerdis the brother of Cambyses, had thoroughly shaken the empire of Cyrus, and the murder of the usurper by Darius and six others (B.C. 521) caused it to break up. The nations of which it was composed revolted under different pretenders, and had to be reconquered and reorganized by Darius. The history of all this is given in the trilingual inscription he caused to be engraved on the rock of Behistun (Bagistana). First Susiana rebelled under Atrina, then Babylon under Nidinta-Bel, who pretended to be Nebuchadrezzar, son of Nabonidus. Contract-tablets show that the latter pretender reigned from October B.C. 521 to August B.C. 520, when Babylon was taken and Nidinta-Bel himself put to death. Next came the revolts of Martiya in Susiana; of Phraortes in Media, who called himself Khshathrita, descendant of Uvakhshatara; of the Armenians; of Chitrantakhma in Sagartia, who said he was a descendant of Uvakhshatara; of Phraortes in Parthia and Hyrcania, where Hystaspes was satrap; of Frāda in Margiana; of a second false Smerdis in Persia itself; and of the Armenian Arakha, son of Khaldita, in Babylon, who professed to be Nebuchadrezzar, the son of Nabonidus. But the revolts were all suppressed and the leaders impaled, though many months of hard fighting were needed for the work. D. ascribes all his successes to the help of Ahuramazda (Ormazd), the supreme god of the Zoroastrian faith.

He now set about the organization of the empire, which he placed under a bureaucracy centralized in himself. The provinces were governed by satraps appointed by the king, and each province was required to furnish the royal treasury with a fixed amount of annual tribute. Justice was administered by royal judges who went on circuit.

The second revolt of Babylon probably took place in B.C. 514, as no Bab. contract-tablets have been found dated in the seventh year of Darius, and after its suppression a part of the walls of the city were pulled down. Soon afterwards Darius overcame Iskunka the Sakian or Scyth, and henceforward the Saksians formed part of the Persian army. The expedition against the Scyths of Europe was still later. Darius crossed the Danube near Ismail by a bridge constructed by the Ionians, who had already performed the same service in the case of the Bosphorus, and, leaving it in charge of the Ionian 'tyrants,' he marched eastward to the Don. Eight fortresses were built on the banks of the Oarus (probably the Volga), and Darius then returned through a desert country to the Danube, harassed by the Scyths. Histiaeus of Miletus saved his army by dissuading the Greeks from destroying the bridge. Histiaeus was afterwards the indirect cause of the Ionian revolt, which led to the burning of Sardis by the Athenians, and the determination of Darius to punish Athens and annex Greece. Thrace and Macedonia had already submitted.

Mardonius, the son of Gobryas, was sent against Attica; but his ships were wrecked off Mount Athos, and he was compelled to return. Another army was despatched accordingly the following year. Eretria was pillaged; but the Persian host was utterly defeated by the Athenians at Marathon (B.C. 491), and compelled to retreat. Darius now fitted out another expedition on a larger scale, but just as it was ready to start Egypt revolted.

D. had already explored the Indian Ocean. Skylax of Karyandria sailed down the Indus, and, after a voyage of thirty months, reached Suez. One of the results of the expedition was the subjugation of the Indians.

The Egyptian revolt was followed by the death of the king, B.C. 486. He had married the daughter of Gobryas in early life, and Artobarzanes, his eldest son by her, was not allowed to succeed him, as he had been born while Darius was still a private citizen. After his accession he married Atossa, the daughter of Cyrus and wife of Cambyses and of the pseudo-Smerdis, as well as Parnys the daughter of Smerdis, and Phaedyma the daughter of Otanes. Xerxes, his son by Atossa, was his successor to the crown.

It was in the reign of Darius that the second temple of Jerusalem was finished. The work had languished till the second year of his reign, when Haggai and Zechariah excited Zerubbabel, 'the governor of Judah,' and the high priest Joshua to undertake it afresh (Ezr 5¹⁴). This made Tattenai, the Persian governor of Syria, inquire by what authority they acted (v. 3¹²). On being told that it was a decree of Cyrus, he wrote to Darius, who had search made for the decree, which was found in the palace of Ecbatana. Darius caused it to be published, and added that money for the building should be given out of the revenue of the province, as well as cattle and other things for the temple services, 'that they may offer sacrifice . . . and pray for the life of the king and of his sons.' Accordingly, the temple was completed on the 3rd of Adar, in the sixth year of Darius (6¹⁻¹⁵).

According to Josephus (*Ant.* XI. i. 3), whose narrative rests on chs. 2 and 3 of 1 Es, the goodwill of Darius towards the Jews went back to the time when he was a private individual, and had vowed that if he became king he would restore the sacred vessels to the temple of Jerusalem. He and Zerubbabel were old friends, and, after the return of the Jewish prince from Jerusalem, Darius made him one of his bodyguard. In this capacity Zerubbabel was called on to amuse the king one night when he was sleepless, in the first year of his reign, by determining the relative strength of 'wine, kings, women, and truth.' His explanation that truth was the strongest pleased Darius, who promised to grant whatever he asked. He therefore reminded the king of his promise to build Jerusalem and its temple, and Darius thereupon did all he could to further the work, giving fifty talents towards it, and relieving the Jews of all taxation.

2. **DARIUS the Persian** (Neh 12²²). Which king of Persia is meant is uncertain. Some commentators have supposed it to be Darius II. (Nothus) B.C. 423-404, but it was more probably Darius III. (Codomannus), the last king of Persia, and the contemporary of the high priest Jaddua, who is mentioned in the same verse. Darius III. reigned from B.C. 336 to 330, when he was overthrown by Alexander of Macedon in the decisive battle of Arbela, and the Persian empire destroyed.

3. **DARIUS** in 1 Mac 12⁷ AV is a false reading for the Lacedæmonian Areus. See ARIUS.

4. **DARIUS the Mede.**—See next article.

LITERATURE.—Spiegel, *Die altpersischen Keilinschriften* (1881). A. H. SAYCE.

DARIUS THE MEDE (דָּרְיוֹשׁ הַמֶּדֶי Dn 11¹, Aram. אֲרִיָּאָה (Kethibh), אֲרִיָּאָה (Kere) 6¹ [Eng. 5³¹]), the son of Ahasuerus (=Xerxes), 'of the seed of the Medes' (9¹), is said (5³¹) to have succeeded to the Bab. kingdom after Belshazzar's violent death, and to have been 62 years old when he 'received the kingdom.' His first year only is mentioned (5³¹ 9¹ 11¹).

Who this D. was, is difficult to ascertain with certainty. Besides other proposals, D. the Mede has been identified with (1) Cyaxares II., the son and successor of Astyages (Jos. *Ant.* X. xi. 4), but no proof is given to support this theory; (2) Darius Hystaspis; (3) Astyages himself; but all these identifications seem quite untenable. It is true that D. Hystaspis conquered Babylon, but that was some thirty years later. Besides this, he was a Persian, not a Mede; and he was about thirty-six years old, not sixty-two, when he began to reign.

The passage in Dn 5³¹ where he is described as having received the kingdom (RV) leads one to ask whether, in spite of the title of king which is given to him (6⁷ etc.), he may not have been really governor only. In the Gr. historians and in the *Bab. Chronicle* the name of D. the Mede does not occur, he who preceded Cyrus to Babylon, on the occasion of the siege and capture of that city, being Gobryas, who may thus be regarded as having 'received the kingdom for him.'* Gobryas, like Darius the Mede (6¹), appointed governors in Babylon, and seems also to have been in the attack which resulted in Belshazzar's death (*Bab. Chronicle*, Rev. col. i. l. 22). It will thus be seen that Cyrus gave great power to Gobryas, who was, in fact, his viceroy.† Apparently, therefore, the later Jewish writers looked upon Gobryas as having as much authority as Belshazzar, whom they regarded likewise as king, though he does not appear ever to have reigned. The confusion of the names of D. the Mede and Gobryas of Gutium (he being governor of that place, which is regarded as having included a part of Media), may have been due to the scribes, who, being more familiar with the Gr. form of the name of D. (the end of which, when carelessly pronounced, bears a certain resemblance to that of Gobryas in that language) than with the Heb. form *Daryavesh*, wrote one name for the other; and there is also the possibility that one of Gobryas' names was Darius,‡ which would account for the mistake. Under these circumstances we must accept, until further proof, the explanation, that D. the Mede was no other than Gobryas of Gutium, who, being practically viceroy, may have been regarded as king during the absence of Cyrus from Babylon, and who, under the name of D. the Mede, by which he was known to the Hebrews later on, conquered and entered Babylon on the 16th Tammuz, called Daniel to the very high dignity of 'one of the three presidents who were placed over the hundred and twenty satraps,' and issued a decree, after Daniel's miraculous deliverance, enjoining 'reverence for the God of Daniel' throughout his dominions. Josephus gets rid of all difficulties projected by the title of 'king' which is given to D. the Mede in Daniel, by explaining that he took Daniel the prophet with him into Media, and that it was there that he appointed him one of the three presidents whom he set over his 'three hundred and sixty' provinces. According to this

authority, therefore, D. the Mede was in fact never ruler of Babylonia.* I. A. PINCHES.

DARKNESS (Heb. חֹשֶׁךְ and לֵבָא [and their cognates], חֹשֶׁךְ, לֵבָא, Gr. σκότος, σκοτία, ὄψος). Besides its literal meaning, darkness is frequently used in Serip. metaphorically. Since God is light, because the perfect embodiment of rational and moral truth, and since the knowledge of Him is man's light, darkness is the natural antithesis of these ideas. Hence in OT it is emblematic of nothingness (Job 34^{5, 6}); more freq. it is equivalent to death (Job 10^{21, 22} 15²³ 17^{12, 13}, 1 S 2⁹, Ec 11⁸ etc.), and to the unknown or undiscovered (Dn 12²² 28², Is 45³ etc.). So, too, it is the emblem of mysterious affliction, and of the ignorance and frailty of human life (2 S 22²⁸, Job 19⁸ 23¹⁷, Ps 18²⁸ 107^{10, 14}, Is 9² 29¹⁸ 42^{7, 16} etc.); of moral depravity (Is 5²⁰ 60², Pr 2¹³), and of confusion and destruction visited on the wicked (Job 5¹⁴ 15³⁰ 20²⁶, Ps 82², Pr 4¹⁹ 20²⁰, Is 8²² 59⁹, Ec 2¹⁴, Jer 2³¹ etc.). It is also the symbol of that which causes terror and distress (Gn 15¹², Is 5³⁰ 47⁵, La 3², Ezk 32⁸ etc.). Since, moreover, God is incomprehensible, His ways mysterious, and His judgments severe, darkness is sometimes associated with His operations in providence (Ps 13^{9, 11}), in punishing (Am 5¹⁸, Zeph 1¹⁵), and in His self-manifestations generally (Ps 97², 1 K 8¹², 2 Ch 6¹), even as the guiding 'pillar' was light to Israel but darkness to the Egyptians (Ex 14²⁰), and Sinai was covered with dark clouds when J^h descended on it (Ex 20²¹, Dt 4¹¹ 5²³, Heb 12¹⁸). In NT darkness is prevalently the emblem of sin as a state of spiritual ignorance and moral depravity (Mt 4¹⁶ 6²³, Lk 17⁹ 11³⁵ 22⁵³, Jn 1⁵ 3¹⁹ 8¹² 12^{35, 46}, Ac 26¹⁸, Ro 2¹⁹ 13¹², 1 Co 4⁵, 2 Co 6¹⁴, Eph 5^{8, 11} 6¹², Col 1¹³, 1 Th 5^{4, 5}, 1 P 2⁹, 1 Jn 1^{5, 6} 2^{8, 9, 11}), but also of the desolation of divine punishment (Mt 8¹² 22¹³ 25³⁰, 2 P 2^{14, 17}, Jude 6, 13).

Two instances of special darkness, recorded in the Bible, call for notice. (1) The ninth of the plagues sent by God upon the Egyptians was a plague of darkness (Ex 10^{21, 23}). Many commentators explain this as due to a storm of fine dust and sand driven from the desert by the S. wind, the *Hamsin*, noted for such effects in the spring. The LXX seems to have taken such a view, describing it as 'darkness, thick cloud (γρόφος), storm (θύελλα).' Some have regarded it as wholly miraculous; but the other plagues seem due to God's use of natural agencies. (2) The darkness at the crucifixion from the sixth to the ninth hour (Mt 27⁴⁵, Mk 15³³, Lk 23^{44, 45}). This the evangelists seem plainly to represent as supernatural. The true text of Lk 23⁴⁵ (τοῦ ἡλίου ἐκλείποντος or ἐκλιπόντος, 'the sun failing' or 'having failed'; RV 'the sun's light failing') has indeed been thought to describe it as an eclipse. This reading and interpretation were noted by Origen, from whose remarks it appears that objectors to Christianity had so explained it. Origen rejected the reading, attributing it either to a scribe's wish to provide an explanation or to an enemy's wish to pervert the evangelical account (see WH, Notes on selected readings). Origen also rejected the view itself that an eclipse, natural or miraculous (for so some explained it), was intended by Luke, though his language elsewhere seems to imply the true text. The charge that it was a natural eclipse is put into the mouth of the Jews in the *Acts of Pilate*, contained in the pseudo-

* Driver, who in *LOT* pp. 469, 479 n. maintained a cautious reserve, admitting the possibility that D. the Mede might prove to be a historical character, agrees in his later editions with Sayce, that the existence of such a ruler is completely excluded by the monuments (cf. Sayce, *HCM* 523 ff.). The latter, as well as P. Haupt (note on Dn 6¹ in Haupt's *OT*), and a host of modern scholars, argue that 'D. the Mede' is due to confusion with D. Hystaspis, who conquered Babylon (B.C. 520). On the theory of the Maccabean date of Daniel, such a confusion is held to be quite explicable.

* He brought the army of Cyrus to Babylon on the 16th Tammuz, Cyrus arriving nearly four months later, on the 3rd Marcheshvan.

† It is noteworthy that Xenophon (*Cyrop.* N. 6) says that Gobryas was 'a man in years.'

‡ Jos. (*Ant.* x. xi. 4, says that Darius (the Mede), whom he represents as the kinsman of Cyrus, 'had another name among the Greeks.' Apparently, the name of Gobryas was present to his mind when he wrote this.

Gospel of Nicodemus. Eusebius (*Chronicon*) and later Fathers appealed also to the statement of Phlegon of Tralles (of the 2nd cent.) that in the 202nd Olympiad (July A.D. 29 to 33) there was the greatest eclipse of the sun ever known, that it became night at the sixth hour of the day, so that stars appeared, and that there was a great earthquake in Bithynia. These writers differ as to the year of the Olympiad, but Wurm and Ideler place it on Nov. 24, A.D. 29 (Wieseler, *Synopsis of Four Gospels*, p. 354; see, on the other hand, Whiston, *Testimony of Phlegon Vindicated*, Lond. 1732). The insuperable objections to its identification with the darkness at the crucifixion are, even apart from the above date, that at passover the moon was full, and the darkness lasted three hours. Seyffarth's view (*Chron. Sacr.* pp. 58, 59), that the Jewish calendar was so deflected that the passover actually fell at a new moon, has found no advocates, and is wholly improbable, since the Jewish calendar depended on observations of the moon. There is, however, no need to interpret Luke of an eclipse in the astronomical sense (WH, Notes on selected readings). It is simply a statement that the sun's light failed. See also LIGHT, PLAGUES.

G. T. PURVES.

DARKON (דַּרְקוֹן).—'Children of D.' were among those who returned with Zerubbabel (Ezr 2³⁶, Neh 7²⁸). D. is called in 1 Es 5³⁸ **Lozon**. See GENEALOGY.

DARK SAYING.—This is the tr^a of Heb. דַּרְקוֹן *hādāh*, in Ps 49⁷ 78², Pr 1⁶. Elsewhere *hādāh* is tr^a 'dark speech' Nu 12⁸; 'dark sentence' Dn 8²⁸; 'hard question' 1 K 10¹, 2 Ch 9¹; 'riddle' Jg 14¹², 13, 14, 15, 16, 17, 18, 19, Ezk 17²; and 'proverb' Hab 2⁹. See RIDDLE. In Wis 8⁹ we find 'dark sayings,' and in first Prologue to Sir 'd. sentences' (*αἰνίγματα*). This Gr. word is the LXX tr. of *hādāh* in Nu 12⁸, 1 K 10¹, 2 Ch 9¹, Pr 1⁶; it is found in NT only 1 Co 13¹² *ἐν αἰνίγματι*, 'darkly,' marg. 'in a riddle'. In Jn 16^{25, 29} Amer. RV has 'dark saying;' for AV and RV 'proverb' (*παροιμία*). Cf. Coverdale, *Letter to Cromwell* of Dec. 13, 1538, 'Pitie it were that the darck places of the text (upon the which I have alwaye set a hande) shulde so passe undeclared.'

J. HASTINGS.

DARLING.—This is the tr^a of Heb. דַּרְקוֹן *yāhīdh*, in Ps 22²⁰ 'Deliver . . . my d. from the power of the dog,' and 35¹⁷ 'rescue . . . my d. from the lions' (marg. 'my only one'). 'My darlings' is also found in Bar 4²⁶ AVm (AV and RV 'my delicate ones,' Gr. *οἱ τρυφεροὶ μου*). Cf. Ro 1⁷ Wyclif, 'to alle that ben at rome, derlyngis of god and clepid holy'; and Latimer (*Works*, ii. 438), 'Christ Jesus, the dear darling and only begotten and beloved son of God.' The word, now too familiar for such usage, is formed from *dear* with suffix *-ing*, which became *-ling* through its freq. addition to words ending in *l*; so nestling, seedling, etc. The Heb. *yāhīdh* is used for an only son, but in Ps 22²⁰ 35¹⁷ it is poetically transferred to the psalmist's own life 'as the one unique and priceless possession which can never be replaced'—*Oxf. Heb. Lex.* For the Eng. use compare Shaks. *Othello*, III. iv. 70—

'Make it a darling like your precious eye.'

J. HASTINGS.

DART.—Joab is said to have thrust three 'darts' (דַּרְקוֹן *shēbhātīm*, LXX βέλη) into the heart of Absalom (2 S 18¹⁴). *Shēbhet* is, however, rather a shepherd's rod, which might be used as a club if one end were heavy and studded with nails (cf. Cheyne on Ps 23⁴), or as a rough spear if one end were pointed. Hezekiah (2 Ch 32²) made darts, דַּרְקוֹן *sheluh*, in abundance for the defence of Jerusalem.

In Job 41²⁶ AV and RV give 'dart' for דַּרְקוֹן *maṣṣa*, a ἄπαξ λεγόμενον of uncertain meaning.

In 1 Mac 6²¹ two kinds of darts are referred to as employed at a siege, and cast by engines—(a) ordinary bolts or large arrows; (b) darts wrapped in some burning material. Ancient defences, being built largely of wood, were easily set on fire.

In Eph 6¹⁶ the suggestions of the evil one are called βέλη πεπυρωμένα, with an obvious allusion to the practice mentioned above. St. Paul opposes Faith to the suggestions, as the soldier would oppose the great shield (*θυρεός*) to the darts.

W. E. BARNES.

DATHAN.—See KORAH.

DATHEMĀ (δάθημα), 1 Mac 5⁹.—A fortress in Bashan. It may perhaps be the modern *Dāmeḥ* on the S. border of the Lejjah district, N. of Ashereth-karnaim. The Peshitta reads *Rametha* (Ramoth-gilead?). See G. A. Smith, *Hist. Geog.* 588 f. C. R. CONDER.

DAUB.—To daub, from Lat. *dealbare* (*de* down, *albus* white), is properly to rub down a wall with whitewash. But in English the word has always been used for washing or plastering with any available substance. It is now used, even in its literal sense, contemptuously. It has always been used to describe bad writing, as *Marprel. Ep.* (1589), 'When men have a gift in writing, howe easie it is for them to daube paper'; or painting, as Foote (1752), *Works*, i. 9, 'How high did your genius soar? To the daubing diabolical angels for ale-houses'; or besmearing of any kind, but esp. with flattery, as South (1716), 'Let every one therefore attend the sentence of his conscience; for, he may be sure, it will not daub, nor flatter'; or to hide deformity. In AV daub occurs once literally, Ex 2³ 'she took for him an ark of bulrushes, and daubed it with slime and with pitch' (דַּבְּבָהּ, from דָּבַח, mortar, clay). Elsewhere only in Ezk (13^{10, 12, 14, 15 bis, 22²⁸}) fig. of whitewashing Jerus. to hide its corruption, Heb. [דָּבַח], which is also found in Lv 14^{42, 43, 48} (EV 'plaster'), 1 Ch 29⁴ (EV 'overlay'), Is 44¹⁸ (EV 'shut,' margins 'daubed'). The subst. daubing occurs only Ezk 13¹² 'where is the d. wherewith ye have daubed it?' (דָּבַח) for the plaster itself, a tr^a which has come from Wyclif.

J. HASTINGS.

DAUGHTER.—See FAMILY.

DAVID (דָּוִד, but דָּוִד 1 K 3¹⁴ 11^{4, 38}, Ezk 34²³, Hos, Am, Zec, Ca, Ezr, Neh, Ch [except 1 Ch 13⁸]; LXX, NT, Δαβίδ, but TR Δαβιδ).—The name, which in the Bible is given to no one except the great king of Israel, is perhaps a shortened form of Dodavahu (דודָּהוּ 2 Ch 20²⁷), 'beloved of J', or Dodo (דודו 2 S 23²⁴, דודו 2 S 23⁹, *Kethibh*), 'beloved of him'; but, according to Sayce, was originally Dodo, a title of the sun-god (cf. ירהו on Moabite Stone, l. 12). In the Tel el-Amarna tablets of the 15th cent. B.C. the form Dūdu is found. Our authorities for the life of David are derived entirely from the OT. The extra-biblical narratives, of which the earliest are the fragments of Eupolemus in Eusebius, *Præp. Evang.* ix. 30, and of Nicolas of Damascus in Josephus, *Ant.* VII. v. 2, are either dependent upon the OT, or are entirely legendary (cf. Stanley, art. 'David' in Smith's *DB*). The reign of D., according to the traditional chronology, is dated B.C. 1055-1015; but from Assyr. inscriptions it appears that Jehu is placed about 40 years too early in Ussher's chronology, and we must accordingly bring down the reign of D. by a period of from 30 to 50 years.

The biblical account of D. is to be found (i.) in the narrative of 1 S 16-1 K 2; (ii.) in 1 Ch 2. 3.

10-29; see also Ru 4¹⁸⁻²²; and (iii.) in the titles of many psalms. Of these three sources the first is alike the oldest and the primary authority; information derived from the other two can be used only sparingly.

A considerable portion of the history in 1 Ch is derived directly or ultimately from the Books of Samuel, and cannot be cited as an independent narrative, though it is often valuable for the restoration of the text. The fresh information given by the Chronicler consists mainly of lists of names and statistical details. In many cases the numbers given condemn themselves; where we have to deal with series of names, there is no absolute criterion to guide us; but it is to be noticed that the new narratives are nearly always marked by their late Heb. style, and by the characteristic language of the Chronicler, while the statements made are often more or less at variance with the older account in Samuel. It is rarely clear that the author had access to ancient documents other than the Books of Samuel, and his unverified statements must therefore be received with caution. The picture of D. presented by him differs in important respects from the earlier portrait; it is indeed the picture of an idealized David, such as was present to the minds of devout Jews of the 3rd cent. B.C., when the true founder of the Isr. monarchy was regarded as a model of piety; and the recognition of the full Priestly Code in the time of D. was a fact never questioned (see CHRONICLES).

Seventy-three psalms bear the title 'to David,' and in many cases, especially in Book II., there is a fuller inscription connecting the psalm with some particular event in D.'s life. Many of these titles recall the language of the Books of Sam., from which indeed they may be derived. The picture of D. which they suggest is not unlike that of Chronicles. On closer examination, however, it is seen that the contents of the psalm are often not suitable to the alleged occasion; and so frequently is this the case, that it becomes unsafe to accept the superscriptions, or even the Davidic authorship of 'Davidic' psalms, unless the titles are directly supported by internal evidence. But, without entering upon the wide question of the date and authorship of the Psalter (see PSALMS), it may be said that in a large number of cases the thoughts and language even of 'Davidic' psalms remind us of the teaching of the great prophets, and seem to be largely dependent on it; the circumstances of the psalmists are often those of the post-exilic Jews; and the religious ideas and spiritual tone of the Psalter as a whole differ widely from those which the most trustworthy authorities ascribe to D. himself, or to the period of the early monarchy. The tendency among the best scholars of the present day is to reduce the directly Davidic element in the Psalter to the narrowest limits. Hence it does not seem advisable to illustrate the history or character of D. by quotations from the Psalms.

For the history of D. we are thus practically reduced to the Books of Samuel (with 1 K 1. 2); but even this work contains elements of unequal historical value, and it is necessary to consider briefly the structure of the book, and to form a critical estimate of its contents.

One noticeable feature of the D. narratives contained in 1 S 16-31 is the existence of a number of 'doublets,' i.e. accounts of very similar events, or divergent accounts of the same event. These may be here enumerated. (1) The introduction of D. to Saul, 1 S 16¹⁴⁻²³ and 17¹⁻¹⁸; (2) the slaying of Goliath of Gath, 1 S 17¹⁻¹⁸ and 2 S 21¹⁹; (3) Saul casts his spear at D., 1 S 18^{10, 11} and 19¹⁰; (4) Jonathan's intercession for D., 19⁷ and 20; (5) the covenant between D. and Jonathan, 20^{12-23, 42} and 23¹⁶⁻¹⁸; (6) the origin of the proverb, 'Is Saul also among the prophets?' 19²⁶ and 10¹⁰⁻¹³; (7) D. at the court of Achish, 21¹⁰⁻¹⁵ and 27-28² 29; (8) D. spares Saul's life, 24 and 26; (9)

the death of Saul, 1 S 31 and 2 S 1¹⁻¹⁶. These parallels are not all equally convincing; in certain cases the divergent narratives may be harmonized more or less satisfactorily; in others it is possible that an event occurred more than once in D.'s life, though it would be strange that with reference, e.g., to D.'s flight to Gath, or his sparing Saul's life, no allusion should be made in the narrative to a previous similar occurrence. We cannot, however, separate these peculiarities in the history of D. from similar phenomena in the history of Saul, where we find two accounts of his appointment as king, and of his rejection. We are therefore obliged to recognize the existence of two parallel narratives in the present 1 S, and these must be separated as far as possible, and compared, if we would gain a clear idea of D.'s earlier life. In 2 S the case is somewhat different. Of a double narrative there we have hardly any traces. On the other hand, we have a detailed and continuous narrative (ch. 9-20 with 1 K 1. 2), the work of a single writer, which describes the history of D.'s family and court at Jerus., and is a document of the highest importance. The earlier chapters (1-8) and the appendix (21-24) are of composite origin; there are indications that their contents have been partially rearranged; and later editors or redactors have left their mark on these chapters. The following analysis, taken mainly from Budde (*Richter und Samuel*), will be found useful. Some comments upon it will be found in the course of this article; for fuller particulars see SAMUEL, BOOKS OF.

A. (Budde, J) 1 S 16¹⁴⁻²³ 18^{5, 20-30} (6-9) 9-11 20, 22, 23^{1-14a}, 19-29 25²⁻⁴⁴ 24, 27, 28^{1, 2} 29, 30, 23⁴⁻²⁵ 31, 2 S 11-4, 17-27 2, 31, 6-39 4, 51-3, 17-25 (? 21¹⁵⁻²² 23⁸⁻³⁹) 56-12 6, 32-5 51³⁻¹⁶ 81⁶⁻¹⁸ = 20²³⁻²⁶ 9-20, 1 K 1. 2.

B. (Budde, E) 1 S 17, 18¹⁻⁴ (6-8) 12-19 19¹⁻¹⁷ 21¹⁻⁹ 23^{14b-18b}; 26, 2 S 1⁵⁻¹⁶.

Detached narratives of various dates:—2 S 21¹⁻¹⁴ 24, 1 S 16¹⁻¹³ 19¹⁸⁻²⁴ 21¹⁰⁻¹⁵, 2 S 7, 22, 23¹⁻⁷.

Editorial additions, based in part on older material:—2 S 8¹⁻¹⁵, 1 K 2¹⁻¹².

No account is taken here of minor interpolations and editorial additions.

Of these different authorities the oldest and most valuable is the family history of D. referred to above (2 S 9-20, 1 K 1. 2); its detailed descriptions and graphic touches do not indeed prove the writer to have been a contemporary of the events; but he clearly possessed trustworthy sources of information, and must be placed not very long after D.'s time. The remaining portions of A are not so detailed, and are apparently of somewhat later date. B is still later, and in several points less reliable than A; while of the shorter sections some are shown by their contents, and by the ideas there expressed, to be of high antiquity (2 S 21, 24), others are certainly later than B, and in part dependent on B. All, however, are earlier than the time of Josiah; and only in 2 S 7 (pre-exilic), in the Songs (2 S 22, 23¹⁻⁷) and the editorial additions, can we trace the influence of Deuteronomy.

David was the youngest son of Jesse, a Judæan of Bethlehem, who seems to have belonged to one of the principal families of his native town (yet cf. 1 S 18¹⁸). No particulars as to the ancestry of Jesse are given in 1 Sam. (contrast the case of Saul, 1 S 9¹); but in the (later) genealogy in Ruth he is called the son of Obed, and grandson of Boaz, and his descent is traced back to the family of Perez (Ru 4¹⁸⁻²²; see also 1 Ch 2³⁻¹⁷). The name of D.'s mother is nowhere given; his three elder brothers were called Eliab (? Elihu, 1 Ch 27¹⁸), Abinadab, and Shammah (Shimeah, 2 S 13³; Shimei, 2 S 21²¹), see 1 S 16⁶⁻⁹ 17¹³. 1 S 16^{19c}, and 17¹² speak of eight sons of Jesse, and in 1 Ch 2¹⁴⁻¹⁶ three more names are given, Nethanel the 4th, Raddai the 5th, and Ozem the 6th, D. being there termed the 7th. The sisters of D., Zeruiah (the mother of Joab, Abishai, and Asahel) and Abigail (the mother of Amasa), were probably half-sisters, for in 2 S 17²⁵ Abigail is called daughter of Nahash and sister to Zeruiah; cf. 1 Ch 2^{16, 17}.

We first hear of D. when he was introduced to the court of Saul. The king had been attacked with morbid melancholy, called by the historian 'an evil spirit from J'.⁵ His servants suggested that a skilful player upon the harp should be brought to soothe the king with his music, and D., the son of Jesse, was chosen for this office. The narrative (1 S 16¹⁴⁻²³) is probably to be connected with the statement of 14², that Saul gathered round him every valiant warrior in Israel; and in like manner D., who is described as 'a mighty man of valour and a man of war,' was summoned to the court. In addition to being a skilful musician, he was prudent in speech (or business), a comely person, and one who enjoyed the favour of J'. The young minstrel won the

favour of the king, who made him his armour-bearer (cf. 1 S 14^{16c}, 31⁴⁻⁶, 2 S 18¹⁵, 23³⁷), and kept him in attendance upon his person.

From another source, however, we have a different account of D.'s first introduction to Saul, in the beautiful and familiar story of the encounter with Goliath (ch. 17¹⁻¹⁸⁴). Here David is represented as a mere lad, a goodly youth of fair countenance, inexperienced in war (17³³, 42), who used to tend his father's sheep. During a war with the Philistines, D. was sent by his father with a present to his three brothers, who were serving in Saul's army in the Valley of Elah. On reaching the camp he heard the defiant words of the giant, Goliath of Gath, and, undeterred by his eldest brother's reproaches, he inquired among the soldiers concerning the king's reward promised to any man who would overcome the Philistine champion. When brought before the king, the youth at once offered to go out against the Philistine, relating how he had protected his father's sheep from the lions and bears which had attacked them (tenses in 17^{34c}, frequentative, see Driver, *Text of Sam.*). Putting aside the armour offered by the king, he advanced to meet the giant. He brought his opponent to the ground by a stone slung against his forehead, and then cut off his head with his own sword. The fall of their champion was followed by the rout of the Philistine army. So far was D. at this time unknown to Saul, that the king instructed his chief commander, Abner, to inquire concerning the 'stripling's' parentage,—a question which D. answered for himself as he returned from the fray with the giant's head in his hand. From this time forward D. was kept at the court of Saul, while a close friendship sprang up at once between him and the king's son Jonathan.

Many attempts have been made to harmonize the two narratives. It is suggested that D. had returned home from his position as minstrel, and had since grown out of recognition; or that Saul's question to Abner related to D.'s family, but that he personally was known to Saul. Neither of these explanations can be regarded as satisfactory, nor do they account for the discrepancy between the skilled warrior of 16¹⁸ and the shepherd lad of 17³³, 42. The difficulty attracted attention at an early period. 17¹⁹ seems to be a harmonistic addition by some later editor, and represents D. as going backwards and forwards between his home and the court. Similarly, 16¹⁹ 'which is with the sheep,' a clause which does not agree with v.¹⁸, must be regarded as a later gloss. The LXX (cod. B) offers a more violent solution of the problem, omitting 17¹²⁻³¹, 41, 50, 55-18⁵; it thus gets rid of the description of D. as sent to the camp by his father, and of Saul's question concerning the young hero, D. being represented (v.³²) as already in attendance upon Saul. The LXX text has been accepted as original by competent scholars (W. R. Smith, Stade, Cornill); but others with good reason adhere to the MT, and regard the omissions of the LXX as due to an attempt to reconcile chs. 16 and 17 (Driver, Cheyne, Wellhausen [*Composition*], Kuenen, Budde, etc.). Even in the LXX text D. is a shepherd lad (vv. 33, 42), not the warrior of 16¹⁸, 21; in language and style the omitted paragraphs do not differ from the rest of the chapter, while certain expressions which suggest a later hand (e.g. *assembly* v.⁴⁷, *Jerusalem* 64) are found also in the LXX; and the original covenant between D. and Jonathan, to which allusion is made more than once subsequently, is related only in 18¹⁻⁴. In fact all these attempts to reconcile the two accounts of the first meeting of D. and Saul are unsuccessful; we can only recognize them as two versions of the history, and choose between them. And here we

see the importance of the statement of 2 S 21¹⁹ that 'Elhanan the son of Jair (cf. Driver, *Text of Sam.*) the Bethlehemite, slew Goliath the Gittite, the staff of whose spear was like a weaver's beam' (cf. 1 S 17⁷). The Chronicler indeed states that 'Elhanan slew Lahmi the brother of Goliath' (1 Ch 20⁶), but the 'harder' reading of 2 Sam. is certainly to be preferred. It has been suggested that Elhanan was the original name of David (Böttcher, Sayce),—but of this there is no hint in either passage, and the father of Elhanan is Jair (or Jaûr), not Jesse;—or that the name of Goliath has been wrongly transferred to D.'s enemy, who, in 1 S 17, is usually termed simply 'the Philistine.' On the whole, however, it seems more probable that Goliath of Gath was slain at a later period by one of D.'s warriors, also a native of Bethlehem; and subsequently the victory was by tradition ascribed to D. himself, and put back to the period of his boyhood. In this case we must accept 1 S 16¹⁴⁻²³ as giving the true narrative of D.'s first introduction to Saul; but the popular tradition has left its mark on other parts of the history of David.

A story of D.'s earliest life is given in 1 S 16¹⁻¹³, where we read how, after Saul's rejection, Samuel was sent in accordance with J^o's instructions to Bethlehem. There he invited Jesse to a sacrifice, and, after sending a special summons to the young David, who was tending the sheep, anointed him in the midst of his brothers. This narrative now forms the introduction to the history of D.; it is the counterpart to 1 S 10^{16c} (the anointing of Saul by Samuel), and explains the coming of the Spirit of God upon D., and its departure from Saul; but, as it stands, the account can hardly be accepted as historical. Independently of any difficulties raised by the character and position here assigned to Samuel, which resemble what we find in the later narrative of the choice of Saul, the fact that D.'s anointing attracted so little attention has more than once been remarked as strange. His own brother Eliab seems unaware of it (17²⁹), while D. himself appears unconscious of his destiny (18¹⁸), and always regards Saul as the Anointed of J^o (1 S 24⁶, 26⁹, 2 S 1¹⁴). The explanation that this anointing was only a mark of favour bestowed on the most honoured guest, and that D. was here given a place like that assigned to Saul at Ramah (9²², so Klostermann, Ewald, W. R. Smith), does not do justice to the narrative, and anointing in the OT implies the conferring of some office.

Our authorities do not enable us to say how long D. continued in the position of Saul's minstrel and armour-bearer. His success in war against the Philistines; his popularity among the soldiers; the love of Michal and her marriage with D.; the strong friendship between D. and Jonathan, who entered into a covenant of brotherhood,—these facts are all attested by more than one passage in both the main narratives. But it is not quite easy to trace and explain the beginning of the distrust which Saul conceived for his young favourite, who had been promoted to the position of captain of the bodyguard (1 S 22¹⁴ LXX). It is only natural that there should be some want of definiteness in the narratives. The facts could be known only to those belonging to the innermost circle of the court, and all our records are written from the point of view of friends of David. If any ill-advised action on his part contributed to excite Saul's ill-will, we are told nothing about it. The main reason alleged for Saul's enmity is his jealousy of D.'s popularity and success in war, which is said to have been excited by the song of the women, who met the victorious warriors with the words, 'Saul hath slain his thousands, and D. his ten thousands.' But besides this there are hints

of a suspicion that D. had conspired with Jonathan to dethrone him (cf. 1 S 20^{30f.} 22¹³). Everything that we are told of Jonathan goes to prove the baselessness of such a suspicion, and his continued affection for D. is evidence of D.'s innocence; but we can well imagine that the melancholy from which Saul suffered served to increase any jealousy or distrust when once aroused, and it is possible that he feared that his subjects might regard him, owing to his occasional attacks of madness, as no longer a fit ruler of the nation.

The chapter which describes the growth of the estrangement between Saul and D. lies before us in two forms. Here again the LXX has a shorter text, omitting from ch. 18 vv. 9-11, 12b, 17-19, 21b, 29b, 30. Thus the account of Saul's casting his spear at D. is omitted, and the promise of marriage with the elder daughter Merab; the gradual growth of Saul's jealousy is described, and each stage is appropriately emphasized with the words 'Saul was afraid of D.' (v. 12), 'Stood in awe of him' (v. 15), 'was yet more afraid' (v. 29); and on account of the clear and consistent picture given in this version, many scholars accept the LXX text as original (so Wellh., Kuenen, Stade, Driver, W. R. Smith, Kirkpatrick). But Cornill allows that the promise of Merab is the proper fulfilment of the king's promise to the slayer of Goliath (17²⁵); and Budde urges the inconsistency of adopting the LXX recension in ch. 18, and rejecting it (as Wellh., Kuenen, Driver do) in ch. 17. He accounts for the difficulties presented by the MT by analysing the chapter into sections derived from the two principal documents (so also Cheyne); and this seems to be the most satisfactory solution of the problem. Comparing the parallel narratives, we gather that D. was placed by Saul at the head of an armed force, either as a mark of favour (18⁵ A), or because of his growing distrust (v. 13 B); that Saul's jealousy was excited on some occasion when D. returned from a victory over the Philistines (vv. 6-9, probably A and B,—note the double introduction to v. 6); that this did not prevent the marriage of D. to Saul's younger daughter Michal (vv. 20-30 A, cf. 17-19 B). Indeed it is not improbable that the estrangement is placed too early, and that Saul gave his daughter to the popular and successful officer in order to bind him to his interests, rather than that he already desired to compass D.'s death. Jonathan's intercession for his friend failed to effect a real reconciliation (19¹⁻⁷ B, 20 A); and when Saul, in a fit of madness, hurled his spear at D. while he played the harp before the king, D. felt that his life was in danger, and that he must flee from the court (19⁹⁻¹⁰ B, 18¹⁰ A, probably removed from its original position when A and B were combined).

The details given by the two narratives differ. According to A, Saul offered his daughter to D. as a mere snare, hoping that he might fall in battle, as the dowry was fixed at 100 foreskins of the Philistines; but D., without loss of time, procured twice the required number (18²⁷ 200, MT; 100, LXX), and won his bride. After this (vv. 9-11), Saul in a frenzy attempted the life of his son-in-law, and when D. complained to Jonathan, the latter repudiated the idea that his father had any real intention of harming him. To determine the king's true feelings, it was then agreed that D. should stay in hiding during the new-moon festival, while Jonathan was to excuse his friend's absence from the royal table on the pretext that he had been summoned to a family feast at Bethlehem. On the first day of D.'s absence nothing was said; on the next day, in answer to Saul's inquiries, Jonathan made the excuse agreed upon, whereat the king burst forth into furious reproaches against D. and his son, and hurled his spear at Jonathan, who attempted to intercede for his friend. In anger Jonathan left the table, and next morning went to the appointed place in the field. Under pretence of shooting at a mark, he sent an arrow beyond the stone where D. lay concealed; and while the boy carried back his master's weapons, the two friends took an affectionate farewell. On ch. 20, which has perhaps not reached us quite in its original form, it may be remarked that Jonathan's denial of any wish on the part of Saul to harm D. (20²) is hardly appropriate after 19¹⁻⁷ 11-17; and that while a mere act of frenzy (18^{10f.} 19^{9f.}) might leave D. uncertain as to Saul's intentions, he could not have any doubt after Saul had

deliberately sent messengers to kill him (19¹¹⁻¹⁷), or be expected to appear at the king's table (20⁶ 6. 27).

According to the second narrative (B), it was owing to Saul's jealousy that D. was removed from the position of armour-bearer to that of captain of a thousand (18¹³), and when the time came for his promised marriage (cf. 17²⁵), Merab the elder daughter was given to Adriel of Meholah. Our account of D.'s marriage with Michal seems to be derived from the other source, but the obscure words at the end of v. 21 are perhaps a fragment of the second narrative. Saul's ill-will towards his former favourite increased so greatly that he purposed to put him to death. Jonathan, however, pleaded to his father D.'s good deeds, and especially his victory over the Philistine (Goliath); and on Saul's relenting he brought D. out of his hiding-place in the field, and presented him to his father (19¹⁻⁷). The reconciliation, however, was of no long duration, for, shortly after Jonathan's appeal, Saul, in a fit of madness, cast his spear at D. as he played on the harp before him. D. fled to his house, but that night (19¹¹ LXX) Saul sent messengers to watch the house, and, while respecting his sleeping enemy in accordance with Oriental custom, he ordered them to kill him in the morning. D. was saved by the faithful Michal, who lowered him through the window, while she placed in his bed the *teraphim* or household image, and covered it with the bed-clothes. Next morning the messengers brought word that D. was ill; but, when charged to bring him in the bed, the fraud was discovered, and Michal had to plead in self-defence that D. had threatened her life if she hindered his escape. With regard to this series of narratives it may be pointed out that the similarities between portions of 19¹⁻⁷ and ch. 20 suggest, though they do not prove, that we have before us two different versions of the same event, while the reference to the victory over Goliath connects the former passage with ch. 17. Further, the difference of phraseology in 18^{10f.} 19^{9f.} (cf. also 20³³) favours the view that these verses are the work of independent writers, rather than that the former passage has merely been borrowed from the latter after the time of the LXX.

For the rest of Saul's reign D. was an exile from his home, and an outlaw (1 S 21-31). Some incidents during this period of his life are described with minute and graphic touches, which bear the evident stamp of genuineness; in other cases the accuracy of the narrative is more doubtful. The analysis of these chapters does not present many difficulties, and more than once the existence of double versions of the same story can hardly be doubted. It is only natural that many stories of D.'s adventures should have been current among the people long before they were written down; and many a place in the wilds of Judah would doubtless claim to be the site of some memorable event in the outlaw life of the great national hero; while from ch. 30²⁶⁻³¹ it is clear that we possess but a fragmentary account of his many wanderings. According to the present Book of Samuel, D., after escaping from Saul's messengers, fled first to Ramah, where he took refuge with Samuel at a prophetic school. Thrice Saul sent messengers to capture him (cf. 2 K 1), but each time the men were overcome by the sacred minstrelsy of the prophets; and when Saul came in person, he too was filled with prophetic frenzy, and stripping off his clothes lay naked all the night (19¹⁸⁻²⁴). Grave doubts, however, have been raised against this narrative. For a Judæan like D., flight southwards was more natural from Gibeath than northwards to Ramah; the connexion between Samuel and the prophets is not that presented by the older history of Saul and Samuel, where indeed there is another explanation given of the proverb 'Is Saul also among the prophets?' (10^{11f.}); while the present narrative can hardly be by the author of ch. 15, who implies (v. 39) that Saul and Samuel did not meet again. The conception of the prophetic school as here described is probably later than the time of D.; and we must regard it as at least doubtful whether D. had any dealings with Samuel.

If we reject this narrative as of later origin, the first place visited by D. in his flight will be the priestly city of Nob, which lay south of Gibeath and due north of Jerusalem. To Ahimelech, the head of the priests of Eli's family, he alleged that he was bound on urgent business for the king, and accordingly obtained through him, as on previous occasions (22¹⁵), an answer from the oracle. The

only provisions which the priest could offer was the sacred shewbread, removed that day from the sanctuary; and this David accepted, stating that he and his companions were ceremonially clean. Ahimelech is said also to have given to D. the sword of Goliath, which was kept wrapped in a cloth behind the EPHOD. This visit to Nob was followed by important consequences. Shortly afterwards, while Saul was holding court under the tamarisk in Gibeah, he complained to his Benjaminite followers of their ingratitude in taking part against him with his own son and David. Hereupon the Edomite Doeg, the chief herdman of Saul, or rather 'the mightiest of his runners' (21⁷, so Grätz, Driver), declared that he had seen D. at Nob, where Ahimelech had consulted the oracle on his behalf, and supplied him with food and weapons. Saul at once suspected that the priest also was party to a conspiracy against him, and perhaps that he had been consulting the oracle as to its success. He summoned to his presence Ahimelech and the priests of his family, and, refusing to accept their denial of any knowledge of a conspiracy, ordered his guards to put them to death. The guards hesitated, but Doeg carried out the king's orders. Eighty-five priests were slain, and the city of Nob completely destroyed. Only one member of Eli's family escaped the massacre, Abiathar, a son of Ahimelech, who fled to D., probably to Adullam; and the latter, feeling that the disaster was in some measure due to himself, promised the fugitive his protection. According to Budde, we have underlying 1 S 21¹⁻⁹ 22⁶⁻²³ two versions of D.'s visit to Nob, and the denunciation of Doeg: notice that 22^{10, 15} imply that Ahimelech consulted the oracle for David, whereas nothing is said of this in 21¹⁻⁹. Budde connects the earlier passage with B, the second with A, and regards the allusions to Goliath's sword in 22^{10, 13} as added to connect the two narratives. Others (Wellh., Kuenen, Stade) ascribe both chapters to the same writer, and reject 21^{8, 9} (Heb. ⁹ 12) 22^{10b} as later glosses. In any case, these verses presuppose the account of D. and Goliath in ch. 17.

Our present narrative represents D. as fleeing from Nob to Gath. Here, it is said, at the court of Achish, he was recognized as the Isr. warrior, and 'king of the land'; in consequence he feigned madness, drumming (v. 13 LXX) on the doors, and letting the spittle fall on his beard, so that at the command of Achish he was driven away (21¹⁰⁻¹⁶). It is doubtful, however, whether D. would really have taken refuge among the Philistines at such an early period of his wanderings; and when he appears at Gath at a later time, no hint is given of this earlier visit. Probably we have here again a 'doublet,' and our narrative represents a popular legend, the product of a desire to represent in a more patriotic light D.'s residence among the Philistines. Far more reliable is the account in 22^{1a}, according to which D. fled (from Nob) to the cave, or stronghold (so Wellh., Stade, Budde; cf. v. 4), of Adullam. This place must be looked for, not, according to a tradition dating from the 12th cent. A.D., on the south of Bethlehem in the *Wady Khareitun*, but in the Shephelah west of Hebron (cf. Gn 38¹, Jos 15³⁵; and see G. A. Smith, *Hist. Geog.* p. 229 f.). Here the wild character of the country afforded him a hiding-place; he was among his own tribesmen, and on the extremity of Judah Saul's authority was weakest. The brothers and kinsmen of D., who had to fear Saul's vengeance, gathered round him, together with distressed debtors and discontented men of every class, so that D. soon found himself the leader of a band of some 400 men. Of these, several doubtless were not of Israelitish origin (cf. 1 S 26⁸ and perhaps 2 S 23^{37, 39}); according to 1 Ch 12⁸⁻¹⁸ certain valiant

Gadites and men of Judah and Benjamin joined him here, and not long afterwards (1 S 23¹⁵) D.'s followers are reckoned at 600. His parents he placed under the protection of the king of Moab, a step which may perhaps be explained by reference to the Book of Ruth, where D.'s descent is traced from Ruth the Moabitess. According to 22⁵, a verse of which the connexion is somewhat obscure, D., at the advice of the prophet Gad, removed from his stronghold to the forest of Hareth; but he is certainly again in the Shephelah when we next hear of him. News came to D. that the Philistines were raiding Keilah, doubtless a frontier town west of Hebron, and perhaps south of Adullam. An opportunity now offered itself to him of at once assisting his countrymen and making a fresh name as a warrior. Having inquired of the priestly ephod, which Abiathar had brought from Nob, and received a favourable answer, D. marched down with his band, and drove away the Philistines from Keilah. To Saul it seemed that the time for capturing his enemy had now come. He summoned his army in order to besiege Keilah; but D., learning from the oracle that the inhabitants would save themselves by delivering over him and his men to Saul, escaped betimes, and Saul abandoned his expedition.

D. is next found in the wild and partially desert country to the south of Judah, or in the neighbourhood of the Dead Sea. The wilderness of Ziph and of Maon are especially connected with his wanderings. Here doubtless D. was welcome, and probably he was able to protect the inhabitants from the inroads of wild nomad tribes living farther to the south and east.

At this point the double narrative reappears, as is specially noticeable in the case of the two accounts of D. sparing Saul's life. That ch. 26 refers to a second occasion, although no reference is there made to a former proof of D.'s generosity, seems antecedently improbable; and this impression is confirmed on comparing the two narratives. Each is introduced by an offer of the Ziphites to betray D.'s hiding-place to Saul (23¹⁹ 26¹); each ends with a confession of D.'s noble conduct placed in the mouth of Saul; and a careful comparison of the language (see Kuenen, Budde) shows either literary dependence of one upon the other, or the dependence of both on some common tradition. Owing to the occurrence in ch. 26 of certain antique conceptions (esp. v. 19), it has commonly been supposed that this is the earlier chapter (so Kuenen, Wellh., Stade, Driver); Budde, on the other hand (so Cheyne), shows good reason for connecting ch. 24 with the A narratives, in which case it belongs to the earlier document, while the archaic colouring of ch. 26 may be due to the fact that it has undergone less editorial revision than the earlier chapter (see esp. 24^{26f}). Budde further argues from the scene of ch. 25 (Maon v. 2 LXX 1, cf. 23^{20f}) that this chapter came originally between chs. 23 and 24, probably having been transposed in order to separate the doublets, chs. 24 and 26. There are other traces of editorial revision in ch. 23, especially in the somewhat exaggerated language of v. 14^f, and the redundant description of D.'s haunts (*ib.*) is probably the result of conflation. Many regard the covenant of the two friends (vv. 16-18) as a mere doublet of 20¹¹⁻²³; like that passage, the verses suggest the objection that Jonathan could hardly have thus definitely regarded D. as his father's successor. However this may be, the narrative proceeds smoothly after the account of Jonathan's visit, when the transposition above mentioned has been made.

While D. was hiding in the hill of Hachilah and the neighbouring desert, the Ziphites sent word of his haunts to Saul, and at the king's request began to watch his movements, while an army was being collected. D. meanwhile withdrew southwards to the wilderness of Maon, on the edge of the Arabah, whither he was pursued by Saul. At one time, we are told, a single rocky ridge separated the two forces; but while D. was endeavouring to make good his escape before his band was completely surrounded, Saul was unexpectedly recalled to repel a sudden raid of the Philistines. Popular tradition pointed out the cliff known as *Sela-hammahlékôth* (i.e. prob. 'Rock of Divisions') as the scene of this narrow escape (23¹⁹⁻²⁹).

One of the most detailed and most reliable accounts which we possess of the whole period of D.'s wanderings relates to the time when he was

still in the region of Maon. Here dwelt a wealthy landowner named Nabal, belonging to the Calebites, a tribe closely connected with that of Judah, though originally distinct from it. His large flocks were pastured on Carmel, S.E. of Hebron; and not only were they unmolested by D.'s men, but the latter had served to protect them from the attacks of nomad tribes. Hearing that Nabal was shearing his sheep, D. sent ten men with a courteous request for a present for his band, but was met with a churlish refusal. In wrath D. at once commanded his men to arm; and while a third of the company was left in charge of the baggage, he marched with the rest to avenge the insult received from Nabal. Fortunately Abigail, Nabal's beautiful and prudent wife, had been warned by a servant of her husband's unseemly conduct. She immediately caused a large supply of provisions to be prepared, and without informing her husband rode to meet D. with her present. She met the armed band coming down the mountain side, and throwing herself at D.'s feet begged him to accept the gift, and to pay no heed to her husband's insults, while she expressed a hope that in time to come no remembrance of blood needlessly shed might rise up to trouble his mind. Her discretion and her pleadings were not lost on D.; he accepted the present from her hand, and abandoned his purpose of vengeance and bloodshed. When Abigail returned home, she found her husband drunk at a shearing feast, but next morning she told him of the danger which he had just escaped. Fear and vexation caused a shock, of which he died ten days later; and D., who felt that now J' had indeed defended his cause, took Abigail to wife. He thus established a powerful family connexion with the south of Judah, and he further increased his influence by marriage with Ahinoam of the southern Jezreel (cf. Jos 15²⁶). At the same time his first wife, Michal, was given by Saul to Paltiel, the son of Laish, of Gallim (1 S 25).

It seems to have been after this, according to the original history of A, that David removed to the desert tract west of the Dead Sea, and made his abode in Engedi, whither he was followed by Saul, after the retreat of the Philistines. We are told that on one occasion Saul entered a large cave for a necessary purpose, at a time when D. and his men were hidden in the recesses of the cave. Though urged by his followers to slay his pursuer, D. refused to harm the 'Anointed of J', and contented himself with cutting off a corner of the long robe which lay spread out before and behind the owner. D. followed Saul as he left the cave, and, holding out the portion of his robe, showed the king how he had been at the mercy of the man whom he was so relentlessly pursuing; and he begged him no longer to listen to those who charged D. with conspiring against him. Saul was touched at this generosity; and in language which clearly reflects the thoughts of a historian of a later time, he is made to openly acknowledge his rival's superiority, and to recognize him as the future king of Israel (1 S 24). The other version of this story (ch. 26), which, though coming from a later document, has preserved many original features lost in ch. 24, places D. in the hill of Hachilah, and attributes his pursuit hither by Saul to the information of the Ziphites. One night Saul encamped in a deep valley surrounded by steep cliffs; but the place being discovered by D.'s spies, D., accompanied by Abishai, descended from the hills, and entered unobserved into the laager where Saul lay sleeping. Refusing to allow Abishai to smite a sleeping enemy, he bade him carry away Saul's spear and water-cruise; and when they had again climbed the hill above the camp, D. shouted aloud, and thus aroused first

Abner, whom he blamed severely for his careless watch, and then Saul himself. To Saul, who recognized his voice, D. made a passionate appeal: 'Why did the king continually pursue him? if J' had stirred him up to do so, might he be propitiated with an offering; or were men seeking to drive D. out of J''s land?' The king confessed that he had sinned, and promised to do D. no more harm, and the two parted their several ways.

Whatever be the exact details of this meeting, it is clear that D. felt himself no longer safe in Judah, and as a last resort he passed over to the national enemy, and took refuge with his family and his followers at the court of Achish, son of Maach, king of Gath. A tried warrior at the head of 600 men, he was readily welcomed; but, not liking to dwell in the capital, he asked for a settlement of his own, and received the southern town of Ziklag, where he established himself as the vassal of his protector. It was now necessary for David to devise some means of ensuring the confidence of his master without injuring or estranging his own people. Accordingly, he made a succession of raids upon the Amalekites, Girzites, and other desert tribes living between Egypt and the south of Palestine. By putting to death all who fell into his hands, D. was able to represent to Achish that his frays were directed against Judah, and against the allied tribes of the Kenites and Jeralmeelites (1 S 27). He had been living at Ziklag some 16 months (v. 7), when the Philistines prepared for a decisive struggle against Israel. Achish called upon his vassal to accompany him to the war, and D. with professions of fidelity responded to the call. He had now placed himself in a false and dangerous position. Even if he were willing to aid the Philistines against his fellow-countrymen, success in the war would have effectually prevented him from becoming the accepted leader of Israel. Fortunately, the other Phil. leaders were less ready than Achish to trust him. When D. and his troops appeared in the rearguard with Achish at Aphek, as the Philistine hosts were mustering, the princes protested against the presence of the famed Israelitish leader, and urged that treachery to them in battle would be the surest way to a reconciliation with the king of Israel. Achish was therefore reluctantly compelled to bid D. depart, and next morning he turned homewards with his men (chs. 23¹⁴ 29). Two days later they reached Ziklag, to find that a sudden raid of the Amalekites had laid the town in ruins and carried the inhabitants captive. D. was the first to recover his composure, and, encouraged by an answer from J' given through the ephod of Abiathar, he started to pursue the foe. At the brook Besor, probably the *Wady Esheria* south of Gaza, 200 of his men were compelled to remain, overcome by fatigue. The pursuit, however, was continued, and an Egypt. slave, who was found half dead in the way, offered in return for a promise of life and liberty to guide D. to the enemy's encampment. The Amalekites were surprised at dusk while feasting, and few of the men escaped. All the captives were recovered, and a large booty was taken. On the return to the brook Besor, a dispute arose as to the right of the men who had been left there to share in the spoil. D., however, decided in their favour, and thus established the principle that those who fought and those who guarded the baggage should share alike. Of the rich spoil D. had a further use to make, for he sent costly presents to the elders of Hebron and other towns in the south of Judah, where he had been accustomed to find shelter during his earlier outlaw life (ch. 30). In this way he secured friends whose assistance was soon to be of the highest importance to him. It would seem, indeed, that these presents were sent *after* the

battle of Gilboa, for it was only two days after his return to Ziklag that D. heard of the defeat of Israel and the death of Saul and his three eldest sons. The tidings were brought by a young Amalekite, who is said to have presented to D. the royal crown and bracelet; but the account given by him of the death of Saul (2 S 1¹⁻¹⁰) cannot be reconciled with the more reliable narrative in 1 S 31. The messenger was rewarded for his tidings by being at once put to death (2 S 1¹³⁻¹⁶, cf. 4¹⁰); the defeat of Israel was commemorated with mourning and fasting, while D. himself expressed in a beautiful ode his grief for Saul and Jonathan. Of both he speaks in tones of warmest respect and affection; his love for Jonathan is expressed in a burst of passionate feeling; but it is noticeable that no religious thoughts are contained in the poem. Its genuineness is not unquestioned, but its Davidic authorship is accepted by Kuenen, Wellh., Stade, Budde, Cheyne, Driver, and others.

The opportunity had at last arrived for D. to return to his native country. After inquiring of J^r, he removed to Hebron, the ancient sacred city of Judah, accompanied by his family and his followers with their households. His presents had already gained him the goodwill of the Judæan elders; a renowned warrior of their own tribe was more likely to defend their interests than a younger descendant of the house of Saul; and D. was forthwith anointed king in Hebron (2 S 2¹⁻⁴). We hear of no opposition on the part of the Philistines. D. still retained Ziklag (1 S 27⁶), and doubtless continued to be a Philistine vassal. A division of the Isr. kingdom was conducive to the Philistine supremacy. According to the Chronicler, he had received accessions to his forces, outside his own tribe, while still at Ziklag; twenty-two men are named of Saul's tribe (1 Ch 12¹⁻⁷), while of the tribe of Manasseh several chiefs are said to have deserted to D., when he came with the Phil. army against Saul, and to have assisted him against the Amalekites (*ib.* vv. 19-22). The Chronicler, indeed, makes no direct mention of the reign of Eshbaal (Ishbosheth), or of the division of the kingdom, but in reality there were still several years of fighting and waiting before D. was recognized as king over all Israel.

D.'s first public act was at once generous and politic. He sent messengers to the men of Jabesh-gilead, and thanked them for their loyal and courageous conduct in rescuing the bodies of Saul and his sons. But the adherents of the house of Saul still remained true to the family. The natural heir to the throne was the only surviving legitimate son of the late king, Ishbosheth, or rather Eshbaal (1 Ch 8³⁸), who was perhaps still under age; for the later gloss in 2 S 2¹⁰ is certainly incorrect. His kinsman Abner, Saul's powerful general, retired with him across the Jordan to the ancient city of Mahanaim, and there made Eshbaal king. His dominions extended over Gilead and Geshur (Vulg. and Syr.), and on the west of Jordan over Jezreel, Ephraim, and Benjamin; but Abner was the real ruler and the support of the dynasty, and perhaps he, too, was compelled to recognize the over-lordship of the Philistines (so Kamphausen). Regarding the seven years during which D. reigned at Hebron we have but the scantiest information. He seems to have acted on the defensive, and probably felt that his cause would gain by waiting. Possibly, it was only by degrees that Abner extended his authority, so that some time elapsed before the rival forces were brought into collision. Only of one engagement is any account given; Joab's followers were victorious, but in the flight Abner killed Asahel, Joab's youngest brother. The cause of Eshbaal was declining even before he alienated his pro-

pector Abner, whom he reproached for taking one of his father's concubines. In anger Abner entered into communication with D., offering to bring over the whole kingdom into his hands. The only condition made by D. was the restoration of his wife Michal, through whom he doubtless hoped to support his claim as Saul's successor. Michal was sent back by Eshbaal's orders, and Abner conferred with the elders of the various tribes, who had already begun to recognize the inability of the house of Saul to defend them against their foes, and to look to D. as the one hope of the nation. Abner then visited Hebron, where he was entertained by D.; but on his departure he was murdered by Joab, in revenge for his brother Asahel. D. already began to find his loyal but unscrupulous nephew too strong for him. He could only express his abhorrence of the murder, which was indeed likely to alienate the supporters of Saul's house, and cause Abner to be honourably buried in Hebron, while he himself composed the funeral dirge—conduct which further increased the king's popularity (2 S 3). The death of Abner could not long delay the fall of Eshbaal; two Benjamite captains shortly afterwards murdered him during his mid-day sleep, and brought his head to D. in Hebron. The king commanded the instant execution of the murderers, while Eshbaal's head was buried in the tomb of Abner (ch. 4). D., who had formerly led Israel to victory against the Philistines, was now recognized as the natural leader of the people; the elders of the nation assembled at Hebron, a solemn league was made, and D. anointed king over the whole of Israel. He is said to have been at this time 37 years of age (2 S 5¹⁻⁵). The Chronicler gives an account of the bodies of men sent by the different tribes to make D. king, and of the three days' feast which they kept at Hebron (1 Ch 12²⁸⁻⁴⁰); but the language used is that of a later time, the numbers given are in most cases certainly too large, while the position assigned to the contingent of priests and Levites does not increase our confidence in the narrative.

Except for the important record of events in D.'s family, our accounts of his reign are fragmentary and incomplete; our history is not arranged in a strictly chronological manner, and the time and order of events must be to some extent a matter of conjecture. In spite of the present arrangement of 2 S 5, there can be little doubt that the Phil. wars were the first important events after D.'s recognition by the whole nation. The task imposed upon him by his election as king was that of freeing his country from Phil. domination. It was no longer possible for him to continue a vassal to a foreign power, nor were the Philistines likely to acquiesce, when without their consent he assumed sovereignty over all Israel. When, therefore, 'the Phil. heard that they had anointed D. king over Israel' (2 S 5¹⁷), they at once invaded the country. D. seems to have been unprepared, and was compelled 'to go down to the hold,' *i.e.* probably the old stronghold of Adullam, of such importance during his outlaw life, while the Philistines penetrated to the heart of the country and occupied Bethlehem and the Valley of Rephaim, probably between Bethlehem and Jerusalem (2 S 23^{13c}; so Stade, and Kittel who places the valley of Rephaim north of Jerusalem). Of the duration and progress of the war we have no certain information, but some detached notices of it have been preserved. It was while the Philistines had a garrison in Bethlehem that the three 'mighty men' forced their way to the well by the gate, a draught of water for which he had expressed a wish; but the gift obtained at such a risk was too precious to drink, and D. poured out the water as an offering to J^r (2 S 23¹³⁻¹⁷). Other incidents of the

war are recorded in 2 S 21¹⁵⁻²². At Gob D. was nearly slain in combat with a giant, but rescued by Abishai, and in consequence D.'s men declared that he should no longer risk his life in battle. On another occasion Elhanan of Bethlehem slew Goliath of Gath, and other feats of D.'s heroes are recorded (2 S 23⁸⁻¹²). A decisive battle was fought at Baal-perazim, where D., encouraged by an oracle, attacked his enemies, and dispersed them 'like a breach of waters,' and the images of the enemy were carried off as booty (2 S 5¹⁸⁻²¹, cf. Is 28²¹). Another decisive engagement took place in the valley of Rephaim. D. on inquiring of J' was bidden not to make a direct attack, i.e. from the south, but to take the enemy in the rear, and attack them when a rustling noise was heard in the *Bacca* trees. He was again completely successful, and the Philistines were defeated from Gibeon to Gezer (1 Ch 14¹³⁻¹⁷, 2 S 5²²⁻²⁵). Following up his victories, D. destroyed the Philistine supremacy, taking from them, as is said, 'the bridle of the mother city' (2 S 8'). The importance of these victories must have been far greater than the scanty notices of them would at first suggest.

The nation was now freed from external oppression: the next task was to weld it into one whole. A great step towards this end was the capture of Jebus, and the creation of a new capital. A Can. tribe still unsubdued occupied the district between Judah and Benjamin, settled round the city of Jebus, from which they derived their name. The strong fortress of Zion, standing on the eastern ridge between the Kidron and the so-called Tyropean valley, protected their city (see JERUSALEM). Situated as it was in the centre of the land, and commanding the principal lines of communication between north and south, and between east and west, it was admirably suited for a capital; and here D. marched with his forces. The inhabitants, trusting in their strong walls, derisively declared that 'the blind and lame' would be sufficient to defend them. Nevertheless, the place was taken by storm (2 S 5⁶⁻¹⁰). According to 1 Ch 11⁶ Joab was the first to scale the walls, and received in reward the post of commander-in-chief. The city was newly fortified, and here D. removed with his family and court. The importance of this step can hardly be overestimated. Gibeah of Saul and Hebron were merely tribal capitals; Jerus. stood on neutral ground, and was the capital of the whole nation, while, bordering alike on Judah and Benjamin, it would be regarded with favour by the king's own tribe and by that of his predecessor. The choice of the site is a signal proof of D.'s genius and statesmanship. Here gathered now inhabitants from all Israel, but mainly, no doubt, from Judah and Benjamin, while, to judge from the case of Araunah (2 S 24¹⁸⁻²⁵), the original Jebusite population was allowed to retain its former possessions. The effects of the capture of Jerus. were felt beyond the borders of Israel. Hiram, king of Tyre, entered into friendly relations with D., and supplied him with builders and material for a palace in his new capital. In true Oriental fashion D. marked the fresh increase of his power by increasing his harem. While still in Hebron he had married four more wives, and had already six sons: Amnon the firstborn, the son of Ahinoam of Jezreel; Chileab the son of the prudent Abigail; Absalom the son of Maacah, daughter of Talmal, the Aramæan king of Geshur; Adonijah the son of Haggith; Shephatiah the son of Abital; and Ithream the son of Eglah (2 S 3²⁻⁵; cf. 1 Ch 3¹⁻³, where Daniel is put for Chileab). Michal, who had been restored to David, unfortunately bore no children; otherwise the grandson of Saul would have been the natural heir to the throne, and the subsequent disputes with regard to

the succession would have been avoided. On removing to Jerusalem D. took fresh wives and concubines from this place, and the names of several more sons are recorded (2 S 5¹³⁻¹⁶, 1 Ch 3⁵⁻⁹ 14³⁻⁷; on variations in the three lists, cf. Driver, *Text of Sam.*). We must not judge D. herein from a modern Western standpoint. In the East a man's wealth and power are to a great extent measured by the number of his wives and the size of his family; and by politic alliances, as, for example, with the daughter of the king of Geshur, D. increased his influence at home and abroad. At the same time he introduced into his capital the source of many of the dangers and corruptions of an Oriental court, and the evil was increased by the weak affliction with which D. treated his favourite sons.

The next measure was to make the political capital also the religious centre of the nation; and for this purpose D. resolved to bring up to Jerus. the old sacred ark, which had for many years been left at Kiriath-jearim (1 S 7¹), or Baal-judah (2 S 6²; cf. Jos 15^{3, 6}, 1 Ch 13⁶). Thithir D. went with a large number of Israelites; the ark was drawn in a new cart, accompanied by two of its attendants, Uzzah and Ahio; while D. and his subjects marched behind to the strains of festal music. But at Nacon's threshing-floor, probably not far from Jerus., Uzzah, while attempting to steady the ark, suddenly fell dead. Dismayed at this occurrence, D. was afraid to have so dangerous a symbol near him, and the ark was placed in the house of Obed-edom the Gittite, probably one of David's Philistine mercenaries. Three months later, however, on hearing that the ark had brought blessing upon this house, D. took courage to carry out his original design. This time the ark was safely carried in triumph into the 'city of David,' while the king himself, wearing a priestly linen ephod, danced in the procession before it. A tent had already been prepared for its reception in the citadel; here solemn sacrifices were offered, after which the people were dismissed with the king's blessing and gifts of food. When D. returned to his house, he had to meet the scoffs of Michal, who taunted him with his undignified appearance in the procession that day; but the king with true dignity expressed his readiness to dance before J', who had chosen him above the house of Saul. To this irreverence of Michal's was attributed the fact that she remained childless: but she had at this time been married some fifteen or twenty years.

It is instructive to compare with the narrative of 2 S 6 the account given by the Chronicler of the bringing of the ark to Jerus. (1 Ch 13. 15. 16). The old history is largely rewritten to bring it into accordance with later ideas and institutions. An important place in the ceremonial is assigned to the priests and Levites, who in the older version are conspicuous by their absence: Obed-edom of Gath becomes a Levitical musician and doorkeeper.

The contrast between the simple tent for the ark and his own palace suggested to D. the need of building some more permanent temple; but the king's adviser, the prophet Nathan, who had at first approved of the design, subsequently induced D. to abandon it. Possibly, both prophet and people feared the effects of innovations in religious matters. Nathan's message to D. is contained in 2 S 7, a chapter which in its present form shows the influence of Deut., but is in the main of somewhat earlier date (see Budde). There we are told how Nathan, the night after his approval of D.'s design, received from God a message for the king: Never yet had J' required a temple of the judges of His people; tent and tabernacle had been sufficient hitherto. D. should not build a house for Him; He would build a house (i.e. a line of descendants) for D.; and though D.'s seed might need to be chastised, God's mercy should not depart

from them, (v. 13, which speaks of D.'s successor, who was to build a temple for Jⁿ, seems not to belong to the original form of the chapter; it weakens the antithesis of vv. 12 and 14). This message is followed by a beautiful prayer, in which D. thanks God for all His goodness to himself and his people.

It was probably soon after his settlement in Jerus. that D., in remembrance of his covenant with Jonathan, inquired whether there remained yet any survivors of Saul's house, whom he might benefit for the sake of his friend. He was told that there was still a son of Jonathan, and at D.'s orders Mephibosheth or Meribaal (1 Ch 8³⁴ 9⁴⁰) was brought from the house of Machir at Lo-debar; the property of Saul, apparently confiscated, was restored to him, and given to Ziba, a former servant of Saul's family, who was to till the ground for his master, while Meribaal dwelt at Jerus., where his conduct would be under the royal supervision, and ate at the king's table. Meribaal was lame, having been dropped by his nurse as she fled on hearing of the Israelite defeat at Mt. Gilboa. He was then five years old; now he is described as having a young son, an indication that these events took place some ten years after D. became king over all Israel. With other descendants of Saul, however, D. was compelled shortly afterwards to deal in a different manner. The land was afflicted with drought, and consequent famine, for three years, and D., on inquiring of the sacred oracle, was told that a curse of blood rested upon the land, because of an attempt made by Saul to exterminate the Gibeonites, an Amorite tribe bound by a covenant to Israel. The only compensation which the Gibeonites would accept was that seven of Saul's sons should be put to death; and D. delivered to them the two sons of Saul's concubine Rizpah, and five sons of his daughter Merab (MT wrongly Michal). These were accordingly hanged to Jⁿ in the sacred hill of Gibeon (cf. Driver, *Text of Sam.*), while the corpses were lovingly watched by the devoted Rizpah, till the first rains showed that the atonement was accepted. Then D., in recognition of the mother's devotion, gave orders for the burial of the corpses; and the bones, as well as those of Saul and Jonathan, were interred in the ancestral sepulchre of Kish (2 S 21¹⁻¹⁴). This occurrence must be placed after the recognition of Meribaal (v. 7), but before the rebellion of Absalom (2 S 16⁸). We have no right to blame D.'s action in this matter; he acted in accordance with the religious beliefs of his time, and with what he conceived to be the best interests of the nation; and, in spite of Shimei's reproaches, we may believe that D.'s contemporaries regarded the matter in the same light as himself.

Under D. the kingdom was more completely organized than it had been under his predecessor, and the administration was intrusted to royal officers (2 S 8¹⁶⁻¹⁸, 20²³⁻²⁶). Foremost of these was Joab the son of Zeruiah, D.'s nephew, who was commander-in-chief of the whole army; the scribe or chancellor, to whom belonged the control of all official documents, was Shisha (1 K 4³; corrupt readings in 2 S 8¹⁷ 20²⁵, 1 Ch 18¹⁶); the state historian or chronicler (*mazkir*, i.e. remembrancer), Jehoshaphat the son of Ahilud; Adoram controlled the levy, i.e. the forced service exacted by the king from his subjects; at the head of the priesthood, beside Abiathar, the representative of the house of Eli, stood Zadok, the ancestor of the later priestly house, but of his origin or appointment no authentic information is preserved; Ira, a Manassite of the family of Jair, was another priest, and D.'s sons also performed priestly duties. Traces of a royal council are to be found in allusions to

Ahithophel, D.'s counsellor (2 S 15¹²), and to Hushai, D.'s friend (*ib.* v. 37, cf. 1 K 4⁹). A very important institution was that of the royal body-guard, taking the place of the 'runners' of Saul (1 S 22¹⁷). The nucleus of it was doubtless David's old band, which had accompanied him during his wanderings and his residence at Ziklag. The technical name of this force was the *Gibborim*, heroes or mighty men; and their numbers were probably kept at the traditional 600. They were now largely recruited from foreigners, especially Philistines and Cherethites, a people of the south of Palestine (1 S 30¹⁴, Zeph 2⁵), perhaps originally connected with Crete; hence the guards were commonly called the *Cherethites* and *Pelethites* (wh. see). That these were the same body as the *Gibborim* appears from 1 K 18^{10, 33}; the text of 2 S 15¹⁸ is too uncertain to form an argument to the contrary. The whole corps was under the command of Benaiah the son of Jehoiada. Included in or distinct from this guard, was a select body of *Thirty* distinguished for special valour, over whom was Abishai, the brother of Joab; while *Three* warriors are named as ranking even higher than Abishai and Benaiah (2 S 23³⁶⁻³⁹, and cf. Driver, *ad loc.*). This guard of experienced soldiers formed the only standing army in the kingdom; and being stationed in the capital (cf. 2 S 11³⁶, Neh 3¹⁶) they became a powerful support to the king's authority, and ensured the discharge of his orders. As will appear later, they played an important part at the accession of Solomon.

For war on a large scale the army still consisted of the whole male population of military age, who were summoned to arms in time of danger. The force seems to have consisted wholly of infantry, except for a few chariots and horses retained after the defeat of Hadadezer (2 S 8⁴). But when D.'s wars of foreign conquest began to involve protracted campaigns, and long absence from home, some new system became desirable. It was perhaps partly to meet these requirements that D. instituted the *census*, which was carried out evidently after the completion of the Syrian wars, for his officers travelled as far north as the Hittite city of Kadesh (2 S 24⁶, LXX. Luc.). The military aspect of this measure is clear from its being intrusted to Joab and the captains of the host (v. 4, 1 Ch 21²); but the census may have been also intended as a basis for a regular system of fixed taxation, to meet the needs of an organized government. The measure was regarded with suspicion, perhaps as involving an undue increase of royal authority, and even Joab protested against it; nevertheless, he carried out his task in 9 months and 20 days. A severe pestilence, which visited the land immediately afterwards, was regarded by D. and the people as a sign of the divine displeasure. We are told that the prophet Gad offered D. the choice of three punishments—three years' famine (LXX, 1 Ch), three months' flight before his enemies, or three days' pestilence; and that the king chose the last, preferring to fall into the hand of God rather than of man. But when the destroying angel reached Jerus., he was bidden, in consequence of D.'s penitence, to stay his hand; and D., at Gad's bidding, bought the threshing-floor of Araunah or Ornan (Ch) the Jebusite, and offered there a sacrifice, whereby he obtained from God mercy for the land (2 S 24). The place of sacrifice became afterwards the site of Solomon's temple (2 Ch 3¹). The narrative shows that we must not expect to find for D.'s reign careful records of the numbers and divisions of the people. Yet such statistics are presupposed by the Chronicler, who in his account of David's armies and officers (1 Ch 23-27) describes a far more numerous and elaborately organized body of religious and

civil and military officials than is likely to have existed in the time of David. Fragments of old records may be incorporated in his work (*e.g.* 1 Ch 27²⁵⁻³¹); but the older history shows no trace of the thousands of Levites, or of the bodies of 24,000 men continually under arms (1 Ch 27¹⁻¹⁵) of which the later historian speaks.

Of most of D.'s wars we possess but a short summary in 2 S 8; the Ammonite war, on account of its connexion with Bathsheba's history, is related at length. The complete victory over the Philistines (8¹) has been already named. For some unexplained reason D. made war on Moab, where his parents had formerly taken refuge, and, on conquering the country, treated it with great severity, putting to death two-thirds of the prisoners. The exploits of Benaiah (2 S 23²⁰) may be referred to this campaign. Moab now became tributary. The next war was provoked by the neighbouring Ammonites. Their king, Nahash, Saul's enemy (1 S 11), had shown himself friendly to D., and on his death D. sent an embassy of condolence to his successor Hanun. But Hanun, suspicious of D.'s intentions, and perhaps alarmed by the subjugation of Moab, dismissed the messengers with gross insults. The Ammonites knew that they must now prepare for war, and sought for alliances among the small Aramaean kingdoms of Zobah, Beth-rehob, Maacah, and Tob, which were united in a common interest to check the rising power of Israel. Joab, with the Isr. army, marched out to Rabbah, the Ammonite capital, and, finding an enemy opposing him on both sides, divided his forces. With the picked troops he prepared to meet the Aramaean allies, 33,000 strong, while the rest of the army he placed under the command of his brother Abishai, to confront the Ammonites. The rout of the Syrians by Joab was the signal for the flight of the Ammonites within the walls of their capital, and thus ended the first campaign. The next year Hadadezer, king of Zobah, summoned to his assistance allies from beyond the Euphrates. The whole Aramaean force, under his general Shobach, was encamped at Helam, where D. himself, having crossed the Jordan at the head of the whole Isr. army, attacked them, and defeated them with great slaughter, Shobach being among the slain. All the chariot-horses which were captured were disabled, with the exception of sufficient for a hundred chariots. The summary (8³) seems to speak of another great victory won by D., when the Syrians of Damascus came to the assistance of Hadadezer. Zobah now made peace with Israel; prefects were appointed in Damascus and elsewhere, and, in addition to numerous presents, D. brought back to Jerus. the golden shields of Hadadezer's guard, and large quantities of brass from two of his treasure cities. An alliance was made between D. and Tou (v. 9^c LXX, 1 Ch 18^{9c}), king of Hamath, and Hadoram (1 Ch 18¹⁰) the son of Tou was sent with presents and greetings to David. These and other treasures, including spoil taken from the Amalekites, D. is said to have dedicated to J^h (2 S 8¹⁰). Ammon remained unsubdued, but in a third campaign Joab besieged Rabbah, and at last succeeded in capturing the part known as 'the city of waters.' As the fall of the whole city was now assured, Joab summoned D. from Jerus., that the king himself might have the glory of the conquest. D. advanced with a fresh army, and completed the capture of Rabbah. A large amount of spoil fell into his hands, including the costly gold crown of the idol Milcom (RVm, see 2 S 12²⁶⁻³¹). The prisoners, according to the ordinary translation of 12³¹, were tortured and treated with great cruelty. There are, however, difficulties about the rendering of the verse; a slight change of reading (קָבַר לְקַבְּרֵי, see RVm) would give the meaning that the people were reduced to servitude (so Hoffmann, Kautzsch, Driver [doubtfully]; Stade regards the verse as corrupt). The last of D.'s foreign conquests was that of Edom, but we have only a few disconnected allusions to the war. It appears that D. gained a great victory in the Valley of Salt after his Syrian campaign (2 S 8^{13c} LXX, 1 Ch 18^{11c}, Ps 60 title). By this conquest he obtained command of the ports on the Red Sea. Prefects were appointed throughout the country, and for six months Joab remained in Edom, to destroy the male population (1 K 11^{15c}).

It now remains to relate certain events in D.'s own family which troubled the later years of his reign. During the Ammonite war, D., who had remained in Jerus., committed adultery with Bathsheba, the wife of one of his officers then serving before Rabbah. In hopes of concealing his guilt he sent for Uriah; but the latter, who had perhaps heard rumours of what had taken place, refused, on the plea of military duty, to see his wife. Thereupon D. sent orders to Joab to place Uriah in a post of danger, and ensure his death. When the husband was dead, and the time of mourning past, Bathsheba was taken into the royal harem. The story was doubtless not unknown in Jerus.; the moral sense of the people found expression through Nathan the prophet, who by means of a parable boldly rebuked David; and though on the king's confessing his guilt the

prophet assured him of forgiveness, he predicted the death of Bathsheba's newly-born child. (2 S 12¹⁰⁻¹² are perhaps a later addition, a true comment on the subsequent history; for it has been pointed out that with the old Heb. ideas of guilt and penalty it is hardly consistent to regard the sin as forgiven [v. 13] while the curse remains. So Kuenen, Wellh., Stade.) In spite of all D.'s prayers and fastings, the child died; but in due time a second son was born to Bathsheba, the future king Solomon (2 S 11. 12¹⁻²⁵).

It was probably not long afterwards that the fruit of D.'s evil example appeared. His eldest son Amnon outraged his half-sister Tamar, and when D., though greatly displeased, yet partly from partiality for his firstborn (13²¹ LXX), partly perhaps from the remembrance of his own guilt, failed to punish the offender, the duty of avenging the maiden's wrong fell to her own brother Absalom. He waited his opportunity for two years, and then caused Amnon to be murdered at a sheep-shearing feast, to which all the king's sons had been invited. Absalom fled to the court of his grandfather, the king of Geshur. D. mourned long for his firstborn, then his longings turned to the son in exile; but out of season he could show severity. For three years Absalom remained in banishment; then Joab, divining the king's secret feelings, by the instrumentality of the woman of Tekoa procured his recall. For two years longer Absalom was excluded from the court, until he compelled Joab to intercede for him; then he was brought to the king, and received a kiss of reconciliation (2 S 13. 14). After the death of Amnon, and probably also of Chileab, Absalom was the natural heir to the throne. He was now completely estranged from his father, and soon began to endeavour to supplant him. To impress the people, he assumed royal state; to gain their favour, he would stand by the gate to meet all who came to the king with their suits, and lament that he was not king to do them justice. Thus he 'stole the hearts of the men of Israel.' There is no evidence that D., who used to 'execute judgments and justice to all his people' (2 S 8¹⁵), now neglected to do so. The stories of Nathan and the woman of Tekoa imply the contrary, but with the extension of the borders of Israel the number of suits may well have increased beyond the king's power to deal with them. We cannot say whether the crimes in the royal household had shaken the loyalty of the people,—in certain matters the nation at large did not show itself very sensitive to moral irregularities (2 S 16²¹⁻²³),—but it is probable that at Hebron the removal of the capital to Jerus. was still a grievance, and the tribesmen of Judah seem to have considered themselves not sufficiently favoured by the king. Absalom made preparations for four years (15⁷ LXX. Luc.), then under pretence of a vow he visited the old sacred city of Hebron. Here he was joined by D.'s counsellor, Ahithophel of Giloh, perhaps the grandfather of Bathsheba (cf. 2 S 11³ 23³⁴), and Absalom's rebellion was proclaimed by messengers throughout the country. D. was taken entirely by surprise, and resolved to withdraw at once from Jerusalem. If he escaped the first attack of the conspirators, he possessed better troops than were to be found on the other side. Delay would increase the difficulties of his opponents, and give his supporters time to rally. Leaving the palace in charge of ten concubines, he crossed the Kidron, accompanied by his household and bodyguard, amid the weeping of the whole land, and took the road by Olivet to Jordan. Many traits of D.'s character are brought out during this flight,—the devotion which he inspired in his followers, when Ittai of Gath, though but a short time in his service, refused to

leave him; his piety and confidence, when he commanded the priests to carry back the ark, trusting to J^r, without any outward symbol of His presence; his craft and dissimulation, when he bade Hushai ingratiate himself with Absalom, and try to frustrate his plans; his prudence, in establishing communications between himself and the capital by means of Ahimaaz and Jonathan; his impetuous hastiness in judgment, when he promised Ziba the lands of Meribaal; and at the same time his submission and forbearance, when he endured the curses of Shimei because J^r had bidden him, and urged that a Benjamite had more right than his own son to seek his life (2 S 15. 16¹⁻¹⁴).

D.'s plan of meeting treachery by treachery was successful. By Ahithophel's advice, Absalom did take over his father's concubines as a token of succession to his throne; but, instead of pursuing D. at once, he accepted the counsel of Hushai, to wait till he could muster troops from the whole country. Ahithophel, who realized the artificial nature of the enthusiasm for Absalom, foresaw that this delay was fatal to the rebellion, and forthwith hanged himself. Warned by the two priests' sons, Ahimaaz and Jonathan, of the need of haste, D. and his followers crossed the Jordan in safety before daybreak. He took up his headquarters at Mahanaim, the former capital of Eshbaal, and there received support from Shobi, the son of his old protector the king of Ammon, who may now have been a vassal prince; from Machir, the guardian of Meribaal, and from a wealthy Gileadite named Barzillai (16¹²⁻¹⁷). Absalom was the first to act on the offensive, and crossed the Jordan with his army. D. was prevented from going into battle by the entreaty of the people, who urged that he was worth 10,000 of them; but he publicly charged his generals, Joab, Abishai, and Ittai, to deal gently with Absalom. Joab knew that he was strong enough to disobey, and that the death of the leader would put an end to the rebellion. D.'s soldiers were victorious, and Joab himself slew Absalom as he hung in the branches of a large terebinth. D. by the gate of Mahanaim awaited anxiously the issue of the day; then he forgot all else in his passionate grief for his ungrateful son. Joab, however, roused him to put his duty as a king above his private feelings as a father, and D. returned to the gate to receive the greetings of his servants who had risked their lives for him (18-19⁹).

Only tact and diplomacy were now required to bring about the king's return. Among the tribes of Israel a speedy revulsion of feeling took place, and they repented of their ingratitude to the king who had saved them from their enemies. But Judah still stood aloof; D. therefore sent to Zadok and Abiathar, to influence in his behalf the elders of his own tribe, and to urge them not to be behind the rest of Israel in bringing back their king. At the same time he sent a special message to Amasa, the son of his sister Abigail, whom Absalom had made commander-in-chief, and swore to give him the office now held by the self-willed Joab. The men of Judah were soon won over; and when, in response to their invitation, the king returned homewards, the tribe assembled at Gilgal on the Jordan to welcome him. Shimei came with them at the head of a thousand Benjamites, and implored D.'s pardon, which was freely granted. In spite of Abishai's remonstrance, D. would not have the day of his triumph marred by putting any man to death. To Meribaal, however, who also came to meet the king, D. gave less than justice. Meribaal charged Ziba with slandering him, and failing to provide him with an ass to follow D. in his flight; Ziba had said that his master was wait-

ing in Jerus. in hopes of recovering his grandfather's throne. It was not easy to decide where the truth lay, and D. hastily dismissed the matter by bidding the two divide the land. The king appears in a more favourable light when he turns to reward his benefactors. He pressed the aged Barzillai, who accompanied him to Jordan, to come and live with him in Jerus.; and when Barzillai pleaded to be excused, on the ground of his great age, his son Chimham was allowed to take his place and be the recipient of the royal favours. But even before the king reached Jerus. it appeared that he had not succeeded in conciliating Judah without exciting the jealousy of the other tribes. While he had sent special messengers to his own tribesmen, he had taken no notice of the half-expressed goodwill of the rest of Israel. When therefore, at Gilgal, half the host of Israel came to escort D. home, they complained that the men of Judah had stolen him away; they had been slighted, although they had ten parts in the king, and the rights of the firstborn (2 S 19⁴³ LXX). A sharp dispute arose between the two sections of the nation, and a Benjamite, Sheba the son of Bichri, gave the signal for a fresh revolt. The men of Israel followed him, renouncing all part in the son of Jesse, while the men of Judah accompanied D. to Jerusalem. It was necessary to take immediate steps against the rebels. D. therefore bade Amasa assemble the forces of Judah within three days, thus tacitly depriving Joab of the supreme command. Amasa delayed beyond the appointed time, and D. was compelled to have recourse again to his old tried general. Joab (20⁹ Pesh., MT Abishai) was bidden to take the royal bodyguard, 'the mighty men,' and pursue after Sheba. At Gibeon Amasa met him. It might have been expected how Joab would treat his rival; he took his opportunity to murder him, and then, with his troops, hastened to Abel-beth-maacah, a town in the far north of the country, where Sheba had taken refuge. To save the town the inhabitants delivered up Sheba's head, and the rebellion was at an end (19^{9-20²²}). From 2 S 24¹³ we may perhaps infer with Ewald that Absalom's rebellion lasted for three months.

Some years must have elapsed before the closing scene of D.'s life. The old warrior, who at the time of Absalom's rebellion was never without resource, and had to be kept back by his soldiers from the battle, is now seen in the feebleness of extreme old age, kept within the palace, where no clothing will supply warmth to his bodily frame, and he is nursed by a fair young damsel of Shunem, named Abishag. He had neglected to make any definite arrangements with regard to the succession to the throne, but his eldest surviving son was generally regarded as the heir. This was Adonijah, a young man of great beauty, who had always been indulged by his fond father. Like Absalom before him, he assumed the state appropriate to the heir-apparent. On his side were most of D.'s older supporters, including Joab and Abiathar, but another party in the palace favoured Solomon, the son of D.'s favourite wife, Bathsheba. To the latter belonged the prophet Nathan, who perhaps felt that Adonijah was not the fittest man to rule, Zadok, the younger and probably rival priest, and Benaiah the captain of the bodyguard. An obvious danger awaited the unsuccessful aspirant to the throne after D.'s death (cf. 1 K 1²¹), and Adonijah resolved to make in good time a public declaration of his claims. He invited his supporters, including the king's sons and the royal officers of the tribe of Judah, to a feast at the sacred stone of Zoheleth, at the lower end of the Kidron Valley, and here the guests are said to have greeted Adonijah as already king. But tidings of this step were brought by

Nathan to Bathsheba, and at the prophet's advice she informed the king, and reminded him of a promise that her son should reign. By agreement Nathan came in and confirmed her words, whereupon D. repeated with an oath to Bathsheba the promise that Solomon should succeed. Then, rousing himself to act, the old king commanded Nathan, Zadok, and Benaiah to place Solomon on the royal mule, conduct him to the spring of Gihon, and solemnly proclaim him king. The support of Benaiah and the troops would make opposition useless. D.'s orders were carried out, Solomon was anointed, and a rejoicing crowd escorted the young king back to the city to set him on the royal throne. The shouts from Gihon, half-way up the Kidron Valley, had reached Adonijah at his feast, when Jonathan the son of Abiathar came in with news of Solomon's coronation. The guests fled, and Adonijah took sanctuary at the altar, but received from Solomon a promise of his life on condition of good conduct (1 K 1).

Our narrative in 1 K 2¹⁻¹² gives us an unpleasing picture of D.'s last days. He is represented as counselling Solomon to do good to Barzillai, but not to let Joab or Shimei die in peace. The genuineness of the narrative is much disputed. Vv. 2-4 are doubtless a later addition by a Deuteronomist editor; Wellh., Stade, Kautzsch reject the whole of vv. 1-9; but it seems more probable that vv. 2-9 formed part of the original document (so Kuenen, Budde, Kittel, Cheyne). Their historical character is another question, which can only be judged on subjective grounds. It is argued, with considerable exaggeration, that D. was too infirm to trouble about public matters, or to counsel his successor; and that another tradition gives us a religious song under the title of D.'s 'Last Words' (2 S 23¹⁻⁷). We must not measure the advice ascribed to D. by our own standard. A young and untried ruler like Solomon might be endangered by opponents whom D. was strong enough to spare; and the king, who had delivered up to death Saul's seven sons to atone for their father's guilt, may have feared that the curse of Shimei, or the murders of Joab, unless avenged, would bring down punishment on some other man. To us the words put into D.'s mouth do not appear seemly for a dying man, or in accordance with the noblest traits of D.'s character; it cannot be said they are impossible. Many would be glad to think that they are only due to the historian, who represented D. as the real author of some of Solomon's earliest acts, hoping to glorify the aged king, or else to clear the memory of the builder of the temple. It is easy to understand why a later historian preferred to ascribe to D. far nobler sentiments when he recorded the king's last words and his final charge to Solomon (1 Ch 28. 29).

D. is recorded to have reigned 7 years and 6 months in Hebron, and 33 years in Jerus. (2 S 2¹¹ 5⁴, 1 K 2¹¹). Forty years is a conventional round number in Heb. chronology, but the figure is approximately correct. Absalom, who was born in Hebron (2 S 3³), was grown up at the time of Amnon's outrage; his rebellion took place some 10 or 11 years later (13²³, 28 14²⁸ 15⁷), and, as was remarked above, several years must have intervened between this and D.'s death. Again, the Philistines and Moabites had been subdued before the Ammonite war; the marriage of Bathsheba took place in the third campaign against Ammon; and Solomon, her second son by D., was of full age when he came to the throne. Since D., when he first appears before Saul, is a tried warrior, he must have died at an advanced age. According to 2 S 5⁴ he reached 70 years. He was buried in the capital, which received from him the name of the 'city of David'; and after the return from exile

the sepulchres of D. were still pointed out between Siloam and the 'house of the mighty men' (Neh 3^{15f}; cf. Ac 2²⁹).

Later biblical writers and editors describe D. as he appeared to the Jews of their own age. To the compiler of the Books of Kings D. is a standard of piety, with whom his successors are compared; he is the king whose 'heart was perfect with J^v' (1 K 11⁴ etc.), 'who turned not aside save in the matter of Uriah the Hittite' (*ib.* 15⁵). The Chronicler, from feelings easily understood, passes entirely over the darker side of D.'s life, and the troubles in his family (see esp. 1 Ch 20). He represents the pious king in his later years as absorbed in preparations for the temple; for this he has accumulated vast treasures, and he exhorts the people to give freely for the same purpose (1 Ch 22. 29). He arranges for the services of the future sanctuary, organizing the sacred choirs, and determining the courses of priests and Levites, porters and treasurers (chs. 22-26). Finally, he hands to Solomon the pattern of the temple, which has been revealed to him by God (28¹¹⁻¹⁹), and admonishes his son on the greatness of the sacred duty which has been laid upon him (22⁶⁻¹⁹ 23¹⁻¹⁰, 20⁷). The figures given in these chapters, as in many parts of Chronicles, are incredibly large; the arrangements described for the sacred ministers and services are those of Zerubbabel's temple, though on a grander scale. In the older records the only direct connexion between D. and the temple is that implied in his sacrifice at Araunah's threshing-floor (2 S 24¹⁸⁻²⁵), and possibly in his dedication of his spoils (*ib.* 8^{11f}). Older material may well underlie the narrative of the Chronicler or his authority; but for our general estimate of D. and his times we must rely entirely on the Books of Samuel.

Allusion has been made earlier in this article to D.'s connexion with the Psalter. Minuter study makes it more and more difficult to conceive of him as the author of some of the most spiritual products of the OT religion. This is not merely on account of D.'s sins, acknowledged and repented of, but because of his crude ideas on religious matters which appear from time to time in the old records, and because the historians attribute to him, apparently without blame, both words and acts, which from the standard of a higher religion must be emphatically condemned. D. was first introduced to Saul as a minstrel; as a deviser of musical instruments he is named in Am 6⁵. The Lament over Saul and Jonathan, a secular song, reveals to us D.'s poetic power; as a composer of sacred poems he appears in the appendix to Samuel (2 S 22. 23¹⁻⁷) and in Chronicles (esp. 1 Ch 16⁷⁻³⁶). How much older this representation may be is hard to say; but it points to a tradition that D. was the father of Heb. psalmody, and it would be rash to deny the possibility that some psalms or portions of psalms of Davidic authorship are to be found in the Psalter. If such there be, we may expect to find them in the group of psalms which Ewald selected as being genuinely Davidic, viz. Ps 3. 4. 7. 8. 11. 15. 18. 19¹⁻⁶ 24¹⁻⁶ 7-10 29. 32. 101, and the fragments 60⁶⁻⁹ 68¹²⁻¹⁸ 144¹²⁻¹⁴; but probably this list requires to be considerably reduced. By the titles 73 psalms are assigned to D., the principal groups being Ps 3-41 (omitting 10. 33) and 51-70 (omitting 66. 67). In the LXX the number is somewhat larger, the title 'to David' being added to 14 more (including 93-99 Heb.), but omitted in some MSS from 3 or 4 others. The following special occasions are named in the Heb. titles:—3, when he fled from Absalom; 7, concerning the words of Cush, a Benjamite; 18, when J^v delivered him from his enemies and from Saul; 30, at the dedication of the House; 34, when he changed his behaviour before Abimelech; 51, after his rebuke by Nathan; 52, when Doeg denounced him to Saul; 54, when the Ziphites betrayed his hiding-place; 56, when the Philistines took him in Gath; 57, when he fled from Saul, in the cave; 59, when Saul's messengers watched the house to kill him; 60, after the defeat of Edom in the Valley of Salt; 63, in the wilderness of Judah; 142, when he was in the cave.

The character of D. has been very variously estimated, exaggerated praise naturally producing a revulsion to the opposite extreme. Undue weight has often been attached to the description of D. as 'the man after God's own heart'; but the phrase,

which occurs only in 1 S 13¹⁴ (quoted thence in Ac 13²¹), may be seen in the original context to denote one according to God's mind or purpose, one who possesses the necessary qualities for a ruler of God's people (cf. Jer 3¹⁵). It has been more difficult to do justice to D. on account of the different representations, found together in the Bible, but belonging to very different dates. The picture in Chron. of a Jewish saint has led many to censure unfairly the warrior king of a rude age. But if a critical examination of our authorities compels us to reject as unhistorical some pious deeds or noble words attributed to D., on the other hand it affords a more trustworthy standard by which to measure D.'s position among his contemporaries, and removes many of the glaring inconsistencies which have occasioned difficulties to students and historians.

We may first look at the darker side of his character and its numerous limitations, which show that he did not rise entirely above the level of the barbarous age in which he lived. His foreign wars are sometimes marked by very great cruelty. Even if the Ammonites were not tortured, yet in his desert raids no life was spared (1 S 27^{9,10}), and the victories over Moab and Edom were followed by massacres. The story of the patriarch Jacob suggests that deception and cunning were part of the Isr. character; certainly they often appear in D.'s history. The deceit practised at Nob may be excused by his circumstances; his professions of loyalty to Achish (1 S 28² 29⁸) may have been cautious words used to one who has power to compel; but the continued fraud practised at Ziklag points to a man who was used to crooked dealing; he could induce Hushai to counteract Ahithophel's advice by mean and treacherous ways; and after his sin with Bathsheba he stooped to base and cowardly means to conceal his guilt and remove Uriah from his path. Moreover, D.'s religious beliefs fell far short of the teaching of the great prophets. If he did not himself worship idols, he at least allowed Michal to keep the teraphim in his house; and to determine the will of God he had constant recourse to the sacred ephod. He associated the worship of J' with His presence in the land of Israel, could think that J' had stirred up Saul to pursue him, and that His displeasure might be removed by the fragrance of a sacrifice (1 S 26¹⁹); and he put to death seven innocent men to procure J's favour for the land (2 S 21¹⁻¹⁴). And there are other blemishes in D.'s character. He can judge a case on the impulse of a moment (2 S 16⁴), or dismiss one but half heard (19²⁹); and breaks out against Nabal into a passionate desire for vengeance. The great sins of his life, his adultery with Bathsheba and murder of Uriah, are perhaps but the common crimes of an Oriental despot; but, so far as we can judge, they were not common to Israel, and D. as well as his subjects knew of a higher moral standard. Lastly, his weakness in dealing with his own family is little to his credit. The imperious Joab is 'too hard' for him; Amnon and Adonijah are indulged and spoiled, and even the outrageous conduct of the former meets with no punishment; Absalom and Adonijah are allowed to declare their pretensions to the crown, while D. neglects to take proper measures to determine the succession to the throne. But in justice to D. it must be remembered that his family difficulties were in part the natural outcome of polygamy, and partly due to the state of culture of his time. In the East the same unwise and selfish love is still often manifested by a brave father to his children. The last charge to Solomon (1 K 2⁹) has been already sufficiently discussed.

It is now necessary to turn to the other side of the picture, remembering that we must not expect

to find a saint, but a king, a hero, and a man. No testimony to D. could be more eloquent than that of the charm he exerted on all who had to do with him. Everywhere he inspires love and devotion. Jonathan is his closest friend; Saul, Michal, all Israel love him. It is the same in later years. Achish pronounces him blameless (1 S 29⁶⁻⁹); whatever D. does pleases the people (2 S 3²⁶); the three mighty men risk their life to bring him a draught of water; his soldiers call him the 'lamp of Israel,' and will not let him endanger himself in battle (2 S 21¹⁷ 18³); Ittai of Gath will follow him in life or death (*ib.* 15²¹). Nor was this devotion and admiration undeserved. A brave and successful warrior, who had fought many a campaign against his country's foes, he safely led and ruled the rough men who gathered round him as an outlaw. His justice was experienced alike by Nabal's shepherds and his own followers (1 S 25⁷⁻¹⁵ 30²³⁻²⁵); his concern for his followers' lives is seen when he cannot drink the water from the well of Bethlehem. Hasty and passionate he could be, even in his zeal for justice (2 S 4⁹⁻¹² 12⁵⁶); but far more marked is his signal generosity. He spares Saul's life when he is in his power (1 S 24, 26), and laments for his death in a noble song (2 S 1); the messenger from Mt. Gilboa and the murderers of Eshbaal are put to death, when they think that they are bringing D. good tidings. He can bear with Shimei's curses during his flight, and forgive him freely on his return. For the sake of Jonathan he spares and shows favour to his son, and in the person of Chimham he repays the kindness of Barzillai. The warmth and tenderness of D.'s affection is revealed in his lamentation for his 'brother' Jonathan; and still more in his own family, as in his distress at the illness of Bathsheba's child, or at the death of Amnon and Absalom. Nor are higher elements wanting in D.'s religion; as may be seen from his simple but pious faith, when he dances before the ark, and is ready to abase himself before J' who has exalted him (2 S 6²¹); or still more when he prepares to leave Jerus. without the protection of the ark. He accepts his misfortunes with resignation, and acknowledges them as the consequence of his sins; while he retains his trust in God's goodness (2 S 12²² 15²⁶ 16¹⁰⁻¹² 24^{14, 17}). And even in the record of his sin his better qualities come out; for not many rulers would have accepted such a plain rebuke, or manifested such sincere repentance. When compared with a Joab or a Gideon, we recognize the greatness of David's character.

But it is especially as a ruler that D. left his mark on his own generation and on posterity. He set himself to free his country from its enemies, to secure it against invasion, and to make the people one. Jerus. was virtually his creation; he strove to make it the religious and political centre of his kingdom; and the discontent of Judah bears witness to the zeal with which he laboured for the whole nation, and not only for his own tribe. His efforts were the more successful, because with remarkable penetration (cf. 2 S 14¹⁹) he always knew the right measures to adopt. He wins the Judæan elders by judicious presents, but can wait at Hebron for Eshbaal's fall; he thanks the men of Jabesh-gilead, disavows all part in Abner's murder, retires from the first attack of Absalom, but keeps up communication with the capital. In all the varied difficulties of his eventful life he is never without resource. Nor was he negligent of the administration of his kingdom. It is said that he 'executed judgment and justice to all his people' (2 S 8¹⁵); and this statement is borne out by the readiness with which he listened to Nathan or the woman of Tekoa. Doubtless he once forced a census on an unwilling people, but except in one instance

we never hear of him using his power for selfish ends.

In two respects the reign of D. became an ideal for later times. He was remembered as a just and patriotic ruler; and when oppression and injustice became only too common in Israel, the great prophets looked forward to a time when again a righteous king should sit on his throne (Jer 23⁵, cf. Is 16⁵); and the name of D. became the symbol of the ideal ruler of his line, who they believed must come (Jer 30⁹, Ezk 34^{23c}, 37^{24c}), and who was afterwards termed the Messiah. Again, it was through D. that the group of Isr. tribes became a powerful nation, and extended its sway over the neighbouring peoples. Thus Israel began to feel that it had a mission in the world; and though D.'s empire began to melt away even before his successor's death, this conviction never died, even in the darkest hour. Still the people believed that in God's own time they would be called upon once more to subdue the surrounding nations (cf. Am 9¹²), or like a second D. to proclaim to heathen races J^m's great and holy name (cf. Is 55³⁻⁵).

H. A. WHITE.

DAY (יֹמִים, *hémra*).—In Hebrew the word 'day' is frequently used in phrases such as 'day of distress,' 'of evil,' 'of calamity,' 'of death' (cf. 'day of salvation,' Is 49⁸), which for the most part explain themselves. It is also used more widely of *time* in general, esp. when some event is described vividly as that of a single day, e.g. Dt 16³, Jg 18³⁰, Mal 3³ (יֹמִים with infin. or perf., but not יֹמִים אֶשֶׁר, which refers to some particular day, 2 S 19¹⁹ (2^o Heb.), Est 9¹). With a personal genitive we find the singular used to express (1) the birthday, or festival day, Job 3¹, Hos 7⁵; and (2) the time of calamity or death, Jer 50²¹, Ezk 21²⁶, 1 S 26¹⁰, Ps 37¹², Job 18²⁰. The plural 'days,' according to a very common usage, denotes the lifetime, reign, or period of activity of any one, Gn 26¹, Jg 5⁶, 1 K 10²¹, Is 1¹ etc. Hence the repeated יָמֵי קַיִן of K and Ch = Annals. With a local proper name the 'day' implies some notable battle, a signal judgment or disaster, e.g. Is 9⁴ the day of the defeat of Midian; Ps 137⁷ the day of the fall of Jerus.; Ezk 30⁹ the day of Egypt; Hos 1¹¹ the day of Jezreel. With the prophets 'in that day' is a common formula in describing what is to come at some future period of blessing or retribution, Is 2¹¹, Jer 4⁹, Am 2¹⁶ etc. Cf. also the phrases 'Lo, days are coming' (esp. in Jer and Am), and 'in the latter end of the days' (בְּאַחֲרֵי יָמֵי, i.e. at the end of the period to which the prophet's vision extends, e.g. Gn 49¹ (the time of the settlement in Caanan), Dt 4³⁰ (Israel's repentance in exile), Hos 3⁵, Mic 4¹ (the Messianic period).

Many of these expressions have passed into the language of NT, e.g. 'in the days of Herod,' Mt 2¹, Lk 1⁵; 'in these (those) days,' Lk 13²⁹, Ac 3²⁴; 'in the last days,' 2 Ti 3¹, Ja 5³; also 'my day,' the day when Christ appeared among men, Jn 8⁵⁶; 'the day of salvation,' the time during which salvation is offered to mankind, 2 Co 6²; 'the evil day' of trial and temptation, Eph 6¹²; 'in that day,' e.g., when Christ reveals Himself more fully to His disciples, Jn 14²⁰ 16^{23, 26}. In particular, the last day of the present dispensation, when Christ shall return to earth for the final judgment, is described in various phrases:

'the day,' He 10²⁵; 'that day,' Mt 7²², 2 Th 1¹⁰; 'the last day,' Jn 6³⁹ 11²⁴; 'the day of judgment,' Mt 11²², 1 Jn 4¹⁷; 'the day of Christ,' Ph 1¹⁰; 'the day of the Lord,' 2 Th 2², cf. Lk 17³⁰, Ro 2¹⁶, 2 Co 1¹⁴, Rev 6¹⁷ etc.; 'the day of God,' 2 P 3¹².

Prob. it is with allusion to the 'day of the Lord' or 'the day of judgment' that St. Paul uses the phrase 'of man's day' (ἡμέρας ἀνθρώπων) to denote mere human judgment (1 Co 4⁵).

The contrast between *day* and *night* gives rise to certain metaphorical expressions. Thus 'day' is the period of life during which there is opportunity for working (Jn 9⁴, cf. 11⁹). Christians are said to belong to the day, since they should abstain from evil deeds, which are usually done under the cover of darkness, 1 Th 5⁵⁻⁸, cf. Ro 13¹³. On the other hand, this life, with its ignorance, trials, and difficulties, is contrasted with the future day of fuller knowledge (2 P 1¹⁹) and of completed salvation (Ro 13¹²). See also **TIME**; for the Creative 'Day' see **COSMOGONY**; and for **Day of the Lord** see **ESCHATOLOGY OF THE OLD TESTAMENT**.

H. A. WHITE.

DAY OF ATONEMENT.—See **ATONEMENT, DAY OF**.

DAY'S JOURNEY (Gn 30³⁶ יוֹם יָרֵךְ, Jon 3⁴ יוֹם יָרֵךְ, Lk 2⁴⁴ ἡμέρας ὁδοῦ).—When the making of a day's journey is predicated of any one, we are not to understand merely that the person travelled for a day or for so many hours thereof. 'Day's journey' is no mere indication of time, but a real though very indefinite measure of space. Its length would vary according to the nature of the ground traversed; on a level plain it would be longer than over a country broken by hills or water-courses. Its distance would, again, be conditioned by the circumstances or capabilities of the traveller; a messenger on a hasty errand (cf. Gn 31²³) would achieve better results than a caravan, the rate of which would be regulated by the slowest beast of burden. A sturdy courier, without undue exertion, might put 25 to 30 miles behind him in a day; while a caravan, with its encumbrances, would not be able to overtake more than about 20 miles at the most. The camel usually proceeds at a rate of about 2½ miles an hour, and as 6 to 8 hours would be sufficient for a day, a caravan (probably implied Lk 2⁴⁴) might accomplish 15 to 20 miles; with much impedimenta, as recorded in the travels of the patriarchs Gn 30³⁶, or of the Israelites Nu 10²⁸, the day's journey would necessarily be much less. In the present-day pilgrimages to Mecca, 22½ miles is said to be a common day's journey for a caravan. We may perhaps safely figure to ourselves in connexion with the expression 'day's journey' an average distance of 20 to 25 miles. See further **SABBATH DAY'S JOURNEY**. A. GRIEVE.

DAYS MAN.—In 1 Co 4³ 'man's judgment' is lit. 'man's day' (ἀνθρώπων ἡμέρας), and is so tr^d in Wyclif, Tind., Cov., and Rheims; for the word 'day,' or its equivalent, has been used in many languages in the special sense of a day for hearing causes and giving judgment. (See **DAY**.) From 'day' in this sense was formed the word 'daysman,' after the example of craftsman, herdsman, and the like, to signify a judge, umpire, or arbiter. The oldest instance given in *Oxf. Eng. Dict.* is *Plumpton Corresp.* (1489) p. 82, 'Sir, the dayesmen cannot agre us'; the next, Coverdale's tr. of Job 9³³ 'Nether is there eny dayes man to reprove both the partes, or to laye his honde betwixte us,' from whom it has been retained in AV and RV. J. HASTINGS.

DAYSPRING.—Job 38¹² 'Hast thou . . . caused the dayspring to know his place?' (שָׁרֵף); Wis 16²⁸

'at the dayspring pray unto thee' (*πρὸς ἀνατολήν φωτός*, RV 'at the dawning of the day'); and Lk 1⁷⁸ 'the d. from on high hath visited us' (*ἀνατολή ἐξ ὕψους*). The word is of freq. occurrence for the dawn of day, as Eden, *Decades* (1555), p. 264, 'The day sprynge or dawninge of the daye gyveth a certeyne lyght before the rysinge of the soonne.' Davies (*Bible Eng.* p. 249) points out that virtually the same expression occurs in Jg 19²⁵ 'when the day began to spring, they let her go,' and 1 S 9²⁵ 'it came to pass about the spring of the day.' In Gn 32²⁴ the marg. has 'ascending of the morning' for 'breaking of the day'; and in Ps 65⁸ east and west are called 'the outgoings of the morning and evening.'

J. HASTINGS.

DAY-STAR.—This is Wyclif's transl. of the Gr. *φωσφόρος* in 2 P 1¹⁹, and he has been followed by all subsequent translators. The Eng. word (in all VSS till RV there are two sep. words, 'day star,' RV 'day-star' was used in two senses. (1) It signified the planet Venus (Lat. *Lucifer*), that star which preceded or accompanied the rising of the sun, the morning star, as in Lydgate, *Temple of Glas* (1355), 'Fairest of sterres . . . O Venus . . . O mighti goddess, daister after nyght'; and Holland's *Pliny*, ii. 8, 'For all the while that shee [the planet Venus] preventeth the morning, and riseth Oriental before, she taketh the name of Lucifer (or Day Starre) as a second sun hastening the day.' (2) It was applied poetically to the sun, especially by Milton, as *Lycidas*, 168—

'So sinks the day-star in the ocean bed,
And yet anon repairs his drooping head,
And tricks his beams.'

In 2 P the word is used in the first sense, the morning star. The passage is therefore parallel to Rev 2²⁸ 'the morning star,' and 22¹⁶ 'the bright, the morning star.' These passages, Plumptre thinks, are evidence that this had come to be recognized among the apostolic Christians as a symbolic name of the Lord Jesus as manifested to the souls of His people.

Wyclif has 'day-star' in Job 38³² 'Whether thou bryngist forth Lucifer, that is, dai-sterre, in his tyme'; and it is found in Is 14¹² AVm and RV 'O day star,' AV text 'O Lucifer.' See LUCIFER.

J. HASTINGS.

DEACON.—The words *διάκονος* (*-eiv-la*) refer to service rendered without regard to the quality of the person rendering it. Thus the *διάκονοι* at a feast may be either bond or free; and any one doing such service is a *διάκ.* for the time being. Thus, in NT they are used—(1) of service generally (Ac 12²⁸, Ro 15²⁵, 1 Co 16¹⁵); (2) of our Lord's work in particular (Mt 20²⁸); (3) of the temporal ruler (Ro 13⁴) as *θεοῦ διάκ.*; (4) of the work of the apostles (e.g. Ac 1¹⁷ 6³, 1 Co 3⁵, 1 Ti 1¹²): but in none of these places is there any trace of *διάκονος* as an official title. The transition is found Ro 12⁷, where the *διακονία* in contrast with *προφητεία*, *διδασκαλία*, *παράκλησις*, seems to indicate specific services, though the *διάκονος* himself is not mentioned. (Cf. Hort, *Christian Ecclesia*, 198 f.).

Where do we first find official *διάκονοι*? In Ac 5⁸ *οἱ νεώτεροι* are of course tacitly contrasted (as Lk 22²⁶) with *οἱ πρεσβύτεροι*; but the parallel *νεανίσκοι* in 5¹⁰ seems to show that the contrast is only of age, not of office. Coming to Ac 6, were 'the seven' deacons? Permanent officials of some sort they probably were; if we take account of St. Luke's way of recording 'beginnings' of movements.

For the common identification of them with the later deacons, we have (1) The general correspondence of their duties. (2) The word *διακονεῖν* *πραπίεως* used of them, though this is balanced by *διακονία τοῦ λόγου* of the apostles themselves in the next verse. (3) Common opinion from Irenæus

(*Hær.* iii. 12. 10, iv. 15. 1 'Stephanus primus diac.') onward. (4) The number of deacons limited to seven at Rome (Cornelius ap. Eus. *HE* vi. 43: also Soz. *HE* vii. 19, referring to Ac 6), and by Conc. Neocæs. *Can.* 15, also referring to Ac 6, though Conc. Trull. *Can.* 16 rejects it.

Against it, (1) They are nowhere in NT called *διάκονοι*, and Philip in Ac 21⁸ is simply 'one of the Seven.' So neither is their work called *διακονία*. (2) The qualifications laid down Ac 6³ for the seven are higher than those required by St. Paul, 1 Ti 3⁸, for deacons. (3) Of the Seven, Stephen was largely a preacher, and Philip in Ac 21⁸ (some twenty-five years later) holds the much higher rank of an evangelist. (4) The Seven evidently rank next to the apostles, and have much the same position at Jerusalem as the presbyters we find a little later. The arguments are not very strong either way; but, upon the whole, the adverse one seems the stronger, for this is a question on which tradition (150 years to Irenæus) would seem specially liable to slip. The Seven, then, would seem to have been neither (a) deacons, nor (b) temporary officers (Weizsäcker), and concern us no further if they were (c) almoners pure and simple (Conc. Trull. *supra*), or (d) presbyters (Ritschl), though they may have been (e) the original from which both the two later orders diverged, of deacons and presbyters (Lange).

In any case, the first explicit mention of deacons (Ph 1¹) is at Philippi, about A.D. 63; and again (1 Ti 3⁸) at Ephesus a few years later. They are not mentioned with Titus in Crete, but afterwards every church seems to have had its deacons.

Concerning Jewish parallels to the office. The deacon has no likeness to the Levite, who was rather a porter of the temple, who looked after the beasts, and sang in the choir. Neither do the deacons resemble the single *קָן* (Lk 4²⁰, *ὑπηρέτης*) of the synagogue, who was more like our verger, opening and shutting the doors, cleaning the building, handing the roll of the Law to the reader, etc. The nearest Jewish parallel is the *קָבָץ* *קָבָץ* or collectors of the alms. This phrase, however, rather suggests the tax-gatherer (*קָבָץ* *קָבָץ*, 2 K 23³⁸ Targ., with which compare Clement, *Ep.* 42, misquoting Is 60¹⁷), than the deacon whose duties lay so much among the poor. Upon the whole, the office was substantially new.

Qualifications are laid down by St. Paul (1 Ti 3) first for the bishop, then for the deacon. Generically they are alike, but with clear specific differences. Each must be grave, temperate, and free from greed of money, the husband of one wife, and a good ruler of his own house. But while the deacon may serve, if there is no actual charge against him, the bishop must be *ἀνεπιλημπτος*—one against whom no just charge can be made. The deacon's temperance and gravity are emphasized for the bishop, who is further reminded that if he cannot rule his own house well, he cannot be trusted to rule the house of God. The deacon is specially told not to be double-tongued or a lover of dirty gain, whereas it is enough to say generally that the bishop is not to be a lover of money. Then the bishop must have sundry qualifications for dealing with other men. He must be apt to teach others, whereas it is enough for the deacon to hold the mystery of faith in a pure conscience. He must also be a lover of hospitality, and a moderate and peaceable man, with some experience, and a good character even among the heathen.

Different qualifications point to different duties. The deacon's work evidently consists very much in visiting and relieving the poor, where his special temptations would be in one direction to gossip and slander, in the other to picking and stealing from the alms. If he uses his office well,

he may look forward to a good footing towards God, and much boldness towards men. On the other hand, the teaching, the hospitality, and the general intercourse with Christians and heathens, which are so conspicuous in the bishop's work, seem no regular part of the deacon's.

Of the appointment of deacons we are told very little. In the case of the Seven (Ac 6), first the apostles lay down the qualifications required, then the Church elects seven, then the apostles approve and admit them. In the Pastoral Epistles St. Paul does not get beyond the first stage of laying down qualifications, though Timothy is plainly intended to approve the candidates, and there is no hint given that the Church did not elect them. The process would most likely be the same as for the bishops or elders.

H. M. GWATKIN.

DEACONESS.—See WOMAN.

DEADLY has now only an active meaning, 'causing death'; but formerly was passive also, 'subject to death.' Thus Wyclif's tr. of 1 Co 15⁵³ is, 'For it byhoueth this corruptible thing to clothe vncorruptioun, and this deedli thing to putte awei vndeedlinesse.' Wyclif has 'deadly' in all passages in which AV has 'mortal' (except that in Job 4¹⁷ he omits the adj.), as well as often elsewhere, as He 7⁸ 'heere deedi men taken tithis,' Ja 5¹⁷ 'Elye was a deedli man lijk vs.' In AV d. occurs in this sense Rev 13^{3,12} 'his d. wound was healed' (πληγή τοῦ θανάτου, RV 'death-stroke'); and as an adv. Ezk 30²⁴ 'a d. wounded man' (בָּיָדָא).

J. HASTINGS.

DEAD SEA (Arab. *Bahr Lût*, or 'Sea of Lot').—This remarkable inland lake lies in the deepest part of the depression of the earth's surface which stretches from the Gulf of Akabah northwards into the Jordan Valley (see ARABAH). The name 'Dead Sea' is not found in the Bible, and appears first to have been used in Gr. (θάλασσα νεκρά) by Pausanias and Galen, and in Lat. by Justin. In OT it is known as the **Salt Sea** (Gn 14⁸, Dt 3¹⁷) and as the **Sea of the Arabah** (Jos 3¹⁰). Both these names are appropriate and expressive of its physical conditions. With reference to its geograph. situation, it is called the **East Sea** (Ezk 47¹⁸, Jl 2²⁰). The name 'Asphaltites' given to it by Josephus (*Ant.* 1. ix.) is derived from the deposits of bitumen which are found in some of the valleys entering the W. shore; and, lastly, the name **Dead Sea** (*Mare mortuum*) is used to indicate the absence of animal life in its waters. This is owing, not so much to the high salinity of the waters, as to the large proportion of bromide of magnesium which they contain. In the streams, often of a high temperature, which enter the lake to the S. of the promontory of El-Lisân, some living forms are exceedingly abundant, especially those of small fishes of the genus *Cyprinodon*. The name 'Bahr Lût,' by which the Dead Sea is known amongst the Arabs, is a remarkable instance of the persistence of traditionary names amongst these E. tribes, if, as is believed by not a few, it comes down to us through a period of nearly 4000 years, and has been preserved by the descendants of the patriarch Lot, who took possession of the territory of Moab and Ammon on the borders of the Arabian desert overlooking the Dead Sea basin, and who naturally associated this inland lake with the name of their progenitor who had lived on its shores (Gn 13¹¹).

Physical Features.—The Dead Sea lies nearly N.-S. along a line corresponding to that of the Jordan Valley; its length is 47 miles, and its greatest breadth about 10 miles. It receives the waters of the Jordan from the N.; those of El-Hessi, El-Jeib, and El-Fikreh from the S.; those of the Kerak, Arnon (Mojib), Zerka Ma'in from the

E., and the Kidron (En-Nar) and several lesser streams from the W.; and as the Dead Sea, like all salt lakes, has no outlet, the consequence is that the waters which enter it pass off in the form of vapour into the atmosphere. The quantity of water poured into the Dead Sea basin must be very great, especially during the months of April and May, when the Jordan is swollen by the melting of the snow in the Lebanon range; but such is the dryness of the air and the heat of the sun's rays in the Ghôr that this increased supply fails permanently to raise the level of the surface, which seems only to rise and fall within the limits of 10 to 15 ft., between the months of October and May, as estimated by Dr. Robinson from the position of the driftwood along the shore.

El-Lisân.—The Dead Sea is divided into two unequal portions by a remarkable promontory known as 'El-Lisân' (the tongue), which projects outwards from the E. shore for a distance of half the breadth of the lake. This promontory seems to be referred to in the passage describing the boundary of the lot of the tribe of Judah (Jos 15², marg. 'tongue'). El-Lisân is composed, according to Lartet, of white calcareous marl with beds of salt and gypsum. It breaks off in a cliff facing the W., 300 ft. high and 9 miles long, terminating northwards at Point Costigan, and is connected with the Moabite coast by a narrow neck of marshy land. The terraced form, as well as the composition, of El-Lisân show that it was once part of the bed of the lake when its waters rose several hundred feet higher than at present; and it corresponds in character and composition to the terraced ridge of Khashm Usdum now to be described.

Khashm Usdum (or Salt-mountain).—This remarkable ridge follows the W. shore of the lake from Umm Zoghhal southwards to the banks of Wady el-Fikreh at the S. margin of the Ghôr, a distance of 7 miles. Its upper surface is about 600 ft. above the lake, and seen from a distance appears flat; but it is deeply furrowed and seamed by streamlets, which have penetrated into the mass below. The upper part of Khashm Usdum is formed of strata of white saliferous and gypseous marl, the lower of solid salt-rock; and these materials are laid open to view in the nearly vertical cliff along which the ridge breaks off on the E. side. There can be no doubt that this terrace, like that of El-Lisân, and others to be found at intervals on both sides of the lake, were parts of the bed of the lake itself when its waters stood at a much higher level than at present. It is separated from the base of the limestone table-land by a valley of broken ground, strewn with blocks of rock, about half a mile in width, and eroded by torrential action.

The Ascent of Akrabim ('scorpions').—From the S. shore of the lake an extensive tract, composed partly of slime, partly of woods and pastures, extends as far as the semicircular terrace which bounds the Ghôr in that direction. This marsh is liable to floods, and its surface is strewn with trunks of trees brought down by the torrents. The terrace by which it is bounded is 500 ft. high, and is formed of marls overlaid by beds of sand, gravel, and loam, which extend southwards into the Arabah. They are deposits formed over the old bed of the lake when its waters were 500-600 ft. above their present level. The terrace seems to

answer to the 'Ascent of Akrabbim' referred to in Jos 15^b in connexion with the boundary of Judah. Robinson regards the edge of the terrace as marking the limits of the Ghôr and the Arabah respectively: a view in which the present writer concurs.

Level of the Surface.—The Dead Sea was sounded in 1848 by Lieut. Lynch, who found that it descended to a depth of 1278 ft. at a point about 5 miles N. of Costigan. It is now known that the surface itself descends to a greater depth below that of the ocean than any sheet of water on the globe. This fact remained unrecognized until 1836-7, when H. von Schubert and Prof. Roth visited Palestine, and made barometric observations in the Jordanic basin. These were followed and confirmed by Col. Wilson (now Gen. Sir C. W. Wilson) and the officers of the Ordnance Survey of Palestine by actual levelling from the shore of the Mediterranean to that of the Dead Sea itself, and have established the fact that the surface of the latter falls to a depth of 1292 ft. below that of the former. Nor is it surprising that this result was not detected before the barometer and the level were brought to bear on its determination; for there is nothing in the atmosphere around the lake which suggests to the traveller, by his sensations alone, that he sustains a more than ordinary atmospheric pressure; and the two seas being shut off from each other by a high table-land 50 miles across, comparison of levels by means of the eye is impossible. With the increase of barometric pressure there is a corresponding increase of temperature. Hence, while in winter snow frequently lies on the plateaux of Judæa and of Moab, it is unknown on the shores of the Dead Sea; and the Arab tribes go down to the Ghôr with their flocks of sheep and goats, and camp over the plain during the winter months. Thus when, in December 1893, the writer found himself standing on the edge of the terrace overlooking the Ghôr, he beheld at his feet a wide plain stretching away northwards towards the margin of the Dead Sea, and to a large extent green with vegetation and thickets of small trees. To the right in an open space were seen several large Bedâwin camps, from which the shouts of wild men, the barking of dogs, and the bellowing of camels ascended. Numerous flocks of black goats and white sheep were being tended by women in long blue cloaks; and on the party of travellers being observed, groups of merry children came tripping up towards the path accompanied by a few of the elders, and, ranging themselves in a line, courteously returned salutations. Here the Arabs remain enjoying the warmth of the plain till the increasing heat of the summer's sun calls them away to their high pasture grounds on the table-land of Edom and Moab. At a short distance farther towards the shore of the lake is the village of Es-Safieh, inhabited by a tribe of fellahin called the Ghawarneh, who by means of irrigation from the Wady el-Hessi cultivate with success fields of wheat, maize, dhurah, indigo, and cotton, while they rear herds of camels and flocks of sheep and goats. On the produce of these fields the Arabs largely depend for their supplies of food and raiment, which they obtain by a kind of rude, often compulsory, barter.

Boundaries of the Ghôr.—The Dead Sea basin and its ancient deposits are bounded along the E. by the high plateau of Moab, and on the W. by the nearly equally high table-land of Judæa. The plain of El-Ammaya in Moab reaches a level of 3100 ft. above the Mediterranean, and, consequently, of about 4400 ft. above the Dead Sea. The slopes of the escarpment along which the plateau breaks off are sometimes terraced, sometimes precipitous, and are eroded by numerous streams with thermal springs, of which that of the Zerka Ma'in (or Callirhoë) is the most celebrated.

The W. slopes of the Ghôr are equally seamed by river courses which cut deep into the limestone strata, and have their sources in springs near the summit of the table-land. The cliffs of Râs Mersed, Engedi, and Masada,* the latter crowned by the ruined fortress, are prominent features of the W. shore; while the walled city of Kerak, the capital of Moab, crowns the heights on the E. side.

Geology.—Investigations by geologists in recent times have dispelled some of the old ideas regarding the origin of this mysterious inland lake. It is now known not to be the crater of a volcano, and it is almost equally certain that Sodom and Gomorrah were not overwhelmed in its waters. These researches have also resulted in showing that the area of the Dead Sea waters is not very different from what it was in the days of Abraham and Lot. It is now known, through the observations of Tristram, Lartet, Hull, and others, that the Dead Sea occupies a part of the trough, or depression in the crust, produced by subsidence along the line of a 'fault' or system of 'faults' (fractures accompanied by displacement of the strata) which has been traced from the G. of Akabah along the line of the Jordan-Arabah Valley to the base of Hermon (see ARABAH). This fracture was produced owing to the terrestrial movements which resulted in the whole region being elevated out of the sea after the close of the Eocene period. In consequence of this faulting and displacement, the formations on the opposite sides of the Ghôr do not correspond with each other; those on the E., or Moabite, side being more ancient than those on the W. side at similar levels. Thus, while the whole W. side of the Ghôr is formed of Cretaceous limestones, the flanks of the Moabite escarpment are composed of very ancient volcanic rocks at the base; overlain successively by Carboniferous and older Cretaceous beds, and only surmounted at a level of about 3000-4000 ft. above the lake by the Cretaceous limestones which come down to the water's edge along the W. shore.

The fundamental rocks laid open on the flanks of Jebel Shomar, a massive and precipitous mountain which rises behind Es-Safieh, and runs along the E. side of the Ghôr for several miles, are composed of great beds of volcanic materials (agglomerates, tuffs, and sheets of porphyry, penetrated by numerous dykes). They have a slight dip northwards, and are overlain by red and purple sandstones and conglomerates of Carboniferous age ('Desert sandstone'), then by Carboniferous limestone forming the terrace of Lebrusch, and this by the red and variegated sandstones of Lower Cretaceous age ('Nubian sandstone') which form the greater part of the mountain flanks, and are ultimately overlain by the Cretaceous limestones composing the crest of the Moabite and Edomite escarpment.

Such is the general geological structure as far as regards the more ancient formations. The form and features of the Ghôr were considerably modified by rain and river action in Pliocene and Pleistocene times. At the latter stage, corresponding to the close of the Glacial epoch, the waters of the Jordanic Valley appear to have risen to such a degree as to have formed a lake whose area included those of Merom, Galilee, and the Dead Sea, and whose S. margin extended into the Arabah as far as the 'Ain Abu Werideh; thus producing a lake which had a length from N. to S. of 200 miles, and whose surface rose to the level of the Mediter-

* The fortress of Masada was the last refuge of the band of Zealots of the Jews who defended themselves against Silva, the Roman general (A.D. 71), and at last destroyed themselves to escape capture (Jos. Wars, vii. viii. ix.).

ranean. The evidence for this conclusion is to be found in the occurrence of terraces of lacustrine materials at intervals down the Arabah from Ain Abu Werideh, a locality nearly 40 miles S. of the margin of the Ghôr. These terraces contain numerous semi-fossil shells of the genera *Melania* and *Melanopsis*.* It is easy to understand that during the Glacial epoch the large rainfall and the melting of the snows of the Lebanon, accompanied by a climate less tropical than that which now prevails, may have added enormously to the supplies of water poured into the Jordanic basin, thus raising the surface to the level indicated. With the subsequent diminishing rainfall, and the recurrence of sub-tropical conditions of climate, evaporation would gradually gain upon precipitation; and the surface of the waters, contracting stage by stage, would ultimately fall to their present limits, where evaporation and supply have nearly balanced each other. It was during such successive stages of diminution in volume, and lowering of the surface, that the terraces of lacustrine materials were formed, and converted into land surfaces; these commence at their highest limit with those of Abu Werideh, and are succeeded by others at lower and lower levels till the present margin of the Dead Sea shore is reached. The salinification of the waters necessarily accompanied this process; because the salts dissolved in the waters remained behind during the process of evaporation, and consequently tended to augment till saturation was reached. The Dead Sea waters, therefore, resemble those of all closed lakes which are more or less saline owing to similar causes.†

E. HULL.

DEAFNESS.—See MEDICINE.

DEAL.—A 'deal' is a part or share (A.-S. *dael*, Ger. *theil*), and it may be a large or small part. In mod. Eng. we are allowed to say only 'he gave a great deal, or a good deal, of trouble,' scarcely 'he gave a deal of trouble,' and never 'a small deal.' In older Eng. Chaucer could say (*House of Fame*, i. 331)—

'O, have ye men swich goodliheed
In speche, and never a deal of trouthe?'

And Latimer could represent philosophers saying that 'God walked up and down in Heaven, and thinketh never a deal of our affairs.' In AV deal is used in the phrase 'tenth deal' or 'tenth deals,' for Heb. יִסְאָרֹן *issârôn*, wherever that word occurs (RV 'tenth part' or 'tenth parts'). See WEIGHTS AND MEASURES.

To 'deal' is to divide or distribute (A.-S. *daelan*), as in 2 S 619 'he dealt among all the people . . . to every one a cake'; 1 Ch 168, Is 587 'd. thy bread to the hungry'; and Ro 128 'according as God hath dealt to every man the measure of faith.' Cf. Wyclif, Lk 918 'And whanne he hadde take the fyve looves and twei fischis, he biheild in to heuene, and blesside hem, and brak and delide to hise discipulis, that thei schulden sette forth bifor the companyes'; and Coverdale, Dn 528 'Thy kyngdome is delt in partes.' From this the verb passed into the sense of dealing well or ill with a person, and then having any transaction with,—meanings that are freely found in AV as in mod. use, Ac 2524 'this man, about whom all the multitude of the Jews have dealt with me' (ἵστῶσιν μοι, RV 'made suit to me').

J. HASTINGS.

* *Mount Seir*, p. 99; *Phys. Geol. Arabia Petrea*, etc. pp. 15-79.

† The waters of the Dead Sea yield 24.57 lbs. of salt in 100 lbs. of water, those of the Atlantic yielding only 6 lbs. of salt in the same quantity; the former consist of chlorides of lime, magnesia, sodium, and potassium, and in smaller proportions of sulphates and bromides of the same substances. The large quantity of bromine (occurring as bromide of magnesium) has attracted the attention of naturalists, and is supposed to be a volcanic emanation.

DEAR, DEARTH.—Dear is used in AV in two senses: (1) *Beloved*, as Eph 51 'Be ye therefore followers of God as dear children' (ἀγαπητός, RV 'beloved'). In this sense is Col 113 'the kingdom of his d. Son,' which AV, along with Cov., Cran., Gen., and Bishops', retained from Tindale, though Wyclif's 'the sone of his louynge' was nearer the Greek (ὁ υἱὸς τῆς ἀγάπης αὐτοῦ; Rheims, RV, 'the Son of his love'). See BELOVED. (2) *Precious*, Ac 2024 'neither count I my life d. unto myself' (τίμιος). Cf. Ps 7214 Cov. 'deare shal their bloude be in his sight,' and 11615 'right deare in the sight of the Lorde is the death of his sayntes,' both preserved in Pr. Bk. version, the meaning being that he counts it too precious to leave it unavenged.

Dearth.—That which is precious is rare, as 1 S 31 Cov. 'The worde of y^e Lorde was deare at the same tyme'; and from 'dear' in this sense was formed 'dearth'—scarcity, famine. Dearth occurs in AV Gn 41546, 2 K 436, 2 Ch 628, Neh 53 (all כָּרָב, RV 'famine' in Gn, 2 Ch, keeping 'dearth' in 2 K, Neh); Jer 141 (צָרָה, RV 'drought'); Ac 711 1128 (ἀμεύς, RV 'famine'); and RV adds Job 522 (צָרָה, AV 'famine'), though it retains 'famine' for the same Heb. in 302.

J. HASTINGS.

DEATH.—See ESCHATOLOGY, LIFE.

DEBATE.—To debate (fr. old Fr. *debatre*, Lat. *de* down, *batuere* beat) now means to discuss, and a 'd.' is a discussion, which is expected to be amicable. But in earlier Eng. 'to debate' was to fight or wrangle, and 'debate' was strife, quarrelling. Thus Gn 137 Geneva 'there was debate betweene the heardmen of Abrams cattell, and the heardmen of Lots cattell'; and Lk 1221 Cov. 'Thynke ye that I am come to bryngpe peace upon earth—I tell you nay, but rather debate.' In this sense only is debate used in AV, whether as vb. or subst. As vb. Pr 259 'Debate thy cause with thy neighbour' (so RV), and Is 278 (RV 'contend'; both יָרִיב = 'strive,' 'go to law'). As subst. Is 584 (רִיבָה, RV 'contention'); Sir 289 'A sinful man disquieteth friends, and maketh d. among them that be at peace' (ἐκβάλλει διαβολήν; cf. 2 Ti 33 AVm, Tit 28 AVm, and see MAKEBATE); Ro 129, 2 Co 1220 (ἔρις, RV 'strife').

J. HASTINGS.

DEBIR (דְּבִיר).—The king of Eglon, who acc. to Jos 108 joined other four kings against Joshua, but was defeated and put to death along with his allies at Makkedah.

DEBIR (דְּבִיר, Δαβερ, *Dabir*).—1. The name is generally supposed to mean 'back'; hence = *hindmost chamber, innermost room of a temple*, and so it is used in 1 K 66 to denote the Holy of Holies. The city must have been a sacred one, with a well-known temple. This is borne out by its two other names, Kiriath-sepher or 'Book-town' (Jos 1518, Sept. πόλις γραμμάτων), and Kiriath-sannah, 'city of instruction' (?) (Jos 1549); and W. Max Müller (*Asien und Europa*, 1894) has shown that in an Egyptian papyrus, known as the 'Travels of the Mohar,' which was written in the time of Ramses II. (B.C. 1300), and is a sarcastic account of an Egyptian traveller's misadventures in Canaan, reference is made to the town. The writer remarks: 'Thou hast not seen Kiriath-anab near Beth-thupar, nor dost thou know Adullam and Zidiputa.' We learn from the geographical list of Shishak that the last-named place was in the south of Judah, and the Egyptian Thupar, which is followed by the determinative of 'writing,' would represent a Hebrew *Sopher* or 'scribe.' As Anab is associated with Kiriath-sepher in Jos 1121 1550, we must conclude that the Egyptian writer has interchanged the equivalent terms Kiriath and Beth, and that the Massorettes have wrongly vocalised the second element in the name of the

city, which should be *sôpher*, 'scribe,' instead of *sêpher*, 'book.' It was a 'city of scribes,' where a library must have existed, filled with clay books inscribed with cuneiform characters similar to those found at Tel el-Amarna, and in the libraries of Assyria and Babylonia. The latter were usually established in the chamber of a temple.*

It is possible that the name of Kiriath-sannah may be found in one of the Tel el-Amarna tablets (*Mittheilungen aus den orientalischen Sammlungen*, iii. No. 199), where we read: 'The country of Gath-carmel has fallen away to Tagi, and the men of the city of Gath; he is in Beth-sani.' This would locate the city in the neighbourhood of Gath.

In the OT Debir is described as in the mountains of Judah, like Socoh and Eshtemoth (Jos 15⁴⁸⁻⁵⁰), and not far from Hebron, from whence Caleb 'went up' to it (v. 15). It was in 'the Negeb' of Judah, and near it were 'the upper springs and the nether springs' of water. After leaving Lachish (*Tell el-Hesi*) and Eglon (*Tell en-Néjileh?*), Joshua marched to Hebron, and then 'returned' to Debir (Jos 10³⁸). Unfortunately, these passages do not enable us to fix the exact position of the city, though the expression 'went up' may imply that it lay to the north. This would certainly have been the case if it is the same as the Beth-sani of the Tel el-Amarna tablet. The identification with the modern Dhâheriyeh (from Arab. *dhahr*, 'back') rests upon a mistaken interpretation of the name of Debir: Petrie found there no traces of anything older than the Roman period.

Debir was taken by Othniel the Kenizzite, in return for which Caleb gave him his daughter Achsah in marriage (Jos 15¹⁵⁻¹⁹, Jg 1¹¹⁻¹⁵). There must consequently be some error in the text of Jos 10^{38, 39}, where it is said that Joshua had already taken Debir, and destroyed all its inhabitants. Moreover, the city of Debir is not mentioned among the confederates in vv. 3, 6, where, on the contrary, Debir is stated to be the king of Eglon.

2. DEBIR (Jos 13²⁶). The border of Debir (or Lidebir) is stated to have formed part of the frontiers of Gad, not far from Mahanaim. If the reading Lidebir is accepted, the place may perhaps be identified with Lodebar of 2 S 9⁴.

3. DEBIR in Jos 15⁷ is described as in the direction of the north-eastern corner of Judah, towards the valley of Achor and Gilgal. The Sept. however, reads *ἐπὶ τὸ τέταρτον τῆς φάραγγος Ἀχάφ*, and the Vulg. has *Debera*. Acc. to Hupfeld (Ps 28²) and Wellh. (*Sam.* 145 n.) *דְּבִירָה* here = westward.
A. H. SAYCE.

DEBORAH (דְּבִירָה 'a bee').—1. The nurse of Rebekah, died on Jacob's return to Can., and was buried under the terebinth ('Allon-bacuth') below Bethel (Gn 35⁸ E). 2. The heroine of the great battle by the Kishon in which Sisera and his allies were defeated (Jg 4 and 5). After a period of oppression and insecurity, which had lasted since the days of Shamgar (Jg 5⁶), and had fallen heavily upon the tribes bordering on the plain of Jezreel, D., a woman of martial and determined spirit, together with Barak, resolved to free their people from the aggressions of the Canaanites. Issachar, their tribe (Jg 5¹⁵), had been the principal sufferer, but could not cope with the enemy unaided. Accordingly, the summons was sent round to all

* A full discussion of the meaning of the name is given by Moore (*Judges*, p. 25 ff.), who formerly connected *דְּבִירָה* with Aramaic *דְּבִירָה* 'border, frontier.' Kiriath-sepher would on this etymology be 'Frontier-town,' a suitable enough meaning. But for phonetic difficulties that stand in the way Moore has now abandoned this derivation.

the tribes,* claiming their assistance in the cause of J' the national God. Ephraim, Benjamin, West Manasseh, Zebulun, Naphtali, with their chiefs, rallied round Issachar; Reuben, Gilead (= Gad), Dan, and Asher refused to respond (Jg 5¹²⁻¹⁸). For the first time after the settlement in Canaan the tribes of Isr. acted in something like a national capacity; it was the genius and courage of D. that instigated this united action. To meet the Isr. confederation, the kings of Canaan, under the leadership of Sisera, marched to the attack; the battle took place in the neighbourhood of Taanach and Megiddo, along the right bank of the Kishon (Jg 5¹⁹). A great storm came on, and the swollen torrent worked havoc among the Can. forces, so that it seemed as if the powers of nature were fighting against them (Jg 5²⁰⁻²²); Sisera had to seek safety in flight. A woman had successfully initiated the war, and a woman brought it to a victorious conclusion. Jael, by a bold stratagem, slew Sisera with a shattering blow from a tent-mallet as he stood drinking in her tent (Jg 5²⁴⁻²⁷).

Such is the history of the event which has made D. famous among the women of the Bible, as it may be gathered from the song in Jg 5. This splendid ode was prob. not written by D. herself; the verbs in v. 7^b are to be rendered by the 2nd pers. rather than by the 1st; cf. v. 12. V. 1 merely says, 'then sang D. and Barak,' a remark due to the later editor. But the song may well be the work of a contemporary, as its style and contents suggest; it may claim, therefore, to be the highest authority for the events which it records.

Another account, a prose version, is contained in chapter 4. The two accounts agree in the main features, but exhibit considerable differences in detail. In 4⁴⁻²² D. is styled both prophetess and judge, while her seat is 'under the palm-tree of D., between Ramah and Bethel, in the hill country of Ephraim,' whither the children of Israel resorted for judgment.

It is here implied that her authority had been long established, and that it extended over Israel ('she was judging Israel at that time,' 4⁴). This generalization of her position reflects the theory of the compiler of Judges—a late writer.† Further, her seat is placed in the S., in the territory of Benjamin, far from the area of the troubles. This necessitates distant negotiations with Barak, and introduces serious difficulties into the narrative. It is possible that D.'s connexion with Ramah and Bethel may be due to a confusion based on Gn 35⁸, for which, again, the compiler may be responsible. We may conclude from 4⁸⁻⁹ that her home was somewhere near Kadesh, the city of Barak; ‡ thus both would belong to Issachar (as 5¹⁵), the chief sufferer under the oppression. See BARAK.

In the prose version (4⁴⁻²² in the main) she is styled a prophetess. Thus, in the manner of prophecy, she announces the plan of the attack (4^{6, 7a}), promises success (v. 7^b), and declares who shall carry off the honours of the victory (v. 9). All these are features not found in ch. 5, and as coming from ch. 4 must be pronounced of inferior historical value.

For the other divergences connected with the mention of Jabin, the position of the battle, the deed of Jael, the authorities must be consulted.

LITERATURE.—Hilliger, *Das Deborah-Lied übersetzt u. erklärt*, 1867; A. Müller, *Das Lied der Deborah*, 1887 (*Königsberger Studien*, 1.); Budde, *Richt. u. Sam.* 66-72, 101-107; M. Vernes

* Except Simeon and Levi. Judah is not mentioned; it had not entered into any close connexion with the other tribes, and was cut off from them by a line of Canaanite strongholds (Jg 1^{28, 35}, Jos 9¹⁷).

† 41-3. 23. 24 51. 31b belong to the Deuteronomical compiler of Judges; his hand may also be traced in 4^{4b} 9²³ 14^a.

‡ Barak = lightning, Lappidoth = flames (4⁴); hence some think that both are names of the same person, and that Barak was Deborah's husband. This is merely a fancy.

3. Deborah (AV Debora), the grandmother of Tobit, To 1⁸. G. A. COOKE.

DEBT, DEBTOR.—A. In OT.—i. *Terms.*—לָוַת in *Qal*, EV borrow, ptcp. borrower, LXX δανίζεσθαι, Vulg. fœnus accipio, mutuo sumo pecunias, mutuor, mutuum accipio; in *Hiph.* EV lend (i.e. cause to borrow), ptcp. lender, LXX δανίζω, ἰδανίζω, ἰδανίζω, Vulg. pecuniam mutuam do, fœneror. לוֹ is also used in the sense of join, and the sense of borrow may be derived from the dependence of the borrower on the lender; but לוֹ join, and לוֹ borrow, may be independent roots of different origin (so Fuerst). לֵוִי *Levi, Levite*, is not necessarily connected with either.

לוֹ (also in form לוֹ) *Qal* and *Hiph.*, EV lend on usury, take usury, exact (usury); *Qal* ptcp. creditor, extortioner, also given in Dt 15² for כַּעַל כִּשְׁוֵה לְרֵךְ 'possessor of a loan of his hand,' in Dt 24¹¹ thy debtor is לוֹ אִתָּךְ אִתָּךְ שְׂכָרְךָ, i.e. 'the man to whom thou are lending,' or 'a creditor.' So Is 24² לוֹ אִתָּךְ, cf. 1 S 22² 'he to whom anyone is a usurer,' i.e. 'one who borrows on usury,' EV the giver of usury to him. LXX ἀπαρτίω, paraphrases with ἀρτίω (owe), and (for ptcp.) δανιστής, and in Is 50¹ ἰδανιστής (debtor). Vulg. commodo, exigo, usuras exigo, and for ptcp. creditor, fœnerator. לוֹ 2 K 4⁷ EV debt, LXX ῥέσους, Vulg. creditor (reading the ptcp.). לוֹ 2 K 4⁷ EV debt, loan, LXX ἐπίληψας, Vulg. debitum.

לוֹ, EV usury, exaction, LXX ἀπαιτήσεις, Vulg. as alienum, exactio. This root has been connected with לוֹ bite, cf. לוֹ in refs. to the nature and effects of usury; or with לוֹ forget, because payment of a debt is remitted for a time (Ges. *Theol.*).

לוֹ (לוֹ = bite) EV usury, LXX ῥέσους, Vulg. usura. In Dt 23²⁰ לוֹ (Eng. 19. 20) the *Hiph.* of לוֹ is used for 'lend on usury,' and the *Qal* for 'borrow on usury.' LXX *Hiph.* ἰκταίνω, *Qal* ἰκταίνω; Vulg. *Hiph.* fœnero, commodo.

לוֹ (לוֹ = bite) EV usury, LXX ῥέσους, Vulg. usura. In Dt 23²⁰ לוֹ (Eng. 19. 20) the *Hiph.* of לוֹ is used for 'lend on usury,' and the *Qal* for 'borrow on usury.' LXX *Hiph.* ἰκταίνω, *Qal* ἰκταίνω; Vulg. *Hiph.* fœnero, commodo.

לוֹ, Ezk 18⁷, EV debtor, Oxf. Heb. Lex. debt, LXX ἐπίληπτος, Vulg. debitori.

לוֹ *Qal*, borrow on pledge, EV borrow, LXX δανίζομαι, Vulg. accipio mutuum; *Hiph.* lend on pledge, EV lend, LXX δανίζω, Vulg. fœnero, mutuum do. לוֹ, anything given as security for the payment of a loan or the fulfilment of any obligation, EV pledge, LXX ἰσχυροσ, Vulg. pignus. In Dt 24¹⁰ a *Qal* denom. occurs = secure (the security). לוֹ עֲרָבִים Hab 2⁶, EV pledge = לוֹ; AV thick clay, Vulg. densum lutum, is due to a mistaken etymology. In Jt 27 *Piel* of לוֹ = twist, bind; so the root = 'borrow,' because the borrower was bound to the lender; but Wellhausen regards לוֹ as an Aram. loan word, and Driver proposes to connect with לוֹ 'hold firmly.'

לוֹ (lit. bind, cf. עָרַב), EV take or lay a pledge, LXX ἰσχυροσ, Vulg. phrases with pignus; לוֹ, EV pledge, LXX ἰσχυροσ, Vulg. pignus.

לוֹ *Qal*, *Hithpa.*, EV be surety, give pledges, mortgage, make a wager, LXX δισχυροσ, Vulg. spondo, fidem facio, fidejussor esto, vadem me offero. לוֹ עֲרָבִים, EV pledge, LXX ἀγγαθῶν, Vulg. arrhabo, pignus. לוֹ עֲרָבִים (Pr 17¹⁸), EV becometh surety, LXX ἰσχυροσ, Vulg. spondo.

לוֹ (ask) obtains from the context the sense of borrow in Ex 22¹⁴, 2 K 4⁷ EV, and similarly the *Hiph.* may = lend in 1 S 1²³ EVm.

ii. *In History.*—1. *Causes of Debt.*—There is no trace in OT of any system of commercial credit. Loans of money or large purchases on credit do not occur as ordinary and natural incidents of trade. Debt (except of the most temporary character, see below on Pledges, and on Gn 38¹⁸; and cf. Ex 22¹⁴) is an exceptional misfortune; it is always the poor man who borrows, Ex 22²⁵. The existence of a developed credit system in Babylonia is no proof of the existence of any similar system in Israel. In such, as in many other matters, it is as precarious to argue from Babylonia to Israel as it would be now from England to Afghanistan. This absence of com-

mercial credit naturally resulted from the fact that the Israelites of the monarchy were not a commercial people, and that their trade was mostly in the hands of the Phœn. and other foreigners. The other ordinary causes of debt must have operated in Israel. Passing exigencies would create debts speedily paid (Gn 38¹⁸); misfortune, extravagance, and suretyship gave rise to more serious indebtedness. Such misfortunes specially arose from failure of crops (Neh 5³), foreign raids, pressure of taxation for the home government or for the payment of foreign tribute (Neh 5⁴). Though debt cannot be said to have been uncommon in Israel,—Is 24² mentions the borrower and the lender as social types,—yet it seems to have been comparatively rare, so that it was never accepted as natural and legitimate. This appears from the paucity of references to debt, and of terms connected with debt, and also from the primitive character of these terms, e.g. 'he who has a creditor' for 'debtor' (1 S 22²).

2. *Leading Cases.*—In Gn 38¹⁸ Judah promises Tamar a kid, and gives her his signet, etc., as a pledge that he will discharge the debt thus created. He forthwith sends her the kid. In 2 K 4¹⁻⁷ a widow's late husband had incurred a moderate debt,—it could be paid by selling a quantity of oil,—his family were still liable for the debt. The creditors were expected to recoup themselves by selling her two sons for slaves. Elisha accepts this as a matter of course, and can only relieve his friend by a miracle. In Neh 5 the farmers are in distress through drought and taxes, they have borrowed money at 1 p. c. per month on their land. (Nowack, i. 354, proposes to read כֶּסֶף for אֶמֶת.) The debtors had defaulted, their lands had been seized, and some had been compelled to sell their children. In response to a solemn appeal from Nehemiah (he and his suite being among the lenders) the lands and interest were restored, possibly the debts were wholly or partially cancelled. The only other mention of actual debt is 1 S 22², where debtors resort to David in his exile.

iii. *In the Law, Prophets, etc.*—The necessity of borrowing is regarded as a misfortune, sometimes a punishment for sin (Dt 15⁶ 23¹² 44), oftener undeserved, and therefore entitling the borrower to assistance. His richer brethren should assist him with loans (Dt 15⁷⁻¹¹), even in view of the approaching year of release (Ps 37²⁶ 112⁵, Pr 19¹⁷); without interest (Ex 22²⁵ [JE], Dt 23²⁰ 21 [Eng. 19. 20], Lv 25³⁶ 37 [H], Ps 15⁵, Pr 23⁸, Ezk 18³⁻¹⁷ 22¹², Neh 5). Nowack, i. 354, and Benzinger, 350, understand that Ex 22²⁵ only forbids excessive usury (B. takes 25³⁶ as gloss, so that the absolute prohibition of interest first appears in Dt. Such prohibitions do not extend to loans to foreigners. No provision is made in the law for the recovery of debt, but non-payment of debt is condemned in Ps 37²¹. Both the law and the prophets are chiefly concerned to protect the debtor. The law restricts the exaction of pledges: a widow's clothing (Dt 24¹⁷), the nether or upper millstone (Dt 24⁶), the widow's ox (Job 24³), should not be taken in pledge. The creditor (Dt 24¹⁰⁻¹³) may not go into the debtor's house to fetch a pledge, but must wait outside till the debtor brings him a pledge of the debtor's choosing (Dillm., Benz.). This pledge would often consist of clothing (Am 2⁶, Pr 20¹⁶ 27¹³, Job 22⁵); and might not be kept overnight (Ex 22²⁶ [JE], Dt 24¹³). Pledges are rather tolerated than approved of; a pious Israelite would not require a pledge (Job 22²⁶ 24⁹), or, at any rate, would promptly restore it (Ezk 18⁷⁻¹⁶ 33¹⁶)—whether with or without payment is not obvious. The law also limits claims on debtors by the laws of Jubilee and of the Seventh Year. In Ex 23¹⁰ 11². (JE) the land is to be released (תִּשְׁקֶטָה 'thou shalt release it'), i.e. left fallow, every seventh year; cf. Lv 25¹⁻⁷ (H). This

provision does not occur in Dt, but Dt 15¹⁻⁶ appoints a release, *שָׁמַח*, of debt every seventh year. This *שָׁמַח* has been understood (a) as a cancelling of interest during the seventh year, which is impossible in view of the absolute prohibition of interest in the immediate context; (b) as *moratorium*, the creditor being forbidden to demand payment during the seventh year, but being allowed to do so at its close; (c) as an absolute and final cancelling of debt, as in Solon's *χρεῶν ἀποκοπή*. In any case, some relief in the matter of debt would be specially welcome for the year during which the land lay fallow. The *שָׁמַח* did not extend to foreigners.

As the debtor or his family might be sold to pay debt (cf. above and Lv 25^{39, 47}, Is 50¹), the provisions for the humane treatment of Heb. slaves, for their release in the seventh year (Ex 21²), or (with the land) at the Jubilee (Lv 25³⁹⁻⁴⁸), are a further limitation of the rights of creditors.

iv. *Actual Practice*.—Apart from Neh 5 and the vague engagement in Neh 10³¹ we do not read of these benevolent laws being observed. Probably, they were never consistently enforced as public law for any long period. When the Jews conceived themselves bound by the letter of the law, they at once devised a means of systematically evading the Deuteronomic *שָׁמַח*. This and other laws represent a standard favoured by public opinion and sometimes observed by generous and pious Israelites (Ezk 18⁷). Creditors generally took pledges, required sureties, exacted interest, and seized the land, family, and person of their debtors. Is 24² mentions the giver and taker of usury as social types. The warnings against suretyship (Pr 6¹ 11¹⁵ 20¹⁶ 22²⁶ 27¹³) indicate severe treatment of debtors; according to Pr 22⁷ the borrower is the slave of the lender, and Jer 15¹⁰ indicates a bitter feeling between borrower and lender quite at variance with the ideal of charitable loans.

B. APOCR. AND NT.—No actual case of debt occurs in either. Both, like OT, inculcate duty of lending and paying (Sir 29, Lk 6^{34, 35}, Ro 13⁸). Mt 6¹² suggests a generous treatment of debtors. Sir 18³⁵ points out the danger of borrowing.

In NT debt occurs chiefly in the parables, The Two Debtors (Lk 7^{41, 42}), the Two Creditors (Mt 18²³⁻³⁵). In the latter we find that, as in Greece and Rome, the slave could have property of his own, and thus become a debtor to his master. The treatment of a defaulter is entirely at his master's disposal. Here too, however, the person of the ordinary debtor may be seized for debt. In the parables of the Talents (Mt 25¹⁴⁻³⁰) and Pounds (Lk 19¹¹⁻²⁷), and the narratives of the Cleansing of the Temple (Mt 21¹², Mk 11¹⁵⁻¹⁸, Lk 19⁴⁵⁻⁴⁸, Jn 2¹²⁻¹⁷), we come upon the advanced commercial system of the Rom. Empire, with money-changers, bankers, and commercial usury, which Christ mentions without condemning. In the parable of the Unjust Steward (Lk 16¹⁻¹³) we trace a credit system in connexion with agriculture. Interest is not condemned in NT.

LITERATURE.—See commentaries on passages cited, esp. Driver on Dt 15¹⁻⁶, and sections on debt in *Heb. Arch.* of Benzinger and of Nowack. W. H. BENNETT.

DECALOGUE.—The law of the Ten Words, virtually a translation of the original Heb. name *עֲשֵׂה וְאַל תַּעֲשֶׂה* Dt 4¹³ 10⁴, cf. Ex 34²⁸) is the most suitable title of the ethical code prefixed to the Sinaitic legislation. The name 'Ten Commandments' is a less accurate rendering, and it prejudices the disputed question as to whether all of the ten words are of the nature of commandments. It is also called the Testimony (*תְּמוּנָה* Ex 25²¹), and the Covenant (*בְּרִית*, Dt 9⁹).

The accounts of the first publication of the D.

contain a variety of extraordinary particulars in attestation of its immediate divine origin and of its sovereign authority. The nation gathered at the foot of Sinai to receive a revelation (Ex 19¹⁷). Amid thunder and lightning, and with the sound of a trumpet, the Lord descended upon the smoking mount (19^{18ff.}), and from thence proclaimed the words of the law in articulate tones in the ears of the terrified people (20¹⁸, Dt 4¹²). The words thus uttered by the very voice were thereafter graven by the very finger of God on two tables of stone (Ex 31¹⁸, Dt 4¹²). These tables, which were broken by Moses on witnessing the temporary apostasy of the people (Ex 32¹⁹), were replaced by another pair on which God had promised to rewrite the former words (Ex 34¹), and which were thereafter deposited in the ark with a view to their safe-keeping and in token of their paramount importance (Dt 10⁵)*.

In consideration of these details, in which so much stress is laid on the authority of the D. and on the precautions taken for preserving it in its purity, it is remarkable that the Pent. contains two versions of it which exhibit not a few, or altogether unimportant, variations—the classic version, as it may be called, of Ex 20²⁻¹⁷, and the less-regarded version of Dt 5⁶⁻²¹. The principal divergences occur in the reasons annexed to the fourth and fifth commandments. Under the fourth Dt founds the duty of Sabbath observance, not upon the example of the God of Creation who rested from His works on the seventh day (Ex 20¹¹), but upon the dictates of humanity and of gratitude. 'Observe the Sabbath-day to keep it holy . . . that thy man-servant and thy maid-servant may rest as well as thou. And thou shalt remember that thou wast a servant in the land of Egypt, and J' thy God brought thee out thence by a mighty hand and by a stretched out arm: therefore J' thy God commanded thee to keep the Sabbath-day' (Dt 5¹²⁻¹⁵). The fifth commandment, in the Deuteronomic text, sanctions filial conduct with the promise of prosperity as well as of long life (5¹⁶). In the tenth, it may be added, Dt has a different order from Ex—the wife being placed at the head of the series, while the coveting of the neighbour's field, which would count for much with a peasant people, is expressly prohibited (5²¹).†

That the Exodus version of the D. is on the whole superior to, *i.e.* older and purer than, the text of Dt, is the opinion of the great majority of modern scholars, including Delitzsch, Dillmann, W. R. Smith, Driver.‡ For this opinion the principal ground is that the variations in Dt are obviously a personal contribution from this author, some being mere amplifications in his wonted style, others instances of the intrusion of his characteristic ideas or expressions (cf. Dillmann, *Exod.* p. 200; Driver, *LOT* p. 31).

* The account in Ex of the Sinaitic revelation is highly composite, and many details of the critical analysis are still unsettled. The Decalogue is imbedded in E, which furnishes most of the matter in Ex 19-24; but this is not decisive as to its date—one section regarding it as derived by E from pre-existing sources (Driver, *LOT* p. 30), while another assumes its intrusion into the E stratum after the formulation of the Decalogue of Dt (Meisner, *Der Dekalog* p. 11). The J narrative is more prominent in Ex 32-34, and has often been alleged to set forth an older summary as the kernel of the legislation (see *infra*). This latter inference, apart from other grounds, is rendered very precarious by the fact that a great part of the original contents of J is no longer before us. The final redaction does not determine whether the words were rewritten by God (Ex 34¹) or by Moses (Ex 34²⁸).

† Other Dt variations are multiplication of connecting particles, and of details (the ox and the ass entitled to Sabbath rest), verbal changes ('observe' for 'remember' in c. 4, 'desire' for 'covet' in the main body of c. 10), and allusive phrases ('As the Lord thy God commanded thee' in cs. 4 and 5).

‡ Wellhausen, however, protests against the *a priori* and consistent preference of the Exod. text; *Comp. d. Hex.*; and evidence that his view is spreading is furnished by the argument of Meisner's painstaking monograph (*Der Dekalog*).

In opposition to the traditional conception of the D. as strictly Mosaic, three theories are widely represented in modern criticism—(1) that it is a prophetic compendium or manifesto belonging at the earliest to the 8th cent. B.C.; (2) that it is in substance Mosaic, but that it was enlarged at a later period by the addition of one or more commandments, or at least (3) of amplifications and sanctions of the original 'words.'

(1) Against the Mosaic origin it is argued that the tradition does not consistently maintain its claim, but alternatively exhibits a summary of a widely different character (Ex 34^{14ff.}) as the Mosaic D. (Wellhausen, *Comp. d. Hex.* p. 331 ff.)*; that the ancient 'Book of the Covenant' shows no acquaintance with its content (Baentsch, *Das Bundesbuch*, p. 92 ff.), and especially that both in general spirit and in detail it is out of harmony with the essentially ritualistic religion of pre-prophetic times (following Wellhausen, Kayser, Smend, Baentsch, *op. cit.* 98). Upon this it is sufficient here to observe that the cardinal assumption of this group of scholars, viz. that the D. was impossible before the prophetic teaching of the 8th cent., exaggerates the part played by the prophets in fixing the character of the OT religion. Assuredly, the prophets did not first enunciate, but inherited, the doctrine that true religion utters itself in morality; and it is an obvious inference from the broad facts of the tradition that this fundamental idea was affirmed by and descended from Moses. That as the founder or reformer of a religion he should have embodied its leading principles in 'terse' sentences is not only possible but probable, and the testimony to the fact that in the D. we possess such a summary is too strong to be set aside in the interests of a historical theory.†

(2) A second group of critics, while holding that 'Moses in the name of J' prescribed to the Israelites such a law as is contained in the ten words' (Kuenen, *Rel. Isr.*, Eng. tr. i. p. 285), support the contention of the first group, that one or more of the commandments are post-Mosaic. The main objection to the Mosaic authorship of c. 4—that it presupposes conditions of agricultural life unlike those under which Moses could have conceived and promulgated it (Montefiore, *Hib. Lect.* p. 554; cf. Smend, *Religionsgesch.* p. 139)—is at the most valid against certain of the amplifications. More serious is the case against the Mosaic origin of c. 2, founded on the facts that its prohibition of graven images was disregarded in the time of the judges and of the early monarchy, that the prophets of the Northern Kingdom offered no opposition to the cult of the

golden calves, and that the prophetic conscience appears first to have revolted against them in the 8th cent. in Judah (Kuenen, *Rel. Isr.*, Eng. tr. i. 283 ff.). To this it is replied, in general, that the non-observance of a religious law is no proof of its non-existence; and, in particular, that as the central sanctuaries possessed no image in the times of Eli, David, and Solomon, the prohibition must have been early operative as a recognized part of the pure Mosaic system (cf. Kittel, *Hist. Heb.*, Eng. tr. i. pp. 248, 249). It may be added that contact with Egyptian idolatry is likely to have made Moses recoil from image-worship. It must, however, be granted that the historical facts are perplexing; and it is at least possible that c. 2 is a development by the prophetic school of a consequence originally only latent in the Mosaic prohibition of the worship of other gods.

(3) A third view leaves undisturbed the tradition that Moses was the author of an essentially spiritual and ethical code of ten precepts, but alleges the probability of this having originally existed in a briefer form, to which from time to time various reflexions and promises were added which strengthened their appeal to the mind and will. On this theory, widely held by scholars since Ewald (*Gesch. Isr.* ii. 231), commandments 2, 3, 4, 5 originally wanted the 'reasons annexed,' while 10 may have stopped at 'house.' It is strongly supported by the variations of the two texts, and seems irresistible in consideration of the fact that c. 4 presupposes acquaintance with Gn 1¹⁻²⁸. It may be added that the terser version gives a better balance to the two tables, and was more suited to the capacity of the popular memory; and in particular that it represents material common to, and thus attested by, the joint testimony of the two divergent recensions.*

The division of the D. into its ten constituent parts has occasioned considerable difficulty. The three systems, as adopted by different religious communities, may be thus represented—

	Greek and Reformed.	R. C. and Lutheran.	Jewish.
God the Deliverer out of Egypt.	Preface	Preface	c. 1.
Prohibition of polytheism	c. 1	} c. 1	} c. 2.
Prohibition of graven images	c. 2		
* * * *	cs. 3-9	cs. 2-8	cs. 3-9.
Prohibitions of covetousness	} c. 10	{ c. 9 { c. 10†	} c. 10.

The second of these divisions, introduced after Jewish precedent by Augustine (*ad Ezecl.*) is slightly supported by the fact that cs. 1 and 2 have a joint sanction, and also by the Dt text of c. 10, but is equally unhappy in combining the two distinct prohibitions of polytheism and idolatry, and in separating the particulars, possibly not original, of the precept against covetousness. The Talmudic division, which treats the preface as the first word, is liable to the objection, not only that it affects the unity of the code, but that the same formula appears elsewhere as introduction or conclusion (Lv 13² 19³⁶). In view of these objections the Greek-Reformed division, represented in antiquity by Philo, Josephus, and many Fathers (Origen, *In Ex. Homilia*, 12), is favoured by the majority of modern critics (Oehler, Ewald, Delitzsch, Dillmann). See also Nestle in *Exp. Times*, June 1897. The original sequence of the 'words' is disturbed in LXX, where the two commandments which bear upon the life of the family (5 and 7) are brought together, and the sixth becomes the eighth. In NT the order is variable, but usually the seventh precedes the sixth (Mk 10¹⁹, Ro 13⁹).

The classification of the commandments is suggested by their distribution between two tables. Obviously, they fall into two groups—(1) the religious (1-4), which define certain duties which man owes to God; and (2) the ethical (5-10), which define certain duties which he owes to his brother man. It has, however, been frequently pointed out that, in the antique mode of thought, filial duty was more closely allied to the religious than

* The so-called Jahwistic D., first indicated by Goethe, has been finally reconstructed by Wellhausen as follows (*Isr. Gesch.* p. 66):—

1. Thou shalt not worship any strange god.
2. Thou shalt not make unto thee molten gods.
3. Thou shalt keep the feast of Unleavened Bread.
4. All the first-born are mine.
5. Thou shalt keep the feast of Weeks.
6. Thou shalt keep the feast of Ingathering in the fall of the year.
7. Thou shalt not mingle leavened bread with the blood of my sacrifice.
8. Thou shalt not retain until the morning the fat of my feast.
9. Thou shalt bring the best of the first-fruits of thy field to the house of J' thy God.
10. Thou shalt not see the kid in its mother's milk.

In Ex the code really contains 12 precepts, hence there is no agreement as to the selection to be made. It may be noted that it is not claimed that it is Mosaic, but only that it is older than the D. of Ex 20 (cf. Smend, *Religionsgesch.* p. 47).

† Of this evidence an important element is the tradition that two tables of stone containing the D. were placed by Moses in the ark (Ex 40²⁰, Dt 10⁵). The arguments used to discredit the tradition are set forth fully by Stade, *Gesch. d. V. Isr.* i. p. 457 ff., where its existence is explained by the supposition that the ark originally contained sacred stones associated with the presence of J'. But surely Mosaism cannot have bequeathed to posterity as its most precious legacy a stone-fetish (see **ARK OF THE COVENANT**).

* The view that the 'torso' was the original D. is assailed by Meisner on the ground that the irreducible minimum of the words of the first table has been 'inundated' by Dt (*Dek.* p. 10), but it is at least as probable that the vocabulary of Dt was enriched by the original D.

† While the R.C. and Luth. Churches agree in subdividing the prohibitions of covetousness, the former makes c. 9 protect the neighbour's wife, the latter his house.

to the ethical obligation, and that the first five commandments may accordingly be suitably grouped as precepts of piety, the last five as laws of probity.

The precepts of piety, which may fairly be assigned to the first table, are on the whole clear. The first, while not unambiguously sounding the monotheistic note, at least excludes polytheism from Israel. The second prohibits the worship of the true God under a visible form—idolatry. That the third had an equally definite aim is probable, and it is a plausible suggestion that its point was directed against the use of God's name in spiritualistic and other magical rites (Smend), though most exegetes make it include various abuses of God's name—as perjury, lying, cursing, and other forms of profanity. In the reasons annexed to the words of this table may be noticed the two remarkable features of c. 2, the profound insight into the law of heredity, and the intimation that the soul of religion is the love of God; the Deut. grounding of c. 4, which breathes compassion towards man and beast; and the confident assertion in c. 5 of the doctrine of temporal retribution.

The laws of probity take under their protection human life (c. 6), the institution of marriage (c. 7), property (c. 8), and character or reputation (c. 9); while c. 10 strikes at the roots of wrong-doing by proscribing the lawless desire. They may be further classified according as they condemn criminality in act (ca. 6-8), in word (c. 9), and in thought (c. 10).

From this brief sketch of the contents of the D. we may obtain an impression both of its greatness and its limitations. Its first distinction is that within the brief compass of the ten words it lays down the fundamental articles of religion (sovereignty and spirituality of God), and asserts the claims of morality in the chief spheres of human relationship (home, calling, society). Its ethical precepts are the most far-reaching and the most indispensable. It is, again, a further testimony to the moral value of the code that it provided forms capable of receiving a richer and fuller content than that which they originally held. But the sovereign distinction of the D. lies less in its exhibition of the foundations of religion and of the landmarks of morality, than in its representation of religion and morality as knit together by a vital and indissoluble bond. The D. is, in brief, the charter of ethical piety, or, in other words, the great pre-Christian advocate for righteousness as the highest form of ritual. In an age of the world's history when popular religion found satisfaction in an ethically indifferent ceremonialism, in a country where Mosaic sanction was claimed for an elaborate system of sacrifices and festivals, the D. excluded from the summary of duty almost every reference to this class of obligations, and made it clear that what God above all required was justice and mercy. Consistently with this, the one religious duty, narrowly so called, which finds a place in the code, is Sabbath observance; for this commandment not only had in view the provision of an opportunity for meditation and worship, but was equally conceived, if we may follow Dt., as a beneficent institution founded in compassion toward the weary and heavy laden.

The limitations of the D. lie on the surface. Its brevity forbids us to expect exhaustiveness, and, as a fact, its ethical requirements may almost all be connected with the single virtue of justice. Wisdom and fortitude, which figure prominently in the Greek scheme of virtue, are not recognized, and even in the prohibitions of adultery and covetousness it is less temperance or self-control than justice that appears to interpose to forbid the sin. Again, it followed from the undisciplined character of the people to whom it was first given, that the D. should be elementary in its teaching. They were children who had need to be taught the first principles of the oracles of God. The demands accordingly are not very high-pitched: with the exception of the tenth, the moral precepts belong exclusively to the region of conduct where actions condemned by the conscience as sins are also punished by the state as crimes. Further, of the ten, eight are prohibitions, two only are positive injunctions. And herein lies the principal limitation of the D. In the main a condemnation of

superstition and crime, and as such of the highest value in the training of a primitive people, it does not meet the demand of the enlightened conscience for a positive moral ideal. For this we must advance to Christ's interpretation or revision of the Decalogue.

The frequent references of Christ to the D. are marked by two main features—(1) a hearty recognition of its divine authority (Mt 5¹⁷); (2) a purpose of so interpreting its precepts as to widen their range and exalt their demands. Its inadequacy as an ideal, due to its preponderantly negative character, He rectified by condensing the law into the two positive commandments to love God with all our heart, and our neighbour as ourselves (Mt 22³⁶⁻⁴⁰). Indeed, so closely did the teaching of Jesus lean on the Mosaic form that it is possible to construct with scarcely a gap the D. according to Christ. The following are the principal additions: C. 1. Thou shalt love the Lord with all thy heart (Mt 22³⁷). C. 2. They that worship, worship in spirit and truth (Jn 4²⁴). C. 3. Swear not at all (Mt 5³⁴). C. 4. The Sabbath was made for man (Mk 2²⁷). C. 5. Duty to parents paramount over other religious obligation (Mt 15⁴⁻⁹). C. 6. Murder includes anger (Mt 5²¹). C. 7. Adultery includes lust (5²⁸). Of c. 8 we have not Christ's exposition, but the absence is readily explained by the fact that c. 10 had already extended the prohibition of theft in the spirit of the teaching of Jesus. Similarly, the false witness of c. 9 is referred to a foul heart (Mt 12³⁴), while the idle is included in condemnation with the calumnious word (12³⁷). Of Christ's definite consciousness of a mission to handle the D. in the light of the final revelation there is further evidence in His announcement of the new commandment of brotherly love (Jn 13³⁴), by which He re-emphasizes the nature of the positive ideal substituted for the warnings of the second table.*

Of the apostolic references to the D. those of St. Paul are most noteworthy. Like Jesus, he employs it as a standard to test conduct and measure wickedness. He supposes the law to have been communicated to Moses through angelic mediation (Gal 3¹⁹, cf. He 2²). What St. Paul held as to the place of the D. in the Christian dispensation is a question of some difficulty. He nowhere draws a distinction between the ceremonial and the moral elements of the Mosaic law, and declares that, while the former are repealed, the latter remain binding: his general thesis is that the law as such has no longer dominion over the Christian (Ro 7⁴). But as certainly it follows for St. Paul that the Christian, while placed in a new attitude to the law, voluntarily and joyfully re-subjects himself to and obeys its ethical commandments. Filled by the Spirit and animated with gratitude, he exhibits towards his fellow-men a measure of love to which it is a small thing to forbear from injustice, as required in the second table of the ancient law (Ro 13⁹).

In Christian theology the D. is commonly regarded as a revelation, or as a republication, of the fundamentals of religion and morality. It is the most important part of the OT or legal economy, and as such was designed to show the path of duty, to deepen the sense of guilt, and to awaken a profound sense of human inability. The question of its continued validity for the Christian, while capable of being diversely grounded, possesses practical importance only in the case of c. 4, where the issue is whether the Sabbath is to be

* The perfection of the D. was a favourite thesis of 17th cent. orthodoxy as against the Socinians and Arminians, who declared that Christian ethics added three principles—*abnegatio nostri, tolerantia crucis propter Christum, imitatio Christi*. The orthodox view was that it did not require to be supplemented or corrected, but only properly interpreted, to furnish the full Christian ideal (see Turretin, *Theol. Elenc. Inst.* Locus 11).

kept as a divine command or as a measure of Christian expediency and a dictate of Christian feeling (see SABBATH). The latter view, energetically maintained by Luther, and favoured in the Federal School of Reformed theology, is most in harmony with the Pauline doctrines of law and Christian liberty. See LAW.

LITERATURE.—Ewald, *Hist. of Israel*; Kuenen, *Religion of Israel*; Oehler's *OT Theology*; W. R. Smith, art. 'Decalogue' in *Encycl. Brit.*; Wellhausen, *Composition des Hex.*; Driver, *LOT*; H. Schultz, *OT Theology*; Smend, *Lehrbuch der AT Religionsgeschichte*; Baentsch, *Das Bundesbuch*; Meisner, *Der Dekalog*; Stade, *Gesch. Turretin, *Institutio Theologiae Elencticae*; H. Grotius, *Explicatio Decalogi*, and Cocceius, *De Sabbato*; for homiletical treatment, to R. W. Dale, *The Ten Commandments*.
W. P. PATERSON.

DECAPOLIS (Δεκάπολις), 'ten cities,' Mt 4²⁵, Mk 5²⁰ 7³¹.—A region of allied cities (see PALESTINE) E. of Jordan in Bashan, but including Bethshean W. of the river. Such leagues existed in other parts of the Roman Empire for purposes of trade and of defence. The mention of swine kept by the people of Decapolis suggests the presence of a Gr. colony; and the region had a Gr.-speaking population, mingled with natives, as early as the time of Herod the Great. The cities of Decapolis, according to Pliny (*HN* v. 18), were Scythopolis (*Beisân*), Hippos (*Susieh*), Gadara (*Umm Keis*), Pella (*Fahûl*), Philadelphia (*Ammân*), Gerasa (*Jerâsh*), Dion (*Adûn*), Canatha (*Kanawât*), Damascus, and Raphana. The region thus included all Bashan and Gilead. In the *Onomasticon* (*s.v.*) it is defined as the region round Hippos, Pella, and Gadara. (Cf. further, Schürer, *HJP* II. i. 94 ff.; G. A. Smith, *Hist. Geog.* 593 ff.)

C. R. CONDER.

DECEASE.—In OT Is 26¹⁴ only, 'they are deceased.' The Heb. is *rēphâ'im* (רִפְּהִים), 'shades,' which RV translates 'they that are deceased' in Job 26⁵, Ps 88¹⁰. See REPHAIM. In NT 'decease' is used as an intrans. vb. in Mt 22²⁵ 'the first, when he had married a wife, deceased' (τελευτώ, 'come to an end,' used with *θάνατος*, Mt 15⁴). Cf. Fuller, *Holy War* (1639), III. x. 132, 'Queen Sibyll who deceased of the plague.' The subst. is found Lk 9³¹ 'his decease which he should accomplish at Jerusalem,' and 2 P 1¹⁵ (both *ἐξόδος*, *exodus*, 'outgoing'; used of death also Wis 3⁷, Sir 38²³; cf. *εἰσόδος*='entering into' the world, Ac 13²⁴).

J. HASTINGS.

DECEIT.—The misleading of another by word or deed, in which case it is equivalent to falsehood (Pr 14²⁵, Hos 12⁷); or the overreaching of another, as when a false balance is used. Every kind of wickedness, as a rule, involves deceit, since the just and holy must be assumed as a mask, in order to gain credit with men, and make the accomplishment of the evil design possible (Pr 12²⁰ and 26²⁴). D. shows itself not merely in isolated acts, but also as a settled habit of mind (Jer 23³⁶). It is so characteristic an element of evil that it is frequently used in Scripture as synonymous with it (Ps 119¹¹⁸, Jer 7⁵).

W. MORGAN.

DECEIVABLENESS.—Only in 2 Th 2¹⁰ 'With all d. of unrighteousness' (RV 'deceit'). The adj. 'deceivable' also occurs only once, Sir 10¹⁵ 'a d. seed.' The meaning is 'able to deceive,' 'deceitful'; and that is the usual meaning of the words, as 2 P 1¹⁶ Tind. 'we followed not deceivable fables,' and Gouge (1653) on He 3¹⁴ 'Sin prevails the more by the deceivableness thereof.' But Milton uses the adj. in the sense of 'liable to be deceived' in *Samson Agonistes*, 942, 'blind, and thereby deceivable.'

J. HASTINGS.

DECENTLY.—'Decent' and 'decently' have deteriorated with use. From Lat. *decens*, they expressed originally that which is becoming, as Latimer, *1st Serm. bef. Edw. VI.* (1547) 'God teacheth what honoure is decete for the kynge'; and generally that which, by being seemly, adds lustre, hence comely, handsome (cf. Lat. *decus*), as Pref. to *Pr. Bk.* (1549) 'this godly and decent Order of the ancient Fathers'; Bacon, *Essays*, p. 177, 'the Princippall part of Beauty is in decent motion'; Milton, *Il Pens.* 36—

'And sable stole of cypress lawn
Over thy decent shoulders drawn.'

Now, the meaning is no more than 'fair,' 'passable,' as Darwin, *Life*, i. 151, 'If I keep decently well.' In AV 'decent' does not occur, and 'decently' only 1 Co 14⁴⁰ 'Let all things be done d. and in order,' for which all previous VSS have 'honestly,' after Vulg. *honeste*, Luther *ehrlich* (Gr. *εὐσχημῶς*, which occurs also Ro 13¹³, 1 Th 4¹², where all Eng. VSS have 'honestly,' with 'decently' in AVm of Ro 13¹³).

J. HASTINGS.

DECISION.—1. The decision of questions of right between man and man necessarily depends on the form of authority recognized in each successive stage of society. In the nomadic condition a patriarchal government is tempered by custom and the counsels of tribal headmen. It can scarcely be altogether as a reflection from later times, that Moses continually appears in the Pentateuch accompanied by elders. The appointment of the 70 is distinctly described as designed to afford relief to the leader in the decision of cases of dispute between Israelites (Nu 11¹⁶⁻¹⁷). The judges appear as dictators, who would necessarily add to their military rule the administrative and judicial functions that accompany supreme power, though the local influence of heads and families must always have tempered their authority. It is as judge to settle disputes that Samuel is represented as making his annual visitation of Bethel, Gilgal, and Mizpah (1 S 7¹⁶, which is of late origin). The kings of Judah and Israel were supreme judges. A judicial decision is the typical instance of Solomon's wisdom (1 K 3¹⁶⁻²⁸). After the Captivity, since the Jews were now a subject race, the supreme authority for the decision of important cases rested with an alien government; but the transformation of the nation into a Church led to the private settlement of internal affairs on the advice of the scribes. The development of the synagogue may have given shape to this method, the local court of elders settling minor cases. The formation of the Sanhedrin at Jerus. as both a civil and an ecclesiastical court led to the decision there of cases affecting Judæa, though with various powers at different times, the Romans recognizing the legal authority of this court, but requiring cases of life and death to be referred to the procurator (Jn 18³¹). Our Lord instructed His disciples to avoid litigation and to settle disputes with their brethren privately, or, if that were impossible, by reference to the Church as a court of judgment (Mt 18¹⁷). St. Paul expostulated with the Corinthians for resorting to the heathen law courts on account of quarrels among themselves, directing them to appoint their own judges within the Church (1 Co 6¹⁻⁶).

2. The decision of questions of perplexity in early times was determined by casting lots, with the conviction that what seemed to be chance with man was really directed by God (Pr 16³³). This method was employed in the division of the land (Jos 14², P), and in the cases of Achan (Jos 7¹⁴), Saul (1 S 10²¹), Saul and Jonathan (14⁴²). The Urim and Thummim and the ephod seem to have been used for casting lots (Ex 28³⁰, Nu 27²¹, 1 S 28⁶). This method of decision was missed at the restoration,

but its recovery anticipated (Ezr 2⁶³, Neh 7⁶⁵). The prophets, however, did not encourage it. Under the influence of the inspiration they enjoyed, the oracle was obtained more directly. Thus, unlike the choice of Saul, the choice of David was made by means of the prophetic spirit in Samuel (1 S 16¹⁻¹³). Kings would resort to prophets for advice on questions of going into battle, etc., e.g. the case of Ahab and Jehoshaphat, in which the contrast between the lying spirit of the false prophet and the true spirit of the genuine prophet of Jⁿ is illustrated (1 K 22¹⁻²⁸). The decision of the prophet is clearly distinguished from divination, witchcraft, dealings with familiar spirits, and attempts to consult the dead—dark practices which are severely condemned (Dt 18⁹⁻¹²). In NT the lot reappears, not only in the case of the division of the garments of Jesus among the Rom. soldiers (Mk 15²⁴, Lk 23³⁴, Jn 19²⁴), but also in a solemn decision of the Christians as a means of obtaining a successor to Judas. In this case, however, it only decides between two men, each of whom has been chosen after careful investigation has proved him to possess the qualities essential to apostleship, and then with prayer for divine guidance (Ac 1²¹⁻²⁶). Doubts have been thrown on the wisdom of this course. It is a significant fact that it never seems to have been followed in subsequent elections of church officers in the apostolic Churches.

For Valley of Decision see JEHOSEPHAT (VALLEY). W. F. ADENEY.

DECK.—To deck (=Lat. *tegere*, Ger. *decken*, Eng. *thatch*) is simply 'to cover,' hence the 'deck' of a ship. Thus Cov. has (Hag 1⁹) 'Ye decke youre selves, but ye are not warme' (Gen., AV, and RV 'Ye clothe you'). In this sense possibly is Pr 7¹⁶ 'I have decked my bed with coverings of tapestry' (דִּקְרָה, LXX *traka*, Vulg. *intexui*). But Luther has 'Ich habe mein Bette schön geschmücket, Wyc. 'I have arayed,' and it is certain that by 1611 'deck' had taken on the sense of *decorate*, no doubt through confusion with that word, with which it has no proper connexion. Thus *Pr. Bk.* (1552) Com. Service (Keeling, p. 191), 'when a man hath prepared a rich feast, decked his table with all kind of provision, so that there lacketh nothing but the guests to sit down.' In this sense 'deck' is used elsewhere in AV.

J. HASTINGS.

DECLARE, DECLARATION.—The oldest meaning of the vb. 'declare' is to make clear (*de-clarus*), explain, expound, as in the Title of Tylle's ed. of Tindale's NT, 'declaryng many harde places conteyned in the texte.' So perhaps Dt 1⁵ (see Driver). Elsewhere in AV 'declare' is the tr. of a great number of different Heb. and Gr. words, but its meaning is probably never more precise than 'make known,' as Ps 50⁸ 'the heavens shall d. his righteousness,' Ac 17²³ 'Whom therefore ye ignorantly worship, him d. I unto you' (RV 'set forth'), Ro 1⁴ 'declared to be the Son of God with power . . . by the resurrection from the dead.' And this is the meaning of **declaration** in its few occurrences, Job 13¹⁷, Est 10² (RV 'full account'), Sir 43⁵, Lk 1¹ (RV 'narrative'), 2 Co 8¹⁹ (RV 'to shew').

J. HASTINGS.

DECLINE.—In AV to 'decline' is always (except Ps 102¹¹ 109²³) used in the original but now obsolete sense of 'turn aside.' Thus, Job 23¹¹ 'His way have I kept, and not declined' (RV 'turned not aside'); Ps 119⁵¹ 'yet have I not declined from thy law' (RV 'swerved'); so 119¹⁵⁷; Pr 7²⁵ 'Let not thine heart decline to her ways' (so RV). In Ps 102¹¹ 'My days are like a shadow that declineth,' and 109²³, the image is of the shadow which lengthens as the sun goes down, till at last it vanishes into night. RV adds Jg 19⁸ 'until

the day declineth' (see AVm), 2 K 20¹⁰ 'It is a light thing for the shadow to decline ten steps' (AV 'go down'), and Jer 6⁴ 'the day declineth' (AV 'goeth away'). Tennyson combines both meanings (*Locksley Hall*, l. 43)—

'Having known me, to decline

On a range of lower feelings and a narrower heart than mine.'

J. HASTINGS.

DEDAN, דִּדָּן, LXX Δαδάν, Δεδάν (in Is, Jer, Ezk, Δαιδάν), according to Gn 10⁷, a son of Raamah, one of the sons of Cush. In Gn 25³ he is named along with Sheba, as in Gn 10⁷, but is represented, not as a Cushite, but as a Keturæan. Dedan is in this latter passage a son of Jokshan, son of Abraham by Keturah; but according to Josephus (*Ant.* i. xv. 1) he was the son of Shuah (or Sous), another of Keturah's sons. The Shuhites were neighbours of the Temanites (Job 2¹¹) in North-Western Arabia. There are traces still of the ruins of a city Daidan in that region, and the Sabæan inscriptions mention the Dedanites as a tribe in that neighbourhood.

The Dedanites are represented as an important commercial people, carrying on an extensive caravan trade with Damascus and Tyre. They frequented the highway that ran through the Arabian desert as they journeyed northward with their wares, and when driven back by a hostile force they were thrown upon the charity of their southern neighbours of Tema (Is 21¹³). According to Jeremiah (25²³) they formed an Arabian tribe alongside of Tema and Buz, and were accustomed on their business journeys to pass through the land of Edom. The Dedanites share in the judgments which fall upon the Edomites and upon the kings of Arabia. In all these prophetic passages, as in the OT generally, Arabia designates, not the whole of the peninsula now known by that name, but merely the northern part, colonized by the Ishmaelite and Keturæan descendants of Abraham. In Jer 25²³ the reference to Dedan follows immediately upon the mention of the kings of Tyre and Sidon, and the coast beyond the sea. This does not seem to require the locating of Dedan by the sea-coast. The connexion with Tyre is quite sufficient to justify such an arrangement. Besides, the order in which the countries and peoples are named in vv. 20-26 is evidently in a broad way from west to east, with an excursion midway northward and then southward, from Edom to Tyre and back again to Arabia. In Ezk 25¹³ Dedan is described as forming the extreme south of Edom, as Teman represents the farthest north. This may only mean that the country of the Dedanites constituted the southern frontier of Edom. The destruction of all Edom is described as a desolation extending from Teman to Dedan. In Ezk 27²⁰ Dedan is spoken of as carrying to the market of the wealthy and luxurious Tyre precious cloths for chariots or saddle cloths for riding. From the place which it occupies in this passage, it is evidently to be regarded as a country of Northern Arabia. If we accept the correction of some of the ablest modern critics in the reading of v. 19, we find the mention of Dedan preceded by a reference to Southern Arabia; while v. 21 names Arabia, in the narrower acceptance of Northern Arabia, and the princes of Kedar. This precisely suits the locality assigned in other passages to the Keturæan Dedanites.

Considerable difficulty has arisen over the only other allusion to Dedan in the OT, to which we have not yet referred. In Ezk 27¹⁵ we read: 'The men of Dedan were thy traffickers; many isles were the mart of thine hand: they brought thee in exchange horns of ivory and ebony.' The ivory and ebony are represented as tribute due to the supreme importance of Tyre as mistress of the

commercial world. There is no reason why the Dedanites of Northern Arabia should not have acted as intermediaries in transporting to the western markets the products of the far East. But the mention of the isles is supposed to make the assumption of a Dedanite people on the sea necessary. The LXX reads *Rhodiens*, R (7) and D (7) in the writing of Heb. being easily mistaken for one another. In this case, however, it has all the appearance of a correction made by the Gr. translators, so as to make the whole verse refer to islands and islanders. But the order in which the names are given in this passage seems unfavourable to such a view. The list of those who brought their goods to the market of Tyre begins with Tarshish in the far West, passing on to Javan, Tubal, Meshech (Asia Minor and the coasts of the Black Sea), Togarmah (Armenia). With Dedan there is clearly a fresh start made, whether we understand it of Rhodes or of a part of North-Western Arabia. But if in v. 16 we read Edom instead of Aram (Syria), where again only the interchange of R and D is required, we have in vv. 16-18 the order from south to north (Edom, Judah, Damascus). Seeing, then, that Dedan lay south of Edom, it would form the appropriate starting-point for this second list.

Thus in all the prophetic passages the only theory that easily and naturally fits into the text is that which places Dedan on the south border of Edom, and regards the Dedanites as a Keturaean tribe, occupying a position alongside of other allied tribes in the north-west of Arabia. The only trace, therefore, that we have of a Cushite Dedan is in Gn 10⁷. It is quite impossible to conjecture with any confidence how it came about that both Sheba and Dedan should be names recurring in two families so far removed from one another as that of the Cushite Raamah and that of the Keturaean Jokshan. Possibly, a branch of the Keturaean Dedanites may have settled among Cushites near the Persian Gulf, and, while retaining their ancestral name, may have been included in the genealogy with their Cushite neighbours. It is, however, difficult to assume that the same had happened with respect to the sons of Sheba.

The Dedan of the Edomite border is placed by Eusebius in the neighbourhood of Phana on the east of Mount Seir, between Petra and Zoar, the ancient Punon or Phunon, at which the Israelites encamped during their wanderings (Nu 33^{42a}).

LITERATURE.—Besides Dillmann and Delitzsch on Gn and Is, and Davidson on Ezk, see Winer, *Realwörterbuch*,³ 263 f., whose article is much more satisfactory than those of Steiner (Schenkel, *Bibeleicon*, 1. 595 f.) and Kautzsch (Riehm, *Handwörterbuch*, 266). See also Hommel, *Anc. Heb. Trav.* 239 f.

J. MACPHERSON.

DEDICATION.—The idea of withdrawing (persons, places, things) from a common and setting apart to a sacred use, which seems to be the original connotation of the important Sem. root קדש , is embodied in various expressions of EV, such as consecrate, dedicate, devote, hallow (holy, etc.), sanctify. Of the first two we may say that the general usage is to apply 'consecrate' and 'consecration' to the setting apart of persons, and 'dedicate' and 'dedication' to the setting apart of things. Accordingly, we read of silver being 'dedicated unto J' (Jg 17⁸), so that it could no longer be used for other than sacred purposes, of 'vessels of silver, and vessels of gold, and vessels of brass (קדש)' so dedicated or set apart by David (2 S 8^{10, 11} = 1 Ch 18^{10, 11}, 1 K 7²¹ = 2 Ch 5⁴), just as we read of the dedication of a bowl 'of the first (quality) of copper (קדש)' to Baal-Lebanon (CIS, Tab. iv.; cf. Meshah's inscription, lines 17, 18, קדש vessels of J' dedicated to Chemosh). The same Heb. word is used of the dedication of the 'tent of meeting' (Ex 29⁴⁴, EV 'sanctify'), of the altar of burnt-

offering (Ex 29³⁶), and of other parts of the furniture (Ex 40¹⁰), all as described in Lv 8^{10a}. In another ref. to this dedication (so EV, but RVm dedication-gift, Nu 7^{84, 88}) we first meet with the קדש *Hanukkah* (for wh. see Dillmann *in loco*, Jo. Selden, *De Synedrüs*, 1679, bk. iii. p. 148 ff., and the next art.). Other dedication ceremonies in OT are the dedication of Solomon's temple, related in detail, 1 K 8 (where note v. 63 קדש , *évkalúvov*, EV dedicate, but v. 64 קדש , *ήγλασεν*, EV hallow), the dedication of the second temple (Ezr 6^{16, 17})* and of the wall of Jerusalem (Neh 12²⁷). The last passage is of interest, moreover, as showing that the completion of buildings of a more secular character was also the occasion of a dedicatory service. That this holds good, even of a private house, is to be inferred from Dt 20⁶. For much curious information on this practice among other ancient peoples, and on its continuation in later times, see Selden, *op. cit.* (cf. CONSECRATION).

A. R. S. KENNEDY.

DEDICATION, THE FEAST OF THE (τὰ ἐγκαίνια Jn 10²², δ ἐγκαίνισμός τοῦ θναυστηρίου 1 Mac 4⁶⁹), was instituted by Judas Maccabæus (B.C. 164) in commemoration of the purification of the temple and altar after they had been polluted by Antiochus Epiphanes (1 Mac 4⁶⁹). It was to be 'kept from year to year by the space of eight days from the five and twentieth day of the month Chislew' (about the time of the winter solstice). The Feast of the Ded. is only once mentioned in NT (Jn 10²²), and in this passage there is an incidental reference to the season of the year, apparently to explain why it was that Jesus was walking under cover instead of in the open air. This is one of the numerous instances in which the author of the Fourth Gospel shows a close acquaintance with Jewish customs. Westcott thinks that the title chosen by our Lord in Jn 9⁶ may refer to the lighting of lamps at this feast, no less than to the ceremonies of the Feast of Tabernacles. This illumination was so prominent a feature in the Feast of the Ded. that it was sometimes called the Feast of Lights (Jos. *Ant.* XII. vii. 7). Josephus, however, does not mention the illumination in private houses, which has been a marked feature of the feast from the end of the 1st cent. to the present time. According to Maimonides, every house should set up at least one light. Those who did honour to the command should set up a light for each person in the house, and those who did more honour still should begin with one light for each person, and double the number each night (Lightfoot, *Hor. Heb. in loc.*). Another school directed that eight lights should be used on the first night, and the number diminished by one each night. The feast lasted eight days. The reference in 2 Mac 10⁶ seems to show that the points of resemblance between some of the ordinances of this feast and the Feast of Tabernacles were not accidental, but were designed from the first. The Feast of Dedication, however, was unlike the great feasts, in that it could be celebrated anywhere and did not require the worshipper to go up to Jerusalem.

The words of the Jews in Jn 10²⁴ would naturally be suggested by the direction which this feast would give to men's thoughts. The hymn which is at present used in Jewish synagogues during its continuance records the successive deliverances of Israel, and contains a prayer for yet another.

J. H. KENNEDY.

DEEM was once in freq. use, but is now almost extinct. Even in AV it occurs but twice, Wis 13² 'deemed either fire or wind or the swift air, or the

* The title of Ps 80 most probably refers to the dedication by Judas Maccabæus (see Baethgen *in loco*, and next art.).

circle of the stars, or the violent water, or the lights of heaven, to be the gods which govern the world' (*ἐνόμισαν*, RV 'thought'), and Ac 27²⁷ 'the shipmen deemed (*ὑπερόουν*) that they drew near to some country,' though Wyclif has the word and its cognates often, and uses it with fine effect. Thus 1 Co 11^{29, 31, 32} 'for he that etith and drynkith unworthili etith and drinkith *dome* to hym, not wiseli *demyng*e the bodi of the Lord. And if we *demed*en wiseli us silf we schulden not be *demed*, but while we ben *demed* of the Lord we ben chastid, that we be not *dampned* with this world.' RV gives 'surmised' for 'deemed' in Ac 27²⁷, but 'deemed' for 'as' in Ezr 2⁵², Neh 7⁵⁴ 'therefore were they deemed polluted and put from the priesthood' (Heb. simply 'and were polluted from the priesthood'). J. HASTINGS.

DEEP.—The adj. is used fig. in the sense of 'profound' without any thought of malevolence, as Ps 92⁵ 'Thy thoughts are very deep'; Ec 7²⁴ 'that which is far off, and exceeding deep' (*כִּבְיָ עֲבֵי* 'deep, deep'); Is 29¹⁵ 'woe unto them that seek deep to hide their counsel from the Lord' (*סֵתֵרְתֵם*); Dn 2²² 'He revealeth the deep and secret things'; 1 Co 2¹⁰ 'the deep things of God' (Wyclif's tr.; Tind. 'the bottome of Goddes secretes,' so Cranmer, Geneva (1557); but Gen. 1560 restored 'the deepe things of God,' and so Bishops'; Rhem. 'the profundities of God'). Cf. Bacon, *Essays*, 'the more deepe and sober sort of Politique persons.'

'Deep' is a common subst. in Shaks. and others of that day, and is often used figuratively, as *Jul. Cæs.* IV. iii. 226—

'The deep of night is crept upon our talk.'

But in AV where 'the deep' is not the sea, it refers to the waste of waters (the primitive *têhôm*), or to the bottomless pit. The Heb. words are *תְּהוֹמ* *têhôm*, as Gn 1² 'darkness was upon the face of the deep' (see COSMOGONY); *זוּלָתָה* *zûlâh*, Is 44²⁷, and *מְזוּלָתָה* *mêzûlâh*, Job 41²¹, Ps 69¹⁵ 107²⁴, or *מְזוּלָתָה* (*mêzûlâh* in the plu. 'deeps'), Neh 9¹¹, Ps 88⁶. The Gr. words are *ἀβύσσος* (see ABYSS), *βῆθος*, Lk 5⁴, 2 Co 8²; and *βυθός*, 2 Co 11²⁵.

Deepness, now almost replaced by 'depth,' is retained from Wyc. in Mt 13⁸ 'they had no deepness of earth' (RV retains, and restores 'deepness' to the par. passage Mk 4⁵, which Wyc. had also; Tind. has 'depth' in both places). J. HASTINGS.

DEER.—See FALLOWDEER.

DEFECTIVE.—Sir 49⁴ only, and the meaning is 'guilty of wrongdoing,' 'All, except David and Ezechias and Josias, were defective: for they forsook the law of the Most High' (*πλημμελείαν ἐπλημμέλησαν*, lit. 'erred an error,' i.e. acc. to the Heb. idiom 'erred greatly,' RV 'committed trespass.' The same Gr. is found in LXX Lv 5¹⁹, Jos 7¹ 22^{20, 31}). Bissell (*in loc.*) says 'were defective' is not strong enough. Nor is it now, but in older Eng. it was used for positive transgression or wrongdoing, as *Act 10 Henry VIII.* 1518, 'Persons . . . so founded defective or trespassing in any of the said statutes.' 'Defect' in the mod. sense of a shortcoming is given by RV in 1 Co 6⁷ (*ἡττημα*, AV after Wyc. 'fault,' Gen. 'impatience,' RVm 'loss': see Sanday-Headlam on Ro 11¹²).

J. HASTINGS.

DEFENCED is used in AV (only of cities) where we should now say 'fortified,' the Heb. being either the vb. [צָר] *dâzar* (Is 25² 27¹⁰ 36¹ 37²⁶, Ezk 21²⁰) 'to cut off, render inaccessible,' or the subst. *מִבְּחָזָר* (*mibhâzar* (Jer 1¹⁸ 4⁵ 8¹⁴ 34⁷, always with *עָר* 'er, city), 'a place cut off.' RV gives 'fenced' in Is 36¹ 37²⁶ and in Jer 4⁵ 34⁷; Amer. RV has 'fortified' in all the passages. J. HASTINGS.

DEFER.—From *dis* apart, and *ferre* to carry, to defer is properly 'to put aside,' and this meaning is found in early English. The mod. meaning is 'to put off to another occasion,' 'to postpone'; but in older Eng. the word was loosely used in the general sense of 'put of,' 'delay,' as Dn 9¹⁹ 'defer not, for thine own sake, O my God' (*אַל-תְּאַחַר* 'delay not,' 'tarry not,' the vb. is never used in the sense of putting off to another occasion; so Gn 34¹⁹, Ec 5⁴); Pr 13¹² 'Hope deferred maketh the heart sick' (*הִקְצַץ* 'drawn out,' 'protracted,' cf. Is 18^{2, 7} where same part of vb. is tr. 'tall' in RV); Is 43⁹ 'For my name's sake will I defer mine anger' (*אַל-תְּאַחַר*, not postpone to another occasion, but delay so as not to vent it at all if possible, so Pr 19¹¹). Delay is the meaning also in Apocr., Jth 2¹³ (*μακρόννω*), Sir 4³ (*παρέλκω*), 18²² (*μείνω*). But in NT (Ac 24²² only) the meaning is postpone to another occasion, viz. to a fuller hearing; the obsol. construction is, however, employed of having a person as the object, 'Felix . . . deferred them' (*ἀνεβδόλερο αὐτούς*). Cf. Rogers (1642), *Naaman*, 137, 'If it seem goode to thy wisdom to deferre me.' RV gives 'deferred' for 'prolonged' Ezk 12^{25, 28} (*שָׁמַר*).

J. HASTINGS.

DEFILEMENT.—See UNCLEANNESS.

DEFY.—When Goliath 'defied' the armies of Israel, it is probable that the translators of AV understood him to challenge them to combat, though the Heb. (*הִתְנַחֵם*) means to *taunt* or *scorn* (so 1 S 17^{10, 25, 26, 45}, 2 S 21²¹ 23⁹, 1 Ch 20⁷). But when Balaam is summoned to Balak's camp with the words (Nu 23^{7, 8}),

'Come, curse me Jacob,
And come, defy Israel,'

it is manifest that 'defy' is used in some other and now obsol. sense. The Heb. (*נִצַּח*) means to be indignant, then express indignation against one, denounce, curse; and that is the meaning the parallelism would require (LXX *ἐπικατάρασα*, Vulg. *detestare*, Luth. *schelten*). Now 'defy' (from late Lat. *dis-fidare*, dis-trust) primarily means to renounce allegiance or affiance, to pronounce all bonds of faith and fellowship dissolved (whence war would generally follow, and so the modern sense of the word). Thus Tindale's tr. of 1 Co 12⁹ 'no man speakynge in the sprete of God defieth Jesus.' This is probably the sense in which 'defy' should be taken in Nu, since it is Tindale's word; though there is a meaning of the word that is closer to the Greek, viz. 'despise,' 'set at nought,' as Olde (1549), *Erasm. Par. Thess.* 4, 'I defie all thinges in comparison of the gospel of Christ'; and a rare use nearer still, viz. 'curse,' as Hall (1548), *Chron.* 52b, 'The faire damoselles defied that daie [at Agincourt] in the whiche thei had lost their paramors.' Geneva and Douay have 'detest' in its old sense of 'denounce.'

J. HASTINGS.

DEGREE.—Late Lat. *degradus* (de down, *gradus* a step) gave Fr. *degré*, whence Eng. 'degree.' So a 'degree' is simply a *step*, whether up or down, and esp. one of a flight of steps, or the rung of a ladder. Thus Chaucer, *Romaunt of Rose*, 485—

'Into that gardyn, wel y-wrought,
Who-so that me coude have brought,
By laddre, or elles by degree,
It wolde wel have lyked me.'

And Shaks. *Jul. Cæsar*, II. i. 26—

'But when he once attains the upmost round,
He then unto the ladder turns his back,
Looks in the clouds, scorning the base degrees
By which he did ascend.'

This is the meaning of 'degree' in AV wherever it occurs in the plur.: the ref. being either to the degrees of Ahaz's dial (2 K 20⁹ *bis.* 10 *bis.* 11, Is 33⁸ *ter.*, see DIAL) or to the Songs of Degrees, (Ps 120-134 titles, see PSALMS) and the Heb. *מַדְבָּר* *ma'dabâr*.

But from signifying a step literally, 'degree' soon passed to express also a step in rank, whence 1 Ch 15¹⁸ 'their brethren of the second d.' (דָּגְרֵי שֵׁנִי, lit. 'the seconds'); 17¹⁷ 'a man of high degree (דָּגְרֵי גָּבוֹהַ), Ps 62⁹ 'men of high d.' (שָׂרֵי צָדִיק); 62⁹ 'men of low d.' (דָּגְרֵי נָּפֶל), Sir 11¹ 'wisdom lifteth up the head of him that is of low d.' (τῶν ἐλαφῶν: so Lk 1⁵², Ja 1⁹); 1 Ti 3¹³ 'they that have used the office of a deacon will purchase to themselves a good d.' (βαθμὸς, lit. 'step,' RV 'standing').

In the last passage the meaning is quite exceptional in the Eng. as in the Greek. The Eng. word is Wyclif's, who has been followed by all the versions except RV. It is simply a literal tr. of the Vulg. *gradus*, itself a literal tr. of the Greek. The Gr. word occurs here only in NT. In the LXX it is used either as tr. of *ma'alah* (2 K 20^{9 bis}, 10 bis. 11) or of *niphthan* (1 S 5⁶), the former being the 'steps' or 'degrees' of Ahaz's dial, the latter the 'threshold' of Dagon's temple: it is also found once in Apocr. (Sir 6³⁶) for the 'steps' of the wise man's door. See further Humphrey's note *in loc.* (*Camb. Bible*), and Hort, *Ecclesia* (1897), p. 202.

J. HASTINGS.

DEGREES, SONGS OF.—See PSALMS.

DEHAITES (AV Dehavites, אֲדַיִתִּים, *Kêrê* אֲדַיִתִּים, Ezr 4⁹).—The Dehaites were among the peoples settled in Samaria by Osnappar, *i.e.* probably the Assyr. king Assurbanipal. They joined with their fellow-colonists in sending the letter written by Rehun and Shimshai to king Artaxerxes, to complain of the attempt made by the Jews to rebuild the walls of Jerusalem (probably about 447 B.C.). The name has been connected with that of a nomadic Persian tribe, the *Δάοι*, mentioned in Herod. i. 125 (Rawlinson), or with the name of the city Du'ûa, mentioned on Assyrian contract-tablets (Fried. Delitzsch); but according to Schrader these identifications are very doubtful. The LXX reads Δαναῖοι (A), but in B the text runs Σουσανναῖοι of εἰσὶν Ἑλαμίται (for 'the Shushan-chites, the Dehaites, the Elamites'; cf. Meyer, *Judenthum*, 36).

H. A. WHITE.

DEHORT.—Only 1 Mac 9⁹ 'they dehorted him, saying, We shall never be able' (ἀποσπέρω); and in the headings of some chapters. 'Dehort' (fr. Lat. *dehortari*) is the opposite of 'exhort.' "'Exhort'" continues, but "dehort," a word whose place "dissuade" does not exactly supply, has escaped us."—Trench, *Eng. Past and Pres.* 179. Ussher (1656) in *Ann.* iv. 24 has 'Exhorting them to observe the law of God . . . and dehorting them the breach of that law.'

J. HASTINGS.

DELAIAH (דְּלַיָּהּ, דְּלַיָּהּ).—1. One of the sons of Elioenai, a descendant of David (1 Ch 3²⁴, AV Dalaiah). 2. A priest and leader of the 23d course of priests in the time of David (1 Ch 24¹⁸). 3. The son of Shemaiah, one of the 'princes' or officers of state at the court of Jehoiakim (Jer 36^{12, 26}). 4. The son of Mehetabel, and father of Shemaiah, who was associated with Neh. in the rebuilding of Jerus. (Neh 6¹⁰). 5. The head of the children of D., who returned with Zerub. from Babylon (Ezr 2⁶⁰=Neh 7⁶²). The name in 1 Es 5⁶⁷ is Dalan.

R. M. BOYD.

DELECTABLE.—Is 44⁹ only, 'Their d. things shall not profit.' AV and RV retain the word from Geneva Bible, which explains, 'Whatsoever they bestow upon their idols to make them to seeme glorious.' But it is the idols themselves that are called 'the d. things' (דְּמִיּוֹתֵיהֶם *hâmûdîm*), which the Bishops' expressed by the (too) free tr. 'the carved image that they love can doe no good.' 'Delectable,' from Lat. *delectabilis*, came in through old Fr., whence came also the form

* Yet *Oxf. Eng. Dict.* quotes from Cheyne, *Isaiah* (1882), p. xx, 'Isaiah had good reason . . . to dehort the Jews from an Egyptian alliance.'

'delitable,' which was afterwards spelt 'delightable' by a mistaken association with *light*; later forms are 'delightful' and 'delightful.' Only the last has held its ground; but 'delectable' is remembered by Bunyan's 'delectable Mountains' (*Pil. Prog.* p. 52); cf. Shaks. *Rich. II.* ii. iii. 7—

'And yet your fair discourse hath been as sugar,
Making the hard way sweet and delectable.'

J. HASTINGS.

DELICACY.—Trench (*Select Glossary*, p. 52 f.) says, 'In the same way as self-indulgence creeps over us by unmarked degrees, so there creeps over the words that designate it a subtle change; they come to contain less and less of rebuke and blame; the thing itself being tolerated, nay allowed, it must needs be that the words which express it should be received into favour too. It has been thus with *luxury*; it has been thus also with this whole group of words.' The words are 'delicacy,' 'delicate' (adj. and subst.), 'delicately,' 'delicateness,' 'delicious,' 'deliciously,' all of which except 'delicious' are found in AV.

Delicacy.—Rev 18³ 'the merchants of the earth are waxed rich through the abundance of her delicacies' (σπρήνος sing., RV 'wantonness,' RVm 'luxury'). 'Delicacies' is Rhemish tr., after Vulg. *deliciae*, so Wyclif; but Tind. and others 'pleasures.' Voluptuousness is the oldest meaning of 'delicacy'; see *Delicate*, and cf. Chaucer, *Former Age*, 58—

'Jupiter the likerous, [=lecherous]
That first was fader of delicacye.'

Delicate.—The adj. has two meanings in AV. 1. *Softly nurtured*, as Sus 21 'Now Susanna was a very d. woman, and beauteous to behold' (τρυφερὸς); Bar 4²⁶ 'my d. ones' (οἱ τρυφεροὶ μου); and probably Dt 28^{54, 56}, Is 47¹ (all נַיָּ, LXX τρυφερὸς), Jer 6² 'a comely and d. woman' (הַיָּפְיָהּ, LXX different reading), and Mic 1¹⁶ (נַיָּ, LXX τρυφερὸς). 2. *Luxurious*, as Wis 19¹¹ 'they asked d. meats' (ἐδέσματα τρυφῆς, RV 'luxurious dainties'); Sir 29²³ 'Better is the life of a poor man in a mean cottage, than d. fare in another man's house' (ἐδέσματα λαμπρά, RV 'sumptuous fare'); and Pr 19¹⁰ RV 'delicate living' (נַיָּ, AV 'delight'). As a *subst.* delicacies occurs Jer 51³⁴ 'he hath filled his belly with my d.' (נַיָּ, Amer. RV 'delicacies'); Sir 30¹⁸ (ἀγαθά, RV 'good things'), 31³ (τρυφήματα, RV 'good things'). Cf. Ps 141⁴ Gen. 'let mee not eate of their delicates' (AV 'dainties'); W. Brough (1650), 'Hunger cooks all meats to delicates,' which Herriek seems to copy (*Country Life*), 'Hunger makes coarse meats delicates.' **Delicately** means 'luxuriously' in the foll. passages in AV, La 4⁵ (נַיָּ), Pr 29²¹ 'he that d. bringeth up his servant from a child, shall have him become his son at the length' (נַיָּ='fondle,' 'indulge'; 'delicately' is Wyclif's tr., who, following Vulg., renders 'who delicatli fro childhed nurshith his seruauit, afterward shal feelen hym vnobeisaunt,' V. *contumacem*); Lk 7²⁵ 'they which are gorgeously apparelled, and live delicately, are in kings' courts' (τρυφή), as LXX La 4⁵, and at 2 P 2¹³ where AV 'riot,' RV 'revel'; 1 Ti 5⁶ AVm 'she that liveth delicately (text 'in pleasure,' Gr. ἡ σπαταλώσα), is dead while she liveth'; and add 2 S 1²⁴ Ja 5⁵ RV. But in Ad. Est 15³ (AVm and RV 'carrying herself d.,' AV 'daintily,' Gr. τρυφεροῦμαι) the meaning is 'as one that was tender' (Cov.), that is, *weak*; and so perhaps 1 S 15³² 'Agag came unto him delicately.'

The last is the only doubtful passage. AV took 'delicately' from the Bishops' Bible; Cov. 'tenderly,' Gen. 'pleasantly.' The Bishops' marg. is 'in bonas,' and RVm 'cheerfully.' The LXX gives τρέμων; Vulg. *pinguissimus, et tremens*, whence Douay 'very fatte, trembling'; Luther, *getrost* (confidently); Ostervald, *gaiement*. The possible ways of taking the Heb. (נַיָּ) are given by Driver (*Notes on Sam.* p. 99), who decides that it is safest, on the whole, to acquiesce in 'delicately,' 'voluptuously.' And, undoubtedly, voluptuously or luxuriously is the most natural meaning of the Heb. (for which see La 4⁵).

but its use in this place is not very apparent. The Eng. expression 'delicately' is probably meant to express weakness and fear (as Ad. Est 15³) rather than pride or voluptuousness.

Delicateness.—Only Dt 28⁵⁶ 'the tender and delicate woman . . . which would not adventure to set the sole of her foot upon the ground for d. (קָדַח) and tenderness,' i.e. not 'weakness,' but 'fineness.' **Deliciously** = luxuriously, Rev 18^{7,9} 'lived deliciously' (σπρηγιάω, RV 'lived wantonly'). Cf. Latimer, ii. 412, 'I am more inclined to feed many grossly and necessarily, than a few deliciously and voluptuously'; and Lk 16¹⁹ Tind. 'a certain rich man, which . . . fared deliciously every daye.'

J. HASTINGS.

DELIGHTSOME, now only poet. for 'delightful,' was once good prose, and occurs in Mal 3¹² 'ye shall be a d. land' (עֵשֶׂת אֶרֶץ). Davies (*Bible Eng.* p. 236) quotes appositely from T. Adams, *Works*, i. 273, 'If this gentle physic make thee madder, He hath a dark chamber to put thee in—a dungeon is more light-some and delightsome—the grave.'

J. HASTINGS.

DELILAH (דִּלְיָה, דַּלַּיִדָּה).—The woman who betrayed Samson into the hands of the Philistines. The account as given in Jg 16 does not say whether she was an Israelite or a Philistine; but she was doubtless the latter, and Sorek, her place of residence, was then within the Philistine territory. Samson often sought her society, and allowed her to gain a great influence over him. That she was his wife is very improbable, notwithstanding that that is the opinion of Chrysostom and other patristic writers. See SAMSON. W. J. BEECHER.

DELOS (Δῆλος), a famous island in the Ægean Sea, has played a part in history quite out of proportion to its tiny size and rocky unproductive character. It was considered to have been anchored by Zeus to the bottom of the sea, and therefore not to be exposed to ordinary earthquakes.* It was the seat of a very ancient and widely-spread worship of Apollo, who, with his twin sister Artemis, was said to have been born there; and the Gr. peoples flocked from a great distance to the annual festival on the island, which is celebrated in the Homeric hymn to the Delian Apollo. The festival of the Virgin on the neighbouring island of Tenos is the modern representative of the ancient feast of Apollo. D., in B.C. 478, was selected as the meeting-place of the great confederacy of Gr. states on the Ægean coasts and islands for defence against the Persians; but after a time Athens, the presiding city of the confederacy, became also its centre. The Athenians treated D. as a rival to their own interests. As Athens became great, D. lost its importance; but when Athens grew weak, D. recovered. During the 2nd and 1st cent. B.C. it became one of the greatest harbours of the Ægean Sea, playing the same part in ancient trade that the island of Syra has played in modern commerce, and being favoured by the Romans after B.C. 190 as a rival to the maritime power of Rhodes. It was a nominally independent state under Rom. protection from B.C. 197 to 167. Then it was punished, for coquetting with Macedonia, with the loss of freedom; it was given to Athens, and its natives fled and settled in Achaia; and the Delian archons came to an end. The island was repopled by Athenian colonists (κληρονομοί), along with many Roman settlers; and henceforth its inscriptions are dated by the Athenian archons; and it was always considered to be part of the Roman province Achaia (which see). The earliest trace of a Roman settler in D. is contained in an inscription of B.C. 250. During the 2nd cent. it became the largest settlement of Roman (or

* An earthquake at D. was considered a specially grave expression of the will and power of the god; see Herod. vi. 98; Thucyd. ii. 8.

Italian) merchants and traders in the Mediter. lands; mainly through their efforts and wealth its rather poor harbour was greatly improved; in their interest it was declared a free port by the Roman state in B.C. 166 in order to strike a blow at their commercial rivals, the merchants of Rhodes; and to satisfy them their other commercial rival Corinth (which see) was destroyed utterly by the Romans in B.C. 146.

Owing to its great importance in the E. Mediterranean trade, D. is mentioned in the list of states to which the Roman government addressed letters in favour of the Jews in B.C. 138–137, 1 Mac 15¹⁶⁻²³; and the inscriptions of D. form the best commentary on that important historical document. D. was the great exchange where the products and the slaves of all the states of the E. were bought for the Italian market, and most of the names mentioned in the passage of 1 Mac occur in the Delian documents. The strange omission of the kingdoms of Pontus and Bithynia in 1 Mac becomes all the more remarkable by comparison with the frequent mention of them at Delos. As Homolle says, 'Among the Orientals who frequented D., the Jews doubtless held a considerable place' (*Bulletin de Corresp. Hellen.* viii. 1884, p. 98); but, as the inscriptions are to a large extent concerned with religious purposes, it is not easy to find the traces of their presence. A decree of the Delians confirming the immunity of the Jews from military service is quoted in full by Jos. (*Ant.* xiv. x. 14).

A frightful calamity brought the prosperity of D., and especially of the Roman settlers, to an end. In the Mithridatic war Athens took part with the king, while D., where the Roman settlers were so numerous, naturally remained true to the Roman interest. After maintaining itself for a short time, D. was captured in B.C. 87 by the enemy; 20,000 Italians were massacred there and in the neighbouring Cyclades; and, when the Romans recovered it in the course of the war, they found it, as Strabo says, deserted. It recovered to a certain extent in the following years; but direct trade between Italy and the E. harbours now became more common; Ostia and Puteoli took the place of D. as the great emporia for the purchase of E. products required in Italy, and under the Roman Empire D. became utterly insignificant.

LITERATURE.—The excavations conducted at Delos for many years by the French School of Athens have thrown a flood of light on the history of the island. An excellent summary and estimate of their earlier results, as published in many scattered works, is given by Jebb in *Journal of Hellenic Studies*, 1880, pp. 7–62. Since then numerous articles in the *Bulletin de Corresp. Hellen.*, by Homolle, S. Reinach, and others, have added much information, especially vi. pp. 1–167, vii. pp. 108–125, 329–373, viii. pp. 75–158, xiv. pp. 389–511, xv. pp. 113–163. See also Homolle, *Archives de l'Intendance Sacrée à Delos*; Schœffer, *de Deli Insule rebus*. W. M. RAMSAY.

DELUGE.—See FLOOD.

DEMAND.—Throughout AV 'demand' is simply to ask, as Fr. *demande*, without the sense of authority. This is manifest from the Heb. and Gr. words so tr^d, which have all this simple meaning. In *Intro.* to Gen. Bible we read, 'The Catechisme, or maner to teache children the Christian religion, wherein the minister demaneth the question, and the childe maketh answer.' See Field, *ON* iii. on Mt 2¹. As a subst. d. occurs only Dn 4¹⁷ with the same simple meaning. Cf. Chaucer, *Troilus*, v. 859—

'And of th' assege (siege) he gan hir eek byseche,
To telle him what was hir opinioun.
Fro that demaunde he so descendeth doun
To asken hir, if that hir straunge thoughte
The Grekes gyse, and werkes that they wroughte.'

Once RV introduces d. in mod. sense (Neh 5¹⁸) for AV 'require' (see Ryle's note). J. HASTINGS.

DEMAS (*Δημάς*, possibly an abbrev. of Demetrius) is described by the Apostle Paul as a fellow-labourer, and unites with him in sending salutations from Rome to the Colossians and to Philemon (Col 4¹⁴, Philem v. 24). In the 2nd Ep. to Timothy (4¹⁰) he is described as having forsaken the apostle when he was awaiting his trial before Nero, because he 'loved this present world.' Whether he was discouraged by the hardships of the Christian life, or allured by the hope of some earthly advantage, and whether his apostasy was temporary or final, we have no means of knowing. Tradition leans to the darker view of his character, and classes him among the apostates from the faith (Epiph. *Hær.* 51).

R. M. BOYD.

DEMETRIUS I., surnamed *Σωτήρ*, 'Saviour,' by the Babylonians in gratitude for the removal of their satrap Heraclides, was the son of Seleucus Philopator. In his boyhood he was sent (B.C. 175) to Rome as a hostage, and remained there during the reign of his uncle, Antiochus Epiphanes. When the Senate several times refused his request to be recognized as the king of Syria, he fled from Rome, with the assistance chiefly of the historian Polybius (Polyb. xxxi.; Justin, xxxiv. 3). Landing at Tripolis, he was joined by large bodies of the people, and even by the bodyguard of his cousin, Antiochus Eupator. Eupator was soon defeated and put to death, and in B.C. 162 D. was proclaimed king (1 Mac 7¹⁻⁴, 2 Mac 14¹⁻²; Jos. *Ant.* xiii. x. 1; Liv. *Epit.* xlvi.). He conciliated Rome by valuable presents (Polyb. xxxi. 23), and, after interfering in the affairs of Babylon (App. *Syr.* 47; Polyb. xxxii. 4), turned his attention to Judæa. Alcimus (wh. see) was established in the high priesthood, and the Syrian lordship was for a time completely renewed. In the seven years that followed, D. again offended the Romans by putting a supporter of his own in the place of Ariarathes on the throne of Cappadocia (Polyb. xxxii. 20; Liv. *Epit.* xlvii.), whilst his tyranny and excesses alienated his own people. Alexander Balas (wh. see) was set up as a claimant to the crown of Syria (B.C. 153); and he and D. competed for the support of Jonathan (1 Mac 10¹⁻²¹; Jos. *Ant.* xiii. ii. 1-3). The former, offering princely rank and the high priesthood, won at the first bid; and when the latter made a further promise of exemption from taxation and investment with privilege (1 Mac 10²²⁻⁴⁵), the people 'gave no credence' to his words, which are very important for the light they cast upon the nature of the imposts exacted by the Syrian kings. The salt tax, the king's share of the crops and fruits, the poll-tax, the pressed service, with a variety of other burdens, were to be remitted, and the expenses of the temple to be met from the royal revenue (see Mahaffy, *Emp. of Ptolemies*, § 117). With the help of the Jews, Balas was able to recover from the reverses he suffered during the two years' war that followed; and in B.C. 150 a decisive engagement took place, in which D. displayed the utmost personal bravery, but was defeated and slain (1 Mac 10⁴⁶⁻⁵⁰; Jos. *Ant.* xiii. ii. 4; App. *Syr.* 67; Polyb. iii. 5; Justin, xxxv. 1; Euseb. *Chron.* ed. Schoene, i. 263 sq.).

R. W. MOSS.

DEMETRIUS II., surnamed *Νικητωρ*, 'Conqueror,' was sent by his father, D. Soter, for safety to Cnidus after the success of Balas seemed probable (Justin, xxxv. 2). For several years he remained in exile; but as soon as the unpopularity of Balas gave him an opportunity, he landed (B.C. 147) with an army of Cretan mercenaries on the Cilician coast. The entire country rallied to him except Judæa, where Jonathan still supported Balas. But Ptolemy Philometor declared in his favour, and their combined forces inflicted a fatal

defeat upon Balas (B.C. 145) on the banks of the Cenoparas, from which event D. derived his surname (1 Mac 11¹⁴⁻¹⁹; Jos. *Ant.* xiii. iv. 8; App. *Syr.* 67; Liv. *Epit.* liii.). Jonathan now set himself to separate Judæa from the Syrian Empire, and besieged the citadel in Jerus.; but D. persuaded him to raise the siege on the addition of three Samaritan provinces to Judæa, and the exemption of the country thus enlarged from tribute (1 Mac 11²⁰⁻²⁷; Jos. *Ant.* xiii. iv. 9). When the excesses of D. had estranged his subjects, Tryphon (Diodotus), a former general of Balas, set up the latter's son as a pretender to the throne; but D. obtained the help of Jonathan by promising the removal of the Syrian garrisons from Judæa, and put down the revolt (1 Mac 11⁴¹⁻⁵²; Jos. *Ant.* xiii. v. 2, 3). On Jonathan's return to Judæa the revolt broke out again, and Tryphon made himself master of Antioch. As D. failed to keep his promise to the Jews, they now took the side of Tryphon, and drove the royal forces out of Coele-Syria (1 Mac 11⁵³⁻⁷⁴; Jos. *Ant.* xiii. v. 5-11). D. withdrew from the S. part of his kingdom; but when Tryphon, who had secured the Syrian crown for himself, attempted to reduce Judæa, Jonathan's brother Simon attached himself to D., and extracted from him a formal recognition of independence (1 Mac 13³⁴⁻⁴²; Jos. *Ant.* xiii. vi. 7). Soon after D. invaded the dominions of the king of Parthia, by whom, in B.C. 138, he was taken prisoner (1 Mac 14¹⁻³; though Jos. *Ant.* xiii. v. 11, Justin, xxxvi. 1, and App. *Syr.* 67, 68, arrange the events in a different order, and support B.C. 140 as the date of the disaster). The imprisonment lasted for ten years, at the close of which D. was liberated by the Parthian king, who was engaged in war with Antiochus Sidetes, brother of D. (Jos. *Ant.* xiii. viii. 4; Eus. *Chron.* ed. Schoene, i. 255). D. recovered the kingdom (B.C. 128), and at once undertook a war against Ptolemy Physkon of Egypt. Ptolemy thereupon claimed the Syrian crown for Alexander Zabinas, who was announced to be the son of Balas (Eus. *Chron.* i. 257), or of Sidetes (Justin, xxxix. 1). D. was conquered by Zabinas at Damascus, and fled to Ptolemais, and thence to Tyre, where in B.C. 125 he was murdered (Jos. *Ant.* xiii. ix. 3), possibly at the instigation of his wife Cleopatra (App. *Syr.* 68; Liv. *Epit.* lx.).

R. W. MOSS.

DEMETRIUS III. (surnamed *Εὐκαρπός*, 'Prosperous,' and on coins Theos, Soter, Philometor, etc.) was a son of Antiochus Grypus, and grandson of D. Nikator. On the death of his father civil wars ensued, in the course of which two of his elder brothers lost their lives, whilst Philip, the third, secured a part of Syria, and D. established himself in Coele-Syria, with Damascus as his capital, by the aid of Ptolemy Lathyrus, king of Cyprus (Jos. *Ant.* xiii. xiii. 4). In Judæa, too, civil war broke out between Alexander Jannæus and his Pharisee subjects. The latter invited the assistance of D. (Jos. *Ant.* xiii. xiii. 5; *Wars.* i. iv. 4), who possibly regarded it as a good opportunity to extend his kingdom to its ancient limits on the West and the South. He entered the country with a large army, was joined by the insurgent Jews, and defeated Jannæus in a pitched battle near Shechem (Jos. *Ant.* xiii. xiv. 1; *Wars.* i. iv. 5). But the desertion of the Jews, who either pitied the plight of Jannæus (Jos. *Wars.* *ib.*) or more probably feared the re-establishment of Syrian supremacy, made it impossible for D. to follow up the victory, and he withdrew to Bercea (Aleppo). The town was occupied by Philip, who, when besieged by his brother, called the Parthians to his aid. D. was in turn shut up closely within his encampment and starved into surrender. He was sent as a prisoner to Arsaces IX., by whom he

was detained in captivity until his death (Jos. Ant. XIII. xiv. 3). The dates of the reign of D. cannot be fixed with precision; but coins of his are known, dated from the Seleucid year 217 to 224, i.e. approximately from B.C. 95 to 88 (Eckhel, iii. 245; Gardner, *Catalogue of Gr. Coins in the Brit. Mus.* 101). R. W. MOSS.

DEMETRIUS (Δημήτριος).—Two persons of the name are mentioned in NT—the ringleader in the riot at Ephesus (Ac 19²⁴), and a disciple commended by St. John (3 Jn v. 12). Both of these dwelt either in Ephesus or its vicinity,—the very name is redolent of Ephesian surroundings, and there is nothing impossible in the suggestion that the agitator had become the disciple of good report, and that, therefore, both references are to the same man. In its contracted form of Demas this is also the name of one who has an unhappy notoriety as a recreant, 'Demas hath forsaken me' (2 Ti 4¹⁰). He is also mentioned in Col 4¹⁴ and Philem v. 24, and it is not certain that St. Paul meant to imply anything like utter apostasy. W. MUIR.

DEMON, DEVIL, Gr. δαίμων, or δαιμόνιον (more frequently), Heb. ַדַּיְמוֹן, Syr. ܕܝܡܘܢܝܢ (cf. Assyr. *šidu*). The supposed Heb. root is [דַּיְמוֹן] 'to

be mighty,' hence 'to rule,' Arab. َدَامَ (cf. َدَمَّ 'to treat violently, to destroy'). **Demoniac**, δαιμονιζόμενος. For 'devil' (properly διάβολος, see SATAN) RV rightly substitutes 'demon' wherever the Greek text has δαιμόνιον.

Both physical and moral evil may be regarded from two standpoints—(1) As existing *in* man physically in the form of bodily disease, or spiritually as moral evil; (2) as having a source *outside* man. It is with physical and moral evil in the latter aspect that we are now dealing. Among the Hebrews, both in pre-exilic and post-exilic times down to a comparatively late period of the Christian era, both moral and physical evil were attributed to personal agencies. This conception of personal evil agencies, that affected man's body and soul, exercised a profound and enduring influence over the minds of Christ and the apostles, and played a very considerable part in the writings of the Church Fathers.

In tracing this conception of evil spirits influencing man to its primitive sources, we shall find that it has its springs in early Semitic ideas which surrounded the Israelite people in the dawn of their history. Baudissin has clearly shown how the demonology of the Græco-Roman period of Judaism emerged out of the earlier polytheism. On this we shall have more to say later on. But it should be noted that that polytheism was itself the outcome of the principle called by Tylor, in his well-known work *Primitive Culture*, by the name 'animism.' Even early mankind instinctively sought for *causes*, and interpreted the forces and other manifestations of nature as *personal*, i.e. as emanating from beings analogous to himself (cf. Siebeck, *Lehrb. d. Religionsphilosophie*, p. 58 ff.). Thus primitive man dwelt in a cosmic society of superhuman agencies, some of which ministered to his well-being and others to his injury. At the dawn of human consciousness man found himself confronted by forces which he was unable to control, and which exercised a baleful or destructive influence. Hurricane, lightning, sunstroke, plague, flood, and earthquake were ascribed to wrathful personal agencies, whose malignity man would endeavour to avert or appease.

The nomadic Arabs of the time of Mohammed believed in the existence of hostile powers or

Jinns, who were held to be the inhabitants of lonely spots, and Mohammed himself recognized their existence just as fully as his heathen contemporaries did. Various names were given to them, viz. *Ghûl*, *Ifrit*, *Sîlâ*, *Alâk*; and we have likewise feminine names. The word *Ifrit*, which occurs so frequently in the 'One thousand and one nights,' is also found in the Korân (Sur. 27. 39), and according to Wellhausen means, like the Heb. ַיְרֵב, 'hairy.'* 'The desert is full of these spectral shapes. Whoever spends his time there as a traveller must steel his heart against them. A child of the desert must be on friendly terms with the wolf and on terms of intimacy with the *ghûl*.' On this subject consult W. R. Smith, *ES*² p. 119 f.

A. THE DEMONOLOGY OF THE OT.—The parallels which we find in OT to the *Jinn* of ancient as well as modern Arabia may now be noted. Isaiah, in an oracle describing the doom of Edom, portrays a scene among Edom's ruined fortresses, when 'one ַיְרֵב (hairy satyr) shall call out to another, and Lilith (the night hag) shall take up her abode' (Is 34¹⁴). This Lilith is a demon of feminine sex. The same mythical creature meets us in the cuneiform inscriptions (see Schrader, *COT* ii. p. 311). In one of the magical texts cited by Hommel (*Semiten*, p. 367) occurs the line (iv. Rawl. 29, No. 1, Rev. 23)—

'The *lilu*, the *lilat*, the handmaid of *Lilu*.'

The Babylonian *lîlātu* or *lîlitu* is placed in this incantation in close connexion with the plague-demon *Namtar*. There can be little doubt that this plague-demon was connected in the popular imagination with the Semitic-Babylonian word *lîlātu*, which means 'night,' and so became a word of terror, denoting the night-demon, who sucked the blood of her sleeping victims. This grim feminine personality became a subject for later Jewish legends (see Sayce, *Hibbert Lect.* p. 146), which multiplied these night-demons (*lîlîn*).

* *Skizzen u. Vorarbeiten*, iii. ('Reste des Arabischen Heidenthums'), p. 135 *ad fin.* But this view appears to me somewhat

doubtful, and the connexion of ِعَفْرِيَّة with ِعَفْر (عَفْر)

'dust,' seems more probable. When we bear in mind the close connexion between the *Jinn* and the serpent according to Arabic belief (see Nöideke, *Zeitschr. für Völkerpsychologie u. Sprachwissenschaft*, vol. 1. 1860, p. 412 ff.; and Baudissin, *Stud. zur Semit. Religionsgesch.* i. 279 ff.), we might connect with this the curse pronounced on the serpent in Gn 3¹⁴ 'Dust thou shalt eat' . . . Winckler, it is true, regards this as simply an expression of dishonour or disgrace, and compares the phrase *lîlātu ipra* in one of the Tel el-Amarna letters (*Autorient. Forsch.* iii. 271). But a hint which we obtain from Doughty's *Arabia Deserta* (i. p. 136) places us on the right track both for the explanation of the word *Ifrit* and of Gn 3¹⁴ 'Malignity of the soil is ascribed to *jan*, ground demons, *ahl el-ard*, or earth-folk.' Malignant demons are believed to inhabit the seven stages of the under-world (ib. p. 259). I should therefore prefer to cite, as an Assyrian illustration of Gn 3¹⁴ the 8th line in the Descent of Istar to Hades, *ašar ipru madu bibussunu akalbunu titu*, 'a place where much dust is their sustenance, mire their food.' Mr. Buchanan Gray of Mansfield College, Oxford, in a letter which he kindly sent to me on this subject, says, 'I have looked through

the article in the *Liedn el Arab* on ِعَفْر, and can find nothing that necessitates giving to *Ifreet* the sense "hairy." I daresay you have noticed that some of the derivatives of the root

ِعَفْرًا, عَفْرَى (in plu.) denote the feathers of the neck, or the mane, or the front hairs of a horse. In the line

cited by Wellh. from *Hudh.* 227¹⁰ عَفْرَارِي (plu. of عَفْرَى) is

used of the hair of women. The feminine of عَفْرَى is عَفْرِيَّة,

whence, according to Arabic lexicographers, عَفْرِيَّة (Ifrit), through quiescence of the *yā*, and subsequent change of the

ة into ث. This is all the connexion with hair which I have yet been able to find, and thus there seems less in favour of connecting *Ifreet* with hairiness, than of your attractive alternative view of connecting it with dust.' In the new ed. (1897) of Wellhausen's *Reste*, see pp. 151 ff., and footnote 1. p. 152.

See Weber, *Syst. der altsynagog. Paläst. Theol.* p. 246; Eisenmenger, *Entdecktes Judenth.* ii. p. 413 ff.

Even conservative critics like Dillmann and König assign Is 34 (together with 35) to a period not earlier than the end of the exile; Cheyne, indeed, would regard it as post-exilic (*Introd. to Isaiah*, p. 205 ff.). In the case of this chapter, as well as 13²-14²³, it is impossible to deny the existence of clear traces of direct Babylonian influence. But the date of authorship of these passages does not determine the question when the belief in demonic personalities embodied in animal shapes first became prevalent in Israel. From the mention of jackals, ostriches, wild cats, and hyenas in connexion with the שָׂרִיפִים 'satyrs,' both in 34^{13ff.} and its parallel 13^{21ff.}, we are led to infer that demons were held to reside more or less in all these animal denizens of the ruined solitude. From Lv 17⁷ we also learn that in post-ex. times sacrifices were offered to שָׂרִיפִים—a practice which is expressly forbidden. On the other hand, the curious rite respecting 'Azazel (אֲזָזֵל), detailed in Lv 16^{8ff.}, formed an integral part of the ceremonies on the great Day of Atonement, and clearly shows how firmly embedded in popular imagination was this belief in evil powers of the solitude. 'Azazel is here an evil spirit, and stands opposed to J'.* See AZAZEL.

The belief that certain animals were endowed with demonic powers, somewhat like the Arabic *Jinn*, must have existed in comparatively early pre-ex. times, since Gn 3¹⁻¹⁹, containing the temptation of Eve by the serpent, belongs to the earlier stratum of J. We might compare with this Nu 22²²⁻³⁴, coming from the same documentary source. But in the narrative of the temptation of Eve by the serpent there is no hint that an evil spirit resided in the serpent. The serpent is identified with it, and we have no suggestion that a demon was able to detach itself from the animal and pass into something else. This was a later development. The animal was itself the demonic power, and the latter is not abstracted or treated as a separable personality.

The Jewish exile, covering the larger part of the 6th cent. B.C. and the close of the 7th, wrought a great change. It is probably to this period that we owe the Heb. word שָׂרִיפִים. This word, occurring in the plural form שָׂרִיפִים in Dt 32¹⁷, like the Aram. שָׂרִיפִים, is probably a loan-word, taken from the Assyro-Babylonian (*sidu*). The word *sidu* in Assy. means good or evil genius, represented in the monuments in the form of a colossal bull. The word occurs only twice in OT (Dt 32¹⁷ and Ps 106³⁷). The Song of Moses (Dt 32) in its present form can hardly be earlier than the time of Jeremiah and Ezekiel (Kuenen). Indeed, its retrospective and didactic character, as well as the references to Israel's past sins of idolatry, would point quite as well to the 6th cent. as to the 7th for the date of its composition. In other words, it may be held, with considerable probability, to reflect the feelings of pious Jews in the exile period.

Now, magic played a very considerable part in Babylonian religion. Magic rests on the basis of a belief in evil and destructive spirits, to whose baleful influences man is daily exposed, and which can be counteracted by certain incantations, whereby the countervailing name and power of the higher beneficent gods are invoked. As Sayce has clearly shown (*Hibbert Lect.* p. 317), magic was closely bound up with medicine, since 'all sickness was ascribed to demoniacal possession; the demon had been eaten with the food and drunk with the

* See Schultz, *Alttest. Theologie* 4 (1888), p. 368; and also Cheyne in *ZATW*, 1895, Heft i. p. 135 ff. The curious rite of sending forth the goat for 'Azazel into the wilderness (Lv 16^{21. 22}) should be compared with the despatch of the bird into the field in the ceremony respecting leprosy (14^{5b}).

water, or breathed in with the air, and until he could be expelled there was no chance of recovery' (p. 310). Specimens of these magical texts may be seen in the translations given in Appendix 3 of Sayce's *Hibbert Lectures*. We subjoin the following specimen:—

'The plague (*namtar*), the fever which will carry the people away,
The sickness, the consumption which will trouble mankind,
Harmful to the flesh, injurious to the body,
The evil incubus, the evil *atu*, the evil *maskum*,
The evil man, the evil eye, the evil mouth, the evil tongue . . .
Against my body never may they come,
My eye never may they injure . . .
Into my house never may they enter,
O spirit of heaven conjure, O spirit of earth conjure.*'

A comparison of this vast system of belief in evil spirits and in incantations, which prevailed in Babylonia, with the later Jewish traditions of demonology, at once reveals the close connexion between the two. During the exile these Babylonian traditions effected an entrance into the Jewish world of ideas, and there became permanently domiciled.

But while שָׂרִיפִים is obviously borrowed from the Bab. *sidu*, its signification was by no means the same. For שָׂרִיפִים is used in the sense of deities of the heathen, אֱלֹהִים אֲחֵרִים. Now, the attitude of ancient Israel towards foreign deities varied considerably in different periods of the nation's history. The continued declension of the people towards idolatry in the pre-exilic times clearly shows that, in the popular mind, belief in the power as well as existence of foreign deities was firmly rooted. Many OT passages clearly indicate this, Jg 6³¹ 9²⁴, Nu 21²⁹ (cf. Jer 48⁴⁶ 49¹), 1 S 26¹⁹, Ru 1¹⁵ 2¹² (see Baudissin, *Stud. zur Semit. Religionsgesch.* Heft i.). In other words, the religion of Israel in early times was henotheism rather than monotheism. In fact, monotheism came very slowly to displace the 'monarchic polytheistic' belief of primitive Israel. It is true that, from the 8th cent. B.C. downwards, the 'other gods' are called 'no gods,' 'emptiness,' 'wind,' 'vanity' (or 'breath'), 'corpses,' and 'dead'; but these are terms which are rather selected to express the utter powerlessness and insufficiency of foreign deities in comparison with the supreme might of J', the true living God of Israel, than to assert their absolute non-existence.†

Accordingly, in the two passages Dt 32¹⁷ and Ps 106³⁷, the word שָׂרִיפִים 'demons' is used to describe the subordinate position, as compared with J', of the Moabite deities, to whom the Hebrews sacrificed in the time of Moses. Baudissin rightly observes in reference to Dt 32¹² 'when in the Song of Moses it is said that J' alone has led Israel, and no strange god (אֱלֹהִים אֲחֵרִים) was with Him, we must merely understand that the active influence of strange gods over Israel is excluded, but that their existence was rather recognized than denied.'

The use of שָׂרִיפִים in these two passages may, in fact, be regarded as the first step taken by Israel in the direction of demonology, under Babylonian

* See Tiele, *Babylon-Assyr. Gesch.* p. 548 ff.; Hommel, *Gesch. Babyl. Assyriens* p. 388 ff. The subject was first comprehensively dealt with in Lenormant's *Chaldean Magic*, about twenty years ago. The latest work is L. W. King's *Bab. Magic and Sorcery, Cuneiform Texts from the Kouyunjik Collections in B.M.*

† Baudissin (*ib.* p. 72) in our opinion errs in holding that, in all passages which describe the victorious conflict in which J' engages with the gods of the heathen, we have merely poetic personification of the latter, e.g. Is 19¹, Jer 46²⁵. The language of Ex 15¹¹ 'Who is like unto thee, O J', among the gods' (אֱלֹהִים), cf. Ps 77^{14ff.} 105³ 96⁴, in which comparison is made between God and the deities of other nations, clearly indicates that some kind of existence and power, however slight, is assigned to the latter. That the terms אֱלֹהִים, דָּבָר, שָׂרִיפִים, אֱלֹהִים אֲחֵרִים, etc., cannot be pressed into signifying the absolute denial of existence, is recognized by Baudissin himself (*ib.* p. 101 *ad fin.*).

influence, the deities of foreign nations being relegated to this subordinate rank, and designated by this term. Elsewhere in OT and in the literature of a later period, we find the deities of the heathen identified with the host of stars. Of this we have an example in the apocalyptic section in Isaiah (24-26), which is placed by many critics, with good reason, in the Greek period, not much earlier than the Maccabean book of Daniel. In Is 24²¹ we read 'And it shall come to pass in that day, that Jⁿ will visit the host of the height in the height, and the kings of the earth upon the earth, and they shall be carried away captive to the pit, and shut up in the prison, and the moon shall grow pale,' etc. This is a fresh development of the old pre-exilic Heb. conception of the heavenly host of attendant personal powers or angels, represented as stars. This belief is reflected in Micaiah's vision (1 K 22¹⁹), Deborah's song (Jg 5^{4, 20}), and embodied in the name $\text{מַלְאָכֵי הַשָּׁמַיִם}$, which frequently recurs in prophetic literature (Am 5²⁷, Is 1^{9 6} etc.),* and thence passed into post-exilic psalm liturgy (Ps 103²¹ 148²). In the apocalyptic passage Is 24²¹, the host of the height are the heathen deities identified with fallen angels. Here, again, the roots of the conception of fallen national deities may be found in the influences of the exile (cf. Is 46¹). It is impossible to mistake the significance of the passage Is 14^{12a}.—

'Oh! how art thou fallen from heaven Lucifer ($\text{לְמַלְאָכֵי הַשָּׁמַיִם}$) son of the dawn!

How art thou hewn down to earth who didst lay peoples low!
And thou saidst in thy heart: To the heavens will I mount up,
Above the stars of God will I set my throne on high' . . .

B. THE DEMONOLOGY OF LATER JUDAISM.—During the Greek period the conception of the gods of the heathen as demons became firmly established, and its development was no doubt largely helped by a growing tendency to assume an intermediate realm of *δαίμονες* (later *δαίμνια*). Its beginnings may be traced even in Hesiod, who made a distinction between *θεοί* and *δαίμονες*—the latter being good, and the survivors of the happy golden race whom the Olympic gods first made. But in the 5th cent. B.C. Empedocles widened the gap between gods and demons. The gods were powerful and good, without appetite or passion; the demons, on the other hand, held a middle position between men and gods, and were the ministers from the latter to the former. These *δαίμονες* lived long, but were not immortal like the gods. They had passions like men, and there existed varying grades among them, some being beneficent and others malignant. It was the demons who communicated dreams and oracles to men, and inspired them towards good and evil (Grote, *Hist. of Greece*, i. pp. 66, 409 ff.). Stoic theology subsequently adopted into its system this conception of an intermediate realm of *δαίμνια*, in order that polytheism, as a moral power, might be rehabilitated. This finds full expression in the 2nd cent. A.D. in such writers as Plutarch, Apuleius, and Maximus of Tyre. The demons stand between men and gods, and all the elements of mythology that were derogatory to the character of the national deities were referred to the demons.

Greek influence, therefore, stimulated the growth of Hebrew angelology and demonology. Intermediate personal agencies became interpolated between the absolute transcendent God and the phenomenal world. As God in His transcendence became removed from participation in the material

* I disagree, however, with Smend in his conclusion that this name was a speciality of prophetic literature, borrowed, as Wellhausen suggests, from Amos (*Lehrbuch d. Alttest. Religionsgesch.*, p. 185 ff.). The origin of the phrase was undoubtedly much more primitive.

world, these mediating personalities became a quasi-intellectual necessity. Accordingly, the LXX renders $\text{מַלְאָכֵי הַשָּׁמַיִם}$ in Ps 95 [Heb. 96]⁵ by *δαίμνια*, and so also עֲרֵיבִים in Dt 32¹⁷, Ps 105 [Heb. 106]³⁷, נָזִי in Is 65¹¹, and עֲרֵיבִים in Is 34¹⁴. Similarly, in the Bk. of Baruch heathen deities are called *δαίμνια* or evil spirits. The Ethiopic Bk. of Enoch designates the gods *Aganent*, 'demons,' while in the proem to the Sibylline books the gods of the heathen are called *δαίμονες ἐν ἄδῃ*. It should be noted, moreover, that both in the Sibylline books and in the Bk. of Enoch the deities are regarded as evil spirits. Philo, on the other hand, who came more directly and completely under Greek influence, occupied an exceptional position. He treats the gods of the heathen as good heavenly powers, identified with stars, in opposition to the prevalent Jewish-Alexandrine conception.* We notice again in To 6^{15a}, the evil spirit Asmodæus is called simply *δαίμωνιον*, and in 38¹⁷ *πνεῦμα δαίμωνιον*. Similarly, in Josephus *δαίμωνιον* is used of the ghostly evil spirit.

The subject of Jewish demonology is too vast to compress into the compass of this article. We shall therefore cite a few only among the salient features which may be gathered from Weber's *System der altsynagog. Paläst. Theol.* § 54.

The ordinary word for 'devil' in later Heb. is

שָׂטָן . Similarly, in the Peshittā ܫܬܢܐ is the rendering of the *δαίμωνιον* of NT.† Another term employed by the Jews was מַשְׁכִּיךְ , meaning 'destructive' or 'injurious ones' (cf. Pael נִיַּק 'injure'). Thus the Targ. renders עֲרֵיבִים in Ps 106³⁷ by מַשְׁכִּיכֵי . In fact, the *πνεύματα ἀκάθαρα* (*πνεύμα*) of NT is merely a rendering of רוּחַ טְמֵאָה or רוּחַ רְשָׁעִים ; and just as רוּחַ רְשָׁעִים is sometimes used by itself to express this, so also in NT with *πνεύματα*.

According to Jewish conceptions, Satan stands at the head of the demons. From *Berachōth* 51a we learn that they form societies or bands which lie in wait for men. The sick, women in menstruation, bridegrooms and brides, those in sorrow, and even disciples ($\text{תַּלְמִידֵי חֲכָמִים}$), are liable to their assaults. According to *Pesachim* 112b the nightly wanderer is specially open to danger, for the night season until cock-crow is the time when demons walk abroad. They surround the house, and injure those who fall into their hands. More particularly, they destroy children who during the night pass outside the house. As soon as the cock crows this power ceases, and the demons return to their place of abode. Also there are special animals which, according to Jewish belief, are united with demons, viz. serpents, asses, bulls, mosquitos, etc. We are here again reminded of the *Sinn* of the desert in primitive as well as modern Arabian belief.‡ 'Don't remain standing,' is the warning of *Pesachim* 112b, 'when the bull comes from the meadow, for Satan dances between his horns.' God alone has power to quell the demons. His protection is always bestowed on the congregation when the priest recites the שְׁמֵרָה of Nu 6²⁴, an expression which, according to *Sifre* 12a, bears special reference to evil thoughts and demons. The protection is afforded by means of the guardian angels whom God assigns to His pious followers. *Berachōth* 40a gives the advice that covenant salt (Lv 2³, Nu 18¹⁹) should be eaten and drunk at every meal as a protection against demons. Certain formulæ or passages from Holy

* Philo also identifies the heroes and demons of Greek speculation with the angels of Moses. His tendency was to rationalize myth, 'In souls and demons and angels we have, it is true, different names, but, in conceiving the thing represented by them all to be one and the same, you will set aside a heavy burden, viz. superstition' (Conybeare in *JQR*, Oct. 1896, p. 79).

† This is the Syr. equivalent of *δαίμων* in Lk 8²⁸, and *δαίμωνιον* (Mt 17¹⁸ etc.), and עֲרֵיבִים (Lv 17⁷, Is 13²¹ 34¹⁴).

‡ Cf. Mk 13³³ ἄνθρωποι ὡς κτήνη .

Writ were considered specially potent against demons. *Berach. 51a* recommends the passage from *Zec 3²* 'The Lord rebuke thee, Satan,' as specially effective against the Angel of Death. *Aboda Zara 12b, Pesachim 112b*, warn the reader against drinking water in the night, for he runs the risk of death, or of the demon *Shabriri*, who can make men blind. The remedy is to strike the water-jug with the lid, and say to oneself, 'Thou N., son of N., thy mother hath warned thee, and said, Guard thyself from the *Shabriri, beriri riri, iri, ri,*' the pronunciation of the name with a syllable short each time being a potent spell to drive the demon away.

We shall now cite an interesting illustrative passage from Josephus (*Ant. VIII. ii. 5*), which is significant because it shows how profoundly the belief in demonology affected even the most cultivated and cosmopolitan of Jews. In his account of Solomon's wisdom* we are informed that 'God enabled him to learn that skill which expels demons,' and that Solomon composed such incantations as alleviate distempers. 'And he left behind him the mode of using exorcism by which they drive away demons so that they never return. And this method is prevalent unto this day, for I have seen a certain man of my own country, whose name was Eleazar, releasing people that were demoniacal in the presence of Vespasian. . . . The manner of the cure was as follows:—He put a ring that had a root, of one of those sorts mentioned by Solomon, to the nostrils of the demoniac, after which he drew the demon out through his nostrils; and when the man fell down at once, he adjured him (the demon) to return unto him no more, making still mention of Solomon, and reciting the incantations which he composed.' Another passage shows that Josephus considered demons to be the spirits of departed wicked men (*BJ VII. vi. 3*).

Passing for a few moments to the Jewish apocryphal literature of the age preceding the birth of Jesus, we observe that according to the *Book of Enoch* the demons are lost angels. They assail men's bodies, cause convulsions, and in other ways vex and oppress mankind (ch. 15); and this war of the demons on men will continue until the day of consummation—the great judgment (16), when they will receive dire chastisement.† In 19¹ we learn that evil spirits in various shapes shall corrupt men, and lead them astray to sacrifice to demons as if to gods until the great judgment day. In 53⁵ we read of the iron chains prepared for the angelic hosts who are hurled down into the abyss of condemnation (cf. 2 P 2⁴, Rev 20²⁻³).

In the *Testaments of the Twelve Patriarchs* (test. Reuben) we are informed that there are seven evil spirits sent out from Beliar against mankind, viz. those of life, seeing, hearing, smell, talking, taste, and the procreative impulses. Another group of seven is mentioned, viz. of fornication, gluttony, combativeness, flattery, pride, falsehood, injustice.

C. THE DEMONOLOGY OF THE NEW TESTAMENT.—This is in all its broad characteristics the demonology of the contemporary Judaism stripped of its cruder and exaggerated features. Evil demons or unclean demons, *δαίμονια* (דַּיְמוֹנִיּוֹת), *πνεύματα ἀκάθαρτα* or *πονηρά* (רְשָׁעִים וְרָעִים), hover about the world, and these are under subjection to Satan (*ἀρχὸν τῶν δαιμονίων*),

* Respecting Solomon as a nucleus of later legend, see Stade, *Geoch.* p. 309 ff., and the Arabic story of Bilkis (given in the *Chrestomathy of Socin's Arabic Grammar*).

† Conybeare, in quoting this, appositely cites the cry of the demons to Jesus, 'Art thou come hither to torment us before our time?' I desire here to express my obligations to this writer, whose interesting articles on the 'Demonology of the New Testament' (*JQR*, July and October 1896) contain much valuable information. They are occasionally marked, however, by a certain tendency to accentuate unduly some of the details of the NT narrative. Note, for example, his rendering of *ἐπίπαισι* as 'fell bodily' in Ac 10⁴⁴, whereas it has no more physical significance than in Eurip. *Androm.* 1042, *σοὶ μόνῃ διασφραγίς ἐπίπαισι λῦσαι*.

Mt 9³⁴ 12²⁴, Mk 3²², Lk 11¹⁵. The demon was said to enter (*εἰσερχέσθαι*) into a man somewhat as though it were a physical entity, and similarly was said to pass out (*ἐξερχέσθαι*), or was forcibly expelled by some superior power who had authority to cast out (*ἐκβάλλειν*) demons. The demons may pass into other animals, e.g. into the Gadarene swine. A man possessed with a devil was said to have or hold a demon (*ἔχει δαιμόνιον*), or to be a demoniac (*δαιμονιζόμενος*, cf. the Arabic *mejnân*, said of a man possessed by a *Jinn*, Doughty, i. p. 259). Mt (4²⁴ 17¹⁵) also employs the verb *σεληνιαζεσθαι*, 'to be a lunatic,' as though it expressed something distinct from *δαιμονιζεσθαι* (4²⁴). In Mk 1²³ 5³ the phrase used is (*ἀνθρώποι ἐν πνεύματι ἀκαθάρτῳ*, where the preposition *ἐν* means 'in the power or under the influence of'; cf. Winer, § xlvi. (Eng. ed. p. 483a). Luke also uses *ἐνοχλεῖσθαι* of demon possession (6¹⁸).

The manifestations of demoniac possession are very varied in NT. In the case of the Gadarene he is compelled to dwell among the tombs, which are associated with solitude and uncleanness. As water is connected with purity and cleansing, the demons have a preference for waterless spots. Demons are, however, chiefly associated with abnormal forms of human life, especially disease. Dumbness (Lk 9³⁹, Mk 9¹⁷), deafness and dumbness (Mk 9²⁰), blindness and deafness combined (Mt 12²²), and epilepsy (Mk 1²⁶ 9²⁰, Lk 9³⁹), are the manifestations of demoniac influence. Of all the synoptic evangelists, Luke is the most powerfully impressed with this conception. Even high fever is attributed to demoniac agency, as we can clearly infer from the fact that, in the case of Peter's mother-in-law, Jesus stood over her and rebuked the fever which possessed her (Lk 4³⁸⁻³⁹, cf. 13¹⁶). It is to be noted, however, that in this Gospel a saying of our Lord is reported which expressly distinguishes between ordinary cures and expulsion of demons, *ἐκβάλλω δαιμόνια καὶ λάσεις ἀποστέλλω* (Lk 13³²). The demons, moreover, were able to *speak*, and exercised mastery over the vocal organs of the human subject. Thus in one case, as the demon came forth, it cried with a loud voice (Mk 1²⁶). It was possible for many demons to possess a human being at the same time. Seven demons were cast out from Mary Magdalene by Jesus (Lk 8²), while the Gadarene demoniac was possessed by a legion.

As regards the *method of procedure* adopted by Jesus, we observe the stress which is laid upon His own personality. The power which He wielded in His person is placed in direct opposition to the kingdom of moral and physical anarchy. Faith was necessary in order that the exorcist should accomplish his task (Mt 17^{19, 20}), and this was aided by prayer (Mk 9²⁹). Faith was sometimes required on the part of near relatives, as in the case of the father of the epileptic patient (Mk 9^{23, 24}), in order that the cure might be effected. In these circumstances Jesus relied upon a simple direct command addressed to the demon, 'Thou dumb and deaf spirit, I charge thee come out of him' (Mk 9²⁰), or 'be muzzled and depart' (Mk 1²⁵). 'He cast out spirits with a word, and healed all who were sick.' He Himself declared that He did this by the finger or spirit of God (Lk 11²⁰, Mt 12²⁸). There was no use of magic formulæ. In the case of the woman who had been bound by Satan for eighteen years, He merely laid His hand upon her (Lk 13¹³). In Mt 12²⁷ He appears to place His own expulsions of demons on a footing of equality with those worked by Jewish exorcists; but here it is impossible to deny that there is irony latent in the question, 'By whom do your sons cast them out?' It is asked by way of argument rather than direct statement, and is intended to apply to the special belief and standpoint held by His Jewish opponents.

This power of delivering men from unclean

spirits Jesus bequeathed to His disciples (Mt 10¹). They effected their cures simply by *naming* the name of Jesus (Mk 16⁷, Ac 3⁶). This belief in the powerful efficacy of the name comes from a hoary Semitic past (see Sayce's *Hibbert Lect.* pp. 302-307). It should be remembered that *name* meant to an ancient Semite personal power and existence, and hence involved to those who invoked the name of Jesus belief in the actual presence and might of the divine Saviour of mankind.

Before passing from the subject of the Gospel narratives in their relation to demonology, it should not be forgotten (1) that we are dealing with the reports of chroniclers whose minds were necessarily coloured by the prevailing beliefs of the age, *psychic and cosmic*; (2) that the properly demoniac element is almost wholly absent from the Fourth Gospel. In 8⁴⁸ 10²⁰ the language employed by the Jews is quoted, while in 6⁷⁰ Judas is called *διάβολος* and not *δαμόνιον*.

St. Paul, however, shared the conceptions of his contemporaries respecting devils. Several passages may be cited in illustration. In the first place, the much disputed passage 1 Co 10^{19, 20} points, in our opinion, to the conclusion adopted by Baudissin, and more recently by Everling (*Die Paulinische Angelologie u. Dämonologie*, p. 27 ff.), that St. Paul had borrowed from Alexandrian Judaism the belief that the offerings to heathen deities were offerings to demons (cf. above the demonology of the Bk. of Enoch and the Sibylline books). In 1 Co 10²⁰ Paul argues, 'But I say, that the things which the Gentiles sacrifice, they sacrifice to devils, and not to God: and I would not that ye should have communion with devils. Ye cannot drink the cup of the Lord and the cup of devils.' He is pleading that it is not permissible to partake of the heathen sacrificial offerings. He quotes the two examples of the Christian Lord's Supper and the Jewish sacrifice. In both cases there is a real communion between the participator and the object of worship. The statement in 8⁴ 'We know that no idol is anything in the world,' does not involve any inconsistency. For St. Paul the gods *as such* are creatures of the imagination; yet he does not hold that nothing at all exists behind the image-worship of the heathen, but that demons lurk there and the kingdom of Satan, and that participators in heathen feasts are drawn into the circle of their evil influence (so Holsten).^{*} Moreover, Everling (*ib.* p. 33 ff.) has shown with considerable probability that the reference in the obscure phrase 1 Co 11¹⁹ 'for this cause ought the woman to have power over her head on account of the angels' is to be found in the legend of the intercourse of the fallen angels with the daughters of men. Book of Enoch (ch. 6) and other citations from the Book of Jubilees, Apocalypse of Baruch 56¹² in Charles' ed., and the Testaments of the Twelve Patriarchs (test. Reuben 5), show the important place held by this tradition in the literature that preceded the time of St. Paul.

It would lie beyond the scope of this article to trace the development of demonology in post-apostolic Christian writers. The elaborate demonology of Origen is portrayed in Conybeare's interesting article (*JQR*, Oct. 1896), to which the reader is referred. The enormous range of this belief in all its varieties, and the extent to which it penetrated into popular belief and practice from the hoary antiquity of Babylonian and Egyptian magic down to the time of the Reformation and beyond, is a fact of which this modern age of

^{*} The opposite view is taken by Beyschlag in his Programme, 'Did the Apostle Paul regard the gods of the heathen as demons?' and he is followed by Marcus Dods (*Expositor*, March 1895, p. 237 ff.). But on the subject of Demonology in the NT, and the belief of Jesus in a personal devil, Beyschlag is an unsafe guide, as I shall attempt to show in my article SATAN.

scientific discovery is but dimly conscious. Readers of Doughty's *Arabia Deserta*, however, soon become aware how fervently the modern Arab of the desert believes in the *Jān* (see especially vol. ii. p. 188 ff.). Monumental evidence presents a vast array of examples. A considerable mass of Aramaic inscriptions could be cited, if space permitted, consisting of nothing else than conjurations, charms, or spells. See, for example, the transcription and translation by Jos. Wohlstein, in *Zeitschr. für Assyriologie*, April 1894, of Aramaic inscriptions on clay vessels preserved in the Royal Museum at Berlin, No. 2416 (consisting of nearly 100 lines); also in Dec. 1893, No. 2422 (of 44 lines). See also the interesting Greek form in Deissmann, *Bibelstudien*, p. 26 ff., and cf. art. EXORCISM. Respecting modern examples of demoniacal possession and exorcism it is difficult to speak with certainty, though some examples appear well authenticated. One of the most striking is to be found in the account given by the missionary Waldmeier of his ten years' labour in Abyssinia, *Autobiography of Thomas Waldmeier*, pp. 64-66. Though the shadows of such beliefs have been slowly passing away from Western Europe, the gloom still invests a large portion of the world, and fills the hearts of many millions of our fellow-men with anguish and terror. Like our first parents, we behold

'all the eastern side
With dreadful faces thronged and fiery arms.'

OWEN C. WHITEHOUSE.

DEMOPHON (*Δημοφών*, 2 Mac 12²), a Syrian commandant in Palestine under Antiochus Eupator. According to the author of 2 Mac, after terms of peace had been agreed upon for the first time between Judas Maccabæus and Lysias (see ABSALOM IN APOCR.), some of the provincial commandants, and Demophon among them, continued to act in a hostile manner towards the Jews.

H. A. WHITE.

DEN (דֵּן the lurking-place of wild beasts, Job 37⁸; קְנֵקְרָה a cave where robbers hide, Jer 7¹¹; קְנֵקְרָה in Jg 6² is perhaps [but see Moore, *ad loc.*] a deep valley or water-course. In NT *σηλαίων*).—The lions' den into which Daniel was cast (Dn 6⁷ etc.) was doubtless that in which the king's lions were kept, in accordance with a custom known to prevail at Oriental courts. Layard (*Nin. and Bab.*) shows that these beasts were used for purposes of sport by the kings of Assyria. A royal lion hunt is depicted in a bas-relief of the palace of Assurnazir-pal (B.C. 885-860) discovered at Nimroud, now in the British Museum. A seal of Darius has also been found, on which the king is represented in the act of shooting an arrow at a lion rampant.

G. WALKER.

DENARIUS.—See MONEY.

DENOUNCE.—In AV Dt 30¹⁸ only, 'I d. unto you this day, that ye shall surely perish' (דָּנִיתִי, תִּדְּרִי 'I profess' 26³). This is the orig. meaning of the word (fr. Lat. *denuntiare*, 'to give official intimation'). So Peacock (1449), 'The Evangelie of God . . . which to alle men oughte be denouncid'; and 2 Th 3¹⁰ Wyc. (1380) 'we denounceden this thing to you, that if ony man wole not worche; nether ete he' (after Vulg. *hoc denunciabamus vobis*).

J. HASTINGS.

DENY.—In the sense of 'refuse,' deny (Lat. *de-negare*, 'say no,' 'refuse') is not yet obsolete. Examples in AV are 1 K 2¹⁶ 'I ask one petition of thee, deny me not' (אִלֵּי־פָנַי אֲשַׁקְּךָ 'turn not away my face'; in v. 20 the same phrase is twice tr^d in AV 'say not nay,' RV 'deny not'; cf. Lk 12⁷); 1 K 20⁷, Pr 30⁷ 'Two things have I required (RV 'asked') of thee; deny me them not before I die' (both דָּנֵה). But we cannot now say 'deny to do'

a thing, as Wis 12²⁷ 'the true God, whom before they denied to know' (*ἠποῦντο εἰδέσθαι*, Vulg. *negabant se nosse*, RV 'refused to know,' RVM 'denied that they knew'); so 16¹⁶ 'the ungodly that denied to know thee'; and 1 Mac 5^{heading} 'He destroyeth Ephron for denying him to pass through it.' Cf. Shaks. *Winter's Tale*, v. ii. 128: 'You denied to fight with me this other day, because I was no gentleman born'; and Knox, *Historie*, 88, 'the Lord Gray . . . plainly denied to charge again.'

J. HASTINGS.

DEPART.—The earliest meaning of 'depart' is 'divide into parts' (*dis-partire*), as Maundeville, xi. 43: 'The yerde of Moyses, with the whilk he departid the Reed See.' Then to 'distribute,' as Jn 19²⁴ Gen. 'They departed my rayment among them.' Next came 'separate,' which occurs once (intrans.) in AV, Ac 15³⁹ 'they departed asunder one from the other' (*ἀποχωρίζομαι*, RV 'parted asunder'). This is the meaning (but trans.) of 'depart' in the Pr. Bk., 'till death us depart,' which was retained from 1549 till 1662, when 'depart' was changed into 'do part.' Cf. Ru 1²⁷ Cov. 'death onely shal departe us.'

J. HASTINGS.

DEPUTY, the rendering once (1 K 22⁴⁷) of *ὑπὸ*, elsewhere in OT of *ὑπὸ*. The latter was a governor subordinate to the satrap (which see), and is mentioned under both the Assyrian and the Chald. governments (2 K 18²⁴, Ezk 23²³), although the office seems to have been better defined under the Persian rule (Est 8⁹ 9⁸, cf. *Behist. Inscr.* col. iii. par. 3, § 4; par. 9, § 2). The deputies who were set over the lesser districts and cities within the satrap's province occupied a position of considerable dignity and authority (Rawlinson, *Anc. Mon.* iv. 416; cf. Xen. *Hell.* iii. 1. § 10-12; iv. 1. § 1).

In NT 'deputy' is AV tr. in Ac 13⁷ 18¹² 19²⁸ of *ἀποστράτος*, which is more accurately rendered in RV 'proconsul' (which see). G. WALKER.

DERBE (*Δέρβη*, ethnic *Δερβαῖος*, Ac 20⁴, but *Δερβήτης* in Strabo, p. 569, and Cicero, *ad Fam.* xiii. 73) was a city of Lycaonia, on the main road from Iconium (or Lystra), S.E. to Laranda. Of its early history nothing is recorded. It was in the part of Lycaonia that was added to Cappadocia as an 'eleventh *Strategia*' by the Romans (prob. in B.C. 65); but, under the weak rule of the Cappadocian kings, it was seized by a native ruler, Antipater (called 'the robber' by Strabo, p. 569, which merely shows that he opposed the Rom. policy; he was a friend of Cicero, *ad Fam.* xiii. 73). Amyntas, king of Galatia, conquered Derbe and Laranda, and at his death in B.C. 25 they passed with his kingdom to the Romans, were incorporated in the province Galatia, and supplied soldiers to the Rom. legions (*CIL* iii. 2709, 2818). In A.D. 37 or 41 Laranda was probably transferred to the kingdom of Antiochus, and the coins of king Antiochus mentioning the Lycaones must have been struck there; hence from 41 to 72 Derbe became the frontier city of the Rom. province, and was honoured with the title Claudio-Derbe. Soon after, it was visited by St. Paul (Ac 14⁶), who, having here reached the extremity of Rom. territory, now turned back and retraced his former steps to Lystra, Iconium, Antioch, and Perga. Nothing is said in Ac about any sufferings of St. Paul at D., nor is it mentioned among the places (like Antioch, Iconium, and Lystra) where he had suffered (2 Ti 3¹¹). On his second journey, coming from Cilicia (doubtless through the 'Cilician Gates'), St. Paul passed through D. to Lystra, etc., and on his third journey he took the same route (acc. to those who maintain the 'S. Galatian' view, though most scholars consider that on this

occasion he went northward from the 'Gates' through Cappadocia towards N. Galatia). Gaius of D. was one of the delegation which accompanied St. Paul to Jerusalem in charge of the contributions of the Pauline Churches for the benefit of the poor in Jerus. (Ac 20⁴). According to the text of *Codex Bezae*, Gaius is styled *Δούβριος*; this is the ethnic derived from Doubra, doubtless a local pronunciation of the name (which may be compared with Seiblia or Silbion or Soublaion). A third form, *Δέλβεια*, is mentioned by Stephanus Byzant. as meaning 'juniper' in the Lycaonian tongue (cf. Ac 14¹¹). Very little is recorded of D. in NT; it is rarely mentioned in general history; and in Christian history it hardly reappears until A.D. 381, when its bishop, Daphnus, was present at the Council of Constantinople.

The site of D., after many diverse conjectures, was placed by Prof. Sterrett at Zosta or Losta; though the evidence is still not perfect, yet general considerations point conclusively to this neighbourhood, and especially to a large mound called Gudelissin, evidently in great part artificial, from which protrude numerous remains of a city, about three miles N.W. of Zosta. The buildings that remain above ground at Gudelissin are all of the Byzantine period; but the mound has the appearance of great antiquity, as one of those sites where city has been built over city, until a hill is formed (like the 'mounds of Semiramis' at Tyana and Zela, Strab. pp. 537, 559). The statement of Stephanus Byzant., that Derbe was a fortress and harbour (*λιμὴν*) of Isauria is erroneous; and the proposed change of text (*λιμὴν*) has no authority.

LITERATURE about Derbe begins with Sterrett, *Wolfe Expedition in Asia Minor*, pp. 22-30; Losta was visited by MM. Radet and Paris, who, however, wrongly identified it with Lystra, *Bulletin de Correspond. Hellénique*, 1886, pp. 509-512. The reasons for the identification of D. with Zosta are stated by Ramsay, *Hist. Geog. of Asia Minor*, p. 336 f., and more definitely (after a visit to the place) in *Church in Rom. Emp.* pp. 54-58; *St. Paul the Trav.* pp. 110 ff., 178 ff. See GALATIA.

W. M. RAMSAY.

DERISION.—With one exception, all instances of the phrase 'have in derision' represent a simple verb: either *ἠγ' ἰδ' ἄγῃ*, 'mock,' Ps 2⁴ 59⁸, Ezk 23³²; *ἠγ' ἰδ' ἄγῃ* 'laugh at,' Job 30¹; *ἠγ' ἰδ' ἄγῃ* *ἠέλιζ*, 'deride'; or *ἠγ' ἰδ' ἄγῃ*, 1 Es 15¹ (RV 'mocked'). The exception is Wis 5³ 'This was he whom we had sometimes in derision' (*ὅν ἔσχομεν ποτε εἰς γέλωτα*, Vulg. *habuimus in derisum*).

J. HASTINGS.

DESCRIBE.—In Jos 18⁴ 6. 8 bis. 9 'to describe' is to map out, or divide into lots, as Jos 18⁶ 'Ye shall therefore describe the land into seven parts, and bring the description hither to me, that I may cast lots for you here before the Lord our God.' This is Coverdale's tr., from Vulg. *describere* (in Jos 18⁴ 6. 8 bis, in 9 *diviserunt, scribentes*). In Jg 8¹⁴ the same Heb. (*כתב* 'write') is again tr. 'describe' (Vulg. *describere*), but the meaning is 'write a list of.' In this passage the LXX gives *γράφω*, the word used in Ro 10⁵ 'Moses describeth the righteousness which is of the law' (RV 'writeth that,' etc.); while in 4⁶ 'describeth the blessedness' the vb. is *λέγω* (RV 'pronounceth blessing upon').

Besides Jos 18⁶ (above), where there is no corresp. Heb., description occurs only 1 Es 5⁹ with the meaning of 'list': the description of 'the kindred' (*τῆς γενεῆς γραφῆς*, i.e. the genealogy).

J. HASTINGS.

DESCRY.—'Describe' and 'descry' are both from Lat. *describere*, the former immediately, the latter through the old Fr. *descrire*. And in earlier Eng. their meanings were often very close, to 'descry' being to 'reveal,' even as late as Milton, *Comus*, 141—

'And to the tell-tale Sun descry
Our concealed solemnity.'

But Milton uses the word also in the sense of reconnoitre, as *Par. Lost*, vi. 530—

‘And scouts each coast light-armed scour,
Each quarter, to descry the distant foe.’

This is the meaning of ‘descry’ in AV, where it occurs only Jg 1²³ ‘And the house of Joseph sent to descry Bethel’ (בְּחִירָה), RV ‘sent to spy out’).

J. HASTINGS.

DESERT.—See WILDERNESS.

DESIRE.—‘To desire,’ says Trench (*Sel. Gloss.* 56), ‘is only to look forward with longing now: the word has lost the sense of regret or looking back upon the lost but still loved. This it once possessed in common with *desiderium* and *desiderare*, from which more remotely, and *désirer*, from which more immediately, we derive it.’ And he quotes as an example 2 Ch 21²⁰ ‘and [Jehoram] departed without being desired.’ Now this sense of ‘desire’ is certainly found, as Berners (1533), ‘Of the death of suche an entierly desyred husbände’; Jer. Taylor, ‘she shall be pleasant while she lives, and desired when she dies.’ But it is not so certain that 2 Ch 21²⁰ is an example. The Heb. is lit. ‘he went [or walked] without desire’ (וְלֹא בָּלָא חֶסֶד); LXX καὶ ἐπορεύθη οὐκ ἐν ἐπιθυμίᾳ; Vulg. *Ambulavitque non recte*, whence Cov. ‘and walked not well’), and the tr. of AV is taken from Gen. Bible, which has ‘and lived without being desired,’ with the gloss ‘he was not regarded, but deposed for his wickedness.’*

J. HASTINGS.

DESOLATE.—An example of the primary meaning (*de-solus*, alone) ‘left alone,’ ‘solitary,’ is Ad. Est 14³ ‘help me, d. woman, which have no helper but thee’; and an example of the obsolete constr. with ‘of,’ is Bar 2²³ ‘the whole land shall be d. of inhabitants’ (RV ‘d. without inh.’). So 1 Ti 5⁵ Wyc. ‘sche that is a widewe verili, and desolate’; and Ru 1⁵ Cov. ‘the woman remayned desolate of both hir sonnes and hir husbände.’ For **Desolation** see ABOMINATION OF DESOLATION.

J. HASTINGS.

DESPITE is now only a prep., though as a subst. it is still used in poetry. The subst. (=‘contempt’ actively shown, ‘dishonour,’ from Lat. *despicere*, to look down on) occurs Ezk 25⁸ ‘rejoiced in heart with all thy despite against the land of Israel’ (שָׂדֵה נַפְשׁוֹתָם בְּכָל הַדָּבָר, RV ‘with all the d. of thy soul’); and He 10²⁹ ‘hath done despite unto the Spirit of grace’ (ἐνυβρίσας; ‘doith dispit’ is Wyclif’s word; Tin., Cov., Cran., Gen. ‘doth dishonour’; Rhem. ‘hath done contumelie’). Cf. Jer. Taylor, ‘Liberality . . . consists in the despite and neglect of money.’ As a vb. ‘d.’ occurs in Pref. to AV, ‘The Romanists . . . did no lesse then despite the spirit of grace,’ that is, ‘treated with contempt.’ **Despiteful** is found Ezk 25¹⁵ ‘a d. heart,’ 36⁵ ‘d. minds’; Sir 31³¹ ‘give him no d. words’ (λόγον δνειδισμοῦ, RV ‘a word of reproach’); and Ro 1³⁰ (ὕβρισται, RV ‘insolent’). **Despitefully**, 1 Mac 9²⁸ ‘used them d.’ (ἐνέπαιζον αὐτοῖς); Mt 5⁴⁴, Lk 6²⁸ ‘which d. use you’ (ἐμπροσθεν αὐτοῖς); Ac 14⁵ ‘to use them d.’ (ὕβρισται αὐτοῖς, RV ‘to entreat them shamefully’). **Despitefulness**, Wis 2¹⁹ ‘Let us examine him with d. and torture’ (ὕβρει, Vulg. *contumelia*, RV ‘outrage’). Here, and in the passages where ‘despitefully’ occurs, the idea is cruelty more than contempt; but the meaning of ‘spite,’ ‘spitefulness,’ is never present in these words. In Est 1¹⁸ Cov., ‘thus shall there aryse despytfulness and wrath ynough,’ d. = contempt, as AV and RV.

J. HASTINGS.

DESTRUCTION (הַרְסָה).—See ABADDON.

DETERMINATE.—Only Ac 2²³ ‘the d. counsel

* This is the sense in which the passage is taken by Oxf. Heb. Lez. (s.v. חֶסֶד), ‘he lived as no one desired.’

and foreknowledge of God’ (ὀρισμένους, fr. ὀρίζω, to mark a boundary, fix, appoint. The closest parallel is Lk 22²² ‘the Son of man indeed goeth, as it hath been determined’ RV, Gr. κατὰ τὸ ὀρισμένον). ‘Determinate’ is Tindale’s word, whom all the VSS follow; but Wyclif has the form we should now employ ‘determined.’ Chaucer has ‘determinat’ in the same sense, as *Astrolabe*, i. xxi. 7: ‘sterres fixes, with hir longitudes and latitudes determinat’; and cf. Shaks. *Twelfth Night*, ii. i. 10: ‘My determinate voyage is mere extravagancy.’ **Determination**, Zeph 3⁸ ‘my d. is to gather the nations’ (אֲסַפֵּה, lit. ‘judgement,’ as RVm); 2 Es 10¹⁶ ‘if thou shalt acknowledge the d. of God to be just’ (*terminus*, lit. ‘end,’ RV ‘decree’; cf. Ja 5¹¹ ‘ye have seen the end of the Lord,’ τέλος). **Determine** was common about 1611 in the sense of ‘end,’ ‘terminate’; but in AV only the derived meanings are found, fix, decide, resolve. In AV Pref. the obsolete construction with ‘of’ is used: ‘For as it is a fault of incredulity, to doubt of those things that are evident; so to determine of such things as the Spirit of God hath left (even in the judgement of the judicious) questionable, can be no less than presumption.’

J. HASTINGS.

DETESTABLE THINGS.—The trⁿ in AV and RV of אֲבִימִיּוֹת in Jer 16¹⁸, Ezk 5¹¹ 7²⁰ 11¹⁸, 21 37²³, the reference being either to actual idols or to objects connected with idolatry. Elsewhere the word is tr^d ABOMINATION (see the references above, p. 12,—adding Nah 3⁶ [AV, RV ‘abominable filth’], Dn 9²⁷ 11³¹ 12¹¹, 2 Ch 15⁸), which usually represents אֲבִימִיּוֹת (see p. 11); but as in the first five passages cited both Heb. words occur together, ‘detestable things’ is adopted for אֲבִימִיּוֹת for the sake of distinction. It would have conduced to accuracy and clearness, had it been adopted uniformly. The cognate verb אֲבִימִיּוֹת, to treat as detestable, is rendered ‘to detest’ in Dt 7²⁶, but unfortunately ‘to have in abomination’ in Lv 11¹⁴, 13, and ‘to make abominable’ (for ‘make detestable’) in Lv 11⁴³ 20²⁵ (in these four passages, in connexion with אֲבִימִיּוֹת, the technical term for the flesh of prohibited animals. See ABOMINATION, No. 3).

In 2 Mac 5²⁴ ‘that detestable ringleader’ (Apollonius) stands for τὸν μισάρχη; RV ‘lord of pollutions,’ with marg. ‘Gr. *Mysarch*, which may also mean ruler of the Mysians.’ The trⁿ of the text is, no doubt, correct (similarly Grimm, Rawl., Zöckler: Pesh. ‘ruler of all the unclean’); the term is evidently one of disparagement, framed on the model of titles such as ἐθνάρχη, στρατοπεδάρχης, etc.

S. R. DRIVER.

DEUEL (אֵלִיָּא ‘knowledge of God,’ Παγούηλ).—Father of Eliasaph, prince of Gad (Nu 1¹⁴ 7⁴², 47 10²⁰) = Reuel, Nu 2¹⁴ (perhaps the original name, see LXX, ר being put for ר). G. H. BATTERSBY.

DEUTERONOMY.—i. THE NAME OF THE BOOK.

—The name Deuteronomy is taken from the Lat. ‘Deuteronomium,’ which transliterated the Gr. word δευτερονόμιον. This Gr. word appears in the LXX of Dt 17¹⁸, where the words ‘a copy of this law’ (הַחֹדֶשׁ הַחֹדֶשׁ הַחֹדֶשׁ) are incorrectly tr^d τὸ δευτερονόμιον τοῦτο, as if the Heb. had been ‘this copy of the law’ (הַחֹדֶשׁ הַחֹדֶשׁ הַחֹדֶשׁ). The word also occurs, with the same error of trⁿ, in Jos 9⁹ [Heb. 8³²]. Though the word was a mistranslation, it furnished an appropriate title to a book which in a large measure ‘reformulated’ previous laws. The book is referred to by this name in the writings of Philo (*Leg. Allegor.* iii. § 61, i. 121, *Quod Deus immutab.* § 10, i. 280), although that writer also quotes it by the name of ‘The Appendix to the Laws,’ ἡ Ἐπιτομὴ (Quis rer. dives hæres. § 33, i. 495).

In Heb. literature the book was known by a title taken from its opening words, 'These are the words' (אֵלֶּיךָ יְהוָה אֱמַרְתִּי), or, simply, 'words' (דְּבָרִים). In Rabbinic writing it is sometimes cited as 'The book of Threatenings' (סֵפֶר הַיְחָזְקִים); but in such cases the reference is to the latter portion of the book, which also appears to have been known to Philo as 'The Curses' (*cf.* 'Apost.'). See *Leg. Allegor.* iii. § 35, i. 109, quoting Dt 27:17; *De Posterit. Caini*, § 8, l. 230, quoting Dt 28:35. (Ryle's *Philo and Holy Scripture*, Introd. p. xxiii f.)

ii. THE CONTENTS OF THE BOOK.—The book purports to contain the last utterances of Moses, delivered in the plains of Moab just before his death. The historical position is defined by the brief Introduction (1¹⁻⁵) and by the Epilogue (34), which narrates the death of Moses. The utterances of Moses comprise *three* main discourses: (1) The first is chiefly historical, reviewing the life of Israel in the wilderness, 1⁶⁻⁴³. (2) The second, which has a brief historical preface (4⁴⁴⁻⁴⁹), is, at first, hortatory (5-11), but is chiefly taken up with the legislation (12-26), *i.e.* the code of laws which constitutes the nucleus of the whole work. To this is appended the description of a ceremony which was to symbolize the popular ratification of the laws in the land of Canaan (27), and a rehearsal of warnings and blessings that should ensue upon the neglect and observance of these laws (20). (3) The third address is an additional exhortation urging the people to keep the covenant with Jⁿ, promising restoration even after relapse into idolatry, and offering the alternatives of obedience or disloyalty to Jⁿ (29, 30).

These *three* addresses to the people are followed by a collection of more miscellaneous materials, such as Moses' farewell, his deliverance of the Deut. law to the priests, his commission to Joshua, the Song of Moses, the Blessing of Moses (31-33). The whole is concluded by an account of the Death of Moses (34).

Although it is true to say that the legislation constitutes the nucleus of the book, the character of the writing is very far from being that of a legal work. The tone of exhortation which runs through the earlier and later addresses, pervades also the legislative portion. The laws are not systematically and technically stated. They are ethically expounded in order to set forth their relation to the theocratic principles laid down in chs. 5-11. The purpose of the book is thus, practically, wholly 'hortatory,' or, as it has been termed, 'parenetic'; and its 'parenetic' aim accounts for the diffuse and somewhat discursive treatment which is found in the historical and legislative, no less than in the directly homiletical passages. A very cursory perusal enables us to see that the writer is neither historian nor jurist, but a religious teacher.

When we investigate Dt in relation to the books which immediately precede and follow it in the Hex., we cannot fail to be struck by the general unity of its composition, and by the distinctiveness of its character and style.

In Nu 27¹² it has already been said, 'And the LORD said unto Moses, Get thee up into this mountain of Abarim, and behold the land which I have given unto the children of Israel. And when thou hast seen it, thou also shalt be gathered unto thy people, as Aaron thy brother was gathered.' Again, in Nu 27¹⁸⁻²³ we find the commission to Joshua thus described, 'And the LORD said unto Moses, Take thee Joshua the son of Nun, a man in whom is the spirit, and lay thine hand upon him, etc. And Moses did as the LORD commanded him; and he took Joshua and set him before Eleazar the priest, and before all the congregation; and he laid his hands upon him, and gave him a charge, as the LORD spake, by the hand of Moses.'

Now, at the close of Dt we find in 32⁴⁸⁻⁵⁰ 'And the LORD spake unto Moses that self-same day, saying, Get thee up into this mountain of Abarim . . . and behold the land of Canaan, which I give unto the children of Israel for a possession; and die in the mount whither thou goest up, and be gathered unto thy people; as Aaron thy brother died in Mount Hor, and was gathered unto his people.' Again, we find in 31¹⁴⁻²³ the charge given to Joshua, 'And the LORD said unto Moses, Behold, thy days approach that thou must die; call Joshua, and present yourselves in the tent of meeting, etc. And he gave Joshua the son of Nun a charge, and said, Be strong and of a good courage.' Dt thus practically repeats the incidents which have already been recorded in Nu 27; and the whole work, which intervenes between the two commands to Moses to prepare for death, presents the appearance of a great parenthesis, interrupting the main thread of the narrative. The command to go up to the heights of Abarim, in Dt 32, is followed almost immediately by the narrative, in Dt 34, of the death of Moses. The same command has occurred in Nu 27; but between the two commands is interposed the series of three addresses which were given, according to Dt 1³, on the first day of the eleventh month of the fortieth year.

Not only, however, has the Book of Dt all the appearance of a parenthesis, but it is rendered distinct from the other books of the Pent. by its very clearly marked characteristics of style and diction. These will require fuller consideration later on. But they are so distinct and so obvious to the reader, whether of the original or of a translation, that they inevitably contribute very largely to the general impression that Dt represents a work in some way separate from the rest of the Pentateuch.

The same general impression is produced by a comparison of the laws in Dt with the three principal groups of laws contained in Ex, Lv, and Nu. The Deut. legislation 'stands in a different relation to each of the three codes referred to; it is an *expansion* of that in Ex 20-23; it is, in several features, *parallel* to that in Lv 17-26; it contains *allusions* to laws such as those codified in the rest of Lv-Nu' (Driver, *s.v.* 'Deuteronomy' in Smith's *DB²*). The legislative section of Dt is distinct in contents and treatment from the parallel sections in Ex-Nu.

The principal historical allusions in Dt (as presented by Driver) are the following:—

18 (and frequently) the <i>oath</i> to the patri- archs	Gn 15 ¹⁶ 22 ^{16f.} 24 ⁷ 26 ⁸ .
43 (Ba'al-pe'or)	Nu 25 ¹⁻⁵ .
410ff. 52ff. 18 ¹⁶ delivery of Decalogue, etc.	Ex 19 ⁸⁻²⁰ 21.
61 ⁶ (Massah)	Ex 17 ⁷ .
62 ^{1f.} and elsewhere (deliverance from Egypt)	Ex 13 ¹⁴ 14 ³⁰ .
83. 16 (the manna)	Ex 16 ⁴⁻⁵ .
81 ⁵ (fiery serpents; and rock (רֹאשׁ) of flint)	Nu 21 ⁶ and Ex 17 ⁶ . [<i>N.B.</i> In Nu 20 ⁸⁻¹¹ (P) the term for 'rock' is יִשְׁלַח, not רֹאשׁ.]
92 ² Tab'ērāh, Massah, Kibroth-hattā'ā- vah)	Nu 11 ¹⁻³ , Ex 17 ⁷ , Nu 11 ³⁴ .
11 (passage of the Red Sea)	Ex 14 ²⁷ .
11 ⁶ (Dathan and Abiram)	Nu 16 ^{1b.} 27b. 30. 32a.
25 ^{6f.} (4f.) Bala'am)	Nu 22 ²⁻²⁴ 25.
24 ⁹ (Miriam's leprosy)	Nu 12 ¹⁰ .
25 ¹⁷⁻¹⁹ (opposition of Amalek)	Ex 17 ⁸⁻¹⁶ .
26 ⁸⁻⁹ (affliction and deliverance from Egypt)	Ex 19. 12 37. 9 etc.
29 ²² (28) (overthrow of Sodom and Go- morrah)	Gn 19 ^{24f.}

An investigation of the historical allusions in Dt confirms the impression produced by the legislative portion. The references are, almost without exception, made to events recorded in those portions of Ex and Nu which scholars assign to JE, or the 'prophetic' group of narratives incor-

porated in the Pentateuch. The other main group of narratives in the Pent., denominated P from its generally 'priestly' characteristics, does not appear to have supplied the foundation for the treatment of the history in D. Thus in 1st the reader notices that Caleb alone is mentioned as the recipient of especial favour; there is no mention made of Joshua. In the Book of Nu the passage which records the favour granted to Caleb alone (Nu 14²⁴) belongs to JE, the passage which associates Joshua with Caleb (Nu 14³⁰) belongs to P. Similarly, in 11th we find mention of Dathan and Abiram, but not of Korah, who figures so conspicuously in Nu 16. But in Nu 16 the Korah passages are assigned by scholars to P; the JE portion of the narrative speaks only of Dathan and Abiram.

There are only *three* incidents in the historical references of Dt which are to be found in the P and not in the JE narrative of the Pentateuch. These are (1) the mention of the number 'twelve,' of the spies, Dt 1²³, cf. Nu 13²⁻¹⁶; (2) the mention of the number 'seventy,' of the family of Jacob, Dt 10²², cf. Gn 46²⁷, Ex 1⁵; (3) the mention of acacia-wood as the material of which the ark was made, Dt 10³, cf. Ex 25¹⁰. But it is to be remembered that these facts may have been recorded in JE, but have been preserved to us only in the excerpts from the P narrative.

Assuming the correctness of the general proposition, which is universally admitted by modern scholars, that the Pent. is of composite origin, we are brought, by a consideration of the distinctiveness in D's treatment and style, to the opinion that D must take rank with JE and P as one of the component elements of the Pentateuch. Not, of course, that D should necessarily be assigned any more than J, or E, or P, to any one writer or author, but only that in style and treatment it may be attributed to a literary source, representing the influence of a particular period, or of particular circumstances, upon a writer, or a school, or a succession of writers.

iii. THE UNITY OF THE BOOK.—Though we have hitherto spoken of Dt as if it were a unity in itself, it would be a mistake to suppose that it presents an unbroken homogeneous piece of literature written by a single person. There is good reason to suppose that the same kind of literary history is to be attributed to D as to JE and P. The original nucleus of writing has been revised, expanded, and modified. It is not difficult to indicate portions which could hardly have worn their present appearance if from the first they had been part of a consecutive piece of writing.

It appears the most probable view that Dt 5-26 (27⁹⁻¹⁰), 28 represent the original work, either in part or in its entirety. In this work chs. 5-11 formed the introduction; ch. 28 the peroration.

Wellhausen, indeed, limits the original work of Dt to chs. 12-26. But there seems no sufficient ground for separating 5-11 from 12-26. The style and diction are in marked agreement; and the differences which have been detected in the two sections are only those which might be expected to arise from the difference of subject-matter.

With regard to chs. 1-4 doubts have been more generally expressed. It has seemed to many improbable that the introduction, consisting of 5-11, should have been preceded by a long preface section. It is objected that the arrangement is too cumbersome to be the original one; that the awkwardness of the present arrangement is emphasized by the presence of two formal headings, 1¹⁻⁵ and 4⁴⁻⁹. Moreover, the absence in the hortatory passage 4¹⁻⁴⁰ of any allusion to the preceding historical summary has suggested a doubt whether ch. 4 could be homogeneous with chs. 1-3. On the other hand, the style is admittedly Deuteronomic; and it is difficult to believe that 1-4 did not come in some form or another from the same writer or school as the contents of 5-26, 28.

Dillmann has made the suggestion that 1-3 formed originally the hist. introduction, which was written in the third person, and that this was altered in character from narrative into a speech by the redactor of the Pent., who incorporated Dt into the main work. Dillm. also considered that 4¹⁻⁴⁰ originally

belonged to the conclusion of the book, and that it was transferred from that position by the redactor: for confirmation of this view, he appealed to the disordered and inconsecutive condition of chs. 29, 30, and to the use of the past tense in 4⁵, which seemed to imply that the legislative portion had already been recorded, and was present to the reader's mind.

It may, however, be doubted whether there is not a danger of too great ingenuity in the hypothetical rearrangement of the original materials. Taking into consideration (1) the very close resemblance of style, and (2) the absence of any serious contradiction in statement between the different portions, there is not room for any confident theory of different authorship for 1-4, though it may have been composed at a later time than the rest, and prefixed afterwards.

When, however, we come to consider the question of chs. 29-34, it is impossible not to admit that we have there to deal with materials widely differing in origin.

One passage in particular, 30¹⁻¹⁰, obviously has no direct connexion with the section 30¹¹⁻²⁰, which immediately follows; 31¹⁶⁻²² interrupts the thread of the narrative; while 32¹⁻⁴³ and 33, two lyrical pieces, have evidently been derived from some independent collection of early Heb. songs. A few portions of 32 and 34 (32¹⁸⁻³² and 34^{1a, 5b, 7-9}) are, on literary grounds, assigned with great probability to P as their original source.

The most reasonable explanation of the history of the structure of the book is excellently summarised in Driver's *Deuteronomy* (p. lxxvii). 'Some little time after the kernel [chs. 5-26, 28] of Dt was composed, it was enlarged by a second Deuteronomic writer (or writers), D², who (1) supplemented the work of D by adding the passages indicated; (2) incorporated, with additions of his (or their) own, the excerpts from JE, and (taking it probably from a separate source) the Song 32¹⁻⁴³, with the historical notices belonging to it, 31¹⁶⁻²² 32²⁴. Finally, at a still later date, the whole thus constituted was brought formally into relation with the literary framework of the Hexateuch as a whole by the addition of the extracts from P.'

iv. THE RELIGIOUS TEACHING OF DEUTERONOMY.—The characteristics of the religious thought of this book are very marked. They exercised a profound influence upon the religious development of the people.

The great lessons of the spirituality of the Godhead (4¹²), and the uniqueness of J^h, and His absolute unity (4^{35, 39} 6⁴ 7⁹ 10¹⁷), are strongly and impressively taught. We pass from the older conception of 'monolatry' into the fuller and deeper thought of 'monotheism.' The relation in which the God of the people stands to the people is represented primarily as one of love rather than of law. The thought of the love of Israel towards her God, which is indeed laid down in the words of the Decalogue (Ex 20⁶, Dt 5¹⁰), is not required elsewhere in the Pent., but in Dt it is earnestly insisted on as the basis of faithful service on the part of the creature to the Creator and of the redeemed to the Deliverer (cf. 10¹² 12^{1, 13, 22} 13⁹ 19^{30, 16, 20}). Appeals made to Israel to keep the commandments are, it is true, often based on the recollection of God's might and of His terrible visitation, on motives of awe and fear; but the highest appeal is made to the consciousness of J^h's love, in that He had *chosen* Israel, not for Israel's greatness or goodness, but out of His own free love (Dt 7⁷⁻⁸ 8¹⁷ 9⁴⁻⁹). The love and affection of God towards the *nation*, as distinguished from His love towards *individuals*, constitutes an especial feature in Dt (4³⁷ 7¹³ 23⁶ 33³); and Dt shares with Hosea (3¹ 11¹ 14⁴) the distinction of first familiarizing Israel with the thought and teaching that underlie so much of NT theology (cf. 1 K 10⁹, 2 Ch 2¹¹ 9⁸, Mal 1²). Again, love as indicating the people's affection and devotion to J^h is again and again insisted on as the true spring of all human action (cf. 5¹⁰ 6⁵ 7⁹ 10^{12, 15} 11^{1, 13, 22} 13⁹ 19^{30, 16, 20}). This teaching of the reciprocal relation of love between J^h and Israel has left the mark of Dt deeply impressed upon OT theology. It is this which leads more directly than any other line of OT teaching to the revelation ultimately contained in the words, 'God so loved the world,' etc. (Jn 3¹⁶).

As the outcome of the thought of the divine love which Israel has enjoyed, there also comes into view the consideration of Israel as 'the son' and of Jⁿ as the people's Father. The loving God had given Israel life by redemption from Egypt; He had brought Israel up and educated him in the wilderness (see Dt 14² and 8^{2-5, 16}).

The intimacy of the relation between Jⁿ and Isr. emphasizes the demand that Israel should also 'cleave' to Jⁿ (11²² 13⁴), and not follow 'other gods' (6^{14, 15} 7⁴ 8^{19, 20} 11^{16, 17, 20} 30^{17, 18}). Idolatry is the great peril; its temptations must be resisted with ruthless severity (13²⁻¹² 17⁵); no compromise is to be allowed nor alliance struck with the idolater (7² 20¹⁰⁻¹⁸).

The inducements to yield to superstitious practices are pictured as strong and numerous; but to yield is fatal. Jⁿ's wrath and His just punishment are the nation's penalty, and will be its extermination (6¹⁰⁻¹⁵ 8¹⁻²⁰ 11^{16, 17} 31²⁹). The alternative between obedience and disobedience, between the service of Jⁿ and the service of 'other gods,' constitutes the theme of the great passage of warning and denunciation which is presented in ch. 28.

The holiness of the people is another chief thought, the prominence of which is a marked feature in this book, resulting from the conception of the close relationship between Israel and Jⁿ the Holy One. The people are holy to Jⁿ, and cannot therefore join themselves to 'other gods' (7⁶). It is this 'holiness' which should prevent them from bodily mutilation as a sign of mourning; for such behaviour was the mark of a nation serving 'other gods' (14²). This 'holiness' is the reason for which the people must refrain from food that would render unclean those who were Jⁿ's possession (14²¹). God has chosen His people, not only to make them 'high above all nations which he hath made, in praise, and in name, and in honour'; but also that they may be 'an holy people' unto Jⁿ (26¹⁹). The 'holiness' of the people depends upon its obedience (28⁹). The spirit of 'holiness' to Jⁿ is ethically to be expressed by the observance of love towards the neighbour, and by kindness and charity towards the poor, the widow, the orphan, the Levite, and the stranger (10^{18, 19} 24¹⁷⁻²¹). The millstone was never to be taken in pledge; the garment taken in pledge was to be returned before nightfall (24^{6, 10-13}). Feelings of humanity were to be extended towards the animals; the ox treading out the corn was not to be muzzled (25⁴); and thought was even given to the bird and its young ones (22^{6, 7}).

In outward worship the 'holiness' of the people can be adequately safeguarded only by worship at the central sanctuary chosen by Jⁿ. This regulation, which is laid down in ch. 12, is repeated in connexion with the laws of tithe (14²³ etc.), the firstborn (15²⁰), the festivals (16^{2, 6, 11}), the firstlings (26²), the judges (17^{8, 10}). So long as worship was carried on at local shrines, on the high-places, and under trees (12²), it was inevitably tainted with heathenism; the hearts of the people would be alienated from the service of Jⁿ; and the moral purity of the nation would be corrupted by the assimilation of idolatrous practices.

Thus the relationship of Israel to Jⁿ is asserted as the spiritual principle which must animate the people's whole existence. The laws which are mentioned illustrate how the high mission of Israel is to be interpreted in daily life. These laws are no formal code. The blessing for obedience is promised as a reward for particular acts, and for the whole regulation of life; and the blessing promised is expressed in terms which Israel could understand and appreciate,—outward prosperity and length of life (12^{25, 28} 13¹⁸ 14²⁹ 15^{10, 18} 16²⁰ 19¹³

23²¹ 24¹⁹ 25¹⁵). It is to preserve unimpaired the recollection of their spiritual relation to Jⁿ that so much stress is laid upon the training of the children (4⁹ 6^{7, 20-25} 11¹⁹); while provision is also made, that even in the dress and the dwellings of individuals (6^{8, 9} 11^{19, 20} 22¹²) the people should be reminded of their spiritual duties.

v. LANGUAGE AND STYLE OF DEUTERONOMY.—The style in which the book is written has very clearly marked characteristics of its own. It is quite distinct, and easily recognizable. It bears no resemblance to the style of P, nor does it show any likeness to the narrative style of JE. In certain hortatory passages of JE there may be noticed 'an approximation to the style of Dt; and these sections [Gn 26⁵, Ex 13³⁻¹⁶ 15²⁶ 19³⁻⁶, parts of 20²⁻¹⁷ 23²⁰⁻³³ 34¹⁰⁻²⁸] appear to have been the source from which the author of Dt adopted some of the expressions currently used by him' (Driver).

The style of Dt is remarkable for its command of rich and effective periods, in which the sentences are framed with great oratorical skill. They are rhythmical without being tedious; and copious without being shallow and rhetorical. Some of the writing of Jeremiah approaches most closely in style to Dt; and the influence of Dt upon subsequent Heb. literature was very marked. The Deut. style was imitated and adopted by a group or succession of writers in and after the days of the exile. The Deut. passages in Jos, Jg, and K are easily distinguishable; they are generally of a hortatory character, and represent a particular attitude of fervent patriotism and religious thought, expressed with considerable redundancy of language, and with the use of certain characteristic phrases.

Very full and complete lists of the characteristic Deut. words and phrases have been drawn up by Driver (*Deut.* Introd. p. lxxviii ff.) and Holzinger (*Einleit. in d. Hex.*). The following are instances of words perfectly simple in themselves, but used with great frequency or with marked effect in Dt, though elsewhere not found, or only used with great rareness, in the Hexateuch:—

Thy (your) gates (= cities).
A mighty hand and a stretched out arm.
The land whither thou goest in to possess it.
Statutes and judgments; commandments and statutes.
With all your heart and with all your soul.
the priests the Levites.
observe to do.
that it may be well for thee.
a peculiar people.
to make his name to dwell there.
to do that which is right (good or evil) in the eyes of Jⁿ.
as Jⁿ hath spoken.
to walk in the ways of Jⁿ.
to hearken to the voice.

Under this head should be noticed the use of אהב to love (a) with God as obj.; (b) of God's love to His people.

אלהים אחרים other gods.
 האריך to prolong (of days).
 הוריש to dispossess.
 בחר to choose.
 קצקק to cleave to.
 היטיב thoroughly.
 נתן לפניך to deliver up before.
 פדה to ransom.
 כשלהך that to which thou puttest thine hand.
 השמיד to destroy.
 הויעבט יהוה the abomination of Jⁿ (of idolatry).
 בער הרע to root out the evil.
 כיום הנה as at this day.
 קליתיהם continually.
 עם קדוש a holy people.

Other characteristics of his style are—

- (1) The preference for אבך (56 times) above אבני (1230 236); the use of אבני in the Song 32^{21, 39} and 32^{49, 52} is not from the same hand as D.
- (2) The preference for לקב (47 times) above לב (411 236⁵ 233. 18).
- (3) The use of the emphatic ׀ in the 2nd and 3rd per. plur. of the impf.

- (4) The frequent employment of the reflexive dative.
- (5) The collocation of words without the conjunction (*asyndeta*).
- (6) The fem. form of the infin. *רָאָה*, *אָחַזְקָה*, *שָׁנְאָה*.

The following words or phrases are found in Dt only (see Driver, *Deut.* p. lxxxiv).

אָזֶן 2314.	נֶשֶׁל 195 2840.
הַמֵּצִיר 2617. 18.	מִסְכֵּנֹת 89.
מִבִּזְיִים 2611.	קֶכֶת 279.
כִּנְעָנָה 2820.	עֶבֶד 156. 8 2410. 18.
דָּבָחוֹן 2865.	עֲלִילוֹת דְּבָרָיִם 2214. 17.
מִרְיָה 715 2880.	הִתְעַמֵּר 2114 247.
דְּלִמָּה 2822.	הִעֲנִיק 1514.
הַהִיּוֹן 141.	מְעַקָּה 228.
קֶהֱל 2838.	עֲשָׂאוֹת 718 284. 18. 51.
הִרְבֵּשׁ 169 2326.	עָרֹת דְּבָרָיִם 2314 241.
2822.	פָּאָר 2420.
הִרְבֵּה 2827.	צֹלְעָל 2842.
הֶשֶׁל 2518.	קָשִׁי 927.
טָמֵא 282. 4 285. 17.	רְנוֹן 2856.
קָלָה 2832.	שִׁבְרֵי אֲלֹהֵיךָ 718 284. 18. 51.
לֵה 347.	שֶׁלֵּה 2887.
מְלִילָה 2326 (EV 251).	שִׁכְפָּה 151. 2. 9 3110.
מִפְּסָה 1610.	שָׁנִן 67.
עֵר מְתִים 224 36 (cf. Jg 2048).	

The following expressions, occurring mostly only once in Dt, are more or less frequent in subsequent writers, esp. those of the Deuteronomic school:—

idolatry, 425 918 3129 3216 (cf. *v. 21*); *to expel* (from Canaan), 301, cf. *v. 4*; *the name to be called over*, 2310; *רָע כְּעֹלְלֵיךָ*, 2820; *שָׂדֵךְ*, 2887; *קָרִירוֹת*, 2918 19; *נָחַשׁ*, 2927. (Driver *ib.*)

vi. THE LEGISLATION OF DEUTERONOMY.—Turning to the subject of the laws contained in Dt, we have only space to make the following general observations:—

(1) The laws are arranged upon a rough general plan, in which the order observed is that of (a) religious duties, chs. 12–16; (b) civil ordinances, chs. 17–20; (c) rules for social and domestic life, chs. 21–25. But the reader will notice that there is no strict adherence to orderly arrangement.

(2) The language in which the laws recorded in 12–20 are written is, as a rule, somewhat diffuse and hortatory; but in 21–25 there are many passages having a close resemblance to the style of Ex 21–23, terse, and evidently often reproducing the precise terms of the ancient codes.

(3) The laws make no claim to be a new code. So far as they are peculiar to D, they 'have, with very few exceptions, the appearance either of being taken directly, with unessential modifications of form, from older law-books (especially many of those in 21¹⁰–25¹⁰), or else of being accepted applications of long-established principles (as 17⁸–18 19¹⁶–21), or the formulation of ancient customs (as 21¹–9 22¹³–21 25⁵–10) expressed in Deuteronomic phraseology. And such laws as are really new in Dt are but the logical and consistent development of Mosaic principles' (Driver, *Deuteronomy*, *Introd.* p. lvi).

The following outline will serve as a rough analysis of the principal laws:—

- A. NATIONAL RELIGIOUS LIFE.
 1. *Public Worship.*
 - (a) Law of single sanctuary, 121–28.
 - (b) Law against idolatry, 122^a–131⁹.
 2. *Religious Duties.*
 - (a) Personal purity, 141–21.
 - (b) Charity, 142^a–151⁸.
 3. *Religious Observances.*
 - Offering and festivals, 151⁹–1617.
- B. NATIONAL ADMINISTRATION.
 1. *Civil Officers.*
 - (a) Judgess, 161⁸–20 178–18.
 - (b) King, 1714–20.
 2. *Religious.*
 - (a) Priests, 181–8.
 - (b) Prophets, 189–22.

C. CRIMINAL LAW.

- (a) Murder and homicide, 191–18 211–9.
- (b) Property, 191⁴.
- (c) Witness, 191⁵–21.
- (d) War, 20. 21¹⁰–14.

D. MISCELLANEOUS LAWS, e.g. primogeniture, seduction divorce, 211⁵–21 221³–30 241–5 255–11, interest and loans, 2320. 21 246. 10–13.

SYNOPSIS OF LAWS IN DEUTERONOMY (taken from Driver's *Commentary*, pp. iv–vii).

J.E.	DEUTERONOMY.	P (INCLUDING H)
Ex 202–17. 202 ⁴ . * cf. 23 ²⁴ . 341 ² –22. cf. 221 ⁹ (20).	56–18 (21) (the Decalogue). 121–28 (place of sacrifice). 122 ^a –31 (not to imitate Canaanite rites). ch. 13 (cases of seduction to idolatry). 141–2 (disfigurement in mourning). 143–20 (clean and unclean animals). 1421 ^a (food improperly killed). 1421 ^b (kid in mother's milk). 1422–29 (tithes).	Lv 171–9. * Nu 33 ⁵² .
2230 (31). 2319b 342 ⁶ b.	151–11 (year of release). 1512–18 (Hebrew slaves). 1519–23 (firstlings of ox and sheep: cf. 126. 17. 18 142 ²³).	Lv 19 ^{28a} . ,, 112–28 20 ²⁵ . ,, 1715 1140. ,, 2730–33; Nu 1821–32. *

20 ²⁵ .	275. 6 (altars of unhewn stones).	

[The instances in which the divergence is most marked are indicated by an asterisk *.]

vii. DATE AND AUTHORSHIP. — The date to which the composition of Dt should be assigned cannot be determined with any degree of certainty. But it is clear, from what has been already said, that it cannot reasonably be attributed to any very early period in the history of Heb. literature.

a. The testimony of the style and language connects it with the period preceding the age in which the imitators of the Deut. style wrote and flourished. Certainly, the rich and fluent oratorical periods of Dt belong to a period of ripe literary development, and not to the rough beginnings of a national literature.

It has been asserted that this is contradicted by the presence of certain archaisms. But, even if there were a few archaisms, their presence would not affect the general impression produced by the character of the Deut. style. The alleged 'archaisms,' however, are not of a kind to furnish any proof of the antiquity of the book.

(a) הָאֵל. The 'epicene' use of the pronoun throws more light upon the history of the text than upon the antiquity of the book.

The vowels in הָאֵל and הָאֵל were in all probability absent from the original autographs.

The fem. form הָאֵל seems to have existed in the earliest periods of the language.

(b) הָאֵל for הָאֵל. This form occurs 8 times in the Pent., 4 times in Dt 4² 7²² 9¹¹, once in 1 Ch 20⁶ 28. As the usual 'dissyllabic' form occurs in the Pent. some 260 times, and in the cognate dialects the dissyllabic form was usual, the monosyllabic is almost certainly an orthographical anomaly, and should have a second vowel, הָאֵל, הָאֵל; cf. פֶּחַ.

(c) הָאֵל (16¹⁸ 20¹³), as in Ex 23¹⁷ 34²³, instead of הָאֵל, which is used over 50 times in the Pent. The use of הָאֵל for הָאֵל goes back to the old law of Ex 23¹⁷.

(d) הָאֵל (32⁴⁹ 34¹⁻³), as elsewhere in Pent. In Jos it is spelt הָאֵל 28 times, and we have הָאֵל in 2 S 10⁵, Jer 39⁵ 52⁵. The suggestion has been offered that 'Israel picked up a new pronunciation after they came to the place,' in other words, that until the death of Moses the Israelites called the place 'Yērēchō' incorrectly, and that this was embodied in the Pent., but that the local pronunciation was given by Joshua. It might have been supposed that the writer of the account of the death of Moses (Dt 34¹⁻³) would have had as good opportunities for 'picking up a new pronunciation' as the writer of Jos 2¹. But the pronunciation followed in the Pent. is found also in K, Ezr-Neh, and Ch; so that no argument can be based upon the variety of the spelling.

Other supposed archaisms seem to arise from the mannerism of the author rather than from any real antiquity in their form.

The use of הָאֵל, equally for masc. or fem., appears indeed to be a genuine archaism; but the fact that הָאֵל appears as the fem. of הָאֵל elsewhere in the Heb. Scriptures except in the Pent., is merely an indication that the text of the Pent. had become regarded as too sacred to modify, at an earlier date than the other books subsequently admitted into the Heb. Canon.

Finally, the presence of an archaism is no more proof of a very early date than the presence of an Aramaism would be proof of a very late date. We have to account for the one as well as for the other.

b. The evidence derived from the language is corroborated by that which the religious teaching supplies.

(1) It has already been noticed that the emphasis laid upon the love of God is a feature almost unique (except for Ex 20); and it is generally believed that the prophet Hosea is the first exponent of this teaching. Dt 'builds upon the foundation of the prophets' (Driver).

(2) The 'monotheism' of Dt is an expansion of the 'monolatry' of early Israel; and the command to worship at a single sanctuary expresses in a concrete form the conception of a monotheistic religion. We are confronted with a stage of religious thought which has been reached only after a long preparatory period of discipline and teaching.

c. A comparison of the laws with those in Ex 20-23 shows that whereas the Deut. legislation is founded upon the laws of 'the Covenant,' and often repeats them almost *verbatim*, e.g. 14²¹ = Ex 23¹⁹ 34²⁶, 7⁵ = Ex 34¹³, and, as a rule, merely expands them with hortatory phrase, in other cases Dt presents us with a modification of the earlier law, showing a more advanced and humane civilization. Thus comparing the law of release for bondservants in Dt 15¹²⁻¹⁷ with the parallel law in Ex 21^{2f}, we notice (1) that female slaves are included in the law of release, (2) that provision is granted to the released slave so that he should not starve, (3) that the old custom of boring the ear is not required to be done publicly. Similarly, in Dt 5 the institution of the sabbatic year is put in force to restrain the exactions of the usurer, whereas in Ex 23¹⁰ it had only an agricultural significance.

d. The laws in Dt regulating national worship represent a later stage of Isr. history than those in Ex 20-23. This is conspicuously shown in regard to the place of sacrifice. In Ex 20²⁴ an Israelite may erect local altars: 'in every place where I record my name, I will come unto thee and bless thee.' The practice of sacrificing at local altars and shrines was apparently universal from the time of Joshua (Jos 24^{1, 26}, 1 S 7⁹ 9¹²⁻¹⁴ 10³⁻⁸ 11¹⁵ 14³⁵ 20⁶, 2 S 15^{12, 32}) until the days of Hezekiah, who endeavoured to centralize all worship at Jerus. as the one national sanctuary (2 K 18^{4, 22}). The law of Dt insists (12¹⁻¹⁸ etc.) upon the necessity of sacrificing at one place which J^r shall have chosen 'to set his name there.' It expresses in the terms of direct injunction the change for which Hezekiah contended and which Josiah finally carried into execution.

e. It may be granted that the laws of worship in Dt are quite too incomplete to be regarded as containing any exhaustive account. Thus the precise dates for the Festivals of Passover and Tabernacles are not given. In the former case the month is given, but not the day; in the latter case, neither month nor day. In the description of the Passover no direction is given that everyone should partake of it; while the command to observe the 7th day of Passover as 'a solemn assembly' and a day of rest is not applied to the other two feasts.

But, making all allowance for the general and fragmentary character of the religious legislation in Dt, we cannot pretend to be able to reconcile the discrepancies between the law of Dt and that of the (so-called) Priestly Code. The most notable discrepancy is in reference to the status of the Levite, and the provision for his maintenance. In Dt the regular expression 'the priests, the Levites' (17^{9, 18} 18¹ 24⁸ 27⁹), does not seem to recognize the distinction between 'the sons of Aaron' and 'the Levites,' which is found in the priestly laws. The Levites are pictured as wanderers and objects of Israelite charity, for which special regulations are laid down (12¹²⁻¹⁹ 14^{27, 29} 16^{11, 14} 18⁶ 26^{11, 12}); there is no reference to the provision in Nu 18 for the maintenance of priests and Levites, and in Nu 35 for the reservation of 48 cities for their place of residence.

A complete difference is also expressed in the laws relating to *firstlings* and to tithes. In Dt 12^{6, 17a}, 15^{19a}, the firstlings are to be presented at the central sanctuary, and there eaten by the owner. In Nu 18¹⁸ the firstlings are pronounced to belong to Aaron, 'And the flesh of them shall be thine; as the wave-breast and as the right thigh it shall be thine.' In Dt (12^{17a}, 14²²) it is enjoined that a tithe of the vegetable produce is to be set aside, and to be consumed by the offerer at the central sanctuary; while, in every third year, the tithe is to be devoted to the poor or the destitute and the Levite. In this there is no resemblance to the tithe law of Nu 18²¹⁻²³ and Lv 27^{30, 32}, according to which the tithe was to be paid of animal as well as of vegetable produce; it was to be paid to the Levites, who, in their turn, were enjoined to render a tenth to the priests.

Another instance of ritual discrepancy is found in the description of the priestly dues. In Dt 18³⁻⁵ the sacrificing priest received as his share 'the shoulder, two cheeks, and maw'; in Lv 7³¹⁻³⁴ 'the wave-breast' and 'heave-thigh' or shoulder are assigned to the priest.

Added to this, there is the argument from silence, in that Dt makes no mention of the year of jubilee, the great Day of Atonement, the Levitical cities, the meal-offering, guilt-offering, or sin-offering, nor even of the tent of meeting (Dt 31^{14a}, is from JE).

And it is incredible to suppose that the Levitical system, if formulated as we have it in P, should have been so wholly overlooked in an address to the people.

It is impossible to resist the impression that the law of Dt represents an expansion and development of the ancient code contained in Ex 20-23, and precedes the final formulation of the priestly ritual, which only received its ultimate form in the last period of revising the structure of the Pentateuch.

In order to approach more nearly the limits of time within which it is reasonable to suppose that Dt was composed, we may take into consideration the further possible indications of time, and judge of them not as individually convincing items of evidence, but as collectively carrying considerable weight.

(a) It was written on the W. side of the Jordan; cf. the use of 'beyond Jordan' in Dt 1^{1, 5} 3^{41, 46, 47, 49}, as in Jos 2¹⁰ 7⁷ etc. See BEYOND.

(b) The law of the kingdom, 17¹⁴⁻²⁰, is expressed in language indicating acquaintance with the evils of Solomon's reign.

(c) The law of the judicial tribunal in 17⁸⁻¹³ does not ordain a new institution, but *describes a court already existing*, and having a close resemblance to the one described in 2 Ch 19^{5, 11} as appointed by Jehoshaphat.

(d) Isaiah, who speaks of the erection of an 'obelisk' (*mazzēbāh*) for a sacred purpose in connexion with the worship of J^r in Egypt, could hardly have been acquainted with the law of Dt 16²² 'Thou shalt not set thee up an obelisk, which J^r thy God hatheth.'

(e) Dt refers to the worship of 'the host of heaven' as a dangerous form of idolatry (4¹⁹ 17⁹). We do not find in the historical books any mention of this superstition being a source of religious temptation until the days of Ahaz; see 2 K 23¹².

(f) The style of Jeremiah's writing shows abundant traces of the influence of Dt.

If we may take these hints together, we arrive at the probability of Dt having been composed during the period which intervenes between the accession of Ahaz and the literary activity of Jeremiah.

A *terminus ad quem* for the composition of Dt is supplied by the discovery of 'the book of the law' in the 18th year of the reign of Josiah (B.C. 621). There can be no manner of doubt that this book corresponded to a work practically identical with the main portion of Dt (5-26, 28). This work contained denunciations and curses, such as are found in Dt 28 (cf. 2 K 22^{11, 13, 19}); it contained mention of the covenant with J^r, with clear reference to Dt 28⁶⁹ (cf. 2 K 23^{2, 3, 21}). The reforms instituted by Josiah are such as would be required by conformity with the law of Dt, especially in regard to the centralization of worship, 2 K 23^{3, 9}; the prohibition of the worship of the heavenly bodies, 2 K 23^{4, 5, 11}; the prohibition of the high-places, obelisks, Ashérim, etc., 2 K 23^{4, 5, 14, 15}; the prohibition of religious prostitutes, 2 K 23⁷; the maintenance of the priests ejected from the local shrines, 2 K 23^{8, 9}; the prohibition of Molech worship, 2 K 23¹⁰; the celebration of the Passover in Jerusalem 'as it is written in this book of the covenant,' 2 K 23²¹⁻²³; the ejection of diviners and consultants with familiar spirits, 2 K 23²⁴.

The finding of this 'book of the law' in the temple is described as a fortuitous occurrence. There is no foundation for the suggestion that Hilkiah himself had written the book, and that the story of its finding was a fabrication. The account is straightforward and natural. It is

generally agreed that the book may have been written in the reign of Manasseh, or in the early part of the reign of Josiah. Hezekiah, who had commanded all Isr. worship to be offered at the sanctuary in Jerus. (2 K 18^{4, 22} 21⁹), commenced the policy of removing the high-places. Manasseh's reign reversed all that Hezekiah had done. It is thought probable that the composition of Dt was intended, in the days of Manasseh, to protest against the religious evils of that time, against the forms of superstition that had begun to find their way into Judah from Babylonia, as well as against the corruptions and disorders at the high-places which presented a form of J^w worship wholly alien to the teaching and spirit of the prophets of Israel.

Such a work, written in the troublous reign of Manasseh, may well have been deposited for safety within the precincts of the temple. The description of its discovery leads the reader to suppose that the book was one that had been written some considerable time before the 18th year of Josiah's reign. The character of Dt agrees exactly with the spirit of Huldah's warning in 2 K 22¹⁶⁻²⁰, where she speaks of the people of Judah having forsaken J^w, and burned incense to other gods, etc.

The traditional view, that the work in its present form was written by Moses, is now generally recognized by critical scholarship as impossible. The fact that Moses is described in Dt 31^{9, 24} as having committed the Deut. legislation to writing, was, in former times, regarded as sufficient proof that the whole work came from his hand. The writer (Dt 31⁹) narrates the fact that Moses 'wrote this law'; he also narrates the fact that Moses delivered farewell discourses to the people. There is no appearance of autobiography in Dt. There is no claim to Mosaic authorship for the whole work. A copy of the Deut. law is stated (Dt 31²⁶) to have been committed by Moses to the keeping of the priests 'by the side of the ark.'

Heb. laws went back to the founding of the nation under Moses. The name of Moses embraced the whole legislation, both in its earlier forms and in their later expansion and modification. The writer of Dt employed the nucleus of ancient law as the means of conveying the teaching needed by his time. The authority of Moses is invoked as impersonating the spirit of Isr. law in its later application, no less than in its original framing. Moses is made to plead with his people, and to show the abiding principles of the worship of J^w.

The work is that of a prophet, a religious teacher, not of a jurist or a statesman. In language, in thought, and in character, it is most easily understood as the composition of one who lived in the 7th cent., and who sought, by a 'dramatic' use of the last words of Moses, to recall his countrymen to a holier life, and a purer service of J^w. It has been objected that the allusions to the dwellers in Canaan, and to the Amalekites (7¹⁻⁵ 20¹⁶⁻¹⁹), would be unintelligible and unnecessary at so late a period as the 7th cent. B.C. But the writer's purpose is to transfer himself to the age of Moses, and from that historic standpoint to appeal to the nation's conscience. If Moses were represented as speaking in the plains of Moab, it would be natural for the writer to make him refer to the Canaanites, and to introduce suitable local allusions. And the writer's argument was perfectly intelligible. If severity of the sternest kind was traditionally said to have been inculcated by Moses against the idolatrous inhabitants of the land, how much more was it required in dealing with those who, in Israel itself, had proved so faithless to J^w, in spite of the warnings of the prophets!

It has been objected that the substance of Deut. laws is alluded to in writings earlier than the 7th

cent. B.C. Thus 1 S 28³ has been compared with Dt 18¹¹, Hos 4¹⁴ with Dt 23¹⁸, Hos 5¹⁰ with Dt 19¹⁴, Am 8⁵ with Dt 25⁴, Neh 2¹ with Dt 1¹⁵, while 2 K 14⁶ refers to the law contained in Dt 24¹⁶. But this line of objection assumes that the existence of the laws is contemporaneous with the composition of Dt, and it ignores the fact, which criticism has clearly revealed and strenuously reiterated, that Dt contains and expands laws of very much greater antiquity than its own composition.

In the following passages, in which the words of the prophetic writers have been regarded as referring to Dt, it is obvious that Dt, as well as the prophets, refers back to the older law of Ex 20-23:—

Is	117, 23	102=	Ex	22 ²¹ ,	Dt	24 ¹⁷ .
	1 ³	5 ²³	=	23 ⁸	16 ¹⁹ .	
Am	2 ⁸	=	22 ²⁵	24 ¹² .		
	5 ¹²	=	23 ⁶	16 ¹⁰ .		

There are, of course, in Dt abundant allusions to offerings (e.g. ch. 12), tithes (14²²⁻²⁹), distinctions of 'clean' and 'unclean' (12^{15, 22} 14³⁻²⁰), the 'solemn assembly' (16⁹), law of leprosy (24¹⁸), and kindred topics, which show the familiarity of Dt with the national religious observances; they do not exhibit acquaintance with the distinctive ordinances of P, although reference to them is necessarily made with technical terms.

Certain words and phrases have also been adduced from the prophetic writers, which it is alleged must have been taken from Dt, e.g. Hos 5¹¹ *oppressed* from Dt 28³³; 8¹³ *they shall return to Egypt* from Dt 28³⁸; 11⁸ *Admah and Zeboim* from Dt 29²²; Am 4⁹ *blasting and midew* from Dt 28²²; 4¹¹ *overthrow of Sodom and Gomorrah* from Dt 29²³; 5⁷ *wormwood* from Dt 29¹⁷ etc. But the occurrence of such words and phrases is not sufficient to justify the claim for direct citation. They are expressions, most of them, which would quite naturally occur independently to the writers. Nor is there any means of showing that there is more probability of these writers having borrowed a phrase from Dt than of Dt having borrowed a phrase from them. Considering the resemblance of Dt's style to the writing in Jer and Kings, it would be more natural to expect Dt to have borrowed from Hosea or Amos than for Hosea or Amos to have borrowed from Dt. The Deuteronomic style in Jer, Jos, Jg, Kings, shows at once the influence of Dt; but there is no clear proof of the earlier prophets having been acquainted with Dt.

LITERATURE.—For a fuller discussion of the subject the reader is referred to the admirable treatment of it by Driver, in his commentary on 'Deuteronomy' (*International Critical Commentary*, T. & T. Clark, Edinburgh), in his *LOT*, and in his art. 'Deuteronomy' in Smith's *DB²*; to all of which the writer of the present article is largely indebted. Other works dealing with the same subject, to which reference may be made, are the commentaries of Oettli and Harper, and *Einführungen* of Niehm, Cornill, König, Strack, Kuenen, Holzinger; Cheyne, *Jeremiah* ('Men of the Bible' series); W. R. Smith, *OTJC²*; Ryle, *Canon of the OT*; Montefiore, *Religion of the Ancient Hebrews*; Wildeboer, *Lit. d. A.T.*; Piepenbring, *La Reforme et le Code de Josias*, in *Revue d. l'Histoire des Religions*, t. xxix. 1894.

H. E. KYLE.

DEVIL.—See DEMON, SATAN. **DEVOTED THINGS.**—See ACCURSED, CURSE.

DEVOTION.—RV gives 'devotion' for AV 'prayer' in Job 15⁴ (שִׁבְחָה). In AV the word is found only Ac 17²³ 'as I passed by, and beheld your devotions,' Gr. τὰ σεβασμὰ ὑμῶν, RV 'the objects of your worship.'

That RV gives the meaning of the Greek there is no doubt. The same Gr. word occurs Wis 14²⁰ (Vulg. *deus*, AV 'a god,' RV 'object of devotion'), 15¹⁷ (Vulg. *quos colit*, AV 'the things which he worshippeth,' RV 'object of his worship'); Bel 2⁷ (EV 'the gods ye worship'); and 2 Th 2⁴ (EV 'that is worshipped,' RVm 'an object of worship'). Did the AV translators understand 'devotions' in the sense of 'objects of worship,' then? Aldis Wright (*Bible Word-Book*, 2 p. 198 f.), after a

full discussion, concludes that they did not. He quotes, however, from Sidney, *Arcadia* (ed. 1598, p. 282 [ed. 1622, p. 277]), as follows: 'Dametas began to speake his lowd voyce, to looke big, to march up and downe, and in his march to lift his legges higher than he was wont, swearing by no meane deuotions, that the walls should not keepe the coward from him.' The *Oxf. Eng. Dict.* gives 'an object of religious worship' as one of the meanings of 'devotion,' quoting the above from Sidney, Ac 17²², and a passage from Fletcher (1625), *Double Marriage*, iv. iv.: 'Churches and altars, priests and all deuotions, Tumbled together into one rude chaos'; but says, 'this sense is not very certain, the meaning of the quotations being in every case doubtful.' As Wright points out, AV took the word from Gen. Bible of 1560; Wyclif (1380) having 'mawmetis'; Tind. 'the maner how ye worship your goddes,' so Cran., Gen. of 1557 (Whittingham), Bishops'; Cov. 'youre gods seruyce' (from Zurich Bible, *euure Gottsdienst*); Rhem. 'your Idols.' But it has not been observed that Tomson's NT of 1578, which from 1587 onwards supplanted the NT of 1560 in most copies of the Gen. Bible, has the marg. note: 'Whatsoever men worship for religion's sake, that we call deuotion.' That note, which removes all doubt of this meaning from the word, was before the translators of AV, and they would have no hesitation in using an abstract word in this concrete sense: cf. Ac 14¹⁵ Gr. τὰ ματαία, AV 'vanities,' RV 'vain things.' Coverdale has 'deuotion' in Ja 1²⁶ for AV and RV 'religion.'

J. HASTINGS.

DEW (לַבֵּ, *tal*).—i. The atmosphere is capable of holding in suspension a certain amount of aqueous vapour proportionate to its temperature under a given pressure. The greatest amount is taken up during the daytime; but on the approach of sunset, when the temperature is lowered, part of the vapour is precipitated in the form of dew, till the dew-point is reached.

This process is enhanced in Eastern countries like Palestine, where the surface of the ground and the air in contact therewith are highly heated during the daytime, but where at night, and particularly under a cloudless sky, the heat of the ground is radiated into space and the air becomes rapidly cooled down. The excess of moisture in the air then gently 'falls as dew on the tender herb,' and sometimes so copiously as to sustain the life of many plants which would otherwise perish during the rainless season; or even, as in the case of Gideon, to saturate a fleece of wool (Jg 6³⁸). When the sky is clouded, radiation is retarded, and rain may fall. Thus rain and dew alternately benefit the vegetation; and to the latter agent may possibly be ascribed the presence of a beauteous, though dwarfed, flora amongst the waterless valleys of the Sinaitic Peninsula, which in the early morn sparkles in the sunshine, owing to the multitudes of dewdrops which have settled on the leaves and stems of the plants during the cool hours of the night.

ii. Thus deprivation of dew, as well as of rain, becomes a terrible calamity in the East. On this account 'dew and rain' are associated in the imprecation called down by David on the mountains of Gilboa in his distress at the tidings of the death of Saul and Jonathan (2 S 1²¹); and in the curse pronounced on Ahab and his kingdom by Elijah (1 K 17¹); as also by the prophet Haggai on the Jews after the Restoration (Hag 1¹⁰) owing to their unwillingness to rebuild the temple.

iii. In the Book of Job the formation of dew is pointed to as one of the mysteries of nature insoluble by man (Job 38²⁸); but in Pr it is ascribed to the omniscience and power of the Lord (Pr 3²⁰).

iv. Dew is a favourite emblem in Scripture; the following are examples: (a) Richness and Fertility, 'God give thee of the dew of heaven (Gn 27²⁸, Dt 33¹³). (b) Refreshing and Vivifying effects, 'My speech shall distil as the dew' (Dt 32²); 'Like a cloud of dew in the heat of summer' (Is 18⁴). (c) Stealth, 'We will light upon him as the dew falleth on the ground' (2 S 17¹²). (d) Inconstancy; the goodness of Judah is 'as the early dew, it goeth away' (Hos 6⁴); Ephraim . . . shall be 'as the early dew that passeth away' (ch. 13³). (e) The young warriors of the Messianic king,

with flashing weapons like dewdrops, 'Thou hast the dew of thy youth' (Ps 110³).

E. HULL.

DIADEM.—This term (*διάδημα*) was applied by the Greeks to the emblem of royalty worn on the head by Pers. monarchs (Xen. *Cyr.* viii. 3. 13). It consisted of a silken fillet, 2 inches broad, of blue or purple, mixed with white, tied at the back of the head. Originally intended to confine the hair, and worn by all Persians, it became an ornamental head-dress, the king's being distinguished by its colour, and perhaps by jewels studding it. It was tied round the lower part of the *khshatram* (Heb. כִּרְתָּ, Gr. κίραπς or κίραπς; see Rawlinson, *Anc. Mon.* iii. 204 note), a tall, stiff cap, probably of felt, and of bright colours, which formed the tiara or turban of the king (Q. Curt. iii. 3. 18, 19; see head from Persepolis in Rawlinson, iii. 166). The head-dress of soldiers other than the king was soft, and fell back on the head (Suidas, *Lexicon*, τιάρα. See also the Pompeian mosaic of the battle of Issus, given in Ainé, *Herculaneum and Pompeii*). Later, the fillet was enlarged by broad pendants falling on the shoulders. The Persian diadem was adopted by Alexander and his successors (1 Mac 1⁹; Herodian, i. 3. 7). To the Greeks and Romans it was the distinctive badge of royalty, unlike the wreath, and is commonly described as white (Tac. *Annales*, vi. 37). Its presentation to Julius Cæsar was therefore specially offensive (Cic. *Phil.* ii. 34; Sueton. *Jul.* 79). Pliny (*NH* vii. 57) attributes its invention to Father Liber (the supposed Latin Dionysus), and it was long confined in art to him; but later artists placed it on the head of other deities. Diocletian was the first Rom. emperor to wear it permanently and publicly. Out of it, in combination with the 'corona,' the later royal crowns were developed.

In LXX *διάδημα* is used loosely to translate not only 'crown royal' (כִּרְתָּ עֲלֵי מֶלֶךְ Est 1¹¹ 2¹²) but 'pallium' (כִּרְתָּ Est 8¹⁵ *διάδημα βύσσινον πορφύρεον*) and 'tiara' (כִּרְתָּ Is 62³). But not so in Job 29¹⁴, Is 3²³; in Zec 3⁵ כִּרְתָּ is tr. κίραπς, a rendering also given to the high priest's turban in Ezk 21²¹ (26²⁸, Lv 16⁴). In 1 Mac 1⁹ 13³² it describes the strictly royal insignia for the head adopted by the Greeks from the Persians (*διάδημα τῆς Ἀσίας*). In AV of OT, diadem is again used loosely for the high priest's turban (Ezk 21²⁶ כִּרְתָּ), a royal tiara (Job 29¹⁴, Is 62³ כִּרְתָּ) and a crown (Is 28⁵ כִּרְתָּ). RV more properly confines diadem to the last three passages, using 'mitre' in Ezk 21²⁶, and also 'turban' in the marg. of Job 29¹⁴. But though thus the royal head-dress of the kings of Israel is not described as a diadem, there can be but little doubt that it was such (see CROWN). In NT the distinction between *crown* and *diadem* is accurately observed in the Gr. and in RV, but not in AV. *Diadem* should be read in Rev 12³ 13¹ 19¹², where it symbolizes respectively the empire of 'the dragon,' 'the beast,' and of the royal Christ. The phrase 'on his head were many diadems,' describes Christ's universal dominion (see CROWN; also for bibliography).

G. T. PURVES.

DIAL (כְּעֵלִי, *ἀναβαθμολογία, horologium*), RVm 'Heb. steps,' 2 K 20¹¹, Is 38⁸.—The Heb. word commonly denotes 'steps' (see Ex 20²⁸, 1 K 10¹⁹), and is so rendered elsewhere in this narrative (2 K 20⁹⁻¹¹, Is 38⁸; AV *degrees*). The 'steps' referred to are doubtless not simply the steps of the palace (so LXX, Jos. *Ant.* x. ii. 1), but formed part of some kind of sun-clock (so Targ., Vulg., Jerome on Is 38⁸, and most commentators). According to Herod. ii. 109, the Babylonians were the inventors of the *πολός*; or concave dial, the *γυμνασιον*, and the division of the day into 12 hours. The introduction by Ahaz of a device for measuring the time may be regarded as a result of his intercourse with the

Assyrians (2 K 16^{off.}), but it is uncertain what kind of clock is intended. Some have supposed that it was in the form of a dial with concentric circles, and a central gnomon (Ges., Hitz., Keil, etc.); but it is doubtful whether *ἡλίος* can denote 'degrees.' Hence it seems simpler to think of actual 'steps' arranged round a pillar or obelisk, the time of day being then indicated by the position of the shadow on the steps. Since in 2 K *l.c.* it is regarded as possible for the shadow to go down or to return 10 steps, it is clear that these steps did not each mark an hour of the day, but some smaller period of time. In biblical Heb., indeed, no word denoting an *hour* is found; *שָׁעָה* first appears in the Aram. of Dn 4¹⁶ (Eng. 19) 5⁵. Our ignorance of the real form of the 'dial' of Ahaz renders precarious all attempts at explaining the phenomenon of the recession of the sun's shadow. Moreover, a discussion of the problem requires a critical comparison of the parallel accounts in Is and 2 K; and it must be recognized as probable on independent grounds, that our narrative is considerably later than the time of Hezekiah. Cf. esp. Dillmann and Cheyne on Is 38¹⁻³.

DIAMOND.—See STONES (PRECIOUS).

DIANA OF THE EPHESIANS is the Latinized rendering of the name Artemis (*Ἄρτεμις τῶν Ἐφεσίων*), by which the Greeks designated a goddess whose sanctuary was situated close to Ephesus. The situation and splendour of the temple, and the part that the sanctuary and its priests played in the history of the city, through the influence of the conservative anti-Greek party, which favoured the interests of the temple and the power of the goddess, are described under EPHEBUS. The goddess, who had her seat in the rich valley near the mouth of the Cayster long before Gr. colonists had set foot on the Asian coast, had little in common with the chaste virgin goddess Artemis of Greek poetry and mythology. She was the impersonation of the vitality and power of nature, of the reproductive power which keeps up the race of man and animals in an unbroken series of offspring, and of the nourishing power by which the earth tenders to the use of man and animals all that they require to keep them in life. She was worshipped, with almost complete identity of character and image, over the whole of Lydia; and the Lydian Artemis presents such close analogies with the Phrygian Cybele, and with other feminine envisagements of the divine power in Asiatic countries, like the Cappadocian Ma, the Phœnician Astarte or Ash-taroth, the Syrian Atargatis and Mylitta, as to suggest that these are all mere varieties of one ultimate religious conception, presenting in different countries certain differences, due to varying development according to local circumstances and national character. The old hypothesis that this widespread similarity was due to Phœn. colonists, who carried their own goddess with them to new lands, is now discredited: there is no evidence that Phœnicians ever settled in the Cayster Valley, still less in other parts of Lydia.

The Ephesian goddess was represented by a rude idol, which was said to have fallen from heaven (Ac 19³⁸*)—a tradition which attached to many sacred and rude old statues, such as that of Cybele at Pessinus (said to be merely a shapeless stone), Athena Polias on the Athenian Acropolis, etc. In the representation which is familiar to

us from coins, statues, and statuettes, the goddess appears as a standing idol, in shape partly human; the upper part of the body in front is covered with rows of breasts (symbolizing her function as the nourishing mother of all life); the lower part is merely an upright block, without distinction of legs or feet, covered with symbols and figures of animals; the arms from below the elbows are extended on each side, and the hands are supported by props; the head is surmounted either by a lofty ornament, *polos*, or by a mural crown, and something like a heavy veil hangs on each side of the face down to the shoulders; the figure stands on a peculiarly shaped pedestal, generally low on coins, but sometimes high; frequently stags accompany the goddess, one on each side. A similar representation of the native goddess is found very widely both in Lydia and in Phrygia. The Gr. colonists in Ephesus identified this Oriental deity with their own Artemis, on account of certain analogies between them; they represented her on their coins in the Gr. character, and introduced some of the Gr. mythology of the twins Artemis and Apollo; but they never succeeded in really affecting the cultus, which remained always purely Asian and non-Greek. The chief priest bore the Persian title *Megabyzos*, and in earlier time he had to be a eunuch; but Strabo seems perhaps to imply that this condition was no longer required, when he was writing (about A.D. 19). Some authorities think that there was a body of *Megabyzoi* in the ritual; but Canon Hicks seems rightly to argue that the title was appropriated to the single chief priest, who represented the divine associate of the goddess, Attis or Atys, whom she herself mutilated. A large body of priestesses were under his authority, divided into three classes (Plutarch, *An seni sit per. resp.* p. 795, § 24), called *Mellierai*, *Hierai*, and *Parierai*; and according to Strabo they originally had to be virgins. Some authorities seem to apply the name *Melissai*, 'Bees,' to them; and the bee is the most characteristic type on earlier Gr. coins of Ephesus. A single priestess (*lépeia*) is mentioned in inscriptions, who was probably the head of the cultus and representative of the goddess.

There was also a body of priests (some wrongly say a single high priest), to whom was given the title *Essenes*. The *Essenes* were appointed for a year only (Paus. viii. 13. 1); and they seem to have been officials at once of the city and of the sanctuary, for they allotted new citizens to their proper tribe and division, sacrificed to the goddess on behalf of the city, and seem in general to have guarded the relations between the State and the goddess. Various other bodies of ministers attended the sanctuary, such as the *Kouretes*, the *Akrobatai*, the *Hieroi*, whose nature and duties are obscure (the first two, perhaps, colleges similar to the modern dervishes, the last a Greek form of *hierodouloi*). There can be no doubt that the ritual was of an orgiastic type, and accompanied with ceremonial prostitution and other abominations: traces of the ritual and its accompaniments are collected in the works on Ephesus (which see); the Lydian ritual of the *Mysterics*, which are mentioned at Ephesus in inscriptions (Hicks, p. 147, *CIG* 3002; Strabo, p. 640), as well as in many other cities, is described in *Cities and Bishoprics of Phrygia* (Ramsay), i. p. 91 ff., and the general character of the religion in *Lyd. et le Monde Grec.* (Radet), p. 261 ff.

The epithets 'Queen of Ephesus' and 'great' or 'greatest' seem to have been specially appropriated to Artemis in Asia: so *CIG* 2963 c. *τῆς μεγάλης θεᾶς* "A., 6797, *Ἐπίου ἀνασσα*; Xen. *Eph.* i. 11. p. 15, *τὴν μεγάλην Ἐφεσίων* "A.; Achilles, *Tal.* viii. 9. p. 501, ἡ "A. ἡ μεγάλη θεός; Hicks, No. 481, l. 278, *τῆς μεγίστης θεᾶς* "A. Further, the expression *μεγάλη Ἄρτεμις* seems to have been a formula of an invocatory character: see

* In this place the rendering 'which fell down from Jupiter' (AV and RV) gives a wrong impression: the word *διοπτουῖς* merely indicates that the image was believed to have fallen from the clear sky. In Eurip. *Iph. T.* 977, 1384, *οὐρανοῦ πίσημα* is given as the equivalent and explanation of *διοπτίς ἀγάλμα*.

the inscriptions given in *Bulletin de Corresp. Hellénique*, 1880, p. 430, from Lesbos; and in Ramsay, *Hist. Geogr. of As. Min.* p. 410, from Pisidia (cf. *μίσγος* 'Απόλλων, *id.* *Cities and Bishoprics of Phrygia*, p. 151, No. 49, *μεγάλη* 'Αναΐτις; *Mous. et Bibliotheca Smyrn.*, No. υλζ'). It is therefore probable that the shouts of the excited crowd in the Ephesian theatre (Ac 19³⁴) were really invocations to the goddess, as her worshippers repeated a formula familiar in her ritual (see Ramsay, *Church in Rom. Emp.* p. 138 f.).

The *Naoi* or Shrines of Artemis, which were made in silver by artisans such as Demetrius, and in other less expensive materials (esp. marble and terra-cotta) by 'the workmen of like occupation' (*τοῖς περὶ τὰ τοιαῦτα ἐργάταις*, Ac 19²⁵), were first correctly explained by Prof. E. Curtius (*Athen. Mittheil. d. Instituts*, ii. p. 49 f.). They were not mere statuettes of the Ephesian Diana,* for such could not be called 'shrines.' The worshippers of the goddess dedicated to her representations of herself in her shrine: 'a great city erected a great temple with a colossal statue of the goddess; private individuals propitiated her with miniature shrines containing embodiments of her living presence. The vast temple and the tiny terra-cotta shrine were equally acceptable to Artemis; she accepted from her votaries offerings according to their means; she dwelt neither in the temple nor in the terra-cotta shrine; she lived in the life of nature; mother of all, and nurse of all, she was most really present wherever the unrestrained life of nature was most freely manifested: in the woods, on the mountains, among the wild beasts. Her worshippers expressed their devotion, and their belief in her omnipresence, by offering shrines to her, and doubtless by keeping shrines of the same kind in their own homes, certainly also by placing such shrines in graves beside the corpse, as a sign that the dead had gone back to the mother who bore them' (*Church in Rom. Emp.* p. 125 f.). These small dedicatory shrines were not modelled after the splendid Gr. temple of Artemis; for the creations of Gr. art in sculpture and architecture, beautiful as they were, were never so holy in the estimation of devotees as the simple and rude types of primitive art and religion. The type most familiar to us from extant remains shows the goddess seated in a niche or naiskos, sometimes alone, sometimes accompanied by one or two figures (among them her favourite Atys). In the ruder examples, she sits in stiff fashion, holding in one hand the tambourine (*τύμπανον*), in the other a cup (*φιάλη*). Beside her are one or two lions. In some more artistic examples, she has laid aside the stiff symbols, and sometimes caresses with one hand the lion which climbs to her knee or lies in her lap. Sometimes the lion serves her as a footstool; in other cases two sit in stiff symmetry, one on each side of her throne. Works of this class are found very widely both at Ephesus and elsewhere, in marble and in terra-cotta; the examples in marble are usually marked by inscriptions as dedicatory; no examples in silver have been preserved, but naturally their intrinsic value led to their being melted down. The precise relation between this type and the Lydian type already described (commonly designated, wherever found, as the Eph. Artemis) has not yet been determined. It is highly probable that the whole class of sacred dedicatory objects fabricated by the artisans for use in the cultus of Artemis were designated by the generic term *naoi*, taken from the most common and characteristic type.

LITERATURE.—See under EPHESUS.

W. M. RAMSAY.

DIBLAH (דִּבְלָהַ), Ezk 6¹⁴.—Four MSS read Riblah (which is accepted by Cheyne, Davidson, Hitzig, Smend, Cornill, Siegfried-Stade, and *Oxf. Heb. Lex.*). It was near a wilderness, and this would suit for Riblah. It has also been supposed to be Beth-Diblathaim. There is a village in Upper Galilee called *Dibl*. See *SWP* vol. i. sh. iii.

C. R. CONDER.

DIBLAIM (דִּבְלַיִם, Διβλαϊμ), the father of Gomer, Hosea's wife. See GOMER, HOSEA.

DIBON.—1. (דִּבּוֹן in MT, but the spelling דִּבּוֹן of the Moabite Stone and *Δαιβών* of LXX indicate that the ' had a consonantal value; see Driver, *Notes on Heb. Text of Samuel*, lxxxix.). A city east of the Dead Sea and north of the Arnon in the land which, before the coming of the Israelites, Sihon, king of the Amorites, had taken from a former king of Moab (Nu 21^{26, 30}). The Israelites dispossessed Sihon, and the territory was assigned to Reuben (Jos 13^{8, 17}), but the city Dibon is mentioned among those built (or rebuilt) by Gad (Nu 32^{3, 34}), hence the name *Dibon-gad* by which it is once called (Nu 33⁴⁵). The children of Israel were not able to retain possession of the land, and in the time of Isaiah Dibon is reckoned among the cities of Moab (Is 15). In Is 15⁹ *Dimon* is supposed to be a modified form of Dibon, adopted in order

* Canon Hicks, *Expositor*, June 1890, p. 403 ff., takes a different view.

to resemble more closely the Hebrew word for blood (*Dām*), and support the play on words in that verse.

The modern name of the town is *Dhiban*, about half an hour N. of 'Ara'ir, which is on the edge of the Arnon Valley. It is a dreary and featureless ruin on two adjacent knolls, but has acquired notoriety in consequence of the discovery there of the Moabite Stone. See Tristram, *Land of Moab*, p. 132 f., Seetzen, *Reisen*, i. 400, and cf. MOAB.

2. A town in Judah inhabited in Nehemiah's time by some of the children of Judah (Neh 11²⁹). Perhaps it is the same as *Dimonah* (Jos 15²²) among the southernmost cities of Judah. If this identification be correct, it illustrates the passage Is 15⁹ referred to in (1).

Dibon-gad (Nu 33⁴⁵ only); see above.

A. T. CHAPMAN.

DIBRI (דִּבְרִי).—A Danite, grandfather of the blasphemer who was stoned to death, Lv 24¹¹.

DIDRACHMA.—See MONEY.

DIDYMUS.—See THOMAS.

DIE.—To die by a specified form of death is a common expression; as Caxton (1477), *Jason*, 42: 'If I dye not of bodily deth I shal dye of spirituall deth'; and so Caxton, *G. de la Tour*, Gv v.: 'Your sone deyde this nyght of a good dethe.' Similar is the phrase Nu 16²⁹ 'If these men die the common death of all men'; and 23¹⁰ 'Let me die the death of the righteous,' and other examples in which the prep. is omitted. But the expression 'die the death' is un-English, and is prob. everywhere due to a literal rendering of the Heb. idiom. It occurs Sir 14¹⁷ 'the covenant from the beginning is, Thou shalt die the death' (Gr. *θανάτω ἀποθανῆν*, from Gn 2¹⁷ 'thou shalt surely die,' Heb. *מוֹת חַיִּים*, lit. 'dying thou shalt die,' LXX *θανάτω ἀποθανείσθε*); and Mt 15⁴ 'He that curseth father or mother, let him die the death' (Gr. *θανάτω τελευτάτω*, lit. 'let him end by death,' Vulg. *morte moriatur*, Cov. 'shal dye the death,' after whom Cran., Gen., Bish., AV, RV; but Rhem. 'dying let him dye'). The phrase 'die the death' is not uncommon in Shaks., and is generally interpreted as meaning 'die the death appointed for the particular offence'; but it is probably a reminiscence of the phrase in Mt,* and means 'let him assuredly die.' Thus *Mids. Night's Dream*, I. i. 65—

'Either to die the death, or to abjure
For ever the society of men.'

J. HASTINGS.

DIET (fr. Gr. *δίαίτα*, mode of life, through late Lat. *dieta*) is used in AV in the obsol. sense of 'an allowance of food,' Jer 52²⁴ 'And for his [Jehoiachin's] diet, there was a continual diet given him' (אֲרָחָתוֹ אֲרָחָתוֹ אֲרָחָתוֹ, RV 'allowance,' as AV in par. passage 2 K 25³⁰). In Pr 15¹⁷ the same Heb. is tr. 'dinner,' with 'portion' in RVm; in Jer 40⁵ 'victuals,' RVm 'an allowance'. The Eng. word is rare in this sense, and is not used in any previous version here. In the more usual sense it occurs Sir 30²⁵ 'A cheerful and good heart will have a care of his meat and diet'; cf. Chaucer (*Prolog.* 435)—

'Of his diet measurable was he,
For it was of no superfluitee,
But of greet norissing and digestible.'

J. HASTINGS.

DIKLAH (דִּיקְלָה, Δεκλά).—The name of a son of Joktan (Gn 10²⁷, 1 Ch 1²¹), probably representing a nation or community. The Aramaic name for the river Tigris (*Diklath*) is practically identical with this form, and hence the conjecture of Michaelis, that *Diklah* signified the dwellers on

* Cf. *Macbeth*, iv. iii. 111: 'Died every day she lived,' a recollection, no doubt, of 1 Co 15³¹ 'I die daily.'

that river, is not wholly improbable; we know, however, of no community so called, and the home of such of the Joktanidæ as can be identified with certainty is in Arabia. The word *dakal* (in Syr. *deklā*, 'palm') is well known in Arabic, and signifies dry dates of bad quality; as they possess no cohesive power, to 'scatter like *dakal*' is a proverbial phrase. The geographer Yāqūt knows of a place in Yemamah called *Dakalah*, 'where there were palm trees,' of too little importance to be connected with the son of Joktan; moreover, the corresponding form in Hebrew should be *Dekālāh* rather than *Diklah*. The names immediately preceding and following *Diklah* give no clue to its identification. D. S. MARGOLIOUTH.

DILAN (דִּלָּן), Jos 15³⁸.—A town of Judah in the same group with Lachish and Eglon. The site is unknown. C. R. CONDER.

DILIGENCE.—'Derived from *diligo*, to love, "diligence" reminds us that the secret of true industry in our work is love of that work' (Trench, *Study of Words*, p. 314). But as diligence has gradually forgotten the rock whence it was hewn, it has also lost some of its proper meaning. It is a synonym now for 'industry'; but formerly it was also a syn. for 'carefulness,' since our love of a work may express itself as readily in care or caution as in perseverance. Hence Wyclif's tr. of 1 Ti 3⁵: 'If ony man kan not gouerne his hous, how schal he haue diligence of the chirche of God'; and Coverdale's tr. of Pr 4²³: 'Kepe thine hert with all diligence,' which is retained in AV and RV. Cf. Knox, *Historie*, 15: 'He declared what diligence the ancients took to try true miracles from false.' *Diligent* and *diligently* had the same range of meaning. Thus Job 42⁵ Cov. 'I have geuen diligent eare unto the' (Gen., AV 'I have heard of thee by the hearing of the ear,' RV 'I had heard,' etc.—thus reversing Coverdale's meaning); AV 1611 Title, 'with the former Translations diligently compared and revised'; Shaks. *Tempest*, III. i. 42—

'The harmony of their tongues hath into bondage
Brought my too diligent ear.'

J. HASTINGS.

DILL.—See ANISE.

DIMINISH.—To diminish is to make less, and that primary meaning is alone in use now. We do not even use the word figuratively, 'to lessen the influence of,' 'belittle,' as Ezk 5¹¹: 'therefore will I also d. thee'; 29¹⁸: 'I will d. them, that they shall no more rule over the nations'; Is 21¹⁷: 'the mighty men . . . shall be diminished' (RV 'shall be few'); Ro 11¹²: 'if . . . the diminishing of them [be] the riches of the Gentiles' (τὸ ἕττημα αὐτῶν, RV 'their loss,' Sanday-Headlam 'their defeat'). Cf. Argument of Ep. to Heb. in Gen. NT: 'For seing the Spirit of God is the autor thereof, it diminisheth nothing the autoritie, although we knowe not with what penne he wrote it.' Still less can we speak of diminishing one thing from another, *i.e.* withdrawing or withholding, so as to *cause* diminution, as Dt 4²: 'Ye shall not add unto the word which I command you, neither shall ye d. ought from it'; Jer 26²: 'd. not a word' (RV 'keep not back'). So in Atkinson's tr. (1504) of *De Imitatione*, IV. ix.: 'Take from our hertis . . . all that may . . . dimynyshe vs from thy eternall loue.'

J. HASTINGS.

DIMNAH (דִּמְנָה).—A Levitical city in Zebulun, Jos 21³⁵. Dillmann, followed by Bennett in Haupt's *OT*, emends to דִּמְנָה, *Rimmon* (cf. 1 Ch 6²², Jos 19¹³).

J. A. SELBIE.

DIMON, DIMONAH.—See DIBON.

DINAH (דִּינָה).—The daughter of Jacob by Leah (Gn 30²¹). The composite and very obscure narrative of Gn 34 relates how, when Jacob was encamped at Shechem, after his return from Mesopotamia, she was seduced by Shechem the son of Hamor, a Hivite prince. This outrage was bitterly resented by her full brothers, Simeon and Levi. Shechem was ready to prove his attachment by marrying the maiden, and offered to pay any marriage price or dowry that might be fixed by her family. To this her brothers consented, but only on condition that all the men of Shechem should be circumcised. This being conceded, her brothers made it the means of inflicting a barbarous revenge for their sister's dishonour, by killing all the men of the place on the third day, and the effects of the circumcision made them incapable of self-defence. Both at the time and on his death-bed, their father Jacob (according to J) spoke of this act with indignation and abhorrence (Gn 34³⁰ 49⁵⁻⁷). It was, however, approved by later Jewish fanatics (Jth 9²). (For the tribal significance of Dinah and the historical incidents which may underlie the above narrative, see SIMEON.) R. M. BOYD.

DINAITES (דִּינָיִם, LXX Δειναῖοι, Ezr 4⁹), a people settled in Samaria by Osnappar (*i.e.* probably Assurbanipal). They joined with the other Samaritans in denouncing the Jews to Artaxerxes. The Dinaites have been variously identified with the Da-ja-ēni, a tribe of western Armenia, mentioned in inscriptions of Tiglath-pileser I. (Schrader); and with the inhabitants of Deinaver, a Median city (Ewald), or of Din-Sharru near Susa (Fried. Delitzsch). On account of the other peoples named in the same verse, the last view seems the most probable. See further Meyer, *Judenthum*, 39 f. H. A. WHITE.

DINHABAH (דִּינְחָבָה).—The capital city of king Bela in Edom (Gn 36³² = 1 Ch 1⁴³). There is some doubt as to its identification. The name, which is accented so as to mean 'Give judgment' (Ball, *Genesis, ad loc.*), occurs in Palmyrene as *Danaba* or *Dahbāna* (דַּנְבָּנָא); cf. *Δανάβη* in Babylonia, and see Dillm. and Del. on Gn 36³². It has been proposed by Neubauer (*Academy*, 1891, p. 260) to identify Dinhabah with *Tennib*. This is accepted by Tomkins (*ib.* p. 284), who further identifies *Tennib* with *Thenib*, E.N.E. from Heshbon, described in Tristram's *Moab*, p. 222. See further Hommel, *Anc. Heb. Tradition*, 223 n. J. A. SELBIE.

DINNER.—See FOOD.

DIONYSIA (Διονύσια, *Bacchanalia*, EV 'Feast of Bacchus'), 2 Mac 6⁷.—A festival in honour of Dionysus. Dionysus is usually regarded as the god of the vine, but, as Frazer shows in the *Golden Bough*, he was a god of trees in general. As he comes before us in Greek worship, he is quite clearly a vegetation deity; but Jevons may be right in thinking that two cults have been combined,—that of the vegetation spirit and that of the wine-god Dionysus, the latter lending its name to the former, which at first was naturally nameless. The character of the god is to be determined, not from the myths told about him, which are tales invented to explain the ritual, but from the ritual itself, interpreted through comparison with parallel rites among other peoples. The festival was intended to celebrate the revival of vegetation in spring after the long sleep of winter. Not only to celebrate it, however, but by sympathetic magic to secure the fertility of the fields. This imitation of the processes of nature was associated with the wildest orgies and excesses, stimulated no doubt, in this instance, by the connexion of Dionysus

with the vine. Jevons gives a reconstruction of the festival as it was held at Thebes and other places. A branch, or something else representing the vegetation spirit, was carried round the cultivated fields, to secure his blessing on the crops. A human figure, also representing this spirit, was fastened to the top of a tree trunk, which had been felled and prepared for the purpose. This was hoisted up and then pelted till it fell. The women then tore it in pieces, and the woman who got the head raced with it to the temple or chief house and nailed it to the door. But in many cases the rites were much more savage, and bulls or goats, which represented the god himself, were torn to pieces by the worshippers in a mad scramble to possess themselves of portions of the flesh, and even human beings suffered at times in this way. The flesh was taken home and some of it buried in the fields. (For parallels to this custom of killing the god the *Golden Bough* should be consulted. It secured a certain communion with the deity, the preservation of his vigour through the death of his temporary representative and his re-incarnation in a fresh life, and the fertility of the land in which the flesh was buried). The most famous festivals of Dionysus were held in Attica. Besides the *Anthesteria* and *Lenæa* there were two, known as the Lesser and the Greater Dionysia. The former was held in country districts in December, and was a vintage festival, accompanied by dancing, songs, improvised dramatic performances, and a procession, in which the phallus was borne. The utmost licence of speech and conduct characterized it. The Greater Dionysia were held in the city, and were chiefly important from the fact that at them the great dramas of the tragic and comic poets were produced. Before the dramatic performances there was a great public procession of worshippers, wearing masks and singing the dithyramb, in which an image of Dionysus was carried from one temple to another. This was followed by a chorus of boys. According to 2 Mac 6⁷ Antiochus compelled the Jews, when the feast of Dionysia (RVm) came, to go in procession in honour of Dionysus, wearing wreaths of ivy. The ivy was specially sacred to the god. See further under DIONYSUS.

A. S. PEAKE.

DIONYSIUS.—Dionysus, designated the Areopagite (*ὁ Ἀρεοπαγίτης*), is mentioned as one of the few converts made by St. Paul at Athens (Ac 17³⁴). He is probably thus specially named as having been a member of the Council of Areopagus (see **AREOPAGUS**). Nothing further is known of him. It has been suggested that St. Luke, who apparently was not at Athens, may have owed to Dionysius his report of the speech on Mars' hill. According to Dionysius of Corinth (in Euseb. *HE* iii. 4) he became the first bishop of the church at Athens; according to one account (Niceph. *HE* iii. 11) he suffered martyrdom at Athens under Domitian; according to another (*Martyr. Rom.*), having come to Rome, he was sent by Clemens I. (about 95) to Paris, and there beheaded on the Martyrs' Mount (*Montmartre*); and no small controversy has arisen in France over his title to be regarded as St. Denys, the patron saint of France. Various mystical writings, circulated in the Middle Ages under his name, are still extant; but they have long been regarded as non-genuine, and are now generally supposed to have been put into circulation about the 5th century. WILLIAM P. DICKSON.

DIONYSUS (Bacchus).—A Greek god, in whose worship there are three distinct strata. The first consists of those rites with which spirits of vegetation (originally probably plant-totems) are worshipped by all primitive peoples, in the new world

as well as the old, who possess any cultivated plants. This stratum is probably not older than the separation of the European from the other members of the Aryan family, for it was only after that separation that the Aryans began to domesticate plants. The next consists in the worship associated with the cultivation of the vine: this originated where, according to the most recent researches, the vine was first cultivated by the European branch of the Aryans, viz. in Thrace. The process of syncretism by which these rites were amalgamated with those of the vegetation-spirit was not completed, if indeed it had begun, in the time of Homer; for in the Homeric poems D. occurs as a god, but is not associated with the vine, except in passages generally admitted to be comparatively late interpolations. The third stratum belongs to the 7th cent. B.C., the period in which, among the E. nations conquered by the Assyrians and Babylonians, national calamity led men to look for assistance to a ritual more potent than that in daily use. This more potent ritual was found in the older and more awful forms of sacrifice which lingered on in connexion with out-of-the-way altars. To the form of worship thus revived, only those were admitted who were formally initiated into these 'mysteries.' From the East the institution of 'mysteries' spread to Greece; and the reason why it attached itself particularly to the worship of such deities as Demeter and Dionysus was that that worship was an evolved form of the rites (common to many Aryan and Semitic and other peoples) with which vegetation-spirits were originally worshipped. The resemblances which thus made possible the spread of 'mysteries' from the East to the West also facilitated that dissemination of the worship of Dionysus over the E., for which mythologists (e.g. Nonnus) accounted by the hypothesis of an E. campaign on the part of the god. It is in the readiness with which the worship of D. was received in many parts of Syria and Pal. that we find the explanation of the attempts or threats to establish the worship of D. amongst the Jews: it was presumed, e.g. by Nicanor (2 Mac 14³²) and Antiochus Epiphanes (2 Mac 6⁷), that it would be acceptable to them as to other peoples, while Ptolemy Philopator, who branded the Jews with the ivy-leaf of Dionysus (3 Mac 2²⁹), had an additional motive, in the fact that D. was the family God of the Ptolemies, for forcing his worship on them by a means analogous to that which many Hindoo sects adopt to symbolize their devotion to their particular god, and which has a further parallel in the common barbaric custom of tattooing the worshipper's body with the symbol of the god under whose protection and power he is. See further under DIONYSIA.

F. B. JEVONS.

DIOSCORINTHIUS (*Δίδος Κορινθίου* [*τετραδάκι και εκάδι*], *Dioscorus*, 2 Mac 11²¹). See TIME.

DIOSCURI (*Δίδοκοι*, RVm at Ac 28¹¹; text, *The Twin Brothers*; AV, *Castor and Pollux*) are mentioned as giving their name to the ship in which St. Paul sailed from Melita to Puteoli, on his way to Rome. The D. in mythology were the sons of Zeus and Leda, and brothers of Helen. Castor was the horse-tamer, and Pollux the prince of boxers. For their brotherly affection they were placed in the sky as the constellation of the Twins (Gemini). They were worshipped from early times in Greece, ('*Græcia Castoris memor*' Hor. *Od.* iv. 5. 35), in Cyrene in Africa (Pind. *Pyth.* v.), not far from Alexandria, in Southern Italy, and enjoyed especial honour at Rome on account of their supernatural appearance at the battle of Lake Regillus. Their image was printed on the reverse of the earliest

silver coins of the Romans (*denarii*) as that of two youths on horseback. They were, however, best known as the tutelary gods of sailors, who identified their presence with the pale blue flame or light seen in thundery weather at the mast-head. They are thus mentioned Hor. *Od.* i. 3. 2: 'Sic fratres Helenæ lucida sidera'; also *Od.* iii. 29. 64: 'tutum feret geminus Pollux'; also *Catull.* iv. 27 and lxxviii. 65; and Eurip. *Helen.* 1663-65. It was a common practice to put, as a *παράσημον* (Ac 28¹¹) or *insigne*, some device for a figure-head to a ship, in imitation of the person or object (not always complimentary, Virg. *Æn.* x. 188) after which the vessel was named. See Virg. *Æn.* v. 116, 'Mnestheus agit Pristin'; *Æn.* x. 166, 195, 209, 'Hunc vehit immanis Triton,' etc. This figure-head was to be distinguished from the *tutela* (Ov. *Trist.* i. 10. 1), 'tutela Minervæ,' or image of the protecting genius, under which the ship sailed, placed generally in the stern of the vessel. In later times the distinction appears to have been effaced, and, in the vessel which carried St. Paul, the Dioscuri were probably intended for the 'tutela' as well as the 'insigne,' and their heads were probably fastened, one on each side, in front.

LITERATURE.—Seyffart, *Dict. of Class. Antiq.* by Nettleship and Sandys; Rich, *Dict. of Antiq.*; Page, *Acts of the Apostles*, in loc.
C. H. FRICHARD.

DIOTREPES (Διοτρεπής, WH-έφης).—A person, otherwise unknown, who is introduced in 3 John (vv. 9, 10) as ambitious, resisting the writer's authority, and standing in the way of the hospitable reception of brethren who visited the Church—probably travelling evangelists, such as are mentioned in the *Didaché*. It has been inferred by some that he was a presbyter or a deacon in the Church. It has also been supposed that he was in conflict with the Jewish-Christian party; or, on the other hand, that he was a teacher of false doctrine, Judaistic or Gnostic. But all is matter of conjecture. Others think that his action indicates an illegitimate assumption of authority over the Church, connected with the tendency to the establishment of a monarchical episcopate, which may have begun during the lifetime of St. John.

S. D. F. SALMOND.

DIPHATH (דִּפְתָּה) occurs in RV and AVm of 1 Ch 16, but it is practically certain that AV Riphath is the correct reading. By an easily explicable scribal error דִּפְתָּה has arisen from דִּפְתָּה, the reading of MT in the parallel passage Gn 10⁸. See RIPHATH.

J. A. SELBIE.

DISALLOW.—'Allow' is in AV either to 'approve' or 'accept' (see ALLOW); 'disallow' is always distinctly to 'reject.' So Nu 30⁸ *vis.* 8. 11 (סָרַף refuse, reject; see Ps 141⁵ RV); and 1 P 2^{4,7} (ἀποδοκιμάζω, RV 'reject'). So Latimer (*Serm. and Rem.*, 11), 'I must not suffer the devil to have the victory over me. I must disallow his instructions and suggestions.'

J. HASTINGS.

DISANNUL, which scarcely differs in meaning from 'annul,' the prefix being only intensive, is now going out of use. RV removes it only from Gal 3¹⁵, giving 'make void' instead (Gr. ἀθετέω, of which the subst. ἀθέτησις is tr^d 'disannulling' He 7¹⁸ and retained by RV). Amer. RV prefers 'annul' in Job 40⁸, Is 14²⁷ 28¹⁸. The use of the word in biblical English may be illustrated by Coverdale's trⁿ of Is 14²⁷ 'For yf the LORDE of hoostes determe a thing, who wyl dysanulle it?'; and Tindale's trⁿ of He 8¹³ 'In that he sayth a new victory he hath abrogat (πεπαλαίωκεν) the olde. Now that which is disanulled (παλαιούμενον) and wexed olde, is redy to vannysche awaye.'

J. HASTINGS.

DISAPPOINT has a stronger meaning in AV

than in mod. English, Job 5¹² 'He disappointeth the devices of the crafty' (כָּרַךְ, RV 'frustrateth,' as Is 44²⁵ AV, RV; so Pr 15²²); Ps 17¹³ 'Arise, O Lord, d. him' (יִצְרַחְךָ, RV 'confront him,' RVm 'forestall him,' Cheyne 'intercept him'); Jth 16⁸ 'the Almighty Lord hath disappointed them by the hand of a woman' (ἤθέτησεν αὐτοὺς, RV 'brought them to nought': see under DISANNUL). Cf. Hall, *Hard Texts* (1633), 311: 'All those curious and wealthy Trades . . . shall be utterly undone and disappointed.'

J. HASTINGS.

DISCERN.—To discern (Lat. *dis* apart, *cernere* separate) is to separate things so as to distinguish them, as Coverdale, *Erasm. Par. 1 Jn.* p. 48: 'It is not the sacramentes that discern the children of God from the children of the devyll; but the puritie of lyfe and charitie.' So Ezr 3¹³ 'the people could not discern the noise of the shout of joy from the noise of the weeping.'

To discern a person or thing is therefore, in biblical lang., to separate out from others, so as to recognize, as Gn 27²³ 'he discerned him not, because his hands were hairy, as his brother Esau's hands'; He 4¹² 'the word of God . . . is a discerner of the thoughts and intents of the heart' (κριτικός, RV 'quick to discern'); 1 Co 11²⁹ 'not discerning the Lord's body' (μὴ διακρίναν τὸ σῶμα τοῦ Κυρίου; Vulg. *non discernens corpus Domini*; Calvin, *non discernens*; Wyc. 'not wiseli demyng'; Luther, *dass er nicht unterscheidet*; Tind. 'because he maketh no difference of'; so Cov., Cran., Gen. 1557; but Gen. 1560, 'because he discerneth not,' with marg. note, 'But as thogh these holie mysteries of the Lordes bodie and blood were commune meats, so without reverence he commeth unto them'; so Tomson; Bish. 'making no difference of'; Rhem. 'not discerning the body of our Lord'; whence AV; but RV 'if he discern not the body'—omitting τοῦ Κυρίου with edd.

J. HASTINGS.

DISCIPLE.—This word—in Greek μαθητής; fem. μαθήτρια (occurring only Ac 9³⁶); verb, μαθητεῖω (occurring four times)—is in sacred literature confined to the Gospels and the Acts, though it often appears in Attic Greek (esp. Plato) as denoting the *pupil* of a philosopher or rhetorician, in contradistinction to the *master*, διδάσκαλος (just as in NT, Mt 10²⁴), or to the *discoverer*, εὐρητής. We have a similar contrast in OT, e.g. 1 Ch 25⁸ τελεῶν καὶ μαθητῶν, *the perfect and the learning* (AV and RV, *the teacher and the scholar*), referring to the senior and junior members of David's trained musical guilds. Likewise, in the case of the prophetic guilds superintended by Samuel and more fully organized by Elijah and Elisha, in order that by spiritual force they might cherish the theocratic spirit among the people, and check the tendency to apostasy, the general 'company' is contrasted with him who 'stood as head over them' (1 S 19²⁰), and the 'sons,' 2 K 2⁷ (i.e. pupils; cf. Pr 4¹⁻¹⁰, and *passim* with him 'before' whom they 'sat,' 2 K 4²⁸, their *master* (κύριος), 2 K 6⁵. [*Teacher*, διδάσκαλος, however, occurs in LXX only in connexion with heathen monarchs, and then but twice: Est 6¹ (the teacher of Ahasuerus) and 2 Mac 1¹⁰ (the teacher of Ptolemy); and the phrase 'schools of the prophets' (however truly it may represent facts) is 'a pure invention of the commentators' (Smith, *Prophets of Israel*, 85).] In Talmudic literature *talmidē hākhāmīm*, *pupils of the learned* (i.e. the scribes), is a frequently recurring phrase, and of these St. Paul was one when he was 'brought up at the feet of Gamaliel,' sitting, i.e. with the rest of the pupils, on the lower benches in front of him (Ac 22³; cf. Mt 5¹).

The usage of the word in NT is very simple. We read of the disciples of John the Baptist (Mk 2¹⁸), of the Pharisees (same place), of Moses, Jn 9²⁸ (only by way of contrast to Jesus), but most of all of Jesus, to whose disciples, in fact, the subst. is almost entirely, and the verb entirely, limited. The word maintains its classical connotation of compliance with the instruction given: the

μαθητής is not only a *pupil*, but an *adherent* (see Cremer, *Bib. Theol. Lex.*; cf. Xen. *Mem.* i. 6. 3, where *μαθηται* are called the *μιμηται*, *imitators*, of their *διδάσκαλος*; so Jn 8³¹, 'If ye abide in my word, then are ye truly my disciples,' cf. 15⁵). Hence it is applied most esp. to the Twelve in all four Gospels, sometimes with *δωδεκα* and sometimes without; they are 'the disciples,' Mt 10¹ 12¹, Mk 8⁷, Lk 8⁹, Jn 3²². Mt seems, indeed, to confine the plural to them (Weiss), unless 8²¹ and 5¹ be exceptions. When it denotes the wider circle, as in Lk (particularly 6¹³ 7¹¹), it has the same sense of adherence. Hence it stands, occasionally in Gospels (Mt 10⁴², taken with 18⁶) and invariably in Ac, as a synonym for *πιστεύων*, a *believer* (cf. Aristot. *Περὶ σοφ.* ἐλεγχ. 161^b 3—*δεῖ πιστεῖν τὸν μαθάνοντα*, *the learner is bound to have faith*), even where, as in Ac 19¹ 4, the word is applied to half-instructed believers, who, while believing apparently in Jesus as greater than John the Baptist, were still (as it seems) not sure that Jesus was absolutely the Messiah, and that they had not to 'look for another' (Mt 11³). So also, quite distinctly, with the verb *μαθητεύω* (three times in Mt, once in Ac), which is once intrans. (Mt 27⁵⁷), twice trans. (Mt 23¹⁹, Ac 14²¹), and once deponent (?) (Mt 13⁵², where, in accordance with the usual dative construction, the phrase signifies a *disciple of the kingdom of heaven* personified). (See Meyer and Meyer-Weiss).

J. MASSIE.

DISCIPLINE.—'Discipline' is properly instruction, that which belongs to the *discipulus* or scholar, and is distinguished from 'doctrine,' which pertains to the *doctor* or teacher. In this sense Wyclif (1382) gives Pr 3⁴ 'Thou shalt finde grace and good discipline (1388 'teching') befor God and men'; and Chaucer (Skeat's *Student's* ed. p. 716), 'Thanne shaltow understonde, that bodily peyne than in disciplyne or teching, by word or by wrytinge, or in ensample.' But under the influence of the Vulg. and the Church, 'discipline' came early to be used for 'chastisement.' In Pr 3⁴ Wyc. has 'the discipline of the Lord, my sone, ne caste thou away.' See CHASTISEMENT.

In AV whether 'discipline' means instruction or chastisement it is not easy always to decide. It occurs Job 36¹⁰ 'He openeth also their ear to d.' (*māsār*, RV 'instruction,' which the sense seems to demand; but the Heb. has nowhere else this meaning, and the whole passage is of chastening or moral discipline); Wis 15 61⁷ bis, Sir 41⁷ [*see*] 17¹⁸ 18¹⁴ 23² 7 32¹⁴ 41¹⁴, Bar 4¹³ (all *παθδία*, which in class. Greek means 'education' or its result, 'mental culture,' never 'chastisement,' but is used in LXX as the regular tr. of *māsār*, hence=chastisement there, and so in NT thrice, He 12⁵ 6⁸; see Kennedy, *Sources of N.T. Greek*, p. 101).

J. HASTINGS.

DISCOMFIT, DISCOMFITURE.—From *dis* apart, and *conficere* to put together, to 'discomfit' is to undo, destroy. Both words, now archaic if not obsolete, are always used in AV of defeat in battle, Is 31⁸ being a mistrans. for 'become liable to forced service.' Cf. More, *Utopia* (Rob. tr.), p. 140: 'if al their whole armie be disumfeted and overcum'; and Chaucer, *Knight's Tale*, 150—

'After the bataille and disconfiture.'

RV introduces 'discomfit' for 'destroy,' Ex 23²⁷, Ps 144⁶ (צָרָה), Dt 7²³ (צָרָה); for 'trouble,' Ex 14²⁴ (צָרָה); and 'discomfiture,' Dt 7²³, 1 S 5⁹ (AV 'destruction'), Dt 28²⁰ (AV 'vexation'), Is 22⁵ (AV 'trouble'), the Heb. being always מְהֻמָּה.

J. HASTINGS.

DISCOVER.—In mod. Eng. 'to discover' is 'to detect,' 'find out,' which is a late use of the word. The meanings in AV are: 1. Uncover, lay bare (the primary sense, lit. 'to take off the cover,' Fr. *découvrir*), Ps 29⁹ 'The voice of the Lord . . . discovereth the forests' (צָרָה, RV 'strippeth bare'); 'I do not understand this of stripping the foliage merely, but rather of the breaches and openings made by the lightning and the wind in the heart

of the wood'—Earle, *Psalter of 1539*, p. 271); Ezk 16⁵⁷ 'Before thy wickedness was discovered'; Hos 2¹⁰ 'now will I d. her lewdness in the sight of her lovers'; 7¹ 'the iniquity of Ephraim was discovered'; Sir 1³⁰ 'Exalt not thyself, lest thou fall . . . and so God d. thy secrets' (RV 'reveal'); 11²⁷ 'his deeds shall be discovered' (RV 'the revelation of his deeds'). Cf. Knox, *Hist.* p. 182, 'Which God of his infinite goodness hath now discovered to the eyes of all that list to behold'; and p. 250, 'who rashly discovering himself in the Trenches, was shot in the head.' 2. Withdraw (spoken of the cover itself, so as to uncover), Job 41¹³ 'who can d. the face of his garment?' (RV 'strip off his outer garment'—see Davidson *in loc.*); Is 22⁸ 'he discovered the covering of Judah' (RV 'took away'); Jer 13²⁶ (= Nah 3⁵) 'I will d. thy skirts upon thy face.' So Bacon, *New Atlantis*, 129: 'At the beginning he discovered the face of the deep, and brought forth dry land'; Chapman, *Hesiod*, i. 161—

'When the woman the unwieldy lid
Had once discover'd, all the miseries hid
. . . dispersed and flew
About the world.'

3. Disclose or reveal, 1 S 14⁸ 'we will d. ourselves unto them'; 22⁸ 'when Saul heard that David was discovered' (עָרַב 'made known,' 'revealed'); Job 12²² 'He discovereth deep things out of darkness'; Pr 25⁹ 'd. not a secret to another' (RV 'disclose not the secret of another'); Sir 6⁹ 27¹⁶, 1 Mac 7³¹ 'when he saw that his counsel was discovered' (ἀπεκαλύφθη, 'made known,' 'revealed,' not 'found out'); 2 Mac 6¹¹ 'others, that had run together into caves near by, to keep the Sabbath secretly, being discovered to Philip, were all burnt together' (RV 'betrayed'). Cf. Bacon, *Essays*, p. 17: 'For Prosperity doth best discover Vice; But Adversity doth best discover Vertue'; and Shaks. *Merry Wives*, II. ii. 190—

'I shall discover a thing to you.'

4. Exhibit, display, as Blount (1600): 'The more he mounted, the more he discovered his incapacitie.' In AV Pr 18² 'A fool hath no delight in understanding, but that his heart may d. itself' (RV 'reveal'). 5. Descry, sight, Ac 21³ 'When we had discovered Cyprus, we left it on the left hand' (ἀναφαίλω, RV 'come in sight of'). 6. Notice, Ac 27³⁹ 'they discovered a certain creek' (κατενόουν, RV 'perceived').

J. HASTINGS.

DISCUS.—See GAMES. **DISEASE.**—See MEDICINE. **DISH.**—See FOOD.

DISHAN (דִּישָׁן).—A son of Seir, Gn 36²¹. 28. 30 = 1 Ch 1³⁸. 42. In Gn 36²⁶ the reading דִּישָׁן of MT should be emended to דִּישָׁן, after 1 Ch 1⁴¹. See following article.

DISHON.—1. A son of Seir, דִּישָׁן Gn 36²¹ = דִּישָׁן 1 Ch 1³⁸. 2. A son of Anah and grandson of Seir, דִּישָׁן Gn 36²⁵, cf. v. 30 = דִּישָׁן 1 Ch 1⁴¹, which should also be read for MT דִּישָׁן in Gn 36²⁶. Dishan (see art. above) and Dishon are, of course, not individual names, but the eponyms of Horite clans. Their exact location is a matter of uncertainty. דִּישָׁן occurs in Dt 14⁵ (only) as the name of a clean animal (LXX πύργαρος, AV and RV 'pygarg'), which is generally taken to be some species of gazelle or antelope. Tristram (*Nat. Hist. of Bible*, 127) identifies it with the *Antelope addax*; but Hommel (*Namen der Säugethiere*, 391), deriving the word from a root דִּישָׁן = *spring, leap* (cf. Assy. *dassū*), thinks of the mountain-goat. So also Delitzsch (*Assyr. Stud.* i. 54). The existence of such animal names amongst the Horites has been used by W. R. Smith as an argument in favour of

totemism. See *Journal of Philology*, ix. 75 ff., *Kinship and Marriage in Early Arabia*, and *RS (passim)*; and for the contrary opinion, Nöldeke in *ZDMG* (1886), 148-187. Cf. also Jacobs, *Studies in Bib. Archaeol.* (1894), and Gray, *Heb. Prop. Names* (1896), p. 86 ff. J. A. SELBIE.

DISHONESTY in 2 Co 4² is used in the obsolete sense of 'disgrace' (*ατοχώνη*, RV 'shame,' after Wyc., Gen.; AV followed Rhemish NT; Tindale has 'unhonesty'). Cf. Coverdale's tr. of Ru 2¹⁵ 'Let her gather betwene the sheues also, and do her no dishonestye'; and of Sir 3¹¹ 'Where the father is without honoure, it is the dishonesty of the sonne.' 'Dishonest' Sir 26²⁴, and 'dishonestly' 22⁴, are used in the same sense. J. HASTINGS.

DISPATCH.—To 'dispatch business' is still in use, as in To 7⁸ 'let this business be dispatched,' 2 Mac 12¹⁸ 'before he had d. anything he departed.' But to 'd. a journey,' i.e. 'expedite,' is out of use; nor is any example given in *Oxf. Eng. Dict.*, 2 Mac 9⁴ being missed: 'Therefore commanded he his chariotman to drive without ceasing, and to dispatch the journey.'

To 'dispatch,' i.e. 'get rid of quickly' by death, is found Wis 11¹⁹, and in Ezk 23⁷, where RV gives 'despatch,' a spelling which is incorrect, and which was unknown till the beg. of the 19th cent. It seems to have arisen from Johnson having accidentally entered the word so in his Dict., though he himself always spells it 'dispatch.' See *Oxf. Eng. Dict. s.v.*

J. HASTINGS.

DISPERSION.—See ISRAEL.

DISPOSITION.—Ac 7⁵³ 'Who have received the law by the d. of angels' (Gr. *eis διαταγὰς ἀγγέλων*; RV 'as it was ordained by angels'; RVm 'unto ordinances of angels,' cf. Ro 13² *τοῦ θεοῦ διαταγή*, AV and RV 'the ordinance of God'). 'Disposition' is the Rhemish word here (Wyc., Tind., Gen. have 'ordinance'; Cov., Cran. 'ministration'), and it is used in the archaic sense of administration. In the same sense 'disposer' is used by Tind. in 1 Co 4¹ 'Let men this wise esteeme us, even as the ministers of Christ, and disposers of the secretes of God' (EV 'stewards,' Gr. *οἰκονόμοι*); and by Gen. (1560) in 1 P 4¹⁰ 'Let euerie man as he hath received the gifte, minister the same one to another, as good disposers of the manifolde grace of God' (EV 'stewards'). 'Disposing' in Pr 16²³ 'The lot is cast into the lap; but the whole disposing thereof is of the Lord,' is used in the earlier sense of control, disposal; while the vb. 'dispose' in Job 34¹³ 37¹⁵, 2 Es 5⁴⁹ 8¹¹, Sir 16²⁶ has the still earlier and primary meaning of 'arrange in proper order.' This primary meaning (as Lat. *disponere*) seems to be intended by 'disposition' in 2 Es 8³⁸ (*plasma*) 8³⁹ (*figmentum*), the Lat. words so tr. having ref. to the creation of man; but in Jth 8²⁹, Ad. Est 16⁸, Sir 20²⁶, the word is used in the familiar sense of 'bent of mind,' 'character,' a sense which is found as early as 1387: Trevisa, *Higden*, iii. 113: 'Nought by chaungynge of body, but by chaungynge of disposicioun of wit and of semynge.'

J. HASTINGS.

DISPUTE, DISPUTATION.—As 'debate' has lost the meaning of wrangling, so 'dispute' has acquired it. In older Eng. to 'dispute' was to discuss or argue, without strife. Thus Bp. Carleton (1610), *Jurisd.* Pref., 'I have disputed the Kings right with a good conscience, from the rules of Gods word,' i.e. I have discussed it, argued for it; cf. Sir T. More, *Utopia*, p. 53, 'that they maye in everye matter despute and reason for the kynges right'; Knox, *Hist.* p. 25, 'after that Sir James Hamilton was beheaded (justly or unjustly we dispute not),' and p. 215 'He [Knox] did gravely dispute upon the nature of the blinde world.' So in AV, Job 23⁷ 'There the righteous

might dispute with him' (*קָרַב*, RV 'reason'); Mk 9³³ 'What was it that ye disputed among yourselves by the way?' (*διαλογίζομαι*, RV 'were ye reasoning,' as 2^{6.8} AV); 9³⁴ 'for by the way they had disputed among themselves who should be the greatest' (*διαλέγομαι*): RV keeps 'dispute' here, but the disciples' shame was not that they had wrangled, but that they had discussed such a question at all. The same Greek is similarly tr^d in AV of Ac 17¹⁷ (RV 'reasoned'), 19^{9.9} (RV 'reasoning'), 24¹², Jude⁹ (so RV). The subst. *διαλογισμός* is once tr. 'disputing,' Ph 2¹⁴ AV, RV, 'Do all things without murmuring and disputings'; but even here Thayer prefers 'hesitation,' 'doubting,' Lightfoot 'inward questionings.' In Ac 6⁹ 9²⁸ (*συζητήω*) the meaning is plainly 'discuss,' 'argue'; so 15⁷ (*συζητήσας*) and 1 Co 1²⁰ (*συζητητής*). The only passage in which 'dispute' seems to have the meaning of 'wrangle' is 1 Ti 6³ 'Perverse disputings of men of corrupt minds' (TR *παραδιατριβαί*, edd. *διαπαρτριβαί*, RV 'wranglings'). Here Wyc. has 'fightyngis' and Rhem. 'conflictcs' after Vulg. *conflictationes*, but Tind. and the rest 'disputations,' a word which never seems to signify 'altercation,' 'wrangling.' The Gr. word is found nowhere else.

'Disputation' occurs in AV, Ac 15² (TR *συζήτησας*, edd. *ζήτησας*, RV 'questioning'), and Ro 14¹ 'Him that is weak in the faith receive ye, but not to doubtful disputations' (*εις διακρίσεις διαλογισμών*; lit. 'unto discussions of doubts'; RVm 'for decisions of doubts'; see Sanday-Headlam *in loc.*). Bp. Bonner's injunction for the reading of the Bible (1541) ends thus: 'he is not to expound, nor to reade with a lowde voyce, and without disputacion,' where, as elsewhere, d. means 'discussion': the reader is neither to expound the meaning himself, nor to discuss it with others.

J. HASTINGS.

DISTAFF (*דִּשְׁטָף*).—This term occurs in AV only in Pr 31¹⁹. The Hebrew word is found repeatedly in Neh 3, where it means 'part' or 'district' of the city, something 'cut off' or 'divided' from the rest. It is found also in 2 S 3²⁹, where it is rendered 'staff,' but prob. = *distaff* (see Driver's note). RV renders the word in Pr 31¹⁹ 'spindle,' for which it may no doubt be used; but if we may judge from the cognate Arab. word (*falkat*), it means the *whorl* of the spindle, a piece of wood or other material, of hemispherical form, through which the spindle-pin passes, and above which is the hook holding the thread. The design of this piece is to give steadiness to the circular motion of the spindle. This form of spindle is in common use among the women of Syria to-day.

H. PORTER.

DIVERS, DIVERSE.—'Divers' has now dropped out of use, or, if used archaically, is restricted to the sense of 'several.' But formerly 'divers' and 'diverse' were indifferent spellings of the same adj., which expressed either 'varied,' 'different' (Lat. *diversus*); or 'various,' 'several.' Thus Ridley, *A Breve Declaration* (Moule's ed. p. 106): 'in the matter of thys Sacrament ther be diverse [=several] poyntes, wherein menne (counted to be learned) can not agree'; Grindal, *Letter to Q. Eliz.* (1577): 'divers [=different] men make divers senses of one sentence of Scripture.' In AV 1611 'diverse' occurs Lv 19¹⁹, Est 3⁸, Dn 7^{19.23.24}, Mt 4²⁴; elsewhere 'divers.' The conjunction of 'divers' with 'sundry,' as in He 1¹, is common in old Eng., as in the Act authorizing Matthew's Bible (Hen. VIII. 1543): 'divers and sundrye his subjects of this his realme.'

J. HASTINGS.

DIVES.—See LAZARUS.

DIVINATION has many different modes amongst

the different peoples of the earth, but all are in their origin either natural or supernatural. Methods which originally were supernatural may come to lose their supernatural character; methods which were at first natural may come to be regarded as supernatural; and, from lack of evidence, it may be difficult or impossible to say with regard to any given method whether in its origin it was a natural or a supernatural method.

We shall begin with the supernatural methods as being those first suggested by the word 'divination,' and we shall define them as those by which man gains foreknowledge of the future from a supernatural source, *e.g.* by inspiration, possession, or direct interrogation of the divine will. These methods, the supernatural, again fall into two classes, the licit and the illicit, according as the supernatural source is or is not a god of the community. We may think what we will of the honesty of the priests of Apollo, and entertain what idea we like as to the way in which the oracle of Delphi or of Baal-zebub (2 K 1²⁻⁶) was worked, but the worshipper of Apollo who consulted the oracle was doing what was approved of by the religious consciousness of his age and race (however low we rank it in the scale of religion): his action was licit. On the other hand, we may pity both the witch and the witch-finder of the time of James I. of England, but we cannot deny that witchcraft was considered, both by those who practised and those who persecuted it, to be irreligious: it was illicit. And the same distinction has prevailed over the world: savages, however low, distinguish in their way between the worship of their tribal gods and commerce with supernatural spirits who are no gods of theirs.

But before proceeding to inquire more closely into the licit modes of divination, *i.e.* those which are religious, we must notice that these, again, fall into two classes, *viz.* those which are objectively religious and those which are only subjectively religious. That is objectively right, true, or religious which is so, whether a man thinks it so or not; that is subjectively right, true, or religious which is honestly believed to be so, whether it really is so or not. All peoples of the earth have honestly believed that their gods communicated supernatural foresight to certain favoured men, and so divine inspiration or possession is a subjectively religious method of divination. When and where the belief is not merely subjectively but also objectively true, the divine inspiration takes the form, not of 'divination,' but of PROPHECY (which see). In this article the only side of inspiration we have to deal with is the subjectively religious — without prejudice to the question whether any given example is or is not, as it is honestly believed to be, really divine.

Amongst this class of diviners we must place the sacred scribes of Gn 41⁸ and the 'magicians' of Ex 7¹¹, as also the Sibyl of Virgil or the Pythia of Delphi, and the inspired priests or 'divine kings' of savages all over the world. All are believed by themselves and their fellow-worshippers to be inspired by one of their respective national or tribal gods; and in all cases possession or inspiration is conditioned by some kind of sacrament or communion. That communion may take the form either of a sacramental meal or of a sacramental investiture. The worshipper may partake of the substance of the animal or plant in the shape of which his deity habitually manifests himself, and which is sacrificed to the deity: thus the priestess of Apollo Diradiotes at Argos and the priestess of Earth at Aegira became inspired by drinking the blood of the animals offered to those deities respectively; the Bacchæ of Dionysus obtained inspiration by tasting the blood of the grape, sacred

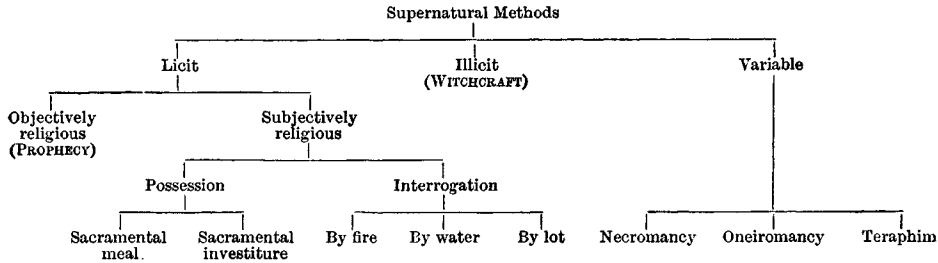

to that god; the Pythia, by eating the leaves of Apollo's sacred plant, the laurel. Or the worshipper may be (like the idol of the god) clad in the skin or smeared with the blood or fat of the animal, or the juice or oil of the plant, which is the corporate manifestation of the deity, or be robed in the insignia of the god, and so be 'invested' by the power of the divinity. Possession, then (whether by means of the sacred meal or of sacramental investiture), is one of the licit and subjectively religious ways in which foreknowledge of the future may be derived from a supernatural source. It is the way peculiarly appropriate to gods which manifest themselves in animal or vegetable form. But it is not the only way: there are deities of earth, air, fire, and water, who may or must be interrogated in another way. In one cult a draught of a sacred stream may have the same effect as a draught of sacred blood in producing inspiration; but in another cult the deity of the stream may be consulted by casting offerings into the sacred waters, and inferring that the prayer made at the time will or will not be granted, according as the offering is or is not accepted by the sacred waters. And the ordeal by fire is based on the same principle as this ordeal by water. Divination by a bowl or cup of sacred water (Gn 44⁵), again, has the same origin. The leaves of a sacred tree may be eaten to produce inspiration, but their voice in the wind may speak directly to the worshipper, as did the rustling of the leaves of the sacred oaks of Dodona. Or the branches and twigs themselves, being of the substance of the divinity, may be made to give indications of the divine will: our word 'lot,' like the Gr. κλήρος, originally meant simply 'a twig.' See LOT. Rhabdomancy or xylomaney (Hos 4¹²) and belomaney (Ezk 21²¹) are but forms of divining by the aid of a tree-god. Still more, when a deity habitually manifests himself in animal form, may the inward disposition of the deity be augured by the sacrificing priest, according as the entrails of the victim have or have not anything extraordinary in their appearance (Ezk 21²¹). In the same way and for the same reason the flight of a sacred bird may be 'auspicious' or 'inauspicious' (Ps 58³, 2 K 17¹⁷ 21⁶).

The illicit or irreligious forms of divination need not detain us long. They are those in which the supernatural Being consulted is one who is not a god of the community, has no bond of loving-kindness with the community, and is accordingly regarded by it, not merely as a strange god, but as a malevolent and evil spirit. No man consults such a spirit except for purposes which the national gods, as being the guardians of the nation's interests and the national morality, cannot sanction. Commerce with such a spirit is anti-social as well as anti-religious; and the man who is guilty of it is a wizard (Lv 19³ 20⁶), and has always been punished as a criminal all over the world by the peoples who believe in the possibility of such commerce.

Necromancy, consulting the spirits of the dead (Lv 19³¹, Is 8¹⁹ 19³), is a way of obtaining foreknowledge from a supernatural source which was illicit among the Jews (to whom ancestor-worship was forbidden), but licit amongst all other peoples. Consultation of the teraphim (Ezk 21²¹, Zec 10²) seems to have persisted amongst the Jews in spite of the fact that it was, strictly speaking, idolatrous: the teraphim were images (1 S 19¹³), like the altar-stones of the Scandinavians and the clay or wooden idols of the Balonda and Barotse, which could be made to prophesy by smearing them with the blood of sacrifice. For oneiromancy see DREAMS. All we need here remark is that it is a form of divination which may be licit (Jg 7¹³) or illicit (Dt 13²⁻³), according as the source of the dream is a divine or an evil spirit. We have now

finished our account of the supernatural methods of divination, and may sum it up in tabular form as follows:—

until he finds out their incorrectness, they are to him just as scientific as the rest of his stock of acquired and inherited knowledge; and conse-

We have now to consider the natural methods: they are, in a word, exploded science. The modern man of science makes forecasts of the future which are not supernatural, but strictly scientific. So, too, the savage and primitive man make forecasts (e.g. as to the rising and the setting of the sun and stars) which may not be exact but are certainly scientific, and which, even when wholly erroneous, are not supernatural or superstitious. The science of the savant has been evolved by slow and imperceptible degrees out of the science of the savage. The difference between them is, not that the savant uses methods of observation and experiment unknown to the savage,—for the savage employs all four of the Inductive Methods,—but that the savage, when he goes wrong (which he does not do always, else he would speedily perish), does so because he has not yet learned the limits within which the method or logical conception is valid. Thus he observes that in many cases the effect resembles the cause: fire causes fire; to make a thing moist, or to make it move, you must impart moisture or movement to it; and he jumps to the conclusion that in all cases 'like produces like.' Thus he becomes armed with a very simple and ready means of forecasting the future: the effect of anything which strikingly arrests his attention will resemble the cause—a fiery comet will be followed by conflagrations, the mention of the name of what is evil will be followed by the appearance of the evil thing, that which moves as the sun moves (i.e. E., S., W., N., 'clock-wise') will follow the same glorious and beneficent course as the sun, and so on. In the same way the savage unduly extends the sphere of the Inductive Method which is known as the Method of Concomitant Variations: according to that method, things which vary together are causally related to one another. Thus the movement of the great tidal wave varies with the movement of the moon round the earth, and it is therefore inferred that the motion of the moon causes the movement of the tides. But the savage jumps to the conclusion that all things which are related together (according to his notion of relation) vary together and are cause and effect, the one of the other. A footprint and the foot which makes it vary together, and what affects the one affects the other, and therefore a knife stuck in a footprint will cause a wound in the foot. And so, if you can observe one of two things which are thus related to each other, you can, by watching the changes in it, tell what changes are going on in the other: a lock of a person's hair will inform you by the changes in its condition of the changes in the fortunes of the person from whose head it was cut. In making these and similar primitive forecasts the savage is but acting on the same theory of causation, and employing the same methods of induction, as he uses, e.g., in judging as to the probable behaviour of the animal he is hunting. In a word, at first, and

quently it would be as erroneous to call them 'divination' as it would be to apply that term to the predictions in the *Nautical Almanac*. But as these primitive modes of forecasting the future come to be discarded, with the advance of knowledge, as erroneous and unscientific, their character also changes. They still continue to be practised in holes and corners not yet illumined by the rising sun of science; they are known to be wholly unscientific, and yet the ignorant to whom they have descended believe in them more sincerely than in the science which they do not comprehend. The exploded science of primitive times becomes the divination of a later age. It is then literally a 'superstition,' something which 'stands over' and survives into a period and environment with which it is wholly incongruous. Finally, a deeper shade than that cast by mere ignorance is frequently imparted to the character of this antiquated science because it is practised by the same persons who give themselves up to the illicit and irreligious forms of divination described above. See also EXORCISM, MAGIC, SOOTHSAYING.

LITERATURE.—A. Bouché Leclercq, *Histoire de la divination dans l'antiquité*; W. R. Smith, *RS*, 246, 407, 427; F. B. Jevons, *Introd. to Hist. of Religion*; Driver on Dt 18^{10f}.

F. B. JEVONS.

DIVORCE.—See MARRIAGE.

DIZAHAB (דִּזְחָב; *Karaxpōsea*; *ubi auri est plurimum*).—The name of a place mentioned in the obscure topographical notice Dt 1¹, which is intended apparently to define the locality in the 'steppes of Moab,' in which the Deuteronomic discourses were delivered, but several of the names in which resemble those of places passed by the Israelites in the previous stages of their wanderings. If it be the name of a place in the 'steppes of Moab,' the situation is unknown. Upon the supposition that it is the name of some previous camping-place of the Israelites, it has been identified by Burckhardt, *Syria* (1822), p. 523, Knobel, and others, with *Mina edh-Dhahab*, the third of seven boat-harbours between the Rās Muhammad and Akaba, nearly due E. of Jebel Mûsa. Keil objects that this is too inaccessible on the side of Sinai for the Israelites to have made it one of their halting-places, and considers it to be the name of a place otherwise unknown in the desert of the wanderings. The same view is taken by Dillm. (who supposes the verse to have originally formed part of an itinerary of the Israelites). The form of the name is curious; the ח suggests naturally the oblique case of *דו*, *possessor of* (often in names of places); but it is not apparent how an Arabic *دو* would become in Hebrew דִּזְחָב, the ד being represented differently in the two parts of the name. Jerome, in rendering 'ubi auri est plurimum,' probably thought of ח, constr. of ח enough. S. R. DRIVER.

DO.—Most of the forms and uses are familiar. But as to *form*, notice 'doeth' in the plu. Sir 35¹⁰ (AV 1611) 'Doeth not the teares run downe the widowes cheeks?' (mod. edd. 'do'). Cf. *Pr. Bk.* (1549) Com. Ser.: 'And whosoever willingly upon no just cause, doth absent themselves: or doth ungodly in the Parish church occupy themselves: . . . to be excommunicate'; and in the imperat. *Piers Plowman*, v. 44—

'That ye prechen to the peple' preue it on yowre-seluen,
And doth it in dede 'it shal drawe yow to good.'

As to *usage*, notice that 'do' is steadily losing its active and independent power. 1. We now prefer a stronger word like 'perform' in such phrases as 'do sacrifice,' Is 19²¹ 'the Egyptians . . . shall do sacrifice* and oblation' (RV 'shall worship with sac. and obl.'). or 'do a trespass' Nu 5⁶; or 'do goodness' Nu 10³² (RV 'do good'); or 'do service' (Heb. לָעֲבֹד אֶת־יְהוָה, lit. 'to serve the service'), a freq. phrase in Nu; cf. also Jn 16² 'whosoever killeth you will think that he doeth God service' (λατρεῖαν προσφέρειν, RV 'offereth service unto God'). 2. 'Do' meaning to *act* is still in use, but scarcely as Ac 17⁷ 'these all do contrary to the decrees of Cæsar' (TR *πράττουσι*, edd. *πράσσωσιν*); Ph 2¹³ 'it is God which worketh in you both to will and to do of his good pleasure' (τὸ ἐνεργεῖν, RV 'to work'). 3. But 'do well' is good Eng. still, as Jn 11¹² 'if he sleep, he shall do well' (σωθήσεται, Tindale 'he shall do well ynough,' and so Cov., Cran., Gen. 1537; but Wyc. 'he schal be saaf,' and so Gen. 1560, Tomson, Rheims; RV 'he will recover,' RVm 'be saved'). 4. To 'do,' meaning to 'fare,' is in use in the phrase 'how d'ye do?' but not as 2 S 11⁷ 'David demanded of him how Joab did and how the people did' (וַיִּשְׁאַל דָּוִד אֶת־יֹאבִבֵּן הַיְהוָה וְאֶת־הָעָם, lit. 'for the health of Joab and for the health of the people,' RV 'how Joab did and how the people fared'), so Est 2¹¹; Ac 15³⁶ 'Let us go again and visit our brethren . . . and see how they do' (ὡς ἐχούσι, RV 'how they fare'); Eph 6²¹ 'that ye also may know my affairs and how I do' (τί πράσσω). 5. The phrase 'to have to do with' is still good idiomatic Eng., but notice the Greek Mt 8²⁹ 'what have we to do with thee?' (τί ἡμῖν καὶ σοὶ; lit. 'what to us and to thee?' as Wyc. has it, after Vulg. *quid nobis et tibi?* the idiom of AV being Tindale's); He 4¹³ 'all things are naked and opened unto the eyes of him with whom we have to do' (πρός δὲ ἡμῖν ὁ λόγος, lit. as Wyc. 'to whom a word to us,' Vulg. *ad quem nobis sermo*, Tind. 'of whom we speake,' Gen. 1557 'with whome we have to do'). 6. As an auxiliary, 'do' is noted by the grammarians as (1) the vicegerent for any antecedent verb, Ac 7²⁸ 'Wilt thou kill me, as thou diddest the Egyptian yesterday?' (in Gr. the vb. is repeated, ἀνελεῖν . . . δὲ πρόπον ἀνείλες, hence RV 'as thou killedst'); (2) to express the tense, now used in negative sentences, as 'I do not know' and interrog. 'do you know?' but formerly in affirm. also, as Gn 22¹ 'God did tempt Abraham.' This is a peculiarly Eng. idiom; but closely akin to it is another, which is older, and is common to French, but now quite obsolete. As Fr. has *faire savoir* 'cause to know,' so Eng. had 'I do you to know' with the same meaning. Thus North, *Plutarch*, p. 561: 'I do thee to understand that I had rather excell others in excellency of knowledge than in greatness of power'; Chaucer, *Troilus*, ii. 1022—

'And we shal speke of thee somewhat, I trowe,
When thou art goon, to do thine eres glowe!'

In Malory's *King Arthur* we read: 'And so they looked upon him and felt his pulse, to wit (i.e. to know) whether there were any life in him. In the name of God, said an old man. For I do

* Cf. Shaks. *Jul. Cæs.* ii. ii. 5: 'Go bid the priests do present sacrifice.'

you verily to wit he is not dead.' That is, 'I cause you to know,' mod. Eng. 'I would have you know.' This phrase is found in AV, 2 Co 8¹ 'we do you to wit of the grace of God bestowed on the churches of Macedonia' (γνωρίζομεν ὑμῖν, RV 'we make known to you,' which was Wyclif's tr.; 'do you to wit' came from Tindale; Rheims has 'we doe you to understand'). The Eng. auxiliary and this form are sometimes found together; an interesting example being in Caxton's *Game of the Chesse* (1474), Pref.: 'I delybered in myself to translate it in to our maternal tonge. And when I so had achyeued [achieved] the sayd translacion, I dyde doo set in enprynte [I caused to be printed] a certyn nombre of theym, Which anone were depesshed and solde.' 7. Lastly, notice the phrase 'do away,' Nu 27⁴ 'Why should the name of our father be done away from among his family, because he hath no son?' (נִקַּח, RV 'be taken away'); 1 Ch 21⁸ 'I beseech thee, do away the iniquity of thy servant' (נִקַּח, RV 'put away'); 1 Co 13¹⁰, 2 Co 3^{7.11.14} (all καταργέω = 'render inoperative,' a peculiarly Pauline word; St. Paul uses it 25 times, elsewhere in NT Lk 13⁷, He 2¹⁴ only; RV in 2 Co 3^{7.11} 'pass away'). Cf. Wyclif's tr. of He 10⁹ 'he doith aweit thi first, that he make stidfast the secunde,' and of 12¹ 'do we aweie al charge and synne.'

J. HASTINGS.

DOCTOR, DOCTRINE.—Doctor is used in the old Eng. sense of 'teacher' in Lk 2⁴⁶ (διδάσκαλος); and 'doctor of the law' for 'teacher of the law' in Lk 5¹⁷, Ac 5³⁴ (νομοδιδάσκαλος). Cf. *Melville's Diary* (Wodrow, p. 95), 'to the Doctor is given the word of knowlage, to open upe, be simple doctrine, the mysteries of fathe.' So Bacon (*Essays*, p. 9) calls St. Paul 'the Doctor of the Gentiles,' and Latimer (*Works*, i. 430) calls the devil 'that old Doctor,' and this is the use in Pope's lines—

'Who shall decide, when doctors disagree,
And soundest casuists doubt, like you and me?'

Ep. to Ld. Bathurst, i. 1.

See under SCRIBE. **Doctrine** (see next art.) is similarly used for 'teaching' in Dt 32², Job 11⁴, Pr 4², Is 29²⁴ (all דָּבָר, lit. 'something received,' elsewhere only Pr 1^{5.4} 9⁹ 16^{21.23}); Is 23⁹ (מֵסָרָה, lit. 'something heard,' RV 'message,' RVm 'report'); Jer 10⁹ (מִצְוָה, really 'discipline,' RV 'instruction'); 1 Es 5⁴⁰ (δὴλωσις), Sir 16²⁵ 24^{27.32} (παῖδα), 24²³ (διδασκαλία); and freq. in NT for Gr. διδασκαλία. Still more freq. for 'the process of teaching,' 'instruction' (διδάχῃ), as Ac 2⁴² 'they continued stedfastly in the apostles' doctrine and fellowship.' Cf. Chaucer, *Non. Prest. Tale*, 622—

'For seint Paul seith, that al that writen is,
To our doctryne it is y-write, y-wis.'

J. HASTINGS.

DOCTRINE, etymologically regarded, signifies the work of a *doctor* or teacher, from *docere*, to teach; hence it denotes sometimes the act of teaching, sometimes the substance or matter of that which is taught. It may also be theoretical or practical, refer, that is, to either truth or duty—that which is to be believed, or that which is to be done.

On the theoretical side, doctrine may be compared with, and distinguished from, **dogma** or tenet. Dogma and doctrine, especially in the plural, are often identified, but the latter is really a wider conception than the former. It differs from it in two respects—a doctrine is less formal, less of a scientific construction than a dogma, and there is implied in the latter a reference to some religious community on whose authority it is maintained. By some the distinction is thus stated: 'Doctrine summarizes the statements of Scripture on a particular point, adding and diminishing nothing; dogma formulates the principles and relations involved in the doctrine, and the infer-

ences following from it. Every dogma, therefore, is of the nature of a theory, giving the *rationale* of the facts.' The word dogma does not occur in EV nor in the original, except in the sense of a 'decree' or 'ordinance' (Lk 21, Ac 16⁴ 17, Eph 2⁵, Col 2¹⁴, He 11²⁸ [Lachm. *δῶγμα*, but TR and WH *διδάγμα*]). The modern meaning of the word is foreign to the sacred book. On its practical side, doctrine is almost synonymous with *precept* or *principle*.

In OT, doctrine occurs chiefly as tr. of דָּבָר (mostly in Wisdom literature) 'that which is received' (Dt 32², Job 11⁴, Pr 4², Is 29²⁴); it appears once only in each case as trⁿ of דָּבָר 'discipline' (Jer 10²), and דְּבָרָא 'that which is heard' (Is 28⁹, RV 'message'). In Apoc. there are several occurrences of the word. It appears in Sir as tr. of *paidela*, as when 16²⁵ the writer says: 'I will show forth doctrine in weight' (RV 'instruction by weight'), that is, as is made apparent by the parallel clause, 'with exactness.' In 1 Es 5⁴⁰ 'doctrine and truth' appear for the Gr. *ἀλήθεια καὶ ἀλήθεια*, which in their turn represent the דְּבָרָא אֱמֶת, Urim and Thummim—'Lights and Perfections (?)' of the parallel passage Neh 7⁶⁵. In NT, with one exception (He 6¹, where for AV 'the principles of the doctrine of Christ' RV reads 'the first principles of Christ'), doctrine is employed to represent either *διδασχὴ* or *διδασκαλία*, both of which words are used in active and passive sense, the active being predominant in the case of *διδασκαλία*, the passive in that of *διδασχὴ*. The latter emphasizes the authority, the former the act' (Cremer; but see Hort, *Chr. Ecclesia*, 191). Both words are employed in an absolute way for 'the teaching' (*διδασχὴ* in Tit 1⁹, 2 Jn⁹ RV; *διδασκαλία* in 1 Ti 4¹⁶ 6¹, Tit 2⁷). It is worth noting that out of 21 occurrences of *διδασκαλία* in NT, no fewer than 15 are in the Pastoral Epistles. RV has almost uniformly substituted 'teaching' for doctrine as tr. of *διδασχὴ*, but has only occasionally made the same substitution in the case of *διδασκαλία*. In only one instance has it introduced the word doctrine when it does not appear in AV, viz. in 1 Ti 6² where it reads 'If any man teacheth a different doctrine,' for AV 'If any man teach otherwise.'

The intimate relation between doctrine and practice, between right thoughts and right action, is fully and constantly recognized in Scripture. The warnings against false doctrine and its evil effects are numerous (1 Ti 1¹⁰ 4¹, Tit 2¹, He 13⁹, 2 Jn⁹ etc.). Christ's hearers were astonished at His doctrine (Mk 1²²) not less than at His wonderful works; while, on the other hand, He Himself indicated that His doctrine is only to be truly known through obedience (Jn 7¹⁷). The forms of teaching characteristic of the Bible as a whole, as well as of its individual writers, will fall to be considered in the article THEOLOGY.

A. STEWART.

DODAI.—See DODO.

DODANIM (דֹּדָנִים, LXX 'Pḏdoi, Gn 10⁴).—Fourth son of Javan (Ionians, Greeks), and therefore undoubtedly intended to designate a Gr. tribe or colony. There can be no connexion, beyond an accidental similarity in sound, with the inland town of Dodona in Epirus. Nor can it mean Dardanians, as Delitzsch still maintains, for the Trojan province of Dardania was never of such consequence as to give its name to a leading family in the genealogy of mankind. Dillmann and others are inclined to accept the reading of the LXX (which is also that of the Samaritan translation of the Pent. and of Jerome, as well as the MT of 1 Ch 1⁷), and identify the Dodanim with the Rhodians or the inhabitants of the islands of the Ægean Sea. If Elishah be Southern Italy and Sicily, the two pairs of sons of Javan will be

named from east to west: Elishah and Tarshish; Kittim (Cyprus) and Dodanim (Rhodes). The inhabitants of Rhodes from B.C. 800 onward were Ionian Greeks, sons of Javan, who took the place of the earlier Phœnician population. The Rhodians are certainly in their proper place alongside of the Kittim. They were known even to Homer, and were visited from a very early period by all the trading peoples of the Mediterranean coasts. BOCHART'S idea that they might be identified with the Gr. colonists on the banks of the Rhone (Rhodanus) has not commended itself to anyone.

LITERATURE.—Baudissin in Herzog², iii. 634, under 'Dodanim,' treats ably of the four sons of Javan. See also Winer, Schenkel, Riehm; and Bertheau on 1 Ch 1⁷ in his Commentary.

J. MACPIERSON.

DODAYAHU (דֹּדַיָּהוּ 'beloved of J', AV *Dodayah*).—Father of Eleizer of Mareshah, the prophet who censured Jehoshaphat for entering into alliance with Ahaziah (2 Ch 20³⁷). Gray (*Heb. Prop. Names*, 62, 232) contends that the correct Heb. text is דֹּדַיָּהוּ. So also Kittel in *SBOT* (cf. Nestle, *Eigennamen*, 70). J. A. SELBIE.

DODO (so the Kerē דֹּדוֹ, Kethibh *Dodai* (דֹּדַי), or possibly *Dodi* (דֹּדִי); LXX combines the two, translating, *υἱὸς παραδέλφου αὐτοῦ υἱὸς Σουσεῖ*).—1. The father of Eleazar, the second of the three captains who were over 'the thirty' (2 S 23⁹). In the parallel list (1 Ch 11¹²) the name is given as Dodo (דֹּדוֹ, LXX *Δωδοί*), and also 'the Alohite' for the erroneous 'son of Ahoi.' In the third list (1 Ch 27⁴) *Dodai* (דֹּדַי, LXX *Δωδεῖδ*) is described as general of the second division of the army, but the words 'Eleazar the son of' appear to have been accidentally omitted. Bertheau considers that *Dodai* is the more correct form, and appeals to the LXX and Jos. (*Δωδεῖου*); he accordingly restores this form in 2 S 23⁹ and 1 Ch 11¹².

The traditional spelling (*Dodo*), however, is most probably right: the name *Dudu* has been found on the Tel el-Amarna tablets, apparently as that of an Amorite official at the Egypt. court. In the Inscription of Mesha (l. 12) we also find דֹּדוּה (probably דֹּדוּה=Dodo); it appears to be the name of some deity. 2. A Bethlehemite, father of Elhanan, one of 'the thirty' (2 S 23²⁴, 1 Ch 11²⁶ דֹּדוֹ). 3. A man of Issachar, the forefather of Tola the judge (Jg 10⁴). LXX and Vulg. tr. *παραδέλφου αὐτοῦ; patruī Abimelech*. J. F. STENNING.

DOE.—RV (Pr 5¹⁹), AV 'roe,' is in Heb. דֹּעָה *ya'ālāh*, the female ibex. See GOAT, under דֹּעָה.

DOEG (דֹּעַג, דֹּעַג, דֹּעַג *).—An Edomite, and chief of the herdmen [or better, 'runners,' reading with Grätz דֹּעַגִּים דֹּעַגִּים] of king Saul. When David fled to Nob, to Ahimelech (or Ahijah) the priest, D. was there 'detained before the Lord.' Having witnessed the aid given to the fugitive, he reported what he had seen to the king, who summoned Ahimelech before him, and accused him of treason. Regardless of his protestations of innocence, Saul ordered him to be slain. The king's guard shrank from laying hands upon the sacred person of a priest, and the order was then given to D., who not only slew all the priests, but perpetrated a general massacre of all the inhabitants of Nob, destroying even the cattle (1 S 21⁷ 22⁹⁻¹⁹). D. is mentioned in the title of Ps 52. R. M. BOYD.

DOG (כֹּלֵב *keleb*, κύνων, κυνάριον, *canis*).—The dog is mentioned in many places in the Bible, and (with the somewhat uncertain exception of the *greyhound*, Pr 30³¹, where the Heb. signifies *slender in the loins*, and is rendered in the marg. *horse*, RVm *war-horse*) always with contempt. The dog

* On this form see Driver on 1 S 22¹⁸.

referred to is doubtless the pariah animal so common in the streets of all villages and cities in Bible lands. The original of this degenerate race of dogs is probably the shepherd dog (Job 30¹), which differs from the town animal chiefly in his long fur and bushy tail, and his far greater strength, courage, and ferocity. All of these qualities are the natural result of the hardships of his life. Compelled to go long distances, to guard the flocks from the wolves and other savage beasts, to face the cold winds of winter, and its pelting rains or sleet or snow, he needs all the endowments which he possesses over those of his idle, cowardly relative, who spends most of the time, when not in search of his carrion food, in sleeping under the shelter of walls or vaulted passages, or sprawling in the soft mud or dust of the streets.

The street dog is 2 to 3 ft. long, exclusive of his tail, and from 18 inches to 2 ft. high, usually tawny in colour, but often cream-coloured, white, or black, with short, stiff fur, small eyes, and usually with little or no bushiness to the tail. These dogs usually occupy defined quarters of the towns, and any dog intruding into a quarter not his own is certain to be set upon and very severely bitten. They act as public scavengers (1 K 14¹¹ 16⁴ 21¹⁹, 23 22²⁸, 2 K 9¹⁰, 36, Jer 15³). They wander from place to place, especially in the neighbourhood of the city walls, and make the night hideous with their barking (Ps 59^{6, 14}). They not infrequently attack passers in lonely places, especially in the neighbourhood of Arab encampments. Violent men are compared to them (Ps 22^{16, 20}). They are used to watch houses and tents (Is 56¹⁰). The name dog is a term of reproach (1 S 24¹⁴, 2 S 3³ 9³ 16³, 2 K 8¹³, Is 66³, Ph 3², Rev 22¹⁵). 'The price of a dog' (Dt 23¹⁸) probably refers to the practices of the male *kēdeshim* (see Driver *ad loc.* and Hommel, *Anc. Heb. Trad.* 114). In a word, the Eastern street dog is a type of all that is cowardly, lazy, filthy, treacherous, and contemptible. They seem to have been omnipresent in the time of Christ (Mt 15²³, Mk 7²⁷, Lk 16²¹), as the former citations prove them to have been in more ancient times.

With the doubtful exception before given (Pr 30³¹), there is no allusion to hunting dogs in Scripture. As the friend of man, endowed with noble intelligence, the dog had no place in Heb. life.

G. E. POST.

DOGMA, properly an opinion or judgment; then, as a decision of one in authority, a decree—of rulers (Lk 2¹, Ac 17⁷, He 11²³), of Moses (Eph 2⁵, Col 2¹⁴), of apostles (Ac 16⁴). The same word in its verbal form is used of the decisions of the elders (Ac 15^{22, 25, 28}). Hatch (*Hib. Lect.* 1888, pp. 119–120) has very well shown how, from this original meaning of 'personal opinion,' the word came to signify 'decrees' in the case of rulers, and 'doctrines' in the case of teachers. By far the most important NT use of the term is in Eph and Col. All the early Gr. commentators understand by 'dogmas' in both passages the doctrines or precepts of the gospel. Lightfoot correctly insists upon rendering the word, as in all other NT passages, *decree, ordinance*; in Eph it is restricted to *Mosaic ordinances*, but in Col it is applied more generally to all decrees in which moral principles and religious precepts are set forth. The restriction in the one case, however, is not in the word, but only in the context. In Eph the *δόγματα* as 'authoritative decrees' are distinguished from *ἐπιτάξεις* as separate precepts, by both of which terms the Mosaic law is characterized from different points of view. By styling these precepts 'dogmas' the apostle emphasizes the point that they were imposed by external authority. This is in keeping with the ecclesiastical use of the word

to indicate doctrines which are enunciated authoritatively by the Church. See DOCTRINE.

J. MACPHERSON.

DOK (Δῶκ).—A fortress near Jericho, where Simon the Maccabee, along with two of his sons, was murdered by his son-in-law Ptolemy, 1 Mac 16¹⁵. The name survives in the modern 'Ain Dik, 4 miles N.W. of Jericho (Robinson, *BRP* ii. 309; Ritter, *Erdkunde*, xv. i. 460; *SWP* iii. 173, 191, 209). In Jos. (*Ant.* XIII. viii. 1; *Wars*, i. ii. 3) it appears as Dagon (cf. G. A. Smith, *Hist. Geog.* 250).

J. A. SELBIE.

DOLEFUL.—Is 13²¹ 'their houses shall be full of doleful creatures' (Heb. *אֲחִים 'ôhim*); and Mic 2⁴ 'and lament with a doleful lamentation' (*אֲחִים אֲחִים*, AVm 'lament with a lamentation of lamentations,' RVm 'lament with the lamentation, it is done,' after Ewald, Cheyne, and others, taking the last word as Niph. of *אָחַז*, instead of a subst. from *אָחַז* to wail). There is a general agreement that the *'ôhim* of Is 13²¹ are jackals, as there is the Assy. *ahû* used in the bilingual texts for Bab. *lik-barra*, lit. 'evil-dog.' The older Eng. VSS mostly give 'great owls,' the Geneva keeping the Heb. *Ohim*, with a note suggesting the possibility that they and the Ziim (AV 'wild beasts') are 'wicked spirits whereby Satan deluded man, as by the fairies, goblins, and such like fantasies,' which probably suggested the 'doleful creatures' of AV (cf. Wyc., Douay, 'dragons'). The Heb. is probably onomatopoeitic, from [*אָחַז*] to howl; but 'doleful' is mournful (fr. Lat. *dolere*), as in Shaks. *Pass. Pil.* xxi.—

'She, poor bird, as all forlorn,
Lean'd her breast up till a thorn,
And there sang the dolefull'st ditty.'

Shaks. uses 'dole' in the same sense, as *Hamlet*, i. ii. 13—

'In equal scale weighing delight and dole.'

J. HASTINGS.

DOLPHIN.—See BADGER.

DOMINION, used in the ordinary sense, is the tr. of various words in OT and NT, and only noteworthy as the rendering of *κυριότης* in Eph 1²¹, Col 1¹⁶ (pl.), and, perhaps, 2 P 2¹⁰ and Jude⁸ (sing.). Associated as it is in Col 1¹⁶ with *ἀρχαί* and *ἐξουσίαι*, and in Eph 1²¹ with these and *δύναμις* (all sing.),—words used elsewhere (e.g. Eph 6¹², Col 2¹⁰, Ro 8³⁸, 1 Co 15²⁴) primarily, at any rate, of the angelic powers, good or bad or both,—it stands, without doubt, in Eph (ascensively) and Col (descensively) for a grade in the angelic hierarchy; probably, along with *θρόνοι* (Col), the highest grade (as Lightfoot concludes from the earliest lists; see his note on Col 1¹⁶), being at the same time second in that grade, while *ἀρχαί* and *ἐξουσίαι* belong to the next grade below; just as *kingship*, suggested in *θρόνος*, is naturally superior to *lordship* (*κυριότης*), (compare the *θεοί* and *κύριοι* of 1 Co 8⁵), and both are superior to the ordinary *rule* and *authority*. *Θρόνος*, *κυριότης*, *ἀρχή*, *ἐξουσία*, and *δύναμις*, or their linguistic equivalents, are found among the orders of angels in Jewish or Jewish-Chr. books ranging over the NT period or its immediate neighbourhood. Thus in *Jubilees*, § 15: 'Over all [the Gentile nations] hath [God] set spirits as lords' (cf. Sir 17¹⁷); in *Test. XII. Patr. Levi* 3, 'In the heaven next to God are thrones (*θρόνοι*), powers (*ἐξουσίαι*), angels being, in the same passage, assigned to each of the first six out of the seven heavens, in descending order; in Enoch 6¹⁰, 'The host of the heavens and all the holy ones above, and the host of God . . . all the angels of power, and all the angels of principalities,' etc. Christian Fathers, such as Origen, Ephrem Syrus, Pseudo-Dionysius, accept similar though varying gradations (see Lightfoot, Col 1¹⁶). The

belief in such gradations may be traced to the OT, with its Elohim and sons of Elohim (Pss 58 and 82), the mighty beings of the same class as God, yet ruled by Him (Ps 103^{19c}). His host, led by His captain (Jos 5¹³⁻¹⁵ ἀρχιστράτηγος δυνάμεως κυρίου, cf. ἀρχάγγελος, 1 Th 4¹⁶). Being originally, in all probability, the nature-spirits of Semitic heathenism, they were physical rather than ethical (Gn 6¹⁻³), and are sometimes connected or identified with the stars of heaven (Job 38⁷, Is 45¹²; cf. Enoch 18¹³⁻¹⁶, and see article ELEMENT). As the knowledge of God advanced, these 'gods' ceased to have any religious importance, and receded more and more into the position of comparative nonentities (Ps 89⁶), but were still regarded as superintending the nations under Him (Dn 10¹³, Is 24²¹), though in some special sense God reserved Israel for Himself (Dt 32²¹, LXX), making Michael, the chief archangel (Dn 12¹), their prince. Being thus distinguished from God, and not irrevocably bound by the moral law, they could come into opposition to Him, not merely relative but actual, either by blameworthy conduct of the charges committed to them (Is 24²¹, Job 4¹⁸, cf. Enoch 18¹³⁻¹⁶; also the 'angels' in Rev 2, 3), or by diametrical contravention of God's purposes (Dn 10¹³, 2 Co 4⁴, Eph 6¹¹⁻¹⁶; and see ANGEL, DEMON, and SATAN).

The interpretation of *κυβέρνης* in Jude 8 and its parallel 2 P 2¹⁰ is perplexing, and is much disputed. A reference to angelic powers—unseen dignities worthy of reverence (cf. 1 Co 11¹⁰)—is supported by the contiguous *δόξα* ('beings in light like God'), and by the example of the sin of the Sodomites (Gn 19); while a reference to the lordship of Christ or God is suggested by Jude 4, and 2 P 2⁶ (angels that sinned, i.e. against God). See Spitta on the two passages, and Harnack, *Texte*, ii. 14.

LITERATURE.—Schultz, *Old Test. Theology* (Eng. tr.), i. 215 ff.; Everling, *Die Paulinische Angelologie und Dämonologie*, pp. 38, 122 ff.; Lightfoot, *Colossians*. J. MASSIE.

DOOM.—In AV, 2 Es 7⁴³ only, 'the day of doom shall be the end of this time' (*dies iudicii*, RV 'the day of judgment'); to which RV adds Ezk 7⁷ 'Thy doom is come unto thee, O inhabitant of the land,' v. 10 'thy doom is gone forth' (רָחַקְךָ, AV 'the morning,' RVm 'the turn' or 'the crowning time'—see Davidson), and the vb. 1 Co 4⁹ 'God hath set forth us the apostles last of all, as men doomed to death' (ὡς ἐπιθναρίους), AV 1611 'approved to death,' mod. editions 'appointed,' of which Scrivener (*Camb. Parag. Bible*, p. xvii) says: 'A deliberate but needless correction [in 1616] derived from Tind., Cov., the Great and the Bishops' Bibles. The Gen. (1557) has "destinate to death."'

For 'doom' in the sense of 'judgment,' cf. Wyclif's tr. of Ps 93 'He made redi his trone in dome,' and of Rev 19² 'trewe and iust ben the domes of hym.' Shaks. (*Macbeth*, ii. iii. 59) speaks of 'the great doom,' i.e. the day of judgment; and in *Jul. Cæs.* iii. i. 98—

'Men, wives, and children stare, cry out, and run
As it were doomsday.'

The word is connected with 'deem' to judge, whence the 'Deemsters' of Isle of Man and Jersey, and philologically with Gr. *δίκαιος* law, fr. *τίθημι* place, whence 'something laid down, 'a decision.' See Craik's *Eng. of Shaks.* p. 226; Verity, *Shaks. Jul. Cæs.* p. 158 f.; and art. DERM. J. HASTINGS.

DOOR, DOORKEEPER, DOORPOST.—See HOUSE.

DOPHKAH (דֹּפְקָה).—A station in the itinerary of the children of Israel (Nu 33^{12a}). This station and the next one, Alush, which lie between the 'encampment by the sea' and Rephidim, have not been identified, and they are not alluded to in Exodus. As, however, the itinerary in Nu has

every appearance of being taken from a regular pilgrim book, we should say that, on the hypothesis that Mount Sinai and Rephidim (=Feiran) have been correctly located, the position of Dophkah cannot be far from the entrance to the Wady Maghara; this wady contains the oldest Egyptian mines, and as the blue-stone which the Egyptians quarried is known by the name of Mafkat, and gave its name to the district of Mafkat, it is a tempting suggestion to identify Dophkah as an erroneous transcription of Mafkah. Alush would then lie half-way between this and Feiran; it does not appear that any more exact location can be suggested. The identification suggested for Dophkah was made, in the first instance, by Ebers; I arrived at it independently.

J. RENDEL HARRIS.

DOR (דֹּר, דָּרָה), Jos 11² 12²³ 17¹¹, Jg 1²⁷, 1 K 4¹¹, 1 Ch 7²⁹.—A Can. city in Galilee, in the 'uplands' (דָּרָה, RVm Naphath-*or* Naphoth-*idor*) towards the W. Its king is noticed between Jokneam and Gilgal of the Gōiim—which was in Sharon. It seems to have been in Issachar or in Asher, and is noticed as attacked by Manasseh with Taanach. The 'uplands' of Dor formed that part of Solomon's kingdom, which seems to correspond with Zebulun, the next province to Issachar; but, according to the last cited passage, Dor belonged to Manasseh, though noticed with towns of Issachar. These indications do not suffice to fix the site. Jos. makes it a seaside town (*Ant.* v. i. 22, VIII. ii. 3) near Carmel (*Contra Apion.*, ii. 10). It was at Dor that Tryphon (c. B.C. 139) was besieged by Antiochus Sidetes, 1 Mac 15^{11a}. In the 4th cent. A.D. (*Onomasticon*, s.v. Dornapheth) it is identified with *Tanturah* on the sea-coast, 9 Roman miles from Caesarea Palestina on the way to Tyre; but the names have no connexion, and the site is not on the uplands. The low hills S. of Carmel may be intended, but the name has not been recovered.

C. R. CONDER.

DORCAS.—'Tabitha, which is by interpretation called Dorcas' (Ac 9³⁶); דֹּרְקַס is Aram. for Heb. דָּרָה, by regular interchange of *v* for *z* (see Driver, *Hebrew Tenses*³, p. 225 f.). When occurring as the name of an animal, it is tr^d in AV 'roebuck' or 'roe,' in RV 'gazelle.' Δορκάς is the Gr. equivalent, used in LXX. Both the Aramaic and the Greek were, also, not uncommon names for women: the former denoting 'beauty,' the latter the animal's gaze (fr. *δέκωμαι*). For instances see Wetstein's Comm. on Ac 9³⁶; Jos. *BJ* IV. iii. 5 may be mentioned as one.

The raising of Dorcas of Joppa is the second of three narratives (Ac 9³²⁻³⁵, 36-43, 10-11¹³) connected with St. Peter's visit to the towns of the Maritime Plain on the W. coast of Pal., whither he came in the course of a journey undertaken by him after the Church at Jerus. was scattered through 'the persecution which arose about Stephen.' The first of these narratives, like the second, relates a miracle; they are told to illustrate the supernatural powers granted to St. Peter, whose miracles in Jerus. have already been described Ac 2:11-15. The Churches in Lydda and Joppa were not founded by St. Peter (Ac 9:32-38), but on this occasion his presence and his miracles served to strengthen and extend them. He does not seem to have visited Joppa till the Church there, in its distress on account of Dorcas' death, sent to fetch him from Lydda (9:38).

Dorcas was a 'disciple' (μαθήτρια, this fem. form occurs in NT only here). She must have been a person of some worldly substance so as to have had leisure for the 'good works' and means for the 'alms-deeds' of which she was 'full.' The former term is more comprehensive than the latter. Nevertheless, by it also in all probability, according to Jewish associations, works of charity are more especially denoted (cf. the Talm. expression *מעשים טובים* and see on it Weber, *Theol. d. Synagoge*, § 61; see also τὰ ἀγαθὰ μου at Sir 20¹⁶, and cf. *ib.* 18¹⁵ and To 12¹³). Dorcas' labours for the good of others were instances. We may note that they were the

more creditable in one who was able to give alms, and might have contented herself with doing this. The garments which the widows showed to St. Peter may most naturally be supposed to be those which she had previously given to them. The widows are thus seen here, as in 6^t, to form a recognized class, dependent upon bounty. The account of the actual raising of Dorcas (vv. 40, 41) bears a close resemblance to that of the raising of Jairus' daughter (Mt 9²⁵, Mk 5^{40, 41}, Lk 8⁵⁴).

V. H. STANTON.

DORYMENES (Δορυμένως), the father of Ptolemy Macron, who was a trusted friend of Antiochus Epiphanes (2 Mac 4⁴⁵), and was chosen by Lysias to command the Syrian army in Pal. in conjunction with Nicanor and Gorgias (1 Mac 3³³). Ptolemy had formerly been in the service of the Egypt. king Ptolemy VI. Philometor (2 Mac 10¹³); and his father, Dorymenes, may perhaps be identified with the Ætolian Dorymenes who fought for Ptolemy IV. against Antiochus the Great (Polybius, v. 61).

H. A. WHITE.

DOSITHEUS (Δοσίθεος).—1. The priest who, according to a note in one of the Greek recensions of Esther, brought the book to Alexandria in the 4th year of Ptolemy Philometor (?) and Cleopatra, c. B.C. 178 (Ad. Est 11¹). 2. A soldier of Judas Maccabæus, who (2 Mac 12³⁵) laid hold, in the heat of battle, of Gorgias the general of the enemy, and sought to take him alive. The attempt was frustrated by a Thracian horseman, who cut off the arm of Dositheus. 3. A renegade Jew who frustrated the plot of Theodotus to assassinate king Ptolemy Philopator (3 Mac 1³). 4. An officer of Judas Maccabæus (2 Mac 12^{19, 24}).

J. A. SELBIE.

DOTĒA (Δωταία).—Another form of DOTHAN (which see). AV has incorrectly Judæa.

NOTE.—The orig. meaning of 'dote' is to be foolish (cf. 'dotage,' and Scotch 'doited'), as in Chaucer, *Legend of Good Women*, 261—

'Wel wot I ther-by thou beginnest dote
As olde foles, whan hir spirit fayleth';

and *Piers Plowman*, i. 138—

'Thow doted daffe, quod she, dull arne thi wittes.'

In this sense occurs 'dote' in Jer 50³⁶ 'A sword is upon the liars, and they shall dote' (Cov. 'they shall become foolies,' Heb. יִלְלוּ, the vb. [לָא] is only found in Niph., and always=be foolish, or act foolishly, whether innocently as Jer 5⁴, or not as Is 19¹³); Sir 25² 'an old adulterer that doteth' (ἐλαττοῦμενον ἀνέσει, RV 'lacking understanding'); and 1 Ti 6⁴ 'doting about questions and strifes of words' (AVm 'a fool,' RVm 'sick,' Gr. νοσῶν, only here in NT, and νόσημα only Jn 5⁴ TR; but the sense is clearly 'unsound,' 'mad,' a common meaning of the word; Tind. tr. freely 'wasteth his braynes'; 'doteth' is the Geneva word of 1560). Elsewhere 'dote' occurs only in the sense of 'be (foolishly) fond,' Ezk 23^{5, 7, 9, 12, 16, 20} (בָּנָה).

J. HASTINGS.

DOTHAN (דּוֹתַן and דּוֹתַן, Δωθαίμ), Gn 37¹⁷ (*Dothaim*, in Jth 4⁶ etc.), now Tell Dothan, was an ancient town situated 10 miles N. of Samaria. Thither Joseph followed his brethren from Shechem (Gn 37¹⁵). The pasturage about it is still the best and freshest in a time of drought (Thomson, *Land and Book*, p. 466). The site of Dothan, known in earlier times by Eusebius, who placed it 12 miles N. of Samaria, had for some centuries been lost till recovered by Van de Velde (vol. i. p. 364 ff.). It lay on an ancient (Jewish?) road, of which Van de Velde found the remains, crossing from the plain of Esdraelon into the plain of Sharon, and must have always been an important military post. It

stood on the top of a mound, as the language of 2 K 6¹⁴⁻¹⁷ would suggest. There are still two large ancient cisterns, into one of which possibly Joseph was cast. There are two wells, as the name implies, but only one of them seems ancient. It bursts from the foot of the hill (*Sur. Mem.* ii. 169, 215). Most probably, Joseph's brethren were gathered watering their flocks when he approached. Dothan was the residence of Elisha when the incident of 2 K 6^{12⁵} occurred. It is several times mentioned in the account of the siege of Bethulia (Jth 4⁶ 7^{3, 18} 8³).

A. HENDERSON.

DOUBT.—See next article. The middle Eng. *douten* most freq. meant to *fear*, after *dubitare* in late Lat. And this meaning is still very common for 'doubt' in Shaks., as *Macbeth*, iv. ii. 66—

'I doubt some danger does approach you nearly.'

In AV this meaning is evident in Sir 9¹³ 'Keep thee far from the man that hath power to kill; so shalt thou not doubt the fear of death' (οὐ μὴ ὑποπρέσθης φόβον θανάτου, RV 'thou shalt have no suspicion of the fear of death'). But in NT also it is often more than 'hesitate' or 'mistrust,' esp. where the Gr. is ἀποπέμαι, 'to be at a loss' (Jn 13²², Ac 25²⁰, Gal 4²⁰), or the stronger διαπορέω, 'to be utterly at a loss' (Ac 2¹² 5²⁴ 10¹⁷). In like manner *doubtful* means 'perplexing' or 'perplexed,' Sir 18⁷ (ἀποπέμαι, RV 'in perplexity'); Lk 12²⁹ 'neither be ye of doubtful mind' (μὴ μετεωρίζεσθε, a word of disputed meaning here, see Plummer, *ad loc.*); Ro 14¹ 'd. disputations' (see under DISPUTE).

J. HASTINGS.

DOUBT.—The Heb. of OT seems to lack an exact equivalent to our term 'doubt,' when used in a religious reference. Some have, indeed, understood 'doubters,' 'sceptics' to be meant when the Psalmist, who loves God's law and hopes in His word and delights in keeping His commandments, declares that he 'hates them that are of a double mind' (Ps 119¹¹³ דְּבַלְמִי). Apparently, however, it is rather hypocrites, what we should call 'double-faced men,' who are meant; and it seems to be hypocrisy, rather than doubt, which is in mind also in 1 K 18²¹, where the kindred term דְּבַלְמִי occurs, and in 1 Ch 12³³, Ps 12², where the similar phrase 'double heart' (דְּבַלְמִי) appears, as well as in Hos 10², where the comm. differ as to whether the words דְּבַלְמִי are to be tr^d 'their heart is divided,' or, perhaps better, 'their heart is smooth,' i.e. deceitful.

In NT, on the other hand, we meet with a series of terms which run through the shades of meaning expressed by our words, perplexity, suspense, distraction, hesitation, questioning, scepticism, shading down into unbelief.

Perplexity is expressed by the verb ἀπορέω (Mk 6²⁰, Lk 24⁴, Jn 13²², Ac 25²⁰, 2 Co 4⁸, Gal 4²⁰), with its strengthened compound, διαπορέω (Lk 9⁷, Ac 2¹² 5²⁴ 10¹⁷), expressing thorough perplexity, when one is utterly at a loss, and the still stronger compound ἐξαπορέω (2 Co 1⁸ 4⁸), in which perplexity has passed into despair. This perplexity is never assigned in NT to the sphere of religion. Even in such instances as Lk 24⁴, where we are told that the women, finding the Lord's tomb empty, 'were perplexed thereabout'; Mk 6²⁰, Lk 9⁶, where Herod's perplexity over John's preaching and the subsequent preaching of Jesus and His followers is spoken of; and Ac 2¹², where the extreme perplexity of those who witnessed the wonders of the Day of Pentecost is adverted to, it is not a state of religious doubt but of pure mental bewilderment which is described. The women merely had no explanation of the empty tomb ready, they were at a loss how to account for it; Herod simply found John's preaching and the reports concerning the preach-

ing and work of Jesus and His disciples inexplicable, he had no theory ready for their explanation; the marvels of Pentecost, before Peter's explanation of them, were wholly without meaning to their witnesses; and, similarly, in Ac 10¹⁷, Peter was just at a complete loss to understand what the vision he had received could mean, and required a revelation to make it significant to him. It was this state of mind, a state of what we may call objective suspense due to lack of light, which the Jews claimed for themselves when in Jn 10²⁴ they demanded of Jesus: 'How long dost thou lift up our soul (τὴν ψυχὴν ἡμῶν αἰεὶς)? If thou art the Christ, tell us plainly.' They would suggest that they were in a state of strained expectation regarding His claims, and that the lagging of their decision was due, not to subjective causes rooted in an evil heart of unbelief, but to a lack of bold frankness on His part. Jesus, in His reply, repels this insinuation and ascribes the fault to their own unbelief. They were not eager seekers after truth, held in suspense by His ambiguous speech; they were men in possession of full evidence, who would not follow it to a conclusion opposing their wishes; they were therefore not perplexed, but unbelieving.

For the doubt of the distracted mind the NT appears to have two expressions, *μετεωρίζεσθαι* (Lk 12²⁹) and *διστάζειν* (Mt 14³¹ 28¹⁷). This state of mind is superinduced on faith, and is a witness to the faith which lies behind it; only those who have faith can waver or be distracted from it. But the faith to which it witnesses is equally necessarily an incomplete and imperfect faith; only an imperfect faith can waver or be distracted from its firm assurance. The exhortation, 'Be ye not of a wavering mind,' is appropriately given, therefore, in Lk 12²⁹, to those who are addressed as 'of little faith' (*δλιγόπιστοι*), of whom it is the specific characteristic. It is to trust in God's providential care without carking anxiety as to our food and drink and clothing that the Saviour is exhorting His hearers in this context—to fulness of faith, which, according to its definition in He 11¹, is absorbed in the unseen and future in contrast with the seen and present. Those who have full faith will have their whole life hid with God; and in proportion as care for earthly things enters, in that proportion do we fall away from the heights of faith and exhibit a wavering mind. It was a similar weakness which attacked Peter, when, walking, by virtue of faith, upon the water to come to Jesus, he saw the wind and was afraid (Mt 14³¹); and, accordingly, our Saviour addressed him similarly, 'O thou of little faith, wherefore didst thou doubt (*ἐδίστασας*)?' Here, again, is real faith though weak, but a faith that is distracted by the entrance of fear. The same term, and surely with similar implications, is used again and on an even more interesting occasion. When the disciples of Jesus came to the mountain where He had appointed them and there saw their risen Lord, we are told (Mt 28¹⁷), 'They worshipped: but some doubted (*ἐδίστασαν*).' It is this same doubt of imperfect and distracted faith, and not the sceptical doubt of unbelief, that is intended. All worshipped Him, though some not without that doubt of the distracted mind which is no more 'psychologically absurd' here than in Lk 12²⁹ and Mt 14³¹. Whence the distraction arose, whether possibly from joy itself, as in Lk 24⁴¹, or from a less noble emotion, as possibly in Jn 20²⁵, we do not know. But the quality of doubt resulting from it, although manifesting the incompleteness of the disciples' faith, was not inconsistent with its reality; and the record of it is valuable to us as showing, along with such passages as Lk 24³⁷⁻⁴¹, Jn 20²⁵, that the

apostles' testimony to the resurrection was that of convinced rather than of credulous witnesses.

A kindred product of weak faith, the doubt of questioning hesitation, is expressed in NT by the term *διαλογισμός* (Lk 24³⁸, Ro 14¹, Ph 2¹⁴, 1 Ti 2⁸). It is the Nemesis of weakness of faith that it is pursued by anxious questionings and mental doubts. Thus, when Christ appeared to His disciples in Jerus., 'they were terrified and affrighted, and supposed that they had beheld a spirit' (Lk 24³⁶), provoking their Master's rebuke, 'Wherefore do questionings arise in your heart?' And in St. Paul's Epistles, the timid outlook of the weak in faith is recognized as their chief characteristic. This seems to be the meaning of Ro 14¹, where 'he that is weak in faith' is to be received into full Christian brotherhood, but not 'for the adjudication of questionings' (cf. the *κρινέτω* of v.³ and the *κρίνων* of v.⁴): here is a man whose mind is crowded with scruples and doubts,—he is to be received, of course, but not as if his agitated conscience were to be law to the community; he is to be borne with, not to be obeyed. The same implication underlies Ph 2¹⁴, where the contrast between 'murmurings and disputings' seems to be not so much between moral and intellectual rebellion, as between violent and timid obstacles in the Christian pathway,—a contrast which appears also in 1 Ti 2⁸. It would seem that those who are troubled with questionings are everywhere recognized as men who possess faith, but who are deterred from a proper entrance into their privileges and a proper performance of their Christian duties by a settled habit of hesitant casuistry, which argues lack of robustness in their faith.

The NT term which expresses that deeper doubt which argues not merely the weakness but the lack of faith is the verb *διακρίνεσθαι* (Mt 21²¹, Mk 11²³, Ro 4²⁰ 14²³, Ja 1^{6bis}, Jude 22). Wherever this critical attitude towards divine things is found, there faith is absent. The term may be used in contrast to that faith by which miracles are wrought, or in which God is approached in prayer (Mt 21²¹, Mk 11²³, Ja 1^{6bis}); in either case it implies the absence of the faith in question and the consequent failure of the result,—he that 'doubteth' in this sense cannot expect to receive anything of the Lord. It may be used of a frame of mind in which one lives his life out in the Christian profession (Ro 14²³); in this case, the intrusion of this critical spirit vitiates the whole course of his activities,—because they are no longer of faith, and 'whatsoever is not of faith is sin.' Or it may be used as the extreme contrast to that fulness of faith which Abraham exhibited in his typical act of faith; and then it is represented as the outgrowth of unbelief (Ro 4²⁰). From the full description of its opposite here, and the equally full description of it itself in Ja 1^{6a}. (see Mayor's note), we may attain a tolerably complete conception of its nature as the critical, self-debating habit of the typical sceptic, which casts him upon life like a derelict ship upon the sea, and makes him in all things 'double-minded' and 'unstable.' Such a habit of mind is the extreme contradiction of faith, and cannot coexist with it; and it is therefore treated everywhere with condemnation—unless Jude 22 be an exception, and there the reading is too uncertain to justify its citation as such. See further, FAITH.

B. B. WARFIELD.

DOVE (ἡ γόναῖς, *περιστέρα*, *columba*).—There are several species of wild doves in Bible lands, which all go by the name of *hamām* in Arabic. (1) The ring dove or wood pigeon (*Columba Palumbus*, L.), which appears twice a year, at the spring and autumn migration, in all the wooded districts of

Palestine. It is taken by means of a decoy bird, tied to a perch, with its eyelids sewn up. A considerable number remain through the winter. (2) The stock dove (*Columba oenas*, L.), which is common in Gilead and Bashan, and in the Jordan Valley. (3) The rock dove (*Columba livia*, Bonnat), which is found along the coast, and in the highlands W. of the Jordan and in Lebanon. (4) The ash-rumped rock dove (*Columba Schimperi*, Bp.), which is found in the interior of Pal., and makes its nests in the caves and fissures of the chalk precipices. The name *hamām* is associated with a number of wadis and other natural features of the country.

Tame doves are found in every city and village, often in immense numbers. They have been kept from most ancient times. The writer discovered in Wady Sir, in Gilead, a rock-hewn dove-cot of large size. It is described and figured in *PEFS*, Oct. 1886. It is a favourite amusement of boys and young men, especially in the interior cities, as Damascus, Hems, Hamath, etc., to spend the later afternoon hours in superintending the flight of pigeons. They train them to wheel about over the houses, making their own home a centre, and to come back and alight on their owner's hand, and, with a shrill whistle, to be tossed off into the air again for a short whirl. It is one of the earliest mentioned birds in the Bible (Gn 8⁸⁻¹²). It is a bird capable of distant flight (Ps 55⁶). A domesticated variety has yellow plumage (Ps 68¹³). The wild doves make their nests in the cliffs overhanging the wadis (Ca 2¹⁴, Jer 48²⁸, Ezk 7¹⁶). The mournful cooing of the dove is well known, and often alluded to in Scripture (Is 38¹⁴ 59¹¹, Nah 2⁷). Its harmlessness is proverbial (Mt 10¹⁶). Its foolishness is used to illustrate the stupidity of Ephraim (Hos 7¹¹). Its lovable qualities are also proverbial (Ca 1¹⁵ etc.). Young pigeons were used in sacrifice (Gn 15⁹).

Dove's Dung accumulates in immense quantities around the dove-cots, and is an invaluable manure, especially for cantelopes. It is owing to the use of this fertilizer that the melons of Persia are so renowned for their excellence. The talus in front of the cliffs where wild doves nest in large numbers is covered with thick deposits of their excrement, which is almost as powerful a fertilizer as guano.*

G. E. POST.

* There seems to be no doubt of the etymological significance of the word *חֲרִי* *hāri yōnīm* (2 K 6²⁵). *Hāri* means literally *dung*. The Arab. preserves the word exactly, *heri*, with the same signification. It is, however, now regarded as obscene, and constantly so used by low-lived people in the East. What was the substance which was sold at the rate of five pieces of silver the quarter cab, that is, 6s. 4d. the pint? Many efforts have been made to find some *plant* which might have been called by this name. Avicenna says (ii. 141) that the best quality of *ushnān*, a name for several species of *Salsolaceae*, is called *heri el-ʿasfir*, that is, *sparrow's dung*. There are numerous instances of a similar nomenclature. Nevertheless, no one has as yet found a plant that bears the name of *dove's dung*, or which can be identified with the material which was sold so dear; and nothing is gained for science by mere conjecture. It is better to accept the literal interpretation, and conclude that, in the last resort, the dove-cots were drawn upon to satisfy the cravings of starving men. The ordure and urine of almost all kinds of animals and birds, domestic and wild, were administered by the ancients as medicine—among them *dove's dung*. There are long unsavoury articles in the ancient medical treatises of Avicenna and others on their virtues. They were and are still used as collyria in the treatment of ophthalmia. Houghton cites a statement from a Spanish author, who says that in the year 1316 so great a famine distressed the English that 'men ate their own children, dogs, mice, and *pigeons' dung*.' With this statement compare Rabshakeh's threat (2 K 18²⁷, Is 36¹²). It is well known that pigeons and other birds often pass seeds unchanged through their alimentary canal. When the Dutch tried to enhance the price of nutmegs in their E. Indian possessions by limiting the growth of the trees, the large wild pigeons of those regions thwarted their purpose by carrying the nutmegs in their crops, and depositing them in their excrement at points far removed from the Dutch possessions. The seeds took root, and produced nutmeg trees. Birds are a recognized factor in the propagation of plants in this manner. The flora of the coral islands is largely indebted to them for species thus introduced. The existence of such un-

DOYE'S DUNG.—See DOVE and FOOD.

DOWRY.—See MARRIAGE.

DOXOLOGY, which is not a biblical word, is the name which has been applied to any formal ascription of praise or glory to God (*δοξολογία*, *glorificatio*). Such are the closing sentences of several apostolic prayers, e.g. Ro 16²⁷, Jude 25, Eph 3²⁰. In particular, the name is given to the last sentence of the Lord's Prayer as it stands in TR and our AV of Matthew (cf. 1 Ch 29¹¹). This verse, however, is omitted in the parallel passage of St. Luke, neither is it found in the earlier Uncials or the Vulg., but first in the *Teaching of the Twelve Apostles* and Chrysostom. Hence it has been omitted from the text of WH and RV (text, not margin). See Chase, *Lord's Prayer*, 168 ff.

The 'angels' hymn' (Lk 2¹⁴), *Gloria in Excelsis*, etc., has been made the foundation of another doxology by the addition of several non-biblical sentences. This, which is known liturgically as the 'greater doxology,' occurs in one of its forms in the Psalter of Codex A (LXX), while the 'lesser' (*Gloria Patri*, etc.) is wholly extra-biblical.

C. A. SCOTT.

DRACHMA.—See MONEY. **DRAG**.—See NET.

DRAGON.—Four Heb. words are rendered in AV by this fabulous name. 1. *תַּנִּינִם* *tannīm*, *dragons*, the plural of *tan*, which latter is not used in Scripture. This word signifies a *howler*, and refers to a beast inhabiting the desert. RV tr. it in every instance by *jackals*. But in Is 13²² 34^{13, 14} it is found associated with *עַיִימִים* *'ayyim* (which would seem to be the same as *ibn-ʿawa* in Arab., vulgo *wāwi*). This animal is undoubtedly the *jackal*. It is clear that the same animal would not be mentioned twice in a short list of animals, and by two totally different names. We must therefore seek for another desert howler, than which none could fulfil the conditions better than the *wolf*. The Arab. word *tindn* is one of the names of the wolf. The LXX renders *tannīm* variously. Thus Job 30²⁹, Is 34¹⁸ 43²⁰ *σερῆνες*, Ps 44¹⁹ *κάρκωσις*, Is 13²² *ἐχίνου*, Jer 10²² 49³³ *στρουθόλ*, Jer 9¹¹ 14⁶ 51³⁷, Mic 1⁸ *δράκοντες*. 2. *תַּנִּינִם* *tannīm*, a singular form, which is probably a clerical slip for *תַּנִּין* *tannīn* (Ezk 29³ 32²), as the latter is the reading in several MSS. This is properly rendered *dragon* in both AV and RV of the first passage, and in RV of the second, where AV has *whale* in text and *dragon* in marg., the reference being to the *crocodile*, and applied to Pharaoh. 3. *תַּנְוֹת* *tannōth* (Mal 1³), a fem. plural of *tan*, rendered by RV *jackals*, but preferably, for the reason given above (1), *female wolves*. 4. *תַּנִּין* *tannīn*, pl. *תַּנִּינִים* *tannīnīm*. This word is the exact equivalent of the Arab. *tannīn*, pl. *tanānīn*, which signifies 'a great serpent,' or 'a dragon,' or some mythical sea monster, of which it is said that it was two leagues in length, of a colour like that of a leopard, with scales like those of a fish, two great fins, a head of the size of a hill, but in shape like a man's, two great ears, and two round eyes, and from its neck branched six other necks, every one nearly 20 cubits long, and every one with a head like a serpent. The LXX translates this *δράκων*, *dragon*, in every case except Gn 1², where it is *κίτρος*, AV *whales*, RV *sea*

digested seeds would account for the alimentary value (slight though it might be) of *dove's dung*. Furthermore, *doves* convey nourishment to their squabs by disgorging some of the partially digested food from their crops. Some of the grains would occasionally be spilled. In addition, the dung contains feathers, scales of epidermis, and other organic débris. When it is remembered that such substances as *tanned leather*, *glue*, *ground wood*, and all manner of *tainted garbage* are greedily devoured by starving men, it is not strange, or beyond belief, that *dove's dung* was eaten in Samaria in the last agony of despair.

monsters. In AV (Job 7¹²) it is rendered *whale*, and in RV *sea monster*. It is applied to sea monsters under the name *dragons*, in AV and RV (Ps 74¹³ 148⁷, Is 27¹); and to *land serpents*, even of the smaller sort (Ex 7⁹. 10. 12, where it is tr. *serpents* [RVm 'Heb. *tannin*, any large reptile,'] Dt 32³³, Ps 91¹³, where it is tr. in AV *dragon*, and in RV *serpent*). In every case it might have been translated 'dragon' as in LXX (see SERPENT, 2). It is applied metaphorically to Pharaoh (Ps 74¹³, Is 51⁹; cf. חַיָּים (2) above). In the comparison of Nebuchadnezzar with a *dragon* (Jer 51³⁴), we may still imagine the reference to be to a *crocodile*, which may well have existed in the Euphrates at that time.

The word תַּנִּינִים (*tannin* (La 4⁸) is either the Aram. form of תַּנִּינִים *tannim* or a textual error for it (Siegf.-Stade), or a defective scripion for תַּנִּינִים (Löhr). It is rendered in AV *sea monsters*, and in RV *jackals*. The reference is prob. to some fierce desert mammalian. The same objection obtains to the *jackal* as that stated in the case of תַּנִּינִים *tannim* (1). The word is preferably rendered *wolves*. It might, as in AV, refer to some cetacean sea monster were it not for the comparison with the ostrich, which would seem to imply that it was a land animal.

In NT the word *dragon* (Rev 12^{3ff.}) clearly refers to a symbolical, serpent-like monster. Modifications of this ideal have obtained credence in the legends of almost all civilized nations. Dragons of all shapes and sizes have been described and figured, and their lairs are still pointed out in every land. Representations of them are found on coins, in pictures, sculptures, and even on the banners of nations, as on that of China to-day. Dragon worship has prevailed in many lands. The serpent of Gn 3 was transformed ultimately into the 'old serpent called the Devil and Satan' (Rev 20²). Apollo slew the Python. The story of Bel and the Dragon shows how the idea of this monster was lodged in the Hebrew mind. G. E. POST.

DRAGON'S WELL.—See JERUSALEM and WELL.

DRAM.—See MONEY.

DRAUGHT, DRAUGHT HOUSE.—The 'draught' (*ἀφειδρῶν*) of Mt 15¹⁷, Mk 7¹⁹ is a privy, as in Burton, *Anat. of Mel.* 165: 'Muck hills, draughts, sinks, where any carcasses or carrion lies.' And the 'd. house' (דַּרְתָּהוּס) of 2 K 10²⁷ is the same (lit. 'place of *hāri*,' see p. 620 n.); Cov. 'prevy house.' In earlier writers this and other words in *ugh* are generally spelt with *f* (see Earle, *Philology*, § 153); thus Wyclif's tr. of Ps 40³ 'he ledde out me fro the lake of wretchidnesse, and fro the filthe of draft.'

J. HASTINGS.

DRAW.—In mod. usage 'draw' is too mild a word for the action expressed by שָׁחַב *shahab*, in Jer 49²⁰ 50⁴⁵ (RV 'draw out'); or by σὶρω in Ac 14¹⁹ 'having stoned Paul, drew him out of the city' (RV 'dragged'), 17⁶ 'they drew Jason and certain men unto the rulers of the city' (RV 'dragged'); Rev 12⁴ 'his tail drew the third part of the stars of heaven, and did cast them to the earth' (RV 'draweth'); or by ἔλακω in Ac 16¹⁹ 'they caught Paul and Silas, and drew them into the marketplace' (RV 'dragged'); 21³⁰ 'they took Paul and drew him out of the temple' (RV 'dragged'). In older Eng. 'draw' had a stronger sense than now; the verb to 'drag,' which sprang from the same Anglo-Saxon *dragon*, having in course of time carried off some of its strength. Cf. Spenser, *F.Q.* ii. v. 23—

'Tho gan that villein wex so fiers and strong,
That nothing might sustaine his furious forse;
He cast him downe to ground, and all along
Drew him through durt and myre without remorse,
And towly battered his comely corse.'

J. HASTINGS.

DRAWER OF WATER (מִשְׁכָּב מַיִם).—According to Jos 9²¹. 23. 27 the humiliating drudgery of bringing water for the service of the sanctuary, coupled with the task of providing wood, was the price paid by the Gibeonites for being allowed to live (cf. Dt 29¹¹ and Driver's note there). The business of carrying water to the different houses in a town or village is one of the humblest and most poorly paid in Oriental life. It requires little skill or capital. The water is carried in a goat-skin, slung on the back; or two skins are loaded, one on each side of a small donkey, usually driven along by an infirm old man. His clothes are splashed and soiled; the fountain is often some distance away, and on account of the number of women impatiently waiting to fill each one her jar in turn, he has often to bring some of the water at night or very early in the morning. He is engaged continually in what the Samaritan woman found irksome even as an occasional duty (Jn 4⁷).

CARRIER AND WINE-SKIN.

G. M. MACKIE.

DREAD, DREADFUL.—1. These words have gained in intensity during their history. Bp. Fisher says: 'I well perceived it in myself, but all too late, I dread me'; and it once was possible to say 'without dread' for 'without doubt,' as in Chaucer (?) *Rom. of Rose*, B. 2199—

'For certeynly, withouten drede,
A cherle is deemed by his dede.'

By 1611 the word had gained somewhat of its present strength, so that 'fear' is used in AV where 'dread' was used by Wyclif, as Mt 2²² 'he hirde that Archilaus regnede in Judee for Eroude, his fadir, and dredde to go thidir'; 14⁵ 21⁴⁶ 'thei dredden the puple'; Lk 2⁹ 'thei dredden with great drede' (AV 'they were sore afraid'). But even in AV dread is used with scarce more intensity than modern 'fear,' as 1 Ch 22¹³ 'dread not, nor be dismayed' (אִירָא, RV 'fear not'). 2. But the change is not in intensity only; there is also a change in quality. We may still say that we *fear* God, but we must not say that we *dread* Him, or that He is our *dread*, as in Is 8¹³ 'let him be your fear, and let him be your dread' (אִירָא מִיָּדָי וְאִירָא מִיָּדָי), for 'dread' has lost the sense of 'awe' or 'reverential fear' it once possessed, and signifies that which shocks or terrifies. Jacob's exclamation, Gn 28¹⁷ 'how dreadful is this place,' conveys a wrong impression to our ears; 'awful' would be a nearer word now. So in Dn 9⁴ 'the great and dreadful God.' Dreadful in AV is simply that which may be feared, as Wis 10¹⁶ 'd. kings' (φοβερός, RV 'terrible'); 17⁶ 'a fire kindled by itself, very d.' (*ἀδρομάτην πυρὰ φόβου πλήρης*, RV 'full of fear'). Cf. *Act. Henry VIII.* (1543) 'by lawes dredful and penall, to take awaye, purg, and clense this his highnes realme.'

J. HASTINGS.

DREAMS are regarded by men in the lowest stage of culture as objective realities, and all dreams are to them equally true: in the case of every dream the savage believes that he really visits the places he dreams of, or is visited by the persons of whom he dreams. Hence those savages whose gods are, for instance, animal-totems, believe that when they dream of the animal they have been visited by the god: thus the young Red Indian adopts as his manitou the animal of which he dreams during his puberty-fast. A person who is visited by frequent dreams is regarded as a chosen medium between men and gods: the Zulus term a person thus chosen 'a house of dreams.' For the purpose of obtaining supernatural communications of this kind, dreams are induced by artificial means, e.g. by fasting or the use of drugs. Then dreams come to be considered less as objective experiences than as visions, warnings, revelations of the future sent by the gods. Such revelations may be sought, e.g. as by those who visited and slept in the cave of Trophonius for the express purpose of obtaining supernatural communications, or they may come unsought, as, e.g., the dream sent by Zeus to Agamemnon in the *Iliad* (ii. 1-34), or that of Xerxes described by Herodotus (vii. 12). To Homer and Herodotus it seems quite natural that the gods should, to accomplish their larger ends, send dreams to the individual which are intended to deceive him, and the dreams of Agamemnon and Xerxes are deceptive dreams of this kind. But to the deeper spiritual insight of Plato it appears a manifest impossibility, a violation, so to speak, of the laws of religious thought, that a god should deceive men in any way (*Rep.* 382 E), whether by waking visions or by dreams in the night; while at the same time he does not deny that dreams may come from the gods, and elsewhere (*Tim.* cc. 46 and 47) he assigns a prophetic character to some dreams. But side by side with this, the religious view of dreams, there existed and exists the superstitious view: the religious view discriminates between dreams (which are sub-conscious states) just as it discriminates between our waking states of full consciousness, and marks off some of them as moments in which the spirit of man is in direct communication with his god; the superstitious view, however, makes no such discrimination, it regards all dreams as omens, none as having a religious import. Its object is not to know the will of God, but to forecast the future; and its method of doing so is neither religious nor scientific;—not religious, for it makes no attempt humbly to approach the throne of heavenly grace; and not scientific, because for the patient study of the laws by which God rules the universe it substitutes a system of jumping at conclusions. It applies to dreams the same mode of interpretation as to other omens: it blindly assumes that things casually connected in thought are causally connected in fact, and draws its erroneous conclusions accordingly. These illogical processes frequently become developed into regular codes of interpretation (as, for instance, among the Arabs, the Persians, and in the *Oneirocritica* of Artemidorus) by means of which anyone can interpret his own dreams, and thus the uneducated classes in a civilized people relapse into a stage of thought as low as that of the savage.

Assuming it, for the moment, to be true that the state of partial consciousness which we call dreaming may, in exceptional cases, be chosen as the moment for divine communications to man, we see from the above sketch that the human race generally has reached the truth only after, and in consequence of, making many mistakes, just as Kepler invented and rejected fourteen theories to account for the apparent position of Mars before he hit upon the right one, and just as the path of

every science is strewn with the ruins of abandoned hypotheses. The question then arises whether the Jews also struggled through error into truth. In the first place, dreams are recorded both in NT (*Mt.* 1²⁰ 2¹³, 2²⁰) and in OT (*Dn.* 2²⁸) which are expressly said to be communications from God; though it is only in OT, and there only in *Gn.* (28¹², Jacob's ladder), that God is said to appear Himself. In the next place there are dreams recorded (e.g. those of the chief butler and baker and of Pharaoh, *Gn.* 40 and 41) which, though prophetic, are not expressly said to come from God; indeed, from *Gn.* 40⁸ it appears that in the case of such dreams it is rather the 'interpretations' that 'belong to God.' Third, all the dreams actually mentioned in the Bible are dreams which came unsought, but the words of Saul (1 S 28¹⁵ 'God is departed from me and answereth me no more, neither by prophets nor by dreams') seem to indicate the existence of the practice (whether approved or disapproved of by the higher religious consciousness of the community) of deliberately seeking supernatural dreams, as they were sought in the cave of Trophonius. Fourth, it would appear from *Jer.* 27⁹ that there was amongst the Israelites a tendency, which the prophets opposed, to regard the mere dreaming of dreams as itself an indication that the dreamer was a chosen medium of divine communications, as the Zulus regard a 'house of dreams' as a chosen medium also. On the other hand, we do not find in the Bible any traces of the superstitious interpretation of dreams such as was known to the Arabs; on the contrary, Joseph declares (*Gn.* 40⁸) with emphasis that 'interpretations belong to God'; and we do not find that dreams, when sought, were induced by artificial means. Thus, to sum up, on the one hand the Scriptures start from a spiritual height to which the religious consciousness of the heathen world attained only after a long course of evolution, and then only in the case of an isolated genius like Plato; on the other hand, there are indications that the Israelites passed through several of the same stages of error as the rest of mankind.

Thus far we have said nothing of the psychological and physiological laws of dreams. The connexion between bodily states and dreams is recognized in practice if not in theory by the savage who induces dreams by fasting or the use of drugs. Civilized man, even in the prescientific period, further recognizes that the experiences of the day furnish most of the material for our fancies of the night: dreams, says Lily, 'come either by things we see in the day or meates that we eat'; Herodotus makes Artabanus explain Xerxes' dream as due to his anxiety about his projected invasion of Greece; and the dream of Pharaoh may similarly have been due to the anxiety which a 'low Nile' must cause in any one responsible for the government of Egypt. Hippocrates discovered that certain diseases announce their approach by disturbing dreams, and modern medical science confirms the discovery. Without going further into the physiological theory of dreams, we may note that the ordinary concomitant of dreaming is probably an excessive or a deficient supply of blood to the brain. Now, the recognition of the fact that dreaming has its laws, combined with the belief that some dreams are supernatural communications, sometimes leads to the statement that some dreams are sent by God, some (most) not; and this statement conveys a truth in a form open to serious misapprehension. It may be taken to imply two things, both false, viz. (1) that dreams which happen according to natural laws are not part of God's will and design; (2) that dreams which are divine are irreconcilable with the laws by which He governs the universe. A less misleading way of stating

the facts would seem to be to say that His laws act in such a way that we find ourselves at some times in closer communion with Him than at others. All our states of consciousness (whether of complete or of partial consciousness) have their psychological laws and also their physical counterparts in the chemical processes of the brain and nervous tissue; the mental processes which issued in the production of the *Iliad* or *Hamlet* were all in accordance with psychological laws, and all had their physiological counterparts. So, too, every process of reasoning has its psychological and physiological laws, but we do not consider that this fact impedes us in any way from distinguishing good reasoning from bad, or that it prevents us from recognizing the truth when it is presented to us, or that any study of either of those sciences will enable us to dispense with logic or supply us with a better means of distinguishing, say, between a correct syllogistic inference and an illicit process of the minor than logic already affords us. So, too, the fact that our states of partial consciousness are all under law—physiological and psychological—does not constitute any impediment to our distinguishing those states which do from those states which do not possess the characteristics of divine revelations; nor can it impeach the validity of the distinction thus drawn by the religious consciousness of mankind, Christian, Jew, and Gentile, any more than it can impeach the validity drawn by logic between correct and incorrect inferences. The question is one of fact. Do sub-conscious states, possessing the characteristics in question, occur? And to recognize those characteristics is the prerogative of the religious consciousness. If it be said that in the waking state such recognition is possible, but not in a state of partial consciousness, we must inquire on what grounds the statement is made. If on the ground that our sub-conscious states are under physiological laws, then our reply is that so also are states of complete consciousness. If on the ground that in a state of partial consciousness the very faculty whose function is recognition of the kind in question may be dormant, to this our reply is that in the vast number of cases it undoubtedly is dormant; but just as Condorcet, in an exceptional abnormal condition, could, in sub-conscious sleep, work out a mathematical problem which awake he could not solve, and just as Coleridge could compose in sleep the poem of *Kubla Khan*, so in abnormal cases the power of spiritual perception, relieved from the pressure of external sensations, may conceivably be heightened to a pitch of exaltation as far above its ordinary degree of activity and receptivity as the imagination of Coleridge or the mathematical reason of Condorcet was in the cases alluded to. 'The fact that all or most men suppose some significance in dreams constitutes a ground for believing that the supposition is based on experience' (Aristotle, *Div. per Somn.* i.).

LITERATURE.—Carpenter, *Mental Physiology*; Clodd, *Myths and Dreams*; Ladd, *Doctrine of Sacred Scripture* (1883), ii. 429-436; Reynolds (J. W.), *Natural History of Immortality* (1891), 124-139; Driver on Dt. 132. F. B. JEVONS.

DRESS.—To 'dress' (fr. Lat. *directus*, through old Fr. *dresser*) is in meaning as in deriv. the same as 'direct.' Thus Wyclif translates Ps 5⁸ 'dresse thou my weie in thli sight,' 40² 'he dresside my goyngis'; Lk 1⁷⁹ 'to dresse oure feet in to the weie of pees.' (Cf. the use still of 'dress' as a military technical term.) In AV the word is used in the general sense of 'put right,' much as we now use 'do.' Indeed the Heb. most freq. translated 'dress' is the ordinary verb 'to do' (הָעָשָׂה *ásáh*), Gn 18⁷⁻⁸ a calf for food; Lv 7⁹ meat-offering, 'dressed in the frying-pan,' 1 S 25¹⁸ sheep for food, 2 S 12^{4 bis} a lamb

for food, 13⁵⁻⁷ meat, 19²⁴ the feet = wash, 1 K 17¹² a cake, 18^{23-25, 26} a bullock for sacrifice. The other words are עָבַד *ábadh*, to 'work,' Gn 2¹⁵ the garden of Eden (in 2⁹ tr. 'till'), Dt 28³⁹ vineyards; cf. Lk 13⁷ ἀμπελοουργός, AV 'dresser of his vineyard,' RV 'vinedresser'; γεώργιον ξύλου, Sir 27⁶, AV 'if the tree have been dressed,' RV 'the husbandry,' as in 1 Co 3⁹; γεωργέω He 6⁷, AV 'dress,' RV 'till'; הֵעִיב *hētibh*, 'prepare' (lit. 'do good to'), Ex 30⁷ lamps. Cf. Tindale, *Works*, p. 453: 'The lampe must be dressed and snuffed dayly.' RV gives 'dresser' for AV 'gatherer' Am 7¹⁴ (עֹבֵד, see Driver's note).

J. HASTINGS.

DRESS.—The study of Oriental dress serves to explain particular allusions to clothing in the Bible; it imparts a fresh interest to the narrative by presenting to the eye a picture of those written about; and through a knowledge of the various articles of costume and of Oriental usage and sentiment connected with them, it enables us to follow the sacred writers into the figurative meanings they sought to convey when common facts about the outward garments were applied to the clothing of the inner man. Special attention is rendered necessary by the fact that while the general character of Oriental dress is recognized by all, it is often difficult to pronounce upon particular articles as to origin, material, and usage. In this respect the subject resembles that of Pal. architecture, inasmuch as an ancient wall may have stones of Phœnician, Jewish, Greek, Roman, Saracenic, and Crusading styles, and yet the experienced archaeologist may have much difficulty in naming the builder and assigning the date of actual construction. So with regard to dress, amid certain features that were characteristic of Israel, the separated people copied largely from the customs of Canaan, Egypt, Babylon, Greece, and Rome. The chief points of inquiry are those that deal with 1. Materials of Dress; 2. Articles of Dress; 3. Oriental Custom and thought about Dress.

I. MATERIALS OF DRESS.—These were (1) wool and hair; (2) linen and cotton; (3) silk. 1. Wool (קָשׁ, Hair (שֵׁשׁ). One of the earliest forms of clothing in the East would be that of a sheepskin worn as a vest or jacket, or in the larger form of a cloak made of several sewn together, with the wool left on. These are still in use with the wool either inside or outside. The next stage was the removal of the wool and the art of weaving (which see). Sheep-shearing is mentioned in Gn 31¹⁹ 38², 1 S 25²⁸, 2 S 13³⁸, etc. The hair of the goat has also been used from time immemorial, especially for material that had to bear much exposure and strain. The shepherds' tents are made of it, also bags for holding grain and flour. Hence it is called sackcloth (קָשׁ). The hair of the camel was also manufactured into cloth, rougher than that made from wool, but softer than sackcloth. At present it is largely employed for cloaks and rugs, and naturally for camel-harness. The term קָשׁ (1 K 19^{13, 19}, 2 K 2¹³, Jos 7^{21, 24}, Jon 3⁶) may either indicate that the cloak was originally taken from a skin, or may be simply descriptive of its size. The combination קָשׁ קָשׁ occurs Gn 25²⁵, Zec 13⁴.

2. Cotton, Linen, שֵׁשׁ (Arab. *shash*), מִשְׁפָּחִים; כִּי, כִּי (Arab. *bazz*), βύσσος; קִיטָן (Arab. *kītan*), ὀθόνιον, λίνεος. The warmth of the Oriental climate and the advance of civilization bringing more of indoor-life and social gradation, tended to create a widespread demand for this manufacture. Egypt and Syria sent their merchandise of linen and brodered goods to Tyre, Ezk 27⁷⁻¹⁶. The Indian source of supply is preserved in the Arab. name *Shesh-Hindi* (Indian cambrie). The word *karpas* (of Persian origin) should also be translated 'cotton' in Est 1⁶. See COTTON. Cotton and linen were not carefully distinguished. At the present day the Indian

cotton cloth with stamped bright patterns, used for hangings and dados, is very like the linen of the Egyptian mummy-cloths. For the Israelites it was enough to know that those stuffs were both of vegetable fibre, and not of wool. The mixture of wool and linen was called *קָנָף* (Dt 22¹¹, Lv 19¹⁹ only), a word of uncertain (perhaps Egyptian) origin (see Driver, *ad loc.*). Garments made of it were forbidden to the Israelites.

3. Silk. *שֵׁשׁ* * Ezk 16^{10,13}, *σηρικόν*, Rev 18¹² (from *Σήρες*, the name of an Indian people from whom, acc. to Strabo [516, 701], the ancients got the first silk). A common name for silk in Arabic is *harir*, a word whose derivation is most uncertain (see Fränkel, *Aram. Fremdwörter*, 39. In Pr 31²² AV incorrectly gives 'silk' as trⁿ of *שֵׁשׁ* (RV correctly 'fine linen').

II. ARTICLES OF DRESS.—1. *Shirt, Sheet, Linen Garment* (*קִירָדִין*, *σινδών*, Jg 14^{12,13}, Pr 31²⁴, Is 3²³, 1 Mac 10¹⁴, Mk 14⁵¹). This was worn next to the body, and was nearest in purpose to the first coverings mentioned in Gn 3^{7,21}. When it appears as the only garment, it is a cotton or linen wrapper of various sizes. Once representing all, it continued to give something of its character to all the other articles of Oriental dress. It would be the waist-cloth of the Israelites in the brick-fields of Egypt as shown in the monuments, a towel, white or coloured, wrapped tightly round the loins or reaching down towards the knees. Of similar material and shape, though somewhat larger, it was worn in Palestine by boatmen, fishermen, wood-sawyers, and drawers of water. It was also found as a simple large sheet thrown round the body (Mk 14⁵¹), with an end flung over the shoulder, with or without a girdle.

When worn with other garments it took the form of a night shirt, of white cotton or linen, or coarse silk, reaching below the knees. It was made by

town under conditions of trade and agriculture. The alterations consisted in having the entire front cut open, long sleeves attached, and the shape more adapted to the figure. The two fronts were drawn tightly round the body overlapping each other, and the waist was firmly bound with a

COAT (*Kēthōneth*).

belt or sash. It thus resembled a cassock or dressing-gown. From the fact of its covering and supplementing the shirt, and being like it in form, it was obviously meant to be superior to it in material and appearance. It was most frequently

EGYPTIAN LOIN-CLOTH AND SYRIAN SHIRT.

taking a long piece of the material and folding it into two equal lengths, with the sides sewn up, and holes at the top corners for the arms, or with sleeves inserted. At the present day it is usually sold without any opening for the head. This is the proof that it is new, and allows the purchaser to please himself as to whether the opening is to be small or large, plain or ornamental. It is the same for men and women, the latter requiring a larger opening for convenience in nursing. Anyone wearing only the shirt is called naked (Jn 21⁷). It is undress.

2. *Coat* (*קִיטָה* *kēthōneth*, *χιτών*, *tunica*). The shirt passed by easy transition to the tunic-coat or second garment. It completed the indoor costume for family life, the shop, and familiar outdoor surroundings. It was not needed in the simple privacy of pastoral or Bedawi life, and its presence marked the change to the life of the village and

* 'Silk' is accepted by Siegfried-Stade as the meaning of *שֵׁשׁ*, but A. B. Davidson (*Comm. ad loc.*) doubts if silk was worn as early as the time of Ezekiel. 'The LXX (*τριχαστοι*) and ancients thought of some very thin and delicate material. The kind of garment was probably some large wrapper or veil covering the whole person.'

made of striped and bright-coloured cotton or linen, and sometimes of woollen cloth. The overlapping front confined by the girdle formed a recess for carrying any small parcel, such as bread for the journey. A slit was made on each side of the skirt, about a foot long, so as to allow greater freedom in walking. See COAT.

3. *Cloak* (*מֵיל* *mē-īl*, *שִׁמְלָה* *simlāh*, *βέδη* *beged*, *ἱμάτιον*; Arab. *jubbeh*, *meshlah*, *abā'*).—The outermost garment was distinguished by its greater size, and the absence of the girdle. There was much variety in shape, quality, and material caused by the social position of the wearer and the style of Babylonia, Egypt, or Syria, which it most resembled. It was called *קִיטָה*, *σολή*, from its length; *כִּטָה*, *שֵׁשׁ*, *ἐπεδότης*, *περιβόλαιον*, from its enveloping fulness. Hence it represents clothing generally, and is translated 'apparel,' 'raiment,' 'vesture,' 'attire,' etc. To it especially refer the expressions 'changes of raiment,' 'suits of apparel.' Two varieties may be distinguished. (a) *מֵיל*, *σολή*. This was a long loose robe with very wide sleeves worn over the belted coat and shirt. It was a dress

that expressed dignity, culture, and distinction, and was expressly the mark of the priestly, educated, wealthy, and official classes. It resembled (2) in length, and was as much superior to it as it was to the shirt. While a public dress, it was of lighter and more ornamental material than the square *simlâh*, which was pre-eminently the outdoor cloak. It was the characteristic robe of the professions (1 Ch 15²⁷, 1 S 2¹⁹ 15²⁷), the mark of high rank and station (1 S 18⁴ 24⁵), the *מַחְלָאֵזָאֵה* *mahâlâzâh*, suit of exchange of the Hebrews (Is 3³², Zec 3⁴), the *thaub* or *badâleh* of the Arabs. In Egypt it is sometimes worn as a long black surplice, but usually it is open and unconfined. Such was the robe of the Ephod with its fringes and bells swaying with the motion of the figure. The Jewish *tallith* and the Arabic *burnous* resemble it in ornamental lightness, but the stripes of the one and the form of the other point rather to the *simlâh*. It was worn by Saul (1 S 24⁴), was given by Jonathan to David (1 S 18⁴), was the long robe of the Pharisees (Lk 20⁴⁶), and of those 'arrayed in white robes' (Rev 7¹³). It was always emblematic of social intercourse and high rank. It was the

CLOAK OR ROBE (*Mê'ûl*, *σολή*).

full dress of ancient times. At present in Syria it is almost confined to the Oriental clergy, and to Moslems of the official and merchant classes, the latter often having it faced and partly lined with soft fur. Joseph's coat (*מַעֲטֵיף* *mâ'atîf*) was most likely an open long *mê'ûl*. It was an unusual article of pastoral or Bedawidress, which generally comprises the shirt with belt, and the square cloak or *simlâh* of wool or haircloth, with frequently a sheepskin vest between. Such a special garment worn by Joseph would be a mark of favour and an occasion of jealous comparison. The coat (RV 'robe'), 1 S 2¹⁹, annually brought to Samuel would also be of this sort.

(b) *מַחְלָאֵזָאֵה* *simlâh*, *ἱμάτιον*. This was the largest and heaviest article of Oriental dress, being the dress of travel, of the shepherd, worn for protection against cold and rain, and used as a covering during sleep (Ex 22²⁶). It consisted of a piece of cloth about 7 ft. from right to left, and 4½ from top to bottom. A width of 1½ ft. was folded in at each side, and sewn along the top, with a slit at each top-corner through which the hand and wrist could pass. The garment thus losing about 1½ ft. on each side became a square. Usually, two pieces, each 7 ft. long and 2 ft. wide, were sewn together to make the block material, and the over-edged joining is seen running across the back. The

finest kind, however, is made of one entire piece. Such, most likely, was Christ's 'garment without seam' (Jn 19²³). The 'hairy garment' (*הַיָּרֵחָה*), Gn 25²³, may have been a camel-hair *simlâh*. The Arabs

CLOAK (*Simlâh*, *ἱμάτιον*).

SIMLÂH AS WORN.

call their black tents *houses of hair*, and the term usually distinguishes cloth of camel or goat hair from that made of sheep's wool. Cloaks of camel hair are common at the present day, those made in the neighbourhood of ancient Cilicia having a rough surface like that of Scotch shooting tweed, but much firmer and heavier in the make. They are often of a coppery-brown colour, and the comparison in Gn 25²³ would be easily suggested. They are also made of wool and of goats' hair. Ornamentation of coloured silk or red wool is frequently sewn upon the neck, front, and back. The general surface is often further relieved by its being woven in broad stripes of darker and lighter, or black and white colours. In the ordinary *simlâh* of the Syrian shepherd and farmer this is the most characteristic feature. Elijah's mantle and John the Baptist's raiment were of the square cloak pattern. The Bab. garment in Jericho was an ornamental one, possibly of crimson colour, like those described in Ezk 23¹⁵. The large outer

SHEEPSKIN COAT.

garments of shepherds on the hills and inward plains is often made of sheep skins with the fleece left on; but as frequently this is a vest, and the ordinary cloak is worn over it. See CLOKE.

4. *Breeches of linen* (*מִכְנְשֵׁי בָד* *mikhnešê bad*, Ex 28⁴²; *סַרְבָּלִין* *sarbalîn*, Dn 3²¹; RV *hosen*; Ges. *Thes.* 'vel feminalia vel pallia'). The first word indicates that which is drawn together, that is, by the waist-cord passing inside the hem of the gathers. The second means most likely the Persian divided skirt or loose trousers, Arab. *sirwâl*, as the principal article of the common dress when such trousers are worn. In modern Arab. it is called

libás = 'clothing,' for the same reason. It was evidently a modification of the long shirt or tunic-coat, dividing it into two parts at the belt, the upper part being a short Zouave jacket, often highly ornamented, and the lower part being the *sarbálin*, 'hosen.' A long piece of cloth was made into a wide

TRANSITION FROM 'KÉTHONETH' TO 'SARBÁLIN.'

open bag by sewing up the bottom, except a hole at each corner for the feet to pass through. The upper edge was hemmed, and drawn together by a cord or sash within the hem. A mass of plaited cloth thus hung down between the knees, and even trailed between the feet, as a sign of leisure and luxury. During active exercise, such as hoeing, walking, running, these folds were tucked up under the belt in front or behind or at the sides. This was to have the loins girt.

5. *Girdle*. 1. *ḥayit* לִשְׁמֵרָה, only of high priest or a high official, Ex 28⁴, Is 22²¹, prob. a sash wound round the waist several times and falling to the feet; cf. Stade, *ThL* (1894), p. 236; Jos. *Ant.* III. vii. 2. 3. *ḥayit* 'waistband,' see W. R. Smith as quoted in *Oxf. Heb. Lex. s.v.*, also *Expos. Times*, iii. (1893), 243, 256. The girdle was worn over (1) and (2), and was sometimes a cord, often a leather belt as now worn by Eastern monks. For the purse arrangement in it, see BAG. The girdle braced the hip-joints for prolonged exertion, and under it the hanging skirts were drawn up. It served to hold the ink-horn of the scribe, with its box of *atramentum* or black fluid, soaked up into sponge or pith, and its case for holding reed pens. The sash was the *order of the garter* in Oriental costume, the ends being richly ornamented with needlework in silk and gold (see

poses of activity, although the Bedawin occasionally apply it to this purpose. The *simlah*, cloak,

1. LOINS GIRT.

2. GIRDLE WITH INKHORN.

was then rather folded over the arm, or thrown over the shoulder, or laid aside, as at the stoning of Stephen. But when a large bundle had to be carried a considerable distance, the cloak was drawn up somewhat, and the belt fastened tightly around it over the waist, thus forming a large pouch or sack behind. This was prob. the way in which the Israelites carried their kneading-troughs (Ex 12³⁴).

6. *Head-dress*; AV Bonnet, RV Head-tire (כִּנְיָהּ *migbá'ah* (see BONNET); פָּאָר *p'ér*, Is 3²⁰; צִיָּף *zániph*, Is 3²³). The head-dress of the Israelites in early pastoral times would be the same as that which is worn by their successors the Bedawin. It is a piece of cotton or linen, white, blue, or black, or of brightly coloured silk, about a yard square, folded diagonally, and laid on the head so as to screen the eyes, protect the cheek-bones and the back of the neck. It is held in its place by a cord (פֶּתִיל *Gn 38¹⁸*) of soft elastic wool, usually dark brown or black, or of twisted cotton whipped with threads of silk and gold, coiled in several rings tightly round the head, making a covering at once picturesque, comfortable, and protective. The rich colours of the Bab. head-dress are described as 'dyed attire,' קְבוּלִים (Ezk 23¹⁵). The article is now called *kufiyeh* (from the town of Kufah). Afterwards a skull-cap came to be worn, with a napkin usually white, or white with gold thread, folded into a long band and wound round it. In I K 30^{38, 41} the *head-band* is drawn over the face to conceal the features, after the manner of Bedawin robbers. The פֶּתִיל of Dn 3²¹ (RV tunics, RVm turbans,

MALE HEAD-DRESS (1. PASTORAL. 2. PERSIAN. 3. SYRIAN PEASANT).

EMBROIDERY). The military girdle (2 S 20⁸) was a baldrick, often set with gems. The girdle was not used to bind up the loose outer garment for pur-

see Bevan, *ad loc.*) may have been the Persian *fez*, named from the mould in which the felt was pressed. In the case of the royal crown the cord

of the original head-dress was represented by the gold circlet, and the scarf by the cap of cloth and the coronation veil. For military head-dress see **HELMET**.

7. *Border, Hem, Skirt* (קַנְתָּוֹ *kānāph*, 1 S 24⁴; שָׂוֹ *shāl*, Ex 39⁴; κρόσπεδον, Mt 9²⁰). The outer garment had four cords with tassels (נִרְיָוֹ *zizith*, Nu 15³⁸, עֲלֵי-קַיִשׁ Dt 22¹², see Driver's note) at the corners. To make the border and fringes large and conspicuous was part of the Pharisaic form (Mt 23⁶). The corner fringes are seen on the large *tallith* of synagogue worship, and on the small one

FRINGES.

of white cotton worn like an unseen ephod next to the shirt. In the large *tallith*, about 2 yds. sq., of white cotton or wool with black border or stripes, a sq. inch of coloured silk is sown on each corner inside, and through a hole made precisely in the middle of the patch, so as to make the opening a mathematical corner, there is passed a cord composed of eight threads and five knots. This, with the numerical value of נִרְיָוֹ, 600, makes up 613, the rabbinical number of commandments in the Law. During worship the tassel is taken in the hand and raised to the lips, and the symbol of devotion used by an unchanged heart becomes a substitute for obedience. It is the letter that killeth.

8. *Napkin* (σουδάριον, Lk 19²⁰, Jn 20⁷, Ac 19¹²). In a climate like that of Palestine the need of a napkin was occasioned not by cold so much as by dust and heat, as its name implies. At the present day it is used to wipe the face and the back of the hands, and is often partly folded in around the neck to protect the collar of the coat from perspiration and to give coolness. The same name is given by the Arabs to the small cotton cap which they wear under the woollen fez, and call an *arkīyeh* (sweat-cloth).

9. *Sandals* (סַנְדָּלִים, סַנְדָּלִיָּה, סַנְדָּלִיָּה, סַנְדָּלִיָּה, Mk 6⁹, Ac 12⁹). The primitive shoe or sandal was a flat sole of leather, wood, or matted grass with loops attached, through which the shoe-latchet, a leather thong, passed and strapped in the foot. The Arab. *na'al* means the sole of the shoe, as being the principal part, thus pointing to the sandal origin. Even with the shoes or slippers of red, black, and yellow leather in common usage, the ancient habits survive, as the natives like to bend down the leather behind the heel, and make it

more like a sandal. The wooden sandal in very common use has a strap nailed on to hold the foot across the toes, showing the beginning of the upper. Those worn by brides at the marriage feast are made 7 or 8 inches high to give the dignity of the cothurnus. Sandals are removed when entering a house or church, or any place where prayer is offered. The shoe being associated with outside defilement, and being the lowest article of dress, is used as an epithet of contempt and vituperation, and as an implement of beating. Socks are seldom worn, and in walking the shoe is often removed, or the foot with the shoe on is held up to shake out the dust.

10. *Female Dress*. This so far resembled male attire as to make interchange possible and prohibited, Dt 22⁵. There was the *šādīn* or shirt-dress, Is 3²³; over it a *kēthōneth* or tunic-robe, Ca 5³, bound with a girdle, Is 3²⁴. Over this, ladies of nobility wore an unginged *mē-ūl* or robe after the pattern of Joseph's 'coat,' 2 S 13¹⁸. Social life made it possible also for women to have festival robes (AV 'changeable suits of apparel,' Is 3²²). There is mention of *turbans*, ornamental bands of silk, or embroidered linen, Is 3²², probably rather deeper than those commonly worn by men. Another ornamental head-dress is described by the term used for the priestly head-dress, קַנְתָּוֹ. These must have been very elaborate, judging from those

ELEVATED HORN

of the Egyptian monuments, and the tardiness with which the metal head-bowl and horn (Arab. *tantur*) were given up by the women of Syria in modern times. The horn was worn erect, day and night, the veil of a widow being black, others white.

The chief articles of specially fem. attire were the veils and mantles. There were *mufflers* (מִוְלָה), Is 3¹⁹, thin face-veils like gauze-muslin and nun's-veiling, the former brightly coloured with floral designs, used for the face and breast (Arab. *barka'a*, *mandil*).

It is impossible to say precisely what sort of mantle-robe the *מַנְטֵל* *mantle*, Is 3²², may have been. The *שָׂוִי* *shawls* (AV *wimples*), Is 3²², were large veils of white lace, or tough muslin (white or indigo at present), worn over the head and falling down the back. Those worn by Bedawi and peasant women are often used for carrying grass, vegetables, or various parcels, Ru 3¹⁵.

The *veils* (וֵילִים, Is 3²³) were the largest enveloping veils, now called by the Arabs *izars*, made of

white cotton, black twilled silk, or rich silk stuffs of the brightest colours and of highly ornamental

for women, and the love of respectful attention and dignity makes the third equally so for men.

FACE VEILS (1. SYRIAN MOSLEM. 2. EGYPTIAN. 3. LEBANON DRUZE).

patterns. This veil is one of the most familiar objects in the streets of Eastern towns. About

the hair and falling over the shoulders, set with tiny discs of silver and gold and other pendants, something like what is still worn. So with regard to *stomacher* (מְרִיבֵי), Is 3²⁴; as the antithesis suggests some sort of girdle, highly or even fantastically ornamental in contrast with sackcloth, it may have been the loose apron-sash with dangling ribbons and attachments worn by dancing girls.

III. ORIENTAL CUSTOM AND THOUGHT CONCERNING DRESS.—Food and clothing are the two great requisites of the natural life, 1 Ti 6⁸. Clothing is the second necessity. Of its three services, *protection*, *decency*, and *ornament*, the warmth of the climate of Palestine causes the first to be less important than it is in colder countries, while the domestic customs make the second very important

Clothing distinguishes man from the beast. 'To be unclothed' is not merely to suffer cold, but 'to be found naked' (2 Co 5³). The phrase 'naked, and ye clothed me' (Mt 25³⁶), over and above personal comfort to the individual, means restoration to human society and human dignity. 'Clothed and in his right mind' (Mk 5¹⁵) were two equal indications that Legion was no longer an outcast. So to have fine apparel was apt to carry the assumption of all inward graces (Ja 2³).

Eastern clothing is throughout an adaptation not only to climate but to character. Clothes are flung off and on with the same rapidity as that with which heat changes to cold and sunshine to starlight; so it is with the quickly-varying moods of the people. Oriental clothes appear to the European to be cumbersome and prohibitive of exercise. This to the ordinary Oriental mind carries a subtle recommendation, implying that the wearer does not need to work. A common Arab proverb says, 'There is a blessing in being busy,' but it is usually the spectator that quotes it. The loose and ornamental style of Oriental dress emphasizes the thought that the chief good of life is not in active achievement, but in rest and the privilege of rest. Among the trades a work loses in public respect in proportion as the worker has to take off clothing when engaged in it. All clothing above the undermost easily takes on meanings of office, investiture, and precedence. Brightness and colour are synonymous with happiness and prosperity, and grief of soul is expressed by the darkest object seen in nature, the intense black of goat hair (Rev 6¹²). Orientals always travel in their best clothes; it was scarcely necessary for the Gibeonites to assure Joshua that their raiment had been new when they started, except as indicating the length of their journey. In public worship Orientals are impressed and apparently satisfied by changed vestments and spectacular ritual to a degree that always puzzles the more ethical and introspective mind of the West.

In the Bible there are numberless instances of the employment of facts concerning dress for the expression of spiritual truth. The metaphorical application is carried out in much detail, showing that the subject was at once familiar and of extreme interest. We have such phrases as 'clothed with humility' (1 P 5⁵), 'the garment of salvation, the robe of righteousness' (Is 61¹⁰), into which is meant to be borne all that Oriental dress means with regard to completeness of covering and dignified grace. The girdle, head-dress, and sandals are especially rich in similitudes of strength, honour, and defilement. Thus with ref. to the *girdle*, there is the significance of its cleaving to the loins (Jer 13¹¹); of its being loosened (Is 5²⁷); its strengthening value (Is 22²¹, 1 P 1¹³, Eph 6¹⁴);

there is the pathos of being compulsorily girded (Jn 21¹⁸); and the mystery of invisible support (Is 45⁷).

LITERATURE.—Keil, Benzinger, and Nowack, *Heb. Arch.*; Schürer, *HJP* (see 'Clothing' in Index); Conder, *Handbook to the Bible*; Edersheim, *Jesus the Messiah* (1887), i. 621-626; Thomson, *Land and Book*, 3 vols. 1881-1886 (see 'Garments under 'Manners and Customs' in Index to each vol.); Tristram, *Eastern Customs in Bible Lands* (1894), pp. 155-176; Maspero, *Dawn of Civilization* (1896), p. 718f.; Lagarde, *Gesammelte Abhandlungen* (1866), p. 209 ff. G. M. MACKIE.

DRINK.—See **FOOD. DRINK-OFFERING.**—See **SACRIFICE.**

DROMEDARY.—Besides the word (דָּבָר) rendered dromedary, but which ought to have been tr^d. young camel (see **CAMEL**), there are two words, דָּבָר *rekesh* (rendered in 1 K 4²⁸ *dromedaries*, and in Est 8^{10, 14} *mules*, and in Mic 1³ *swift beasts*), and דָּבָר *rammāk* (Est 8¹⁰ *AV young dromedaries*). *Rekesh* (a rare synonym of דָּבָר) probably denoted a species of horse noted for some choice quality. That this quality was *swiftness* is quite uncertain. *Rammāk* is Pers. *ramāk*, 'flock' or 'herd' (see **GES. THES.**). In Est 8¹⁰ 'דָּבָר', lit. 'sons of the herd,' is tr^d in RV 'bred of the stud.' To all appearance, then, we must drop the dromedary from the list of Bible animals. G. E. POST.

DROPSY.—See **MEDICINE.**

DROSS (דָּרוֹס, Kethibh דָּרוֹס, sing. only in Ezk 22^{18a}, elsewhere always plur. דָּרוֹסִים, דָּרוֹסִים, דָּרוֹסִים).—For the process whereby dross was separated from the pure metal, see **FURNACE, REFINER**. The word is several times used in the OT metaphorically for what is base and worthless, e.g. Ps 119¹¹⁹ (of the wicked), Is 1^{22, 25}, Ezk 22^{18, 19} (of degenerate Israel). J. A. SELBIE.

DROUGHT.—See **CRIMES AND PUNISHMENTS**, also **FAMINE**.

DROVE.—This word is the equivalent in AV of two Heb. words. 1. עֲדָר *eder* (Gn 32^{16, 19}). *Eder* is elsewhere rendered *flock* (see **FLOCK**), except in one place (Jl 1¹⁸), where it occurs twice in the construct state, עֲדָרֵי-בָקָר, which is tr^d 'herds of cattle,' and עֲדָרֵי צֹאן 'flocks of sheep.' 2. מִדְּרוֹת *māhāneh*. This word, although rendered in Gn 33⁸ AV *drove*, is rendered once in the same connexion (32⁷) *bands*, and twice (32⁸) *company*. This last, which is the correct tr., is adopted by RV (cf. Gn 50⁹). See **HERD**. G. E. POST.

DROWNING.—See **CRIMES AND PUNISHMENTS**.

DRUNKENNESS.—The spectacle of men beside themselves through alcoholic drink has been familiar from the beginning of history, and all languages have terms in which to describe it. It is a subject that appears in the Bible, as in other ancient writings.

1. *Some of the terms used in the Scriptures in connexion with drunkenness.*—The Heb. has no word that describes this vice, like the Eng. words 'drunken,' 'drunkard,' 'drunkenness,' 'inebriate,' in terms derived from the physical act of drinking. It has two stems in common use (*shākhāh*) and *shāthāh*, שָׁחַח and שָׁתַח referring to the act of drinking; and each denotes indifferently the drinking of water or wine or other liquids, drinking by men or by animals or by the ground. From one of these stems comes the word *mashkēh*, not often used, denoting a butler or cupbearer, one who serves wine at table (Neh 1¹¹, Gn 40¹ etc.). From the other comes the word *mishteh*, much used, denoting a formal feast, a banquet. This is often tr^d by the Gr. *πῶτος*, and once (Est 7⁷) by *συμπόσιον*.

Like the Gr. word, it has in it the idea of a social feast as a gathering where men *drink* together. This shows that the idea of social drinking is older than the differentiation of the Heb. language. Hence it is the more remarkable that the words of these Heb. stems never, of themselves, denote either vicious carousal or intoxication. They are sometimes used in connexion with carousal or intoxication, but in such cases the author always adds other words to indicate the vicious meaning. Even Ec 10¹⁷ is not an exception to this. See **BANQUET**.

A different stem is *rāvāh* (רָוַח), occurring 14 times as a verb, and 6 times in all in the form of three different nouns. The idea is that of being brimful, or saturated, or soaked (Ps 23⁵, Job 37¹¹, Is 58¹¹ 16⁹ 34^{5, 7} etc.). It is possible to tr. the Heb. in every passage where these words occur, without recognizing an allusion to drunkenness. But LXX commonly tr. them by derivatives of *μεθύω* or *πίνω*, and they are no doubt to be regarded as denoting drunkenness. It is as when we speak of a habitually drunken man as a soaker, or as sodden with drink (Jer 46¹⁰, La 3¹⁵).

Another stem, *šābhā* (שָׁבַח), is used in all 8 or 9 times. Its meaning is nearly that of our Eng. 'to guzzle,' that is, to drink intoxicants greedily, with stupefying effect. The active participle denotes the guzzler as in the act, the passive participle describes him as affected by the liquor, the noun denotes either the liquor or the act of guzzling (Is 56¹², Dt 21²⁰, Pr 23^{20, 21}, Nah 1¹⁰, Is 1²², Hos 4¹⁸).

More important than all these is the stem *shākhār* (שָׁחַר). The verb means to become intoxicated, and in common use are the nouns *shēkhār*, 'intoxicating liquor' (see **STRONG DRINK**); *shikkōr*, 'drunkard,' and *shikkārōn*, 'drunkenness.' Many hold that the word is the same with our *sugar*, and that group of words in the Western languages. If so, the Heb. word and the Western word start together with the fact that sugar is present at the formation of alcohol, but follow entirely different lines of meaning. The usage of the Heb. stem is abundant and clear, leaving no doubt as to its meaning. Hebrew-speaking people were familiar with the spectacle of men overcome by alcohol, and they used the words of this stem to express this familiar fact.

In NT, and in Gr. VSS of OT, quite a variety of terms are used, but we need mention only one group: *μέθη*, 'habitual intoxication'; *μεθύω*, 'to be intoxicated'; *μεθύσκω*, 'to make intoxicated'; *μεθύσμα*, 'an intoxicant'; *μέθυστος*, 'intoxicated.' In their meaning and use (both literal and metaphorical) the words of this group are similar to those of the Heb. group last mentioned.

2. *Particulars given in the Bible concerning drunkenness.*—The OT and NT passages that give these particulars, though numerous, are too familiar to need direct citation. If one needs to refer to them, they are easily found by the help of a concordance. Of apoc. passages one will easily recall the contest concerning wine, kings, women, and truth, in 1 Es 3¹⁴; the drunkenness of Holofernes, as described in Jth 12²⁰ 13²; the many references to drinking usages in Sir; and other like passages.

These various canon. or apoc. passages mention abundantly many of the familiar physical effects of drunkenness: staggering, reeling, dizziness, incoherent speech, redness of eyes, vomiting, stupid sleep, insensibility to blows, insatiable appetite for more stimulant. They speak of its mental effects: exhilaration, jollity, loss of good judgment, inconsequence of thought and purpose, inability to keep secrets, quarrelsomeness, shamelessness, failure to remember afterwards what occurred while one was drunk, the purposed for-

getting of one's misery, such facts as the nakedness of Noah, the helplessness of Amnon, the sodden condition of Nabal. They speak of festal drinking, of usages compelling one to drink, or exempting him from compulsion (Est 1⁸), of carousals, dissipations, excess, riot, of the Syrian king drinking himself drunk in his tent in the face of the enemy, many times of the high-born people of both Israel and Judah as wasting their property and energies in costly drinking feasts, of the connexion of drunkenness with licentiousness and gambling, of orgies in which the three were mingled (Jl 3³). They speak of the permanent effects of these things on one's condition of life, of the guzzler and the glutton who bring themselves to poverty, to loss of energy, to rags. They speak of sociological effects, of men who by reason of private dissipations neglect public duty, of men who ought to be ambitious to serve God and their country, but whose actual ambitions run in the line of compounding or drinking intoxicating beverages (e.g. Is 5^{11-12, 22}), of consequent incapacitation for leadership, and resulting oppression and injustice at home, and boundless defeat and slaughter by foreign invaders.

In these and other particulars no one can fail to recognize the widespread prevalence of drunkenness and its evils in the biblical times, and their identity with the same evils as now existing. Especial importance attaches, therefore, to anything the Bible has to say in regard to the remedy.

The author of Sir says: 'Wine drunk in season and to satisfy is joy of heart and gladness of soul; wine drunk largely is bitterness of soul, with provocation and conflict' (31²⁸⁻²⁹). Similar passages abound in ancient literature. They commend the moderate use of intoxicants, and condemn the excessive use; generally drawing the line, however, not between exhilaration and drunkenness, but between drunkenness that is regarded as occasional and reasonable and drunkenness that is habitual and unseasonable. In view of this, it is worth noting that our canonical books contain no such passage. On the other hand, they unqualifiedly condemn drunkenness. They lay down the proposition, 'Look not on the wine when it is red' (Pr 23³¹). In such cases as those of the priests (Lv 10⁹), of Daniel, of the Rechabites, of the Nazirites, they teach that even total abstinence is sometimes a duty.

An account of the intoxicating liquors mentioned in the Bible will be found under the titles STRONG DRINK and WINE. See also FOOD.

3. *The difference between the ancient and the modern problem.*—With all their many points of identity, there is a large and important group of differences. Any one who will carefully study all the passages in the Bible which speak of this matter will note that, in a large majority of them, drunkenness is explicitly spoken of as the vice of the wealthy. Perhaps there is not an instance in which habitual drunkenness is attributed to any who are not wealthy. In modern times, on the contrary, drunkenness is supposed to be much more prevalent among the poor than among the well-to-do. This difference is not an accident. It is mainly the result of the cheapening of intoxicants, through improved processes of distilling and brewing, introduced within the past two or three centuries. When the price of enough wine or beer to make a man drunk was equal to half a month's wages, and no other intoxicants were to be had, it was impossible for most men to become sodden drunkards. The case is different when an hour's labour will pay for an intoxicating quantity of cheap liquor. In the older time, habitual drunkenness was possible for thousands where it is now possible for hundreds of thousands. This

vast modern extension of the domain of intemperance should not be forgotten when we study the Bible for practical light on the subject. To this might be added a large number of important differences of detail between ancient life and modern life that have bearings on the question in hand. The outcome of such a comparison is that drunkenness and its attendant evils, inexcusable, widespread, harmful, and dangerous as they were in the civilizations in which the Scriptures were written, are immeasurably more so in our existing civilization, and we ought to deal with the problem accordingly.

W. J. BEECHER.

DRUSILLA (Δροσίλλα).—See HEROD.

DUKE.—This word being applied in AV with two exceptions* to the chiefs of Edom, the impression is formed that in the family of Esau this was a hereditary title, as it is in Britain now. It is, however, never a title in AV, but a general expression for 'chief,' being formed from Lat. *dux* (the word in the Vulg.), and the tr. of a word (דָּוֹךְ or דָּוֹךְ *'allūph*) which is also applied to the princes of Judah (Zec 9⁷ 12⁶). See CHIEF, ii. 3).

The Heb. word is probably more specific than its Eng. equivalent, being held by Dillmann (on Gn 36¹⁵) to be derived from דָּוֹךְ *'eleph*, a thousand; so properly 'a chiliarch,' and understood by Driver (*Expos.* iii. ii. 9) to denote properly the leader of a clan, and as 'probably the indigenous name borne in Edom by the chiefs of the several *φύλαξ* or clans'; while in Eng. 'duke' was freely applied to any leader or chief of any rank and nation. Thus 'Annibal, duke of Carthaginensis'—Sir T. Elyot, *The Governour*, ii. 233: 'There was a duk that highte Theseus'—Chaucer, *Knight's Tale*, 2; after whom Shaks. *Mids. Night's Dream*, i. i. 20: 'Happy be Theseus, our renowned duke!'; Latimer (*Works*, i. 81) calls Gideon 'a duke'; and Wyclif uses the word of the Messiah, Mt 2⁶ 'And thou, Bethlehem, the lond of Juda, art not the leest among the prynces of Juda; for of thee a duyk schal go out, that schal governe my puple of Israel'; and *Select Works*, iii. 137, 'Jesus Christ, duke of oure batel, taught us lawe of pacience, and not to feigt bodily.' Between 1572 and 1623 (that is, when AV was made) the title was extinct in England.

J. HASTINGS.

DULCIMER.—See MUSIC.

DUMAH (דָּמָה).—1. Son of Ishmael (Gn 25¹⁴, 1 Ch 1³⁰), representing some Arabian tribe or locality. There are many places of this name mentioned by the Arabian geographers, its signification in Arabic (*daumun*, nom. unit. *daumatun*) being the branched wild nut, common in Arabia Deserta (Doughty, *Travels in A. D.*, Index). The most important of the places called after it, *Dumat al-Jandal* (also written *Daumat* and *Daumā*) was identified by the earlier Mohammedan archæologists with the place mentioned in Gn (Yakut, s.v.); and it is probable that the same place is referred to by Pliny (*HN* vi. 32), who is acquainted with a *Domatha* in the neighbourhood of the Thamudeni (as well as a *Thumati*), and Ptolemy, who mentions a city Δουμαθά or Δουμαθά in Arabia Deserta (v. 19, 7), as well as a city of importance of the same name in Arabia Felix (viii. 22, 3). Stephanus Byz. s.v. quotes Glaucus in the second book of his *Arabian Antiquities* as mentioning a city of the name, and Porphyry, *De Abstinent.* ii. 56, asserts that an Arabian tribe named *Dumathii* sacrificed a boy every year, and buried him under the altar which they used as an idol, probably with reference to the same place. Its site is fixed by the geographer Al-Bekri (i. 353) as 'ten days' journey from Medina, ten from Cufa, eight from Damascus, and twelve from Misr'; but by Mas'udi (*Bibl. Geog. Arab.* vii. 248) as 'five from Medina, and fifteen or thirteen from Damascus,' the latter numbers being probably more correct. The 'sūk Dūma,'

* The one exception is Jos 13²¹ 'dukes of Sihon' (דָּוֹכִים, RV 'princes'), and the other 1 Mac 10⁶⁵, where Jonathan Maccabæus is said to have been made a 'duke' by king Alexander (στρατηγός, RV 'captain').

discovered by Burekhardt in the Jauf (*Travels in Syria*, 662), has been identified with it partly on the ground of the correspondence of the names of the surrounding villages with those mentioned by the geographers (cf. Ritter, *Erdrkunde von Arabien*, ii. 360-388). The only further reference to it in the Bible is perhaps to be found in the heading of Is 21¹¹, where an obscure oracle in a strange dialect is introduced with the words 'the massa' of Dumah'; for this the LXX substitutes Idumæa, and many modern critics are inclined to interpret the name Dumah (in Heb. 'silence') allegorically. It is probable that more accurate knowledge of the purport of the oracle would show the geographical interpretation to be right. 2. Name of one of the mountain cities of Judah (Jos 15⁶²) according to the reading of most of the editions; but in that of Ginsburg, Rumah (רומה) is substituted, and this reading is supported by the LXX ('Ρευμά or Ρουμά) and the Vulg. It is probable, however, that the ordinary reading Dumah is correct. In the *Onomast.* Δουμά is given as the name of a large village in the Daroma, seventeen miles from Eleutheropolis (Beit Jibrin); and it was identified by Robinson with *Khirbet Daumah*, in the neighbourhood of Beit Jibrin, where are to be seen the ruins of a village situated on two hills separated by a valley, with remains of many cisterns and caves excavated in the rock, belonging to the Canaanite or Jewish epoch, as well as vestiges of Christian buildings. The 'seventeen miles' of the *Onomast.* is an overstatement, due to the tortuous routes followed in the mountain country (Guérin, *Judée*, iii. 359-361).

D. S. MARGOLIOUTH.

DUMB.—See MEDICINE.

DUNG.—1. Used in the East as manure (Lk 13⁹) and for fuel; especially that of cattle, where wood and charcoal are scarce or unattainable. In Eastern cities there is usually a receptacle for the offal of cattle, whence it is carried out and either burnt or used as manure. Directions for personal cleanliness are given in Dt 23¹⁰⁻¹⁴; and in the case of sacrifices the dung of the animals was burnt outside the camp (Ex 29¹⁴, Lv 4^{11, 12}, Nu 19⁵).

2. The word is used (a) to express contempt and abhorrence, as in the case of the carcass of Jezebel (2 K 9³⁷); and in that of the Jews (Jer 9²², Zeph 1¹⁷). (b) To spread dung upon the face was a sign of humiliation (Mal 2²). (c) As representing worthlessness, St. Paul counted all things but dung that he might win Christ (Ph 3⁸).

E. HULL.

DUNG GATE.—See JERUSALEM.

DURA (דורא Dn 3¹, a plain 'in the province of Babylon'). Etym. uncertain. The word may be connected with the Bab. *duru*, a strong wall or fortification, possibly also with Dor (Jg 1²⁷) and with דור. Ammianus Marcellinus (xxv. 6) mentions it as situated E. of the Tigris. The distance of such a locality from Babylon seems to preclude the possibility of its being the same as that alluded to in Daniel. The validity of this objection depends upon the extent of territory which may be regarded as included in the expression דְּבַרְיָתָא קַדְלָא. The same objection of distance applies to the place of this name which occurs in Polybius (v. 48), which was on the Euphrates near the mouth of the Chaboras, more than 200 miles N.W. of Babylon.

A third (and the most probable) locality suggested is to the E. of Babylon, where Oppert found what appears to be the base of a great statue, near a mound known as Dúair.

G. WALKER.

DURE.—The simple vb. 'dure' (fr. Lat. *durare*, 'be hard,' 'last') is now obsol., its place being filled

by 'endure.' It occurs in AV Mt 13²¹ only: 'Yet hath he not root in himself, but dureth for a while' (RV 'endureth for a while,' Gr. πρόσκαιρός ἐστίν, lit. 'is temporary'; Wyc. 'is temperal,' Rhem. 'is for a time'; 'dureth' is Tindale's word, who translates the same expression in Mk 4¹⁷ by 'endure,' and is followed by AV). 'During,' still in use, is the pres. ptp. of this verb; cf. Tindale, *Works*, p. 476: 'when the disciples were come together vnto the breakyng of the bread, Paule made a sermon duryng to mydnight.' Not in AV, 'during' is introduced by RV into Mt 26⁵, Jn 2³³ 13², Rev 11⁶. Durable is still in use, and applicable to clothing, as Is 23¹², but scarcely now to riches, as in Pr 8¹⁸. Cf. Purchas, *Pil.* p. 28: 'They might take up their Crosse, and follow the second Adam unto a durable happinesse.'

J. HASTINGS.

DUTY is that which is *due*. In mod. Eng. it is only that which is due *by* one, but formerly expressed also that which is due *to* one. This is the meaning of Ex 21¹⁰, AV 'If he take him another wife; her food, her raiment, and her duty of marriage shall he not diminish' (so RV). Cf. Tindale's tr. of Mt 20¹⁴ 'Take that which is thy duty, and go thy way,' and of Lk 12¹² 'to geve them their deutie of meate at due season'; and Knox, *Hist.* p. 117: 'I will serve my Prince with body, heart, goods, strength, and all that is in my power, except that which is God's duty, which I will reserve to him alone.' Shaks. uses the word in both senses, *Tam. of Shrew*, iv. i. 40: 'Do thy duty, and have thy duty.' For the biblical conception of Duty, see ETHICS.

J. HASTINGS.

DWARF is the rendering in AV and RV of דַּוָּר, a word (Lv 21²⁰) denoting one of the physical disqualifications by which a priest was unfitted for service. The word means thin, lean, small. It is applied to Pharaoh's lean kine (Gn 41³ etc.), to the minute grains of manna (Ex 16¹⁴), to the still, small voice (1 K 19¹²), and in other like instances. The conjecture that it here means a dwarf is plausible. But others regard it as meaning an unnaturally thin man—a consumptive, perhaps. The Sept. (ἐφρηλος) and Vulg. connect this specification with the one that follows, as indicating defective eyes. So the meaning must be regarded as uncertain.

W. J. BEECHER.

DYEING.—The art of dyeing is not mentioned in Scripture, but *dyed stuffs* are referred to in various passages, and hence it is altogether probable that dyeing was known to the Israelites. The coloured stuffs mentioned are *blue*, *purple*, and *scarlet*; these all occurring together in the description of the hangings of the tabernacle (Ex 26²⁶). It would seem that the yarn was dyed before weaving (cf. Ex 35²⁵), as we know was the custom of the Egyptians (cf. Wilk. *Anc. Eg.* ii. p. 166, ed. 1878), from whom the Israelitish women may have acquired the art. The Egyptians were certainly acquainted with the art of dyeing by the use of chemicals, though they may not have understood the chemical properties of the materials employed (cf. Pliny, xxxv. 11, and Wilk. ii. 168, 169), and the Hebrews no doubt knew something of it at the time of the Exodus. At a later period they may have learned from the Phoenicians the process of making the Tyrian purple, so renowned among the ancients; but it is not probable that they produced it, as they could not readily procure the shell-fish used in its manufacture. The purple of the tabernacle, if made by the Hebrews, must have been obtained from other sources and by other methods. Purple occurs in Pr 31²² as the clothing of the virtuous woman; and as it stands in a long list of items of her handiwork, it may indicate that she knew how to make it. Scarlet was obtained by a

process similar to that of purple, as we learn from Kenrick, *Phæn.* ch. viii., and Rawlinson, *Phæn.* ch. viii. Blue was doubtless obtained from indigo, which was known to the Egyptians from their commerce with India (Wilk. ii. 164). See COLOURS.

Rams' skins 'dyed' red (עור אילים קצקצים) are

mentioned in Ex 25⁵. This process the Hebrews could have learned also from the Egyptians (cf. Wilk. ii. 185). The art is still carried on in Syria, and large quantities of skins are tanned red for the native shoes and saddles. H. PORTER.

DYSENTERY.—See MEDICINE.

E

E.—The symbol ordinarily used in criticism of Hex. to signify the work of the [second] Elohist. See HEXATEUCH.

EAGLE (עֶשְׂרִי *neshar*, *ἀετός*, *aquila*).—The Arab. retains the same name, in a modified form, *nisr*, substituting *sin* for *shin*. This term is used by the Arabs for the vultures, of which there are four species in the Holy Land. (1) *Gypætus barbatus*, Cuv., the lammergeier, the עֶשְׂרִי *peres* of the Hebrews, AV *ossifrage*, Arab. 'anûk. (2) *Gyps fulvus*, Sav., the griffon. (3) *Neophron percnopterus*, L., the Egyptian vulture, called in Arab. *raham* or *dejj-Fir'awn*, Pharaoh's hen. It is the *gier eagle* of AV, not of RV. (4) *Vultur monachus*, L.

It is also used for the true eagles, of which there are eight species in the Holy Land. (1) *Aquila chrysaetos*, L., the ospray of AV, which is the golden eagle, עֶשְׂרִי *ozniyyâh*. (2) *A. heliaca*, Sar., the imperial eagle. (3) *A. clanga*, Pall., the greater spotted eagle, and perhaps *A. pomarina*, Brehm, the lesser spotted eagle, of which, however, only one specimen has been noted. (4) *A. rapax*, Temm., the tawny eagle. (5) *A. pennata*, Gmel. (6) *A. nipalensis*, Hodges, the steppe eagle. (7) *A. bonelli*, Temm. (8) *Circæus Gallicus*, Gmel., the short-toed eagle. The last is easily recognized by its large flat head, its huge golden eyes, and brightly spotted breast. Its short toes and tarsi are covered with tessellated scales to protect it from the serpents on which it preys. It is the most abundant of the eagle tribe in Palestine. All the above birds are included by the Arabs under the generic term *nisr*=*neshar*, even those which have also specific names, as the ossifrage, the ospray, and the Egyptian vulture. They agree in swiftness of flight (Dt 28⁴⁹ etc), in soaring high into the air (Pr 23⁵ 30¹⁹, Is 40³¹), in making their nests in high trees or inaccessible rocks (Job 39²⁷⁻³⁰, Jer 49¹⁶), and in keenness of vision (Job 39²⁹).

The expression 'enlarge thy baldness as the eagle' (Mic 1⁶), refers to the griffon, which has its head and neck free from feathers. The references to feeding on the slain (Job 39³⁰, Mt 24²⁸) are not to be understood of vultures alone, as eagles also will feed on dead animals if they find them. But it is especially applicable to the griffon and Pharaoh's hen. Therefore in such passages (cf. Pr 30¹⁷, Mt 24²⁸) the allusion is generic. The 'ravenous bird from the East' (Is 46¹¹) describes Cyrus, probably in allusion to the fact that the griffon was the emblem of Persia, and embroidered on its standard. This emblem in various forms has been copied by the Romans, Russians, Austrians, Germans, and by the United States.

The renewal of the youth of the eagle (Ps 103⁵) is an allusion to its longevity, which sometimes reaches a hundred years. The eagle is one of the 'living creatures' of Ezk 1⁹, Rev 4⁷. It has been adopted as an emblem of St. John (in Ireneus of St. Mark), owing to his insight into the divine character, and his power of looking at the divine glory.

The 'bearing on eagles' wings' (Ex 19⁴) is clearly metaphorical, and does not refer to any habit of the eagle. The passage in Dt 32¹¹ 'As an eagle stirreth up her nest, fluttereth over her young, spreadeth abroad her wings, taketh them, beareth them on her wings,' is explained by the preceding verse, which reads, 'He found him in a desert land, and in the waste, howling wilderness; he led him about, he instructed him, he kept him as the apple of his eye'; and in the following verse, 'So the Lord alone did lead him, and there was no strange god with him.' The allusion is to the fostering care of the eagles for their young, and the pains they take to lure them from the nest and teach them to fly. These are well-known facts. It would be no wise difficult for an observer to fancy, in their evolutions, that the old birds actually bore up the younger ones in the air, as well as fluttered over them. G. E. POST.

EAR (אָזְן, 'ózen, ós).—Hearing is associated with obedience as seeing is with conviction. In the East when an order is given, the responsive gesture is to lift the hand to the head and breast, implying that the order is understood and will be carried out. Thus also in the *Arabian Nights*, after a command by a superior, the invariable reply is, 'Hearing and obeying!'

Eye, ear, and heart are concrete terms for understanding, will, and affection, and the gospel is declared to be something beyond human thoughts, desires, and passions. Men had at all times offered sacrifices to influence the will of the gods appealed to, but here God made the sacrifice to lead captive the will of man. 'Ear hath not heard' (1 Co 2⁹). Its limit is in man's willingness to listen (Mt 13⁹, Rev 27^{11, 17}, etc.). Assurance concerning God's ability to hear is drawn from the fact that He planted the ear (Ps 94⁹). The alienated heart is called an uncircumcised ear (Jer 6¹⁰).

The boring of a slave's ear by his consent was the token of life-long surrender and ownership (Ex 21⁶; but not Ps 40⁵, see Kirkpatrick, *ad loc.*); the tip of the ear was touched with blood in the consecration of Aaron and his sons (Lv 8²⁶), and in the cleansing of a leper (14^{14, 17, 25, 28}); the cutting off of the ears is mentioned as one of the atrocities perpetrated by an enemy (Ezk 23²⁶); to incline the ear is a frequent expression for to give attention (Ps 45¹⁰, Pr 22¹⁷ etc.); the ears tingle (לָלַץ) at dreadful news (1 S 3¹¹, 2 K 21¹², Jer 19⁸); to open one's ear (אָזְן הָאָזְן) is a common expression for to reveal a secret to one (1 S 9¹⁵ 20^{2, 12, 13}, 2 S 7²⁷, 1 Ch 17²⁵ etc.). G. M. MACKIE.

EAR.—To 'ear' is to plough (Old Eng. *erian*, connected with *ἀρόειν* and *arare*), as 'After that he tempereth it with dong, then eareth it, soweth it, and haroweth it' (*Pilgr. Perf.* 1526, p. 23); 'A silver saucer . . . was eared up by a plough' (Harrison, *England*, i. 361). In AV, Dt 21⁴ 'A rough valley, which is neither eared nor sown'

(RV 'plowed'; so at Gn 45⁶, Ex 34²¹, 1 S 8¹²); Is 30²⁴ 'the young asses that ear the ground' (RV 'till,' Heb. עָבַר 'work,' as in Dt 21⁴).

J. HASTINGS.

EARNEST.—There are three well-known NT passages in which this word occurs: Eph 1¹⁴ 'The earnest of our inheritance'; 2 Co 1²² and 2 Co 5² 'The earnest of the Spirit.' In all three instances the Greek word (introduced perhaps by Phœnician traders) is the same, ἀρραβών. Its Lat. equivalent is *arra* or *arrhabo* (not *pignus*), and its Eng. *arles*, now obsolete except in Scotland. The corresponding word in Heb. עֲרָבָן (Gn 38^{17, 18, 20}) means a pledge or token, something to be returned when the terms of the contract have been observed; but by ἀρραβών, *arrhabo*, *arles*, we are to understand a first instalment, given as a sure and binding engagement that the rest shall follow in due time. The earnest is a pledge, but it is a pledge consisting of part of the possession, or benefit, or blessing with which the contracting parties are concerned. The *arles* given to a servant signifies that a contract has been entered into, and it is a binding promise that the wages agreed upon will be forthcoming when the term of engagement has expired. It is really a part of the wages, and it is the same in kind as the money payment to be afterwards made. In very olden times a similar formality used to obtain in connexion with the conveyance of land, or houses, or mills. In buying a field, the purchaser had given him a clod of earth as an earnest that, at the appointed time, he should enter upon complete possession. When houses were transferred from one owner to another, the purchaser or receiver had handed him some of the thatch as *arles* or earnest that by and by the whole property should pass over into his possession. In the case of a mill, some small piece of the machinery was passed from hand to hand. These simple ceremonies were as binding as an agreement written upon parchment and made valid by the impression of a Government stamp. The idea underlying them all appears in various forms in Scripture history. Abraham's sojourn in Canaan was a kind of earnest to a wanderer like him that his seed should by and by possess the land. When Abraham's servant, having gone to Mesopotamia to fetch a wife for Isaac, gave Rebekah a nose-ring and bracelets and jewels of gold and silver, these were to her an earnest of Isaac's wealth, and the evidence of a comfortable home in Canaan. Using the word in the sense above explained and illustrated, the apostle tells us that the work of the Holy Spirit in our hearts is an earnest of our heavenly inheritance. Christian knowledge, holiness, and happiness are not only a pledge, but also a foretaste of heaven's bliss. See Eadie, *Eph.* p. 68f.

G. M. PHILIPS.

EAR-RING.—נֶזֶם *nezem*, orig. nose-ring (נֶזֶם אֶשֶׁר עַל-אֵפֶסֶת Gn 24⁴⁷, נֶזֶם אֶשֶׁר עַל-אֵפֶסֶת Is 3²¹, cf. Ezk 16¹², where first clause should read as in RV 'I put a ring upon thy nose'), perhaps equiv. to נֶזֶם in Ex 35²² (AV bracelet, RV brooch); also applied to ear-ring, נֶזֶם אֶשֶׁר בְּאָזְנוֹתָם, Gn 35⁴. In RV it is tr. *ring*, where the text makes no special reference to nose or ear. For the nose the *nezem* was a plain ring of gold worn either in the wing or central cartilage of the nose. For the ear the circular form (נֶזֶם עֵינִי Ezk 16¹²) was the most common, but usually ornamented with some sacred or talismanic symbol, or having one or more balls attached, hence called נֶזֶם אֶשֶׁר עַל-אֵפֶסֶת Is 3¹⁹ (AV *chains*, RV *pendants*). In Is 3²⁰ for נֶזֶם AV 'ear-rings,' RV gives 'amulets' (see AMULET). Such rings formed an important part of the bride's ornaments (Gn 24²²). At the present day in Syria, when a young peasant woman comes into town with her friends to buy the marriage outfit, the first purchase is usually that of the ear-

rings. Ear-rings are now confined to women, being regarded as barbaric and effeminate when worn by men. Among the Bedawin, in the case of an only son, the ear-ring is sometimes worn as

SYRIAN EAR-RINGS.

an amulet in the form of a large silver ring suspended round the outer ear, with discs or balls attached to the lower half of the ring, hanging visible below the lobe of the ear. Rings for nose and ear formed the material of the golden calf (Ex 32²), of Gideon's image (Jg 8²⁴), and were offered for the furnishing of the tabernacle (Ex 35²²).

LITERATURE.—Benzinger, *Heb. Arch.* 107; Lane, *Modern Egyptians* (Append. A. 'Female Ornaments'); Wilkinson, *Anc. Egypt.* ii. 336 ff.; Hartmann, *Hebræerin*, iii. 205; Wellsted, *Travels*, i. 321; Harmer, *Obs.* iv. 311, 314; Moore on Jg 8²⁴.
G. M. MACKIE.

EARTH is the tr. of various Heb. and Gr. terms, the most notable of which are—

1. אֶרֶץ (deriv. uncertain, perhaps from a root containing notion of being *tilled*, or of *smoothly covering and closely fitting*. See *Oxf. Heb. Lex.* s.v.), which with its LXX and NT equivalent γῆ is used (1) of the earth as tilled, Gn 2⁵ 3¹⁷ etc. Hence אִישׁ אֶרֶץ = a husbandman, Gn 9²⁰. (2) Of earth as a material substance, from which were fashioned man Gn 2⁷, animals v. 19, vessels Is 45⁹ (see POTTERY), of which at times altars were made Ex 20²⁴, cf. 2 K 5¹⁷, and which was put upon the head as a token of woe or of contrition 1 S 4¹², 2 S 1², Neh 9¹. In this last reference the term more frequently employed is עָפָר = dust, which is rendered *earth* in such passages as Gn 26¹⁵, Job 8¹⁹ 19²⁵ 28² 30⁶ 41³³, Is 2¹⁹, Dn 12². (3) Of earth as the visible surface of the globe, in such phrases as 'everything that creepeth upon the face of the earth' (RV 'ground') Gn 1²⁵ 6²⁰ etc. (4) Of earth as = land or country Gn 47¹⁹, Is 19¹⁷, esp. of the Holy Land Zec 2¹². (5) Of earth as = whole earth Gn 12² 28¹⁴. This last usage is rare, and, like the preceding, belongs rather to—

2. אֶרֶץ (in Aram. portions of Ezr and Dn אֶרֶץ, Syr. *ar'ā'*), which is used (1) of earth as opposed to heaven Gn 1¹, cf. Mt 28¹⁸; (2) of earth as opposed to sea Gn 1²⁰, cf. Mk 4¹ 6⁴⁷; (3) of the whole earth Gn 18¹⁸, or its inhabitants Gn 12⁸, cf. Lk 18⁸ 21²⁵; (4) = land, country, district Gn 10¹⁰ 19²⁸, cf. Mt 2²⁰ 4²⁴; (5) as synonymous with אֶרֶץ = soil Gn 11^{1, 12}, cf. Mt 13². See GROUND.

3. A poetic synonym of אֶרֶץ is תְּבֵלָה (perhaps fr. a root = *productive*; according to Hommel, *Expos. Times*, 1897, viii. 472, it had originally a mythological sense), 1 S 2⁸, Is 14²¹ etc. Both אֶרֶץ and תְּבֵלָה are reproduced in the LXX by γῆ and οἰκουμένη, the

latter of which occurs a good many times also in NT, e.g. Lk 4⁵, Ro 10¹⁸, Rev 16¹⁴.

See further COSMOGONY, WORLD.

J. A. SELBIE.

EARTHQUAKE.—Palestine has from time immemorial been a country subject to earthquakes, and it is therefore not surprising that several references to these phenomena should be found in Holy Writ. Nor is it improbable that during prehistoric times, especially during the Miocene and Pliocene epochs, it was even more liable to seismic shocks than in the former period, when we consider that the regions beyond the Jordan witnessed volcanic eruptions on a vast scale from craters and foci which are now altogether dormant.*

The references in this article will be restricted to the region of Pal. and the adjoining territories of Syria, Asia Minor, and Arabia Petrea, and the subject will be treated under the foll. heads:—

1. Historical. 2. Prophetic. 3. Earthquakes of the Christian Era. 4. Origin of Earthquake Phenomena. 5. Literature.

1. HISTORICAL.—(a) Earthquake at Mount Sinai on the giving of the Law: 'the whole mount quaked greatly' (Ex 19¹⁸).

(b) Earthquake accompanied by fissures and sinking of the ground, by which Korah and his companions were destroyed (Nu 16³¹; also Jos. *Ant.* iv. iii. 3).

(c) Earthquake in the days of Saul (1 S 14¹⁵).

(d) Elijah, fleeing from the wrath of Jezebel, finds a refuge on the solitary heights of Horeb (Mount Sinai) in Arabia Petrea (1 K 19¹¹). Assuming Jebel Musá to be actually the mount in question, tradition has handed down to us the name of the cave from which the prophet witnessed the effects of the earthquake. At about 200 feet below the summit of this mountain there lies in a recess a circular pool surrounded by rocks of granite and porphyry penetrated at one spot by a cave, probably of artificial origin, known amongst the Arabs and the monks of St. Catherine as 'Elijah's cave.' The position and surroundings fit in so well with the narrative that it would be useless to call in question the truth of this identification.† The solitude of the place would have afforded the prophet protection; the cave, shelter; and the pool, water to quench his thirst.

(e) Earthquake in the reign of Uzziah. This earthquake must have been one of extraordinary severity, as it is twice referred to, Am 1¹ and Zec 14⁵; and from the latter passage we may infer that it caused a precipitate flight of the inhabitants of Jerus., and may have been accompanied by fissuring of the earth at the Mount of Olives. The exact date cannot be determined, as Uzziah's reign was long, extending from c. B.C. 790–740.

(f) B.C. 31, Sept. 2. In the reign of Herod an earthquake occurred in Judæa, 'such as had not happened at any other time,' destructive to men and animals (Jos. *Ant.* xv. v. 2).

(g) Earthquake at the Crucifixion. In this case the earthquake described in Mt 27⁵¹ was one of the miraculous manifestations of divine power which accompanied the death of our Lord on the cross, and was followed by rending of the rocks and of the veil of the temple, and opening of the tombs, A.D. 29.

(h) Earthquake at Philippi. This has often been considered a miraculous manifestation of divine power, called forth for the release from prison of St. Paul and Silas, A.D. 51.

* In Keith Johnston's *Physical Atlas*, as also in Prestwich's *Map of Active and Extinct Volcanoes* (*Geology*, vol. 1.), the region of Pal. and Syria is shown as one greatly subject to earthquake shocks.

† The only other rival is that of Serbál; but the claims of J. Musá to be Horeb far outweigh those of Serbál. See Stanley, *Sinai and Pal.*, ed. 1860, p. 49; *Picturesque Pal.*, p. 113.

2. PROPHEPIC.—Earthquakes being amongst the most terrible and impressive of natural phenomena, are made use of in the Bible for prophetic imagery connected with future calamitous events; thus—(a) 'she (Ariel or Mount Zion) shall be visited of the Lord of hosts with thunder and with earthquake' (Is 29⁶, RV). (b) 'And there shall be famines and earthquakes in divers places' (Mt 24⁷). (c) 'And I saw when he opened the sixth seal, and there was a great earthquake' (Rev 6¹²). (d) 'And he (the angel) taketh the censer, and he filled it with the fire of the altar, and cast it upon the earth; and there followed thunders, and voices, and lightnings, and an earthquake' (Rev 8⁵). (e) 'And there were killed in the earthquake seven thousand persons' (Rev 11¹³). (f) 'And there was a great earthquake, such as was not since there were men upon the earth' (Rev 16¹⁸).

3. EARTHQUAKES OF THE CHRISTIAN ERA.—Out of the large number of recorded earthquakes, of greater or less intensity, from which Pal. and the neighbouring countries have suffered, only a few of special importance can be noticed here.

(1) A.D. 494. Syria and Asia Minor: the cities of Laodicea, Hierapolis, Tripolis, and Agathicum were overthrown (*Mar. Comes*, p. 46, quot. by Mallet).

(2) A.D. 551. Felt over Pal., Arabia, and Syria (Theophanes, p. 192).

(3) A.D. 658. Month of June; very destructive in Pal. and Syria (Theoph. p. 232).

(4) A.D. 746. Jerus. and surrounding regions suffered greatly (Theoph. p. 363).

(5) A.D. 755. A severe shock of earthquake occurred at Jerus., whereby the Haram es-Sherif ('Mosque of Omar') was much injured (Besant and Palmer, *Hist. Jerusalem*, ed. 1833, p. 97).

(6) A.D. 859. Earthquake throughout Syria; in Antioch 1500 houses were thrown down (Abulfaraj, p. 166, quot. by Mallet).

(7) A.D. 1036. Earthquake by which Jerus. was much injured (Cedrenus, p. 737).

(8) A.D. 1170. Succession of earthquakes passed through Pal., which, by their violence and frequency, filled all men's hearts with fear; hundreds perished in the ruins of their houses; grief and consternation spread around (*Hist. Jerusalem*, p. 352).

(9) A.D. 1202 (or 1204). An earthquake shook Pal. from end to end; Damascus, Tyre, and Nablús were reduced to heaps of ruins; the walls of Acre and Tripoli fell; Jerus. alone seemed spared, and there Christian and Mohammedan met together to thank God for their safety (*Hist. Jerusalem*, p. 492; Abulfeda, *Ann.* iv. p. 211).

(10) A.D. 1402. Coast of Syria affected; sea retired and then invaded the land; several towns ruined (Muratori, t. xviii. p. 974).

(11) A.D. 1759. An earthquake protracted through a period of three months, in which Acco, Saphat, Baalbek, Damascus, Sidon, etc., were severely injured (*Volcanoes, Past and Present*, p. 219).

(12) A.D. 1822. On Aug. 13 an earthquake occurred at Aleppo, lasting only ten or twelve seconds, by which this town, together with several others in Syria, were converted into a heap of ruins, and 20,000 human beings were destroyed (Chesney, *Survey of the Euphrates and Tigris*).

(13) A.D. 1837, 1st Jan. Great earthquake in Pal. by which the town of Safed was destroyed, with many of the inhabitants (Tristram, *Land of Israel*, p. 531).

4. ORIGIN OF EARTHQUAKE PHENOMENA.—

From the observations made by Hopkins, Lyell, and others regarding the cause and nature of earthquakes, it seems clearly established that they have their origin in some sudden impact of gas, steam, or molten matter, impelled by gas or steam under high pressure, beneath the solid crust. The effect of such impact is to originate a wave of translation through the crust, travelling outwards from a focus, and causing a movement of the surface to greater or less distances. These waves of translation can in some cases be represented on a map by curved lines; each line representing approximately an equal degree of seismic intensity. That there is an intimate connexion between earthquake shocks and volcanic action is proved by the fact that eruptions from volcanic craters

are generally preceded by earthquake shocks, and these latter are more frequent in those regions where volcanoes, either active or extinct, abound. At the same time, the most destructive earthquakes are not necessarily in the neighbourhood of volcanoes, many of the most disastrous having occurred in places far removed from centres of eruption; as, for example, those of Lisbon in 1755, and of Charleston in N. America in 1886. Such cases as these have given rise to the view that active volcanoes act as safety-valves for the escape of the elastic gases and vapour underlying the crust.*

Assoc.* 1847, p. 33; Mallet, *Earthquake Catalogue*, *ibid.* 1853; Lyell, *Principles of Geology*, vol. ii.; Prestwich, *Geology*, vol. i. ch. 13, with map of earthquake areas; Judd, *Volcanoes*, ed. 1888, p. 343; Hull, *Volcanoes, Past and Present*, *Contemp. Science Ser.* p. 217 (1892); for the earthquakes referred to in Bible, Plumpton, *Biblical Studies*, 136; Andrews, *Life of Our Lord*, 561, 575; Schürer, *HJP*, i. i. 403, 426; Pusey on Am 411.

E. HULL.

EASE.—The subst. is found chiefly in the phrase 'at ease,' which has both a good and a bad meaning: Ps 25¹⁸ 'His soul shall dwell at ease; and his seed shall inherit the earth' (עָסוּת 'in good'); but Am 6¹ 'Woe to them that are at ease in Zion' (עָסוּת), so Job 12⁵, Ps 123⁴, Is 32^{9, 11}, Zec 1¹⁵ with same Hebrew. Once 'ease' means 'relief,' Sir 38⁴ 'that which they give for ease and remedy to prolong life' (ἀνάπαυσις, RV 'relief'). Elsewhere 'rest' or 'enjoyment,' as Dt 28⁶⁵ 'among these nations shalt thou find no ease' (עָסוּת אֵי); Jth 1⁶ 'there he took his ease, and banqueted' (ἦν ἐκεῖ παύσασθαι); Lk 12¹⁹ 'take thine ease, eat, drink, and be merry' (ἀναπαύου). But in Apocr. the word occurs as the opposite of difficulty, as 2 Mac 2²⁵ 'that they that are desirous to commit to memory might have ease' (εὐκοπία), 2²⁷ 'it is no ease' (οὐκ εὐχερέως). In these places we should now use the adverb 'easily.' But we still have 'with ease,' as in Jg 20⁴⁸ 'they . . . chased them, and trod them down with ease' (עָסוּתָם, RV 'at their resting place').

But the meaning of this passage is uncertain; Moore thinks the Heb. is corrupt. The word *menuhah* means 'a resting place,' as Nu 10⁶³, and is often translated 'rest' (see Cox on Ru 1⁹); but it may be a place-name here, as AvM 'from Menuchah,' RVm 'at Menuhah'; there is, however, no prep. in the Heb. The older versions are at a loss. The AV rendering is from the Geneva Bible 'chased them at ease,' with marg. 'drove them from their reste.' Taverner gives 'chased them to Menoah'; Cov. 'followed upon them unto Menuah'; Bishops' 'chased them diligently,' m. 'from their rest'; Wyc., Douay, 'neither was there any rest of men dying,' after Vulg. 'nec erat ulla requies morientium.' The LXX is ἐξ ἡσυχίας; Luther 'bis gen Menuah'; Ostervald 'depuis Ménuha.' On the whole it seems best, if we are to accept the text, to take the word as a place-name; and then Ostervald is probably nearest the mark 'depuis Ménuha jusqu' à l'opposite de Guibha.'

The verb has always the meaning of 'give relief'; but that may be either by lightening a burden, as 2 Ch 10⁴ 'ease thou somewhat the grievous servitude of thy father'; or by removing it altogether, as Is 1²⁴ 'I will ease me of mine adversaries' (עָסוּתָם), 2 Es 7⁶⁸ 'if he did not so of his goodness, that they which have committed iniquities might be eased of them, the ten thousandth part of men should not remain living' (ut *allevetur*). Cf. Jer. Taylor (1630), *Works*, iii. 90, 'I am no sooner eased of him, but Gregory Gandergoose . . . catches me by the goll'; and Pope, *Odys.* xxi. 342, 'Ease your bosoms of a fear so vain.' Tindale meant to express the removal of the burden when he tr^d Mt 11²⁸ 'Come unto me all ye that laboure and are laden, and I will ease you'; and so Hos 11⁷ Cov. 'their pro-

* The theory of Mr. R. Mallet differs somewhat from the above; briefly stated, he considers that earthquakes originate in shocks caused by the strain overcoming the resistance along lines of fracture traversing the earth's crust; this strain being due to the secular cooling of the crust and consequent contraction (*Trans. Roy. Irish Acad.* vol. xxi.).

phetes laye the yocke vpon them, but they ease them not of their burthen.' J. HASTINGS.

EAST, CHILDREN OF THE (מִזְרַיִם, *miot anatoledōn*).—A general name for the inhabitants of the country east of Palestine, especially the Syrian desert, but also including what was known of Arabia; in Jg 6³ 7¹² and 8¹⁰, the Children of the East are coupled with Midian and Amalek; in Jer 49²⁸ with Kedar. The mention of their *נוֹיִם*, or Bedawin encampments (Ezk 25^{4, 10}), which they are to erect on the lands of Moab and Ammon, identifies them with the Ishmaelites, of whom the same technical term is used. To their proverbial wisdom reference is made in 1 K 5¹⁰ and Is 19¹¹, and it is probably the reason why the author of the Book of Job made his hero one of them (Job 1³). In Gn 29¹ 'the land of the children of the E.' might seem to be Mesopotamia; but it is more probable that different views of the habitation of Laban are conflated in that chapter.

D. S. MARGOLIOUTH.

EAST SEA, EASTERN SEA.—See DEAD SEA.

EASTER, used in AV as the tr. of τὸ πάσχα in Ac 12⁴ 'intending after E. to bring him forth to the people.' RV has substituted correctly 'the Passover.' The anachronism of AV was inherited from older Vss which avoided, as far as possible, expressions which could not be understood by the people.

A. C. HEADLAM.

EBAL or OBAL.—1. Name of a son of Joktan (עֵבֶל Gn 10²⁸ MT, עֵבֶל *ib.* Sam., Γαῖβαλ Luc., 1 Ch 1²²), probably representing a place or tribe in Arabia. There are several places in S. Arabia with names approximating to the Hebrew forms, e.g. *Aibān*, a mountain near San'ā frequently mentioned by Hamdani; *Obal*, a place in the neighbourhood of Hujailah visited by Glaser (*Skizze*, ii. 427); *Abil*, mentioned by Halévy; but till more is known of the source of the ethnological tables in Gn, it is impossible to assign any probability to such identifications. Derivatives from the root *abl* occur as tribal names at the commencement of Islam (*Tāj al-arūs*, viii. 4), and it is likely that the author had in mind some tribe, otherwise unknown, bearing such an appellation. 2. Name of a son of Shobal son of Seir (עֵבֶל Gn 36²³, 1 Ch 1⁴⁰).

D. S. MARGOLIOUTH.

EBAL (עֵבֶל, Arab. *el-Islamtyeh*).—Ebal and Gerizim, the mounts of Cursing and Blessing, form the most conspicuous and important summits of the hills of Samaria. This distinction is due partly to their superior height and to their central position in the whole land, but chiefly to the deep cleft between them which breaks the outline of the long mountain ridge running N. and S. This natural pass between E. and W., led up to by wheat-growing plains on each side, became inevitably a place of importance both for purposes of commerce and in times of war. The existence of a branch of the main road from N. to S. leading through the narrow opening between Ebal and Gerizim, would still further tend to make the locality familiar and important. It needed only the additional circumstance of numerous fountains in the fertile hollow where the bases met, to create an Oriental town where the traveller might rest in safety and the inhabitants would possess all that was necessary for man and beast. Such a town was the ancient Shechem (Gr. Neapolis, Arab. Nablūs), occupying the defile where it is only 150 yds. wide.

This attractiveness and convenience of the place is exemplified in the lives of Abraham and Jacob; the former arriving here on his first entry into the land of Canaan (Gn 12^{6, 7}), and Jacob resting at

the same spot on his return from Paddan-aram (Gn 33¹⁸⁻²⁰).

Ebal and Gerizim face N. and S., the latter being the more celebrated in religious history, but the N. summit (3077 ft.) being 200 ft. higher, and commanding a more free and extensive prospect.

1. *View of the Land from Ebal.*—The beginning of the ascent from Nablús is over grass of intensest green and enamelled lustre, through irrigated vegetable gardens of rank luxuriance, and under foliage of juicy transparency sparkling in the sunlight—one of the most fertile and picturesque spots in Palestine.

Above this, one enters immediately upon the silvery grey of the olive trees, which rapidly become scanty and irregular as the path opens in earnest upon the mountain climb. Then stony terraces and rocky face, with thistles and thorny shrubs, until the traveller reaches the broad, bare summit, and stands upon the central height of the whole land. Looking N., one sees Mt. Hermon towering aloft in the distance, glimmering with snow-streaked crests beyond the boundary plain in which lay Abel (Ibl), Baal-gad (Caesarea Philippi, Banias), and Dan (Tell el-Kadi). On the E., rising steeply from the Jordan bed, is seen the long, slumbrous, uniform ridge of Gilead and Moab. To the S., conspicuous summits can be identified in the neighbourhood of Jerus.; and to the W., beyond the lower hills and patchwork of broad plain, the yellow coast-line sweeps from Jaffa to Carmel.

Such a commanding view from such a central point emphasizes at once the limitations of the land and the grandeur of the events that have given it immortality.

2. *Religious Connexion.*—One of the most important of those events was the arrival at this spot of Abraham in his journey of faith to the land of Canaan, and his receiving by the terebith of Moreh a promise from the Lord, 'unto thy seed will I give this land' (Gn 12⁷). It was fitting that the fulfilment of the promise, after more than 400 years of waiting and preparation, should receive its great public announcement at the very place where it had been given. It was also deeply appropriate that in a land where customs and occupations, scenery and social life, were to be a storehouse of parable and moral teaching to the world, its central heights of Ebal and Gerizim should be baptized into this service and be known as the mountains of Cursing and Blessing. It was accordingly here that Joshua (Jos 8³⁰⁻³⁸) assembled the congregation, and erected the memorial altar according to the command and detailed instructions of Moses (Dt 11^{29, 30} and 27. 28). In addition to the duty of formal compliance with such a command, there was an inner urgency of the hour that called for such an act of declaration and decision. During the past 40 years the Isr. had received the discipline of adversity: they were now to face the greater temptation of success. The emergency was a suitable one for setting forth the moral regalia of the kingdom, and the responsibilities of its service. The recent experience at Jericho and Ai had emphasized the plain conditions of triumph and failure. Still further the incident of the Gibeonites, and the rumour of confederated opposition, set before them the dangers and difficulties of the work. And so on that memorable day, in the defile between Ebal and Gerizim, the Isr. entered upon the inheritance of the promises in the only way that it can be entered—through the door of complete and conscious surrender to the will of God. They were to possess the land, but not for themselves. The assemblage was on a scale of vastness suitable to the moral elevation of the thought. In the central

hollow of the hills rested the sacred ark that had so unerringly guided them in their journeyings, and was now pointing to the final resting-place of secure possession. Up the opposing sides of Ebal and Gerizim, six tribes to each, rising with the mountain slopes and terraces in solid masses where the ground was level, with fluttering groups and sprinklings on points of advantage, all bright colours mingling with the predominant white, the whole congregation of Israel was drawn up—an army in array for the battle of life. It was the Coronation Day of the Moral Law. God could not do more for His people, and, to invert the familiar phrase, *His* extremity became *man's* opportunity. If righteousness could come by law, it might have come then and continued. As the solemn entail of forfeiture was proclaimed from Ebal, and the bright succession of blessings from Gerizim, the announcement was received with an acclamation of amens. It was a mingling of the two voices of Destiny and Disposition, of Divine purpose and human choice.

LITERATURE.—Robinson, *BRP*; Stanley, *Sinai and Pal.*; Thomson, *Land and Book*; Smith, *Hist. Geog.*; Murray's and Bedeker's *Guide Books*.
G. M. MACKIE.

EBED (עֲבֵד).—1. The father of Gaal, who headed the rebellion against Abimelech (Jg 9²⁶⁻³⁵). 2. One of those who returned from Babylon with Ezra (Ezr 8⁹), called in 1 Es 8² Obeth.

EBED-MELECH (עֲבֵד-מֶלֶךְ).—An Ethiop. eunuch, at whose intercession and by whose personal exertions Jeremiah was released from the pit-prison of Malchiah. For this kindly service E. was promised immunity from the fate of his companions at the capture of Jerus. (Jer 38⁷, 39¹⁶). It is possible that the name E., which means 'servant of [the] king,' may have been an official title. A very ancient seal (see fig. on p. 258 of Benzinger's *Heb. Arch.*) is inscribed 'Obadiah servant of the king' (*Obadjahu 'ebhed hammelekh*). More probable, however, is the view of Gray (*Heb. Prop. Names*, 117, 147), who takes Melech as a divine name.

J. A. SELBIE.

EBENEZER (עֲבֵנֵי הַיְעָרָה or עֲבֵנֵי הַיְעָרָה 'Stone of help').—Mentioned three times in 1 S. According to 4¹ 5¹ it is the scene of a great defeat of the Isr. at the hands of the Phil. in the time of Eli, while in 7¹² it is the name of a stone set up by Samuel to commemorate a great victory over the Philistines; it is further noticeable that in 7¹² the name is apparently given for the first time, though the victory there described happened some twenty years after the events of ch. 4¹ 5¹. In 7¹², which belongs to a somewhat later document, E. is placed under Beth-car, and between Mizpah and Hasshen ('the tooth'); but we must here follow the LXX (τῆς παλαιάς), and read 'between Mizpah and Jashan (or Jeshanah)'; the latter (cf. 2 Ch 13¹⁹) is probably the modern 'Ain Sinia, to the N. of Bethel. On this view, E. would lie somewhere at the head of the valley of Aijalon; this site is further favoured by the notice in 4⁴. The more generally accepted theory, however, places E. more to the south, at the head of the vale of Sorek, and either identifies the stone set up by Samuel with the great stone at Bethshemesh (6¹⁸) or places it in the immediate neighbourhood. But this identification does not suit 7¹², and is hardly compatible with the narrative of 4¹-7¹. See G. A. Smith, *Hist. Geogr.* p. 223 f.
J. F. STENNING.

EBER (עֵבֶר).—1. The eponymous ancestor of the HEBREWS (which see), great-grandson of Shem, son of Shelah, and father of Peleg and Joktan (Gn 10²⁴, 11¹⁴, 1 Ch 1^{18, 19, 23}), perhaps used poetically for Israel in Nu 24²⁴ (but see Dillm. *ad loc.*).

2. The representative of the priestly family of Amok in the days of Joiakim, Neh 12²⁰. 3. A Gadite family name, 1 Ch 5¹³. 4. 5. The name of two Benjamite families, 1 Ch 8^{12, 22}. See GENEALOGY.

J. A. SELBIE.

EBEZ (עִבְזַי), 'white.'—A city of Issachar (Jos 19²⁰). The site is uncertain. Probably the ruin *El-Beidhah*, 'the white,' east of Carmel. *SWP* vol. i. sheet v.

C. R. CONDER.

EBIASAPH.—See **ABIASAPH**.

EBONY (עֲבֹנִים *hobnim*).—The Arab. name for this wood is very near the Heb., being *ebnūs*. There can be no reasonable doubt of the identity of the wood intended in the single passage in which it is mentioned (Ezk 27²⁵). It was brought to Tyre by merchants from Dedan, on the Pers. Gulf. It is the black heart-wood of *Diospyros Ebenum*, L., and several other species of the same genus, trees growing to a large size in Ceylon and S. India. *D. Ebenum*, however, furnishes the best wood. It resembles the common and the Japanese *persimmon* in its mode of growth and inflorescence, and in bearing an edible fruit, between a pome and a berry. The sap-wood is white and valueless, but the heart often yields a log 2 ft. in diameter, and 10 to 15 ft. long.

G. E. POST.

EBRON (עֲבְרוֹן).—A town in the territory assigned to Asher (Jos 19²⁸ RV; wrongly written Hebron in AV, as if from עֲבְרוֹן, the name of the famous Judæan city). It is just possible that we should read 'Ebdon, for 'Ebron, the latter form having arisen from the substitution, not uncommon, of ר for ב. It is noteworthy that this name, 'Ebron, occurs but once, while in the other name-lists for Asher (Jos 21³⁰, 1 Ch 6⁷⁴) we have an 'Ebdon or 'Abdon, which is absent here. This supposition has the support of twenty MSS (Gesenius). It is, however, in conflict with the ancient versions, all of which give 'Ebron, with the single exception of B, which unaccountably has 'Ελβών. From the order in which the towns are mentioned, we should seek for E. somewhere north of Cabul, and south of Rehob, Hammōn, and Kanah. No certain identification has yet been made: in position the ruin of 'Abdeh answers well enough the condition indicated. Twelve miles north of Cabul, about 10 miles N.N.E. of Acre, and 3 miles east of Achzib,—the modern Ez-Zib,—it occupies a slight eminence on the northern edge of the Plain of Acre, the mountains rising like grim guardians behind. If we accept the identification of 'Ebron with 'Abdon, this seems to be the most probable site.

W. EWING.

ECBATANA.—See **ACHMETHA**.

ECCLESIASTES (עֲבֵדָה *Kohelah*, LXX 'Εκκλησιαστής, Aq. Κωλέθ).—1. The TITLE.—This presents some difficulties, which have scarcely as yet been satisfactorily explained. The word is a fem. part. of the Qal conj. The verb is not found elsewhere in this conj. In the Hiph. the word means 'to call an assembly together.' It is commonly held that here the Qal is used with the force of the Hiph., and that *Kohelah* means 'one who convenes an assembly.' There have been other interpretations, such as 'a collector of sayings,' or 'one who gathers wisdom from various quarters.' But since the verb is always used with ref. to persons and never with ref. to things, these are untenable. Tyler urges that the causative force cannot be put into the word, and he explains it to mean 'one who is an assembly.' *Kohelah* would thus be a personification of 'an ideal assembly of those Jewish

philosophers, Stoic, Epicurean, and others, whose opinions were influential at the time when the book was composed' (Tyler, *Ec.* 59). But this is too artificial to be probable, and it seems best to fall back on the common view, that *K.* means 'the convener of an assembly.' A greater difficulty is caused by the fem. form. This has been explained on the hypothesis that the speaker is Wisdom, impersonated in Solomon, and *K.* is fem. as agreeing with the fem. word for Wisdom. This view has been taken by Ewald, Hitzig, Ginsburg, and others. Against this, however, serious objections may be urged. It is strange that Wisdom should be nowhere mentioned as the speaker. Further, it is barely conceivable that Wisdom should have used some of the language put into the mouth of *K.* (17^{17, 18} 7²³ etc.), or that Solomon should be regarded as her impersonation, considering the experiences through which the speaker says that he has passed. Again, the tone of the discourses is so different from what we find in those passages where Wisdom is actually represented as speaking, that if the writer had intended to make Solomon the spokesman of Wisdom he would have felt it necessary, in view of this striking difference, to say so explicitly. It is also to be observed that the verb used with *K.* is masc., and on the view we are discussing it is explained by the theory that the fem. Wisdom speaks through the masc. Solomon. The objections already urged against the identification of *K.* with Wisdom have led to the view that we are to find in the fem. form, not a distinction of sex, but a variation in meaning. In other words, the Preacher is a male, but the fem. termination conveys a special shade of meaning. This gives a better account of the use of the masc. verb. The word may then mean 'one who holds the office of a teacher or preacher' (Delitzsch, Nowack, Cheyne), or, if the fem. has an intensive force, 'the great orator' (W. Wright, RVm). Kuenen feels himself unable to decide between the view that *K.* is Wisdom and that the fem. does not express distinction of sex. The arguments for the latter view seem to be stronger, and we should probably interpret *K.* to mean 'one who holds the office of teacher.' The title *Ecclesiastes* comes from the LXX.

That by *K.* the author means Solomon has been subject to dispute, but should admit of none. He is identified with 'the son of David, king in Jerus.' (1¹), and says of himself, 'I, *K.*, was king over Israel in Jerusalem.' The son of David who was king is best explained strictly and not loosely to mean descendant. After the division of the kingdom a king could not have spoken of himself as reigning over Israel in Jerusalem. It is also clear that Solomon is the king whose varied experiences of wisdom and luxury are referred to in chs. 1 and 2.

2. AUTHORSHIP AND DATE.—The book was, till the period of critical investigation, almost universally ascribed to Solomon. Some writers still support this view, though it is abandoned by all critics of eminence. The main reason is that *Kohelah* speaks in the first person, and therefore if the author was not Solomon he would be deceiving his readers. This does not follow. The author of Job uses the literary vehicle of a debate to reach the solution of his problem. Here the writer has chosen an autobiographical sketch of Solomon as his literary vehicle. And he has done so for reasons which are quite obvious. Solomon was the typical representative of Wisdom, and the author wished to set forth his conclusions as those of a man who had brought the deepest and sanest reflection to bear upon life. But it was also important that his experience should be wide, and his opportunities of testing the value of life in its

various forms of the fullest. Here Solomon admirably served his purpose. Not only was he the wise man, but he was a king whose magnificence has passed into a proverb, and who was able to gratify every wish. He was thus able to wring the most out of life, and from him the sentence 'All is vanity' would come with greater force than from any other. This is no proof that he is not the author, but it removes any antecedent prejudice against the denial of the Solomonic authorship, based on the statements of the book.

The objections to the Solomonic authorship are overwhelming. The very language quoted to prove it is seen on examination to be unfavourable to it. Solomon can hardly have said 'I was king,' as if he had ceased to be so, for he reigned till his death. The words 'over Israel in Jerus.' are most naturally explained by the writer's knowledge of kings of Israel who did not reign in Jerusalem. And since it was his own father who had made Jerus. the royal city, and Solomon had not been preceded by a long line of kings, he could scarcely have spoken of 'all that were before me in Jerus.' (1¹⁶ 27⁹). There are also many passages which do not suit the Solomon of history. The writer speaks with bitterness of the oppression of the weak and the perversion of judgment. Solomon would not have tolerated such abuses if he had felt them so keenly as the author. Certainly, so far from feeling any keen distress at oppression, his government was systematically oppressive. The words of the author do not impress us as those of a king who stands above his subjects, but as those of a subject sympathizing with the misery of his fellow-subjects. Instead of judgment and righteousness he sees wickedness, and bids his readers not to wonder at oppression and violence. The State is not well-ordered and prosperous as in the time of Solomon. 'Folly is set in great dignity, and the rich sit in low places.' This is an error which proceeds from the ruler. Servants ride on horses, and princes walk on the earth. Nor can the reference to the king's system of spies, and the writer's bitter advice based upon it, be seriously regarded as from a king (10²⁰). Other references to kings (4¹³⁻¹⁶ 10^{16,17}) are equally inconceivable in Solomon's mouth. Nor has the popular view, that Solomon wrote the book in his old age after repenting of his idolatry, any support in the book itself. From beginning to end there is no confession of wrong-doing, no ref. to idolatry, no hint of repentance. It dwells on the unsatisfying nature of life, but penitent confession is quite alien to its whole spirit and purpose. The author is certainly not a satisfactory or edifying penitent.

But the same conclusion that Solomon cannot be the author is shown by the language. The linguistic evidence is so decisive that Delitzsch has said, in words that have been quoted with approval by many critics since: 'If the Book of *K.* be of old-Solomonic origin, then there is no history of the Heb. language.' And Driver, whose opinion on such a matter is of exceptional value, says: 'Linguistically, *K.* stands by itself in OT. The Heb. in which it is written has numerous features in common with the latest parts of OT, Ezr, Neh, Ch, Est, but it has in addition many not met with in these books, but found first in the fragments of Ben-Sira (c. B.C. 200) or in the Mishnah (c. A.D. 200). The characteristic of the Hebrew in which these latest parts of OT are written is, that while many of the old classical words and expressions still continue in use, and, in fact, still preponderate, the syntax is deteriorated, the structure of sentences is cumbrous and inelegant, and there is a very decided admixture of words and idioms not found before, having usually affinities with the Aramaic, or being such as are in constant and regular use in the Heb. of post-Christian times (the Mishnah, etc.).

And this latter element is decidedly larger and more prominent in Ec than in either Est or Ezr-Neh-Ch' (*LOT*, 444). The phenomena, in fact, are consistent only with the post-exilic date, and the Solomonic authorship is therefore out of the question. The detailed evidence may be found in Delitzsch's *Com.* (Germ. ed.), or in Wright's *Ecclesiastes*, Excursus iv. (see also Driver, *LOT* as above).

Critics who deny the Solomonic authorship, i.e. all critics who need be taken into account, are unanimous in assigning the book to the post-ex. period. There are two main theories—one that it belongs to the later years of the Pers. period, which came to a close B.C. 332; the other, that it comes from the Gr. period, and should be dated about B.C. 200. The former is the view of Ewald, Delitzsch, Ginsburg, and Cheyne in his *Job and Solomon*. In favour of the latter are Nöldeke, Kuenen, Hitzig, Tyler, Plumptre, Cornill, and Toy; while Cheyne in his *Founders* thinks it is probably correct. Nowack and Driver think the language points to the later date, but is not decisive; and so much is undoubtedly correct, if we ought not to accept the later date on the ground of the linguistic evidence alone. There are other criteria of importance. The political conditions implied yield valuable data. Cornill says: 'The general picture of the circumstances makes us fix on a period of complete anarchy, in which well-ordered political life cannot be spoken of, worthless revolutionaries seize the government and exhaust the country, and political wisdom is recognized to consist in a dull, listless submission to despotism and tyranny' (*Einleit.* 251). The justice of this description is clear from these passages, 4¹⁻³ 5⁹ 10^{5-7,20}. This compels us to place it at the earliest in the later years of the Pers. period, and precludes a date in the earlier part of that period. But it will suit equally well the date in the Gr. period, about B.C. 200. Hitzig thinks on account of 10¹⁶ that its date is B.C. 204, when Ptolemy Epiphanes ascended the throne at the age of five. He takes 9¹³⁻¹⁶ to be an allusion to the siege of Dora in B.C. 218. But this did not succeed owing to the strength of the place, not because a poor wise man delivered it. He explains 4¹³⁻¹⁶ of the high priest Onias ('the old and foolish king') and his nephew Joseph ('the poor and wise youth'), but the statements of the passage are not true of them. The political circumstances admit of either date. Kuenen thinks that the cosmopolitan tone of the book speaks for its origin in the Gr. period; but, as Nowack points out, this is characteristic of Heb. Wisdom generally. In its attitude to the doctrine of a future life Kuenen regards it as a forerunner of Sadduceism. The writer's views, it is true, are those of the older Heb. theology, but they are put forth in opposition to the newer doctrine. Nowack thinks that these arguments would tell rather in favour of a Maccabean date, when the two tendencies of Pharisaism and Sadduceism became explicit. This does not follow, since, as Kuenen points out, while he is a forerunner of the Sadducees, he is so little a Sadducee that Graetz could regard him as a disciple of Hillel. This is most naturally explained by the view that he wrote before the rise of these distinct parties.

The most plausible argument in favour of the later date is derived from the supposed influence of Gr. philosophy. Tyler was the first to work out in detail the supposed influences of post-Aristotelian philosophy, and he was followed by Plumptre in his Commentary. A full and apparently conclusive refutation may be found in Cheyne's *Job and Sol.* (see also Nowack). Tyler's view is that the signs of acquaintance with Stoicism and Epicureanism are unmistakable. The author, however, he takes to be neither Stoic nor Epicurean, but one who leaves the doctrines of the two schools side by side in order to warn his readers against studies which could conduct to no certain goal, but led to opinions so opposed. The following points of contact with Stoicism are adduced. The doctrine that man should live

according to nature is set forth in the catalogue of Times and Seasons (3¹⁻⁸). The doctrine of cycles, according to which history presents no progress, but only movement in a circle, is found in the description of the endless round in which the affairs of men move, so that all effort secures no progress but only return to a former condition (12¹⁰). Fatalism is present in both; both regard the weaknesses of men as a kind of insanity, and both dwell on the nothingness of life. But no weight can be attached to these. The dreary repetition which characterizes life is not put forward as a philosophical doctrine, but as something taught by observation and experience. The sense of the emptiness of life is due to disillusion, and was not learnt in a school of philosophy, but in the hard school of life. Fatalism is only a coincidence, the Semite has a natural tendency to it. The view that the weaknesses of men are a kind of insanity is a genuine idea of Heb. Wisdom, which treats wisdom and folly as moral rather than intellectual. And the catalogue of Times and Seasons contains in its main idea nothing that cannot be well derived from Heb. thought. The traces of Epicureanism are equally unsatisfactory. Men are as beasts, coming from the dust and returning to it; pleasure is the highest good, esp. in the form of undisturbed tranquillity. The rivers run into the sea, yet the sea does not fill, the body is dissolved into its elements. The parallels are commonplace, and no distinctively Epicurean doctrine is to be found. It needed no acquaintance with Gr. philosophy to learn that man returned to dust, or that the sea was not filled by the rivers that fed it, or that pleasure was good if enjoyed in moderation. The comparison of man to the beasts that perish might occur to a Hebrew who did not accept the newer view of the future life. For traces of either Epicureanism or Stoicism the appeal is often to late authorities. And the coincidences are either unreal or insignificant, or readily explained from Heb. as well as Gr. ideas. We can therefore hardly rely on this alleged influence of Gr. philosophy as a criterion of date. Kuenen thinks that the proofs break down, and that the philosophical element in the stricter sense is absent. But a general influence, he thinks, may be detected. And if the date in the Gr. period is accepted, we may believe that the writer was susceptible to the influence of the atmosphere of Gr. thought, rather than of any special view.

So far, then, as the arguments for the two dates go, they cannot be said to be decisive. The linguistic argument pleads strongly for the later date, and there is no argument to set against it on the other side. The balance of probability, therefore, dips towards a date c. B. C. 200, though the book may possibly belong to the Persian period. Renan has put forward the view that the date is B. C. 125. But it was probably quoted as scripture shortly afterwards, which implies a longer previous history than Renan assigns to it. And after the Maccabæan struggle we should expect greater religious fervour. Graetz' view, that it belongs to the reign of Herod the Great (whom he identifies with K.), is probably excluded by the fact that it seems to have been quoted as scripture before that time; and apart from this it is questionable if the history of the Canon will permit of its composition so late.

3. THE INTEGRITY OF THE BOOK.—Certain passages have been suspected by several critics as later interpolations. The Epilogue (12⁹⁻¹⁴) was the first to be suspected, but later the authenticity of the following has also been denied, 3⁷ 7⁵ 8¹². 11^{9c} 12^{1a}. 7^b. The whole of 12⁹⁻¹⁴, however, does not stand or fall together, since vv. 9-12 are denied on other grounds than vv. 13, 14. It will be most convenient to take 12⁹⁻¹² first. The substance of the book evidently ends at 12⁹. K. ends on the same note as that on which he began, 'Vanity of vanities, all is vanity.' In itself, however, this does not mark these verses as due to another hand. To the end of 12⁹ Solomon is represented as speaking, and in 12⁹⁻¹² the real author may be regarded as speaking in his own person, and commending the book as the work of one of 'the wise.' Nor is it any serious argument against this that the author is represented in the body of the book as a king, but here as a wise man, for Solomon was the chief representative of 'the wise.' It is true that there are difficulties in the passage, and some uncommon expressions, but in themselves they do not warrant the view that the verses are the work of another writer. Those who think so regard them as a recommendation affixed to the work by a later hand. But the writer speaks of the author as if he

were another than himself, in order to keep up the assumption of Solomonic authorship.

The other alleged interpolations raise a much more difficult question. 12¹³. 14 are suspected partly on account of their general tenor, partly from their reference to the judgment. It seems strange to announce as the conclusion of the matter, that the teaching of the book may be summed up in the injunctions to 'fear God and keep his commandments.' Its teaching is rather that 'all is vanity and striving after wind,' and that man's wisest course is to recognize this and extract as much pleasure from life as he can. It is not denied that the fear of God is advised in the book, but that it is its main theme, or the chief lesson to be drawn from it. Kuenen, who gives a very long and elaborate defence of the authenticity of the entire Epilogue, admits that if this were interpreted in the highest sense as the one thing about which man had to concern himself, we should be compelled to deny 12¹³. 14 to the author of the rest of the book. He argues, however, that the writer simply means that the fear of God and keeping of His commandments is the indispensable condition of enjoying life. But it is questionable whether the explicit words, 'for this is the whole duty of man,' do not compel us to interpret the command in the larger sense which Kuenen denies. This passage has been also suspected because of its ref. to a judgment. And the same objection lies against 3⁷ and 11^{9c} ('but know thou that for all these things God will bring thee into judgment'). If the reference is to a judgment after death, it seems improbable that they can be harmonized with other passages in the book (cf. 3¹⁹⁻²¹ 9⁵. 8. 10). But it is possible that a judgment in this life is referred to. This requires a change of reading in 3⁷, when instead of 'there' (נָשׂוּ שְׁחָמ), 'he hath appointed' (עָשׂוּ סָאֵם) would be read. It is not clear, however, that this yields so good a sense, and it is not improbable that in all the passages a judgment after death is spoken of. In 12^{1a} the difficulty arises partly from the idea, which is thought to be alien to the general tenor of the book, partly from its incongruity with the context. The counsel, 'Remember thy Creator in the days of thy youth,' is not what we expect from the author of such a book. Nor do the preceding counsels lead up to this. The young man is bidden to rejoice in all the days of his life, esp. in the days of his youth, remembering the dark days that await him in Sheol. But remembering not only these, but all the failure of manly vigour and his physical powers, and of the zest for pleasure that will come upon him with old age, he would do well to make the most of his prime of life. This gives a connected sense, and one in harmony with the rest of the book, and we obtain it by deleting 12^{1a} and connecting 12^{1b} with 11¹⁰. The meaning in that case will be—make the best of your youth in the enjoyment of pleasures before the evil days of old age come, when you will say, I have no delight in them. It is true that the connexion of 12^{1b} with 11¹⁰ is a little awkward if 12^{1a} is omitted, but the connexion in the text is even more awkward. Graetz proposes to retain the words with a slight alteration of the Hebrew, and to read, 'Remember also thy fountain (i.e. thy wife) in the days of thy youth.' This is not grotesque, though it has been criticized as such; nor even unworthy, for it is an exhortation to a life of conjugal purity (in opposition to illicit amours), such as we have also in 9⁹. But it is scarcely a happy suggestion. Bickell not only adopts the correction of the text, but attempts to improve the connexion by transposition. 12^{1b} ('and the spirit return unto God who gave it') may be retained on the ground that it simply implies the dissolution of the personality into its

original sources, the body will return to dust, the spirit to God. The 'spirit' probably means nothing more than the breath of life (cf. Ps 104²⁰). No very serious objection need be felt to 7⁵ or 8^{12, 13}.

While Kuenen retains these passages (except 12^{1a}, which he regards as altered on dogmatic grounds) by denying that they contain anything of a higher point of view than we generally find in the book, several critics defend the genuineness of the whole, with the obvious interpretation. Sanday in his *Bampton Lectures* argues that they must have been included, for otherwise a scribe would have passed it by, and it would have been simply left out of the Canon. This, however, is questionable. A book professing Solomonic authorship would not be lightly rejected; it would be assumed that it must really teach true religion, and a few interpolations would bring this out more clearly. He also urges that it is psychologically more probable that an Isr. would 'have this reserve in the bottom of his soul, than that he should give way to blank and unrelieved pessimism.' It is more remarkable to find so radical a critic as Cornill defending their authenticity. He maintains that the same thoughts run through the whole book; the fear of God and God the Judge are cardinal conceptions. In his very striking passage on the contents of the book he says: 'OT piety has never achieved a greater triumph than in the Bk of K.' (*Einleit.* 251). While the author sees the misery of the world as clearly as our modern pessimists, he is so penetrated by the piety of OT that he does not hit on the simplest and most obvious solution, that the world is the plaything of blind chance. He returns to the faith of his childhood in a personal God and a moral order of the world.

These views, and they are shared by other critics, are of weight. Yet it is doubtful if they do justice to the phenomena on the other side. It is very significant that the author's meditations end as they began—'Vanity of vanities, all is vanity.' Would this have been so if he had really fought his way back to the faith of his childhood? Cornill seems to overstate the case when he says that similar passages run through the book, and that the fear of God and God the Judge are cardinal conceptions. The theism of the book is not very pronounced. Cheyne says with justice: 'To me, K. is not a theist in any vital sense in his philosophic meditations. . . . He certainly never lost his theism, though pale and cheerless it was indeed, and utterly unable to stand against the assaults of doubt and despondency.' Looking at his speculations from a somewhat different viewpoint, it might even be alleged that K.'s theism is the source of all his perplexities. To every Hebrew, God and Providence were convertible notions, and this God, which to Job was an immorality, might be to K. a puzzle. Upon this theory it may, of course, be urged that rigid consistency is not to be expected in a man of the writer's temperament, who would speak according to his mood. Yet we may surely think that a man of his intellectual power and close observation of life would have some fixed principles; and we find them running through most of his meditations. When we find a few sayings that seem to run contrary to these, we may either try to explain them in harmony with the general view of the author, or regard them as interpolations due to a working over in the interests of orthodoxy. Either course seems preferable to that of leaving them as unreconciled contradictions. It seems on the whole most probable that at least 12^{1a, 13, 14} are later interpolations (assuming that 'thy Creator' is correctly read in 12^{1a}), and possibly also 3¹⁷ and 11^{9c}. On the other hand, 12^{7b} can be explained so as to avoid any conflict with the author's views.

The view of Krochmal with reference to the Epilogue must

not be passed over in silence. He regarded 12^{11, 12} or 12¹¹⁻¹⁴ (it is not clear which) as appended to the whole of the third division of the Canon (the Kethubim or Hagiographa), and not simply to Ec. Graetz adopted the view that 12¹¹⁻¹⁴ was added as the conclusion of the Kethubim, but thought also that the collectors of the third Canon added 12^{9, 10} as an apology for Ec. Renan accepts 12^{9, 10} as by the author of Ec, and agrees with Krochmal as to 12^{11, 12}, and also considers 12^{13, 14} as unauthentic. It is unnecessary to discuss this view, which rests on pure hypothesis, and has been almost universally rejected.

Before leaving this part of the subject, it remains only to speak of the bold and original theory of Bickell. Eng. readers may find it presented in Dillon's *Sceptics of OT*, with a tr. of the book as rearranged, and in Cheyne's *Job and Solomon* (p. 273 ff.), where it is criticized. It is that the Heb. MS. from which our text is descended met with an accident. The sheets became disconnected, and, in replacing them, owing to a turning of the 2nd and 3rd sheets inside out, the text was completely dislocated, and passages were brought into juxtaposition which had originally no connexion with each other. Two sets of interpolations were then made. One series was designed to connect the verses which had been thus brought together. The other interpolations were intended to give the book an orthodox tone. The detailed working-out, which is very brilliant and ingenious, cannot be exhibited here. We may, however, give his results as to the original book and its order. He makes the orig. K. to consist of the following passages in the order given:—12-21² 59-67 39-48 212-38 86-93 81⁵ 711-101 68-722. 20 49-58 101²-116. 5 723-83^a 102-15. 145 93-10 117-123. The theory is open to very serious objections. It is questionable whether it will stand the test of exegesis; and to quote Cheyne's words: 'Apart from other difficulties in the way of the theory, the number and arbitrariness of the transpositions, additions, and alterations are reason enough to make one hesitate to accept it.' Kuenen also says that it is as good as unthinkable that all the accidents assumed should have taken place together, and combined to produce our Bk of Ec. Eurlinger has urged an objection, which if valid is fatal to the supposition that such an accident could have occurred. It is that, at so early a period, the codex form would not be used, but the roll form, and therefore there would be no sheets to be dislocated by such accidents as are postulated by the theory.

4. CONTENTS AND THOUGHT.—It is very difficult to give an account of the contents of Ec which shall be at once clear, brief, and adequate. There is very little strict development of the thought, and the endless repetition which the writer sees in nature and life has its partial counterpart in his book. The difficulty is increased by the uncertainty as to interpolations and the exegesis of particular passages. The following outline may be given. Vanity of vanities, all is vanity. No profit comes to man from all his toil. Nature and man go ceaselessly round and round in the same course with utterly wearisome monotony, and there is no new thing under the sun (1²⁻¹¹). K. being king over Jerus. uses his wisdom to understand the life of men, and finds that all is vanity (1¹²⁻¹⁵). He finds, too, that the search to know wisdom and folly is vanity, and that wisdom brings sorrow (1¹⁶⁻¹⁸). He tries to find happiness in pleasure, and exhausts every source of enjoyment, but finds it is all vanity (2¹⁻¹¹). Wisdom far excels folly, yet wise and fool perish and are forgotten alike (2¹⁶⁻¹⁷). The accumulation of wealth is vanity, for the man who has gathered it by toil and wisdom must die and leave it to another, it may be to a fool (2¹⁸⁻²³). The best thing in life is to eat and drink, as God permits. Yet even this is vanity (2²⁴⁻²⁶). A time is allotted for everything. This is the doing of God, who has set the world [or eternity] in man's heart, yet so that His plan cannot be understood. Since man cannot understand the plan by which the season for everything is appointed, he will do well to enjoy life as much as he can. All is fixed unalterably by God, that men should fear Him (3¹⁻¹⁸). The sight of oppression makes him think that God will judge the righteous and the wicked. But man dies like the beasts, and should enjoy life while he may, for he cannot return to it after he is dead (3¹⁶⁻²²). The oppression of the helpless convinces him that the dead are in better case than the living, and best of all is not to have been born at all (4¹⁻³). Successful labour is vanity, for it only causes a man to be envied (4⁴⁻⁶). The efforts of the lonely man to attain wealth are vanity; and there is safety and comfort in the possession of a friend (4⁷⁻¹²). A

poor wise youth succeeded an old and foolish king, yet the bright expectations of his rejoicing subjects were disappointed (4¹³⁻¹⁶). Be very circumspect in your service of God and the vows you make to Him, or it will be worse for you (5¹⁻⁷). Do not be surprised at oppression, for the oppressors themselves are under tyranny. Far better the state which depends for prosperity on the pursuit of agriculture [or men are much more on a level than they seem; the king himself depends like all his subjects on the products of the earth] (5⁸⁻⁹). Accumulation of wealth is vanity, for it brings little pleasure and much anxiety (5¹⁰⁻¹²). Sometimes wealth is accumulated by labour and lost by misfortune, so that the possessor has no enjoyment out of it (5¹³⁻¹⁷). It is best to eat and drink and enjoy life, so far as God gives one the power, and thus make life pass without too much reflexion (5¹⁸⁻²⁰). God sometimes gives the means of enjoying life, but withholds the power of enjoyment (6¹⁻⁶). Toil is for the appetite which is insatiable, the wise is no better off than the fool; possession is better than inordinate desire, but this too is vanity (6⁷⁻⁹). The destiny of man has been determined for him, he cannot struggle against it, nor does he know what is good for him (6¹⁰⁻¹²). A good name is better than ointment, death than birth, sorrow than mirth (7¹⁻⁶). The end is better than the beginning, patience than vexation, wisdom than property. Whether prosperity or adversity be your lot, consider that both come from God, and cannot be altered (7⁷⁻¹⁴). Do not go to extremes in virtue or vice, in wisdom or folly (7¹⁵⁻¹⁸). Yet wisdom is strength, since all sin and may need it. Gossip should not be listened to, for a man is sure to hear something unpleasant about himself (7¹⁹⁻²²). K. sought wisdom, but could not fully attain it. But he found this, that woman was more bitter than death, and only the man who pleased God would escape her snares. A good man was as one in a thousand, but a good woman he had not found at all. This was not the fault of God, but of man, who had sought out many inventions (7²³⁻²⁹). Wisdom is the best. Be obedient to the king, and in time of oppression do not be tempted to rebel, for judgment will come on the tyrant (8¹⁻⁹). The wicked sometimes fare as the righteous, and the righteous as the wicked, yet it is better with the righteous than with the wicked; but since all is vanity, it is best to eat, drink, and be merry, for that, at any rate, will last as long as life (8¹⁰⁻¹⁵). However wise a man may be, he cannot understand the work of God. All men are in His hand, and cannot escape the universal lot. Life is bad, but it has hope; death comes to all, and with it the loss of consciousness, feeling, and activity (8^{16-9⁶}). Enjoy life to the full, unvexed by scruple as to the approval of God (?); get the most out of this life, for there is nothing to be looked for beyond it (9⁷⁻¹⁰). In the conflict of life merit does not ensure success, but it is matter of chance and circumstance. Men are snared by misfortune as fish are caught in a net. Wisdom is better than strength, yet, as in the case of the poor man who delivered the city, it meets with ingratitude and forgetfulness (9¹¹⁻¹⁶). Wisdom is far better than folly, it will guide man aright in his relations with princes, save him from danger by putting him on his guard, and guide him in practical life. Yet a capricious ruler may exalt folly (9^{17-10¹¹}). A fool's talk is worthless, and his labour wearisome (10¹²⁻¹⁵). Unhappy is the land whose king is a child and whose princes are slothful and gluttonous; while that country is blessed whose king is of noble character and whose princes are temperate. But if the king be bad, it is prudent not to curse him even in secrecy, for his spies are everywhere, and will tell him of it (10¹⁶⁻²⁰). Be benevolent [or prudent], so that you may be safe in time of

calamity. Do the work you have to do without waiting for the exact circumstances you would like. The laws of nature are above you, and the attempt to attain too close conformity with them is likely to paralyze industry (11¹⁻⁶). Life is sweet, but let man remember also the days of darkness that await him after death. And, remembering these, let him enjoy life to the full in his youth, before the evil days of old age come on him, when all his physical powers will fail, and all appetite for pleasure be gone; before his life be shattered, and he pass away. Vanity of vanities, all is vanity (11^{7-12⁸}).

So end the meditations of K.; for the Epilogue, whether in whole or part authentic or not, lies outside the work itself. There can be little question as to the fundamental thought of the book. All is vanity, life yields no real satisfaction. If we had unlimited means at our disposal to secure happiness, it is quite unattainable. The best thing is to seek for enjoyment, to eat, drink, and be merry. Yet we should do the author an injustice if we regarded him as a mere sensualist. From gross indulgence he would have turned with disgust. It was madness, and no man who valued his peace of mind would be enticed by it (cf. his words on 'the woman whose heart is snares and nets,' 7²⁶). He urges rather a moderate enjoyment of the good things of life: 'Eat thy bread with joy, and drink thy wine with a merry heart; . . . Let thy garments always be white; and let not thy head lack ointment. Live joyfully with the wife whom thou lovest all the days of the life of thy vanity.' Life is a bad business at the best, but it lies within our power to palliate its misery by prudence and the due enjoyment of what little pleasure we can get. And we should be all the more eager to make the most of our opportunities for pleasure that in the dreary darkness of Sheol no possibility of enjoyment will be found. His motto is *Carpe diem*; and if in the abstract it be not a high motto, we must remember the misery of his time, and the absence of any hope of improvement in this world or immortality in the next. If we ask the cause of this misery, and of the general vanity of life and uselessness of all endeavour, it lies in the conditions of human life. God has a plan of the world, everything has its time and season. But man cannot find out what this plan is, and hence rarely orders his life in accordance with it. He may think that a certain line of conduct will produce a certain result; but it may be quite different, so that life may seem ruled by chance, not by law. And he is not master of his own fate. God has ordained this, and he helplessly struggles against it. He is caught in an evil snare and cannot escape. But when K. speaks of God, we may easily read more into his language than he meant. J', the national name of the God of Israel, nowhere occurs. K. is certainly a theist, and the name of God frequently occurs. But God is withdrawn from the life of men ('God is in heaven, and thou upon earth,' 5²). God is to be regarded with fear, and man must be very circumspect in his approaches to Him (5¹⁻²). Man should be very careful in his utterances, and especially avoid a hasty vow. If he vows he should not defer to pay, for God 'hath no pleasure in fools,' and if provoked to anger may destroy the work of his hands (5³⁻⁶). K.'s conception of God has nothing attractive or winning. He is rather set before us as the omnipotent Ruler who has ordained all the course of history, which man vainly seeks to comprehend, and as the austere Deity on whose favour or forbearance none may venture to presume. Such enjoyment as may be gained from life in harmony with His laws is legitimate, hence the gratification of appetite in a legitimate manner has His approval, it is His gift (2²⁴ 3¹³ 5¹⁸. 19 9⁷ etc.).

His view of the future is equally gloomy, but in this he stands upon the old ways of thought. Men are beasts. 'For that which befalleth the sons of men befalleth beasts; even one thing befalleth them: as the one dieth, so dieth the other; yea they have all one spirit; and man hath no pre-eminence above the beasts: for all is vanity. All go unto one place; all are of the dust, and all turn to dust again' (3¹⁹⁻²⁰). On this follows the question: 'Who knoweth the spirit of man whether it goeth upward, and the spirit of the beast whether it goeth downward to the earth?' (3²¹). This has been interpreted as if the writer meant to say that such a distinction really existed. But in face of the plain statements just quoted, it is hard to see how such a view can be maintained. The state of the dead is described in the most cheerless language. 'The dead know not anything, neither have they any more a reward; for the memory of them is forgotten. As well their love as their hatred and envy is now perished; neither have they any more a portion for ever in anything that is done under the sun' (9⁵⁻⁶). 'There is no work, nor device, nor knowledge, nor wisdom in Sheol, whither thou goest' (9¹⁰). 'Let him remember the days of darkness, for they shall be many' (11⁹). Sometimes he speaks as though life were worse than death, and as if it had been best never to have been born at all (4²⁻³ 7); sometimes as if death were worse than life (9⁴⁻⁵), though for the grim reason that 'the living know that they shall die; but the dead know not anything.' There is no fundamental inconsistency; both life and death were so evil, that there was little to choose between them, and now one, now the other, might according to his mood be esteemed the worse. It would be different if we could assume, as some do, that he reached a higher point of view. Some of the passages already discussed under the head of the *Integrity of the Book* might be so interpreted. But it seems quite decisive against this that he ends his work with the words, 'Vanity of vanities, saith K., all is vanity.' Another passage which has been variously interpreted, is 3¹¹ 'Also He hath set the world [or eternity] in their heart.' The word tr. 'world' is עֵלֶיךָ, and it is found in this sense in later Heb., but nowhere else in OT. It is true that this pleads for the sense 'eternity' adopted by Delitzsch, Wright, and others. And this would point to belief in a future life in the higher sense. Man has the longing for immortality placed in his heart by God. But the context speaks rather for the other rendering. God has a plan for the course of history, and has given men their labour in which they toil. He has set the world in their heart; in other words, He has implanted in men the instinct which causes them to busy themselves with the things of the world.

5. CANONICITY OF THE BOOK.—It does not fall within the province of this article to discuss whether Ec is or is not rightly included in the Canon. But the question of its canonicity is of considerable historical interest. It is well known that in the 2nd cent. A.D. there was dispute about it in the Jewish schools. The evidence may be conveniently seen in Wildeboer's *Origin of Can. of OT*. The question which is disputed by scholars is whether it was regarded as canonical in the 1st cent. B.C., and whether the later discussions concerned the question of its right to retain the position it had already attained, or whether it was first admitted into the Canon in consequence of these discussions. The question hardly admits of examination in our space, but the evidence seems to us to favour the latter view. The reader may consult the art. OLD TESTAMENT CANON, and the works of Ryle, Buhl, and Wildeboer, especially the last.

LITERATURE.—The *Comm.* of Ewald, Hitzig, Ginsburg, Graetz, Delitzsch, Tyler, Nowack, Plumpre, C. H. H. Wright. The *Introductions to OT* by Kuenen, Driver, Cornill, Wildeboer; A. B. Davidson in *Book by Book*; W. T. Davison, *Wis. Lit. of OT*; Cheyne, *Job and Sol.*; Renan, *L'Écclésiaste trad. de l'héb.* etc.; Bickell, *Der Prediger über d. Wert d. Daseins* (1884), and *Kohleth Untersuch. über d. Wert d. Daseins* (1886); Dillon, *Sceptics of OT*; C. Taylor, *Dirge of Koh. in Ec. 12*; Salmond, *Christ. Doct. of Immortality*, 165 ff., 267 ff.; and the literature in Strong, *Student's Comm.* pp. 31-38. A. S. PEAKE.

ECCLESIASTICUS.—See SIRACH.

ECLIPSE.—See ASTRONOMY AND ASTROLOGY.

ED.—In the Hebrew (and also in the Greek) text of Jos 22²⁴ the name given by the two and a half tribes to the altar erected by them on the east bank* of the Jordan has dropped out. Our English translators have filled the gap by inserting *Ed* as the name of the altar in question. For this they have the authority of a few MSS (see de Rossi, *Varia Lectiones Vet. Test.*, in loc.).

The Syriac (Peshitta) reads כְּרִמָּה אֲלֵימָה 'altar of witness.' The suggestion of Dillmann in his commentary, *Die Bücher Num. Deut. u. Josua* (1886), that the original text had גִּלְעָד *Gal'ed* (as Gn 31⁴⁷, EV Galeed), 'Mound of witness,' has been very favourably received (Oetli, Kautzsch, Bennett. See footnote). This name was probably dropped by some later copyist or editor who detected therein a possible inconsistency with the earlier narrative in Gn 31. The MT in its present form can only mean that the name of the altar was the whole sentence: It-is-a-witness-between-us-that-J'-is-God!

A. R. S. KENNEDY.

EDDINUS ('Εδδινός B, 'Εδδινός A), one of the 'holy singers' at Josiah's passover, 1 Es 1¹⁵. In the parallel passage 2 Ch 35¹⁵ the corresponding name is Jeduthun, which is read also, contrary to MS authority, by AV in 1 Es. The text of the latter is probably corrupt. 'Εδδινός may have arisen from one or other of the numerous Gr. equivalents (perhaps 'Εδαθόν) of the name Jeduthun, but a more difficult question is the substitution in the same verse of Zacharias (wh. see) for Heman. J. A. SELBIE.

EDEN (עֵדֶן).—A Levite in the time of Hezekiah (2 Ch 29¹² 31¹⁵).

EDEN (עֵדֶן).—1. 'The children of E. which are (not were as in EV) in Telassar' are enumerated in 2 K 19¹² (=Is 37¹²) amongst the peoples conquered by Sennacherib's predecessors. Telassar, if Schrader is right in identifying it with *Til-Ašurri* of the inscriptions, lay on the east of the Tigris, and must have been the district to which the conquered had been deported, in accordance with the custom introduced by Tiglath-pileser III. From their being mentioned along with Gozan, Haran, and Rezeph, we naturally seek for the original home of the Bēnē-Eden in Mesopotamia. They are doubtless the *Bit-Adini* of the inscriptions, an Aramæan principality in the far west of Mesopotamia, some 200 miles N.N.E. of Damascus, which we know to have offered a stubborn resistance to Assur-naṣir-pal, and to have been conquered by Shalmaneser II., B.C. 856 (see ASSYRIA, pp. 183^b, 184^b). In Ezk 27²³ Eden is mentioned amongst the traders with Tyre. The name here also occurs in connexion with Haran, and is therefore probably *Bit-Adini*, although the

* This location is required by the whole tenor of the narrative. The west bank is suggested by v. 10 in its present form, and maintained also by RV in v. 11, by a translation of doubtful admissibility, 'in the forefront of the land of Canaan, on the side that pertaineth to the children of Israel.' See further the *Comm.* in loc., and Bennett's edition of Joshua in Haupt's polychrome OT.

conjecture of Margoliouth (see ARABIA, p. 131^b), that it may be the modern Aden in S. Arabia, is not without plausibility.

LITERATURE.—Schrader, *KAT*², 327; Delitzsch on Is 37¹²; Davidson on Ezk 27²³; Frd. Delitzsch, *Paradies*, 4, 98, 184.

2. 'The house of Eden' (AVm and RVm **Beth-eden**) is mentioned in Am 1⁵. The context has led to the inference that it was in the neighbourhood of Damascus, 'some royal paradise in that region which is still the Paradise of the Arab world' (G. A. Smith, *Twelve Proph.* 125). Ewald (*Prophets*, i. 159, Eng. tr.) identifies it with the *Paradise* of Strabo, xvi. 2-19; and Farrar (*Minor Prophets*, 53) thinks it may be *Beit el-janne* 'House of Paradise' (see, however, Driver's note on Am 1⁵), about eight miles from Damascus, referring in support of this view to Porter (*Five Years in Damascus*, i. 313). Driver considers the most probable identifications to be (1) the modern *Ehden*, 20 miles N.W. of Baalbek; or (2) *Bit-Adini*, described above. Wellhausen (*Kl. Proph.* 68) considers it improbable that Beth-eden is to be sought near Damascus, and is sceptical also about identifying Aven of the same passage with Baalbek. (See, further, G. Hoffmann in *ZAW*, 1883, p. 97; Schrader, *KAT*² p. 442; and esp. Driver, *Joel and Amos*, 132 f., 228 f.) J. A. SELBIE.

EDEN (עֵדֶן, "Edem).—We read that 'the LORD God planted a garden in Eden, eastward, and there put the man whom he had formed' (Gn 2⁸). 'And a river went out of Eden to water the garden; and from thence it was parted, and became four heads' (v. 10). Two of these were the Tigris and Euphrates; a third was the Pison, which compassed the land of Havilah; the fourth being the Gihon, which compassed Cush. After Adam had been expelled from the Paradise, his firstborn, Cain, 'dwelt in the land of Nod, on the east of Eden,' and there built the city of Enoch (Gn 4^{16a}).

Eden means 'delight' in Hebrew, and the position of its garden has been assigned to various parts of the world. Even the North Pole and Australia have found advocates. Josephus (*Ant.* i. 3), the Book of Enoch (xxxii.), and Cosmas Indicopleustes place it in the extreme north-east, towards the Altai mountains of Mongolia. Sanson, Reland, Calmet, Bunsen, Keil, and von Raumer locate it in Armenia, between the sources of the Tigris and Euphrates, the Araxes and the Phasis. Calvin, Bochart, Huet, Rask, and the modern Assyriologists assign it to Chaldæa. Le Clercq places it in the neighbourhood of Damascus, between the Chrysorrhoea and the Orontes; while Heidegger seeks for it in Palestine, near the sources of the Jordan; and Hardouin and Halévy in southern Arabia. Renan identifies Eden with Udyána, 'the garden,' near Kashmir; Bertheau, Lassen, Oby, Spiegel, and Lenormant, with the Meru of the Hindu Puranas, and the Airyana-Vaêja and Hará-Berezaiti of the Zoroastrian Vendidad and Avesta. Meru seems primarily to have denoted the mountains above the Pamir, Airyana-Vaêja being the country between the sources of the Oxus and Jaxartes, and Hará-Berezaiti the Belur-dagh. Ezk 28¹⁴ is appealed to in behalf of the theory that the garden of Eden was on a mountain, though the text may be differently explained.

The rivers Pison and Gihon have been the subject of a similar variety of identifications. Josephus, Eusebius, Augustine, Ambrose, and Jerome make the Pison the Ganges, Cosmas Indicopleustes identifies it with the Indus, while the Jewish commentators, Sa'adya and Rashi, as well as the Samaritans, declare it to be the Nile. The Nile, on the other hand, is identified with the Gihon by Josephus (*Ant.* i. i. 3), most of the Fathers, Kalisch,

Gesenius, Lengerke, and Bertheau, as well as in Sir 24²⁵. The Sept. also, in Jer 2¹³, substitutes Gihon (Γηών) for Sihor, the Nile. Cosmas makes Gihon the Ganges; the Samaritan version calls it the Askôph, which seems to be the Cho-aspes. Mohammedan writers identified the Gihon and Pison with the Oxus and Jaxartes, whence their modern names of Jihûn and Sihûn, which were transferred by the Seljuk Turks to the Pyramus and Sarus in Cilicia. St. Martin identifies the Pison with the waterless Wady er-Ruma in Arabia.

The cuneiform inscriptions have, however, cleared up the geography of the garden of Eden. The Sumerian name of the 'plain' of Babylonia was Edin, which was adopted by the Semites under the form of Edinu. Its Assy. equivalent was *Zeru*, corresponding to the Arab. Zor, the name still applied to the 'depression' between the Tigris and Euphrates. These rivers formerly flowed immediately into the Persian Gulf, though, owing to the silt annually deposited by them, their ancient mouths are now more than eighty miles distant from the sea. The seaport of primitive Chaldæa was Eridu, 'the good city,' now Abu-Shahrein, which stood near the mouth of the Euphrates. In its neighbourhood was a garden, 'a holy place,' wherein grew the sacred palm-tree—the tree of life—whose roots of bright lapis lazuli were planted in the cosmic abyss, whose position marked the centre of the world, and whose foliage was the couch of the goddess Bahu, while the god Tammuz dwelt in the shrine under the shadow of its branches, within which no mortal had ever entered. An oracle was attached to 'the holy tree of Eridu,' and Eri-Aku (Arioch) calls himself its 'executor.' This tree of life is frequently represented in the Assy. sculptures, where it is depicted with two guardian spirits or cherubs, kneeling or standing on either side of it. They are winged, with the heads sometimes of eagles, sometimes of men. Lenormant states that on an Assyrian talisman in the collection of M. de Clercq he found the word *Kirubu* in place of the ordinary *sedu* or 'protecting genius' (*Les Origines de l'Histoire*, i. p. 118). The flaming sword of the cherubim has its counterpart in the sword of Merodach 'with fifty heads,' 'whose light gleams forth like the day'; and Sumerian texts speak of 'the wicked serpent,' 'the serpent of darkness.' See further, art. CHERUBIM.

The statement of Genesis, that the river which went out of Eden was parted into four heads, is explained by the fact that the Persian Gulf was held to be a river by the Babylonians, and was accordingly called by them *nar marratum*, 'the bitter river.' In the second millennium B. C., not only the Tigris and Euphrates, but other rivers besides flowed into it; but the tide, which carried the salt water a long way up their channels, made it possible to speak of their mouths as 'heads.' The Tigris was called Idigla and Idigna, 'the encircling,' in Sumerian, and *id* signified 'a river.' The Pison and Gihon were identified by Sir Henry Rawlinson with the Ugnu and Surappu, which Tiglath-pileser III. couples with the Tigris in southern Babylonia (*Report of Fortieth Meeting of British Assoc.* p. 173). Subsequently he held the Pison to be the Arakhtu or canal on which Babylon was built; and the Gihon the modern Jukhá, which flows westward from the Euphrates towards Abu-Shahrein. Friedrich Delitzsch also identifies the Gihon with the Arakhtu, which he believes to be the Shatt-en-Nil of to-day; but the Pison with the Pallukat, the Pallacopas of classical geography.

The names of the two rivers are, however, still unidentified in the inscriptions. But the land of Havilah encompassed by the Pison was the 'sandy' region of northern Arabia, which extended westward towards the frontier of Egypt (Gn 25¹⁸,

1 S 157). The 'bdellium' that came from it may be the *budikkhati* of the cuneiform inscriptions, which is preceded by the determinative of vegetable; the 'onyx-stone' or *shoham* is the Assyr. *sāmtu*, which we are told was brought from the desert which lay to the east of Egypt.

The Gihon is perhaps the Kerkha, which rises east of the Tigris among the mountains of Luristan, formerly inhabited by the Kossæans, called Kassi in the cuneiform texts. The whole of Susiana was termed Kissia or Kyssia by the classical writers, and its two chief rivers were the Eulæus or Choaspes, the modern Kerkha, and the Pasi-tigris, the modern Karûn. In a cuneiform text the Ulai or Eulæus is described as entering 'the sea.' The land of Nod or the 'Nomads,' to the east of Edom, would correspond with the country of the nomad Sute and Manda in the Babylonian inscriptions.

Pinches has found the name of Pardésu or 'Paradise' as that of a country, apparently mythological, in some Babylonian cuneiform tablets (*PSBA*, Dec. 1896). It is coupled with the 'land of Bit-Napsanu,' and in one passage, by a punning etymology, is derived from the name of 'the god Esu.'

A. H. SAYCE.

EDER (עֵדֶר).—1. Gn 35²¹ 'And Israel journeyed, and spread his tent beyond the tower of Eder' (AV Edar). 'Eder means 'a flock'; and the phrase **Migdal-eder** ('flock-tower,' cf. Mic 4⁸) would have been the appellation given to a tower occupied by shepherds for the protection of their flocks against robbers (cf. 2 K 18⁸, 2 Ch 26¹⁰). The tower here mentioned lay between Bethlehem and Hebron (cf. vv. 19, 27). Jerome mentions a Jewish tradition that this Eder was the site of the temple, 'hunc locum Hebræi esse volunt, ubi postea templum edificatum est: et *turrim Ader*, turrim gregis significare, hoc est, *congregationis et coetus*: quod et Michæas Propheta testatur, dicens: Et tu turris gregis nebulosa, filia Sion.' Jerome himself, however, prefers to think that it was the spot on which the shepherds received the angels' message, 'pastorum juxta Bethlehem locus est, ubi vel Angelorum rex in ortu Domini cecinit' (*Quest. in Gen.*). The tradition that the locality was near Jerusalem probably accounts for the verse (21) appearing in the LXX before v. 16. This transposition would favour any identification which placed 'Migdal-Eder' between Bethel and Bethlehem. The LXX transliterates עֵדֶר as Γῑδερ. 2. Jos 15²¹. The name of one of the towns of Judah 'in the south,' close to the Edomite frontier. For Eder, the LXX (B) gives Ἄρα; and (A) Ἐδρα. Conder (*PEF Mem.* iii. 236) identifies with Kh. el-'Adâr, 5 miles S. of Gaza. 3. 1 Ch 23²³ 24³⁰. The name of one of the Levites in the days of David, of the house of Merari, and the son of Muhî. For Eder we find in the LXX (B) of 1 Ch 23²³ Ἀῖδαθ, and of 1 Ch 24³⁰ Ἡλά, where (A) has Ἐδερ in both instances. 4. A Benjamite, 1 Ch 8¹⁵ (AV Ader), where LXX (B) gives Ὠδερῑ and (A) Ὠδερ. H. E. RYLE.

EDIFICATION, EDIFY, EDIFYING.—These words are always used in AV in the sense of building up *spiritually*, either (a) the Church, or (b) the individual Christian.

The Gr. vb. *οἰκοδομῶ* and subst. *οἰκοδομῆ* are used in NT, as in class. Greek and in the LXX, in the lit. sense of building—a house (Ac 7⁴⁷), tombs (Mt 23²⁹), etc. But our Lord having employed the figure of building His Church, which is expressed in St. Matthew's report (Mt 16¹⁸) by the verb *οἰκοδομῶ*, the metaphor was taken up, and gradually both verb and subst. were used with more and more freedom in this spiritual sense, esp. by St. Paul, to whom the metaphor may almost be said to belong. The Vulg. renders *οἰκοδομῶ* by *edificare*, and *οἰκοδομῆ* by *edificatio*; and Wyclif, and all VSS following, render *edificare* by 'edify,' *edificatio* by 'edification,' or 'edifying.' See *Ecce Homo*, ch. xviii.

The word 'edification' seems to have been introduced into Eng. direct from the Lat. *edificatio*, but 'edify' more probably through the Fr. *édifier*. They were used early, and probably first of all in a literal sense. Thus Paston, *Lett.* (1462), 'A plase late be the said Sir John edified at Caster'; Thomas, *Hist. Ital.* (1549), 'About 700 yeres after the edification of Rome.' The spiritual sense was due perhaps entirely to the influence of the Vulg., which sometimes was the cause of the literal use, as Wyclif's tr. of Gn 2²² 'and the Lord God edified the rib, the whiche he toke of Adam, into a woman,' after Vulg. 'edificavit.' Trench (*Eng. Past and Pres.* p. 161) states that the mod. use of 'edify' and 'edification' began with the Puritans; it is more correct to say that by them the words were first used freely and extensively in the spiritual sense, whence Oldham's complaint—

'The graver sort dislike all poetry,
Which does not, as they call it, edify.'

J. HASTINGS.

EDNA (עֵדְנָא = עֵדְנָה 'delight,' but Fagius עֵדְנָה) was wife of Raguel of Ecbatana, and mother of Sarah, who became wife of Tobias. She gave a cordial welcome to Tobias and his attendant Raphael in disguise, and questioned them as to their kindred (To 7³), weeping over the recital of Tobit's adversities (7⁸). She prepared once more the ill-fated bridal chamber (7¹⁴), and led Sarah thither. Her maternal blessing (om. in Vulg.) was given on the departure of the bridal pair (10¹²); and (B only) she received the blessing of Tobias in return (11¹). Vulg. and Itala call her Anna.

J. T. MARSHALL.

EDOM, EDOMITES (עֲדוּמִי, *Edōmī*, *Edumæa*).—Edom, the 'Red' Land, so called from the red colour of its sandstone cliffs, embraced the ranges of Mount Seir on either side of the 'Arabah, or depression which runs southward from the Dead Sea to the head of the Gulf of Akabah. The name corresponds with that of Deser or 'Red,' applied by the Egyptians to the desert to the east of their country which was inhabited by the Shasu or Bedawin, and included Mount Seir. In the time of the Twelfth Dynasty, as we learn from the story of Sinuhit, the country in which Edom was situated went by the name of Tonu (or Tenu), the portion to the north-east of it being called Kadūmā, the Kedem of the OT, whence the Kadmonites of Gn 15¹⁹ (see also 1 K 4³⁰). Sinuhit received in it the district of Aia. In one of the Tel el-Amarna tablets (*The Tel el-Amarna Tablets in the British Museum*, No. 64) the city of Udumu or Edom is mentioned as hostile to the Egyptian king, and as being in a foreign land, together with the cities of Aduri (Addar), Magdalim (Migdol), and Khini-nabi (En-ha(n)-nabi). Udumu is sometimes called a 'city' in the later Assyrian inscriptions, though it is also spoken of in them as a 'country.' We may conclude, therefore, that the country took its name from its capital. In the Leyden Papyrus (i. 343, 7) the wife of the Semitic fire-god Reshpu is said to be 'Edom' (*Etum*), and at Karnak both Amenophis II. and Thothmes III. mention the city of Shemesh-Edom (*Shemshu-Edum*), which is coupled with Anukhertu, the Anaharath in Issachar of Jos 19¹⁹. Rethpana, the Egyptian name of the Dead Sea, may be a derivative from Reshpu (cf. Job 5⁷, where 'sparks' are called 'the sons of Resheph'). The name Obed-edom, 'servant of Edom,' occurs in the OT (2 S 6¹⁰). Edom, therefore, was probably (but not certainly [see Driver, *Text of Sam.* 205]) the name of a deity; and since both Udum and Etum correspond to the same Hebrew word, it would seem that the local and divine names were connected with one another.

The original inhabitants of Mount Seir were Horites (which see), who were 'destroyed' by the children of Esau (Dt 2²²). The genealogies in Gn 36, however, show that the destruction was not complete, and that the two races intermarried. Esau himself married a descendant of 'Seir the Horite' (36², where 36²⁰, 21 show that we must read 'Horite' for 'Hivite'). When the campaign of Chedorlaomer and his Babylonian allies took place

the Horites had not yet been dispossessed (Gn 14⁶). The Horites were governed by 'allûphîm or 'dukes,' and both the office and name were handed on to their Edomite successors (Gn 36^{29, 40-43}). As the 'allûphîm of Edom' are alone referred to in the song of Moses (Ex 15) after the overthrow of the Egyptians, we may perhaps infer that at the time of the Exodus a king had not been established in Edom; at any rate the reference is an indication of the antiquity of the passage in which it occurs. Before the Israelites had quitted the desert, however, there was a king in Edom. Moses sent messengers from Kadesh-barnea to the king of Edom asking him to permit his 'brother Israel' to pass through his territories, promising that they would march along the highway and do no injury to the country. But the Edomites refused permission, and came out with an army, so that the Israelites were obliged to 'compass the land of Edom' (Nu 20¹⁴⁻²¹ 21⁴).

The kings of Edom who reigned 'before there reigned any king over the children of Israel' are enumerated in Gn 36³¹⁻³⁹. The first, Bela the son of Beor, seems to be identical with Balaam the son of Beor, the seer of Pethor. If so, this would account for his having been slain in the war with the Midianites (Nu 31⁸). 'Rehoboth by the river,' from which Shaul came (Gn 36³⁷), must have stood on the Euphrates, as that is 'the river' of the OT; consequently it cannot be the Rehoboth or 'Suburbs' of Nineveh (Assyr. *Ribit*), which were on the Tigris. The list of Edomite kings must have been extracted from the royal annals, and, as it breaks off in the reign of Hadar (Gn 36³⁹) (or Hadad, 1 Ch 1⁵⁰), may have been composed at that time. It will be noticed that the monarchy was elective, not hereditary.

The children of Israel were ordered not to 'contend' with their 'brethren the children of Esau, which dwell in Seir,' for God had 'given Mount Seir unto Esau for a possession'; and accordingly they turned eastward after passing the Edomite ports of Elath and Eziongeber (now 'Akabah and Kala'at el-'Akabah), at the head of the Gulf of Akabah, and made their way to Moab along the eastern edge of Mount Seir (Dt 2⁴⁻⁸). Similarly, the Edomite, like the Egyptian, was allowed to 'enter into the congregation of the Lord in the third generation' (Dt 23⁷⁻⁸), in contrast to the Ammonite and Moabite, who could not do so till the tenth generation.

Ramses III. of the Twentieth Egyptian Dynasty, after defeating the northern hordes who had attacked Egypt, and overrunning the south of Palestine, 'smote the people of Seir who belong to the Shasu (Bedawin), and plundered their tents.' Among the pictures of his prisoners at Medinet Habu is that of the Edomite 'chief,' who, it must be observed, is not called 'king.' So far as we know, it was the only campaign ever undertaken by a Pharaoh against Mount Seir. Its date was about B.C. 1230-1200, some thirty years after the Exodus, so that the Israelites might have been in the neighbourhood of Edom at the time (cf. Nu 21¹⁴).

Edomite tribes settled in the south of Judah, and even Othniel the brother of Caleb, and the first judge, was a Kenizzite (Nu 32¹², Jos 15¹⁷, Gn 36^{11, 15}). Saul warred with Edom (1 S 14²⁷); and David conquered the country, putting garrisons throughout it, and occupying its ports in the Gulf of Akabah (2 S 8^{13, 14}, where we must read 'Edom' for 'Aram,' AV 'Syrians'). It was in these ports that Solomon with the help of the Tyrians constructed the merchant vessels which traded to Ophir for gold (1 K 9²⁶⁻²⁸). Throughout his reign, however, Edom was in a state of revolt under Hadad, 'of the king's seed,' who had escaped to Midian when Joab was for six months cutting 'off every male in Edom' after David's conquest of the

country. From Midian he and his companions went to Paran, and from thence to the court of Egypt, where the Pharaoh gave him his sister-in-law as a wife, and his son Genubath was brought up as an Egyptian prince. But on the death of David and Joab, Hadad obtained leave to return to Edom, and became 'an adversary unto Solomon' (1 K 11¹⁴⁻²²). He does not seem to have succeeded in making himself independent, however, as we find Edom still subject to Judah after the revolt of the Ten Tribes. Jehoshaphat still held Eziongeber, where he built ships to trade to Ophir; and it is stated that 'there was then no king in Edom: a deputy was king' (1 K 22⁴⁷). This means that there was no independent king there, since, in the war against Moab, when Edom had to follow its suzerain, its ruler is called 'king' (2 K 3^{9, 10, 12, 26}). In the reign of Jehoram, Jehoshaphat's successor, Edom revolted, 'and made a king over themselves.' The revolt spread to the south of Judah, where Libnah was the centre of disaffection; and though Jehoram defeated the Edomites at Zair, he was unable to reduce them to obedience (2 K 8²⁰⁻²²). About fifty years later Amaziah invaded Edom, slaying 10,000 of the enemy in the Valley of Salt, and taking Sela (or Petra), which he named Joktheel (2 K 14⁷). Edom seems to have been crushed by this defeat, as Amaziah's successor, Uzziah, 'restored' Elath to Judah, and rebuilt it (2 K 14²²). It remained in Jewish hands till it was captured by Rezin of Damascus, who colonized it with Syrians* (2 K 16⁶). This was in the reign of Ahaz, when 'the Edomites had come and smitten Judah, and carried away captives' (2 Ch 28¹⁷). Rezin, however, was conquered and put to death in B.C. 732 by Tiglath-pileser III. of Assyria, who thereupon held a court at Damascus, where he received the homage and tribute of numerous princes, among them being 'Jehoahaz (Ahaz) of the land of the Jews,' and 'Kaus-malaka (Kaus-melech) of the land of the Edomites.' Schrader has pointed out that Kaus is the name of a god which appears as Kos in Greek inscriptions, with which Halévy compares the name of the early Arab. deity Kais (Heb. Kish, Kishon). In B.C. 711, Edom joined the league against Sargon along with Judah, Philistia, Moab, Egypt, and Merodach-baladan of Babylon; but Ashdod, the Syrian centre of the league, was taken by the Assyrians, and Edom, like Moab and Judah, paid tribute to the conqueror. Edom again joined the revolt against Assyria in B.C. 701, of which Hezekiah was the head; but when Sennacherib marched into Palestine, A-rammu of Edom submitted like the kings of Moab and Ammon. Esar-haddon caused Kaus-gabri, 'king of the city of Edom,' together with the other vassal kings of the west, including Manasseh of 'the city of Judah' and the king of 'the city of Moab,' to convey to Nineveh timber from Lebanon and various stones for the construction of his palace. When Jerusalem was destroyed by Nebuchadrezzar, the Edomites took part with the enemy, and rejoiced over the calamities of Judah,—conduct which aroused bitter feelings against them on the part of the Jews (La 4^{21, 22}, Ezk 35³⁻¹⁵, Ob 10-16). These feelings were not diminished by their occupation of southern Judah, with Hebron as their capital, and their attacks upon the Jews during the Maccabæan war. Judas Maccabæus, however, drove them from the south of Judah (B.C. 164); and John Hyrcanus, in B.C. 109, conquered their country, and compelled them to adopt Judaism. Mount Seir, as far north as Petra, had already fallen into the hands of the Nabateans, who spoke an Aramaic dialect. Hyrcanus II., the

* So the Kethibh אַרְיִים. The Kerê, however, reads אַרְיִים (Edomites); and this, which has the support of the LXX Ἰουδαῖοι, is adopted by Siegfried-Stade and *Oxf. Heb. Lexicon*.

grandson of John Hyrcanus, on being driven out of Jerusalem, was induced by the Idumean Antipater to seek the help of Aretas, the king of Petra. Pompey, however, intervened, and after sacking Jerusalem, made Hyrcanus high priest (B.C. 63), while Antipater was subsequently (B.C. 47) appointed by Julius Cæsar procurator of Judæa, Samaria, and Galilee on account of his services against Pompey. His son was Herod the Great.

Edomite proper names show that the language of Edom was practically identical with Hebrew. Of Edomite deities we know only the names of Hadad (also Dad), Kaus, Kozé, Edom, and Á. The name of Esau's son Jeush (Gn 36^b), however, corresponds phonetically with that of Yaghúth, a pre-Mohammedan deity of Arabia.

A. H. SAYCE.

EDOS (B 'Hðós, A 'Hðais, AV Edes), 1 Es 9^{ss} = IDDO, Ezr 10⁴².

EDREI (עֲדְרַי, 'Edrâew, *Edrai*).—1. Edrei was a city of Bashan (now the Haurân, eastward of Lake Tiberias), where the Amorite king Og was defeated and slain by the Israelites (Nu 21³³, Dt 3¹, Jos 13²¹). It was then given to Machir, the son of Manasseh (Jos 13³¹, see Jg 5¹⁴), the district in which it was situated being known as Gilead (Nu 32²⁰). The Amorites do not seem to have been long in possession of it, as one of the letters of Tel el-Amarna, about a century and a half before the Exodus, is from Artama-Samas,* the governor of Ziri-Basana, 'the field of Bashan.' Edrei is the Adraha of classical geography, and in Christian times was the seat of a bishop. It has been identified with the modern Der'ât or Der'a, where there is a large reservoir, as well as an aqueduct and mausoleum. About 10 miles to the north of it is Tell 'Ashtera, the supposed site of Ashtaroth, which is associated with Edrei, and in the time of Abraham was inhabited by the Rephaim (Gn 14⁵). In one of the Tel el-Amarna letters (B. M. 43. 10) it is called Astartu, and the writer of the despatch accuses a certain Biridasyi of taking the chariots out of it and giving them to the Bedawin. The neighbouring city of Buzruna (Bostra) was at the time under a king of its own. W. Max Müller identifies the city of Autará in the Karnak List of Thothmes III. (No. 91) with Edrei. Philologically the names would correspond, but the identification is impossible, as Autará is enumerated among the towns of southern Palestine. Astartu or Ashtaroth is in an earlier part of the list (No. 28).

2. EDREI is mentioned in Jos 19³⁷ between Kadesh and En-hazor, in the tribe of Naphtali. The site of it is unknown.

LITERATURE.—Tomkins in *Records of the Past*, New Series, v. p. 43 ff.; Wetzstein, *Reisebericht üb. EDUCATION.—Every student of the history of education will endorse the judgment of the Alexandrian scholar (Prol. to Sirach), that Israel must needs be commended for its zeal in the cause of moral and intellectual culture (*καὶ ἐν τῇ αἰσθητικῇ καὶ νοητικῇ*), since the canonical Books of Deuteronomy and Proverbs, the deutero-canonical Wisdom of Jesus ben-Sira, and the Mishna treatise commonly called the *Sayings of the Fathers* (מִשְׁנַת אֲבוֹת *Pirkê 'Abôth*), provide a catena of pedagogic principles without a parallel in ancient literature. Two sentences only

* Now read Artama-Ya or Artama-anya by Winckler.

may be selected for quotation at this stage. The one is the motto prefixed to the Book of Proverbs: 'The fear of the Lord is the beginning of knowledge' (Pr 1⁷, cf. 9¹⁰); the other is attributed to Simeon, the son of the famous Gamaliel: 'Not learning but doing is the chief thing' (*Ab. i. 17*).^{*} In these maxims we find the two distinguishing notes of Hebrew education, which from first to last was at once religious and practical—an education which sought to combine instruction in the positive truths of the ancestral faith† with preparation for the practical duties of life. It was this successful combination which led Josephus in his treatise *Against Apion* to contrast the education of his countrymen with that of the Lacedæmonians and Cretans on the one hand, and with that of the Athenians on the other—the former being too severely practical, the latter too exclusively theoretical. 'But our lawgiver with great care combined these two methods, for he neither left the practice of right habits without oral instruction (lit. 'dumb,' *κωφόν*), nor did he permit the rules thus taught to remain unpractised.'

We propose here to study the educational methods of the Israelites historically. For this purpose it will be convenient to group the material at our disposal under three historical periods, as follows:—

i. HEBREW EDUCATION FROM THE CONQUEST TO THE EXILE.—When the Hebrews came to settle in the valleys west of the Jordan, they found themselves among a race or races immensely their superiors in all the arts of civilization and culture. Of this there can be no reasonable doubt, though we may doubt whether the country was so thickly studded with schools, teachers, and libraries as has recently been maintained.‡ In any case the troublous times of the conquest were not the most suitable for assimilating the higher civilization of the Canaanites. Reading and still more writing (Jg 8¹⁴) must rather have been the accomplishment of the few than the custom of the many. However that may be, one fact of Hebrew history remains indisputable, namely, that throughout the long period closing with the exile, education was exclusively domestic and private. It is true that the late Jewish writings, Talmud, Targum, and Midrash—those storehouses of magnificent anachronisms—represent even the patriarchs as attending school and college, but such statements are merely harmless flights of fancy. In the whole range of pre-exilic literature there is no trace of any provision by public authority for either elementary or higher education. The word 'school' occurs neither in the OT nor in the Apocrypha, and in the NT only of the lecture-room of a Greek rhetorician at Ephesus (Ac 19⁹). The explanation is that the home was the school, and the parents, in all but the highest ranks of society, were the only teachers. The duty of reverence for and obedience to parents imposed on children by the oldest legislation (Ex 20¹³), had its counterpart in the duty incumbent on the parents (and in particular on the father) to instruct their children in religion and morals. This aspect of parental responsibility is repeatedly emphasized in the Book of Deuteronomy (4⁹ 6⁷), 'Thou shalt teach them diligently unto thy children, and shalt talk of them when thou sittest in thine house, and when

* Quotations from *Abôth* will be made from 'The Authorized Daily Prayer-Book of the United Hebrew Congregations of the British Empire' (ed. Singer), as providing the most easily accessible text and translation. References to other treatises of the Mishna are given acc. to the sections of Jost's edition.

† Contrast this with the statement of Iwan Müller: 'Special instruction in religion was not known to either the Greeks or the Romans of antiquity' (*Handb. d. klass. Alterthumswissenschaft*, iv. p. 451 b).

‡ Esp. by Sayce in *Patriarchal Palestine* (*passim*), and elsewhere.

thou walkest by the way, and when thou liest down, and when thou risest up' (6²⁰⁻²⁵ 11¹⁹ 32⁴⁶). The special provision of Dt 31¹⁰⁻¹³, requiring the presence of the children at the reading of the law in 'the year of release,' i.e. every seventh year, can have had only a very limited application before the great calamity of the exile (cf. Dt 31¹⁰ with Neh 8¹⁷). In the families of the aristocracy the place of the parents, the child's natural teachers, was taken by tutors (צַדִּיקִים 2 K 10⁴⁻⁵). The infant Solomon, according to the simplest rendering of 2 S 12²⁵, was entrusted to the care of the prophet Nathan.

It is now impossible to form an exact estimate of the extent to which education, as tested by the ability to read and write, was common among the people. The standard of learning would naturally be higher in the cities than in the country districts, highest of all in the neighbourhood of the court. Yet such facts as that Amos and Micah among the literary prophets belonged to the ranks of the people; that Mesha, king of Moab, could count on readers for the stele commemorating his victories; that the workmen who excavated the tunnel from the Virgin's spring to the pool of Siloam carved in the rock the manner of their work,—these facts, taken along with more than one passage of Isaiah (8¹ 10¹⁹ 'a child may write them'; cf. 29¹¹⁻¹³ the distinction between the literate and the illiterate), should make us pause before drawing the line of illiteracy too high in the social scale.

A single word must suffice for the schools of the prophets (an expression with no scriptural authority), of which so much was made by scholars of former days. All that the Scripture narrative warrants us in holding is that in a few centres, such as Bethel (2 K 2³), Jericho (2⁵), and Gilgal (4³⁸), men of prophetic spirit formed associations or brotherhoods (hence the name 'sons of the prophets') for the purpose of stimulating their devotion to J^h through the common life of the brotherhood. Edification, not education, was the main purpose of these so-called 'schools.'

ii. FROM THE EXILE TO SIMON BEN-SHETACH, c. B.C. 75.—The arrival in Jerusalem of Ezra the 'ready scribe' (רָשָׁם) in the law of Moses (Ezr 7⁶) was an event of epoch-making importance in the educational not less than in the religious history of the Jews. For Ezra had set his heart to *study* (שָׁרַף) the law (*Torah*) of J^h and to do it, and to *teach* (רָשָׁם) in Israel statutes and judgments (Ezr 7¹⁰). The story of Ezra's activity belongs to the general history of the period. For our present purpose it is enough to recall the fact that the culmination of that activity was the acceptance by the Jewish community of the Torah, in its written form, as the regulating norm in every relation of life. From this time onwards the Jews were pre-eminently 'the people of the book.' But in order that the moral precepts of a book may be obeyed, and its ritual requirements duly observed, the book must be circulated, must be read and studied. The first step in this direction was the great assembly of which we read in Neh 8 ff. The centre of interest throughout is not the living word of a prophet, but the book of the law and the exposition of its contents by accredited teachers (note Neh 8⁷⁻⁸ כְּתוּבִים, the same word as is rendered 'teacher' in 1 Ch 25⁵ and in Ezr 8¹⁶ RV). We would gladly know what measures were taken by Ezra and his associates for the continuance of the public instruction so auspiciously begun. Unfortunately, we have no information on this point from contemporary records, and what a late age has to tell of the work of the so-called 'Great Synagogue' belongs to the world of fable.* There can be little

doubt, however, that one of the oldest institutions of Judaism, the *synagogue*, goes back to the time of Ezra, if not indeed to the days of the exile. The *synagogue*, it is important to remember, was not originally a place of worship but a place of religious instruction, and indeed it is so named by a writer so late as Philo of Alexandria (*Vita Mosi*, iii. 27, τὰ προσευκτήρια τί ἑτερόν ἐστιν ἢ διδασκαλεῖα, κ.τ.λ.). With this agrees the fact that in NT times διδάσκειν, to teach, is still used to express the function of the preacher in the synagogue (Mt 4²³, Mk 1²¹, Lk 4¹⁵ and often).* But whether we regard Ezra as the immediate founder of the synagogue or not, there can be no doubt of the fact that, by securing the recognition by the public authorities of the need of organized religious instruction, he accomplished a work of supreme importance in the educational history of the Jews. 'The Bible became the spelling-book, the community a school, religion an affair of teaching and learning. Piety and education were inseparable; whoever could not read was no true Jew. We may say that in this way were created the beginnings of popular education. In what way this took place is, it is true, wrapped in mystery; in the synagogue men did not learn to write and read, and the scribes were not elementary teachers. But the ideal of education for religion's sake was set up and awoke emulation, even though the goal was not reached all at once' (Wellhausen, *Isr. u. jüd. Gesch.* p. 159).

During the whole of the period under review the early education of the Jewish child continued, even more than before, to be the business of his parents. Elementary schools were still unknown. Now, as in much later times, it was 'the duty of the father to instruct his son in the Torah (*Kiddushim*, 29a), a duty in which the mother took her share (Pr 6²⁰ 31, Sus³). The obligation extended even to 'children's children' (Dt 4⁹). A noteworthy feature of the pentateuchal precepts, from the view-point of pedagogic method, is the extent to which certain religious rites are to be used as object-lessons to the children [Ex 12²⁶, 13⁸ (passover) 13⁴⁴ (first-fruits), cf. Jos 4⁸]. Their interest and attention are first to be aroused, and only after question asked is the explanation of the rite to be given. In the case of the passover the question, 'What mean ye by this service?' (Ex 12²⁶)—now expanded to four—has remained as part of the ceremony to the present day.

The leading feature of the educational history of this period is the rise of a body of men as professional teachers. These are the *Sopherim* (סֹפְרִים, literally 'book men'), or scribes. For the circumstances which led during the exile to a species of literary renaissance, or rather to a new interest in the literature of the past, and thereby to the growth of a body of *litterati* (γραμματεῖς),—students, copyists, and teachers,—we must refer to the article SCRIBES. We have seen, however, under what circumstances the study and the exposition of the Torah, in particular, were begun among 'the children of the captivity' in the new community at Jerusalem. From that time to the end of the Jewish state and beyond it, the office of the scribe was one of ever-increasing importance. But to identify, as is too often done, the scribes of the Persian and early Greek period with those whose character and aims are familiar to us from the Gospels, is to do the former great injustice. For these ancient scribes have shared in the rehabilitation of the late Persian and early Greek periods of Jewish history, which is so remarkable a feature of the critical scholarship of the day.† Here we

* See esp. Kuenen's classical essay, 'On the Men of the Great Synagogue,' now accessible in German in Budde's *Gesammelte Abhandlungen*, etc., von Dr. A. Kuenen (1894).

* For further testimony by Philo and Josephus to the teaching function of the synagogue, see Schürer, *IJP* ii. ii. p. 54.

† See, *inter alios*, Wellhausen, *Israelitische u. jüdische Geschichte*, p. 154.

are concerned with them only in so far as they continued the work of instruction committed to them by Ezra. Unfortunately, from the lack of historical material, it is now impossible to trace the development of education under their guidance. We know, however, that by the time of the Chronicler (1 Ch 2³⁵) they had been 'organized in regular "families," or as we should now say "guilds," an institution quite in accordance with the whole spirit of the East, which forms a guild or trades-union of every class possessing special technical knowledge' (W. R. Smith, *OTJC*² p. 44). From the proverbial form of 1 Ch 25^{3b}—'as well the small as the great, the teacher as the scholar'—we may further infer that the relation of master and pupil was by this time (c. B.C. 300) a familiar one; which, of course, implies facilities for education other than the Levitical music schools to which the proverb is here applied.

Here we are met by one of the most interesting but difficult problems in the history of Hebrew education. Not the least important of the critical results above referred to, is the bringing down of the compilation of our present Book of Proverbs, and so of the Golden Age of the Wisdom Literature, to the Persian period. In this case, who are the 'Wise' (חכמים), the sages of whom this department of Hebrew literature is the characteristic and enduring memorial? May we identify them with the older race of Sopherim, the book-men or *literati* of the period? * The temptation is great. Thus the scribes were the accredited teachers of the people (see above), and the most venerable of the traditions preserved by the fraternity from the 'men of the Great Synagogue' was the obligation to 'raise up many disciples' (*Ab. i. 1*). But the sages were also teachers (חכמים, חכמי, חכמי, Pr 5¹³), who address a pupil as 'my son,' and whose teaching is known as 'the words of the wise' (Pr 1⁶ 22¹⁷, Ec 9¹⁷ 12¹¹; see also the *Oxf. Heb. Lex. sub* חכם). Again, the scribes formed, as we have seen, a guild or corporation. But we have abundant evidence that the sages are also to be regarded as forming a distinct fraternity (Pr 1⁶ 13⁴ 22¹⁷ 24²³, Ec 12¹¹). Cf. Cheyne, *Job and Solomon*, p. 123 and *passim*; Riehm, *Handwört. d. Bibl. Alt.² sub* 'Weise' †; Kautzsch, *Abriß d. Gesch. d. AT Schrifttums*², 1897, p. 135 ff.). Wellhausen in his recent history, while maintaining their original independence, admits that by the time of Jesus ben-Sira (B.C. 200–180) the scribes 'were scarcely any longer to be distinguished from the sages' (*Gesch.* p. 154, note 1). This admission is due to the fact—and here perhaps we have the strongest argument for the identity of the two classes—that Ben-Sira, the last of the sages, was himself a scribe. Of this there can be no doubt; one has but to read his glowing panegyric on 'the wisdom of the scribe,' and the glory of his calling (Sir 38²⁴–39¹¹). It is therefore but natural that 'the best, and almost the only data regarding the earlier scribes, are to be found in the Book of Ecclesiasticus, 6^{33ff.} 9^{14ff.} 14^{20ff.} 38^{24ff.}' (Wellhausen, *loc. cit.*).

For our present purpose the final answer to our query regarding the *personnel* of the sages is immaterial; for whether we hold that they are identical with the Sopherim or book-men, or regard them as forming a distinct but allied class in the pre-Maccabæan community, the fact remains that the sages represent a great educational force in the period under review. The Book of Proverbs is the

* This identification was first proposed by A. T. Hartmann (*Die enge Verbindung d. AT mit d. Neuem*, 1831), and more recently and independently by Smend in his *Alttest. Religionsgeschichte*, 1893, p. 512 ff. Cf. Montefiore, *Hibb. Lect.* 396 f.

† They (the sages) occupy in the everyday life of ancient Israel a position precisely similar to that of the scribes in later Judaism. Riehm is, of course, assuming the *pre-exilic* date of Proverbs.

repository of their pedagogic experience (see esp. 1²⁻³), and so the oldest handbook of education. Life is here conceived as a discipline (צדק, a word occurring 30 times in the book acc. to Driver, *LOT*¹ 380). This is its central thought. 'The whole of life is considered from the view-point of a pedagogic institution. God educates men, and men educate each other' (O. Holtzmann in Stade's *GVI*² ii. 296–97). Father and mother are the child's natural instructors (1⁸ 4¹⁻⁴ 6³⁰ 13¹ 30¹⁷); from them he shall first learn that 'fear of the Lord which is the beginning—or it may be the chief part—of wisdom' (9¹⁰). Their duty in this respect is emphasized; they are to study their child, since his character is known by his conduct (20¹¹). To them is addressed the golden maxim, 'train up a child in the way he should go, and even when he is old he will not depart from it' (22⁶ RV). The child is by nature foolish, and needs the 'rod of correction' (22¹⁵). Corporal punishment is repeatedly advocated ('he that spareth his rod hateth his son,' 13²⁴, cf. 19¹⁸ 23¹³ 14 29¹⁵ 17, also La 3³⁷), yet with the intelligent child reproof is better than 'a hundred stripes' (17¹⁰). From the parents' care the child—of the upper classes only, in all probability, cf. 17¹⁶ 47 (RV) with Sir 51²⁸—if he would attain to 'wisdom,' passes into the hands of professional teachers (5¹³), the sages, whose words 'spoken in quiet' (Ec 9¹⁷ RV) 'are as goads' (Ec 12¹¹), and whose direction (חכמה) is 'a fountain of life' (Pr 13¹⁴). The pupil's progress in religion and morality is the teacher's highest joy (23¹⁵ 16), but not all are capable of receiving this higher instruction (27²²). Prudence and forethought (24²⁷), temperance (21¹⁷ 23²⁰ 21. 29–35) and chastity (7^{6ff.} 29⁸ and oft.), diligence (6⁶⁻¹¹) and truthfulness (17⁷), consideration for the poor (14²¹ 19¹⁷ 22⁹), and a truly noble charity towards enemies (25²¹. 22 = Ro 12²⁰), the value of true friendship (17¹⁷ 18²⁴ 27¹⁰), and the dignity of womanhood (31¹⁰⁻³¹),—these are some of the moral lessons to be learned in 'the house of discipline' (σικω παιδείας, Sir 51²⁸) from 'the lips of the wise' (Pr 15⁷). *

The founding of Alexandria was an event the importance of which for the history of Jewish life and thought even in Palestine it is impossible to over-estimate. What would we not give to be able to trace the working of the subtle influences on the religious thought of the time, in particular, of those forces of Hellenism by which the little Jewish state was girt about on every side (cf. 1 Mac 1¹¹)! For something like a century Alexandria, with its great library and university, its brilliant array of scholars and *littérateurs*, was the capital of Southern Syria as well as of Egypt. How was popular education affected by this close connexion of Alexandria and Jerusalem? A solitary notice, so far as we have been able to discover, from the period in question, almost warrants us in believing that the Greek educational methods had penetrated to Jerusalem. The infamous tax-farmer Joseph (c. B.C. 220), † we are told, sent his sons 'severally to those that had the best reputation for instructing youth' (Josephus, *Ant.* XII. iv. 6). The education required was certainly of the Greek type, and this fact, taken in connexion with the rapid progress of Hellenism at this particular epoch, even under the shadow of the temple (see 1 Mac 1, 2 Mac 2–4), makes it very probable that schools on the Greek model were then established in Jerusalem. When the author of Ps 119 says, 'I have more understanding than all my teachers,' etc. (vv. 99, 100), there is good reason for thinking that he wishes

* How much, one wonders, of what is in our Scottish character to-day is due to the use till almost the other day of this great book (ἡ παλαιὰ σοφία) as the reading-book of our parish schools?

† For this corrected date see Wellhausen, *op. cit.* pp. 197–98.

to exalt the study of Holy Scripture above the secular learning of the Greek schools. However this may be, Ben-Sira was still true to Jewish traditions and uninfluenced by Hellenistic culture. He had travelled in other countries, and studied perhaps in other literatures, but he remained 'a true "scribe," and gloried in the name' (38²⁴). The object his translator had in view, as we learn from his preface to his grandfather's work, 'was to correct the inequalities of moral and religious culture (*paideia*) among the Jews of Egypt by setting before them a standard and a lesson book of true religious wisdom' (Cheyne, *Job and Solomon*). 'The Wisdom of Jesus the son of Sirach,' or 'Ecclesiasticus,' is therefore avowedly a manual of ethics, and as such deserves more space than we can give it in this review of Jewish educational history. 'Draw near unto me, ye unlearned,' we read in the epilogue, 'and lodge in the house of instruction. Say, wherefore are ye lacking in these things, and your souls are very thirsty?' (Sir 51^{23a}). His religious standpoint is essentially that of the Book of Proverbs, on which his own is modelled. Thus the fear of the Lord is not only 'the beginning of wisdom' (1¹⁴), but also wisdom's fulness (1¹⁶) and crown (1¹⁸). Yet the author's ethical tone is distinctly lower than that of his model. As a disciplinarian he is severe even to excess (30¹⁻¹³ 7²³⁻²⁴). The principles of humane conduct are exhibited in many lights, including even the 'manners' of the dinner table (31¹⁶⁻²¹). The notable passage (38^{24-39¹¹}) in which he sketches his ideal of the scribe has been already adverted to. One point, however, must be further emphasized, viz. the assertion that learning is the monopoly of the wealthy: 'The wisdom of the scribe cometh by opportunity of leisure. How shall he become wise that holdeth the plough,' etc.? (38^{24c}). Education is costly (51²⁸), but he himself offers the means of culture 'without money and without price' (cf. 51²⁹).

Many questions regarding the practical aspects of education in this period suggest themselves, to which only tentative answers can be given. Where, for example, did the teachers of whom we read (Pr 5¹³, Ps 119⁹⁹, perhaps Dn 12³)—be they sages or scribes—meet their pupils? What were their methods of instruction? The synagogues first occur to one as the scene of those expositions of Scripture to which the name of *Midrash* was already applied (2 Ch 13²²⁻²⁴). There the people were instructed on Sabbaths and feast-days by competent expounders of the Scriptures, as a rule, no doubt, by the scribes, although these never had a monopoly of the synagogue teaching. As early as the beginning of the 3rd cent. the scribes had apparently facilities for teaching within the temple precincts: such, at least, seems the legitimate inference from their description as 'scribes of the temple' in the edict of Antiochus III. (Jos. *Ant.* XII. iii. 3). 'Within the massive city gates or in the adjacent squares or "broad places" on which the streets converged (Pr 1²⁰⁻²¹, cf. Job 29⁷) the "wise men" awaited their disciples' (Cheyne, *op. cit.* p. 124). Most of the instruction, however, was doubtless given by sage and scribe alike in private houses, their own or those of wealthy disciples. 'My son,' says Ben-Sira, 'if thou seest a man of understanding, get thee betimes unto him, and let thy foot wear out the steps of his house' (Sir 6⁹ RV). With this advice we compare that of José ben-Joezer of Zeredah, in the early Maccabean days: 'Let thy house be a meeting-place (*בית תורה*) for the wise; sit amidst the dust of their feet, and drink their words with thirst' (*Ab.* i. 4).*

* The *בית תורה* which, according to *Sota*, ix. 9, ceased since José's time, cannot, as some have thought, mean schools (*σχολαί*—in late Heb. *אֲבָתוֹרָה*); see Derenbourg, *Hist. de la Palestine*, p. 456 ff

Here was found the opportunity for those 'words spoken in quiet' that were 'like nails fastened by the masters of assemblies' (Ec 12¹¹).

As to methods, we have still less information. To judge from the practice of a later age, the pupils would learn by frequent repetition the proverbs of the wise (cf. Cheyne, *loc. cit.*). The alphabet was already used in ways calculated to assist the memory, as in the 119th Psalm. To this period may be assigned the invention of the mnemonic device known as *Athbash* (*אָתְבָשׁ*), of which the present text of Jer 25²⁶ 51¹ affords the classical examples (see Giesebrecht's *Comm. in loc.*), as also the introduction of the 'numerical' proverbs, so much in vogue in later times (cf. Pr 30¹¹⁻³¹ with *Aboth*, v.).

Finally, we may assume that, at least from the beginning of the Greek period, a fairly high standard of general culture prevailed. It was now that the editor, if not the author, of Ecclesiastes could write: 'Of making many books there is no end; and much study is a weariness of the flesh' (Ec 12¹²). At the beginning of the Maccabean revolt, also, the possession of copies of the 'book of the covenant' was certainly not the exclusive privilege of priest and scribe (1 Mac 1⁵⁷).

III. FROM SIMON BEN-SHETACH (c. B.C. 75) TO THE END OF THE JEWISH STATE (A.D. 70).—Just as the synagogue was the novel feature of the preceding period from the educational point of view, so is the elementary school the feature of this third period. Such, at least, is the tradition preserved in the so-called Talmud of Jerusalem. In a passage commemorating the merits of the famous scribe and leader of the Pharisees, Simon ben-Shetach (or Shätach),* brother of queen Alexandra, we read that three additions were made by him to the statute-book, so to say, the second of which runs thus—

שִׁירֵי הַתְּנוּקוֹת הַלְבִּינן לְבֵית הַסֵּפֶר 'that the children shall attend the elementary school' (Talm. Jer. *Kethuboth*, viii. 11, p. 32b; see the whole passage in Derenbourg, *op. cit.* p. 108). The words quoted, it will be seen, are not altogether free from ambiguity. They may also be interpreted to mean that attendance on schools *already existing* was henceforth to be compulsory. In view of what was said above regarding the spread of Greek ideas in pre-Maccabean days, it is difficult to believe that schools preparatory to the more advanced instruction in the scribal college (see below) were not to be found—at least in Jerusalem. One can hardly escape the conviction that the erection of the Greek gymnasium at Jerusalem (1 Mac 1¹⁴, cf. 2 Mac 4⁹⁶) was not the first step, but the last, in the assimilation of Jewish and Greek education. Be this as it may, there is no good reason for rejecting the tradition regarding Simon ben-Shetach's efforts on behalf of popular education. All that we know regarding the predominant influence of the scribes in the reign of Alexandra (B.C. 78-69) prepares us for more aggressive measures for the extension of their principles among the people. According to unanimous tradition, the elementary school (*בית ספר*, 'house of the book,' see below) was always in intimate connexion with the synagogue. Either the synagogue proper—in this period to be found in every considerable village in the land—was used for this purpose (Löw, *Die Lebensalter in jüd. Literatur*, p. 287, where the ref. are to *Berachoth*, 17a, *Taanith*, 23b, *Kiddushin*, 30a), or a room in the same building. The school might also be held in the teacher's house (Hamburger).

By all writers on Jewish education it is stated

* See Schürer, *HJP*, index; Derenbourg, *Essai sur l'histoire de la Palestine*, pp. 96-111, and the Jewish historians Grätz, Hertzfeld, etc.

that the synagogue officer (רַב־הַבַּיִת) — the minister (ὀνηρέτης) of Lk 4²⁰ — was the teacher of the synagogue school. This uniform tradition seems founded on a precept regarding Sabbath observance in the Mishna treatise of that name, where, even on the sacred day, 'the רַב (Hazzān) is allowed to look on where the children are reading, but he may not read himself' (*Shabbath*, i. 3). Now it will be observed that the proper title of the synagogue official, as given above, is not found here—a fact hitherto overlooked. For רַב is a word of general application, meaning 'overseer,' 'inspector,' or the like, and its exact significance has to be decided by the context (see the *Lexx.* of Buxtorf, Levy, and Jastrow). In the passage quoted the context requires us to render 'overseer' or 'master (of the school).' This rendering is supported by a passage in the treatise *Sota* (ix. 15), where R. Eliezer says: 'Since the destruction of the temple the sage (חֲכִימָא) has become like the scribe (סוֹפֵר), and the scribe like the Hazzān (חַזְזָאן), and the Hazzān like the uneducated man.' Here we have evidently the hierarchy of the teaching profession, and it may fairly be assumed that they all belong to the ranks of those who, in the NT, are known as νομοδιδάσκαλοι, 'doctors of the law' (Lk 5¹⁷), i.e. the scribes. Now this passage of St. Luke (cf. Mt 9⁸) is of the utmost importance, as showing that these doctors or teachers were to be found in 'every village (κώμη) of Galilee and Judaea.' It is absurd to suppose—even granting the hyperbolic nature of the evangelist's statement—that the higher colleges, where alone the scribes are usually supposed to have taught, were to be found in such numbers throughout the country. But there would, at this time, be an elementary school wherever there was a synagogue. We conclude, therefore, that teachers of all grades were members of the powerful guild of the scribes (οἱ γραμματεῖς, cf. γραμματιστής, 'a schoolmaster'). In the Aramaic of the period רַב־בַּיִת no doubt already meant 'teacher' in general, since we find סוֹפֵר בַּיִת = 'school' (see the *Lexx.*, and cf. Targum on 1 Ch 25⁸, where 'the teacher as the scholar' is rendered חֲכִימָא עַם הַסּוֹפֵר). It follows, therefore, that the Hazzān or master, who conducted the elementary school, was an official of a higher social grade than the 'Hazzān of the synagogue,' who had to perform such menial offices as the whipping of criminals (*Makkoth*, iii. 12).

The most usual form of address to a teacher was Rabbi (רַבִּי 'my master,' lit. 'my great one'), but it 'does not seem to have been used as a title [e.g. Rabbi Eliezer, Rabbi Akiba, etc.] till after the time of Christ' (Schürer). In the NT our Lord is addressed by His disciples as βαββελ (βαββουνεί), κύριε, διδάσκαλε, and—in Lk only—as ἐπιστάτα.

The opinion just stated, that in the time of our Saviour every place of any size in the country was provided with an elementary school, does not quite coincide with that of the Jewish doctors of a later day, unless we suppose (as is not unreasonable) that the political and religious troubles of the period injuriously affected the provincial schools. We refer to the oft-quoted eulogium on Joshua ben-Gamala (Gamaliel), who was high priest about A.D. 63-65:

'Verily let it be remembered to that man for good, R. Joshua ben-Gamala is his name, for had he not been, the Law would have been forgotten in Israel. At first every one that had a father (alive) received from him instruction in the Law, but he that had no father (alive) learned not the Law. . . . Thereafter teachers for the children were appointed in Jerusalem. . . . But even this measure sufficed not, for he that had a father was brought by him to school, and was taught there, but he that had no father was not brought to be taught there. In

consequence of this, it was ordained that teachers should be appointed in every district. To them the children were sent when they were 16-17 years of age. When a teacher became angry with a scholar, the latter stamped his feet and ran away. In this condition education remained until the time of Joshua ben-Gamala, who ordained that in every province and in every town there should be teachers appointed, to whom children should be brought at the age of six or seven years' (*Baba bathra*, 21a).*

It is not now possible to speak with certainty regarding the condition of the elementary school at the period of which one would most like to know, the period of the childhood of our blessed Lord. The Mishna, almost our only authority, is not, as a whole, older than A.D. 200. Accordingly, we must be content to infer—and always with caution—that some, at least, of the methods there referred to as of long standing may have been operative in the 1st cent. But before attempting even such hesitating results, it will be convenient to give at this point what requires to be said of the education to be got beyond the synagogue schools. For the great mass of the boys—for the girls no public provision was made (see below)—these schools sufficed. Only those destined for the study of the Law were sent to the Beth ham-Midrash (בֵּית הַמִּדְרָשׁ) or 'house of study,' as the colleges of the scribes were called. These colleges were probably a development of this period. They were, naturally, most numerous in Jerusalem, where the most famous scribes seem to have had each his 'house of study.' Josephus mentions two by name (*Wars*, I. xxxiii. 2; *Ant.* XVIII. x. 5) who drew crowds of students in the last days of Herod the Great. But by far the most famous of these 'doctors of the law' were the two heads of the rival schools, Hillel and Shammai, although for Christian students a greater interest attaches to Hillel's grandson, himself the most respected teacher of his day, Gamaliel I., who numbered the young Saul of Tarsus among his pupils (*Ac* 22³). At these colleges the scribe-aspirant received a professional rather than a general education, for which reason the further discussion of their subjects and methods of study belongs rather to the article SCRIBE.

Returning now to the elementary school, we propose to touch briefly on such of the outstanding features of the school system as we have reason to believe existed in the century preceding the destruction of Jerusalem. As regards the age of the pupils on admission, our authority, though often quoted, is unfortunately too late to be of value for the period in question. 'At five years the age is reached for the study of the Scripture (סֵפֶר), at ten for the study of the Mishna, at thirteen for the fulfilment of the Commandments, at fifteen for the study of the Talmud, at eighteen for marriage,' etc. (*Ab.* v. 24). There is a consensus of opinion, on the other hand, in the Talmudic writings that six was the earliest age at which school life should begin.† The child had already learned from his parent to repeat the Shema (see Driver on Dt 6⁴), selected proverbs, and verses from the Psalms. He had also had the historical significance of various rites and ceremonies explained to him (see p. 647^b above).

It is extremely unlikely that the subjects of instruction included more than reading, writing, and, perhaps, the elements of arithmetic. The first of these was by far the most important, and

* The above is Wünsche's translation in *Der babyl. Talmud*, etc.

† For the curious ceremonies observed at a later period on the child's first appearance at school, see Schechter, *Studies in Judaism*, p. 368.

the fact that the much esteemed privilege of reading, and even of expounding, the law in the synagogue was open to all, must have acted as an incentive to diligent study. The only text-book was the Scriptures—hence the most usual name for the elementary school *בית ספר* the 'house of the Book'—mostly but not exclusively the Pentateuch. 'Turn it (the Torah), and turn it over again, for everything is in it' (*Ab. v. 25*), well expresses the attitude of the orthodox Judaism of the time to secular literature. Even so early as the beginning of our era, it was probably usual to begin with the Book of Leviticus, as the book whose contents it was necessary for every Jew to know. Care would be taken that the words of the sacred tongue (for only Hebrew was allowed in school) should be correctly pronounced* and reverently read. Foreign languages were no part of an ordinary Jewish education, as Josephus expressly informs us (*Ant. xx. xii. 1*); yet few lads can have grown up in the busy cities of Palestine without learning to speak both Aramaic and Greek, and at least to read Hebrew. Tradition has it that a knowledge of Greek was an essential qualification for membership of the Sanhedrin (*Sanhed. 17a*). †

The Latin maxim, 'repetitio mater studiorum,' may be taken as the keynote of Jewish educational method. So great was the importance attached to constant repetition, that the verb *נָשַׁב* 'to repeat' came ultimately to mean both 'to learn' and 'to teach.' ‡ After the letters were mastered § the teacher copied a verse which the child had already learned by heart, and taught him to identify the individual words. The absence of vowel signs in Hebrew, as then written, prevented the child from learning to read syllables as he does in the 'Talmud Torah' schools of the Jewish communities in the East at the present day. In one point, however, the schools of 1900 years ago resembled those schools of to-day, namely, the babel of childish voices that rose from every corner of the school-room, for 'audible study and distinct pronunciation' (*Ab. vi. 6*) were the first of numerous requisites for the proper study of the Torah. Was there not once a pupil who learned his tasks without repeating the words aloud, and who, in consequence, forgot all he had learned in three years? (*Erubin, 54a*). The ideal schoolboy of the period was R. Eliezer, whom his teachers likened to 'a cemented cistern which loses not a drop' (*Ab. ii. 11*).

The scholar sat on the ground facing the teacher (cf. *Ac 22^d, Ab. i. 4*), who sat slightly raised above his pupils. Benches were a later invention. The old conception of education as above all a discipline was not forgotten, and probably never before was education so exclusively religious and scriptural, with so little reference to the teachings of nature and history. The teacher's function, as then conceived, was not to inform the mind or to impart knowledge for its own sake, but to train up his pupils in the fear of the Lord, and so to prepare them for the ceremonial and moral duties incumbent on them as the true sons of the covenant of Abraham.

It has become a commonplace that the scribes taught gratuitously. This may have been true of the great doctors of the capital,—although even

then, perhaps, only as regards judicial work (Schürer),—but scarcely of the elementary teachers in the provinces. It has been suggested that the honorarium was paid under some pretext, such as compensation for loss of time, etc. (Lewit, p. 26). This is quite in the spirit of the casuistry of the time. Still, as is well known, the scholars of the day had a much worthier conception of the dignity of work than had Jesus the son of Sirach (Sir 38^{25d}), and taught that the study of the Law should be combined with the exercise of a trade (*Ab. ii. 2*).

We must not suppose that the educational system here outlined was the only system then to be found in Palestine. It was the system adopted by the strict Jews, it is true, but there were other schools of the Greek type, not only in the many Hellenistic centres,—whence came some of the most famous poets, philosophers, and orators of that age (see Schürer, II. i. 28),—but even in Jerusalem itself. Such a school was that which the youthful Herod attended (Josephus, *Ant. xv. x. 5*). In nothing, however, did the Jewish educational ideal (for which cf. Josephus, *Ant. xx. xii. 1*, *μόνοις δὲ σοφίαν μαρτυροῦσι τοῖς τὰ νόμιμα σαφῶς ἐπισταμένοις, κ.τ.λ.*) differ so widely from the Greek as in the value attached to physical training. For the ordinary forms of gymnastic exercise the Jew apparently had little inclination, unless, perhaps, for swimming (*Kiddushin, 29a*), while wrestling in public was peculiarly abhorrent to his sense both of dignity and decency (1 Mac 1^{44d}, 2 Mac 4^{107d}).

We have said nothing hitherto of the education of Jewish girls. These were from their birth to their marriage their mother's special care, by whom they were taught, like their brothers, 'to fear God and keep his commandments.' By her, too, they were taught to read, and perhaps to write, as boys in former days were taught by their father, and thereafter instructed in the domestic arts corresponding to their station. The deeper study of the Torah, and still more the higher secular learning, were discouraged. The ideal to which every Jewish daughter was—and we may add, is—taught to aspire is that of the 'virtuous woman' who 'looketh well to the ways of her household, and eateth not the bread of idleness. Her children arise up, and call her blessed; her husband also, and he praiseth her, saying: Many daughters have done virtuously, but thou excellest them all' (Pr 31²⁷⁻²⁹). Truly a noble ideal of womanhood!

LITERATURE.—A critical history of Hebrew education is still a desideratum. The standard works of the historians, Jewish and Christian, contain only incidental references. Professor Laurie's *Historical Survey of Pre-Christian Education*, 1895, pp. 69-105, gives a good account of the subject from the conservative standpoint. Quite a number of Jewish writers have dealt with it in recent years, mainly, however, as organized by the Jewish authorities from the 2nd cent. A.D. onwards. The following are the best of these special works (only those with the number of pages added have been consulted): M. Duschak, *Schulgesetzgebung und Methodik d. alten Israeliten*, 1872; E. van Gelder, *Die Volksschule d. jüd. Alterthums*, 1892, 31 pp.; Seidel, *Ueber die Pädagogik d. Proverbien*, 1875; S. Marcus, *Die Pädagogik des Israel. Volkes*, 1877; J. Simon, *L'Éducation et l'Instruction des Enfants chez les anciens Juifs*, 1878, 63 pp.; A. Astruc, *L'Enseignement chez les anciens Juifs*, 1881; B. Spiers, *The School System of the Talmud*, 1882, 27 pp.; B. Strassburger, *Geschichte d. Erziehung und d. Unterrichts bei d. Israeliten*, etc., 1885, 310 pp. (Pre-Talmudic period, pp. 1-24; bibliography of Jewish pedagogics, pp. 273-77); J. Lewit, *Darstellung d. theoretischen u. praktischen Pädagogik in jüd. Alterthum*, 1896, 30 pp.; Oehler's 'Pädagogik d. Alten Test.' in Schmid's *Encyclopädie d. gesammten Erziehungs und Unterrichtswesen*, vol. v, 1866, pp. 653-695 (1883, pp. 537-578), is full and suggestive, but in great part antiquated; Gustav Baur in Schmid's *Gesch. d. Erziehung*, 1892, pp. 654-670 (not seen). Hamburger's *Realencyclopädie d. Judenthums*, 1883 (vol. i. art. 'Erziehung'; ii. 'Lehrer,' 'Schule,' 'Unterricht, etc.), is a mine of information for the later period; see also Schürer's *HJP* II. i. 25, 'Scribism,' vol. II. 27, 'School and Synagogue' (older literature of the subject, p. 46); Ginsburg in *Skito's Biblical Cyclopædia*, art. 'Education'; Ederstein, *Sketches of Jewish Social*

* On the defects of the Galilean pronunciation (Mt 26⁷³), see Buxtorf *sub* *בָּבֵל*, and Lightfoot's dissertation in *Hor. Hebr.* (ed. Gandell) I. 170 ff.

† See also *Sota*, ix. 14, for a statement that the study of Greek had only been stopped since the 'war of Titus'—for which read 'war of Quietus,' with most modern scholars.

§ On the later method of teaching the alphabet on the 'A-was-an-Archer' principle see *Shabbath*, 104a, given in full in Wünsche's *Der Babylon. Talmud*, etc., I. pp. 155-57, cf. Lewit (title below), p. 47.

Life in the Days of Christ (esp. chs. vii, viii.), and *Life and Times of Jesus the Messiah*; L. Löw, *Die Lebensalter in d. jüd. Literatur*, 1875, *passim* (esp. p. 130 ff.: 'Education in Bible Times,' and relative notes); S. Schechter, *Studies in Judaism*, 1896 (p. 343 ff.: 'The Child in Jewish Literature'). The standard authorities for Jewish education in the Middle Ages (which may be added for completeness' sake) are the works of M. Guedemann, *Geschichte d. Erziehungsweesen u. d. Kultur d. Juden*, etc., France and Germany, 1880; Italy, 1884; Spain, 1888. See also I. Abrahams, *Jewish Life in the Middle Ages*, 1896 (esp. chs. xix, xx.).

A. R. S. KENNEDY.

EFFECT.—In 2 Es 9⁶ 'effect' is used in the obsolete sense of 'deed,' 'the times also of the Highest have . . . endings in effects and signs' (consummatio in actu et in signis); cf. Shaks. *Learn*, II. iv. 182—

'Thou better know'st
The offices of nature, bond of childhood,
Effects of courtesy, dues of gratitude.'

In Ezk 12²³ the sense is *purport, significance*. 'The days are at hand, and the effect of every vision' (דבר 'word,' as RVm). So Chaucer, *Merch. Tale*, 153—

'And for his freendes on a day he sente,
To tellen hem th' effect of his entente.'

With those exceptions, the use of 'effect' is much as in mod. English, though the phrase in Ro 9⁶ may be noticed, 'as though the word of God hath taken none effect' (ἐκείνην, lit. 'has fallen out,' RV 'hath come to nought'). The usual phrase is 'to make of none effect,' always a single vb. in the original, of which the most interesting is *καταργέω* (Ro 4¹⁴, Gal 3¹⁷; tr^d 'make without effect' Ro 3³), a characteristically Pauline word. Its opposite is *ἐνεργέω*, a word always in NT of some principle or power at work, esp. in the soul (see Mayor on Ja 5¹⁶). Wherever 'effectual' and 'effectually' occur in NT they translate either *ἐνεργέω*, as Gal 2⁸, 1 Th 2¹³ 'work effectually'; 2 Co 1⁶ 'be effectual'; Ja 5¹⁶ 'the effectual fervent prayer of a righteous man availeth much' (RV 'the supplication of a righteous man availeth much in its working,' Rendel Harris, 'the energized prayer of a righteous man is of great force'); its adj. *ἐνεργής*, as 1 Co 16⁹, Philem 6; or its subst. *ἐνεργεια*, whence Eng. 'energy,' as Eph 3⁷ 4¹⁶ 'effectual working,' RV 'working.' In all these places we should now use 'effective,' 'effectively.'

J. HASTINGS.

EGGS.—See FOWL.

EGLAH (עֵגְלָה 'a heifer').—One of the wives of David, and mother of Ithream (2 S 3⁵). Both here and in 1 Ch 3³ she is distinguished by the title 'David's wife.' Jewish tradition (cf. Jer. *Quest. Heb. in libros Regum*) identified E. with Michal, since the latter was his first and best-loved wife. More probably the name of E.'s first husband is concealed in the word 'David.' J. F. STENNING.

EGLAIM (עֵגְלַיִם), Is 15⁸.—Noticed with Moab. The name has not been recovered. In the *Onomasticon* (s.v. Agallim) it is placed 8 Roman miles south of Areopolis. C. R. CONDER.

EGLATH-SHELISHYAH (עֵגְלַת שְׁלִישִׁיָּהּ) occurs in an ancient oracle against Moab, which is quoted in Is 15⁵ and Jer 48³⁴. In both these passages RV takes the word to be a proper name, giving in margin the alternative tr^d '[as] an heifer of three years old,' which is AV in Jer 48³⁴ and AVm in Is 15⁵. In the latter passage, AV text omits '[as]'. It is still somewhat uncertain whether the word is an appellative or a proper name, although the latter view has commended itself to the majority of modern scholars (Ewald, Reuss, Graf, Rothstein in Kautzsch's *A.T.* etc.). Delitzsch (*Isaiah*, ad loc.) defends the rendering of AV and Luther, laying stress upon the fact that both in Is and Jer עֵגְלָה occurs asyndetically. He points out that it might be an appellative of Moab (cf.

* Having given 'earnest' as one meaning of 'effectual' when used of prayers, the *Oxf. Eng. Dict.* (s.v.) adds: 'Cf. Anglo-Lat. *effectuose supplicantes* "earnestly entreating," A.D. 1229 in Rymer, I. 308. Perhaps this use was originally due to confusion with *effectual*; but the translators of AV ingeniously availed themselves of it in Ja 5¹⁶ to render Gr. *ἐνεργουμένη*. It is to be observed, however, that AV uses two words, 'effectual fervent,' for this one Gr. word. Tindale's tr. is 'if it be fervent.'

Jer 46²⁰ 50¹¹, Hos 4¹⁶ 10¹¹, in all of which 'heifer' is similarly used), but thinks it more probable that the reference is to Zoar (Is) or Horonaim (Jer) as beautiful, strong, and hitherto unsubdued cities. In Is 15⁵ after Σήγορ (Zoar) LXX has δάμαλις γὰρ ἐστὶν τριετής, referring to Moab. In Jer 48 [Gr. 31]³⁴ the MSS show a perplexing variety of readings (see Swete). B has, after Horonaim, καὶ ἀγγελίαν Σαλασειά. Aq. and Symm., however, had δάμαλις τριετής (see Field).

LITERATURE.—Comm. on Is and Jer; Baudissin in *SK*, 1888, p. 509 ff.; Dietrich in *Merx' Archiv*, I. 342 ff.

J. A. SELBIE.

EGLON (עֵגְלוֹן).—A king of Moab who, upon the relapse of the children of Israel into idolatry after the death of Othniel, was the divine instrument for punishing them. He is represented as forming a confederation with Amalek and Ammon,* and in conjunction with them taking possession of Jericho ('the city of palm trees,' Jg 3¹³).† For eighteen years he ruled over them, till a deliverer arose in the person of Ehud, of the clan of Gera, of the tribe of Benjamin. With the excuse of taking Eglon his tribute (or, perhaps, a present), Ehud with a retinue of servants went to the king's court. The king, we are told, in order that we may understand what is coming, was a very fat man. The present was offered, and the whole party started on their way home again. When they reached the graven images (LXX, Vulg. AVm, RVm), or perhaps graven stones (by some connected with the twelve stones of Jos 4²⁰), or the quarries (AV, RV, following Targ. Syr.),‡ Ehud went back to the king by himself, and, by giving him to believe that he had a secret to communicate to him, obtained an interview with him by himself alone. He was sitting in his cool upper-chamber. Now that he has the king by himself, Ehud claims that his message for the king is from God, upon which Eglon rises out of respect to the source of the message. Ehud then draws his two-edged dagger, taking advantage of his left-handedness, which would enable him to do so without much notice being taken of his act, and stabs E. with such force that the dagger, haft and all, goes into him, while the fat closes upon the blade.§ It is some little time before the murder of E. is discovered, and meanwhile Ehud has escaped and summoned his countrymen to the destruction of the Moabites on the W. of Jordan with such success, that 'the land had rest fourscore years.'

Jos. (*Ant.* v. iv.) makes several additions to, and variations in, the story told in the Book of Judges; that E. built a palace at Jericho; that Ehud also dwelt there, and became familiar with E. by means of his presents, and was beloved by E.'s courtiers. Ehud gathers the Israelites together to destroy Moab almost before his murder of E. is known.

LITERATURE.—For the latest description of the history of Eglon, see Moore, *Judges*, 89 ff. H. A. REDPATH.

EGLON (עֵגְלוֹן).—An ancient town in the Shephelah, close to Lachish. Its king, Debir, joined in the alliance formed by the king of Jerus. against the Isr. under Joshua, and after the battle of Ajalon it was captured and destroyed (Jos 10¹⁻³⁷ 12¹²). It is not again named in Scripture, so that it was prob. utterly destroyed. In LXX, cf. Jos 10, Adullam takes its place by some (prob.) early mistake, they

* This is held to be an exaggeration of D by those who distinguish various hands in this book; see, however, Ps 83⁶⁻⁷, which seems to refer to the period of the Judges.

† The fortifications, at any rate, of Jericho never had been in ruins (cf. Jos 6²⁶ with 1 K 16³⁴), but we are never told that the ruins left from the burning of Jericho were pulled down.

‡ The notion that they were boundary stones or images scarcely deserves mention.

§ For the meaning of the last clause of verse 22 see Moore, pp. 97, 98.

are in consequence identified in the *Onomasticon*. The name remains in 'Ajlân, some 15 miles N.E. from Gaza and 2 miles N. of Tell Hesy, now conclusively identified with the ancient Lachish. But Flinders Petrie (*PEFSt*, 1890, pp. 161-163) points out *Tell Nejileh* as probably the true site. *Khärbet 'Ajlân* his practised eye pronounced unlikely to be the site of an ancient town. On the other hand, 'it is certain,' he says, 'that Tell Hesy and subordinately *Tell Nejileh* must have been positions of first-rate importance from the time of the earliest settlements; they would then agree to the character of Lachish and Eglon. The history of *Tell Hesy* begins about B.C. 1500, and ends about B.C. 500; while *Tell Nejileh*, as far as can be seen on the surface, is of the same age, or ruined even earlier.' 'There are no sites in the country around so suited to the importance of Lachish and Eglon as these two Tells.' To this may be added, that the course of Joshua (ch. 10) brought him first to Lachish—Eglon lying between Lachish and Hebron; and the position of *Tell Nejileh* suits this account better than that of 'Ajlân. See LACHISH.

i. NAME.—The name by which the Egyptians at all times designated their country was *Kimēt* (Copt. *ΚΗΜΕ, ΧΗΜΙ*), a word of which the probable etymology—root *km* 'black'—would confirm the statements of Herodotus and Plutarch, who connect it with the dark colour of the soil. The contrasting redness of the neighbouring desert sand gave to that the name of 'the Red Land.' It is phonetically impossible to connect *Kimēt* with the name *Ham* (𐤇𐤍). To the Semites the country was known as *Mizraim* (מִצְרַיִם, seldom מִצְרַיִם, *Μεσσηραϊμ, Μεσσηραϊμ*), the termination here being no doubt locative and not a dual. The older cuneiform texts vocalize *Muṣr*, the later *Miṣr*; the Amarna letters have generally *Miṣri*, *pl.** For this word a favourite though undemonstrable derivation is that from *קצר* 'fort.' The Greek name *Αἴγυπτος* (Arab. *Kibṭ*, Eth. *Gebṣ*, and European *Copt*) is of equally obscure origin. It cannot be satisfactorily derived from any Egyptian or Semitic word or combination of words. In the earliest Greek writers (*Odyssey* generally) it is the name of the river, for which *Νεῖλος* (cf. נַיִל, נַיִל?) is first found in Hesiod. In the later epochs and in poetical texts we meet with many other names for Egypt. Of such *ἔμρι* is among the most frequent, and seems connected specially with Lower Egypt and the inundation. 'The Land of the Sycamore,' 'of the Olive,' 'of the Sacred Eye,' are names which require for their explanation a greater knowledge of the geographical myths than we possess.

ii. PHYSICAL CHARACTER.—The geological con-

* According to W. Max Müller (*Z. Ass.* viii. 209), *Muṣr*, whence *Shalmaneser* II. received presents, was Egypt, not a N. Syrian or Armenian district (Winckler, Hommel, etc.). Winckler has suggested (*Alt. For.* 24 ff.) that another *Muṣri*, which he locates in Edom or Sinai, may have been the real origin of the Exodus tradition, reminiscences of wanderings in that district having got confused with the name of Egypt. In S. Arabian inscriptions this *Muṣri* and Egypt are distinguished as *מִצְרַיִם* and *מִצְרַיִם* (Hommel in *Festschrift f. Ebers*, 27).

stitution of Egypt is simple; its elements are three—the bed of rock (limestone for the most part, with sandstone and granite in the S.), which stretches across the N.E. corner of Africa; then the sand which lies upon this, and extends from the Arabian desert hills on the E. to the Libyan range on the W.; lastly, the black Nile mud, resting upon the sand in the centre of the valley, and forming the highroad for the great stream on which the prosperity of the country depends. The number and dimensions of the buildings erected at all periods gave a high importance to the geological elements of the country. The limestone obtained near Memphis (*Turrah*) furnished the material for the principal works of the early periods. The great temples higher up the valley, especially those of Thebes, are built of sandstone, conveniently obtainable at *Silsileh*. Red granite for statues, sarcophagi, etc., was worked at the first Cataract (*Aswân*); black granite and diorite for similar purposes came from the eastern desert (*Hammâmât*). Alabaster, a favourite material, usually for smaller objects, was quarried opposite *Dahshûr*, or (a better quality) at *Htnb*, near *Beni-Hasan*, whence it was extracted under the earliest Dynasties. In metals the Nile valley itself is poor; those most valued come from abroad,—gold in plenty from Nubia or the eastern desert; silver, which was rarer, probably from Cilicia; copper from Sinai, later also from Cyprus; malachite and lapis lazuli from Sinai and Mesopotamia. Bronze, familiar during all later epochs, was made with tin, the provenance of which is uncertain, but which was already used under the 6th Dynasty. Nor can we tell whence iron, well known at any rate from about 800 B.C., was obtained, though a limited amount could be got from the western desert.

The course of the Nile through Nubia is hindered by a succession of rocky barriers, the last or northernmost of which—the first Cataract—has often been the political as it is the natural frontier of Egypt. Between the Cataracts and the Delta the country is of a very uniform character. The valley is extensive or narrow as the two hill-ranges recede from or approach the stream. Its breadth varies from about nine to four miles. As the river progresses northward, the hills gradually fall back and the valley expands into the plain of the Delta, across which the river makes its way by various channels to the Mediterranean. Although the surface-denudation recognizable at certain points of the river's course and the petrified forests still extant testify to very different climatic conditions at a remote geological period, it is unlikely that during the five or six thousand years of historic Egypt there has been much change in the aspect of the country. By the opening of that period the valley had been dried, the river-bed raised, and the stream's course fixed practically to its actual extent, though the number of its mouths was greater than it is to-day.

History is concerned during the earlier periods almost exclusively with the upper valley; the Delta was evidently still but partially reclaimed, though certain towns there are already met with in the myths and in the earliest history. Physical contrasts are coincident with that division into Upper and Lower Egypt which we find an established fact of the remotest historic times; already the two kingdoms—for such undoubtedly they once had been—are united, each, however, retaining its own tutelary deity, and its independent capital, *Nḥb* (El-Kab) and *Buto*.

Beyond this twofold partition, Egypt appears from the earliest times subdivided into a number (about 22 in south and north respectively) of smaller districts (*nomes*, from *νομός*), which become later the basis of an administrative system, but

which originated probably in the vaguely defined settlements of different tribes. The lists of the nomes are our chief source of topographical knowledge; but no full lists are preserved from early periods, although several most ancient documents (tomb of *Mtn*, Pyramid texts) mention a few of the nomes. In the later lists each nome is personified by its guardian deity, fetish, or emblem, which serves as a kind of coat-of-arms. A nome was held to be composed of four elements: (1) the metropolis, the seat of the tribal religion and residence of the chief; (2) the cultivated land; (3) the canals by which the fields were fed with river-water; (4) the marshes which, rarely cultivable, served as a hunting-ground for the local nobles. The hieroglyphic , which expressed one of the words for 'nome,' is a testimony to some primitive irrigation system, representing as it does a canal-divided field, and the founder of the 1st Dynasty is credited with the construction of the great dyke which still protects the province of Gizeh from a too extensive inundation, while his successors had all to occupy themselves with the regulation of the water, the cutting of canals, and the satisfaction of local claims upon the benefits of proximity to the river itself. Variations in the annual height of the inundation were no doubt carefully observed in the remotest ages; we know that they were recorded in the Cataract district by the kings of the 12th Dynasty, and at Karnak in later times.

The Nile is not only the great fertilizer; it is also, now as formerly, the main highway. We hear relatively little of journeys by road; locomotion was normally by water, either upon the river or upon the subsidiary canals. The commonest words for journeying implied the idea of sailing up or down stream. The dead were drawn to their rock-cut tombs on boat-formed cars; the solar gods were thought to traverse the sky in a divine bark. Such roads as we do hear of are chiefly those leading from the Nile across the desert—eastwards (from Coptos) to the Red Sea, westwards to the Natron Lakes, or southwards into the Soudan.

iii. FAUNA.—The bones of sacrificial animals from various periods, and countless animal mummies from the base epochs, might, if carefully preserved and located, teach much as to the ultimate homes of several species, while an extensive knowledge of both the domesticated and wild animals might be had from the frescoes of the tombs—especially those of the Middle Kingdom. Each animal is there accompanied by its name, though it is often difficult to find for these their modern equivalents. For the earliest times the hieroglyphic signs themselves would supply a considerable list, giving evidence that the species then known have since changed little. The lion is frequently depicted, though probably seldom met with until the desert had been reached. The lion hunts recorded in the New Kingdom refer mainly to Syria or Nubia, though Thutmosis IV. hunted lions in the neighbourhood of Memphis. Leopards (or panthers?) seem to have been seen in the south; elephants and giraffes were not unknown to those who traded on the Upper Nile; jackals, then as now, were very familiar; desert wolves and hyænas somewhat less so; many kinds of antelopes were well known. The hippopotamus, once commonly met in the river and hunted in the swamps, has by now been driven far up the Nile. Of oxen various breeds were kept; the familiar long-horned species existed until the plague in the middle of the present century. Oxen are often represented ploughing or threshing. Certain varieties, or rather individual members of certain varieties, distinguished by peculiar, carefully sought mark-

ings, were held sacred from the earliest times—Apis at Memphis, Mnevis at Heliopolis, Bacis at Hermonthis. Sheep were no doubt kept, but occur rarely on the monuments. Varieties of the long- and the spiral-horned ram were sacred. The ass was the usual beast of burden, and was not rivalled by the camel till a very late date. It will be remembered that in Gn 12¹⁶ (Abraham and Pharaoh) and Ex 9³ (Moses) camels are nevertheless mentioned—both by J—as if known in Egypt. The horse is likewise unknown in the older epochs; as it appears first after the Hyksos period, it is assumed to have been introduced by those invaders. The reference to Egyptian horse-breeding in 1 K 10²⁸ should more probably be applied to some Asiatic country (Winckler, *Alt. Unt.* 173 A). The Egyptian name for the horse meant properly 'a pair,' and was due probably to its first employment in the war-chariot. Foreign names, among them Semit. *ḥs*, once borrowed, became even more usual. The horse appears to have been seldom ridden. Several breeds of dogs were known; some were valued for the chase. The names of some breeds are preserved, and show that certain Libyan (or Nubian?) varieties were popular. The cat, sacred to the goddess *B'sst*, was larger in ancient than in modern Egypt. It figures in a very ancient solar myth (*Book of the Dead*, ch. 17). The pig, except for its mention in the sacred books, is not met with until late times. Of birds a great number are depicted—geese, ducks, herons of many sorts; migratory birds, e.g. swallows, plovers, quails. Eagle, vulture, hawk, and owl are among the most constantly recurring hieroglyphics, while the vulture, hawk, and ibis were sacred to prominent divinities, and were embalmed in numbers (in the base epochs) in the localities of which those divinities were the patrons. It is remarkable that, though hen-breeding is universal in Egypt to-day, that bird was apparently unknown to the ancients. Of the larger reptiles the most important was the crocodile, now no longer to be met with below the Cataracts. There is a variety of snakes, the best known being the *uraeus*, emblem of the patron-goddess of Lower Egypt and hence of the king, and the horned viper. From the importance and frequency in the earliest religious literature of charms against large snakes, it may be inferred that their numbers and dimensions were once greater than they are at present.

The texts show us several insects, notably the *scarabæus*-beetle, regarded, especially in later times, as a symbol of eternity and of the sun-god, and the bee, associated in writing from the remotest times with royalty in Lower Egypt.

Fish are often represented. The most peculiar is the *oxyrrhynchus*, the badge of the 19th nome of Upper Egypt. Fish were much eaten; some of the oldest frescoes depict them speared in the marshes, landed in drag-nets, and then split for drying; while texts equally ancient tell of the construction of fish-ponds.

iv. FLORA.—Egypt is remarkably poor in variety of vegetation. Many of the cultivated plants most common now—cotton, sugar, rice—are modern importations.

In prehistoric ages the valley was no doubt considerably wooded; but to-day, with the exception of the various palm species, trees occur only singly or in small groups. The representations of the flora—of trees especially—in the frescoes, carvings, or hieroglyphics are generally too far conventionalized to be instructive. More can be learned from extant remains of edible grains or funerary floral wreaths (from the New Kingdom onwards), or of woodwork (from all periods). From these it is clear that the native vegetation has altered very little during the course of history. The Egyptians

were at all times ill off for workable woods, and were compelled—where the stalks of river plants would not serve—to make the best of their own sycamore or acacia (the latter especially in the older epochs), or to import yew from Cilicia (?) and ebony from Nubia. More than one Pharaoh of the New Kingdom brought specimens of trees and vegetables from Syria or the Red Sea coasts, either as curiosities or with a view to their propagation. From the nature of the soil, agriculture must always have been the main occupation of the population, and we learn from the monuments the names of several cereals, of which wheat and barley were the commonest, dhurah being well known since the New Kingdom. Gardens were laid out, and much interest was shown in them since the 4th Dynasty. Many vegetables are represented in the frescoes and as hieroglyphic signs, especially the bulbous sorts—onions, leeks, etc. (cf. Nu xi. 5). The vine was always largely cultivated, and from the Delta came several famous wines of Greek and Roman times. The fig, too, is early represented. Many plants were valued medicinally, as can be shown from the numbers occurring in the medical works, notably in the Papyrus Ebers; others were used for dyeing. The most important of all plants to the Egyptians was the papyrus, which, unknown now in the Delta, grew there once in vast thickets where the nobles hunted, and whence was obtained the material, not only for writing, but also for numerous other purposes, decorative and useful. As the papyrus became one of the pictorial emblems of Lower Egypt, so the lotus was often that of the southern country, although a sort of water-reed seems also to have been so employed.

v. ETHNOLOGY.—The problem of the origin and relationships of the Egyptian race is still unsolved. Its solution is to be sought in the evidence of (1) philology; (2) mythology; (3) physical anthropology; and (4) material culture. Investigations in these various fields have hitherto given results partially discordant. (1) The most ancient linguistic documents point to an undeniable though already very remote relationship with the Semitic languages (see below). (2) The divinities and myths familiar to the earliest texts were, until recently, accepted as growths of the Egyptian soil, the inclination being to recognize in extraneous elements, if any, the influence of neighbouring African races. Hommel indeed invites us to take other considerations into account by pointing out certain coincidences between the ancient religions of Egypt and Babylonia. (3) Racial types, as depicted on the monuments, and the measurements, etc., of mummies, have led to no uniform results. Formerly, anthropologists saw in the sculptures and paintings one race, identical with the Copts of to-day; now they generally discern various types among the most ancient portraits, and seek on such evidence to distinguish at least two races. Few mummies remain from the oldest epochs—one of the most ancient is that from Medûm, at present in the Royal College of Surgeons, London,—and those from later times point apparently to a short-skulled, while the modern Egyptian is of a long-skulled type. Probably the oldest group of remains (from Abydos, 1895–96) seems to point to a long-skulled, orthognathous, smooth-haired race; but the type there is not homogeneous, neither is that of the Medûm mummies, and their relationship to the race of historic Egypt is not yet clear. (4) There is certainly evidence of African elements, whether due to primitive kinship or to mere proximity, in some branches of the material civilization, such as dress, weapons, possibly circumcision. On the other hand, Hommel seeks to show that a very early form of religious or sepulchral architecture (pyra-

mid) is derived from Babylonia. It must be owned that the oldest remains of Mesopotamian civilization appear to exceed in antiquity any hitherto brought to light in Egypt.

Most are agreed that, whatever be the case with their forerunners, the Egyptians from the 3rd or 4th Dynasty onwards were not a negroid race; that they came, on the contrary, from Asia. But the questions of their previous home there and the route by which they reached the Nile,—whether by Bab el-Mandeb and Abyssinia or the Wady Hammâmât and Coptos, or by the Syrian desert and the Isthmus,—are as yet unanswered. The route S. Arabia-Hammâmât-Coptos has for it the evidence (a) of prehistoric remains at Coptos, pointing to a people coming direct from the Red Sea; (b) of certain facts—physical resemblance, peaceful relations, and the apparently reverential attitude of the Egyptians—which have been held to point to *Punt*, i.e. the country about the southern end of the Red Sea, as a former home of the race. To this may be added the tradition that the founders of the monarchy came from Thinis, a town not far distant from Coptos—a tradition which has been confirmed by the recent discovery of the First Dynasty tombs in the same neighbourhood (Abydos). No reminiscence has been discerned in the literature of a prehistoric immigration. The people apparently considered themselves aborigenes, and called themselves merely *Rôme(t)*, 'men' *par excellence*. Traces of a stone age, undeniable though complicated by the long historic survival of flint-working, show that the country has been inhabited since the Pliocene period. Palaeolithic remains are rare, but some half-dozen stations are said to have been recognized. Considerable evidence has been adduced (though contested) to demonstrate a New Stone age. That a Hebrew writer of the 6th or 7th cent. speaks (Gn 10⁶) of Mizraim as related to Cush (Ethiopia), Put (S. Arabia, *Punt*), and Canaan, is not a fact of much ethnological importance. By the earlier annalist (*ib.*¹²¹) eight names—mostly unidentifiable—are given which may preserve a then current Hebrew view of Egypt's ethnological relationships.

vi. LANGUAGE.—The relative position of the Egyptian language among its neighbours is a question closely associated with that as to the racial connexions of the people. Our means of comparison with the surrounding idioms are not of equal value. For the Semitic languages—for the Mesopotamian dialects at least—we have documents perhaps as ancient as any from Egypt. For the Berber and Cushite languages of Africa we can but infer from quite modern evidence the linguistic conditions of earlier ages; and in this important field, therefore, little has as yet been attempted.

The Egyptian language, together with certain languages of Barbary, Nubia, and Abyssinia, used to be regarded as forming one of the distinct main divisions of human speech; now it is clear that this isolating classification cannot be justified. The group is not independent. Since Benfey's attempt to demonstrate the affinity of the Egyptian and Semitic languages, his main contention has received increasing confirmation, until it is no longer possible to deny an originally very close relationship—collateral rather than filial—between the proto-Hamitic and proto-Semitic groups. The affinity is specially prominent in grammatical features common to both. Of these the principal are—(1) the same gender-endings, masc. *w*, fem. *t*; (2) an all but identical series of pronominal suffixes; (3) the use in both of a peculiar adjectival termination, 'nisbeh'; (4) identity in four or five of the numerals; (5) analogous treatment of the weak

verb and derivatives; (6) the identity of an old form of Egyp. verbal flexion and the Sem. perfect; (7) verbal nouns with prefixed *m*; (8) the importance of a single accent-vowel in each word or syntactical group, and the resultant 'construct' state of the remaining vowels. There is, moreover, to be noted the correspondence between the Sem. and Egyp. consonants, extending to some fifteen undoubted equations (which embrace the important series *x, y, 'y*); also two or three more which are almost certain.* Further, the same lack of any written representatives of the vowels. In the vocabulary the case for Sem. affinity is less strong. The number of Egyp. roots for which correspondents can reasonably be claimed in any Sem. dialect is small; the large Sem. element in the language of the New Kingdom owes its presence, not to any primitive relationship, but merely to the political circumstances of the time. The bulk of Egyp. roots is of a decidedly non-Sem. type. One of the most distinctive features of the Sem. languages—the preponderance of trilateral roots—is, at any rate, not paralleled, even in the oldest Egyptian documents, though it has been suggested that the divergence here is due to early phonetic degeneration. Hommel offers another explanation of the facts. By the aid of certain very potent phonetic laws he institutes comparisons between a number of Egyp. and Sumerian words, the latter being, in his view, an import dating from the prehistoric (Semitic) immigration from Mesopotamia. It is a question of at least equal difficulty how large a proportion of the roots should be regarded as of African, *i.e.* negroid, origin, and so as vestiges of a still remoter, pre-Semitic period, during which the valley was peopled by an African race, part of whose linguistic stock was subsequently amalgamated with that of the invading Asiatics.

If it were possible to trace with certainty the genealogy of the hieroglyphic script, we might expect to find ourselves nearer the birthplace of the language. Hommel's theories do not ignore this problem; the hieroglyphics came, he holds, like the rest of the intellectual equipment of the Egyptians, from Mesopotamia. If this were true of the script as a whole, it would nevertheless be obvious that many of the signs had their origin in Africa; they represent natural objects, to be met with only there. Be this as it may, it is evident that the Babylonian and Egyptian systems had, for ages before we first meet with them, followed widely divergent lines of development. The former, influenced by the nature of its writing materials, had lost almost entirely the pictorial character which the latter, on the contrary, retained from the beginning to the end of historic times. A conventionalizing, abbreviating tendency was, of course, inevitable if a script so ponderous was to be put to any but occasional decorative uses. But the abbreviated forms—first the 'hieratic,' later the 'demotic' script—grew and found employment side by side with their prototypes, the hieroglyphics, which to the end were alone held suitable for sacred literature or ornamental inscriptions.

The signs in general employment during the classical period—the Middle and earlier New Kingdoms—are estimated at about 500; some

* The following are the conventional transcriptions used in this article (see *Aeg. Zeitschr.* xxxiv. 61 and *ZDMG* xlvii. 727).

1. Ascertained equations: \aleph , \beth , π , h , ι , ω , η , h , ζ , h , ι , κ , λ , γ , τ , σ , m , n , ν , ρ , ρ , κ , η , t ; 2. doubtful: \jmath , ζ , g , ι , t , σ , d , σ , t , ν , δ , ψ , s (the values of the sibilants, of course, particularly uncertain). The Egyp. f and a form of h are without Semitic equivalents. Y and i represent secondary forms of ι .

from the older epochs had then fallen into disuse, many employed later had not yet appeared.

The signs are pictures of material objects—natural and artificial,—or of parts of such objects. Primarily, each sign must have had for its phonetic value merely the name of the object depicted. But since no provision was thus made for expressing abstract ideas or the grammatical needs of the language, a secondary use of the signs had been developed, and abstractions were expressed by the same signs as those material objects of which the names contained the identical consonants. For example, \curvearrowright is the picture of a 'rib,' written by the consonants *spr*; the verb 'reach' is also spelt *spr*; it, too, is therefore written with the sign \curvearrowright . Besides such signs as these, capable unassisted of expressing complete words, there are many with only the value of single syllables (*i.e.* consonant + vowel + consonant). These are, no doubt, primitive word-signs which have lost their original function, and so become available as pure phonetics for the writing of longer words. A still remoter stage of the language is recalled by the 24 signs called by us the 'alphabet,' and reduced from the representation of 24 monosyllabic words (? consonant + vowel) to that of 24 consonants, the initials of those forgotten words. To these three phonetic elements is to be added one purely ideographic and complementary. To avoid ambiguities certain signs, 'determinatives,' are added, as in Babylonian and Chinese, to phonetically written words in order to indicate the class of ideas to which such words refer. Thus, dignity or age would be followed by the figure of an old man, strength or power by that of an armed hand, literature or learning by that of a papyrus roll. The absence of written vowels leaves us ignorant of the correct pronunciation of Egyptian words; our only guides are the transcriptions in vocalized foreign languages—cuneiform or Greek,—or in Coptic, which is but the youngest stage of Egyptian, expressed in the Greek alphabet. Yet by these aids we merely approximate to the vocalization of the later epochs; for that of the Old Kingdom we have no guide. The Egyptians themselves did indeed, during the period of their intimacy with Asia (18th and following Dynasties), feel the need of some system of vowel-transcription, and they naturally took as their model the cuneiform syllabary, already in common use in Syria. The vowels which under this influence they aimed at representing were *a, i, and u*, and for their hieroglyphic representation the signs for three approximate weak consonants were selected. Similar necessities were met at later periods (the Persian, Ptolemaic, and Roman supremacies) by similar means, though during these the elements of the ancient hieroglyphic system were speedily losing their original values, and complete irregularity already reigned in the transcription of foreign consonants as well as vowels.

vii. CHRONOLOGY.—Many of the problems involved in this subject still await satisfactory solution. Astronomical calculations combined with the monumental evidence have doubtless done much already to fix the dates of later epochs; but beyond the age of the New Kingdom it seems impossible to find unanimous acceptance for more than approximate dates. Much obscurity still prevails as to the eras and methods employed by the Egyptians in their calculations.

A. The available Egyptian documents are—(1) The lists of kings inscribed in temples or private tombs. The three most important (at Abydos, Karnak, Sakkara) date from Dynasties 18 and 19, and give the names of 76, 61, and 47 kings respectively. Tombs and MSS of the same period have preserved shorter lists. In such lists the sequence of names

is not always correct, nor is more than a selection (political or ritualistic?) from the full series of past kings given. They supply no data as to length of reign. (2) The lists in a dilapidated papyrus of the Ramesside period at Turin, which probably enumerated when complete all kings from the 1st to the Hyksos Dynasty. (3) Dates are found in, or can be reckoned from, the annals inscribed in the temples by certain kings, or incidentally in the tombs of private persons. This is the most reliable class of document, and the records in private tombs are the sole contemporary source for a chronology of the early Dynasties.

B. Of Greek writers, by far the most important is Manetho, a native priest, c. B.C. 250, whose works are known only by the excerpts preserved by Josephus, Africanus, and Eusebius, or by the medium of still later chronologists. We are ignorant of the sources upon which his *Alyvrriaká* was based; presumably, he had at his disposal documents far fuller and more reliable than any now available, though his chronology of the remoter periods can be proved much at fault. Nor can we judge how far he manipulated his authorities to suit his own views; and it is, moreover, probable that his Jewish and Christian abbreviators had their own systems to harmonize with his statements. The misfortunes inevitable in the long transmission of such writings must also be considered in estimating their present value. The lists appended to Manetho's history divided the Egyptian kings into 31 Dynasties. The grounds for such divisions are often difficult to appreciate; they do not always coincide with the divisions in the Turin papyrus. The lists compiled by Eratosthenes, B.C. 275-194, in which pretended Greek interpretations of the royal names are given, contain in reality many words which are but inaccurate transcriptions of titles, formulæ, etc., which accompanied the names.

Many scholars have occupied themselves with these Greek chronologists. Böckh sought to demonstrate an astronomical era as the basis of Manetho's calculations. Lepsius appealed to the 'Sothis' book, — a Christian forgery, — which ascribed 3555 years as total duration to the Egyptian monarchy; while, according to Unger, Manetho's system gave 5613 as the date of its foundation. Brugsch has attempted reckoning from the basis of average length of generations and reigns, and thus arrives at 4400 for the same event. Ed. Meyer lays stress chiefly on data as to length of reigns actually recorded on the monuments, and has thus constructed a series of 'minimum dates,' i.e. dates below which, at any rate, the various periods could not be brought down; but C. Torr has since re-examined the monuments with the result of a possible further reduction of Meyer's figures.

The most important assistance towards the establishment of indisputable dates is derived from astronomical calculations, based on the following ascertained facts as to the Egyptian calendar. The Egyptians did not use a leap year. Consequently in every four years a day was lost, and in 1460 years these losses had resulted in a complete shift of all the nominal months throughout the seasonal year. An absolute method of reckoning could, however, be obtained by observing the variation in the sun's position. This variation was gauged by the first visible (heliacal) rising of Sothis (Sirius), an event which coincided with the beginning of the Inundation. When the 'natural' years, reckoned from this point, amount to 1460, that total is therefore called a Sothis period. The natural or Sothic year was probably of importance to the Egyptians only for agricultural and ritualistic calculations; but to us it is of great value. For the known fact that a

Sothis period began in A.D. 139 enables us to fix its previous occurrences in B.C. 1322, 2784, 4242, etc. With these points for a basis, and taking into consideration the recorded Sothis risings under kings *Mrenpth* (Merenptah) and Amenophis I., Ed. Mahler fixes the reign of Thutmosis III. at 1503-1449. He has, indeed, also calculated exact dates for the remainder of the 18th and 19th Dynasties; but results drawn from documents still often disputable cannot be relied on. To such astronomical dates Flinders Petrie has contributed 3410 as the probable commencement of the 6th Dynasty. The following are selected dates, from those provisionally adopted by Petrie,* Ed. Meyer, Mahler, and Steindorff (in 'Baedeker,' 1897):—

Dynasty.	Petrie. B.C.	Meyer. B.C.	
I.	4777	3180	
IV.	3993	2830	
VI.	3410	2530	
XI.	2985		
XII.	2778	2130	
XIII.	2565	1930	Mahler.
XVIII.	1587	1530	1575
XIX.	1327	1320	
XX.			1240
XXI.	1089	1060	
XXII.		930	
XXV.		728	
XXVI.		663	
XXVII.		525	Steindorff.
XXX.			382
Macedonians.			332
Romans.			30

viii. HISTORY.—Modern historians conveniently partition Manetho's series of 31 Dynasties into the following groups: (a) *the Old Kingdom*, Dyns. i.-vi.; (b) *the Middle Kingdom*, Dyns. xi.-xiii.; (c) *the New Kingdom*, Dyns. xviii.-xx.; (d) *the Foreign Dominion*, Dyns. xxii.-xxv.; (e) *the Restoration*, Dyn. xxvi.; (f) *the Persian Supremacy*, Dyn. xxxi. Between these lie obscure, disturbed periods, not assignable to any of the more distinctly defined groups.

(a) *The Old Kingdom*.—Although nothing is known of the history of the earliest Pharaohs, the tombs of the 1st and 2nd Dynasties have lately been discovered at Abydos (Om el-Ja'ab), the legendary cradle, it will be remembered, of the monarchy. Unfamiliar royal names of the same remote age have come to light somewhat farther south (Negadeh);† while the so-called 'New Race' cemetery—the remains of a very rude stage of culture—in the latter locality, is regarded as dating from at least as distant a period. In Greek times legends could still be collected, attributing to some of these early kings notable achievements, such as the first damming of the river, the establishment of a certain divine cult, or the regulation of succession to the throne; to others, some memorable experience—a devastating plague, or an earthquake.

It is to be remembered that, while the first historic Dynasty and that of demigods which preceded it are said to be native to Upper Egypt, the legends of the still remoter Dynasty of gods are localized in the North; the great gods were at home first in Heliopolis and the Delta. This may point, it is said, to a racial contrast which, however strong at first, was early obliterated. One of

* So far as yet published; see *History*, vols. I. ii.; Meyer's are the minimum dates referred to above.

† See *Eg. Zeitschr.* xxxv. 1 ff.

the prehistoric races had occupied districts about the river's mouth; another—that, perhaps, to which the rude monuments at Coptos are due—had arrived in the upper valley, and one of its chiefs, attaining, we may suppose, at Abydos, or more properly Thinis, to a position of supremacy, had been able to extend thence his power down the river, settling near the later Memphis, subduing or absorbing the Delta tribes, and finally identifying himself with the religion of the district which became thenceforth the state religion of the nation. Relics of a possibly pre-dynastic monarchy can be traced in archaic survivals in the titles, functions, dress, etc., of the later kings; but of the people ruled by these primitive Pharaohs, or of the limits of their domains, little can as yet be said. Interments, flints, pottery, regarded by some as prehistoric, are by others assigned to far later ages.

History properly so called opens with Dyn. 3. Yet here still we have knowledge of only one or two out of half a dozen kings. Some fragments on which the name of *Nbk* (Nebka) occurs are held to belong to his time; *Dsr* (Zezer), his successor, in all probability built (possibly usurped) the step-pyramid of Sakkara. He was a monarch of some power, for he extended his activity to the mines of Sinai, where his name is found, and his cult was revived at quite a late epoch. The Dynasty closes (or the next begins) with a better known king, *Snfrw*-Soris, whose name survives on numerous monuments, the most important being his pyramid-tomb at Medûm. He, too, exploited the Sinaïtic copper, not, however, as his inscriptions there show, until he had crushed the hostile nomads of the neighbourhood. The tombs of several of his nobles are extant in the cemeteries of Abusir, Dahshur, and Medûm. The 4th Dynasty has left a memorial more indelible than that of any that followed it; for the successors of Soris built as their tombs the three great pyramids of Gizeh. Their relationships to Soris and to one another are uncertain. Some close blood connexion can be argued from genealogies in contemporary tombs and from later tradition. *Hufw*-Cheops, *Hfr*-Chephren, and *Mnk'wr*-Mykerinus appear to have spent their energies chiefly on the construction of their pyramids. With this object they brought granite from Aswân and alabaster from quarries near Tel el-Amarna. Cheops, however, continued the work in Sinai, and built in the Delta (Tideh and Bubastis). Indeed we learn from the inscriptions of *Mn* (Methen), a magnate of the time, that the Delta was already, at any rate in part, reclaimed and worked for the crown by great functionaries. Of the remaining three or four kings of the Dynasty, one at least is known to have built a pyramid. The great Sphinx is usually attributed to this period, though it possibly belongs to a considerably later age. The relative scarcity of remains of the 4th Dynasty probably points to the small development of the custom of building monumental tombs.

Tradition regarded the 5th Dynasty as a new family, possibly as one of usurpers. One legend—probably not without interested motives—ascribes to it an origin half-priestly, half-divine, and places its home in the neighbourhood of Heliopolis; elsewhere it is called native to Elephantine. The Dynasty consisted of some nine kings, mostly little more now than names; for we know of no achievements more remarkable than work in the mines of Sinai or Hammâmât and a trading expedition down the coasts of the Red Sea. The pyramids of all but one of the kings are identified—mostly at Abusir. That of *Wnis*-Onnos, the last of the Dynasty, is at Sakkara, and, though smaller than most tombs of its class, is to us of much greater importance than

the gigantic but barren erections of earlier reigns; for in it are inscribed the most ancient texts of all Egyptian literature (see below).

The 6th Dynasty, in its widespread activity abroad and at home, is a strong contrast to its forerunner. Inscriptions of its kings meet us in all parts of Upper and Lower Egypt, as well as in Sinai and the desert quarries. And now, moreover, we may read in the earliest of narrative inscriptions—those of *Wni* (Una) and *Hrbw*f (Herkhuf), the generals and ambassadors of kings *Ppy* (Pepe) I. and *Mrrr'* (Merenera)—of expeditions against both the Syrian and Nubian barbarians. These resulted, indeed, in little but booty and conciliatory presents from the tribes over whom a temporary victory could probably be achieved with little trouble, by the (at least partially) disciplined troops of Egypt. One of the latter kings of this Dynasty, *Ppy* II., sat longer on the throne than any monarch in the world's history; native and Greek documents assign him a reign of over 90 years.

We know not under what circumstances the 6th Dynasty had reached the throne,—whether through some blood claim or by violence,—nor do we know amidst what events its rule closed. Evidently, however, it had no peaceful end. The last of its kings are but empty names, and indeed in the latter years of *Ppy* II. complete obscurity surrounds the political and social existence of Egypt. When, some two or three centuries later, that obscurity is dissipated, the country has assumed a new face, the capital is no longer at Memphis, the centre of gravity is several hundred miles farther south.

The outward characteristics of the Egyptian polity show little change under the 3rd, 4th, and 5th Dynasties. The southern and northern kingdoms, bound together, it has been said, in a sort of personal union, each retains to some extent its separate organization, although important offices, once proper to one or other of them, are often found united in the hands of a single functionary, just as the official nomenclature of the Pharaoh combined the royal titles of both South and North. The king is omnipotent; his ministers—a mere bureaucracy—are members of the royal house or of the great territorial families. The ancient division of the country into nomes forms the basis of an elaborate financial and judicial administration, yet controlled by the court through officials dependent on the central government, by whom the royal dues are collected and legal questions settled independently of the local authorities. But as time goes on, and (as we may infer) weak rulers succeed the strong, the old provincial independence reasserts itself, and the nomarchs begin to move beneath the weight of central despotism. One of the first signs of this decentralizing tendency is the growth of the custom of burial, now no longer at Memphis, beside the king, but at home, in the cemeteries of the provincial capitals, at Akhmim, Abydos, Thebes, Elephantine, and elsewhere. The court of the monarch was modelled upon that of the king; its officials grew in number, its militia in strength. The kings of the 6th Dynasty are left surrounded only by courtiers and placemen; the magnates seem to have withdrawn, and to be ready, when opportunity offers, to reassert the primitive independence of their position.

The period between the 6th and the 11th Dynasties is one of the most obscure in Egypt's history; yet the complete dearth of monuments can scarcely be fortuitous. Manetho localizes the 7th and 8th Dynasties still at Memphis, and we may indeed suppose that there was no sudden break with the past. The provincial nobles could only gradually assert their strength, and the Pharaohs still

reigned, at least nominally, in their ancient capital. But of these kings we know nothing, scarcely their names. Possibly they were, in later times, regarded as usurpers. Genealogies in certain tombs (El-Bersheh) appear to reach back to their times, and show how the nomarchs already flourished. The succeeding Dynasties, the 9th and 10th, would be equally unknown were it not for the inscriptions of Siut, whose princes record their participation in the struggle of the petty Dynasty of Heracleopolis (Ahnas) against 'the South.' The 9th and 10th Dynasties are indeed currently ascribed to Heracleopolis, while subsequent events make it evident that by 'the South' is here meant the principality of Thebes. That town had been the seat of a noble family under the 6th Dynasty; and while the royal power had grown weak, the Theban nomarchs had nursed their strength, till at length, having overcome the Heracleopolites, they by degrees re-established unity and order.

(b) *The Middle Kingdom.*—The claims of these first Theban Pharaohs—the 11th Dynasty—to be the legitimate successors of the Memphite kings were recognized in their own and future generations. Their number and sequence is not clear. They bear alternately the names *Mntwhtp* (Mentuhotep) and *Intf* (Intef), though it is pretty certain this does not imply the undisturbed succession of one family. The royal honours were not attained by the first member of the series, who bears merely the title of nomarch; the kingly titles are assumed by his successors. One at least of them—*Mntwhtp* III.—had a long reign, and left evidence of his power from the Cataracts to the Delta. Another records a trading expedition on the Red Sea as well as quarrying work in the eastern desert.

Whether the 12th Dynasty succeeded the 11th without disturbance is not certain. It gave to Egypt seven of the most active, powerful, and long-lived of her kings, and seems in every sense to have been worthy of the admiration bestowed on it in after ages. To *Imnmht*-Amenemes I. fell the task of completing the work of union and pacification initiated by his predecessors. The magnates of Middle Egypt (Beni-Hasan) have recorded his intervention to settle local disputes as to territory on the basis of former arrangements, and to confirm his faithful vassals in their possessions. Elsewhere we read of revolts suppressed and of conquests abroad. Indeed, Egypt had now for the first time a royal house whose aspiration it was to extend the frontiers of their dominions. It is true that booty or tribute were still the chief inducements to war; but the campaigns were now upon a larger scale, the enemies attacked more distant, and the results of victory more lasting. The energies of the kings were turned chiefly southward, towards the gold mines of Nubia. That country, once subdued,—mainly by the exertions of *Wsrtsn* (Useratesen) III.,—was to be held by means of fortresses, of which two can still be traced beyond the second Cataract. All Egypt contains scattered remains of the building activity of the 12th Dynasty, whose kings resided in various capitals—the earlier in Thebes, where the nucleus of the Amon temple dates from their time, and possibly at Memphis; the later, in the Fayyûm, where Amenemes III. built the most colossal of Egyptian funerary temples, known in later ages as the Labyrinth, and where he utilized an extensive natural lake (L. Moeris) to fertilize the whole district. The custom of burial in pyramids, maintained on a modest scale by the 11th Dynasty at Thebes, was carried on by their successors, who built large tombs of this class near Memphis (Lisht, Turrâh, Dahshur) or in the Fayyûm (Illahun, Hawarah). There are grounds for supposing the later kings of the Dynasty to have had foreign blood in their

veins; their portraits show features singularly different from the accustomed type of the age. The internal history of the middle kingdom is the history of the development of the decentralizing tendencies which had their rise in the conditions of the 6th Dynasty. The development can be traced in the inscribed tombs of the noble families buried at Beni-Hasan, El-Bersheh, Siut, and Aswân. The nomes of Middle and Upper Egypt are the centres of interest, each of them in the hands of a family of which the genealogy can, in some cases, be traced back to the Old Kingdom. The nomarchs were still, however, under certain obligations to the central power. But the crown was no longer in the position of irresponsible despotism which it had enjoyed in former times. Its powers were restricted on all sides by the growth of the provincial resources. The nomarchs, some of whom by judicious marriages had become lords of several provinces at once, had their own courts, officials, and levies, though the latter were apparently at the king's disposal for external wars. So far, however, as we can judge, the country suffered little as yet from these conditions. The age of the Middle Kingdom, though differing rather in degree than in kind from that of the Memphite Dynasties, was one of probably greater material, artistic, and literary wealth, and appeared, not undeservedly, to succeeding generations as a golden age.

The obscurity which gradually follows the extinction of the 12th Dynasty is no less impenetrable than that which follows on the Dynasties of the Old Kingdom. On some sides, indeed, the decline is scarcely perceptible; the outward aspect of the kingdom is little changed; the southern conquests are maintained, commerce on the Red Sea continues, and the art of the period does not fall far short of the high standard lately set. But of the individual Pharaohs of the 13th Dynasty we know scarcely anything; of those of the 14th, absolutely nothing. The former series, with the names (among others) of *Sbkhtp* (Sebekhotep) and *Sbkmsf* (Sebekemsef), is localized in Thebes; the latter in Choïs, an obscure Delta town, though it is quite possible that the Theban tradition was being upheld by a contemporary Dynasty in the south. The whole interval, indeed, between the 12th and 17th Dynasties may have been occupied by the struggles of rival houses, each claiming legitimate rights to the throne, yet none strong enough to vindicate its claims permanently.

We do not know at what point in this dark period of some 150 years the internal troubles were first complicated by foreign invasion. The name of one of the kings assigned to this time is regarded as evidence for an Ethiopic supremacy; on the other hand, there is perhaps ground for placing here one of the frequent Libyan invasions. Of trustworthy contemporary documents there is a complete dearth; the Turin papyrus and the Manethonian fragments are our sole authorities. In Manetho's arrangement these two obscure Dynasties are followed by two more of which still less is known; yet they are of greater interest, for they are drawn from those foreign invaders who by this time had subdued at least a part of northern Egypt, and whom Manetho names Hyksos (Ἰκσῶς, ?pl. Ἰκουσῶς). The racial position of this people is still unknown. Their Greek (= Egyptian) name means merely 'Sheikhs of the (south Syrian) Bedawin,'* and it has been supposed that they consisted of mixed hordes, partly Semite, partly of some other race. Another hypothesis, based on the fact that the worship of *Swtj* (Set) was common to Hyksos and Hittites, and on the occurrence in

* The gloss 'shepherd' for *šsw* is demonstrable only at a far later period of the language.

cuneiform documents of *Hyn* (Khyan) as a Hittite king's name, while his namesake in Egypt is regarded as a Hyksos king, would make of Hyksos and Hittites one race. From the language we can draw no arguments, for we know nothing of it save a few Greek transcriptions of the royal names. Nor can we appeal to the portraits of the kings; for the Sphinxes, etc., formerly regarded as such, are now held by many to belong rather to the latter kings of the 12th Dynasty.

Asiatics had undoubtedly been crossing the frontier for ages past; but only in small numbers. Now they appear to have made a much more formidable onslaught upon the eastern Delta, and, after slaying, plundering, and burning, to have established themselves there in a dominant position. The events which had produced this southward migration from Asia are quite unknown; possibly, the contemporary attack of Elam on Mesopotamia gave the immediate impetus.

Egypt was weak, and the earlier at least of the Hyksos princes were strong rulers; and though resistance was persistent farther south, northern Egypt remained in their hands for two or three centuries, possibly longer. They resided in the eastern Delta, in the fortress of *Hwt*-Avaris or at *Dnt*-Tanis (Zoan), where they soon so far assimilated Egyptian civilization that the remains of their work is indistinguishable from that of the native kings.

(c) *The New Kingdom*.—Just as the disorders of a former period had been ended by the energy or fortunate position of the Theban nomarchs, so now resistance to the Hyksos oppression centred at Thebes, which may even itself have suffered at their hands, since traces of them have come to light still farther south. Their expulsion necessitated a long struggle, and they probably only finally quitted the Delta many years after being driven from Upper Egypt. The 17th Dynasty, which began the war of liberation, seems for some time to have been contemporary with the Hyksos kings. It is, however, only of its later members that we have any knowledge. There is preserved from this period the autobiography of an Egyptian officer, *Thms*-Amosis, who took part in the war, and from it we learn that, Avaris having been captured, the foreigners were not merely expelled from Egypt, but pursued into S. Palestine and their stronghold (or, perhaps, place of temporary retreat) Sharuhén (Jos 19^o) taken.

The military expeditions here described are the first-fruits of a new tendency in the history of the nation. The art, language, and social organization of the early period of the New Kingdom bear a close resemblance to those of the age that had sunk in the obscurity of the Hyksos invasion. Indeed, that the change had been so slight may be an argument for the relatively short duration of the foreign occupation. But the political history of Egypt, with the rise of the new Theban Dynasty, begins to follow a new course. Instead of a nation content with victories over the wild tribes of Nubia and the Soudan, both kings and people appear now to be eager for conquest among races of quite other attainments, in the arts both of peace and war. The nations of Syria had not, so far as we know, seen an Egyptian invasion since that conducted by *Wni* (6th Dynasty). The Pharaohs of the New Kingdom, however, initiated into Asiatic warfare by the circumstances of the Hyksos expulsion, soon came to regard such campaigns—aggressive now—as their most important occupation. But first they set about the reconquest of Nubia, and before long carried their southern frontier as far as Dongola.

The decisive strokes in the war of liberation were fought under the first king of the 18th

Dynasty, *Thms*-Amosis, who seems to have been the lineal descendant of his predecessors. The relationships and sequence of the kings and queens—the latter, heiresses in their own right—who followed him are much disputed. His son and successor, *Imhthp*-Amenophis I., was a king of no great political importance, though popularly revered, as we see from his special deification in later times. His chief occupation was the reorganization of the Nubian dependencies. He was followed by his son, *Dhutims*-Thutmose I., though this prince's succession was only legitimized by marriage with a half-sister, the direct heiress. Whether he was the father of his three successors Th. II., Th. III., and queen *Htšpswt* (Hatasu) or only of Th. II. and the queen, Th. III. being a generation farther off, it is difficult to decide. The queen, though certainly daughter and heiress to Th. I. and wife of her brother Th. II., may have been either half-sister or aunt (and step-mother) to Th. III. She was, at any rate, a princess of strong character, and a very important factor in the politics of the time, acting at least once as co-regent and, during the minority of Th. III., ruling on his behalf. We have evidence, however, in the successive erasure of these royal names upon the monuments, that, whatever was the sequence of the changes of rule among them, such changes were not made in any spirit of friendly acquiescence. Queen *Htšpswt* never really reigned alone, though for years, whether owing to the insignificance or youth of the king, the fortunes of the country were in her hands. Beyond the proofs of her activity recorded at Deir el-Bahri (Thebes), we know little of the direction her energies took. The Hyksos were no doubt not yet completely expelled, and there is again mention of a Nubian campaign. The event of which we know most, however, is her expedition to *Punt*, i.e. the Somali coast. Her fleet had, like its predecessors from the 6th Dynasty onwards, solely a commercial object. *Punt* (Punt), the 'Land of the Gods,' the home of the 'bearded' people,* was rich in frankincense, and a market for ebony, ivory, and panther skins. Beyond the vast temple, on whose walls the expedition is depicted, the queen found opportunity to build also in other quarters of Thebes, and erected at Karnak the loftiest (with one exception) of extant Egyptian obelisks.

Left free by the death or final retirement of *Htšpswt*, Thutmose III., who had already reached the age of thirty, at once set about a campaign in Syria which culminated in a great defeat at Megiddo of the confederated Syrian princes, who forthwith recognized the Pharaoh as overlord, and professed themselves, with more or less sincerity, the vassals of Egypt. Not, however, that one campaign sufficed to ensure this condition of things. During twenty years Thutmose III. himself led some fifteen expeditions into Syria, where the withdrawal of his armies was repeatedly the signal for a rising among the subjugated states. His most distant vassals at the time of his death were in the neighbourhood of Mt. Amanus and the upper Euphrates; he was suzerain of the Canaanite plain and coasts and of the Amorite hill-country, while Egypt's 'sphere of influence' embraced, moreover, 'the isles of the Great Sea,' i.e. the Ægean islands, as well as Cyprus, the nearer parts of Asia Minor, and the Hittite territory around Kadesh (on the Orontes). 'Tribute' is recorded from Assyria, though here, as often elsewhere, the annalist probably refers but to propitiatory gifts, which indicated a desire to stand well with the powerful invader. The Nubian dependencies were

* So W. Max Müller, *Z. Ass.* xi. 82, and not حبشي Abyssinians.

also extended in this reign as far south as Gebel Barkal and probably far across the Soudan, while we hear, too, of campaigns against the Libyan nomads. Thutmosis III. was not less active as a builder than as a warrior; his architecture meets us on all hands. In every considerable town he built or enlarged a temple, as at Thebes, where he surrounded the central shrine of Amon with extensive halls and corridors. His name, engraved on scarabs, etc., is more frequent than that of any other king, and seems, in later ages, to have been regarded as a talisman.

He succeeded peacefully by his son, Amenophis II., whose long reign is not remarkable. His father's energy had secured, for the time, the Syrian conquests. Nubia seems to have occupied him somewhat more, and from his reign date the most southerly of Egyptian monuments (Ben-Naga). The reign of the next king, Thutmosis IV., was short and still less remarkable. There were occasional demonstrations of supremacy to be made in Syria and Nubia, and tributes of respect to be paid to the gods by some additions to their temples. That the contact with Asia was already of influence is shown by this king's marriage with a princess of *Mitanni*, the then leading power beyond the Euphrates.

Amenophis III. sat for thirty-five years on his father's throne. He seems to have been still able without much exertion to maintain abroad the position he inherited, for we hear nothing of Asiatic and but once of Nubian campaigns. Extensive building and much observance of religious ceremonies are—for us, at least—the characteristics of the reign. At this period of the 18th Dynasty the royal marriages are among the most significant and influential in Egyptian history. Amenophis III., himself possibly the son of his father's foreign wife, took into his harem *Kingip'* (cuneif. *Giluhipa*), another daughter of the house of Mitanni, while we know that among his wives was also a Babylonian princess. He had, moreover, already married a lady named *Tyî*, who may or may not have been of foreign parentage, but who, at any rate, took a prominent share in the public life both of her husband and son. It is thought, indeed, that Amenophis IV. was influenced by his mother towards those reforms in the state religion, initiated a few years after his accession, which have left to his name a peculiar interest. (See below.)

The marriages, domestic relations, and foreign history of this period can be followed in exceptional detail owing to the records deposited at el-Amarna, where a portion of the correspondence between the Egyptian court and its allies, envoys, and vassals in Syria lay stored until its discovery in 1887. The correspondence was almost wholly in the Babylonian language,—clearly the diplomatic medium of the age,—though the writers were not, with one or two exceptions, Babylonians. Some of the letters are from the kings of Mitanni, but most are from the Syrians entrusted with the government of the subjugated provinces. Those letters which belong to the reign of Amenophis III. show a condition still of peaceful allegiance to Egypt and respect for its king. Those, however, dating from his son's reign bear witness to the defection of the vassals and speedy loss of the Asiatic empire, which resulted from the neglect and incapacity of the suzerain power. Amenophis IV. was too fully engrossed at home to spend time or money upon external affairs.

Although this king reigned for some seventeen years, there is nothing recorded of him beyond his religious activity. The religious revolution was accompanied by an ephemeral, though for the time complete, revolution in art, traceable through-

out the remains of the great palace and temple which Amenophis, no longer content to reside at Thebes, had built at el-Amarna in Middle Egypt. Place and personal names were changed, in accordance with the reformed cult; the new residence was called 'Horizon of the Sun,' the king took the name *Ihmitn* (Khuenaten), 'Spirit of the Sun,' the names of his wife—another princess of Mitanni and his own cousin—and daughters being likewise altered. There has been much speculation as to the king's personality, owing to the wide divergence between his youthful and mature portraits. The peculiar, almost deformed, type of the latter has been thought in some way connected with the religious change. It is scarcely likely that the very similar portraits of his courtiers are due to more than imitative flattery.

On the death of the reformer-king, he was presumably interred in the great tomb hewn for him at el-Amarna. His courtiers had planned to lie around him there; but only some of them were destined to complete their tombs. For in a short time it was clear that the schism had depended on the energies of its originator; with him dead, the ancient religion quickly reasserted itself. His two sons-in-law, who succeeded him, were not the men to resist the reaction which, within twenty years of Amenophis' death, was complete, and left the 18th Dynasty to end its course where it had begun it, at Thebes.

The most conspicuous results of the intercourse with Asia of which the 18th Dynasty had witnessed the growth, are naturally seen in the military character of the age, the new basis on which the army was levied,—dependent no longer on the feudal nomarchs, but immediately on the king,—and the new methods of warfare taught by the introduction of the hitherto unknown horse and chariot into Egypt. The gradual extinction of the nomarchs—an effect perhaps of civil war—implied a corresponding exaltation of the crown; their lands seem mostly to have passed into the king's hands. Conquest gave to the new monarchy a prestige and resources (treasure and slave-labour) which placed it in a position of hitherto unattained magnificence. The country became, as under the early Dynasties, filled with royal officials and favourites, who soon rose to form a new nobility; a royal tax was levied upon all land, and royal justice administered by mixed courts of officials and priests. The Asiatic vassal-provinces were governed chiefly by native viceroys, whom the Egyptian court controlled by means of envoys. Nubia and part of S. Egypt were entrusted to an official known as the 'Prince of Kush.' The evils of the irresponsible security attained by the capacity and fortune of the earlier Pharaohs of the New Kingdom and those resulting from their close alliance with the all-powerful priesthood, become visible first under the following Dynasty.

Whether *Hrmhb*-Armais be reckoned the last king of the 18th or the first of the 19th Dynasty, it is he who really initiates the new epoch. The disturbance for which Amenophis IV. had been responsible could not be quieted without vigorous reorganization, and this was the main work of Armais, a strong ruler, and probably already acting regent when called by his patrons, the priests of Thebes, to the throne. Beyond reconstructive work at home, we hear of one Asiatic war in which the principal enemy is the Hittite power, now advanced southward (probably from the Armenian highlands) and making havoc among Egypt's allies and vassals in N. Syria. It is uncertain whether this reign saw a treaty between them and Egypt. Armais was followed by the first of the famous Ramesside Pharaohs who ruled Egypt during the following 200 years. But

Ramses I. died after a short and uneventful reign, and his son *Sty-Sethôs* was the first whose hands were free enough at home to allow of any real attempt to regain abroad the ground of late lost. Yet now even *Sethôs* was unable to do more than assure his hold upon such districts as the Hittites had not already annexed. A march through Palestine to the Orontes and back by the Phœnician coast overawed Bedawins and Canaanites; but he made no fresh conquests, and finally came to terms with the Hittite king, who was to be suzerain from the Lebanon northwards, while Palestine remained in allegiance to Egypt. Nubia, Libya, and, with the last, the Mediterranean pirate hordes who now begin to appear on the N. and W. for the first time, were likewise chastised or repelled; but most of the reign must have been spent peacefully, as the king's colossal monuments at Thebes and Abydos testify.

His son, Ramses II.—the best known of Egyptian Pharaohs, because the most industrious in recording his own glory,—succeeded young, and reigned for 67 years. Of these the first score were occupied in the war with the Hittites, till it became evident that a peace, similar to that of the last reign, could alone end a struggle in which neither side was strong enough to retain the mastery. An alliance, offensive and defensive, was at the same time concluded and cemented, some years later, by a marriage. The war had been signalized by at least one great battle—that at Kadesh,—in which prodigies of valour are ascribed to the king. But the position of Egypt in Asia, as defined by the peace of the king's 21st year, was far inferior to that attained two centuries earlier by Thutmosis III. Instead of the frontier at the Euphrates and Mt. Amanus, Ramses II. had to be content with one which crossed the Lebanon about Beirut. As a means of controlling Phœnicia and Palestine, he erected a series of forts across the desert, while strengthening various Delta towns (cf. the Hebrew tradition of 'Pithom and Raamses,' Ex 1¹¹), and choosing for his favourite residence Tanis (Zoan), a much more apt centre than Thebes for the direction of operations in Syria.

After the Hittite peace, Ramses II. appears to have devoted himself principally to architecture. Not only did he build endless temples to the gods (and some even to himself) throughout the country, but he did not scruple, while restoring, to appropriate the work of his predecessors, whose names he frequently replaced on their buildings and statues by his own. He had more than 150 children. His successor was his fourteenth son, *Mrrnptâ* (Merenptah), whose reign is as yet the only one in which reference has been found to the Israelites (see below). As well as his famous Libyan war, *Mrrnptâ* boasts of a campaign in Syria, where he still claimed the allegiance of the southern half of the country. The great Libyan host, defeated in his 5th year, had come allied again with those pirate hordes which had appeared in the Delta under *Sethôs*, and whose homes it is impossible to localize, owing to the difficulty in exactly identifying their names. They came, at any rate, from the Mediterranean coasts; but whether Asia Minor, the Ægean islands, and the Italic countries all sent contingents, cannot be decided. The name of *Mrrnptâ* is found on numerous monuments, but we know little of his doings.

The long reign of Ramses II., and perhaps apathy and self-indulgence in his latter years, had enfeebled the royal power, and by the time of *Mrrnptâ's* death the country was ready for revolution. Power fell into the hands of the magnates and great officials, and only after half a century of disturbance did *Stnht* succeed in re-establishing order. This prince, who presumably had claimed

legitimate Ramesside descent, left the throne to his son, Ramses III., whose reign lasted over 30 years. During its first decade, three formidable attacks from without had to be repelled—two by Libyan coalitions, and one by a host of the northern maritime invaders, whom the wealth of Egypt had more than once attracted under former kings. This time, however, they approached the eastern Delta by land through Syria as well as by sea, and it was only after a destructive battle at the frontier fortress of Magdolos that they were repulsed. The hold of each successive Pharaoh upon the Asiatic provinces was growing weaker, and it is doubtful how far the authority of Ramses III. was effective there, even though the Hittite empire had long been dissipated. At home the king's tranquillity was broken by a widespread and mysterious conspiracy, originating in the palace, and suppressed with great severity. Otherwise, the reign appears to have been peaceful. The king's chief ambition was the imitation in all points of his ancestor, Ramses II. The wealth of the country was enormous. The king lived the life of a self-indulgent despot, while the real power was with the Theban priests and the foreign mercenaries—mainly Libyans and *S'rdim'*, i.e. Sardinians, of whom the latter had already served the Pharaohs of the preceding Dynasty.

Ramses III. was followed by a series of his sons and grandsons, who each bore the name of Ramses. Under their weak rule Egypt finally lost her Syrian dependencies, and left them open to the conquests of Assyria. Each king seems to have been principally occupied with the preparation of a vast rock-tomb (Bibân el-Mulûk), and meanwhile the ascendancy of the priests of Amon grew always greater, until *Hrhr* (Herhor), who had already added to the office of chief priest the principal political and military titles, felt strong enough to mount the throne and thus put an end to the Ramesside rule. The Ramesside Pharaohs had, with even greater resources at their command, rarely displayed the capacity or vigour of the 18th Dynasty, and the nation had readily relapsed into the unwarlike apathy and distaste for foreign intercourse which had marked its earlier history. Mercenary troops became therefore the only means of retaining a hold on the foreign provinces, and the king grew more and more completely the tool of the military leaders. On the other hand, the recent triumph of orthodoxy had further strengthened the position of the priesthood, on whom royal piety heaped untold quantities of treasure, the product of the foreign tributaries. The great offices of state in the hands of a mere bureaucracy were effective only in filling the royal treasury, while the population at large was starving and discontented.

(d) *The Foreign Dominion*.—But the 21st Dynasty does not, according to Manetho, consist of the priestly successors of *Hrhr*. The legitimate Pharaohs he held to be the Tanite princes (*S'mntw-Smendes*, *P'sbh'nnt*-Psousennes, etc.) who rebelled against this usurpation, and were acknowledged first in the North, then also in the Thebaid. Before long the rival families intermarried and so restored unity; but their relationships and sequence are not clearly ascertained. On the monuments little more than their names occur, though mummies (of the priestly family) and much genealogical evidence were found in the famous *cachette* at Deir el-Bahri.

The next Dynasty, the 22nd, owed its rise to the political conditions of the period. The captains of the Libyan mercenaries had by this time attained a position, territorial as well as military, which made usurpation easy, and, when the opportunity offered, their chief *S'snk*-Sousakim-Shishak was able without serious opposition to assume the royal

titles. He was ambitious, and had pretensions to a reconquest of Syria. His inscription records a raid against both the Hebrew kingdoms—not against Judah only (1 K 14^{25a}). The Dynasty resided at Bubastis, and built extensively upon the ancient temple of the goddess *Bstt* (Bast); but we know little of its kings beyond their names, *S'snk*, *W'srkn*-Osorkon, *Tkrt*-Takelothis. The Dynasty by which they were (presumably) overthrown shows likewise Libyan names, but ruled from Tanis. The times may well have been too disturbed by dynastic rivalries to leave leisure for building; at any rate, the history of the 23rd Dynasty is as yet totally obscure.

During the period of weakness and dissension through which Egypt had been passing, the Nubian princes of Napata (Gebel Barkal) had been growing in strength, and were able now to shake off the Pharaoh's sovereignty, and even to contemplate the invasion of Egypt. This adventure was not difficult to carry out in the southern country, where there was no leader to withstand them; but as they advanced northward, the Ethiopians found an obstinate opponent in *Tjnh*-Tnephachthos, the powerful prince of Sais (W. Delta), whose supremacy was recognized as far south as Hermopolis (Eshmunin). To this town the Ethiopian king, *P'nh*y (Piankhi) (775) laid siege. The Saites capitulated, and Tnephachthos fled, while the victors advanced to Memphis. A treaty was, however, soon arranged, neither party being strong enough to suppress the other. The Ethiopians retired up the river, nominally in possession of the whole valley; but the Delta remained in the hands of Tnephachthos and his son *Bkrmf*-Bocchoris, who seems to have finally extinguished the old legitimist families, extended his authority up to Thebes, and reigned for some time in comparative tranquillity. The Ethiopians, however, had not abandoned their ambitions, and, strengthened by a marriage with a Tanite princess, and favoured by the still powerful Theban priesthood, they again marched northward and put an end to the rule of Bocchoris. This time their conquest was more complete. Their family, whose relationships and history are as yet far from clear, constitutes Manetho's 25th Dynasty, and its most conspicuous member is its first king, *S'b'k*-Sabakon (707-695). His successors were not, however, strong enough, at such a distance from home, to maintain a dominant position in the North, though the petty princes of the Delta towns accepted for the moment the Ethiopian suzerainty. One of the latter—and probably not Sabakon himself, as was formerly assumed—was the So (סו=Seve*) of 2 K 17*, who ventured, in alliance with Gaza and Israel, to withstand the threatening growth of the Assyrian power in Palestine. Sargon, however, defeated the coalition at Raphia, though he seems afterwards to have made a treaty with Egypt.

Throughout this period the hopes of the small Syrian states were placed on Egypt, whence, however, in the confusion of party strife, no effectual help could come. Yet it was toward Syria that the ambitions of Sabakon's son, *T'hrk*-Tharaka-Tirhakah (690-664), were directed. He was there brought, however, into speedy collision with Sargon's successor, Sennacherib, who, at Eltekeh, defeated the combined troops of several Egyptian princes. Attempts at interference in Asia were thus for a time checked, and Tirhakah had leisure for considerable building, both at Napata and at Thebes. But the Syrians still counted on an Egyptian alliance, and it was clear that, if the Assyrian rule was ever to be peacefully accepted by them, Egypt must once and for all be rendered

powerless. An Assyrian army proceeded therefore southwards, and, while Tirhakah fled to Ethiopia and the minor princes submitted, Esarhaddon advanced as far as Thebes and subsequently organized a government under twenty local regents, of whom the most notable was *Nk'w*-Necho of Sais. Yet still Tirhakah had hopes, and his advances from the south, abetted by some of the local princes on whom Assyria relied, resulted at length in the expulsion of the invaders from Memphis. Assurbanipal, the son of Esarhaddon, thereupon hastened to Egypt, and, with small trouble, re-established the Assyrian supremacy, while Necho, who had joined Tirhakah, became a temporary captive in Nineveh. At length Tirhakah died, and his successor, *Twtimn* (cuneif. Tandamanie), having failed to recover the lost position, the Ethiopians finally retired homeward, while Assurbanipal requited the sympathy his opponent had received in Upper Egypt by devastating Thebes. For two or three years Assurbanipal was undisputed master of Egypt. Then came an Elamite war and simultaneous revolts in Babylon, Arabia, and Lydia.

(c) *The Restoration*.—Incited by Gyges, king of the last country, *Psmtk*-Psammitichus of Sais (663-610), son of Necho, whom the Assyrians had reinstated, seized this opportunity to raise a fresh insurrection. He was himself of either Libyan or Nubian descent, and the success of his policy depended wholly on the foreign troops he employed. With the help of Lydia and of Ionian and Carian mercenaries (the *χαλκεοι άνδρες* of the prophecy, Herod. ii. 152), Psammitichus overthrew the Dodecarchy, *i.e.* the Assyrian regents, and, by marriage with a niece of Sabakon's, gained the approval of the Theban priests and so of Upper Egypt. He pursued the Assyrians into Palestine, and captured after a long siege the town of Ashdod. The misfortunes of Assyria favoured the attempts of the Saite Pharaohs to re-establish their dominance in Asia, and during this and the following reign (Necho II.) Syria was again brought under Egypt's sovereignty. But the rise of Babylon under Nebuchadrezzar put a check on this revival, and Necho II. (610-594), after defeating Josiah of Judah at Megiddo,* was himself routed by Nebuchadrezzar at Carchemish, and expelled from Syria.

The energies of the 26th Dynasty were directed before all things to taking advantage of Egypt's geographical situation and bringing her, by the help of hired Phœnician ships, within the sphere of Mediterranean commerce. Relations were opened with Periander of Corinth and with other Greek states. Greek traders were assigned special quarters in Memphis, where a Tyrian colony had already been settled; indeed, *Ihms*-Amasis, a later king of the Dynasty, allowed them to found a separate town on the Greek model—Naucratis in the W. Delta—to which their operations were to be restricted, and which only waned in importance before the rise of Alexandria. Amasis had been the general of *W'hibr*-Apries-Hophra (588-569), whom the troops had driven from the throne in his favour. About this time Nebuchadrezzar appears to have invaded Egypt, though the history of the campaign is not known. His object was presumably vengeance for the part which Apries had recently played in Syria, where Judah, again trusting to Egyptian support, had begun the hostilities which ended in the fall of Jerusalem (586) and the flight of many of the inhabitants—among them Jeremiah—to Egypt, where they were settled in Tahpanhes (Tell Defeneh), a frontier fort in the E. Delta.

* Greek *Συρία*, *Σώα*. The Lucianic text has the inexplicable variant *Ἀδαρμίτις*.

* Presumably S. of Carmel, though this identification is disputed.

The characteristics of the Saite period are, in all but commercial aspects, those of an archaizing renaissance. To judge by art, literature, names, titles, etc., we might imagine ourselves again in the age of the Pyramid builders, though on closer inspection the resemblance is seen to be but superficial.

(f) *The Persian Supremacy.*—This prosperous and uneventful period was suddenly terminated by an invasion by the great power which was now overturning the political balance of W. Asia. Cyrus had seen the formation of a hostile league between Lydia, Babylon, and Egypt; but his death had delayed chastisement, and the expedition against Egypt was left for his son, Cambyses (525), who appears not to have acted with the customary clemency of Persian conquerors; for his memory was execrated throughout Egypt. The Saites had grown weak, and the country lay an easy prey to the invaders. The conquest was turned to full advantage by his successor Darius (521-486), who set about the reorganization of the country on its former lines, and won the acquiescence of priests and people by assuming the ancient titles and functions of the native kings. The check suffered by the Persians at Marathon, however, gave courage to the patriotic party in Egypt, and under the leadership of a Libyan, *Hbbš* (Chabash), the Persians were for a time expelled. But a fresh expedition was undertaken by Xerxes (486-465), and the insurrection suppressed with severity, Egypt being constituted a satrapy under the king's brother Achæmenes. Some years of quiet followed, and then, in the W. Delta, came a fresh revolt led by Inaros—possibly a Saite prince—and aided by the Athenians (463). This in turn was suppressed by Megabyzus, the general of Artaxerxes, while the leadership of the party fell to Amyrtæus, for whose support Cimon, on his Cyprian expedition, sent a fleet (449).

The history of this period is fragmentary and obscure; of native records we have none. The chronology of events cannot be accurately settled. We gather that, throughout the time of Persia's decline, various revolts of the national party took place in northern Egypt—the upper valley plays by this time no historical part. Manetho introduces, in the midst of the Persian supremacy, two more native Dynasties, the 28th and 29th, of which we know very little, and then another, the 30th, to which belong two kings, *Nhthrhbt*-Nektanebes (362-364) and *Nhthnb*-Nektanebo (361-343), the former of whom succeeded in suppressing his rivals, while the latter, during a long reign, was active as a builder throughout the country (Philæ, Edfu, Thebes, Heliopolis, the Delta). Persia, however, by a final effort, was able to reinstate herself (343), and Nektanebo, the last of the Pharaohs, abandoned his Greek allies and fled to Ethiopia.

But the Persian domination, too, was at an end. In a few years Alexander of Macedon had dismembered the empire of the Achæmenides, and in 332 he led his armies into Egypt, which submitted without resistance.

The Macedonians.—The rule of Alexander's successors, the Ptolemies, brought Egypt again into the advantageous position attained for her in some degree by the 26th Dynasty. Now, however, the Greek element became the dominant factor in her prosperity; the ancient native culture gradually faded and retreated from the North, where Alexandria, the new capital, had become the centre of the Hellenic world. But the wide dominions of the Ptolemies were not to be retained by a series of rulers so degenerate as those of the house of Lagus soon became. After a century of good government and unequalled prosperity (323-222),

the political fortunes of Egypt began again to decline and anarchy to spread throughout the country. Insurrections followed each other in constant succession, while treachery and murder shortened the reigns of many of the kings. At length the Romans, under whose toleration the Lagides had for a century and a half existed, were able, by the victory of Octavius over Anthony and Cleopatra (30), to assume the actual government of the country, which remained thenceforth a part of the empire, either of Rome or of Byzantium, until conquered by the Saracens A.D. 642.

ix. EGYPT'S RELATIONS WITH ASIA.—Our sources of knowledge are (1) for the primitive periods, chiefly inferences from the foreign words already in use in the ancient (religious) texts, especially the names of cereals, woods, oils, etc., known to have been not native; (2) under the Dynasties of the Old Kingdom we have early evidence from the mines of Sinai,* where the troublesome nomad tribes were known as *Ss* (cf. ? *ꜥꜥꜥ*), from a 5th (?) Dynasty fresco depicting the capture of a Syrian fortress, and from at least one biographical narrative—that of *Wni*, Dyn. 6—recounting several military and commercial expeditions to Syria, the land of the '*mv*' (root probably '*m*', 'boomerang,' not *ꜥꜥ*). We here read of the fruitfulness of the land through which the Egyptian army marched, and it is evident the description is that of S. Palestine. The same text tells, too, of a journey by sea to the Phœnician coast; (3) under the Middle Kingdom Dynasties we can see that a considerable intercourse is arising. Embassies come with presents from Semitic chiefs and are received by the king or the nobles (Beni-Hasan), and no doubt many groups of nomads had by this time crossed the frontier and got leave, as they did later (*Æg. Zeitschr.* xxvii. 125), to settle in the Delta. Journeys into Palestine became so frequent that they formed the subject for a story—founded, no doubt, upon fact, and popular for many centuries—whence many details of Syrian desert life at the time may be learned (*Snh*). The tribes among which the hero of this story passes many years are called by the general term *st*, 'archers' (cf. Babyl. *suti*). Egyptian traders visited them, and the conditions of life appear very similar to those of the modern Bedawin. (4) But the relations of Egypt with her northern neighbours were revolutionized by the Hyksos invasion and the long series of military expeditions which followed. The language receives a very strong admixture of foreign (not exclusively Semitic) loan-words, and is forced even to evolve a new system of orthography for their reproduction. Syrian slaves—females, at least, '*ml*'—met with in the households of the Middle Kingdom, are now employed in great numbers. Asiatic textile work, weapons, vases (pottery and metal), musical instruments, besides various wines, beers, oils, breads, etc., are imported from Syria, Asia Minor, and possibly even lands farther west, and preferred to the native products. The native names even of many objects are discarded and replaced by corresponding foreign terms. Syrian deities—Baal, Astarte, Anat, Resheph—are gradually admitted to places beside the Egyptian gods, and the Pharaohs appear now and then under their special protection.

The countries whence these new influences emanate, bear in the Egyptian texts of different epochs different names, many of which are confusing and elude exact definition. All Syria, as far as the Euphrates, is divided into the countries of Upper (Southern) and Lower (Northern) *Rtnw* (cf. the more ancient *Tnw* and the cuneif. *Tidnu*). Palestine proper bears also the name *H'rw*, originally only the designation of the southern (later

* See *Æg. Zeitschr.* xxxv. 7 ff.

Philistine) coast. Phœnicia, on the other hand, was known by the name *D'hi*, and, together with the still more northerly coast, by the vaguer term *Kāi*, 'the Circular (land),' perhaps from the form of the Gulf of Issus. *Kft* was the name, perhaps, of Cilicia, perhaps of the N. Syrian coasts. Certain peoples whom we find, under the 19th Dynasty, among the allies of the Hittites, have been localized in W. Asia Minor; the *Rwk* Lycians, *D'rdny* Dardanians, *Ywnn* Ionians, *Ikyw's* Achæans,* and others. The difficult designation *H'wmbw*, found in the oldest literature, appears to embrace the peoples of the North in the vaguest way; only in late epochs was it used for the Hellenic race. Cyprus, whence much copper was imported, is 'sy, a part of it *Irs*-Alasia. Mesopotamia was, until the New Kingdom, practically unknown to Egypt; then we begin to read of presents passing between the court of Egypt and those of *Bbr*-Babylon, called in the Amarna letters *Shankhar* (*S'ng'r* שַׁנְחָר) or *Karduniash*, and *Issur*-Assyria. Asia east of these was always unknown to Egypt.

The votive inscriptions, in which the 18th and 19th Dynasties recorded their conquests, have preserved the names of many towns, etc., in Syria, of which, however, the majority are still unidentified. The campaigns of Thutmose III. furnish the best of such material; the lists of his successors are often mere copies of his, and of relatively small value. The Amarna tablets show several of these same names in a cuneiform transcription. Of the localities identified the following are among the best known: Aleppo, Carchemish, Kadesh (on Orontes), Damascus, Hamath, Byblos, Simyra, Beirût, Sidon, Tyre, Megiddo, Akko, Joppa, Gaza, Ashkelon, Janoah, Taanak. In one group of the Amarna letters Jerusalem is often mentioned, but in hieroglyphic texts it has not been found. Certain names, though not yet identified, are compounded of interesting elements: for example, *H'rir* חַרְרִיר, *B'ty* בְּתַי, in which the divine names appear—the second already (Dyn. 18) abbreviated; or *Y'kbi'r*, *Y'spir*, in which have been recognized the names *כַּבְּרִי* and *שִׁפְרִי* combined with *יָס* (as in Israel, Ishmael). These much-discussed names are more likely to have then had local than ethnic significance.† A connexion between them and the names of the patriarchs, Jacob and Joseph, cannot of course be proved; indeed the equation *Y'sp* = שִׁפְרִי has considerable phonetic difficulties. It may here be noted that certain scarabs, probably of the Hyksos period, appear to bear royal (?) names compounded of *Y'kb* and *hr* (? חַרְרִיר), which might point, at any rate, to the Semitic name Jacob at an unexpectedly early period. The whole tradition of Israel's early connexion with Egypt—the sojourn there of the patriarchs and the exodus of their descendants—is still obscure, and the recent discovery for the first time of 'Israel' in a hieroglyphic text seems but further to complicate the problem.

The facts as to this document are the following: In 1896 an immense stele was discovered, one text of which commemorates the victory of *Mrrnpt*, son and successor of Ramses II., over the Libyans in his 5th year.‡ In the latter part of the text where other triumphs are enumerated, the localities subjugated occur in the following order: the Hittite land, Canaan (? land or town), Ashkelon, Gezer, Janoah (?), *Ysiri'r*-Israel, S. Palestine, 'all lands.' There is no corroborative evidence for an Asiatic campaign of *Mrrnpt*; possibly, in the fashion of the age, he is here merely assuming to himself the conquests of his predecessors. The

name Israel is written so as unmistakably to indicate a people, not, like the other names, a locality. Further, the words used of its condition imply devastation and the destruction of crops. The obvious and only safe conclusions to be drawn from these facts are that Israel, or a part of that people, was already in some part of Syria, and had been in hostile contact with Egypt. On the assumption that 'Pithom and Raameses' were built for Ramses II., whose long reign answered the requirements of Ex. ii. 23, the Pharaoh of the Exodus has been identified as *Mrrnpt*;* though, owing to the supposed more appropriate political conditions, others would place the Exodus 30 or 40 years later, about the time of *Stnht*.

If we assume that by the reign of *Mrrnpt* the Exodus had already been accomplished,—the name *Isrw* is found in the previous reigns in the territory of the tribe of Asher,—we have an argument for the proposed identification of the Hebrews with the Khabiri, of whose invasion of Palestine, some 150 years earlier, the Amarna letters say so much, and whom it is proposed to identify with the *S'sw* chastised by Sethos I.† The story of the priest Osarsiph (= Osiris + *x*) and the impious lepers, whose revolt he led, converted by Josephus into a history of Moses and the Hebrew struggle for freedom, has been with some probability referred rather to a reminiscence of the expulsion of the heretics of Amenophis IV.‡ The name Hebrews has not been met with in Egyptian texts. That of the foreign tribe of 'prow, found variously employed throughout the 19th Dynasty, is rarely now held to represent it, and may be merely a form of a familiar Egyptian term for 'workmen.' The Egyptian names given to Joseph, his wife, and father-in-law in Gn. xli. 45 have received various inadmissible interpretations. The only transcriptions which conform to Egyptian grammar and usage are (1) *Jephnoute'fönch*, 'God speaks (and) he lives'; (2) [*N]asneith*, 'devoted to (the goddess) Neith'; (3) *Pedephre*, 'he whom the sun-god gives.' All three names are cast in forms increasingly frequent from the time of the 22nd Dynasty onwards, but practically unknown earlier—except, indeed, the second; and this fact agrees with the date (8th cent.) to which the document E is assigned.§ For a difficult word used in the story of Joseph, חַרְרִיר Gn. xli. 43, a parallel expression has been noticed in a text of the 21st Dynasty, where the words *ib rk* seem to form an interjection, 'Give heed!' or the like.||

x. RELIGION. — Our sources of information on this subject are very numerous, but at the same time very inadequate. Egyptian texts not bearing, even indirectly, upon some aspect of the religion are in an extremely small minority; yet some primary questions remain unsolved for lack of explanatory documents. Since it is wholly owing to the supreme importance attached to the preparation for a future life that Egyptian antiquity has come again within our reach, it is natural that the side of religious life upon which we are best informed should be that dealing with the dead. Of the everyday religion of the people we know practically nothing. We have the names of many deities, and can enumerate their functions, attributes, and temples; but we are quite ignorant as to the way in which they were worshipped. It has been mentioned that Hommel

* On the still less demonstrable assumption that the Hebrew immigration had been a part of the Hyksos invasion, Mahler bases calculations which give 1335 (i. e. Ramses II.) as the year, and, with the help of Rabbinical tradition, March 27 as the day of the Exodus (*Der Pharao des Exodus*, 1896).

† See Ed. Meyer in *Festschr. f. Ebers*, 75.

† The former, which occurs twice, can be localized in the district Ephraim-Dan (see W. M. Müller, *Asien*, 164).

‡ His reign began, according to Mahler, in 1280.

is eager to demonstrate a Babylonian origin for the civilization of Egypt. One of his chief contentions is that some of the principal Egyptian deities can be proved identical with those of Babylon, from the identity of their attributes, distinctive animals, legends, etc. It is, however, as yet in many cases impossible to recognize what were the original rôles and functions of the Egyptian gods, and it seems more probable that, should a prehistoric immigration from Mesopotamia ever be demonstrated, the invaders will be found to have at most adopted certain of the native divinities and combined them with corresponding figures from their own Pantheon.

No religious document of the earlier ages compares in importance with the great body of texts—some 4000 lines—collected and copied on the interiors of the 5th and 6th Dynasty Pyramids, but in partial use, too, in all succeeding ages. Some of the documents thus brought together belong undoubtedly to a far earlier period, and give evidence that the official religion was even then completely developed, many of the gods having already the rôles by which they are characterized throughout history, and several of the most popular myths—notably that of Osiris—being referred to as already current. Certain of the gods are conspicuously absent from the Pyramid texts; Amon, for example, who being originally but the local god of Thebes, remained obscure until his city rose (Dyn. 11) to political importance.

Indeed the local divinities as such play a remarkably small part in these texts. Yet the local cults were the real basis of the popular religion, which did not, so far as we can see, recognize any single unifying element before the various tribal districts had been united under the first historic Dynasties. The nomes (see above) corresponded to independent cults, each centred in the shrine of the local god, who revealed himself to his worshippers in an animal, tree, or other material object—perhaps once the tribal totem. One aspect of the advance from this primitive stage of fetish worship can be seen in the semi-human and finally completely human representations of certain of the gods in art. Yet the sacred animal was revered side by side with the anthropomorphic god, receiving, as we know, much honour even in Greek and Roman times.

Beyond the famous story of Osiris and many otherwise unknown legends, the Pyramids contain countless allusions to that cycle of myths which subsequently produced the doctrines of the other great school of theology. For as Abydos appears very early—though probably not originally—as the home of the Osirian legend and of the all-important views of future life and retribution attached to it, so does Heliopolis ('*Ḥw, jw*') become the centre of the solar theology represented by the myth of Re', the sun-god, and his daily contest with the dragon of darkness.

A number of the gods—many merely local deities once—had been gradually drawn within the cycles of Osiris or of Re'. The chief actors in the former story are, besides Osiris himself (whose original locality and character are very obscure), his brother Sét-Typhon, regarded now as the impersonation of darkness (when Osiris is a solar god), now as the god of the barren desert (when Osiris is the fruitful river-valley); Isis, wife of Osiris, a goddess (from the Delta or Philæ) of merely mythological importance until the base epochs; Horus, his son and avenger, a puzzling figure owing to the variety of his local forms; and Thoth, the god of Hermopolis, the ally of Horus.

The myths of the sun-god are concerned either with the phases of the sun's daily and also supposed nightly, invisible journeys, or with cosmic pheno-

mena. In the former, Horus again plays a part, now as the son of Re'; in the latter, local divinities such as *Itm* (Tum) of Heliopolis, or elemental gods, as *Kb, Nwt, Sw, Ipwet*, are introduced. Cosmic speculations produced a variety of myths. In one heaven and earth are female and male; in another the sky is a cow with spotted hide (the stars); another held the earth to be a box, with the sky for its raised lid, supported on the encircling hills or on four tree-stems. The gods and goddesses associated with Re' are 9 in number (Ennead), and are regarded as a related family, just as later theology grouped several of the local deities into family 'triads.'

Not all cosmic doctrines, however, were concerned with the Heliopolitan gods; various local gods had once been regarded as creators, e.g. *Hnmw*-Chnoubis who, in the clay districts near the Cataracts, had formed the world upon a potter's wheel; and Ptah of Memphis was a similar artisan god.

Other and very ancient divinities were the local earth and harvest gods, e.g. Min of Coptos and (perhaps) Amon of Thebes. Others, again, were water deities, e.g. *Sbk*-Souchos of the Fayyûm and Ombos—for the same god is frequently met with in several localities, though originally proper, no doubt, to but one of them. Several were guardians of the local cemeteries, e.g. Sokaris at Memphis, Anubis at Siut, 'The Lord of those in the West' at Abydos.

The doctrines and practices of which the Osirian legend was at once the pattern and consequence are chiefly to be studied—beyond very numerous passages in the Pyramid texts—in the great heterogeneous collection of incantations known to us as the 'Book of the Dead,' but to the Egyptians probably as ('the Book of) coming out from (*i.e.* departing from) the Day and from the Necropolis.' The work is composed of texts ('chapters'), some as ancient as those of the Pyramids, others much later, and was intended as a guide through the various difficulties, and a magical protection against the enemies to be encountered by the dead, with whom a copy of it was buried. Some of the texts seem to be remnants of primitive rituals, but all had been by the time of their definite collection (beginning of the New Kingdom) edited for the use of the dead himself. It is this more than once repeated editing which has rendered the Book for the most part unintelligible to us. It may be asserted that none of the older chapters are now available in their first simplicity. The oldest MSS (Dyn. 12, 13) already show the glosses of more than one redactor, and each successive gloss seems but to obscure the original text.

Several totally divergent views, Solar and Osirian, as to the future life are represented in the work. The soul is, according to some chapters, to take the form of a bird and quit the tomb, and may accompany the sun bark on its heavenly journey; elsewhere it is regarded as appearing before Osiris, and, after the famous 'negative confession,' receiving merited justice. If judged 'of true voice,' *i.e.* correctly pronouncing the potent magic formulae, the deceased proceeds to the 'Fields of *I'rw*,' and spends eternity in a very materialistic paradise, conceived upon the model of rural life in Egypt.

The elements in man which survived death were four: *ḥ*' soul, *ḥw* spirit (?), *ḥ'ybt* shadow, and *k'* double. What were intended by the first three of these it is difficult to say; the fourth is that of which we hear most; for its maintenance was the object of all the funerary rites which from the earliest times occupied so much attention among all classes. The double, in appearance the exact counterpart of the man, after accompanying him

through life, lived on in the tomb so long as the corpse remained intact, and the piety of the survivors provided sufficient nourishment. Hence the processes of mummification, the inscriptions whose magic could, if supplies failed, call up food, the portrait-statues into which the double could enter.

Certain of the Pyramid texts and recent excavations do indeed recall an age in which funerary practices differed much from those of historic times—an age in which cannibalism and human sacrifice were not extinct, and in which all but the most rudimentary embalmment was unknown.

Confusion of doctrines is not characteristic of the funerary literature alone; it is common to all aspects of the Egyptian religion. The priestly tendency, discernible from the first Theban supremacy onwards, to assimilate all secondary deities to those at the head of the Pantheon, and, finally, to teach that all were but manifestations of the supreme deity (*i.e.* the sun-god), introduced, indeed, a kind of order, though for us the course of the foregoing development is thereby but obscured. The supremacy of the Theban Amon, assimilated in the first place to the sun-god, led to his identification with such a host of other deities, while the wealth and power of his priests became so threatening a danger to the state, that Amenophis IV., urged perhaps by the ancient hierarchy of Heliopolis, was tempted to a reform which should replace as the state religion the worship of Amon and his associated divinities by that of the sun's orb, *itn*, alone. This is the only conscious movement towards monotheism recorded in the religious history of Egypt. It is not necessary to seek in it the reflexion of some of the foreign influences of the time; the *itn* was a recognized aspect of the sun-god in Egypt in previous periods. The reformed doctrine contained conceptions far more lofty and enlightened than those of the ancient religion; yet it had but an ephemeral success, and became extinct shortly after the reforming king's death.

LITERATURE.—(A) GENERAL.—*Descript. de l'Égypte*, a colossal publication, the result of the Napoleonic expedition, containing monographs upon many branches of Egyptology, ancient and modern (1809 and 1817); Wilkinson, *Mann. and Cust.*, ed. Birch (1878); Erman, *Ägypten u. Ägypt. Leben* (1885 ff.), super-seeded in most respects the foregoing work; Ebers, *Cicerone* (1886); *Baedeker*, by Steindorff (1897). (B) LAND.—On Geology, Zittel, in *Baedeker, Unterägypten* by Ebers (1885); first part of De Morgan, *Rechs. s. les Origines de l'Ég.* (1896); chaps. in Fl. Petrie, *Ten Years' Digging, History I.* and in *Ninth Or. Congr.* (1893). On Metals, Lepsius, *Die Metalle* (1872), and articles by Montelius, M. Berthelot, etc. (C) FAUNA AND FLORA.—The respective chapters in *Baedeker* (1885 and 1897); articles by V. Loret in *Rec. de Trav.* (Paris); chapters of the works under A (above).—(D) ETHNOLOGY.—J. de Morgan, *Rechs. s. les Origines* (1896); Sergi, *Anthrop. de la Stirpe Camitica* (1897); R. Hartmann, *Völker Afrikas* (1879); Amélineau, *Nouv. fouill. d'Abydos* (1893); articles by Virchow; chapters by Schweinfurth in *Baedeker*; chapters in the works of Erman, Maspero, Ed. Meyer, Petrie. (E) LANGUAGE.—Erman, *Ägypt. Gram.* (1894), esp. for classical periods; do. *Neuäg. Gram.* (1880), for the New Kingdom; Brugsch, *Gram. démotique* (1855), works and articles by Revillout, Krall, W. Max Müller, J. J. Hess, for language of Saite and following epochs; G. Steindorff, *Kopt. Gram.* (1894), for language of Christian epoch; Dictionary, Brugsch, *Dict. hiérog.* (1867 ff.). For Semitic affinities, Erman in *ZDMG* xlv. i.; Bondi, *Dem. Hebr. Sprachw. angeh. Lehnwörter* (1886); Hommel in *Beitr. z. Assyr. ii.*, and in *Ninth Or. Congr.* (1893, cf. Brünnow in *Z. Ass. viii.*). For African affinities, Prætorius *Beitr. z. Assyr. ii.* (F) PROFANE LITERATURE.—Chapters in the works of Erman, Maspero; Maspero, *Contes pops.* (1889); Petrie, *Egypt. Tales* (1895); Amélineau, *Contes de l'Ég. chrét.* (1888). (G) CHRONOLOGY.—Lepsius, *Königsbuch* (1855); Brugsch-Bouriant, *Livre des Rois* (1887); Wislicenus, *Astron. Chronol.* (1895); articles by Mahler in *Äg. Z.* xxvii. xxviii. xxxii., and *Der Pharao d. Exod.* (1896); articles by Petrie and chapters in his *History*; C. Torr, *Memphis and Mycenæ* (1896, cf. Myres in *Class. Rev.* 1897); for Manetho, Unger, *Chronol. d. Man.* (1867). (H) HISTORY.—Maspero, *Hist. anc. d. peup. de l'Or. class.* (2 vols. 1895-96, transl. SPCK); Ed. Meyer, *Gesch. d. Alt. i. ii.* (1884, 1893); do. *Gesch. d. Alt. Äg.* (1887); Erman, *Ägypten (passim)*; Petrie, *Hist. of Eg. i. ii.* (1894, 1896); Wiedemann, *Ägypt. Gesch.* (1884 ff.); do. *Gesch. v. Altäg.* (1891), with special

ref. to OT; Mahaffy, *Emp. of Ptoles.* (1895). For Herodotus, Wiedemann, *Herod.'s 2. Buch* (1890). Hist. Geography, Dümichen, *Geogr. d. Alt. Äg.* (1878). (J) RELATIONS WITH ASIA.—W. Max Müller, *Asien u. Europa* (1893, cf. Jensen in *Z. Ass. x.*); For relations with OT, Ebers, *Äg. u. Büch. Mose's* (1868); do. *Durch Gosen z. Sinai* (1872); C. Niebuhr, *Gesch. d. Ebr. Zeitalters* (1894); Sayce, *Patr. Palestine* (1895); Ed. Meyer in *Festschr. f. Ebers* (1897). (K) RELIGION.—Erman's *Ägypten*; Maspero's and Meyer's *Histories (passim)*; Maspero, *Éts-de Mythol.* (1893), the most important work on the subject; do. *Pyramides de Saqqarah* (1894=*Rec. de Trav.* iii.-xiv.), with transl.; Le P. EGYPT, RIVER OF, occurs repeatedly in AV (Nu 34^s, Jos 15^{4, 47}, 1 K 8^{6s}, 2 K 24⁷, 2 Ch 7^s, Is 27¹²) as *tr*^a of נַחַל מִצְרַיִם (παραρὸς Αἰγύπτου, Jth 1⁹). The term is used to designate not the Nile, whose common title is נַחַל, and which cd. never be called נַחַל, the latter word being the exact equivalent of the modern *wady*. (See BROOK.) In all the above OT passages (cf. also Ezk 47¹⁹ 48²³) RV substitutes 'brook' for 'river,' but inconsistently retains 'river' in Jth 1⁹. The stream referred to is the *Wady el-'Arish*, which flows through the northern portion of the Sinaitic peninsula, draining into itself the waters of many other wadies, and flows into the Mediterranean midway between Pelusium and Gaza (Maspero, *Dawn of Civilization*, 348). It derives its name from the village *el-'Arish* (the ancient *Rhinocolura*, Diodor. i. 60), situated near its mouth. The 'river of Egypt' is repeatedly specified in OT as the S.W. boundary of Canaan. The same stream is called *nahal Muzur* by the Assyrian king Esarhaddon, who apparently means to distinguish it from the Nile by adding *ashar naru lâ ishu*, 'where no river is,' *i.e.* no continuous stream (Hommel, *Anc. Heb. Trav.* 257).

Once in OT (Gn 15¹⁸) the 'river of Egypt' (נַחַל מִצְרַיִם, not נַחַל) means the Nile if MT is correct, but we shd. probably emend to נַחַל so Lagarde, followed by Ball in Haupt's OT). *Shihôr*, which elsewhere (Is 23^s, Jer 2¹⁸) is applied to the Nile, appears to be a designation of the *Wady el-'Arish* in Jos 13^s, 'Shihor (RV 'the Shihor') which is before Egypt,' and 1 Ch 13^s (cf. 1 K 8^{6s}), 'from Shihor of Egypt (RV 'Shihor the brook of Egypt') even until the entering in of Hamath.' (So Del. on Gn 15¹⁸ and Hommel, *Anc. Heb. Trad.* 242 f., although Frd. Delitzsch and Dillmann prefer to understand it of the most easterly arm of the Nile.)

J. A. SELBIE.

EGYPTIAN, THE (ὁ Αἰγύπτιος).—In Ac 21³⁸ Claudius Lysias the chief captain (Chiliarch) is represented as saying to St. Paul, 'Art thou not then the Egyptian, which before these days stirred up to sedition and led out into the wilderness the four thousand men of the Assassins?'

This E. is mentioned by Josephus in both his works. While describing the procuratorship of Felix, he mentions the Sicarii or ASSASSINS, then in distinction to these the religious impostors, then a certain Egyptian. The latter professed to be a prophet, and collected together a body of 30,000 persons, whom he led to the Mount of Olives, asserting that the wall of Jerus. would fall down before him, and that he could capture the city. Felix attacked him with a considerable force, and dispersed his followers, slaying 400, and taking prisoner 200. The Egyptian himself escaped.

Krenkel, following Holtzmann, Hausrath, Keim, and the author of *Supernatural Religion*, attempts to show that the author of the Acts is indebted to Josephus for his knowledge of this event. He is quite unsuccessful. There are no signs of literary obligation, and very definite discrepancies. Josephus gives different numbers; he does not definitely connect the Egyptian with the Sicarii, but rather contrasts him; and he does not represent the wilderness as the place to which the people were led, but the Mount of Olives. It may be quite possible to explain these discrepancies so as to save the historical accuracy of both writers, but they are fatal to our regarding Josephus as the source of information. The only reasonable opinion that can be held is that we have two independent and contemporary accounts of the same event, and that the resemblances arise from this fact.

LITERATURE.—Jos. *Ant.* xx. viii. 6; *BJ* ii. xiii. 5; Schürer, *HJP* i. ii. 180; Krenkel, *Josephus und Lucas*, p. 240.

A. C. HEADLAM.

EGYPTIAN VERSIONS.—The various Egyptian dialects and the Versions contained in them are a subject of so much confusion that it will be well for the sake of distinctness to deal in this article first with the Dialects and their proximate dates, and then with the extant remains of the Versions and their proximate dates. We will conclude with a short study of the Greek Text implied by the Versions, and the history of the criticism of them.

1. **DIALECTS OF COPTIC.**—The latest stage of the Egyptian language, and that which was spoken in Christian times, is now known by the name of Coptic. The word itself comes from a corruption of the Greek *Αἴγυπτος*. Coptic was written in Greek characters, with the addition of some extra letters representing sounds which could only imperfectly be expressed by the Greek alphabet. These letters were modifications of characters found in Demotic—the popular form of the old Egyptian language spoken in the centuries immediately before the Christian era. Although it is still used in the services of the Church, Coptic is now practically a dead language. Our knowledge, therefore, of it must be derived from manuscripts and inscriptions. When these began to be studied by European scholars, it soon became evident that the language as spoken in different parts of the country presented certain dialectical peculiarities. Not only was it early recognized that the dialect used in the North differed considerably from that used in the South, but a third dialect was also detected, which, as a general rule, resembled the southern: it had, however, many northern forms, and sometimes showed peculiarities of its own. A long controversy, lasting for more than a century, was waged over the district to which this third dialect was to be assigned. The attention of Coptic scholars was early directed to a noteworthy passage from Athanasius, a bishop of Kos in the Thebaid, who flourished in the 11th century. In his Arabic-Coptic Grammar, Athanasius says: 'Know that the Coptic language is divided into three branches. One of them is the Coptic of Misr, which is the Sahidic; and another is the Bohairic Coptic, which gets its name from El-Bohaira; ^a and the other is the Bushmuric Coptic, which is used in the country of El-Bushmur, as thou knowest. But those now in use are only the Bohairic Coptic and the Sahidic. And the origin of them is one language.'^β Here we have a mention of three dialects—Sahidic, Bohairic, and Bushmuric. The first two are, as Quatremère pointed

out, ^α clearly the same as those sometimes called Thebaic and Memphitic. But what was the last? Was it to be identified with the third dialect known to us? Or was it the name of a still unknown dialect? Before this question could be answered, the position of Bushmur had to be determined. Quatremère proved that it could not be placed in the South of Egypt, nor in the Oasis and neighbouring deserts, but that it must be situated in the North.^β It is the country in the east of the Delta bordering on the sea.^γ Quatremère was of opinion that our third dialect had no connexion with Bushmuric, of which we had only a single word preserved to us.^δ But if it was not Bushmuric, how came it not to be mentioned by Athanasius? Quatremère answered the question by supposing that it was in use not exactly in Egypt, but in a country close by—the great and little Oases, 'which, situated at a little distance from Egypt, stretch from north to south, from the parallel of Assouan as far as the frontier of the Fayûm.'^ε Since Quatremère's time a large number of fragments have come to light which prove that he was right in refusing to call the dialect Bushmuric. Whether or not it was spoken in the southern Oasis, we now know for certain that it was used in the neighbourhood of the Fayûm and Memphis; and a study of Middle Egyptian shows us that the reason why Athanasius did not mention it may have been that he did not regard it as a separate dialect. This third dialect, lying as it does geographically and linguistically between Sahidic and Bohairic,^ς may conveniently be termed Middle Egyptian. When we come to examine it more carefully, we are confronted with fresh difficulties. Whilst Sahidic and Bohairic are for the most part clearly defined and regular dialects, Middle Egyptian presents us with an almost bewildering number of alternative forms. When spoken in the Nile Valley the dialect is a kind of mixture between Sahidic and Bohairic. But in some of the fragments which come from the Fayûm—a district some distance to the west—the dialect has developed more decided peculiarities of its own. It is dangerous, however, to draw any hard-and-fast distinction between the forms of the language current in the two places; for at a later date the dialect used in the Fayûm bore a considerable resemblance to that used at one time in Memphis.^η Many of the other varieties are no doubt due to ignorance or indifference on the part of scribes, some of whom in the Fayûm belonged to the peasant and artisan class.^θ Such an explanation does not, however, cover the case of some fragments recently found in Akhmîm and in the Fayûm, which present further dialectical peculiarities unknown to us before. Stern has carefully examined the dialect of these fragments, and has shown good reason to believe that it presents us with an earlier form of Middle Egyptian, closely allied to the dialect found in fragments written at Memphis.^ι

We may sum up these results as follows:—

Sahidic = Dialect of Southern (or Upper) Egypt: sometimes called 'Thebaic.'

^α Quatremère, *op. cit.* p. 22.

^β *Ib.* p. 147 ff.

^γ See Yâkût, i. 634.

^δ Quatremère, *op. cit.* p. 214.

^ε *Ib.* p. 217.

^ς Sometimes it very closely resembles Bohairic. See the dialect of the Fragment of the Song of Moses given by Crum, *Coptic MSS brought from the Fayûm*, p. 12 ff.

^η Cf. the dialect of the Fayûm fragment published by Quatremère, *op. cit.* p. 243 ff., with the dialect of those edited by Revillout, *Papyrus Coptes* (Paris, 1876), p. 101 ff.

^θ See Krall, *Mittheilungen aus der Sammlung der Papyrus Erzherzog Rainer* (Vienna, 1857), i. p. 65.

^ι *Zeitschrift für Agyptische Sprache*, 1886, p. 129 ff.

^a *I. e.* the district south of Alexandria.

^β The original of the passage is given in Quatremère, *Recherches sur la Langue et la Littérature de l'Égypte* (Paris, 1808), p. 21.

Middle Egyptian—Dialect of (a) Memphis and neighbourhood, and (b) the Fayûm.

Bohairic—Dialect of district south of Alexandria: sometimes called 'Memphitic' (or 'Coptic').

2. RELATIVE DATES OF DIALECTS.—The Arabic historian Maacrizi, who flourished at the beginning of the 15th century, speaks of Sahidic as 'the primitive source of the Coptic language, and that from which is derived the Bohairic dialect.'^a Such evidence as there is confirms his statement as to the late date of Bohairic. Bohairic (which was originally confined to the district south of Alexandria) is the most literary and artificial of Coptic dialects. The form of many of its words, when compared with the corresponding Sahidic, points to a later stage of development. Its frequent use of connecting particles, reminding us of Greek rather than Egyptian, seems also to point in the same direction. It was most probably developed from Middle Egyptian, which at one time may possibly have been spoken in the neighbourhood of Alexandria itself.^β To what extent it was used for other than ecclesiastical purposes we have at present no means of ascertaining.^γ But if it was in the main a literary rather than a popular language, this fact would explain why it died out, except for ecclesiastical purposes, earlier than Middle Egyptian and Sahidic.^δ There is, on the contrary, no doubt that the last-named dialects were the language of the people. We have numerous fragments of letters in Middle Egyptian and remains of school-books in Sahidic.^e The line of demarcation between the two dialects was not sharp, and sometimes pieces of writing are found in which single sentences are almost entirely written in Sahidic, whilst others are almost entirely in Middle Egyptian.^ζ Thus, whilst we find Sahidic forms in use in documents written in the neighbourhood of Hermopolis Magna and Antinoe,^η we have evidence that as far south as Thebes pure Sahidic was not always written.^θ When Middle Egyptian and Sahidic began to be written we do not know. As far as the evidence

^a Quatremère, *op. cit.* p. 42.

^β See the interesting fragment published by Krall, at the end of an art. "über die Anfänge der Koptischen Schrift," *op. cit.* i. p. 112, where an Alexandrian in signing his name makes use of the Fayûmic dialect. Too much stress, however, must not be laid on this passage; for, as Mommsen points out, 'the belonging to an Egyptian district' was independent of dwelling-place, and hereditary. The Egyptian from the Chemmitic nome belonged to it with his dependents, just as much when he had his abode in Alexandria as the Alexandrian dwelling in Chemmis belonged to the burghers-body of Alexandria' (Mommsen, *The Provinces of the Roman Empire*, c. xii. Eng. trans. p. 235). The arguments put forward in that article in favour of an early date for the Bohairic dialect (see also Headlam in Scrivener's *Introduction to NT*, ii. 126 f., and Hyvernat, *Revue Biblique*, 1897, No. 1, p. 67) are valueless. (1) The abbreviations found in Coptic MSS for 'God' and 'Lord' need not have originated in Bohairic. If they occurred (and they never do, as far as I know) in MSS written in pure Sahidic, they might as easily have been taken from M.E. as from Bohairic. Indeed an abbreviation of 'Lord,' which is almost exactly the same as the one in common use in Bohairic, is found in a M.E. MS, which 'in its writing,' says Krall (p. 110 f.), 'reminds us of the Codex Sinaiticus.' (2) Even if Krall's hypothesis of the origin of the last letter of the Coptic alphabet were satisfactory, it does not prove his point. The contraction might have arisen in M.E. as easily as in Bohairic. But most probably his hypothesis is wrong, and the letter is derived from Demotic (see Steindorff, *Koptische Grammatik*, § 4).

^γ Attempts to use Bohairic for letter-writing, using throughout Greek characters, are given by Krall, *op. cit.* ii.-iii. p. 56, v. 41; Crum, *op. cit.* p. 59 f. Unfortunately, as Krall says, 'the geographical and climatic conditions of the Delta are not favourable to the preservation of papyrus.' We cannot therefore be certain of the exact dialect which the hermits near Lake Menzaleh spoke, when Cassian visited them at the end of the 4th century. It may have been a form of M.E. or Bohairic. We gather from Cassian (*Coll.* xi. 3, xvi. 1; Migne, *P.L.* xlix. 850, 1011) that some of them did not know Greek.

of documents is concerned, we have fragments in Middle Egyptian (earlier and later) and Sahidic, some of which take us back to the 4th or 5th centuries.^a But as early as the 2nd century efforts were made to write Egyptian in characters not unlike our present Coptic ones.^β

3. EXTANT REMAINS OF VERSIONS.—We have remains of biblical versions in all three dialects; but a considerable portion of the Sahidic has disappeared, whilst only very short fragments of the Middle Egyptian are extant. A useful list of MSS containing portions of the Coptic Bible has been given by M. Hyvernat in the *Revue Biblique Internationale* for 1896, No. 4, p. 540 ff. We shall here confine ourselves to editions of the versions.

(a) *Sahidic*.—The fullest collections of extant fragments of the version of the NT are those published by Woide,^γ and Amélineau.^δ Some fragments of the Apocalypse have recently been brought together by Goussen.^e A complete collection, together with a translation, is urgently needed. The best collections of the remains of the OT have been made by Ciasca,^ζ Maspero,^η and Lagarde.^θ Quotations from the Sahidic Bible are found in the 'Pistis Sophia,'^ι and other Sahidic books. The Psalms quoted in the former work resemble the Sahidic version. In fact, as a general rule citations in either the Bohairic or Sahidic dialect agree with the version of the Bible current in that dialect.^κ Other collections of fragments of the Sahidic Bible are described in the *Revue Biblique Internationale*, 1897, No. 1, pp. 55-62.

(b) *Middle Egyptian*.—That there was a separate Middle Egyptian recension of part, at least, of the Bible is proved by the text of some of the NT fragments published by Zoega^λ and Maspero.^μ These are written in the dialect as spoken in the Fayûm, and sometimes in text and translation differ considerably from the corresponding Sahidic and Bohairic. How far all the biblical fragments extant in Middle Egyptian really constitute a separate version, we shall be able to judge with greater certainty when more fragments have been discovered, and when the Sahidic NT has been edited. Meanwhile, it is unsafe to conclude that a fragment written in this dialect necessarily presents a distinct recension. It may give, with merely dialectical changes, exactly the same version as the Sahidic.^ν We shall here simply state where specimens of the Bible written in Middle Egyptian may be found, without venturing to determine whether they are parts of a single version. Besides the fragments already alluded to,^ξ Bourriant has published two Gospel fragments, together with a

^ν Cf. the translation in old M.E. of Jude 17-19 with the corresponding Sahidic. See Crum, *op. cit.* p. 4.

^ξ Zoega publishes the first half of 1 Th and part of the following chapters: Is 1, 5, Jn 4, 1 Co 6-9, 14, 15, Eph 6, Ph 1, 2, He 5-10 (Engelbreth gives the same). 1 Co 9, 10-15 had already been edited by Giorgi (*Fragmentum Evangelii S. Johannis*, etc., Rome, 1789, p. 55 ff.), and Münter (*Commentatio*

small portion of Isaiah, the end of 2 Co and the beginning of Hebrews.^a A single verse from Jon 2 will be found in Tuki; ^β the last part of La and most of the Epistle of Jer. (with Latin translations) in Quatremère.^γ Crum has given a few verses from Mt 11. 12,^δ and Krall some verses of Ro 11. 12.^ε Besides these, Von Lemm has made another short collection of fragments in this dialect.^ζ To this list must be added some interesting biblical remains written in Old Middle Egyptian.^η Small portions of Exodus, Sirach, and 2 Mac are published by Bouriant.^θ We have an incomplete MS of the Minor Prophets, from which Krall has published specimen verses,^ι briefly enumerating the contents of the rest, which he will shortly publish.^κ Part of the same MS has recently been edited by Bouriant.^λ The NT fragments published by Crum ^μ are unfortunately very minute. Jude 17-20 and part of Ja 4¹²⁻¹³ alone survive.

(c) *Bohairic*.—The best edition of the Gospels is that of Schwartz,^ν and of the Acts and Epistles, that of Lagarde.^ξ The NT as a whole has never been satisfactorily edited. A serviceable edition was made by Wilkins, but the Latin translation which it contains is unsatisfactory.^ο A new edition of the Gospels is being prepared for the Clarendon Press by G. Horner. The Pentateuch was first published by Wilkins (with a translation),^π and then more carefully by Lagarde.^ρ Tattam has edited and translated (but uncritically) the Major and Minor Prophets and the Book of Job.^σ The best editions of the Psalms have been made by Schwartz^τ and Lagarde,^υ the latter edition being unfortunately printed in Latin characters. F. Rossi has lately edited a MS containing part of the Psalter.^φ Only small portions of the rest of the OT have been printed. For a list of these portions and of editions not mentioned here, see Hyvernat, *op. cit.* 1897, No 1, p. 48 ff.

4. DATE OF VERSIONS.—The earliest evidence for the existence of a Coptic version is usually said to be afforded by the Life of St. Antony, commonly attributed to St. Athanasius. We are there

de Indole Versionis Novi Testamenti Sahidice, Copenhagen, 1789, p. 78 ff.). Maspero has published Mt 5⁴⁸⁻⁶¹ (1889), p. 567 ff. The Gospel fragments are parts of Mt 13. 14, and of Mk 8. 9. The difficulty of drawing a sharp line of distinction between the various forms of the M.E. dialect is shown by the fact that Headlam is inclined to regard two parts of one MS of the Gospels as belonging to separate versions and dialects (see Headlam, *op. cit.* ii. p. 141 f.; cf. Hyvernat, *op. cit.* 1896, No. 4, p. 565 ff.).

told that he was an Egyptian, that his parents were Christians, and that as a child he went with them to church, and 'gave attendance to the readings' (i.e. from the Scriptures).^a When about 20 years of age 'he went into the church, and it happened that the Gospel was then being read.'^β He heard a text which influenced him profoundly. On other occasions, also, he heard passages read, and 'he gave such attendance to the reading that none of those things which were written fell from him to the ground, but he retained all, and thereafter his memory served him for books.'^γ From these passages it has been argued that, since we further know that St. Antony as a boy refused to learn letters,^δ and was unable throughout life to speak Greek,^ε there must have been in his boyhood a translation of the Scriptures in the Egyptian tongue. This, it is maintained, is confirmed by other passages in his Life, especially by the discourse which begins at c. xvi. We are there told that he spoke to the monks in the Egyptian tongue, saying, 'The Scriptures are sufficient for teaching; but it is good for us to exhort one another in the faith, and encourage with words.'^ζ In the discourse which follows there are quotations from, or allusions to, texts from various parts of the Bible. Since Antony, shortly before his death in A.D. 356, said, 'I am well-nigh one hundred and five years old,'^η he must have been born about A.D. 250. Therefore there must have been a translation of the Bible into Egyptian about the middle of the 3rd century. But such reasoning is not conclusive. This Life never speaks of Antony as reading the Bible. He only hears it read. The Coptic translation which he heard might well have been made at the time by an interpreter. The need of a written translation in the services of the Church would not at once be felt.^θ The Gospel would first be read in Greek, and then the Greek would be rendered into Coptic,^ι as at a later date the Coptic was rendered into Arabic by 'anyone who had the gift of speaking, so that he could interpret aright.'^κ In so far as Antony was in the habit of repeating texts in his discourses, he was enabled to do so by his remarkable memory. For we have no reason to suppose that he had a Bible of his own. But the speeches put into the mouth of the hermit cannot be used as evidence in such a case. For, even if we admit the historical character of the biography, it does not in the least follow that the discourses are verbatim reports.^λ On the authority, therefore, of this Life alone it is unsafe to base any conclusion as to the existence of a Coptic version of the Bible in the 3rd century.

There is, however, good ground for believing that a version existed in the 4th cent. It was at the beginning of this century that St. Pachomius first gathered solitary ascetics together in the south of Egypt under a common rule. If we may trust the

^λ E.g. the discourse in chapter 74. Robertson, who believes in the genuineness of the Life, admits that 'even an Athanasius would not so entirely rise out of the biographical habits of his day as to mingle nothing of his own with the speeches of his hero' ('Athanasius' in *Nicene and Post-Nicene Fathers*, p. 191).

accounts given in his Life, he himself spoke Egyptian, and only acquired Greek in later years.^a His monks as a rule were common Egyptian peasants, who knew no language but their own. The Greeks and Romans of his settlement were in a separate house, presided over by Theodore of Alexandria.^β Yet throughout his Life great stress is laid on the study of the Bible, and there are frequent allusions to learning passages by heart.^γ Pachomius himself was in the habit of speaking from the Scriptures to his monks.^δ When a novice first came, according to the rules of the monastery extant in Greek, he began by receiving 'the Prayer of the Gospel' (τὴν εὐχὴν τοῦ εὐαγγελίου) and learning certain Psalms.^ε Unless our accounts of Pachomius' life and work are most misleading, we can scarcely doubt that there was, early in the 4th cent., a Coptic version of the Bible. The attempt to trace the translation further back is beset with difficulties. We know very little concerning Christianity in Upper Egypt before the time of Pachomius. Eusebius indeed tells us that in the persecution under Severus (A.D. 202), which was especially felt at Alexandria, martyrs were brought to that city from 'Egypt and all the Thebaid.'^ς But no such tradition survives in Coptic literature. We have no evidence that in early days the Alexandrian Church seriously attempted missionary work. If the Alexandrians had wished to do so, it would have been no easy task. For they were regarded as foreigners by the rest of Egypt;^η and their position was not unlike that which Englishmen occupy in India to-day.^θ Besides the difficulty of the language,^ι they found it, as Origen says, no easy task to persuade an Egyptian to give up idolatry and 'despise those things which he had received from his fathers.'^κ Heathen worship down to a late time 'retained its firmest stronghold in the pious land of Egypt.'^λ The increase of the Episcopate under Demetrius (c. 189-232 A.D.), and more especially under his successor Heraclas (c. 233-248 A.D.), must indeed be regarded as an indication of missionary activity.^μ If Christianity in the time of Demetrius had spread as far south as Antinoe,^ν the Church was evidently becoming too large for the personal supervision of a single bishop at Alexandria.

The bishop who succeeded Heraclas—Dionysius

^λ Mommsen, *op. cit.* ii. p. 266. See also Amél. *Les Actes des Martyrs de l'église copte* (Paris, 1890), p. 7, note 2; Erman, *Z.A.S.* 1895, p. 43 ff.

^μ Eutychius, *Annales* (Pococke, Oxford, 1656), i. p. 332 (see Lightfoot, *Philippians*, p. 231 f.). The fact that before the time of Demetrius there was no Egyptian bishop outside of Alexandria need not suggest that 'the progress of Christianity was for a long time confined within the limits of a single city' (see Gibbon, *Decline and Fall of the Roman Empire*, c. xv. Bury's ed. ii. p. 60). For the Alexandrian diocese might have been, like the early dioceses of Gaul and N. Italy (Duchesne, *Fastes épiscopaux de l'ancienne Gaule*, i. p. 33 ff.), of very considerable extent. See Pearson, *Vindictæ Epist. S. Ignatii* (Cambridge, 1872) i. p. 170.

^ν Between the years c. 212-216 A.D. we find Alexander, bishop of Jerusalem, writing to the Antinoites and exhorting them to

the Great—has given in his letters a vivid picture of the Alexandrian Church of his time, but has told us little of the rest of Egypt. In his day no imperial edict was needed to start a persecution of Christians (A.D. 249). A large part of the population of Alexandria was still pagan, and only needed a leader to revive 'their native superstition' (τὴν ἐπιχώριον δεισιδαιμονίαν). When the Decian persecution (A.D. 250) broke out, he specially mentions four 'Egyptians' as among the sufferers.^a The persecution was not confined to Alexandria, but many others 'in cities and villages' were martyred, and the bishop of Nilus (in Middle Egypt) fled from his see.^β Coptic traditions of this persecution are scanty,^γ and we do not precisely know how far it extended. We find the same bishop writing letters to the brethren in Egypt^δ and to Egyptian bishops.^ε He also went to the Fayûm district. Here the teaching of Nepos, an Egyptian bishop (ἐπίσκοπος τῶν κατ' Αἴγυπτον), had for a long time prevailed, so that 'schisms and defections of whole churches had taken place.' Dionysius therefore called together 'the presbyters and teachers of the brethren in the villages,' and discussed their difficulties with them for three successive days.^ς We cannot gather, from any letters of his which have come down to us, information regarding Christianity farther south. We have to wait for such information till the beginning of the next cent. In the latter part of the Diocletian persecution Eusebius in person visited the Thebaid. He was an eye-witness of the massacres, and of the fanatical enthusiasm of many of the martyrs. The persecution continued, 'not for a few days or for a short time, but for a long period of whole years' (ἐπὶ μακρὸν ὄλων ἐτῶν διάστημα). Most of the sufferers apparently belonged to the lower classes of society, but there were some of high birth and distinction.^η Many bishops suffered for the faith,^θ but Eusebius does not say whether any of them came from the south. He has described the sufferings of the rest of the Egyptian Church in Egypt itself and elsewhere;^κ and has preserved an account by an eye-witness of the persecution in Alexandria.^λ But when we bring together all the historian's statements, it is singularly difficult to determine how far they imply the existence of a widespread native Christianity. We can only conjecture that amongst the numerous martyrs some of those in a lower station of life were natives. A century had passed since the bishop of Jerusalem wrote to the Greek-speaking population of the capital of the Thebaid.^μ In the meantime the Christians in that town may have done good work amongst the 'barbarians,' even if they had not attempted such work at first.

be of one mind (ἁμοσπονῆσαι). See Eus. *HE*, vi. 11. In the next century a bishop of Antinoe was present at the Council of Nicaea (Zoega, *op. cit.* p. 244).

^a Dion. ap. Eus. *HE*, vi. 41. Their names were Heron, Ater, Isidore, and Nemesion. Dionysius seems to imply that most of the others at Alexandria were Greeks. Arguments cannot be safely based on the absence of Egyptian names. Thus we have in the Fayûm a son of Satabus bearing a Latin and Greek name 'Aurelius Diogenes.' See Benson, *Cyprian*, Appendix B, p. 542.

^β Dion. ap. Eus. *HE*, vi. 42.

^γ See Amél. *Actes des M.* pp. 14-17. 'Matra' (p. 15) is probably the same as 'Metras,' who suffered the year before the Decian persecution (Eus. *HE*, vi. 41). See also Malan, *Calendar of the Coptic Church*, p. 10.

^λ Phileas, ap. Eus. *HE*, viii. 10. The account of Phileas' own trial is given by Ruinart, *Act. Sinc.* 2nd ed. p. 494 ff.

^μ Eus. *HE*, vi. 11.

The Coptic accounts of this persecution were written at a later date, and are disfigured by legendary additions. Yet the traditions of martyrdoms having taken place in the towns lying between Antinoe and Latopolis^α must have some historical foundation. They point to the fact that the persecution was particularly severe in the south. Many of the martyrs bear Greek names, and are connected with the army.^β Comparatively few bishops are mentioned.^γ Diocletian is hated with a wild, unreasoning hatred, due no doubt in part to political considerations. A religion must have gained in popularity among the fanatical, disorderly natives of Upper Egypt, simply because Diocletian and the Government were opposed to it. In fact we find, as we study these Coptic traditions, that however much the new religion had already appealed to the natives, a fresh era began with Diocletian,^δ and Christianity became, in a fuller sense than ever before, the religion of the people. Hatred of Diocletian, the faith of the martyrs, the sufferings which they endured, all contributed to this result. The consequence was that, when the persecution was over, 'the repentance of the heathen (ἡ ἐπιπένησις) was multiplied in the Church, the bishops leading the way unto God, according to the teaching of the apostles.'^ε

It will be evident from this brief study of the subject, that but little is known of Egyptian Christianity outside of Alexandria before the time of Pachomius. The state of the Church in his time—the history and legends of the Diocletian persecution—the increase of the Egyptian episcopate under Demetrius and Heraclius—suggest, but do not prove, that some time before the end of the 3rd cent. there was a considerable number of native Christians. They would soon feel the need of a translation of the Bible. Historical evidence, then, on the whole, points to the 3rd cent. as the period when the first Coptic translation was made.^ζ But this view can only be regarded as tentative. In the light of future discoveries it may have to be modified. This translation was most probably made, not in the neighbourhood of Alexandria, but in Middle or Upper Egypt. Here the native element was stronger than in the north; and, as Greek was less spoken, the need for a translation would be more keenly felt. All the evidence that we possess at present goes to prove that Coptic literature, whether orthodox or heretical, took its rise in the south; its development being assisted by the hatred felt towards the foreign or Greek element.^η

^α Amél. *Actes des M.* p. 30 ff.

^β *Ib.* pp. 26, 30, 103, 219.

^γ Zoega (*Cat.* pp. 237, 239) and Amélineau (*op. cit.* pp. 39, 53 f.) speak of the martyrdom of the bishops of Ptolemais and Hermopolis Magna. Amélineau (*op. cit.* p. 47 ff.) tells of the martyrdom of the bishop of Latopolis. Pisura and three other bishops (Zoega, *Cat.* p. 52; Hyvernat, *Actes des M.* i. p. 114 ff.), and the bishop of Prosopis in Lower Egypt (Zoega, *Cat.* pp. 62, 133; Hyvernat, *Actes des M.* i. p. 225 ff.), were also martyred. The bishop of Akimim fled (Amélineau, *Actes des M.* p. 32). The bishop of Lycopolis used the persecution as a means of self-aggrandisement (Hyvernat, *Actes des M.* i. 260), and, according to Athanasius (*Apol. c. Arianos*, 59) and Socrates (*HE*, i. 6), actually sacrificed.

^δ The era of the martyrs, on which Coptic chronology is usually based, begins with A.D. 284, the year of the accession of Diocletian.

^ε See Amél. *Vie de Pakhôme, Annales du MG*, xvii. pp. 2, 339; *Acta SS.* Mai. xiv. *Vit. Pach.* Prolog.; cf. also Migne, *PL*, lxxiii. 231.

^ζ The evidence of MSS does not help us much. Our oldest MSS are fragmentary, and their date a matter of uncertainty. But a Sahidic MS of part of 2 Th 3 (Kenyon, *op. cit.* plate xviii), and fragments in Old Middle Egyptian of Jude (Crum, *op. cit.* plate 1, No. 2), and of the Minor Prophets (Kral, *Führer*, p. 33, Tafel iii.), take us back to the 4th or 5th cents. Cf. also Stern, *ZAS*, 1836, p. 135.

^η Cf. Guidi, *Nachrichten von der K. G. d. W. zu Göttingen*, 1839, No. 3, p. 50 f.

5. GREEK TEXT IMPLIED BY VERSIONS.—All three versions of the NT must be more carefully edited before we can determine with certainty the underlying Greek text. The Sahidic NT contains some remarkable interpolations, usually classed as Western. Two striking ones are found in Lk. The parable of Dives and Lazarus begins thus in the Sahidic Bible: 'Now there was a certain rich man, whose name was (*lit.* is) Nineveh' (16¹⁹).^α When Joseph had laid the body of Jesus in the tomb (23³⁸), the Sahidic adds: 'Now when he had laid him, he placed (*or* laid) a stone at the door of the sepulchre, which twenty men could not have rolled' (β cf. Dc). Several interesting 'Western' interpolations are found in the Acts. Three examples may be quoted.^γ After the words 'ye shall be baptized with the Holy Ghost not many days hence,' the Sahidic has a strange gloss, 'but (ἀλλὰ) until Pentecost' (1⁵, cf. D). The negative form of the 'Golden Rule' is placed at the end of the apostolic injunctions to Gentile converts (15^{20, 23}, cf. D). After the vision of the man of Macedonia to St. Paul, the tenth verse of Ac 16 runs thus: 'And when he had risen, he told us the vision. Straightway we sought to go forth into Macedonia, telling (*or* showing) them that the Lord had called us for to preach unto them' (cf. D). On the other hand, several 'Western' interpolations, which we might have expected to find, are absent from the Sahidic.

The text of the Bohairic version, as is well known, corresponds in general with that of Codex Vaticanus. Whether it is yet more closely allied to the text used by Cyril of Alexandria is a matter which still remains to be determined. There can be but little doubt that in their original form both the Bohairic and Sahidic were free from 'Antiochian' interpolations. A collation of the versions in those parts of the NT, where all three are extant together, proves that the Middle Egyptian is often closely related to the Sahidic. This is most clearly seen in the Pauline Epistles. Thus an examination of the three versions in 1 Co proves that the Sahidic and Middle Egyptian are not entirely independent translations. Sometimes they are based on a different Greek text from that which underlies the Bohairic. But, even when they are translating the same original, their rendering is often strikingly different from that of the Northern version. We may take 1 Co 15¹²⁻¹⁴ as an example. Here the Sah. and M.E. translations are practically identical: 'But δ if Christ is preached that he rose from the dead, in what manner do some among you say that the dead do not rise? If the dead do not rise, then Christ did not rise. If Christ did not rise, then is our preaching vain, and vain is our faith also.'^ζ The Boh. translation is not so free: 'But if Christ is preached that he was raised from the dead, how (πῶς) do some among you say that there is no resurrection (ἀνάστασις) of the dead? But if there is no resurrection (ἀνάστασις) of the dead, then not even (οὐδέ) was Christ raised. But if Christ was not raised, then (ἀρα) vain is our preaching, vain also is your faith.'^η This instance—and it is one among many—shows us that the Sah. and M.E. must in some way be related to one another. A cursory examination might suggest that they are practically the same version,

^α Cf. Harnack, *Texte u. Unters.* xiii. 1, 75 ff.

^β In the bilingual MS described by Amélineau (*Notice des MSS Coptes de la Bibl. Nationale*, Paris, 1895) the Gr. runs thus: καὶ θένον αὐτοῦ ἐπέθηκαν τῷ μνήμῳ λίθῳ μέγαν ὃν ἡμεῖς εἰκοσι ἀνδρες ἐκύλιον. The corresponding Sahidic is not published.

^γ Other interpolations will be found in Ac 12²³ 322 535 68 81 940 127 1410 151. 23. 34 1812 19 196. 25 2024 211.

^δ M.E. omits 'but.'

^ε So Engelbreth's Sah. Amélineau has 'your.'

^ζ Sah. omits 'also.'

^η A Coptic word for 'faith' is used. B. and M.E. employ the Greek πίστις.

and that the differences between them are purely dialectical. But when we inquire more closely into the passages where all three are extant, we find that such an explanation is not satisfactory. Sometimes each version is apparently an independent translation. Occasionally the Sahidic and Bohairic agree in rendering or in underlying text as against the Middle Egyptian. In other places—and this is especially the case in the Gospels^a—the Bohairic and Middle Egyptian are opposed to the Sahidic. Thus, in St. Matthew's account of the Lord's Prayer the difficult word *ἐπιούσιος* is represented in Sahidic by *that which is coming*, in the other two versions by *of to-morrow*.^β When we have recovered a larger portion of the Middle Egyptian version, and when the fragments already known have been collected and edited, we shall be able to speak with greater security. Meanwhile we may provisionally state our view as follows. The New Testament was first translated into Sahidic from a text containing a considerable 'Western' element. The translation was idiomatic and in some cases inexact. The Middle Egyptian, *γ* probably made very soon afterwards, was largely influenced by the Sahidic. The Bohairic, made last of all, though in places influenced by the two previous translations, represented an effort to translate with more literal exactness what was felt to be a superior Greek text.

The Coptic versions of the Old Testament are based upon the LXX. The study of them is of great interest, because it may help us to reconstruct the edition of the LXX made by Hesychius, which, as we learn from Jerome, was well known in Alexandria and Egypt.^δ Whether any of the versions of the Coptic Old Testament are free from the influence of Origen's revision is doubtful. Some Sahidic MSS give the Book of Job in a shortened form. The claim has been put forward *ε* that we have in these MSS a witness to the original text of the LXX, before Origen made his copious additions from Theodotion's version.^ζ But the last word on this subject has not been said. (Cf. Burkitt, *Texts and Studies*, iv. 3, p. 8.) The relation of the Middle Egyp. of OT to the Sah. has yet to be worked out.^η

5. HISTORY OF CRITICISM OF VERSIONS.—A careful study of the Coptic versions of the New Testament is given by Lightfoot in Scrivener's *Introd. to the New Test.*^θ Lightfoot, as many distinguished scholars before him,^ι believed that 'we should probably not be exaggerating, if we

^a An examination of Mt 6³⁻¹⁵ and Jn 4²³⁻³⁰ will prove the truth of this assertion.

^β This translation in the Bohairic of Mt is probably the result of a deliberate revision. The older rendering (cf. Lat. Vulg.) still remains in Lk, where the Boh. has *that which is coming* (M.E. is wanting in Lk 11). At the end of the prayer the Doxology is wanting in Boh. The Sah. has, 'For thine is the power and the dominion for ever and ever, Amen.' The M.E. has, 'For thine is the power and the glory for ever, Amen' (cf. Didache viii. *δου σου ισχυρις η δυναμις και η δοξα εις τους αιωνας*).

^γ The fragments of the NT written in Old M.E. are too minute for classification. The little that remains shows the same text as the Sahidic. But when we recover more, we may find that it differs only dialectically from the ordinary M.E. version.

^δ *Præf. in Par.* (Vall. ix. 1405); *Apol. adv. Rufin.* ii. 27 (Vall. ii. 522).

^ε See Ciasca, *op. cit.* vol. ii. p. xviii ff.; Hatch, *Essays in Biblical Greek*, p. 216.

^ζ *Hier. Præf. in Job* (Vall. ix. 1097).

^η The translations of Zec 13⁵ in Sah. and Old M.E. cannot be independent. Both add (? cf. Field) *και ιδου εις με*—a reading evidently derived from Theodotion, and omitted in Boh. The words *δου σου αβρααμ ισαακ ιακωβ σου κυρις ην ειναι εις με* are found in the Old M.E., but not in Boh. and Sah.

^θ Scrivener, *Plain Introduction to the Criticism of the NT*, ed. iii. p. 365 ff.; see also Gregory, *Prolegomena* (1884), 859 ff. For an interesting and concise account of these versions see Kenyon, *Our Bible and the Ancient MSS* (1895), p. 75 f. 160 ff. A useful summary of the literature of the subject is given by Nestle, *Urtext und Übersetzungen der Bibel* (1897), p. 144 ff.

^ι See Quatremère, *op. cit.* p. 9. Cf. Schwartz, *Ev. in Dial. Memp.* p. xviii.

placed one or both of the principal Egyptian versions,' i.e. the Bohairic and the Sahidic, 'or at least parts of them, before the close of the 2nd cent.'^α This view has been followed by Westcott and Hort, who maintain that 'the greater part of the Bohairic version cannot well be later than the 2nd cent.,' whilst 'the Version of Upper Egypt . . . was probably little if at all inferior in antiquity.'^β Headlam, who, in the last edition (1894) of Scrivener's *Introduction*, has given a summary of the history of the criticism of the Coptic NT from the point where Lightfoot stopped, considers that 'it has been sufficiently proved that translations into Coptic existed in the 3rd cent., very probably in the 2nd.'^γ Ciasca, in the introd. to his edition of the Sahidic OT (where references will be found to the work of former editors *δ*), discusses the text and date of the Book of Job.^ε His examination of the book confirms him in the belief that Lightfoot was right in assigning part at least of the Coptic versions to the 2nd cent.^ζ It is with the greatest diffidence that we have ventured to suggest that this early date (even if it is right) has not been proved. Our belief in the historical evidence for such a date was shaken by an article *η* published by Prof. Guidi, to which reference has already been made; and subsequent study has confirmed us in the view that there is, as yet, no adequate evidence of the existence of a Coptic version at such an early date as is often maintained.

FORBES ROBINSON.

EHI (אֵהִי).—The eponym of a Benjamite family, Gn 46²¹, where, however, אֵהִי אֵשֶׁת קַיִם must be corrected after Nu 26^{38f.} to אֵהִי אֵשֶׁת קַיִם. 'The corruption was perhaps prior to the adoption of the square character; *א* and *ש* in the old script being similar and liable to confusion. It may, however, be due to mere transposition of the two letters' (Ball in Haupt's *Genesis*, ad loc.). See further AHIRAM, and cf. Gray, *Heb. Prop. Names*, 35.

J. A. SELBIE.

EHUD (אֵהוּד), son of Gera, a left-handed Benjamite, delivered his people by a bold exploit from Eglon, king of Moab, who had captured Jericho and oppressed Israel for eighteen years. This history is given in Jg 3¹²⁻³⁰. The compiler has furnished an introduction and conclusion in his usual manner (vv. 12-15a. 30b); the narrative itself (vv. 15b-30a) is one of the most ancient in the book, and a characteristic specimen of the best style of Heb. storytelling. Doubts have been cast upon the name of the hero, because Ehud and Gera elsewhere are names of Benjamite clans. Gera is a son (Gn 46²¹) or grandson (1 Ch 8³), Ehud is a great-grandson (1 Ch 7¹⁰), of Benjamin (Nöldeke, *Untersuch.* p. 179 f.; Stade, *Gesch.* i. 68). But E. may well have been the name of the hero before it was the name of the clan called after him (Budde, *Richt. u. Sam.* 100). Wellhausen (*Gott. Nachrichten*, 1893, p. 480) suggests that אהוד may be an abbreviation of אהיהוד in 1 Ch 8³.

G. A. COOKE.

EITHER.—1. Now alternative, one or the other; in older Eng. 'either' was comprehensive, each of

^α Scrivener, *op. cit.* ed. iii. p. 371.

^β Westcott and Hort, *The NT in the Original Greek*, smaller ed. p. 574.

^γ Scrivener, *op. cit.* ed. iv. vol. ii. p. 105 f.

^δ Ciasca, *op. cit.* vol. i. p. viii f.

^ε *Op. cit.* vol. ii. p. xviii ff.

^ζ *Op. cit.* vol. ii. p. xxxvi f.

^η *Nachrichten von der K.G. d. W. zu Göttingen*, 1889, No. 3, p. 49 ff. Steindorff (*op. cit.* § 2) suggests the end of the 3rd cent. as the date of the Coptic translation of the Bible. Stern in his *Critische Anmerkungen zu der bohairischen Übersetzung der Proverbia Salomonis* (ZAS, 1882, p. 191 ff.) conjectures that the Boh. Version may be much later than the Sah., which, in part at least, was made in the 3rd cent. (p. 202). He thinks it possible that the Boh. and Sah. Versions may prove to be based on some form of the M.E. (ZAS, 1882, p. 135).

two, like its German equivalent 'jeder.' Thus Lv 10¹ 'Nadab and Abihu, the sons of Aaron, took either of them his censer'; 1 K 7¹⁵; Jn 19¹⁸ 'on either side one,' and Rev 22² 'on either side of the river was there the tree of life.' Cf. Ridley, *Brefe Declaration* (1555), p. 102 (Moule's ed.), 'as some of them do odiously call either other'—changed in the Oxf. ed. 1688 into 'each other.' 2. 'Either' was formerly used to introduce the second or any later alternative, as well as the first; so Ja 3¹² and Ph 3¹² 'Not as though I had already attained, either were already perfect' (RV 'or'); and so Lk 6⁴² 'Either how canst thou say to thy brother' (RV 'Or'). In this sense 'either else' is also found, as Stubbes, *Anat. Abus.* ii. 10, 'Either else they would never be so desirous of revenge.'

J. HASTINGS.

EKER (עקר).—A Jerahmeelite (1 Ch 2²⁷). See GENEALOGY.

EKREBEL (Ἐκρεβήλ), Jth 7¹⁸.—Apparently the town of *Akrabeh*, E. of Shechem, the capital of Akrabattine (*SWP* ii. sh. 12).

EKRON (עקרן, Ἀκκαρών), one of the five principal cities of the Philistines, the one farthest to the N. (Jos 13³). It was a centre, having towns and villages dependent upon it (Jos 15⁴⁶). In the first division of the land W. of the Jordan it was assigned to Judah, being on the N. boundary of that tribe (Jos 15^{45, 46, 11}), but in the later division the boundaries were so rectified as to give it to Dan (Jos 19⁴³). It is mentioned as among the cities not captured under Joshua (Jos 13³). After his death it was taken by Judah (Jg 1¹⁸); but the possession was not permanent, for we afterwards find it in the hands of the Philistines till the time of David. It is prominently mentioned in the history of the time when the ark was in the land of the Philistines (1 S 5. 6), and in connexion with later events (1 S 7^{14, 17²²}). Like the rest of the Phil. cities, it became practically independent soon after the disruption. It is mentioned in history in the time of Jehoshaphat (2 K 1^{2, 3, 6, 16}), in the time of Amos (Am 1⁶, Zec 9^{6, 7}), and in the time of Jeremiah (Jer 25²⁰). The records of Sennacherib, king of Assyria, mention a revolt of E. from the Assyrians to Hezekiah, and the condign punishment inflicted (see, e.g., Smith's *Assyr. Disc.* pp. 304–306). It is found in the Apocrypha (1 Mac 10⁶⁸, AV **Accaron**) as a place given by Alexander Balas to Jonathan Maccabæus in reward for his services. It is spoken of in connexion with a march of king Baldwin the crusader, A.D. 1100 (Robinson, *BRP* ii. 228). It is apparently identified with *Akir*, 4 miles E. of *Yebna*, and is now a station on the railway from Jaffa to Jerusalem. (See PHILISTINES. See also Smith, *HGHL* 193, 218). **Ekronite**.—A citizen of Ekron. The word is used in the singular in Jos 13³, where 'the Ekronite' is spoken of, meaning the people of Ekron collectively, and in the plural in 1 S 5¹⁰, where the citizens are spoken of individually.

W. J. BEECHER.

EL.—See GOD.

ELA (Ἰλαδ). 1. 1 Es 9²⁷=ELAM, Ezr 10²⁶. 2. (1 K 4¹⁸ אֵלָה, AV Elah) Father of Shimei, who was Solomon's commissariat officer in Benjamin.

ELAH (אֵלָה 'terebinth').—1. (Gn 36⁴¹, 1 Ch 1⁵²) The fifth 'duke of Edom.' These names prob. indicate districts called after certain chieftains. Comp. the use of Mamre, Caleb, etc. 2. (1 K 16⁶⁻¹⁴) King of Israel, son of Baasha. His reign can scarcely have lasted two years, since he came to the throne in the 26th year of Asa, and was killed in the 27th. The story of Elah's death suggests

that he was a worthless sot ('drinking himself drunk in the house of Arza his steward,' 1 K 16⁹). Jos. (*Ant.* viii. xii. 4) says that Zimri took advantage of the absence of the army at Gibbethon (1 K 16¹⁵) to kill Elah while unprotected. His death was followed by the extirpation of his family, in fulfilment of the prophecy of Jehu (1 K 16^{8, 4}); but the sacred narrative reminds us that the fact of a man's being the rod of God's anger does not exempt him from punishment for the crimes he commits in accomplishing the design of Providence (1 K 16⁷), cf. Hos 1⁴, Am 1⁴. The office which Arza held was a very high one, see 1 K 4^{2, 6}. 3. Father of Hoshea, last king of Israel (2 K 15³⁰, 17¹, 18^{1, 9}). 4. (1 Ch 4¹⁵) Second son of Caleb. Rawlinson suggests that the last words of the verse should be: 'and the sons of Elah, Jehallelel and Kenaz.' (So Keil.) Similar omissions occur in 6²⁸, 8²⁹, 9⁴¹. 5. (1 Ch 9⁸) A Benjamite who dwelt in Jerus. in the time of Neh. He is not mentioned in the parallel list, Neh 11.

N. J. D. WHITE.

ELAH, THE VALLEY OF (אֵלָה רִמְמֹן; ἡ κοιλάς Ἰλα, Α τῆς ὀρυθῆς 'the valley of the terebinth').—The scene of the defeat of the Phil. champion Goliath at the hands of David (1 S 17^{2, 19}, 21⁹). The valley of E. is probably the modern Wady es-Sunt (=terebinth), the third and most southerly of the valleys which cut through the Shephelah, and so lead up from the Phil. plain into the heart of Judæa. 'An hour's ride from Tell es-Safi' (at the entrance to the Phil. plain) 'up the winding vale of E. brings us through the Shephelah to the spot where the Wady es-Sur turns S. towards Hebron, and the narrow Wady el-Jindy strikes up towards Bethlehem. At the junction of the three there is a level plain, a quarter of a mile broad, cut by two streams, which combine to form the stream down Wady es-Sunt. This plain is probably the scene of David's encounter with Goliath' (G. A. Smith, *Hist. Geogr.* p. 227).

The Philistines had pitched their camp between Socoh and Azekah, i.e. on a ridge separated from the rest of the low hills, and facing the Israelites across the valley. The 'gai' (גַּי) or ravine, which separated the two armies, is the deep trench formed by the combination of the two streams; this, in fact, formed a valley within the valley. The Israelites had taken up their position on the farther or eastern side of the vale, somewhere on the slopes of the Wady el-Jindy, thus securing their line of retreat up the Wady. The natural strength of both positions was thus very great, since, if either army attacked, they must not only cross the ravine, but also climb the opposite slopes, and so place themselves at a great disadvantage; the long delay of the two armies, in face of each other, was probably due to this fact.

J. F. STENNING.

ELAM (אֵלָם).—1. A son of Shem (Gn 10²²=1 Ch 1¹⁷), the eponymous ancestor of the Elamites (see following article). 2. A Korahite (1 Ch 26³). 3. A Benjamite (1 Ch 8²⁴). 4. The eponym of a family of which 1254 returned with Zerub. (Ezr 2⁷, Neh 7¹², 1 Es 5¹²) and 71 with Ezra (Ezr 8⁷, 1 Es 8²⁸). It was one of the Benê-Elam that urged Ezra to take action against mixed marriages (Ezr 10²), and six of the same family are reported to have put away their foreign wives (Ezr 10²⁸). Elam acc. to Neh 10¹⁴ 'sealed the covenant.' 5. In the parallel lists Ezr 2³¹, Neh 7³⁴ 'the other Elam' has also 1254 descendants who return with Zerubbabel. It appears certain that there is some confusion here (cf. Berth.-Ryssel, *ad loc.*, and Smend, *Listen*, p. 19). 6. A priest who took part in the dedication of the walls (Neh 12⁴²).

J. A. SELBIE.

ELAM, ELAMITES (אֵלָם, Ἰλαμί, *Elymais*).—The Heb. Elam is the Assyr. *Elamtu*, 'the Highlands'

(a name also applied to the Amorite 'Highlands' in the west), Elamtu, 'an Elamite.' Elamtu is the Semitic translation of the Sumerian Numma or Nimma, which has the same signification, and was the name applied by the Proto-chaldeans to the mountainous land to the east of them. Elam possessed two ruling cities, Susa or Shushan, called Susun ('the old') in the native texts (now Shuster), on the Ulai or Eulæus, and Anzan or Ansan, nearer Babylonia in the south-west. The two cities gave their names to the districts in which they were situated, an inhabitant of Susiana being called Susunka, the 'Susanchite' of Ezr 4⁹. The district of Anzan was more extensive than that of Susa, and at one time was equivalent to 'the land of Elam' among the Babylonians (*W. A. I.* ii. 47. 18). Cyrus and his immediate predecessors were kings of Anzan, the country having apparently been conquered by the Persian Teispes during the decline of the Assyrian empire. Sir H. Rawlinson notices that an early Arab. writer, Ibn en-Nadim, states that writing was invented by Jemshid, who lived at Assan, one of the districts of Shuster. The kings of Susa, however, eventually got possession of Anzan, and so founded the kingdom of Elam. They call themselves lords 'of the kingdom of Anzan'; and as this title is found on their bricks at Bushire, the kingdom must have extended as far as the sea.

To the east is the plain of Mal-Amir, where there are sculptures and cuneiform inscriptions, from which we learn that here was another kingdom called Apirti, the 'Apharsites' of Ezr 4⁹. In the agglutinative language of the second transcript of the Achaemenian texts the name is written Khapirti, and it has there taken the place of Anzan or Susa as the equivalent of the Bab. Elamtu. The equivalent in the Persian transcript is Uwaja, whence the modern Khuzistan.

The dialects of Mal-Amir, of Susa, and of the second Achaemenian transcripts differ but slightly from one another. They are agglutinative, and, so far as can be judged, unrelated to any other known language. The statement in Gn 10²², that Elam was the son of Shem, does not imply any racial or linguistic connexion, the object of the chapter being purely geographical.

According to Nearchus, as reported by Strabo (xi. 13. 3, 6), 'four bandit nations' inhabited the mountainous region east of the Euphrates, the Amardians or Mardians who bordered on the Persians, the Uxians and Elymeans on the frontiers of Persia and Susa, and the Kossæans contiguous to the Medes. The Amardians may be the people of Khapirti, the Uxians belonged to Uwaja, Elymais (1 Mac 6¹) is Elam, and the Kossæans are the Kassi of the Assyrian inscriptions of whose language many words are preserved, which, however, seem to have no connexion with the dialects of Elam.

'Ansan, in the land of Numma' or Elam, was conquered by Gudea, an early viceroy of southern Babylonia (in B.C. 2700), whose monuments have been found at Telloh; and Mutabil, another early viceroy (of Dur-ilu on the eastern frontier), 'broke the head of the armies of Ansan.' Kudur-Mabug, the prince of Iamutbal, a district of Elam immediately eastward of Chaldaea, was the father of Eri-Aku or Arioch (which see), and 'father of the land of the Amorites' or Syria. At the same period Chedorlaomer (Kudur-Lagammar) was suzerain of Babylonia and Palestine (Gn 14¹⁻¹⁶), and the notices in the Bab. astrological tablets which refer to 'the king of Anzan and Subarti' or Mesopotamia probably belong to the same date. The defeat of the Elamites by Khammurabi, king of Babylon, enabled him to overcome Eri-Aku, and make Babylonia a united monarchy (B.C. 2330). In B.C.

2280 the Elamite king Kudur-Nankhundi made a raid into Babylonia, and carried away the image of the goddess Nanæa (see 2 Mac 1¹⁸), which Assurbanipal recovered 1635 years afterwards. Nearly a thousand years later we find Khurba-tila of Elam going to war with Kuri-galzu II. of Babylonia (B.C. 1340); but his own men revolted from him, and he was defeated and captured at Dur-Dungi by Kuri-galzu. About a century afterwards (c. B.C. 1230) Kidin-Khutru invaded Babylonia, and, after taking Dur-ilu, put an end to the Kassite dynasty at Babylon. A second invasion by the same king was not so successful. In B.C. 1115 (?) Babylonia seems to have been conquered by the Elamites, as a dynasty of two Elamite kings then began to rule it. In B.C. 742 Umman-nigas or Khumba-nigas became king of Elam, and in 721 assisted Merodach-baladan against Sargon of Assyria, whom he repulsed at Dur-ilu. He died in 718, and was succeeded by his sister's son, Sutruk-Nankhundi, who in 711 again assisted Merodach-baladan, but this time to no purpose. Sargon defeated and captured his general Singusibu, and added the Elamite districts of Iatbur, Lakhiru, and Rasi to Assyria. After a reign of eighteen years Sutruk-Nankhundi was imprisoned by his brother Khaludus, who seized the crown. He captured Babylon in the rear of Sennacherib, who had gone by sea to Nagitu, on the Elamite coast, in order to destroy a settlement made there by the fugitive Merodach-baladan, and the Bab. king, who was a son of Sennacherib, was carried captive to Elam. A year and a half afterwards (B.C. 693) the Elamite nominee at Babylon was captured by the Assyrians, and in the following September Khaludus was murdered. Kudur-Nankhundi succeeded him, and Sennacherib ravaged Elam, capturing even Madaktu north of Susa, until driven back by the winter. The following July, Kudur-Nankh. was killed in an insurrection, and Umman-menanu put on the throne. In B.C. 690 came the great battle of Khalulê, when Sennacherib met the combined forces of Elam and Babylonia, and both sides claimed the victory. The king of Elam had under him the troops of Parsuas (Persia), Anzan, Pasiru, and Ellipi (where Ecbatana afterwards stood), besides the Aramæans and Kaldi or Chaldeans of southern Babylonia. On the 15th of Nisan, B.C. 689, he was paralyzed, and died the following November. Umman-Khaldas I., his successor, reigned eight years, when he was burnt to death on the 3rd of Tisri, and Umman-Khaldas II. ascended the throne. He was murdered in 675 by his two brothers, Urtaki and Te-Umman, the elder of whom took the crown, and about ten years later made an unprovoked raid into Babylonia. The result was the conquest of Elam by the Assyrian king Assurbanipal, who placed Umman-igas the son of Urtaki on the throne as a tributary prince. He joined the great revolt against Assyria, which was headed by the viceroy of Babylonia; but he had hardly sent his army into that country when his son Tammariu conspired against him, and, cutting off his head, sent it to Assurbanipal. Tammariu then joined the Babylonians, and, during his absence, one of his servants, Inda-bigas, usurped the throne. Thereupon Tammariu surrendered to the Assyrians. Shortly afterwards Inda-bigas was murdered by another military adventurer, Umman-Khaldas III., and the Assyrian army again entered Elam, took Madaktu, and restored Tammariu to the throne. He was soon found to be plotting against his masters; and as Umman-Khaldas once more possessed himself of the country, the Assyrian general wasted it with fire and sword. Susa and the other cities were levelled with the ground, the temples and palaces destroyed, and the sacred groves cut down. Thirty-two

statues of the kings were carried to Assyria, as well as the images of all the Elamite deities—Susinak, the god who delivered oracles, and whose image was concealed from the sight of the laity, Sumudu, Lagamar, Partikira, Amman-Kasimas, Uduran, Sapak, Ragiba, Sungursara, Karsa, and Kirsamas, Sudanu, Apak-sina, Bilala, Panintimri, Silagara, Napsa, Nabritu, and Kindakarbu (to whom we have to add also Laguda, Nakhkhunte or Nankhundi, and Khumba). The kingdom of Elam perished, and a desolated province was added to the Assyrian empire. But the empire was already on the decline, and in a few years Elam ceased to belong to it. In B.C. 606, the year probably of the destruction of Nineveh, Jeremiah refers to 'the kings of Elam' (Jer 25²⁵), and eight years later he declares that Elam is about to be consumed by its enemies, its king and princes destroyed, and its people scattered (49²⁵⁻²⁹). This would fit in with the conquest of Anzan by Teispes the Persian, the ancestor of Cyrus (which see). When Elam and Media are called upon to besiege Babylon in Is 21², Cyrus, king of Anzan, must be meant, as Anzan was synonymous with Elam among the Babylonians. It would appear from Ac 2⁹ that the old language of Elam was still spoken there in the first century of our era.

LITERATURE.—Billerbeck, *Susa* (1893); Dieulafoy, *L'Acropole de Susse* (1890); Sayce, 'The Inscriptions of Mal-Amir,' in the *Transactions of the Leyden Oriental Congress* (1885); Loftus, *Chaldea and Susiana* (1857).
A. H. SAYCE.

ELASA (Ἐλασα), 1 Mac 9⁵.—The site may be at the ruin *Il'asa*, near Bethhoron (*SWP* iii. sh. 17).

ELASAH (עֲלָסָה 'God hath made').—1. One of those who had married a foreign wife (Ezr 10²²). 2. The son of Shaphan, who along with Gemariah, the son of Hilkiah, carried a message from king Zedekiah to Babylon (Jer 29⁹). For no apparent reason, RV retains the AV spelling *Elasah* in both the above passages, although both AV and RV give for the same Heb. the form *Eleasah* (wh. see) elsewhere.
J. A. SELBIE.

ELATH or **ELOTH** (עֲלָת, עֲלוֹת).—A seaport in the extreme S. of Edom, at the head of the Gulf of Akabah. It is mentioned in Dt 2⁸ in connexion with Ezion-geber, one of the 'stations' of the Israelites. Elath, Eloth, and Elim may possibly be various names of one and the same place, the 'palm-grove' which was the second halting-place after the passage of the Red Sea. (See Sayce, *HCM* p. 268). E. is probably identical with *El-paran* of Gn 14⁶ and *Elah* of Gn 36⁴¹. It has also been suggested that it is referred to in 1 Ch 4¹⁵, where for 'Iru, Elah' (עֲלָת, עֲלוֹת) we might read 'Ir and Elah' (עֲלָת, עֲלוֹת). See further Dillmann on Gn 36⁴¹. The history of E. was a chequered one. Coming into the possession of Israel when Edom was subdued by David (2 S 8¹⁴), it was an important naval station during the reign of Solomon (1 K 9²⁶). When the disruption of the kingdom took place, Edom continued to be a vassal of the house of David, until it recovered its independence in the time of Jehoram the son of Jehoshaphat (2 K 8²⁰). The port of E. passed once more into the possession of Judah, when Amaziah and Uzziah had inflicted a succession of defeats upon Edom (2 K 14²²). It was wrested permanently from Judah during the operations undertaken against Ahaz by Pekah and Rezin (2 K 16⁶), and either the Syrians (*Kethibh*) or the Edomites (*Kere*) became its possessors. With this event (c. B.C. 734) ends its history as far as OT is concerned. E. is the modern *Akabah*.
J. A. SELBIE.

EL-BERITH (Jg 9⁴⁶).—See BAAL-BERITH, and

cf. Moore, *Judges*, 242, 265; W. R. Smith, *RS* 93 n.; Baudissin in *PRE* ii. p. 334.

EL-BETHEL (בֵּית־אֵל).—The name which Jacob is said to have given to the scene of his vision on his way back from Paddan-aram, Gn 35⁷ (P?). The LXX (*Βαιθηλ*), Vulg. (*Domus Dei*), Pesh. and Arab. VSS omit 'El,' which Ball (in Haupt's *OT*) suggests may have been corrupted from אֵל 'that,' which would naturally be attached to בֵּית־אֵל (so in Pesh. and Vulg.). Ball justly adds that *God of Bethel* is an extraordinary name for a place. See, however, the note (*) on p. 278^a of the present volume.

J. A. SELBIE.

ELDAAH (עֲלֵדָא, perhaps 'God hath called').—A son of Midian (Gn 25¹, 1 Ch 1³⁸). See GENEALOGY.

ELDAD (עֲלֵדָד).—One of the seventy elders appointed to assist Moses in the government of the people. On a memorable occasion in the wilderness journey, he and another named Medad were not present with Moses and the rest of the elders at the door of the tabernacle to hear God's message and receive His spirit. But the spirit of the Lord came upon them where they were, and they prophesied in the camp. Joshua regarded this as an irregularity, and appealed to Moses to forbid them. But he received the reply, 'Art thou jealous for my sake? would God that all the Lord's people were prophets, that the Lord would put his spirit upon them!' (Nu 11²⁸⁻²⁹).

R. M. BOYD.

ELDAD AND MODAD, BOOK OF.—The fact that the prophecies of these men are unrecorded in Nu 11²⁸⁻²⁹ furnished an inviting theme for imagination to some unknown seer and author. His book is quoted in *Hermas*, *Vis.* ii. 3: 'Thou shalt say to Maximus. Behold the tribulation cometh . . . "The Lord is near to them that turn to Him," as it is written in the (book) of Eldad and Modad.' The Pal. Targums (*Jerus.* i. and *Jerus.* ii.) both supply us with the subject of E. and M.'s prophecy, filling in, as is their wont, the supposed hiatus in the Heb. Bible. They agree with *Hermas* that it had reference to pre-Messianic tribulation, which is described under the coming of Magog against Israel at the end of days. *Jerus.* ii. says that Gog and Magog shall both fall by the hand of King Messiah. *Jerus.* i. omits this; but adds, 'The Lord (see *Levy*, s.v. עֲלֵדָד) is near to them that are in the hour of tribulation.' The close resemblance thus pointed out between *Hermas* and the two Targums seems certainly to indicate that all three authors were acquainted with the same Bk of E. and M.; and renders the hesitancy of Schürer and Zöckler no longer necessary. In 1 Clem. xxiii. 3. 4 and 2 Clem. xi. 2. 3 is a long quotation, called in the one case *γραφὴ*, in the other *προφητικὸς λόγος*, but not in OT, which Lightfoot and Holtzmann conjecture to have been taken from our book. In both cases, as well as in *Hermas*, the quotation is designed to refute one who is sceptical about the approaching tribulations 'at the end of the days.' Our book is found in the *Stichometry of Nicephorus* (400 *στίχοι*), and in the *Synopsis Athanasii* (see ABRAHAM, BOOK OF).

LITERATURE.—Fabricius, *Codex pseudep. V.T.* i. 801-804; Schürer, *HJP* ii. iii. 29; Zöckler, *Apoc. des A.T.* 439; Weber, *Lehren des Talm.* 1886, p. 370 (who, however, mistranslates the Targ. *Jerus.* i. in the line cited); Holtzmann, *Einleitung*, 553.

J. T. MARSHALL.

ELDER (IN OT).—In ancient days the institution of Elders was not peculiar to the Jewish people, and the word *elder* did not suggest those purely ecclesiastical and religious functions with which it is now associated. The origin of the office is easily traced. Under the primitive conditions of society that prevail in the early history of all nations, age

is an indispensable condition of investment with authority. [Cf. the *γέροντες* so frequently mentioned by Homer (e.g. *Il.* xviii. 503), the *γεροντία* of the Dorian states, the *Patres* and *Senatus* of the Romans, the *πρεσβύς* at Sparta, and the *Sheikh*, i.e. elder, in Arabia]. Hence from the beginning of Israel's history downwards we hear of elders (עֲלֵיזָרָה, *πρεσβύτεροι*) as an official class. The title, which at first is inseparably associated with the idea of age, came afterwards to designate merely the dignity to which age was formerly the necessary passport.* In the narratives of the Hex. both J and E are acquainted with the institution of elders (Ex 3¹⁶ 19⁷ 24¹, Nu 11^{16a}, etc.), and that not only in Israel but amongst the Egyptians (Gn 50⁷) and the Moabites and Midianites (Nu 22⁷). Their position and functions in early times are thus described by Wellhausen (*Hist. of Isr. and Jud.* 15), 'What there was of permanent official authority lay in the hands of the elders and heads of houses; in time of war they commanded each his own household, and in peace they dispensed justice each within his own circle.' They are frequently referred to in Deut. as discharging the functions of local authorities (Dt 19¹² 21² 22¹⁵ 25⁷, cf. also Jos 20⁴, Jg 8¹⁴, Ru 4²). Their number varied with the locality, it must sometimes have been considerable; e.g. the elders of Succoth who came into collision with Gideon (Jg 8¹⁴) numbered seventy-seven. At a later period they appear in connexion with the adoption of the kingly form of government (1 S 8³), with the intrigues of David and Abner about the succession to the throne (1 S 30²⁶, 2 S 3¹⁷), while the part they played in the judicial murder of Naboth is well known (1 K 21⁸⁻¹¹). It was from amongst the previously existing body of elders that Moses, according to Nu 11^{16a}. (JE), chose an inner circle of seventy 'to bear with him the burden of the people.' (The important part played by this incident in late Jewish traditions will be referred to under SANHEDRIN).

The elders of the city (עֲלֵיזָרָה) acted as judges (Dt 22¹⁵), just as the village *Kādi* and his assistants do in an Arab community at the present day (Driver, *Deut.* 199). It is true that in Dt 16¹⁸ 'judges' (עֲלֵיזָרָה) and 'officers' (עֲלֵיזָרָה) appear to be distinguished from elders; but Schürer is prob. right in his suggestion, that both these classes were selected from the general body of elders, the 'judges' being entrusted with the administration of justice, while the 'officers' took charge of the executive department. Elders reappear in the Persian and Greek periods (Ezr 5⁹ 6¹⁴ 10⁸, Jth 6¹⁶ 7²³ 8¹⁰ 10⁶ 13¹², 1 Mac 12²⁵, and in the story of Susanna), while the *πρεσβύτεροι τοῦ λαοῦ* during the Rom. period are often mentioned by Josephus and NT. The authority which the elders of any community possessed as the municipal council in civil affairs extended also to religious matters, particularly after the synagogue (see SYNAGOGUE) had become a flourishing institution. 'In purely Jewish localities the elders of the place would be also the elders of the synagogue' (Schürer). As a general rule, at least, they had absolute jurisdiction, and had not to take the sense of the congregation or the community. In Nu 35²⁴, Jg 20. 21, Ezr 10, we have rare exceptions to this rule (see CONGREGATION). The right of exercising religious discipline was in their hands, and in particular it lay with them to pass the sentence of exclusion from the synagogue, to which allusion is frequently made in NT (e.g. Lk 6²², Jn 9²² 12⁴² 16³).

In addition to what is contained on the NT Elder in art. BISHOP, various details regarding this office, esp. in the later periods of Jewish his-

* The AV tr. of עֲלֵיזָרָה sometimes by 'elders' and sometimes by 'ancients' (e.g. Is 3⁴, Jer 19¹) is unfortunate and misleading. See ANCIENT.

tory, will be found under artt. SANHEDRIN and SYNAGOGUE.

LITERATURE.—Schürer, *IJJP* ii. i. 150, 165 f., 174 f., ii. 58 f.; Cremer, *Bib.-Theol. Lex.*, and Thayer, *NT Lex.*, s. *πρεσβύτερος*; Driver, *Deut.* 233; Hartmann, *Die enge Verbind. d. AT mit d. ELDER IN NT.—See BISHOP.

ELEAD (עֲלֵיזָרָה 'God hath testified').—An Ephraimite (1 Ch 7²¹). See GENEALOGY.

ELEADAH (עֲלֵיזָרָה 'God hath adorned,' AV *Eladah*).—An Ephraimite (1 Ch 7²⁰). See GENEALOGY.

ELEALEH (עֲלֵיזָרָה in Nu 32³⁷ s. v.), Nu 32³⁷, Is 15⁴ 16³, Jer 48³⁴.—A town of the Moabite plateau, conquered by Gad and Reuben, and rebuilt by the latter tribe. The expression (v. 38), 'their names being changed,' referring to this and other towns, is rendered by Knobel (following the LXX), 'enclosing them with walls'; but this is very improbable (עֲלֵיזָרָה 'wall' is only poetic). See Dillm. *ad loc.* Elealeh is noticed with Heshbon, and in the 4th cent. A.D. was known (*Onomasticon*, s.v.) as being a Roman mile from Heshbon. It is now the ruined mound of *El-'Al*, about a mile N. of Heshbon. See *SEP* vol. i. under the Arab. name.

C. R. CONDER.

ELEASAH (עֲלֵיזָרָה 'God hath made').—1. A Judahite (1 Ch 2³⁸, 40). 2. A descendant of Saul (1 Ch 8³⁷ 9⁴³). See ELASAH.

ELEAZAR (עֲלֵיזָרָה 'God has helped').—Cf. Azarel, 1 Ch 12⁵, and the Phen. names Eshmunazar = 'Eshmun has helped,' *CIS* i. i. 3, l. 1; Baalazar = 'Baal has helped,' *CIS* i. i. 256, l. 2).

Ten or eleven persons bearing this name are mentioned in the canonical and apocryphal books.

1. The third son of Aaron by Elisheba (Ex 6²³, Nu 3²), who, with his father and three brothers, was admitted to the priestly office (Ex 28¹). After the death of Nadab and Abihu by fire, E. and Ithamar were the chief assistants of Aaron (Lv 10¹², 16). The former is represented as the chief of the Levites in the time of Moses (Nu 3³²). When Aaron died, E. succeeded him in his functions (Nu 20²⁶, 28, Dt 10⁶). He is spoken of as taking part with Moses in the numbering of the people (Nu 26¹, 63); and after the death of Moses he aided Joshua in the work of partitioning the newly conquered land of Canaan amongst the twelve tribes (Jos 14¹ 17⁴ 19⁶¹ 21¹). His burial-place is mentioned in Jos 24³³. From Eleazar and his wife, a daughter of Putiel (Ex 6²⁵), were descended all succeeding high priests down to the Maccabean period; the only exceptions being the high priests who lived in the period between Eli and Solomon, when, for some unexplained reason, the office was held by members of the family of Ithamar. 2. A son of Abinadab, who was sanctified to take charge of the ark at Kiriath-jearim, after its return from the country of the Philistines (1 S 7¹). 3. Son of Dodo, one of David's three principal mighty men (2 S 23⁹, 1 Ch 11¹², 13). The name should probably be inserted in 1 Ch 27⁴. 4. A Levite, son of Mahli, and grandson of Merari (1 Ch 23²¹, 22 24²⁸). 5. A priest of the time of Ezra (Ezr 8³³, Neh 12⁴⁹). (There may be here two distinct persons.) 6. One of the family of Parosh, who had married a 'strange woman,' i.e. one of non-Israelitish descent, in the time of Ezra (Ezr 10²⁵). 7. The fourth son of Mattathias, and brother of Judas Maccabæus, surnamed Avaran (1 Mac 2⁵). He fell in the battle

fought at Bethzacharias against Antiochus v. Eupator, B.C. 163 (1 Mac 6³³⁻⁴⁶). His name occurs also in 2 Mac 8²³. 8. 'One of the principal scribes' martyred during the persecution of Antiochus Epiphanes, B.C. 163 (2 Mac 6¹⁸⁻³¹). 9. The father of that Jason who was sent on an embassy to Rome by Judas Maccabæus in B.C. 161 (1 Mac 8¹⁷). 10. An E. is mentioned in the genealogy of our Lord given by St. Matthew (1¹⁵).

W. C. ALLEN.

ELECTION [ἐκλογή] The subst. is rare, not found in LXX (yet Aq. Is 22⁷, Symm. Th. Is 37²⁴, cf. Ps.-Sol 9⁷ 18⁵). In NT, Ac 9¹⁵, Ro 9¹¹ 11⁵⁻⁷ 2²⁸, 1 Th 1¹, 2 P 1¹⁰. Cf. ἐκλέγομαι (in LXX generally for בחר) = to 'choose,' implying (see Cremer's *Lex.*) (1) a special relation between the chooser and the object of his choice, and (2) the selection of one object out of many: ἐκλεκτός (in LXX for בחר or בחר, also fairly often for var. forms of ברר, besides being used occasionally, sometimes by a misreading of the Heb. text, for 17 other Heb. roots = 'chosen' or 'choice' (adj.)). The word is common in Dt and II Is. It is not in Hos, Am (but *idea* in 3²), or Is (yet cf. LXX Is 28¹⁶, which is the source of 1 P 2⁶). It is used chiefly to describe God's choice of Israel out of all the nations of the world to be His own people, Dt 4³⁷⁻⁷⁷ etc., and of Jerus. to be the covenant home of worship, Dt 12⁵ etc. It is used also of God's choice of individuals to the chief offices in the nation, e.g. His choice of Aaron and his family for the service of the sanctuary, His choice of the king, and especially of David. It is once used of Abraham; and in Is 40-66 it passes naturally from its use in connexion with Israel to the 'Servant of the Lord.'

It is rare in the Apocrypha; yet cf. Wis 3⁹, Sir 46¹ etc. It is constant in Enoch. Cf. Ps.-Sol 9⁷ 18⁵.

In NT it is used once of God's choice of OT Israel (Ac 13¹⁷), but for the most part it passes over with other theocratic titles to the 'Israel of God,' and describes either the Church as a whole, or individual members of it, sometimes merely in virtue of their membership, sometimes as chosen to some special office or work, e.g. the Twelve, St. Peter, St. Paul. It is twice used as part of the title of our Lord (Lk 9³⁵ [*var. lect.*] 23³⁵, Jn 1³⁴). The word appears constantly in the Apostolic Fathers, especially in I Clement and Hermas.

The thought of 'election' has formed so prominent a feature in all the most important attempts that have been made in Western Christendom for the last 1500 years to provide a complete and formulated scheme of Christian doctrine, that it is peculiarly hard for us to approach the consideration of the original meaning of the term in Holy Scripture without distracting associations. And yet the effort is worth making. The only hope of any further progress in the elucidation of the problem, the only prospect of extricating its discussion from the deadlock at which it has arrived, lies in a careful reconsideration of the scriptural premisses on which the whole argument has been based.

The questions that require examination fall naturally into three divisions. i. The questions touching the author of election—who chooses the elect? What can we know of His character? What are the grounds of His choice so far as He has vouchsafed to reveal them? ii. The questions touching the persons of the elect—who are they? and for what end are they chosen? iii. The question belonging to the effect of election—what influence does the fact that they have been chosen by God exert over the elect?

i. On the first part of this question there is no difference of opinion. Every theory of election is based on the fact, constantly emphasized in Holy Scripture, that election is the immediate work of God. It is His act as directly as creation is.

In fact, God's purpose in creation, His eternal purpose (ἡ πρόθεσις τῶν αἰώνων, Eph 3¹¹), is revealed in Holy Scripture as working to its end by the method of election. It is in St. Paul's language κατ' ἐκλογὴν πρόθεσις, Ro 9¹¹. The two thoughts are in reality inseparable. We can understand, therefore, how it is that St. Paul should say that God chose His elect before the foundation of the world in His Son (Eph 1⁴). He is only expressing the truth that underlies our Lord's words when He says, 'To sit on my right hand and on my left hand is not mine to give, but it is for them for whom it hath been prepared of my Father' (Mt 20²³). Our first conclusion then, the one fixed point in the whole discussion, is this: God is the author of election. He Himself chooses His own elect.

When we go on to ask on what grounds His election is based, by what considerations, in accordance with what law His choice is determined, we find ourselves at once on debatable ground. To some minds, indeed, the question put in this form seems foolish, not to say irreverent. It involves in their judgment a pitiable blindness in regard to the inexorable limits of human knowledge. In the spirit, sometimes in the very words of Zophar the Naamathite (Job 11⁷), they ask, 'Canst thou by searching find out God? canst thou find out the Almighty to perfection?' 'The main facts of the divine government may, indeed, be known, but the reasons which underlie them, the motives which prompt them, are unfathomable; only an unchastened curiosity can seek to intrude into such secrets.' To some minds, again, the question involves an assumption inconsistent with one of their primary philosophical or theological postulates. It seems to them inconsistent with the reality of the divine freedom, which in this connexion is only another name for the divine omnipotence, to suppose that God should acknowledge any law as regulating His choice.

If either of these objections is well grounded, further discussion of the question is, of course, precluded. We must therefore begin by defining the position we are prepared to take up with regard to them. Let us consider the second objection first. No doubt, if in its ultimate analysis our conception of God resolves itself into a conception of abstract omnipotence, or of an absolutely sovereign will, and if omnipotence means the power to do *anything*, and if no will can be absolutely sovereign which is not as free to do wrong as to do right, it is meaningless if not profane to inquire into the laws which regulate the choice of God. An abstract omnipotence must be inscrutable. We cannot even begin to understand the action of a will in this sense 'absolute.' But if goodness, and not power, lies at the heart of our conception of God, then we shall not be ashamed to confess that for us, in Westcott's magnificent phrase, 'Truth and justice define omnipotence.' And we shall not shrink from pressing to the full the human analogy which is present, though latent, every time we use the word 'will' in relation to God. We shall contend that the action of the divine will, like the action of the human will, of which it is the archetype, must be at once determined by, and reveal, the character which lies behind it. We shall maintain the paradox, if paradox it be, that the will of God is free, only because, by the blessed necessity of His being, He cannot will anything but that which is perfectly holy and righteous and good. And we shall claim every revelation that He has given us of His character as a revelation of the principles which regulate His choice, the laws of His election.

And if we are met at this point by the warning, that as men our powers of apprehending and expressing truth are limited, and that there must

be infinite depths of mystery in the divine nature which we are powerless to fathom, we shall hope to learn humility and patience from the caution. But we shall not desist from pushing our inquiries to the utmost limit of the power that is given to us. We believe that, in spite of all our limitations, we yet were created to know God. And it is a matter of life and death for us that we should be able to bring this revealed method of His working into harmony with the rest of the revelation that He has given us of His character. Nor can we doubt that He will justify us as He justified Job for refusing to be satisfied with any explanation of the facts of the divine government which cannot be reconciled with the sense of justice which He has Himself implanted in us. He has revealed election to us as the method of His working. There can be no presumption in asking whether in making this revelation He has given us any help to enable us to understand His purpose and enter into His plan.

When in this spirit we approach the examination of the scriptural evidence, the result may well, at first sight, seem disappointing. Great pains are taken to negative what we are naturally inclined to regard as the simplest and most obvious solution. The ground of a man's choice lies not so much in himself as in the object that he chooses. It is, of course, true that his own character determines what qualities in an object will, and what qualities will not, prove attractive to him. But, for all that, it is the real or supposed loveliness of the object that rules his choice. It would be natural, therefore, to assume that the choice of God is in like manner determined by the loveliness of its object. But it is just at this point that the analogy of the human will is necessarily imperfect. It is not, indeed, that we are required to believe that God can love that which is, in itself, neither lovely nor capable of developing loveliness; but that since the root of all loveliness is in God, and since there can be no goodness apart from Him, we cannot argue as if it were possible for man to possess or develop any goodness or loveliness independent of, and so constituting a claim on, the choice of God. We ought not, therefore, to be surprised when we find Israel expressly warned in Holy Scripture to reject the flattering assumption that they had been chosen on the ground of their own inherent attractiveness. They were not as a nation either more numerous or more amenable to the divine discipline than other nations (Dt 7⁹). We can understand why St. Paul declares that the election of Christians does not depend on the will or the energy of men (Ro 9¹⁶). It is not of works but of grace (Ro 11⁸, cf. Jn 1¹³).

It must therefore be a mistake to try to discover the ultimate ground of God's choice in any consideration drawn from outside Himself, even though it be in His foreknowledge of the faith and obedience of His chosen; for the goodness in which He takes delight is, after all, from first to last His own creation. The testimony of Scripture is not, however, really limited to this negative result. The choice which is not determined from without is all the more certainly determined from within. And the ground of the choice which we are forbidden to look for in ourselves or in human nature is expressly declared to lie in the love (Dt 7⁹) and the faithfulness (Dt 9⁸, Ro 11²⁹) and the mercy of our God (Ro 9¹⁶).

ii. We pass on now to consider the second group of questions connected with our subject. Who are the elect? and for what end are they chosen? In OT the term 'elect' is most often applied to the nation of Israel, regarded as a whole. They are at all periods of their history taught to regard themselves as the 'chosen people.' At the same time

special divisions of the nation, e.g. the tribe of Levi and the house of Aaron, are chosen to perform certain functions on behalf of the whole body; and certain prominent individuals, e.g. Abraham and David, are regarded as the objects of a special election. In Is 40-66 the term is applied to the nation generally and to the 'servant of J'' in all the different connotations of that many-sided title,—so little is the prophet conscious of any fundamental contradiction between the thought of a national and an individual election. In NT the universal Church takes the place of Israel as the 'chosen race,' and not only her head and her most prominent ministers, but also all her individual members, sometimes by name, sometimes by an inclusive form of address, which it is impossible to narrow down, are described as 'elect,' just as they are described in similar connexions as 'called' and 'holy' and 'faithful' and 'beloved.*' It does not seem possible to determine on NT evidence whether the individuals are regarded as owing their membership in the Church to their election, or as becoming elect by virtue of their membership. Three points are clear—(1) that they were chosen before the foundation of the world; (2) that they were chosen 'in Christ'; (3) that membership in the Church is treated as an objective assurance to each individual of his personal interest in this eternal election.

Such in outline are the different classes described as 'elect' in Holy Scripture. We must consider next what can be learnt with regard to the purpose for which they were chosen. We must not, of course, assume that the purpose is the same, or even in all points analogous in the different cases. Still it is not unnatural to suppose that we shall gain some help towards understanding the application of the method in any one case by a careful study of its application to the rest.

The selection of the family of Aaron and the tribe of Levi need not detain us long. It is a simple case of the choice of certain individuals to fill an office of trust, a position at once of privilege and responsibility on behalf of their fellow-countrymen.

The choice of Israel presents a more complicated problem. The choice in the first instance involved a call to occupy a special position in relation to J"—to be, and to be acknowledged before the world as, His peculiar people. 'Ye are my witnesses,' saith the Lord, 'my servant whom I have chosen; that ye may know and believe me, and understand that I am he' (Is 43¹⁰). And this position of privilege involved a special responsibility towards God and towards the rest of mankind. On the one side, they were the trustees of God's glory in the world, 'his witnesses,' 'the people which he formed for himself, to show forth his praise.' On the other, they were the heirs of the promise made at the call of the Father of the elect, that 'in him and in his seed should all the families of the earth be blessed' (cf. Gn 18¹⁸). And this work for others is the characteristic function of the ideal 'servant of the Lord,' who embodies in himself all that is most characteristic of the chosen Israel.

In NT comparatively little is told us of the purpose of election. 'The poor in this world,' St. James writes, 'God chose (to be) rich in faith and heirs of the kingdom which he promised to them that love him.' 'God chose you,' writes St. Paul to the Thessalonians, 'from the beginning (or "as a firstfruit," ἀπαρχήν for ἀπ' ἀρχῆς) unto salvation.' 'He chose us,' he writes again (Eph 1⁴) 'in him (i.e. in Christ) that we should be holy and without

* There is, indeed, one passage in the Gospels, which will call for notice later on, in which a distinction is drawn between the many 'called' and the few 'chosen.' But the existence of this one passage does not invalidate the statement in the text, which merely asserts that there are other passages in which this narrow signification for 'elect' is excluded.

blemish before him in love.' The Christian, therefore, stands as the Israelite stood before him in a special relation of intimacy with God, receiving from Him the spiritual gifts and graces, together with the responsibility for appropriating them (Col 3¹²), which such an intimacy presupposes, and the assurance of eternal salvation, of which that intimacy is at once the foretaste and the pledge.

The indications of a wider purpose in the election of the Christian are not, indeed, as definite as in the case of OT Israel. It would, however, be a mistake to regard them as altogether wanting. Our Lord (Jn 15) Himself told His apostles that He had chosen them that they might bear much fruit. The chosen race exists, as St. Peter reminds us (1 P 2⁹), appropriating the words of Is 43, 'to show forth the excellencies of him who called them out of darkness into his glorious light.' And St. Paul, in the same sentence (Eph 1⁴⁻¹⁴) in which he speaks of our election in Christ 'to the praise of the glory of his grace,' reveals as the final goal of the eternal purpose, 'the summing up of all things in Christ, the things in heaven and the things upon the earth'; a goal towards the attainment of which our election cannot be regarded as more than a preparatory stage.

We conclude, therefore, that according to the predominant use of the term in Holy Scripture, election is an attribute of the visible Church, and finds its true goal, not simply in the salvation of certain elect individuals, but in the evangelization of the race. There is indeed good scriptural analogy for a concurrent use of the term in a narrower sense, to describe as it were an election within the elect. For St. Paul uses it (Ro 11⁷) to describe the inner circle in Israel who accepted the gospel when it came to them—'the remnant' to which alone an immediate salvation had been promised by Isaiah (Ro 9²⁷, Is 10²²). And our Lord again and again warns us in His parables that the members of His Church will be subjected to a searching judgment—as the result of which the unworthy will be cast into the outer darkness. It is in this connexion that He uses the warning words about the many called and the few chosen to which allusion has already been made. But there seems no authority for restricting the use of the term, as some theological systems do to this narrower sense—refusing to recognize as elect in any real sense, either those Israelites who in St. Paul's day were disobedient to the gospel, or those members of the visible Church who fail to stand in the judgment. Still less justification is there for assuming that the object of the election of this restricted circle has no end beyond the personal salvation of the individuals who compose it.

iii. We pass on now to the last stage in our inquiry, the consideration of the effect of election. We ask what influence does the fact that they have been chosen by God exert over the elect? May we assume that the divine purpose working through election must of necessity attain its goal? Can we, granting this assumption, find a place in our system for any self-determining power in the human will?

The theological systems, which adopt the restricted sense of the term election, and limit the scope of its operation to its effect on this limited circle, find no difficulty in supplying a logically coherent set of answers to these questions. It is inconsistent with any real faith in the divine Omnipotence to suppose that any deliberate purpose of God can finally fail of its accomplishment. The elect, therefore, being chosen for salvation, cannot fail to attain salvation. No power from without or from within can prevent this result. The fact that they have been chosen for this end carries with it the divine determination to provide all the

means required to ensure its attainment. The elect, therefore, receive first a gift of 'irresistible grace' to raise them out of their naturally depraved state, and then a gift of 'final perseverance,' as the result of which they are assured, whatever their intervening lapses may have been, of being found at the moment of death in a state of grace.

These systems do not seem to find room, at least in the all-important moment of conversion, for any true act of self-determination on the part of the human will. A doctrine of reprobation forms an inevitable, however unwelcome, complement to the doctrine of election so defined.

It is impossible not to regard with the deepest respect systems which embody the conclusions of the most strenuous thinkers on this subject, from St. Augustine to Calvin and Jonathan Edwards. At the same time it is a remarkable fact that these conclusions have never been able to secure general acceptance. Unassailable as they may be in logic, it is felt that somehow they fail to fit the facts of life. There are elements in human experience and elements in the divine revelation for which they fail to account. And the general result is one from which the Christian consciousness seems instinctively to shrink in horror. It can only be accepted, if it is accepted at all, as a dark enigma, which our present faculties have no power to solve.

What, then, we seem forced to ask, are the foundations on which these conclusions rest? Can it be that the results of the argument are vitiated by any unsuspected flaw in the premisses?

The premisses are these—(1) God is omnipotent. (2) Because God is omnipotent, the final goal of creation must correspond at all points to His original purpose. (3) The final goal of creation, as far as it affects the human race, involves the division of mankind at the day of judgment into two sharply defined classes, the saved and the lost. (4) The position of any individual man in one or other of these two classes must be traced back in the last resort to the original purpose of God with regard to him.

It seems impossible to take exception to either of the first two of these premisses. It is part of the idea of God, that He must be able to effect what He purposes. To speak in human language, there may be enormous difficulties to overcome in the tasks to which He sets Himself. We have therefore no right to assume that at any moment before the end all things are as He would have them to be. But the end must be a perfect embodiment of His original design.

Again, if the third of these premisses is sound, the fourth seems to follow from it by an inevitable deduction. Everything, therefore, depends on the validity of the third premiss. Is it, or is it not, a true and complete statement of the end towards which 'the whole creation moves'? Now, there can be no doubt that it expresses accurately one side of the scriptural teaching on the subject. It is, however, very far from expressing the whole. On this point, as is well known,* the evidence of Holy Scripture seems divided against itself. It speaks of eternal punishment (Mt 25⁴⁶). It speaks also of the divine will that all men should be saved (1 Ti 2⁴). It speaks of those who shall be cast into the outer darkness on their Lord's return (Mt 24⁵¹ etc.). It speaks also of an end, when God shall be all in all (1 Co 15²⁸). It seems clear that to our apprehension these two sets of statements must be mutually exclusive, unless we may regard the judgment as being not the end, but only a means towards the end. If we reject this solution of the difficulty, we must remain content with an unreconciled antinomy. But, in any case, it is important to remember which

* Westcott, *Historic Faith*, p. 50 ff.

side of the antinomy was dominant in St. Paul's mind in the chapters (Ro 9-11) which contain his most explicit teaching on the subject of election.

These chapters are devoted to a consideration of the problems raised by the failure of Israel to accept the offer of salvation made to them in the gospel. The first line of solution is suggested by the thought, to which attention has already been called, of an election within the chosen people (Ro 9⁶ 11⁷). Such an election has parallels in the history of the patriarchal family (9⁸⁻¹³). It is in accordance with express utterances of prophecy (9²⁷). It is therefore no evidence of a final defeat of the divine plan that Israel, as a whole, should for a time be shut out from salvation, and only the election should attain it. St. Paul, however, expressly and indignantly refuses to accept this as a complete solution (11¹⁴). It is very far from the perfect triumph, the vision of which has been opened before him. He finds in the salvation of the part a sure pledge of the ultimate deliverance of the whole. 'If the first-fruit be holy, the lump is holy too' (11¹⁶). However much the nation as a whole had incurred the divine wrath by their opposition to the gospel, they were yet dear to God for their fathers' sake (11²⁸). The power of their original election was by no means exhausted. The gifts and the calling of God are without repentance (11²⁹). In the end all Israel shall be saved (11²⁶). And lest we should think that in this respect Israel stands on a different footing from the rest of the world, he adds—'God hath shut up all men unto disobedience, that he may have mercy upon all' (11³²).

In the face of these utterances no scheme of election which assumes the doctrine of everlasting punishment as one of its fundamental postulates, can claim to rest on the authority of St. Paul.

Leaving, then, on one side the attempt to consider the effect of election in its relation to the elect in the narrower sense of the term, what are we to say of its influence in the case of the wider circle? St. Paul's argument in relation to Israel (11²⁸⁻³¹) is sufficient to show that in his view, even in the wider sense, the fact of God's election carries with it an unalterable declaration of the divine purpose for good towards those to whom His call came. He believed also that the will of each man was in its natural state so utterly enslaved to evil that nothing but the divine power could set it free (Ro 7¹⁴⁻²⁵). At the same time, the action of the divine will on the human was not to overwhelm it, but to restore its power of action. He exhorts men to work out their own salvation, just because it is God who is working in them both to will and to do of His good pleasure (Ph 2¹³). The love of Christ is indeed a constraining motive (2 Co 5¹⁴). Without faith in that love as its abiding source and spring the Christian life is impossible (Gal 2²⁰, cf. 1 Jn 4¹⁹).^{*} And surrender to that love is the last act for which a man could dream of claiming any credit to himself. It is the gift of God (Eph 2⁸). Yet the refusal to surrender is not due to defect of grace. It is possible to receive the grace of God in vain (2 Co 6¹).

Again, the presence of the divine grace does not supersede the necessity for constant watchfulness (cf. Mk 13³⁷ etc.). Even the 'chosen vessel' (Ac 9¹⁸) contemplates the possibility of becoming himself a castaway (1 Co 9²⁷). Branches have been cut out of the good olive tree before now—and what has been done once may be done again (Ro 11²³). While, however, his language does not leave us room to believe that he regarded himself, at least at this part of his career, as possessing any

inalienable gift of 'final perseverance,' or as absolved from the necessity for strenuous effort on his own part 'to make his own calling and election sure' (2 P 1¹⁰), it is clear that he had an unflinching faith in the perseverance of God. He knows whom he has trusted (2 Ti 1¹²), and is convinced that He is able to keep what has been entrusted to Him. He can trust God to bring to perfection any good work in a man when He has once set His hand to it (Ph 1⁶). Even the human potter, whom the prophet watched at his work (Jer 18⁴), when the vessel that he made of clay was marred in his hand, made it again another vessel, as seemed good to the potter to make it.

If anything like this is the truth about the doctrine of election, we need no longer shrink from the contemplation of it as if it were 'a portion of eternity too great for the eye of man.' The favoured few are not chosen, while the rest of their race are left to their doom in hopeless misery. The existence of the Church, however much it may, nay must, witness to a coming judgment, has in it a promise of hope, not a message of despair for the world. As Israel of old was chosen to keep alive in the hearts of men the hope of a coming Saviour of the world, so the Church is chosen to bear abroad into all the world the gospel of a universal redemption, forbidden to leave out one single soul from the vast circle of her intercessions and her giving of thanks, because she is called to live in the light of a revelation which bids her believe and act in the belief that God will have all men to be saved and come to the knowledge of the truth (1 Ti 2¹⁻⁴). We can enter with full hearts into the spirit of the marvellous doxology with which St. Paul concludes his study of the subject, and cry with him in exultant adoration, 'Oh, the depth of the riches, both of the wisdom and knowledge of God! how unsearchable are his judgments and his ways past finding out. . . . For of him and through him and to him are all things; to whom be glory for ever.'

LITERATURE.—The history of the various controversies connected with Election is given in outline in various treatises on the history of Christian Doctrine as a whole, e.g. Hagenbach, Shedd, and G. P. Fisher. The Pelagian controversy is treated at length, in Latin, by G. T. Vossius, 1618; and, in German, by Wiggers, 1821, 1833; Part I. tr. by R. Emerson, Andover, U.S., 1840. *The Anti-Pelagian Treatises of St. Augustine* have been edited for the Oxford University Press by W. Bright, D.D. (1880), and for D. Nutt by Woods and Johnston (1888); cf. J. B. Mozley on *The Augustinian Doctrine of Predestination* (3rd ed. 1883); Cassian's *Conferences*, tr. by E. C. Gibson in Library of Nicene and Post-Nicene Fathers, 1894. A full collection of documents connected with the Gottschalk controversy in 9th cent. in Mauguin, Paris, 1650, 2 vols. 4to; cf. Archbp. Ussher, *Works*, vol. iii. The Scholastic Theories are discussed in chs. ix. and x. of J. B. Mozley. Special treatises by St. Anselm, *De conc. Præsa. et Præd.* etc. (1100), and Thomas of Bradwardine, *De causa Dei e. Pelag.* etc. 1325. For Reformation and Post-Reformation controversies see esp. the various collections of Confessions and Doctrinal Standards, esp. Winer, *Confessions of Christendom*; Niemeyer, *Coll. conf. eccl. reform.* in Latin; cf. Melancthon's *Loci Communes*, 1521; Luther, *De sermo arbitrio*, with Erasmus' reply, 1525; Calvin, *Christianæ Religionis Institutio*, 1536; Arminius, *Disputationes*, xxiv., 1609. For the Jansenist controversy see Molina, *Conc. lib. arb.* etc. 1588, and Jansenius, 'Augustinus,' 1640. The most important treatise of 18th cent. is J. Edwards on *Free Will*. In 19th cent. note esp. Whately, *Essays on some difficulties in the writings of St. Paul*, 1828; G. S. Faber, *The Primitive Doctrine of Election*, 1835; T. Erskine, *The Doctrine of Election*, 1837; T. Chalmers, *Five Lect. on Predestination*, 1837; W. Channing, *The Moral Argument against Calvinism*; Müller, *The Christian Doctrine of Sin*, 1839; M'Cosh, *The Method of the Divine Government*, 1850; Copinger, *A Treatise on Predestination, Election, and Grace*, 1889, including a full bibliography, pp. ccxvi. The relevant sections in Martensen's *Christian Dogmatics* and Cunningham's *Historical Theology* repay careful study; cf. also Sanday-Headlam on *Romans ix.*-xi. J. O. F. MURRAY.

ELECT LADY.—See JOHN (EPISTLES).

EL-ELOHE-ISRAEL (אֱלֹהֵי יִשְׂרָאֵל).—Upon the 'parcel of ground' which he had bought from the Bêné-Hamor, Jacob erected a *mazzebâh* (so Well,

* Cf. Council of Orange, A.D. 529, Canon xxv, *Donum Dei est diligere Deum. Ipse ut diligetur dedit qui non dilectus diligit.*

Kautzsch-Socin, Ball, Dillm., etc.), and built an altar, giving to the latter the name *El-elohe-Israel*, 'El, the god of Israel,' Gn 33²⁰ (E). This appears a strange name for an altar, hence Delitzsch (*ad loc.*) supposes it to be meant, as it were, of its inscription. The LXX reads *ἐπεκαλέσατο τὸν θεὸν Ἰσραήλ*, 'he called upon the God of Israel'; and it is just possible that this is correct, and that we should emend the MT וַיִּקְרָא לֵאלֹהֵי יִשְׂרָאֵל. See GOD. J. A. SELBIE.

EL ELYON (אֱלֹהֵי עֲלִיּוֹן) occurs in RVm of Gn 14¹⁸. 19. 20. 22 where RV (text) has 'God most High,' and AV 'the most high God.' It is probably a proper name, the appellation of a Canaanite deity. In v. 22 'I have lift up mine hand unto J', God most High,' there can be little doubt that the introduction of the word 'J' and the identification of the latter with El Elyon are due to a redactor (so Ball, Kautzsch-Socin, Hommel, etc.). The word J' is wanting in the LXX (*θεὸν τὸν ὑψίστον*), and the collocation of names reminds one of 'Jahweh-Elohim' of Gn 2⁴-3. See further under GOD.

It has been proposed by Sayce to identify El Elyon with the 'mighty king' referred to in the letters of Ebed-tob (or, as Hommel writes the name, Abdi-khība) to the Pharaoh Amenôphis (c. B.C. 1400). This 'mighty king' is indeed generally supposed to be the king of Egypt; but Hommel, while agreeing with Driver, against Sayce, that an earthly potentate is meant, argues, from the use of the term in the letter of Rib-Adda of Gebal, that it cannot be intended to designate the Pharaoh, but was more probably the king of the Hittites. He suggests, further, that the title 'mighty king' had originally a religious significance. He remarks that the thrice-repeated asseveration of Abdi-khība, that he owed his exalted position not to his father or his mother, but to the 'arm of the mighty king,' sounds like the echo of some ancient sacred formula. 'To the Pharaoh, of course, the "mighty king" meant nothing more than his rival the king of the Hittites; but in Jerusalem the original significance of the words "not my father and not my mother, but the arm of the mighty king" (i.e. of El Elyon), must still have been perfectly familiar.' It is well, however, to remember that this is pure conjecture. There is no reason why a title like the 'mighty king' should not have been applied to more monarchs than one. In the letters of Abdi-khība it may refer to the Hittite king, as elsewhere it may designate the king of Egypt or the king of Babylon, but that it has ever anything to do with El Elyon remains to be proved.

LITERATURE.—Dillm. and Del. on Gn 14; Kittel, *Hist. of Hebrews*, i. 179 f.; Hommel, *Anc. Heb. Tradition* (1897), 151 f., 156 f., 226; a series of papers in the *Expository Times*, vols. vii.-viii. (1896-97), on 'Melchizedek,' by Sayce, Driver, and Hommel. J. A. SELBIE.

ELEMENT.—A word, with its original *στοιχείων* (always in pl.) and its derivative *στοιχειώσις*, entirely confined in sacred literature to the Apoc. and NT. AV renders the Greek variously: six times as 'elements' (Wis 7¹⁷ 19¹⁸, Gal 4^{3.9}, 2 P 3^{10.12}), twice as 'rudiments' (Col 2^{8.20}), once as 'principles' (He 5¹²), once (*στοιχειώσις*) as 'members' (2 Mac 7²²). RV gives 'elements' in Wis, 2 Mac, and 2 P; elsewhere (St. Paul and He) 'rudiments.' In the untranslated (LXX) Apoc. it occurs once, 4 Mac 12¹³, plainly meaning *elements*. In Wis, as in 2 P, it means unmistakably the physical elements of which the cosmos is composed; in 2 and 4 Mac those of which the human body is composed; in Hebrews its defining genitives show that it stands with them for the elements of Christian knowledge. All these signi-

fications march with the usage of the word in secular Greek and follow from its original signification—that which stands in a *στοίχος*, 'row,' 'series'; then (1) in pl. the letters of the alphabet, not as written signs, but as the primary elements of words (Plat., Arist.); (2) the primary elements of the universe (from Plat. downwards); (3) as suggested by the usage in Xenoph. (*Mem.* ii. i. 1) and Aristot. (see Bonitz, *Index Arist.* p. 702),—where it occurs as the simplest elements of an argument or demonstration,—but definitely only in later Greek from Cornutus (1st cent. A.D.), Plut., Diog. L., downwards, the primary elements, the first principles, of knowledge, almost always with a defining genitive or a guide from the context determining what the knowledge is.

The passages in St. Paul alone remain, Gal 4^{3.9}, Col 2^{8.20}. In each of these there is the defining genitive *τοῦ κόσμου*, except in Gal 4⁹, where, however, the *τοῦ κόσμου* of v. 3 clearly fixes the context. The first natural impression, therefore, is that the *στοιχεῖα* in all these places should be interpreted in the same way; and the second is that, as *τοῦ κόσμου* is not a branch of instruction, like *λογίων* in He, or *ἀρετῆς* in Plut. (*De puer. educ.* 16), the basis of the interpretation should be physical, as with the other instances in biblical literature (cf. for the influence of Wis upon St. Paul, Sanday-Headlam, *Romans*, p. 51), rather than ethical; 'elements of the material world' (cf. Philo, *De Vita Contempl.* ii. 472), rather than 'elements [of religious knowledge] furnished by the material world' (Lightfoot), or 'elements [of religious knowledge] characteristic of the non-Christian world,' i.e. elements of religious truth belonging to mankind in general (Meyer). The 'religious knowledge' and 'religious truth,' with their alleged relation to *τοῦ κόσμου*, seem to be imported to help interpreters out of a difficulty.

The impression in favour of the physical interpretation (the interpretation of the word in Clem. *Hom.* x. 9) is confirmed by the context of the passages. In Col 2⁸ what is referred to is not an elementary knowledge from which a moral and spiritual advance could be made, not a circumcision and a ceremonial law with which the heathen cultus would in its ritual have something in common, but a 'philosophy' and a 'deceit,' a delusive speculation offered as superior to the ordinary belief in Christ, and spoken of later (v. 18) as characterized by a false humility and a worship of angels. In Gal 4^{3.9} the 'elements of the world,' 'the weak and beggarly elements,' to whose service Jew and heathen Christians were set on returning, are put parallel to 'them that by nature are not gods,' and such service is exemplified in the keeping of days and months and seasons and years. This context at once suggests the worship of the heavenly bodies, which were called especially *στοιχεῖα* as elements of the universe (Just. Mart. *Dial.* 23; Polykrates in Euseb. *HE* iii. 31; Epiphanius, *adv. Hær.* i. in *hær. Phariseorum*, 2), and whose movements regulated the calendar (Just. Mart. *Apol.* ii. 5; *Letter to Diognetus*, 4); the Colossian worship of angels finding its explanation in the fact that the heavenly bodies were supposed by Jew and heathen to be animated heavenly beings; cf. Philo, *Mundi op.* i. 34; *Enoch* 41. 43; Clem. Alex. *Strom.* vi. 5; Orig. on *Jn* 4²²; and, within the Scriptures themselves, Job 38⁷ (*morning stars=sons of God*), 1 Co 15⁴⁰ (*bodies clothing spirits*), Ja 1¹⁷ (*Father of the lights*). Cf. also Holtzmann, *Neutest. Theol.* 52 f., and Meyer-Haupt on Col 2⁸.

But a philosophy of astral spirits (which reminds us of modern theosophical speculation) is not quite homogeneous, after all, with the reference to food and drink in Col 2⁸, though, no doubt, food and

drink were 'features of the world's life,' which, for its times and seasons, was under the governance of the heavenly *στοιχεία*. And, further, *κόσμος*, as predominantly used in biblical Greek, seems to lead us away from rather than towards *ὀρατός*, and must, at any rate, emphatically include the world inhabited by men. Hence, apparently, we must seek a consistent interpretation for the Pauline passages in a meaning of *στοιχεία* clearly sanctioned by usage at a later date, and also in harmony with ideas prevalent in St. Paul's day. It may be called an extension of the meaning we have just been considering, for it maintained that not only the heavenly bodies, but *all things*, in the heavens and in the earth alike, had their angels, and were under the governance of spirits. This view reveals itself not only in the later Jewish literature, but also in OT and NT.

In the former region we find, for example, in the *Book of Jubilees*, a Jewish composition belonging to the century immediately preceding the Christian era (see Charles, *Eth. Version of the Heb. Book of Jubilees*, Oxford, 1895), the following passage (c. 2): 'On the first day created he the heavens which are above and the earth and the waters and all the spirits that serve before him, and the angels of the face (or presence), and the angels that cry "holy," and the angels of the spirit of fire, and the angels of the spirit of wind, and the angels of the spirit of the clouds of darkness and of hail and of hoarfrost, and the angels of the depths and of thunder and of lightning, and the angels of the spirits of cold and of heat, of winter and of spring, of autumn and of summer, and of all the spirits of his works in the heavens and on the earth and in all depths, and of darkness and of light, and of dawn and of evening, which he has prepared according to the discernment of his understanding.' Everling (see appended literature) quotes also *Enoch* 82¹⁰⁻¹⁴ (angels of the stars, with names of leaders), 60^{11a} (angels appointed over the various phenomena of nature); *Ascensio Isaia* (2nd cent. A.D., according to Harnack) 4¹⁸ (angel of the sun, etc.), 2 Es (81-96 A.D., acc. to Schürer) 8^{21a} (army of angels . . . in wind and fire), and *Sibyll. Orac.* (2nd cent.) 7³³⁻³⁵ (angels of fire, rivers, cities, winds).

The same view is found in the region of OT and NT. In Ps 104⁴ (according to the LXX, as quoted also in He 1⁷) angels take the shape of winds and fire; in Rev 7² there are the four angels of the four winds, in 14¹⁸ there is an angel of the fire, in 16⁶ an angel of the waters (cf. the angel of the pool of Bethesda in the spurious passage Jn 5⁴). In Dn 10^{13, 20} we have angels as princes of Persia and Greece, and in 12¹ Michael as the great prince 'standing' for Israel, just as he stands for the Church as a whole (Rev 12⁷), and as each of the seven Churches has its angel (Rev 2, 3), and perhaps also each individual human being (Mt 18¹⁰). Everything that happens is wrought by angels: 'there are no secondary causes.' Angel powers are the invisible background of human life and of nature. Such angels are sometimes called 'gods,' as in Ps 82⁶, being 'sons of the Most High' (the Peshitta actually gives *angels* in both clauses of the first verse), and God Himself is the 'God of gods' and 'Lord of lords' Dt 10¹⁷, Ps 136^{2, 3}; cf. *Apoc. of Zephaniah*. 'In the fifth heaven . . . angels called lords,' quoted by Clem. Alex. *Strom.* v. xi. 77. Hence St. Paul's expression 1 Co 8⁵ 'are called gods, whether in heaven or on earth, just as there are gods many and lords many,' yet (Gal 4⁸) 'by nature not gods' like the 'one God' and the 'one Lord' (1 Co 8⁶). Thus there was common ground for heathen nature-worship and for Jewish legalism, for the law had been administered by angels' Gal 3⁹, He 2², Ac 7^{38, 53} (cf. Jos. *Ant.* xv. v.

3; II. i. 3), and was thus on a level lower than the new dispensation; He 2⁵ 'For not to *angels* did he subject the world to come, whereof we speak.' Angels were the media of God's government; and, having 'a certain independence in the discharge of their functions, could stand (to use Ritschl's phrase) in "relative opposition to God," so that, in some cases, their service was an imperfect representation of God, in other cases an actual misrepresentation of Him, and consequently a veiling rather than an unveiling of Him. In this light we can more easily understand how St. Paul can attribute to angels the imperfect and transitory dispensation of the law; and the perplexing passage Col 2¹⁵, where Christ is said to have "stripped off from himself the principalities and the powers, and made a show of them openly, triumphing over them in [his cross],"—or, as it may be otherwise worded, "exhibited them in their real nature, leading them in his triumphal train,"—may possibly find its elucidation in the idea that these *ἀρχαί* and *ἐξουσίαι* (cf. *ἐξουσίαν ἐπὶ τῶν ὑδάτων* Rev 11⁶) had hidden His personal activity, and even attracted worship to themselves.* This relative opposition may become absolute, the relative independence may become absolute insubordination, as in the case of the Prince of Persia (Dn 10¹⁸), and Satan and his angels (2 P 2⁴, Jude 6), yet never in the dualistic sense. Accordingly, Christ can speak of 'the prince of this world' (Jn 12³¹), and St. Paul of the 'god of this age' (2 Co 4⁴): both can attribute evils and hindrances to Satan (Lk 13¹⁶, Mk 8³³, 2 Co 12⁷, 1 Th 2¹⁸), and St. Paul can see the *δαίμονια* in the dark background of idolatry (1 Co 10^{20a}). Over all these powers Christ is to triumph (1 Co 15²⁴), either by crushing insubordination and destroying the insubordinate (Rev 19^{20a}), or by displaying His real headship, which by the 'tradition of men' has been concealed (Ph 2¹⁰, Eph 1^{20a}, Col 2^{15, 19}), and delivering the 'heirs' from the tutelage of the *ἐπίτροποι*, the 'governors,' the *στοιχεία τοῦ κόσμου*, under whom they had been enslaved (Gal 4⁴) (cf. Everling, *Angelologie*, 74 n., for Michael as called *ἐπίτροπος* of Israel in later Jewish literature, the word being transliterated into Hebrew).

The suggestion by St. Paul in his *ὄρασι μὴ ὄρασι θεοῖς* (Gal 4⁸), that by his *στοιχεία* he means angelic powers, is not illustrated by any actual use of the word in this sense in the extant literature of the 1st cent.; but Everling (p. 70) quotes the following passage from the *Testament of Solomon* (date uncertain, probably not very early; Harnack, *Gesch. Alt. Christ. Lit.* i. 2, 858), where the spirits that appear to Solomon say, 'We are the so-called *στοιχεία*, the world rulers of this world.'

For the 'Stoicheolatry' of the modern Greeks and their belief that there is a *στοιχείων* everywhere to be propitiated, see Kean in *Expos. Times*, viii. (1897) 514.

LITERATURE.—Klöpper, *Brief an die Kol.* 1882; Spitta, *Zweite Brief des Petrus*, 1885; Meyer-Haupt, *Die Gefangenschaftsbrieft*, 1897; Everling, *Die Paulinische Angelologie und Dämonologie*, 1888; Hincks, *Journal of Bib. Lit.*, Boston, 1896, pp. 183-192; and Kean, as above quoted. J. MASSIE.

ELEPH (ἑλέφας), Jos 18²⁸ only.—A town of Benjamin, probably the present village *Lifta* W. of Jerus., which has often been wrongly identified with Nephtoa. See *SWP* vol. iii. sheet xvii.

C. R. CONDER.

ELEPHANT (ἑλέφας, *elephas*).—This animal is mentioned in 1 and 2 Mac as employed in war. It is not found in AV of OT, except in the marg. for *behemoth* (Job 40¹⁵), and *elephants' teeth* for *ivory* (1 K 10²², 2 Ch 9²¹). The word is *אֵילָנִים שֵׁן*.

* Quoted from an article by the present writer in the *Thinker*, May 1895, on 'St. Paul's view of the Greek gods.'

habbim. The word *shên* is the ordinary word for ivory in OT, and *habbim* seems to be the same as the modern vernacular word for *elephant* in the languages of Malabar and Ceylon. See IVORY.

G. E. POST.

ELEUTHERUS (Ἐλευθερος), 1 Mac 11⁷ 12⁸⁰.—A river which separated Syria and Phoenicia (Strabo, xvi.), and appears to be the mod. *Nahr el-Kebir* or 'Great River,' which divides the Lebanon in two north of Tripoli.

C. R. CONDER.

ELHANAN (אֶלְחָנָן).—1. In 2 S 21¹⁹ we read: 'and Elhanan the son of Jaare-oregim the Bethlehemite slew Goliath the Gittite, the staff of whose spear was like a weaver's beam'; in the parallel passage, 1 Ch 20⁵, by a slight change in the Heb. this becomes 'and Elhanan the son of Jair slew Lahmi the brother of Goliath the Gittite, etc.' The *ductus litterarum* in each case is so similar that most moderns agree that the two passages represent but one original text. It is evident that the superfluous 'oregim' in 2 S has merely crept into the text from the following line ('oregim' = weavers); for the rest, it can hardly be disputed that 'Lahmi the brother of' (אֶלְחָנָן בְּרֹתוֹ, 1 Ch) is a corruption or harmonistic correction of 'the Bethlehemite' (בְּתֵלְהֵמִית, 2 S), whilst 'Jaare' (יָאֵר, 2 S) is merely a transposition of the letters of 'Jair' (יָאֵר, 1 Ch). It is impossible that any one who had a similar text to that of 1 Ch before him, and who knew the story of 1 S 17, should have altered it into direct contradiction with the earlier narrative, whilst the correction of 2 S by the Chronicler is clearly due to harmonistic motives. It is admitted by most modern critics that the story of David and Goliath in 1 S 17¹⁻¹⁸ embodies a later tradition as to the introduction of David to Saul (as opposed to the earlier account, 16¹⁴⁻²³), in which the exploit of the warrior Elhanan was transferred to his royal master. The reading of 1 Ch, then, is merely an attempt to harmonize the two independent narratives. 2. Son of Dodo the Bethlehemite, one of David's 'Thirty' (2 S 23²⁴ = 1 Ch 11²⁶). See DODO (2).

J. F. STENNING.

ELI (אֵלִי) belonged to the house of Ithamar, the fourth son of Aaron, and was apparently the first high priest of that line; cf. 1 Ch 24³, where Ahimelech the son of Abiathar (2 S 8¹⁷), who escaped from the massacre at Nob (1 S 22²⁰), is expressly stated to be one 'of the sons of Ithamar.' It is owing to this fact that neither E. nor his immediate successors in the high priestly office, up to and including Abiathar, are mentioned in the genealogy of the high priests from Aaron and Eleazar down to the destruction of the temple (1 Ch 6³⁻¹⁵). The last high priest mentioned before E., Phinehas, belonged to the house of Eleazar (Jg 20²⁸); but no account is given of how or when this change in the priestly succession took place, though it would seem to have had the divine sanction (1 S 2²⁸). The high priesthood returned to the descendants of the house of Eleazar in the reign of Solomon, when Abiathar was deprived of his office and banished from Jerus. because of his participation in the revolt of Adonijah; his place was filled by Zadok, of the house of Eleazar (1 K 2²⁶), 'the faithful priest' of 1 S 2²⁸.

In the person of E. were united for the first time in the history of Israel the two offices of high priest and judge. He is stated to have judged Israel 40 years (1 S 4¹⁸ LXX *ἔκοιτο ἔτη*); but this chronological notice, as also the statement of his age (4¹⁸), is prob. due to a later deuteronomic redactor. We learn little of the life and character of E. from 1 S, the first eight chapters of which are mainly concerned with the history of Samuel. We gather, however, that he was a man of kindly disposition,

and, setting aside the treatment of his sons, sincere and upright in the performance of his twofold office; while his ready submission to the divine sentence pronounced against his house, proves the reality of his belief in the God of Israel. Thus while officiating, by virtue of his priestly office, at Shiloh, he first reproves Hannah, and then, on discovering his error, gives her his blessing; whilst the kindness of his disposition shows itself in his treatment of the youthful Samuel. It was, however, the kindness, not of a strong but of a weak character, and as such was destined to come into conflict with the stern dictates of duty. His two sons, Hophni and Phinehas, were, in the language of Scripture, 'men of Belial' (or worthlessness); they 'knew not the Lord,' and profaned their sacred calling by their greed and licentiousness. Nevertheless, their father shrank from the distasteful task of punishing their conduct in the way that it deserved, and contented himself with administering a mild rebuke. Their punishment, therefore, must be left to a higher tribunal, and on two occasions was the aged priest warned of the fate that would befall his sons in consequence of their neglect of duty. At the first an anonymous prophet is sent to show him his sin in honouring his sons above God, and to announce the downfall of his house ('there shall not be an old man in thy house for ever'). In token of the certainty of this impending doom, E. is given a sign, viz. the death of his two sons in one day (1 S 2²⁷⁻²⁹). The text of this section is apparently in disorder, and would seem to have been expanded by a later deuteronomic author. On the second occasion, the Lord Himself appears to the child Samuel and confirms the sentence which had previously been announced. His faith unshaken, E. submits without a murmur to the divine decree (1 S 3¹⁶). The end is not far off; the Philistines once more swarm across the Shephelah, and at the first attack defeat the Israelites. In vain is the ark of the covenant brought from Shiloh by Hophni and Phinehas. The Philistines renew the battle, and inflict a further crushing defeat on the Israelites; the ark is captured, and Eli's two sons are slain. Overcome by the terrible news, the aged E. fell from his seat by the gate of the city; 'his neck brake, and he died' (1 S 4¹⁸). J. F. STENNING.

ELI, ELI, LAMA SABACHTHANI and **ELOI, ELOI, LAMA SABACHTHANI**.—Slightly different forms of the exclamation uttered by Jesus, according to the evangelists Matt. (27⁴⁶) and Mark (15³⁴) respectively, shortly before his death. Both evangelists follow it with the translation, in slightly varying terms: 'My God, my God (in Gospel of St. Peter ἡ δύναμις μου 'my power') why hast thou forsaken me' (or 'why didst thou forsake me')—which shows the cry to be a reminiscence of Ps 22¹. But the Heb. of the psalm (אֵלֵי אֵלֵי לָמָּה עָזַבְתָּנִי, i.e. eli, eli, lama azabhtani) agrees with neither form of the saying as given by the evangelists. Indeed the MSS of the Gospels exhibit considerable variety of spelling in the case of nearly every word (see Tischendorf, *Nov. Test. Gr. ed. octava crit. maior, U. cc.*). These variations start interesting inquiries, which this is not the place to follow out. Suffice it to say, that there is in the words a singular and somewhat perplexing combination of Heb. and Aramaic. Whether, for instance, the *Eloi* (Ἐλωί) represents a provincial (Galilean?) pronunciation of the Heb. *Eli* (אֵלִי), or the (poetic) sing. *Eloah* (even the reading *Ἐλωεῖ* occurs; cf. too, *Ἐλωεῖ*, Jg 5⁵ Sept.), or is intended for a transliteration of the Aram. *alohi* (*elahi*), has been questioned. Either form, we must suppose, could be so perverted as to serve the mocking pretence that the sufferer was invoking Elijah. For the form

lama or *lamma* (so in Mark the Geneva version of 1557, and Rheims), representing the Heb. (?), even some modern translators read *lama*, after the Aramaic. The Aram. *shebaktami* reappears in *σαβακταβελ* or *σαβακταβι* (so Lachmann in Matt.):—the substitution in the majority of texts of χ for κ being due, perhaps, simply to the ordinary law of Greek euphony; or, should the spelling with χ be equally ancient, it may indicate a variant pronunciation; for the Heb. ρ is transliterated by χ in other words also (as *ἀχελδαμᾶχ* Tdf. Treg., *ραχά* Tdf.; see Dalman, *Gram. d. jüdisch-pal. Aramäisch*, p. 304). The curious readings *σαφβαβελ* and *σαβαφβαβελ* (see Tischendorf, *u.s.*) show the influence of the Hebrew. This mixture of tongues points, perhaps, to independent traditions; see the ed. of the Vulg. by Wordsworth and White, esp. the note on Matt. *l.c.* It seems, however, to afford but equivocal support to the theory that an Aram. version was current in our Lord's day, as the ecclesiastical or popular Bible [cf. Gesenius, *Gesch. d. Hebr. Sprache u. Schrift.*, Leip. 1815, p. 73; De Wette, *Einl. ins A.T.* § 57 (ed. Schrader, 1869, § 68); E. Böhl, *Forsch. nach ein. Volksbibel zur Zeit Jesu*, Wien, 1873]. J. H. THAYER.

ELIAB (עֲלִיָּאב 'God is father,' A 'Ελιᾶβ, except in 1 Ch 15¹⁸. B ^α 'Ελιαβδ., ^{α*} 'Ελιβδ., 2 Ch 11¹⁸ B 'Ελιᾶβ, Jth 8¹ B 'Ελειᾶβ, ^α 'Ενδᾶβ).—1. According to P, son of Helon, and prince of Zebulun, who represented his tribe at the census and on certain other occasions, Nu 1⁹ 27 7²⁴ 29 10¹⁶ (P). 2. A Reubenite, father of Dathan and Abiram, Nu 16^{1b, 12} (JE), Dt 11⁶. P gives, as further details, Eliab's father's name, Pallu, and the name of another son, Nemuel (Nu 26³⁴). The father's name, Pallu, probably stood in the original text of Nu 16^{1b}. See Dillmann, *ad loc.*, and art. KORAH. 3. Eldest son of Jesse, and brother of David. His appearance led Samuel to suppose that he must be the chosen of J^h to succeed Saul. With his two brothers, Abinadab and Shammah, he joined Saul's army at the time that Goliath was insulting Israel; during this time David visited his brother in the camp, and was addressed by E. in insulting terms. E. had a daughter named Abihail (see art.), 1 S 16^{6f}. 17¹⁵⁻²³, 1 Ch 2¹³, 2 Ch 11¹⁸: on 1 Ch 27¹⁸ see ELIHU. 4. According to the reading of 1 Ch 6²⁷ (Heb. ¹²) the name of an ancestor of Samuel—an Ephraimite. Variants are Eliel, 1 Ch 6²⁴ (Heb. ¹⁹), and Elihu, 1 S 1¹. See ELIHU. 5. One of the Gadite warriors who joined David during his wanderings, 1 Ch 12⁹. These warriors and their doings are described in 1 Ch 12⁸⁻¹⁴. 6. A Levite who, according to the Chronicler, was a musician appointed in the time of David to play the psaltery (לְזַבֵּן), in the first instance in connexion with the bringing up of the ark to Jerus., 1 Ch 15^{20f}. Perhaps the name was that of a (post-exilic) family of singers. Cf. references in AMMIEL (No. 3). 7. According to the genealogy in Jth 8¹, a remote ancestor of Judith, and consequently a Simeonite, cf. 9²; and with 'Salamiel, the son of Salasadai' (8¹), cf. Nu 1⁶ (Heb. and LXX). G. B. GRAY.

ELIADA (עֲלִיָּאָדָא 'whom God takes notice of,' or 'cares for'; *lii*, 'knows.' For this nuance of the verb, cf. Gn 18¹⁹, Ex 2²⁵, Ps 1⁶ RV).—1. *Ἐλιδαέ*, repeated as *Βααλειμαδθ* B, *Ἐλιδαέ* A, *Βααλιμαδθ* Luc. A son of David (2 S 5¹⁶), called *עֲלִיָּאָדָא* Beeliada (which see) in 1 Ch 14⁷. 2. (*Ἐליδαέ* A, om. B Luc.) Father of Rezon, a Syrian, captain of a marauding band which resisted Solomon's authority (1 K 11²³). 3. (*Ἐλειδά* B, *Ἐליαδά* A Luc.) A warrior of Benjamin (2 Ch 17¹⁷). C. F. BURNEY.

ELIADAS (*Ἐλιαδάς*), 1 Es 9²⁸.—In Ezr 10²⁷ ELIOENAI.

ELIAHBA (עֲלִיָּאָבָא 'God hideth'), one of David's 'Thirty,' 2 S 23³², 1 Ch 11³³; *הַשְּׁלֵשִׁים* 'the Shaalbonite' of the Heb. text, should be more correctly pointed *הַשְּׁלֵשִׁים* 'the Shaalabbinnite' (cf. Jos 19⁴²).

J. F. STENNING.

ELIAKIM (עֲלִיָּאִים 'whom God sets up'; cf. Sabæan *לְאִקִּים*, *לְאִקִּים*; *Ἐλιακίμ* (*Ἐλιακίμ* & Q^a in Is 22²⁰)).—1. Son of Hilkiah, and prefect of the palace in succession to Shebna during the latter or middle portion of Hezekiah's reign (Is 22^{20f}, 2 K 18^{18f}. = Is 36^{3f}). This prefecture, described as *עַל־בַּיִת* 'over the household,' seems to have embraced the discharge of all the domestic affairs of the king, and was a position of the highest rank, being held by Jotham the heir to the throne, after his father king Azariah had been smitten with leprosy (2 K 15⁵). First mention of the office occurs during Solomon's reign (1 K 4⁶), and it existed, apparently with similar powers and dignity, in the kingdom of Israel as in Judah (1 K 16⁶ 18³, 2 K 10⁶). Delitzsch and others compare the Merovingian office of *major domus* (*maire du palais*). The prefect appears to have also been known as *שֹׁבֵעַן* *šōbēan*, rendered by RV 'treasurer,' m 'steward.' This title is connected by Cheyne (*Is. ii. 153*) with the Assyri. *šaknu* 'a high officer,' from *šakin* 'to set up, place'; but the fact that the fem. *שֹׁבֵעַת* *šōbēneṯ* is used of Abishag in 1 K 1² seems rather to connect the word with the verb *שִׁכַּן* *hiškin*, 'deal familiarly with,' from which was derived the general meaning of *caretaker* or *attendant* (see the writer's note on 1 K 1²). The title occurs in a Phœn. inscription from Lebanon belonging probably to the 8th cent. B.C.: 'Sōken of the New City, servant of Hiram, king of the Sidonians' (*CIS* i. i. 5).

E. appears to have been a disciple or political ally of the prophet Isaiah, who predicts in glowing terms his succession to the office of prefect in place of his unworthy predecessor (Is 22^{20f}). At his institution he is to be invested with long tunic and girdle, the insignia proper to his office, and is to receive as prime minister the title of 'Father' of the kingdom (v. 2¹, cf. Gn 45⁸, 1 Mac 11³²). In figure, if not literally, as part of the ceremony of institution, the key of the house of David is said to be laid on his back, *i.e.* he is to act with full powers as the king's vizer or representative (v. 2², quoted as a Messianic type Rev 3⁷; cf. Mt 16¹⁹). At Sennacherib's invasion of Judæa, B.C. 701, Isaiah's prediction has come to fulfilment, and E. appears as prefect, while Shebna holds merely the lower office of scribe.

The last two vv. of the prophecy (Is 22²⁴⁻²⁵) are involved in considerable obscurity.

(a) Most obviously 'the nail that was fastened in a sure place,' v. 2⁵, must refer, as in v. 2³, to E., whose fall will result from the abuse of his high position by the undue exercise of nepotism (v. 2⁴, the vessels large and small denote the various members of his family of greater or less importance. *כָּל הַכֶּלִים*, RV 'all the glory,' is rendered by Delitzsch 'the whole heavy lot'). Such a prediction, however, is scarcely consistent with the enthusiasm of vv. 2⁰⁻²², supposing the whole prophecy to have been written down by Isaiah at one sitting, either prior to E.'s elevation (Orelli), or 'after the fate of both dignitaries, revealed to him at two different times, had found its fulfilment' (Delitzsch). If, therefore, vv. 2⁴⁻²⁵ refer to E., we must conclude (Hitzig, Cheyne) that they were penned subsequently to the former part of the prophecy, whether by Isaiah himself, or by some other hand.

(b) Gesenius, Ewald, Driver, Dillmann consider the 'nail' of v. 2⁵ to be different from that of v. 2³, and to refer back to Shebna, whose fall is to take place 'in that day,' *i.e.* simultaneously with the rise of E.

2. The orig. name of Jehoiakim, king of Judah,

which see (2 K 23³⁴=2 Ch 36⁴). 3. A priest who took part in the dedication of the wall of Jerus. under Nehemiah (Neh 12⁴¹). 4. 5. In Mt 1¹³ and in Lk 3^{30, 31}; ancestors of our Lord (see GENEALOGY). C. F. BURNEY.

ELIALI (A 'Ελιαλεῖ, B 'Εδιαλεῖς), 1 Es 9²⁴.—The name either corresponds to Binnui in Ezr 10³⁸ or is unrepresented there.

ELIAM (עֲלִיָּם 'God is kinsman'; 'Ελιδβ, BA in 2 S 11³, and B in 2 S 23³⁴, where A has Οὐελιαφ).* —1. Father of Bath-sheba, whose first husband was a Hittite, 1 S 11³ (=1 Ch 3³, where Eliam is called Ammiel; see below). Eliam himself, therefore, may have been a foreigner. 2. Son of Athithophel the Gilonite, and one of David's heroes. It is not impossible that this Eliam is the same as the preceding, but there is no evidence that such was the case (2 S 23³⁴). The omission of the name from the parallel list in 1 Ch 11 is probably due to textual corruption. See Driver, *Samuel*, note on 2 S 23³⁴. G. B. GRAY.

ELIAONIAS (A 'Ελιαωνίας, B 'Ελιαωνίας), 1 Es 8³¹.—A descendant of Phaath-moab, who returned from Babylon with Esdras. In Ezr 8⁴ ELIEHOENAI.

ELIAS.—See ELIJAH.

ELIASAPH (אֱלִיָּשָׁף 'God has added,' 'Ελισάφ).—1. Son of Deuel, and prince of Gad at the first census (Nu 1¹⁴ 2¹⁴ 7^{42, 47} 10²⁰ P). 2. Son of Lael, and prince of the Gershonites (Nu 3²⁴ P).

ELIASHIB (אֱלִיָּשִׁיב 'God will (or, does) bring back (or, restore)'. In LXX the most frequent forms are 'Ελεισοῦβ (B), 'Ελισοῦβ (A), 'Ελεισάειβ (B), 'Ελιασειβ (AB)].—A popular name after the Exile; perhaps, in spite of 1 Ch 24¹², it was not in use in pre-exilic times. The persons of this name mentioned in OT are—1. The high priest who was contemporary with Nehemiah. He was son of Joiakim, grandson of Jeshua the son of Jozadak, the contemporary of Zerubbabel (Neh 12¹⁰, Ezr 3¹), and father of Joiada (Neh 12¹⁰ 13²⁸). He assisted in the rebuilding of the walls of Jerus. during Nehemiah's governorship (Neh 3¹). He can have had no sympathy with the exclusive policy of Ezra and Nehemiah, for both he himself and members of his family allied themselves with the leading foreign opponents of Nehemiah (Neh 2¹⁰). The exact nature of Eliashib's own alliance with Tobiah the Ammonite is not stated (Neh 13⁴), but a son of his son Joiada, during the period of Nehemiah's recall to the Pers. court, married a daughter of Sanballat the Horonite, and was in consequence driven away by Nehemiah on his return (Neh 13²⁸). This, combined with the expulsion of Tobiah from the temple-chamber provided for him by E. (Neh 13⁴⁶), must have created, even if it had not existed before, an open schism between E. and Nehemiah. Cf. further below (No. 7), and Ryle's notes on the passages cited above in the Cam. Bible ed. of Ezr-Neh. 2. A singer of the time of Ezra, who had married a foreign wife (Ezr 10²⁴), called in 1 Es 9²⁴ Eliasibus. 3. An Isr. of the family of Zattu (Ezr 10²⁷, in 1 Es

* Note on the genuineness of the name.—The name occurs but twice in MT; in one case (2 S 11³) all VSS except the Vulg., and in the other the LXX, show a different name. In spite of this a close comparison of the VSS confirms the correctness of the Massoretic tradition of the rare name Eliam, which certainly occurs in Phoen. (CIS 147, אֱלִיָּם, on a Sardinian inscription) as against the commoner names which appear in the VSS. Ammiel (1 Ch 3³) may be an actual alternative name of the same man (cf. Jehoiachin and Coniah), or may be the alteration of an offensive, because misunderstood, name (Eliam being regarded as 'God of the people') into a less exceptional form (Ammiel regarded as 'People of God'); see further, Gray, *Stud. in Heb. Proper Names*, p. 45.

9²⁸ Eliasimus); and 4. another of the family of Bani (Ezr 10³⁶), who had married foreign wives. 5. A son of Elioenai and descendant of David. From the position of the name in the genealogy this E. must have lived after the Exile, and possibly as late as the middle of the 4th cent. (1 Ch 3²⁴). 6. According to the Chronicler (1 Ch 24¹²), E. was the name of a priestly house in the time of David. But see the references and the literature cited in AMMIEL 3. 7. Father of Jehohanan, to whose chamber in the temple Ezra resorted (Ezr 10⁶). But the suggestion (see, e.g., Ryle on Ezr 10⁶) that this E. is identical with No. 1 is not improbable. See art. JOHANAN. G. B. GRAY.

ELIASIB (A 'Ελιασιβος, B Νδσειβος), 1 Es 9¹.—A high priest in the time of Neh. Ezr 10⁶, ELIASHIB.

ELIASIBUS (A 'Ελιασιβος, B -σειβος, AV Eleazurus, perhaps from the Aldine 'Ελιαζουφος, ρ being read for φ), 1 Es 9²⁴.—One of the 'holy singers,' who put away his strange wife. In Ezr 10²⁴ ELIASHIB.

ELIASIMUS (A 'Ελιασιμος, B -ει-ει-, AV Elisimus), 1 Es 9²⁸.—In Ezr 10²⁷ ELIASHIB.

ELIASIS ('Ελιασις), 1 Es 9²⁴.—This name and Enasibus may be duplicate forms answering to Eliashib in Ezr 10³⁶ (Speaker's *Comm.*).

ELIATHAH (אֱלִיָּאֵתָה 'God hath come').—A Hemanite, whose family formed the twentieth division of the temple service (1 Ch 25^{4, 27}).

ELIDAD (אֱלִידָד 'God has loved,' 'Ελιδάδ).—Son of Chislon, and Benjamin's representative for dividing the land, Nu 34²¹ P (perh. = Eldad, one of the elders, Nu 11²⁶ E).

ELIEHOENAI (אֱלִי־הוֹנַי 'to J' are mine eyes').—1. A Korahite (1 Ch 26⁶, AV Elioenai). 2. The head of a family of exiles that returned (Ezr 8⁴, AV Elihoenai), called in 1 Es 8²¹ Eliaonias.

ELIEL (אֱלִיֵּל, prob. 'El is God').—1. A Korahite (1 Ch 6³⁴), prob. = Eliab of v. 27 and Elihu of 1 S 1¹. 2. 3. 4. Mighty men in the service of David (1 Ch 11^{46, 47} 12¹¹). 5. A chief of eastern Manasseh (1 Ch 5²⁴). 6. 7. Two Benjamite chiefs (1 Ch 8^{20, 22}). 8. A Levite mentioned in connexion with the removal of the ark from the house of Obed-edom (1 Ch 15^{9, 11}). 9. A Levite in time of Hezekiah (2 Ch 31¹³).

ELIENAI (אֱלִיֵּנַי, textual error for אֱלִיָּנַי Elioenai).—A Benjamite (1 Ch 8²⁰). See GENEALOGY.

ELIEZER (אֱלִיעֶזֶר 'God is help').—See ELEAZAR. 1. Abraham's chief servant, a Damascene (Gn 15², AV, RVm). (The construction here is difficult, but the words can hardly be rendered as a double proper name as RV, 'Dammesek Eliezer.' Whatever the exact construction, the words, unless there is a corruption in the text, must be intended to suggest that E. was in some way connected with Damascus. See Delitzsch, *New Com. on Gen.* ii. 4). This same E. is prob. the servant referred to in Gn 24. 2. A son of Moses by Zipporah; so named to commemorate the deliverance of Moses from Pharaoh (Ex 18⁴, 1 Ch 23^{15, 17}). 3. The son of Becher a Benjamite (1 Ch 7⁶). 4. The son of Zichri, captain of the tribe of Reuben in David's reign (1 Ch 27¹⁶). 5. The son of Dodavahu of Mareshah, who prophesied the destruction of the fleet of ships which Jehoshaphat built in co-operation with Ahaziah (2 Ch 20²⁷). 6. An E. is

mentioned among the 'chief men' whom Ezra sent from Ahava to Casiphia to find Levites and Nethinim willing to join the expedition to Jerusalem (Ezr 8^{16,6}). 7. 8. 9. A priest, a Levite, and a son of Harim, who had married 'strange women,' i.e. wives of non-Israelitish descent, in the time of Ezra (Ezr 10^{18, 28, 31}). 10. One of the priests appointed to blow with the trumpets before the ark of God when David brought it from the house of Obed-edom to Jerus. (1 Ch 15²⁴). 11. A Levite mentioned in 1 Ch 26²⁵. 12. An E. is mentioned in the genealogy of our Lord given by St. Luke (3²⁹).

W. C. ALLEN.

ELIHOREPH (אֱלִיֹּרֶפֶת, possibly 'God of autumn,' or 'of ripe age'; cf. Job 29⁴ RV. 'Ελιάφ B, 'Εναρέφ A, 'Ελιάβ Luc.).—One of Solomon's scribes (1 K 4³).

ELIHU (אֱלִיֹּהוּ).—1. An ancestor of Samuel, 1 S 1¹, called in 1 Ch 6³⁴ Eliel and in 1 Ch 6³⁷ Eliab (wh. see). 2. A variation in 1 Ch 27¹⁸ for Eliab, David's eldest son, 1 S 16⁶. Kittel (in Haupt's OT) emends the text of Ch to אֱלִיֹּהוּ. 3. A Manassite who joined David at Ziklag, 1 Ch 12²⁰. 4. A Korahite porter, 1 Ch 26⁷. 5. See next article. 6. ('Ηελού) an ancestor of Judith, Jth 8⁴.

ELIHU (אֱלִיֹּהוּ, LXX 'Ελιούς, 'my God is He,' cf. Elijah, 'my God is J').—Described in Job 32² as 'son of Barachel the Buzite, of the family of Ram'; he would therefore be descended from Nahor, brother of Abraham (Gn 22²¹, J). E. is introduced as an interlocutor in the Book of Job, speaking after the three friends Eliphaz, Bildad, and Zophar have failed to convince Job by their arguments. He is described as younger than the three; he undertakes, however, to act as moderator between the disputants, and speaks at length in chs. 32-37. But the fact that E. is mentioned neither in the prologue nor in the epilogue of the book; that his arguments do not add substantially to the discussion; that the transition from ch. 38 to ch. 39 is abrupt and awkward; together with certain features of style in the speeches assigned to E.,—have led most critics to the conclusion that chs. 32-37 represent a later addition to the book. Lightfoot, Rosenmüller, Derenbourg, and others support the strange conjecture that E. is the name of the author himself (see JOB, BOOK OF).

W. T. DAVIDSON.

ELIJAH (אֱלִיָּהוּ; אֱלִיָּהוּ in 2 K 1^{8, 12}, Mal 3²³ [Eng. 4⁷] 'J' is God'; LXX 'Ηλειαύ; NT 'Ηλίας, AV Elias).—1. The loftiest prophet of the OT, raised up by J' at a crisis in the history of Israel to save the nation from lapsing into heathenism. His public life is sketched in a few narratives wonderful for their vivid representations and graphic details. His personal history is full of human interest, and presents lessons of the highest ethical and spiritual value. His first appearance is surrounded with an element of mystery which is in keeping with his whole history. There is but a single brief reference (1 K 17¹) to his origin, and even that is not without ambiguity. The words are tr. by AV, in accordance with the MT, 'E. the Tishbite, who was of the inhabitants of Gilead.' If this rendering is correct, it signifies that a certain place called Tishbeh or Tishbi of Gilead, not named elsewhere, had the distinction of giving birth to the prophet. Some have sought to identify it with Thisbe of Naphtali, mentioned in To 1². They point out that the correct rendering of תִּשְׁבֵּי (on the assumption that it is a common, not a proper name) is not 'of the inhabitants,' but 'of the sojourners' (so RV), which would imply that E. came from another or foreign district. But the LXX makes the disputed word a proper name, and reads 'E. the Tishbite from Thesbon of Gilead.' This reading seems to be followed by Josephus (*Ant.* VIII.

xiii. 2). It is supported by the fact that, whenever the word is a common noun, it is written תִּשְׁבֵּי. There seems therefore little reason to doubt that E. was a native of the wild but beautiful mountain district of Gilead, the highlands of Palestine, on the eastern side of the Jordan, bordering on the great desert. There he had a prophet's nurture in solitude. He always loved the wild defiles and rushing torrents of his native land. Lonely mountains and bleak deserts were congenial to his spirit. He learned to dwell familiarly on the sterner aspects of religion and morality. He had the austere, ascetic, monotheistic spirit of the desert. He learned the fear of J' which knew no other fear.

Nothing is said of his parentage, and the omission is in striking contrast to the wealth of detail with which the descent of some other prophets is stated. E. occupied from the first a unique and exalted position in the goodly fellowship. He seemed to be like Melchizedek 'without father, without mother, without genealogy, having neither beginning of days nor end of life.' Strange traditions arose in later times among the Rabbis, as that he was Phinehas, the grandson of Aaron, returned to life, or an angel in human form.

E.'s whole manner of life is meant to be a protest against a corrupt civilisation. He has some of the habits of the ancient Nazirite, and not a few of the characteristics of the modern Bedawin. His unshorn locks streaming down his shoulders and his rough mantle of camel's hair (2 K 1⁸) alone make him a remarkable figure in Israel. He has the fleet foot of a true son of the desert (1 K 18⁴⁶), and an iron frame which enables him to endure a forty days' fast (19²). He dwells in the clefts of the Cherith (17³), sleeps under a desert broom (19⁵), lodges in the cave of Horeb (19⁹), and haunts the slopes of Carmel. If he enters a city, it is only to deliver the message of J' and be gone. His startling appearances, abrupt speeches, and sudden disappearances create around his personality a profound air of mystery. He is believed to be borne hither and thither by the Spirit of J' (1 K 18², 2 K 2¹⁶). He comes down from the hills of Gilead as the champion and prophet of J' in the dark days of Israel's apostasy. He comes to bear witness to truths which ought never to have been denied in Israel. Like every true reformer, he takes his stand upon old principles. He is the personified conscience of the nation. He comes, a prophet of heroic mould, to witness by deeds rather than by words.

The spiritual danger which E. was called to avert arose out of a political alliance formed between Israel and Phœnicia, and cemented by the marriage of Ahab and Jezebel, the son and the daughter of the allied kings. A covenant between two Semitic peoples was always supposed to imply a friendship between their gods. Its natural sequel was a syncretism of faith and worship. That Ahab did not at first think of denying J' is proved by the names he gave his sons—Ahaziah (J' holds) and Jehoram (J' is high). But his religious instincts were as dull as his political instincts were keen. Brave enough in battle, and on the whole a successful ruler, he was morally weak, and came completely under the baneful influence of his strong-minded Tyrian wife, a fanatic in her own faith. It was to please her that he not only erected a temple to Baal at Samaria (1 K 16²³) and introduced a multitude of foreign priests (18¹⁹), but allowed a religious persecution, in which many of the prophets of J' are said to have been slain (18^{4, 13}). The effect of these events on the religious life of Israel could not be small. The people had hitherto been ensnared only by the gods of the hostile tribes of Canaan

whom they had subdued. They were now tempted to adopt the cultus of a great allied nation, and the temptation proved too strong to be resisted. Baal-worship became the court religion, and, if its progress had not been effectually checked, would soon have become the national religion.

To prevent this disastrous consummation is E.'s life-task. His fiery zeal against the Tyrian cultus springs from moral at least as much as religious considerations. That superstition had such accompaniments as would soon sap the moral vigour of any nation. A patriot as well as a prophet, E. comes to save his country. His ruling passion is jealousy for the Lord God of hosts (1 K 19¹⁰). He knows the God of Israel as a moral and spiritual being, and all his demands on behalf of J" are moral and spiritual. The details of ritual do not trammel a man of his spiritual force. He knows nothing of the Deuteronomic law which condemns local altars (1 K 18²³). It is not recorded that he ever visits Jerusalem. But Gilgal, Bethel, Carmel, and other ancient sanctuaries of the true religion, are dear to him. Sinai is, from its associations, the holiest ground. He believes in a covenant in virtue of which J" became the God of Israel, and Israel the people of J". And the conviction is burned into his mind that there can be no alliance between the God of Israel and any other divinity. His jealousy for J" is the counterpart of J"'s jealousy for Israel. It is to E. an intuitive truth that J" can brook no rival in His kingdom, and he is amazed that any can doubt it: his spirit blazes with contempt against all 'weak-kneed' persons (1 K 18²¹) who halt between two opinions.

It is contended by some critics (Wellhausen, Stade, etc.) that E. was not a monotheist, like Amos, Hosea, and the other literary prophets: that he was like the mass of the people of his time in regarding J" as only the God of Israel—a local god—and believing that every other nation had its own deity. It is affirmed that E. was a 'henotheist.' Now, it is sufficiently clear that the faith of many of his contemporaries is of this rudimentary order: the contest between J" and Baal is to them a real struggle between rival deities. But E.'s lofty conception of J" virtually excludes all other objects of worship—makes all the gods idols. It is difficult to believe that the Baal whom he treats with such irony and contempt (1 K 18²⁷) has to his mind any reality. At any rate, it is but a short step from E.'s 'henotheism' to absolute monotheism.

The memoirs of E. seem to be derived from several sources. The narratives in 1 K 17–19, 21, 2 K 2, form a unity. They took shape in Northern Israel, as is indicated by the remark that Beersheba 'belongeth to Judah' (1 K 19³). They were probably written under the influence of the literary prophets of the Northern Kingdom, about the beginning of the 7th cent. B.C. These narratives are composed in the highest style of literary art. Their distinctly popular character is apparent, and it has been noted by W. R. Smith that they read like a transcript of a vivid oral tradition (*Prophets of Israel*, 116). Like other historical parts of the OT, they may have lived in the mouths of the people for generations, forming a powerful means of religious education, before they were committed to writing.

E. comes on the stage of history with the same startling abruptness with which he makes his first appearance before Ahab. He is sent to announce that J" is about to avenge the apostasy of Israel by bringing a long drought on the land. This message delivered, he vanishes into solitude. He is guided by the Spirit of J" to the brook Cherith 'that is before,' i.e. to the east of,

'Jordan' (1 K 17³), probably in his native Gilead. See CHERITH. There his life is miraculously sustained by ravens, which bring him flesh every morning and evening (vv. 4–6). Prosaic critics have tried to eliminate the marvellous element from the story. They call attention to the fact that the word עֲרִיבִים, which is so pointed in the MT as to mean 'ravens,' signifies with another set of vowel-points 'Arabs,' with another 'merchants,' or 'inhabitants of Oreb.' But, not to emphasize the fact that ravens eat flesh, which Arabs generally avoid, it is to be noted that the marvellous element is quite in keeping with other parts of E.'s story. In the oral tradition the prophet's friends were doubtless 'ravens': the narrative would not have been thought worth preserving but for the miraculous feature, which is reproduced in all the ancient versions.

When the brook Cherith dries up in the long drought, the prophet goes, under divine direction, to Zarephath, a city of heathen Tyre (17⁹), where he is hospitably received by a poor widow whom the famine has reduced to her last meal (v. 12). The prophet finds a well-spring of kindness in the heart of a heathen country. He learns to sympathize with one of another race and a strange religion, and his stern nature is in some degree softened by contact with human suffering. He rewards the widow's charity first by miraculously increasing her small store of meal and oil, and later by restoring her child to life (vv. 14–24). His experience begins to prepare him for a higher revelation, which he is in due time to receive.

Meanwhile the king, in his rage against the prophet of evil, sends messengers into all nations (1 K 18¹⁰) to search for E., but they report that their quest has been fruitless. For three years there falls no rain or dew in Israel. The famine is so severe that the king and his chamberlain, Obadiah, have to scour the country in search of provender for the royal stables (v. 34). While they are engaged in this quest, E. suddenly appears before Obadiah and bids him summon his master (v. 7^a). The meeting of the prophet and the king is very dramatic. Ahab has never been able to stifle the conscience of an Israelite, and cannot withhold his respect from the prophet of J". He bitterly accuses E. of being the troubler of Israel; but when the prophet flings back the charge, the king is silenced (v. 17^a). E. challenges, or rather commands, him to summon the prophets of Baal to a contest between J" and Baal on Mount Carmel. The worshippers of Baal shall sacrifice to their God; E. himself will sacrifice to J": the god who answers by fire, he shall be the God. The king consents (v. 19^c). The narrative of the contest (1 K 18^{21ff.}) is one of the grandest in the OT. Apart from its historical value, it is precious as an ideal representation of the conflict which is always being waged between true and false religion, and of combatants who are always meeting. On the appointed day the king and the 400 prophets of Baal, E. and 'all the people,' assemble on Carmel. The prophets of Baal, having built an altar and laid their sacrifice, pray to their god from morning till evening, and are excited to a frenzy by their fruitless efforts and the biting sarcasm of E. In the evening E. rebuilds the ancient altar of J"—thrown down in these times of persecution—and utters a few calm words of prayer to J". The lightning falls and consumes not only the sacrifice, but the altar and the water poured into trenches around it. The people fall on their faces, and with loud voices acknowledge that J" is God. Then, in an access of irrepressible zeal, they fall upon the 400 prophets who have deceived the nation, and put them all to the sword. E. prays that the drought may cease, and before nightfall there is a tempest

of rain, in the midst of which the strange prophet, seized by a sudden impulse, carried away by the emotion of triumph, rolls his mantle together and runs like an *avant-courier* in front of the royal chariot all the sixteen miles from Carmel to the gates of Jezreel (vv. 42-46).

E. imagines that the battle for truth has been fought and won, and that his task is virtually accomplished. But his triumph is brief. When he receives a message that Jezebel has sworn to have his life (19²), his sanguine hope for the restoration of the true religion is changed in a moment into blank despair. He feels with a sinking heart that he has laboured for naught and in vain. God Himself has contended in vain with human folly. Nothing can be made of a king whom miracles will not convince, but who is turned round the finger of a woman. The apostate nation will remain apostate. Seeing all this (the LXX and other ancient versions, instead of 'and he saw it,' read 'and he was afraid,' 19³), E. flees for his life to Judæa, and, leaving his servant at Beersheba, plunges into the desert, where he is alone with J". Weary, famished, and heavy of heart, he lies down under a desert broom [so RVm; see JUNIPER], and is willing to die. He feels that his life has been a failure. He has been worsted in the battle of life, and something tells him that he has deserved to be. He is no better than his fathers. He has now nothing more to live for. It is vain to continue the unequal struggle. All men have forsaken him. He has no friend but J", and he prays that He would release him from his fruitless task (vv. 3, 4).

God is very kind to his servant, first satisfying his bodily wants, and then giving him a new revelation such as his soul needs. As the prophet sleeps under the desert bush, he is awakened by the touch of an angel, who sets meat and drink before him, and on the strength of that food he goes a forty days' journey (forty being, as usual, a round number) to Horeb (vv. 5-8). It is not difficult to understand what the prophet seeks at that mountain sanctuary. He desires to meet J". Men have failed him: he wants to make sure of God. He goes to Horeb to stand where Moses stood. His heart cries out for the vindication of the moral law. Finding a cave, he lodges there (v. 9). (In the Heb. it is *the* cave, either as already a place to which pilgrims resorted, or from the fame of this single visit: the traditional cave is in a secluded plain under the highest peak of Jebel Mûsa; see SINAI.) The narrative which follows (vv. 11-13) is spiritually one of the profoundest in the OT. J" represents to E., by a magnificent acted parable, the contrast between law and grace, judgment and mercy. As the prophet of J", E. has been using the weapon of force. He has never conceived it possible to defeat the enemies of God by any other weapon. He has magnified God's strictness with a zeal He will not own. And he has failed. Force has left men hard and indifferent. J" here makes experiment upon E. with his own weapon. He visits the mountain with a hurricane, with an earthquake, and with a fire. The prophet's wounded spirit is not moved by any of these. J" is not in them. But in the calm which follows the tumult he hears a still small voice (RVm 'a sound of gentle stillness') which thrills his inmost being; he feels that God is there; self-abased, he wraps his face in his mantle and waits to receive the divine communications. He is thus taught the meaning of his failure. He is shown in a parable 'a more excellent way.' In the heart of Sinai he learns the gentleness of God. Others like himself may be won by grace, whom might and wrath have failed to move. The kingdom of God comes not so much by startling

miracles, but through quiet human agencies and in the slow movements of history. E. is therefore shown that J" has still a great work for him to do: he must shape the destinies of two great nations, and provide for the continuance of the prophetic succession. Three commands are laid upon him: to anoint Hazael to be king over Syria, Jehu to be king over Israel, and Elisha to be his own successor. And he is comforted with the assurance that the work in which he has been engaged has not been a failure: J" reserves for Himself seven thousand who have not bowed the knee to Baal.

With faith restored E. returns to his task (vv. 19-21). On his way to Damascus he finds Elisha at the plough, and throws his mantle over him—a symbolic action by which he claims him as his son and invests him with the prophetic office. Elisha leaves all, and ministers unto him. From this time E. is never alone: he has a companion to whom he becomes a true spiritual father (2 K 2¹²), winning his filial affection as well as profound veneration.

Here there is a break in the narrative. It is nowhere stated by what means E. sought to fulfil the other two parts of the commission which he received at Horeb. The account of the actual completion of his task by Elisha in 2 K 9, 10 is apparently by another narrator. Nor is it directly recorded what means E. afterwards used for the advancement of the true religion. But there are deeply interesting hints in the memoirs. Cheyne's singular statements (*Hallowing of Criticism*, p. 143), that E. was weak in spiritual intuition, and that the lesson of Horeb was lost upon him, do not seem to be warranted. On the contrary, there are not wanting indications that from the day on which E. heard the still small voice there was another spirit in him. He does not again attempt to suppress Ahab's idolatry by force. He leaves the apostate king alone, and waits the course of events. If he does not entirely abandon his lonely desert life, he at least becomes a familiar figure in the schools of the prophets at Gilgal, Bethel, and Jericho (2 K 2⁴). His personality, and probably his teaching, make a profound impression upon the young prophets. He kindles in their minds his own zeal for J"; he transfuses his spirit into them; the homage which they pay to Elisha (2 K 2¹⁵) is entirely due to the fact that they perceive in him the spirit of the greater prophet.

When E.'s moral indignation once more flashes out against the house of Ahab (1 K 21), it is not now for the destruction of idolatry but in the cause of justice and humanity that he appears. He has become the champion of the civil and moral rights of the people. Ahab violates the ancient laws of property, which are the charter of the people's liberties, by forcibly alienating the vineyard of Naboth. He deepens his guilt by allowing his wife to compass the innocent man's ruin by peculiarly nefarious means (1 K 21⁸). This crime is the signal for E.'s reappearance at Jezreel. On the day after Naboth's murder, the king is proceeding in state to take possession of the coveted gardens, when he is confronted by the prophet, and quails once more before his moral indignation. His enemy has found him (v. 20). His own sin finds him out. His conscience condemns him. He stands speechless while the prophet's words of doom smite him like thunderbolts: Ahab's house shall fall; dogs shall eat the carcase of Jezebel; the king's whole posterity shall perish, and their bodies be given to the dogs of the city or the fowls of the air (so D² in vv. 20b-26). In the chariot behind Ahab on that memorable day was an officer named Jehu, on whose mind the words of E. left an indelible impression (2 K 9²⁵); and though the execution of the sentence was deferred in consideration of the

king's penitence, this man was the instrument chosen by J" for the overthrow of the house of Ahab.

The episode of Naboth's vineyard produced a great change in the popular sentiment. It revealed the true character of the issues in E.'s conflict against idolatry. It showed the people, that while idolatry went hand in hand with injustice and crime, the religion of J" was the bulwark of righteousness and liberty. At the same time, it opened their eyes to the real grandeur of the prophet in their midst, and doubtless we are to date from this event a great increase in his power as the prophet of J".

It is impossible to determine the extent and duration of E.'s subsequent labours. There are two other narratives, one of which brings him into contact with Ahaziah, son of Ahab (B.C. c. 853), while the other implies that he lived on till the reign of Jehoram of Judah (c. 849-844). It is difficult to harmonize this chronology with that of 2 K 3, which makes it clear that E.'s career ended and Elisha's began before the death of Jehoshaphat (c. 874-849). It is possible, however, that Jehoram reigned for a time during the life of his father Jehoshaphat (2 K 8¹⁶; the text is doubtful).

According to the narrative in 2 K 1, Ahaziah, son of Ahab, having injured himself by falling from a balcony of his palace, sends messengers to the shrine of Baal-zebub, god of Ekron, to inquire if he shall recover. On their way they are intercepted by Elijah, who indignantly asks them if there is not a God in Israel of whom they might inquire, and commands them to go back and tell the king that his injuries will certainly prove fatal. When the messengers describe to the king the person who waylaid them, he immediately recognizes in him the old enemy of his house, and in the true spirit of Jezebel, his mother, sends out a band of fifty men to capture him. They find the prophet seated 'on the top of the hill' (name not given: Carmel, say some critics, but it is not on the way to Ekron). At his word, fire comes down from heaven and consumes them all. Another band of the same number meet the same fate. A third company is sent out, but their leader takes warning, adopts a humble tone, and he and his men are spared. E. then goes in person to the king, and repeats the declaration that his doom is sealed.

This narrative differs widely in language, style, and spirit from those of the preceding group. The prophet's personal appearance has altered (1⁹); his name has changed from *אליה* to the later form *אליהו*; and instead of being directly inspired and guided by J" as hitherto, he receives the word of prophecy from an angel (1¹³). 'The representation of the prophet assumes gigantic proportions, but at the same time becomes rigid and lifeless: it ceases to be available as a pattern of human action' (Ewald). The narrator tells the story, without apology, for the glorification of his hero; but no narrative in the OT presents greater moral difficulties. If it is regarded as literal history, one's moral sense is shocked at the destruction of a great number of men whose only fault is obedience to the orders of their captain and their king. One cannot conceive the story to have been penned by the historian who related the parable of the still small voice at Horeb. The best comment on the story was supplied by Christ. He condemned with unmistakable plainness the vindictive spirit which His disciples, by citing the example of Elijah, sought to justify (Lk 9⁵⁴). Others besides the disciples have used the story as an argument for persecution. E. was the patron of the Inquisitors. Even Calvin and Beza argued from this narrative that fire was the proper instrument of punishment for heretics. But

the story itself can hardly be regarded as history. It is rather one of those imaginative apologies—abundant in the schools of the scribes—which borrowed the names of ancient heroes to lend vividness and concreteness to abstract doctrines.

The other narrative (2 Ch 21^{12ff.}) is given only by the Chronicler, and bears distinct marks of lateness. Jehoram, king of Judah, son-in-law of Ahab and Jezebel, having fallen under the spell of sensuous Baal-worship, E. is represented as sending him a letter warning him that J" will bring a plague upon Judah, by which all the king's house will be afflicted, and to which the king himself will early fall a victim. This is the only narrative which brings E. into connexion with the kingdom of Judah, and the only one which represents him as carrying on his work by means of writing. The style and language of the letter correspond very closely with those of the Chronicler.

The narrative of E.'s translation (2 K 2¹⁻¹⁸) returns to the lofty style of the writer of 1 K 17-19, 21. Ewald, indeed, regarded it as the work of the same great narrator; more recent critics consider that from a literary point of view it is more closely connected with the history of Elisha (2 K 2^{19ff.}). E.'s end is still more mysterious than his beginning. He alone shares with Enoch the glory of being 'translated,' so that he should not taste death (He 11⁵). Of him alone is it recorded, as of Christ (Lk 24⁵¹), that he was carried up into heaven. He is residing at the ancient sanctuary of Gilgal (now Jiljilia, between Shechem and Bethel, not the town of the same name on the Jordan), where a prophetic guild is established, when he is warned that the time of his departure is come. His invisible Guide calls him for the last time into solitude. The appointed place is beyond Jordan, not now in the ravines of his native Gilead, but southward in the wild region of Nebo, where his greatest forerunner fell asleep. As he went to Horeb for inspiration in his time of spiritual storm and stress, so he is drawn in the final crisis of his life to the mountain region in which Moses was summoned to die, away from the face of man. But he begins his last journey by visiting the prophetic guilds at Bethel and Jericho, probably for the purpose of confirming the young prophets in the faith. Wishing to spare Elisha the pain of witnessing the last fiery ordeal, he tenderly entreats him to remain at Gilgal. His faithful companion cannot brook the idea of separation: he solemnly vows that he will never leave his master. At Bethel the sons of the prophets, foreboding E.'s coming removal, ask Elisha if he knows that his master is to be taken away from him. He knows it well, but is too straitened in spirit to speak of it, and entreats them to hold their peace. From Bethel E. proceeds to Jericho, where he again endeavours to persuade his disciple to let him go on this journey alone; but Elisha repeats his vow. At Jericho some of the prophetic guild wish to question Elisha about the impending event, but he begs them to be silent. Fifty sons of the prophets ascend the heights above the city to watch the prophet as he descends with his disciple to the Jordan. They see him strike the river with his mantle; the waters part; the two men cross by the bed of the river and pass out of sight. As they approach their destination, E. asks his disciple if he has any last request to make. Elisha seeks 'a double portion' of his master's spirit—not twice E.'s inspiration, but the portion of an eldest son, who received twice as much as the younger sons (Dt 21¹⁷). E. replies that it is a hard request. Spiritual gifts are the most difficult of all to transmit. Nevertheless, he assures his follower that if he prove his fitness for prophetic gifts by remain-

ing with his master to the end, and looking without fear on the dread messengers of the invisible world, his request will not be denied. They now enter the dark mountains of Moab. Somewhere here J["] Himself laid His servant Moses to rest. No man knew the exact place. 'The whole region is a sepulchre.' As they still advance and talk together, black clouds gather, a tempest descends, the air is filled with fire, and, 'behold, there appear chariots of fire and horses of fire, and E. is taken up to heaven in a whirlwind.' Elisha sees him no more. He rends his clothes, and mourns for his master as one mourns for the dead. He is bereft of the prophet who has been to him a father, and to Israel a power as great as its chariots and horsemen. But he has stood the severe test imposed upon him, and receives the reward—the spirit of E. rests upon him. Taking up the mantle which has fallen from his master, he returns from the scene of the translation to the Jordan, and puts his new power to the proof by striking the waters with the mantle and calling upon the God of Elijah. The waters divide as before, and he passes over on dry land. When the sons of the prophets at Jericho hear of what has happened, and perceive that the spirit of E. rests upon his disciple, they bow themselves to the earth and acknowledge Elisha as their new master. But the story of the translation awakens their scepticism, and they send out fifty strong men to make search for the missing prophet, Elisha trying in vain to dissuade them. For three days they prosecute the search among the mountains of Moab, expecting to find E. on some lonely peak or in some dark valley, cast away as at other times by the Spirit of J["]. When they return and confess that the search has been vain, Elisha gently chides their unbelief (2 K 2¹⁸).

E. is thus removed from the scene of his labours before the whole task laid upon him (1 K 19¹⁵) is finished. But Elisha and others enter into his labours, sons of the prophets animated by his spirit are raised up in hundreds, his teaching spreads, his spirit penetrates the nation. Then the harvest is reaped. After two short reigns the idolatrous house of Ahab falls (2 K 9). The enemies of J["] and of E. perish. Superstition dies hard, but there is never again any question of rivalry between J["] and Baal. There is no more danger of Baal-worship becoming the national religion. It sinks into the superstition of a sect, known to later prophets as the *remnant* of Baal (Zeph 1⁴).

The weapons by which this reformation was accomplished were mainly spiritual. It cannot be denied that some of E.'s own actions may have furnished an excuse for certain deeds of violence. It is like a Nemesis that the finishing touch has to be given to the work by a man of blood like Jehu. Yet it was not the fire and sword of Carmel, but the still small voice speaking in the schools of the prophets and the hearts of the faithful that again made Israel a people prepared for J["].

E.'s moral power lies in the simplicity of his faith. He realizes the belief in J["] intensely, and lives a heroic life in the strength of it. 'J["] before whom I stand' is his favourite formula (1 K 17¹⁸). He stands erect and haughty before kings; but in the presence of J["] he wraps his head in his mantle, or crouches to the ground with his face between his knees (1 K 18⁴² 19¹⁸). Stern and rugged by nature, a prophet moulded for heroic work in evil days, he is led through an experience which awakens in him the tenderness that is only to be found in union with strength. His personal history, especially the narrative of the breakdown and restoration of his faith, brings him into touch with human beings in all ages. He is so great

that readers of his story are not unthankful for his failings. 'E. was a man of like passions with us' (Ja 5¹⁷).

Critics differ widely in their estimates of the historical importance of E. Wellhausen thinks that his influence is appraised too highly in the biblical narratives. His struggle with Baal cannot have possessed the importance attributed to it from the point of view of a later time. Israel was never torn asunder by such a religious commotion as that described in 1 K 18. It was not Baal that brought about the fall of the house of Ahab, but common treason on the part of Jehu (*Proleg.* 291). Wellhausen is given to depreciating the part played by prophecy in the history of Israel. 'In the eyes of their contemporaries,' he says, 'the prophets were completely overshadowed by the kings; only to later times did they become the principal personages.' E. must hide his diminished head before Ahab. 'He effected nothing against the king, and quite failed to draw the people over to his side.' Wellhausen states no convincing reasons for this interesting view. There is probably more truth in the opinion of those who say that the history of Israel is essentially the history of prophecy. And Kuenen's estimate of E. appears much fairer: 'The consequences of the struggle with the Syrian Baal and the victory of Jahvism were most important. Had the issue of the conflict been different, the existence of J["]-worship would have been at stake; the averting of this danger was an important result. From this period onward the belief in "J["] the God of Israel" is assailed no longer. The prophets of the eighth century are able to start from it as a universal conviction. For this foundation for their preaching they have to thank Elijah and his school' (*Religion of Israel*, i. 360).

No OT hero fills a larger place in Jewish tradition than Elijah. How he impressed the minds of his own people in after-ages is shown by the striking eulogium pronounced upon him by the son of Sirach (Sir 48¹⁶). It became a fixed belief that E. would appear again for the deliverance and restoration of Israel. This is expressed in the very last words of the OT (Mal 4⁵⁻⁶). Jesus teaches that this expectation was fulfilled by the appearance of John the Baptist (Mt 17¹¹⁻¹²). Jesus' cry on the cross, 'Eli, Eli,' was mistaken for a call to Elijah to come for His deliverance (Mt 27⁴⁷, Mk 15³⁵). No prophet is mentioned so frequently in the NT as Elijah. The priests and Levites (Jn 1²⁰) cannot understand John's right to baptize, if he is neither the Christ, nor Elijah, nor that prophet (like unto Moses, Dt 18¹⁵). As E. was with Moses in spirit at Sinai and Nebo, so these two prophets appear together conversing with Jesus on the Mount of the Transfiguration (Mt 17³, Mk 9⁴, Lk 9³⁰).

It only remains to be said that E. occupies a conspicuous place in the legends and rites of many peoples. Among the Jews he is the expected guest at every passover, for whom a vacant seat is reserved. Among the Greeks he is the patron saint of mountains, and many summits in Greece are now called by his name. In the Roman Catholic Church he is revered as the founder of the Order of the Barefooted Carmelites. By the Mohammedans he is often confounded with the great and mysterious El-Khudr, the Eternal Wanderer, who having drunk the water of life retains everlasting youth, and appears ever and anon to right the wrongs of men. E. is canonized both in the Greek and the Latin Church, his festival being on the 20th July.

2. (אֵלִיָּהּ, AV Elishah) A Benjamite chief, 1 Ch 8²⁷.
3. 4. A priest and a layman who had married foreign wives, Ezr 10^{21, 26}. J. STRACHAN.

ELIJAH, APOCALYPSE OF.—This is the title of a lost pseudopigr. work which stands eighth in the stichometrical list of Nicephorus and tenth in an anonymous early list. In the first of these it is called 'Ἡλια προφήτου, and said to consist of 316 verses. In the other its title is 'Ἡλιου ἀποκάλυψις. The *Constitut. Apost.* vi. 16 also contain a reference to a writing bearing the name of Elijah. Origen (*Comm.* Mt 27⁹) informs us that this work was the source of the quotation in 1 Co 2⁹ 'Things which eye saw not, and ear heard not,' etc. Similar testimony is borne by Euthalius and others, and it is probable that the statement is correct, although Jerome (*Comm.* Is 64³, *Ep.* 57 *ad Pamm.*) denies it for apologetic reasons. On the other hand, there seems to be less probability in the statement of Epiphanius (*Hæc.* ch. 43), that Eph 5¹⁴ 'Awake thou that sleepest,' etc., was quoted from the same Apoc. of Elijah. Origen makes no mention of this where he might be expected to do so, and Euthalius alleges that the words of Eph 5¹⁴ are derived from a lost apocryphon which bore the name of *Jeremiah*. For further information and for the patristic quotations in full, see Fabricius, *Cod. Pseud. V.T.* i. 1070-1086; Schürer, *HJP* II. iii. 129 ff. J. A. SELBIE.

ELIKA (אֵלִיקָא), the Harodite, one of David's 'Thirty' (2 S 23²⁵).—The name is omitted in B, and in the parallel passage 1 Ch 11, possibly owing to the repetition of the gentilic 'the Harodite.' J. F. STENNING.

ELIM (אֵלִים).—One of the stations in the wanderings of the children of Israel (Ex 15²⁷, Nu 33⁹); apparently the fourth station after the passage of the Red Sea, and the first place where the Israelites met with fresh water. It was also marked by an abundant growth of palm trees (cf. Ex 15²⁷, twelve wells and seventy palms).

If the traditional site of Mt. Sinai be correct, the likeliest place for Elim is the Wady Ghurundel, where there is a good deal of vegetation, especially stunted palms, and a number of water-holes in the sand; but some travellers have pushed the site of Elim farther on, and placed it almost a day's journey nearer to Sinai, in the Wady Tayibeh, where there are again palm trees and a scanty supply of brackish water. The Greek monks who have located Elim at *Tôr* were probably guided thereto by the luxuriant palms and a special taste for the extravagant in miracle. The biblical account takes the Israelites from Elim to a camp by the sea; and this accords very well with the experience of travellers who go to Mt. Sinai by the southern route, camping one night in the Wady Ghurundel, and the next night by the shore of the Red Sea.

It should be remembered, however, that grave doubts have been cast upon the popular identification of Mt. Sinai (see SINAI); and as these doubts turn, in part, upon the identification of Elim and of the encampment by the sea, we must be careful not to fall into a topographical reasoning in a circle, so as to identify Sinai by means of Elim, and then Elim by means of Sinai.

It has been suggested that the Elim of Ex 15, Nu 33, is only a variant form of the plural name **Eloth** which we find in 1 K 9²⁶, 2 Ch 8⁷, a place which was certainly situated near the head of the gulf of Akabah, and whose name still survives in the Arabic *Aileh* (cf. the suggestive doublet of Hazeroth, Nu 11³⁵, and Hazerim, Dt 2²³). If this be so, then the camp by the sea is to be sought for in the neighbourhood of Akabah, the position of Mt. Sinai is unknown, and the earlier stages of the journey of the children of Israel are to be sought in the line of the present *Haj* route from Egypt to Mecca. See Beke, *Origines Biblicæ*, 1839; Baker Greene, *The Hebrew Migration from Egypt*, 1879; Sayce, *HCM*, 1894; and the art. EXODUS (ROUTE). J. RENDEL HARRIS.

ELIMELECH (אֵלִמֶלֶךְ 'God is king,'* so the name Malchiel).—The husband of Naomi and father of Mahlon and Chilion, Ephrathites of Beth-lehem-judah (cf. 1 S 17¹²). He was driven by a famine into the country of Moab, where, after a residence of undefined length, he died. He is spoken of as if he were the head of a clan in the tribe of Judah (cf. Ru 2¹⁻³). This would be the Hezronites (1 Ch 2⁹, cf. Gn 46¹²).

H. A. REDPATH.

ELIOENAI (אֵלִיֶּזְבֶּת 'to J' are mine eyes').—1. A Simeonite chief (1 Ch 4³⁰). 2. A Benjamite (1 Ch 7⁸). 3. A descendant of David who lived after the Exile (1 Ch 3^{23, 24}). 4. A son of Pashhur who had married a foreign wife (Ezr 10²²), called in 1 Es 9²² Elionas. 5. A son of Zattu who had committed the same offence (Ezr 10²⁷), called in 1 Es 9²³ Eliadas. 6. A priest (Neh 12¹¹).

ELIONAS.—1. (A 'Ἐλιωνάς, B 'Ἐλιωνάς), 1 Es 9²².—In Ezr 10²², ELIOENAI. 2. (A 'Ἐλιωνάς, B -δᾶς), 1 Es 9²³=Ezr 10²⁷ ELIEZER.

ELIPHAL (אֵלִיפָאֵל 'God hath judged').—One of David's mighty men (1 Ch 11³⁶), called in 2 S 23³⁴ Eliphelet (wh. see).

ELIPHALAT.—1. (A 'Ἐλιφάλατος, B 'Ἐλειφάλα, AV Eliphalet), 1 Es 8³⁹.—In Ezr 8¹³ ELIPHELET. 2. ('Ἐλειφάλατ), 1 Es 9³³=Ezr 10³³ ELIPHELET.

ELIPHAZ [אֵלִיפָאֵז, possibly 'God is fine gold'; but in the absence of analogous meanings this must be considered very doubtful. LXX generally 'Ἐλιφάς (so A in Gn) or 'Ἐλειφάς (so B in Ch and Job, except 2¹¹) or 'Ἐλιφάξ (so A in Ch and Job, and D in Gn 36¹⁵)] is the name of two foreigners (Arabs) mentioned in OT. 1. E. appears in the Edomite genealogy of Gn 36 (and hence 1 Ch 1^{35, 4}) as son of Esau by Adah (vv. 4, 10), and father of Amalek by his Horite concubine Timnah (vv. 12, 22). In v. 15¹, various other sons are mentioned, as 'the dukes that came of E. in the land of Edom,' noticeable among them being 'Duke Teman,' and another is the well-known tribal name Kenaz. See further, art. EDOM. 2. See next article. G. B. GRAY.

ELIPHAZ (אֵלִיפָאֵז, LXX 'Ἐλιφάς, an Idumæan name, transposed = Phasael?).—Described as the first, and apparently the oldest and most important, friend of Job. He is called 'the Temanite.' Teman was a son of Eliphaz, the eldest son of Esau (Gn 36^{10, 15}); and אֵדוּמָא was a district of Idumæa, proverbially known for its wisdom (Jer 49⁷). It is mentioned in close connexion with Edom in Jer 49²⁰. E. speaks at greater length than either Bildad or Zophar; his speeches are recorded in Job 4. 5. 15. and 22. He is also more moderate in tone than the others; his first speech, especially, is gravely tender towards what he holds

* Or acc. to others, 'My god is Melek' (the god-king).

to be Job's errors. Many of his utterances, taken by themselves, contain important truth; but his orthodox statements and maxims fail to cover the facts of Job's case. In his later speeches E. speaks more directly and sharply, but he never becomes violent or cruel. For an outline of his arguments, see **JOB**, BOOK OF. W. T. DAVISON.

ELIPHELEHU (אֵלִיפְהֵלֵהוּ 'may God distinguish him,' AV Eliphelah).—A doorkeeper (1 Ch 15^{18, 21}).

ELIPHELET (אֵלִיפְהֵלֵת 'God is deliverance').—1. One of David's sons (2 S 5¹⁶, 1 Ch 14⁷ (AV Eliphalet), 1 Ch 36⁸=Elpelet of 1 Ch 14⁵). The double occurrence of the name in Chronicles, as if David had had two sons named E., is probably due to a scribal error. 2. One of David's mighty men (2 S 23³²=Eliphal of 1 Ch 11³⁰). 3. A descendant of Jonathan (1 Ch 8³⁹). 4. One of the sons of Adonikam who returned from exile (Ezr 8¹⁸=Eliphalat of 1 Es 8²⁹). 5. A son of Hashum who had married a foreign wife (Ezr 10³²=Eliphalat of 1 Es 9²³).

ELISABETH (Ἐλισάβετ [WH 'Ελει.]; Heb. אֵלִישָׁבֶת 'God is an oath,' Ex 6²³).—The wife of Zacharias, and the mother of John the Baptist (Lk 1⁵⁶). E. herself belonged to the priestly family of Aaron, and was a kinswoman (συγγενίς) of the Virgin Mary, though we do not know what the actual relationship was. She is described, along with Zacharias, as 'righteous before God, walking in all the commandments and ordinances of the Lord blameless.' Upon her, however, had fallen what to a Jewish woman was the heaviest of misfortunes, the reproach of barrenness. And not till she and her husband were 'well stricken in years' was the promise of a son given them. Five months later Elisabeth was visited in her home in the hill-country of Judah by her kinswoman Mary, and the degree of illumination which she had reached is proved by her addressing Mary as 'the mother of my Lord' (Lk 1⁴³). See **ZACHARIAS**. G. MILLIGAN.

ELISEUS.—See **ELISHA**.

ELISHA (אֵלִישָׁא 'God is salvation'; LXX 'Ελισαιε; NT 'Ελισαῖος, AV Eliseus).—The son of Shaphat, of the tribe of Issachar, the disciple and successor of the prophet Elijah. He is first mentioned in the threefold commission with which Elijah is charged by J^h at Horeb (1 K 19¹⁶). Obeying the divine voice, Elijah goes to Abel-meholah ('meadow of the dance,' probably *Ain Helweh*) in the N. part of the Jordan Valley, not far from his native Gilead, where he finds E. ploughing with twelve yoke of oxen in one of the rich level fields of his father's heritage, eleven yoke being with his servants, and he last with the twelfth (19¹⁹). Leaving the highway, Elijah passes over to him, and throws his mantle over his shoulders—a symbolic act of double significance: he adopts E. as his son, and invests him with the prophetic office. No word is spoken, but the symbol is understood. Elijah, probably resuming his mantle, strides on, leaving E. amazed at the sudden call, and bewildered by the necessity of making so tremendous a decision. But the young man's natural shrinking from so high a calling—a hesitation similar to that of Moses, Isaiah, Jeremiah—is quickly overcome by the consciousness that this is a call from God. Running after Elijah, he declares his readiness to follow him, only begging permission to return and give the kiss of farewell to his father and mother. The mention of domestic ties opens Elijah's eyes to the greatness of the sacrifice he is calling E. to make: perhaps it is too great for the youth; at any rate his choice must be voluntary and deliberate; the casting of the mantle over him was

in itself nothing. There is no accent of rebuke, but tender consideration for E.'s natural feelings, in the austere prophet's testing words: 'Go back again, for what have I done unto thee?' E. however, has made his choice. He is ready to leave father and mother, and houses and lands, and marks his act of self-renunciation by a sacrifice which has sacramental significance. Unyoking the oxen from his plough, he slays them, and taking the plough, the goad and the yokes for fuel, roasts the flesh of the oxen, and invites his people to a farewell feast. Then, having kissed his parents, he follows Elijah, and ministers unto him. One graphic touch indicates his relation to the greater prophet: he is referred to as 'E. the son of Shaphat, who poured water on the hands of Elijah' (2 K 3¹¹). They seem to have been together some six or seven years (1 K 22², 2 K 1¹⁷). How and where this time was spent is not definitely stated. There is no evidence that Elijah ever called E. to be a dweller in desert solitudes. There are rather indications that during these years they lived in familiar intercourse with the sons of the prophets (2 K 2). The narrative of Elijah's last journey shows the deep filial affection, as well as reverence, which he had awakened in his disciple. See **ELIJAH**. From the scene of the translation, Elisha returns bearing Elijah's mantle, and endued with a 'double portion' of his spirit. Thus began a prophetic career in N. Israel which lasted for more than half a century, during the reigns of Jehoram, Jehu, Jehoahaz, and Joash.

E. is Elijah's spiritual successor, but he presents in many respects a striking contrast to his teacher. Only metaphorically does he wear Elijah's mantle: after its first display it appears no more. He wears the common garments (אֲדָמָה 2 K 2¹²), and carries the walking-staff of 'ordinary grave citizens,' sometimes using it for working miracles (2 K 4²⁹). With his bald head, he does not escape unfavourable comparison with the prophet of the flowing locks (2 K 2²³). E. is no son of the desert. Brought up at a peaceful farm in the Jordan Valley, amid the sweet charities of home (1 K 19²⁰), he always prefers human companionship. He is generally found in cities, sojourning at Jericho among the sons of the prophets, or dwelling in his own house at Samaria or at Dothan (2 K 6^{14, 23}). A prophet's chamber is built for him by a lady of Shunem (4¹⁰). Elijah's power was derived from communion with J^h in lonely mountains and valleys; E. is helped by the strains of music—'the hand of J^h' is upon him when the minstrel plays (2 K 3¹⁵).

Elijah's short career was memorable for a few grand and impressive scenes, E.'s long career is marked by innumerable deeds of mercy. Both in public and in private life his activity is incessant. He enters palaces not as an enemy, but as a friend and counsellor. Kings reverently address him as 'father' (2 K 6²¹ 13¹⁴). The kings of Israel, Judah, and Moab come to seek his advice in war (3¹¹⁻¹⁹). The king of Syria consults him in sickness, and offers him costly presents (8⁷⁻⁸). The king of Israel comes to receive his parting counsels (13¹⁴⁻¹⁹). His influence at court and in the army would immediately secure a boon for a friend from the king or the captain of the host (4¹³). He is expert in camp-life, ambush, and scouting, and more than once is the means of saving the life of the king (6¹⁰). Even more than in palaces is he welcome in the homes of the people. He is 'the holy man of God who passeth by us continually' (4⁹). Most of his miracles are deeds of gracious and homely beneficence. Elijah began his career by predicting a famine in the land; E. begins his by healing a spring, that there might not be 'from thence any more death or barren land' (2²¹).

Several of E.'s recorded words and deeds seem to show how much he profited by the chastening experience—and it may be by the direct teaching—of Elijah. He has learned the lesson of toleration: when Naaman inquires if it is possible to reconcile the homage due to Rimmon with loyalty to J', E. sends him away with a word of peace (5¹⁸). He knows how to temper justice with mercy; he forgives his own and his country's fierce enemies when he has them entirely in his hands (6²²). Yet he has his master's sternness when it is needed. He refuses to speak to Jehoram king of Israel, that 'son of a murderer' (3¹³ 6³²). Not in vain was it prophesied at Horeb, 'him that escapeth from the sword of Jehu shall E. slay.' It is E. who devises the plot that leads to the overthrow of the house of Ahab (9¹⁻³). And though he weeps for his country when he foresees the evil which the ferocious Hazael will bring upon Israel, yet he does not shrink from anointing him king of Syria (8¹²⁻¹³).

As a prophet E. had no new truth to proclaim. But he exercised a wide and lasting influence as the head of the prophetic guilds for more than half a century. The sons of the prophets regard him with profound reverence (2¹⁵), and obey him implicitly (9¹). E.'s single aim is to complete the reforms begun by Elijah—to re-establish the ancient truth, and repel heathen superstition. He is a statesman as well as a prophet. Among all the prophets, none intervene in the highest national affairs more boldly than E., and none so successfully. For many years he eagerly watches every turn of events. When the nation is ripe for revolution, he summons the destined man at an opportune moment, puts an end to the Tyrian domination, and extirpates the base Tyrian superstition. After the fall of the Omrite dynasty, he is the trusted friend and sagacious adviser of the house of Jehu, and the strength and inspiration of Israel in all its trials. Even to old age his zeal burns unquenchable: in the closing scene of his life the patriot is as evident as the seer; and his bequest to Israel is hope (13¹⁵⁻¹⁹). E. has no stormy spiritual experience like his master, and does not hold such immediate converse with J', yet he too has visions. He sees Elijah borne away to heaven by chariots and horses of fire; and at Dothan, when the town is surrounded by enemies, and his servant cries out to him in fear, he bids the young man look to the mountains, and see that they are full of chariots and horses of fire round about Elisha (6¹⁷).

It is impossible to arrange the events of E.'s life in chronological sequence. While the topography of the narrative is often precise, there is a singular want of definiteness as to personal names and dates. The only indication of time afforded by several of the anecdotes is the mention of the 'king of Israel'; but as no name is specified, the reader is left to conjecture which of the four kings who were the prophet's contemporaries may be referred to. It is impossible to say in whose reign the cure of Naaman, or the attempt of the Syrians to capture E., took place. In some cases occurrences are obviously grouped together, according to the connexion of their contents (2 K 2. 4). In others no principle of arrangement is apparent, and the loose connexion of the narratives becomes very awkward. For instance, the siege of Samaria by the Syrians is described immediately after it has been stated that 'the bands of Syria came no more into the land of Israel' (6³²). Gehazi appears in familiar intercourse with 'the king of Israel' after the account of his punishment with leprosy (5²⁷ 8¹); and the visit of Joash to E. during the prophet's last illness is related just after the mention of the death of Joash (13¹⁵). Most of E.'s deeds and

experiences are set down before the account of Jehu's revolution; but the prophet lived 45 years after that event, and his influence in the nation was certainly greater, and his deeds of beneficence probably more numerous, after than before the overthrow of his enemies.

The narratives are for the most part a record of E.'s activity as a seer, diviner, and worker of miracles, rather than as a prophet in the usual sense of the word. The ordinary prophet is a revealer of spiritual truth, and a preacher of righteousness. If he is represented as working miracles at all, they are entirely subsidiary to his teaching functions. But the reminiscences and traditions of E. represent him chiefly as a wonder-worker. He suspends the laws of nature (6⁶), foresees future events (8¹²), divines the secret thoughts of men (5²⁶ 6¹²), and knows what events are happening out of sight or at a distance (6³²).

It will be convenient (A) to group together E.'s deeds in his more private capacity, and afterwards (B) refer to his achievements as the friend and adviser of kings.

A. (1) Recrossing the Jordan after Elijah's translation, E. either dwells or sojourns (בָּצַד) at Jericho, lately rebuilt (1 K 16³⁴) in a 'pleasant situation' (2 K 2¹⁹), the fertility of whose groves and gardens was due then, as always, to its perennial springs. At the time of E.'s visit one of these springs has noxious properties, which make it unfit for drinking, and injurious to the land (2¹⁹). The citizens represent the facts to E., who, taking salt in a new vessel, casts it into the spring, and in the name of J' declares the water healed (2²¹). (2) From Jericho E. goes to Bethel, which he had lately visited with Elijah (2²³). Passing through the wooded gorge (now called the Wady Suweinit), which leads up to the town, he is met by a noisy troop of boys, who, though they were probably very respectful to the great and awful Elijah, stand in no fear of his youthful successor, and rudely greet him with shouts of 'Go up, thou bald head!' E. turns and curses them in the name of J', and two she-bears come out of the wood and rend forty-two of them in pieces. One naturally asks if this narrative is literal history. The extreme severity of the punishment is evidently out of all proportion to the offence. The deed is strikingly in contrast to E.'s conduct on other occasions (see especially 2 K 6²⁰⁻²²). One MS of the Sept. inserts the word *ἐπιβαλον* ('they pelted him with stones'), the transcriber evidently feeling the moral difficulty. Some of the Rabbis say that E. was punished with sickness for the deed. The story probably had some basis in fact, but in its present form it reads like a folklore tale, of the kind familiar in all lands, intended for the admonition of rude and naughty children. (3) The widow of one of the sons of the prophets—the name and place are wanting—is in debt, and her sons are about to be taken away by her creditor and sold as slaves. She has nothing left in her house but a pot of oil, but E. causes the oil to multiply till it fills all the vessels she can borrow from her neighbours. Having sold the oil, she pays her debt, and lives with her sons on the surplus (2 K 4¹⁻⁷). (4) The next reminiscence (2 K 4³⁸⁻³⁹) gives a charming picture of private life in Israel. As E. chances to pass the village of Shunem (now Sólam, three miles from Jezreel, on the slopes of little Hermon), he is pressed to accept hospitality by a lady of substance. Whenever he passes that way again, he turns in to eat bread. The lady is so impressed by the character of the man of God that she persuades her husband to build a chamber on the roof of the house, to which the prophet may have free access at all times. As a recompense for her kindness, E. grants her fondest wish: a child is born to her. After some years—

the narrative goes on without break—her son dies of sunstroke. The lady rides to Carmel, and summons E., who comes and restores the boy to life. (5) E. is next found residing at Gilgal, with the sons of the prophets, during a famine (4³⁸⁻⁴¹). People are subsisting on any roots that can be found. One of the young prophets brings home some wild gourds (רִיבֵי, Vulg. *colocynthidas agri*), and shreds them into the caldron. But when they begin to eat, the taste reveals the presence of poison, and they cry out, 'O man of God, there is death in the pot.' 'Bring meal,' answers the wonder-worker, and forthwith the dish is rendered harmless and wholesome. (6) Apparently during the same famine, while E. is still living at Gilgal, he is visited by a farmer from Baal-shalishah (4^{32a}), who brings him a present of first-fruits—twenty loaves of new barley and a sack full of fresh ears of corn (Lv 2¹⁴ 23¹⁴). E. bids his servant set them before a hundred men. The servant hesitates, but the small supply is miraculously rendered sufficient for the whole company. (7) The next narrative (2 K 5) gives an account of the healing of Naaman—the only miracle of E. which is referred to in the NT (Lk 4²⁷). Naaman, commander-in-chief of the army of Syria, being afflicted with the most malignant kind of leprosy (the white variety, v. 2^b), hears of the prophet in Samaria through a Hebrew maid, kidnapped in a border foray and taken into his household. He resolves to visit the great healer. When he arrives at the prophet's door, attended by his train of horses and chariots, E. sends a servant to direct him to go and bathe seven times in the Jordan. Naaman, who has expected a deferential reception and a striking ceremonial, is enraged by the seeming want of courtesy, and even more by the nature of the prescription. But his servants calm his ruffled temper; and when he obeys the prophet's command, his flesh comes again as the flesh of a little child. He returns to thank and reward his benefactor, but E. refuses to touch any of the presents which are pressed on his acceptance. Naaman, made to feel by E.'s self-denial that the glory is due to E.'s God, resolves to become a worshipper of J'. He asks permission to take earth from Israel, that he may erect an altar to the God of Israel; his idea being the popular one, that J' was a local deity, and could only be worshipped on his own soil. E. does not seek to correct his mistake. He even gives the proselyte permission to continue to pay outward homage to Rimmon, the god worshipped by the king of Syria (5^{18, 19}). Naaman having departed in peace, E.'s servant Gehazi follows him, and by dint of lying obtains the treasure which E. refused. But E. divines his dishonesty, and dooms him and his house to be afflicted with the leprosy of Naaman for ever (5²⁷). (8) The sons of the prophets, who are increasing in numbers, resolve to build a larger dwelling-place by the Jordan. While they are engaged in felling trees, the head of a borrowed axe flies off and falls into the water. It would be vain to search for it in the deep and turbid river. But a cry brings the man of God to the spot. He breaks off a stick and casts it into the stream, and forthwith the iron comes to the surface, and is restored to its possessor.

B. The remaining narratives exhibit E. in his relation to kings and rulers, and recount some of his services to his country as an inspired seer and wise counsellor. (1) E. is with the confederate armies of Israel, Judah, and Edom, in a campaign against Mesha, king of Moab (2 K 3¹⁻²⁰). His presence is not discovered till the armies are perishing for lack of water. When the three kings, in their extremity, come to him for counsel, he refuses to have anything to do with the king of Israel, bidding him go to the prophets of his father

Ahab and his mother Jezebel. But out of respect for Jehoshaphat, king of Judah, he consents to give his advice. When a minstrel plays before him and the hand of J' is upon him, he commands that deep trenches be dug, and prophesies that though they shall see no rain, yet the valley will be filled with water. His orders are obeyed, and next morning, owing to a plentiful fall of rain high among the mountains of Moab, the torrents swell, and all the country is filled with water. (2) The next narrative (2 K 6⁸⁻²³) presents the prophet in a very pleasing light, fearless though an host encamps against him, confident though war rises against him, and magnanimous in his treatment of his baffled enemies. Marauding bands of Syrians have made numerous incursions into the north country, but all their movements have been mysteriously checkmated. Whenever they have laid an ambush in 'such and such a place,' E. has warned the king of Israel to avoid the spot, thereby saving the king's life 'not once nor twice.' Benhadad, finding all his designs frustrated, begins to suspect treachery in his camp. When he hears the true explanation, he sends a strong force of horses and chariots to Dothan to capture Elisha. After comforting his alarmed servant with a vision of the spiritual hosts that always surround the dwellings of the just, the prophet goes down to meet the Syrians, and in answer to his prayer they are struck with blindness (עִוְרָה, a word found only here and in Gn 19¹¹, probably meaning illusion, *ἀβλεψία*). Then telling them, evidently not without a relish of the ludicrous aspect of the situation, that they have lost their way and come to the wrong city, he offers to conduct them to the person whom they are seeking. He leads them into the heart of Samaria. When their eyes are opened in answer to E.'s prayer, they find themselves at the mercy of the enemy. The king would have destroyed them, but E. enjoins him to set food before them, and send them back to their master. An enemy at once so powerful and so merciful makes such an impression upon the Syrians that their marauding expeditions entirely cease. (3) The next incident (6^{24a}), though introduced without remark immediately after the last, evidently occurred at a different time. The king of Syria gathers a great army to besiege Samaria. E. encourages the men of Israel to defend their city to the last. When the besieged are reduced to famine, he still counsels no surrender, and heartens the people with the prophecy of coming deliverance. The king of Israel—who is not named—wishes to capitulate. He vents his helpless rage upon E., and vows to take his life, because the prophet will not swerve from his purpose even when the people of the city are eating the flesh of their own children. While E. is in his house giving counsel to the elders of Israel, he divines that a messenger of the king is on his way to take his life, and that the king is following close behind. When the king enters, the prophet declares that on the morrow there will be abundance of food at the gate of the city. One of the king's officers sneers at the sanguine prediction: 'Yes, no doubt, J' will open windows in heaven! And yet can this thing be?' E. retorts that the officer will see the abundance, but shall not eat of it. During the night there is a panic in the Syrian host, the camp is deserted, and every part of the prophecy fulfilled. (4) We next find E. at Damascus. Having heard of the mortal sickness of Benhadad, he realizes that the time has come to execute the commission which Elijah received at Sinai, by anointing Hazael to be king of Syria. No sooner does E., whose fame as a prophet has now spread far beyond Israel, enter the city of Damascus, than the tidings are carried to the palace. King Ben-

hadad immediately sends Hazael, his commander-in-chief, laden with presents, to inquire of the seer if he may recover of his sickness. E.'s reply is uncertain: according to one reading, he bids Hazael return and tell the king that he shall surely recover; according to another reading (the *kéthibh*, and therefore probably authentic), Hazael is to reply that Benhadad shall surely die. At any rate, E. leaves Hazael in no doubt that the king is not to recover, and that his successor is none other than Hazael himself. But it is a hard task which J" has laid upon E.—to anoint the man whom he knows as the destined scourge of Israel. E., as he looks steadfastly in the fierce captain's face and foresees the coming evil, bursts into tears. When Hazael inquires what this weeping means, E. shows him his future. The Syrian, who has no ear for the tale of Israel's sufferings, and thinks only of the promise of personal distinction, replies ironically that the task is too great for a dog like him. But E. assures him in plain words that J" has chosen him to be king of Syria. (5) The chief business of E.'s life is to avenge the crimes and apostasy of the house of Ahab. The mission to anoint Jehu king over Israel, which Elijah did not live to fulfil, must be carried out by his successor. During a war between Israel and Syria for the possession of Ramoth-gilead, Ahab's son Jehoram is wounded, and goes home to Samaria to be cured. His ally the king of Judah leaves the army, and goes to visit him (8^{28a}). During their absence E. calls one of the sons of the prophets, and sends him to Ramoth-gilead, with instructions to seek out Jehu, and secretly anoint him king. As soon as Jehu divulges the secret to his brother officers, they proclaim him king, and the whole army at once espouses his cause. The nation has long been ready for a change, and the house of Omri falls without being able to strike a blow in self-defence (9^{14c}). (6) E. lives to extreme old age, and his last thoughts are given to his country. It is sad to reflect that, in spite of all his labours, Israel has become feeble and dependent. During the reigns of the pusillanimous sons of Jehu, the Syrians have done to Israel according to their will, and the nation has more than once been brought to the verge of extinction. But Jehu's grandson Joash is a youth of great promise, and E. sees in him one capable of making Israel once more independent and prosperous. The young king comes down to visit the aged prophet as he lies on his peaceful death-bed (13^{14c}). The king is moved to tears. No words could be more appropriate than those in which he addresses the prophet: 'My father, my father, the chariots of Israel and the horsemen thereof.' E. has still the spirit of the master to whom he first applied these words (2 K 2¹²). To impress on the young king's mind a sense of his duty, he uses a fine piece of symbolism. The window is opened eastward, toward the country of the enemy, the king's bow is pointed in that direction, the prophet's consecrating hand is laid on the king's right hand, and 'the arrow of J"'s deliverance, of deliverance from Syria,' is discharged. The king is then commanded to take up a sheaf of arrows and smite the ground. He smites only three times, and halts. This does not please the zealous old prophet: before closing his eyes he would fain have foreseen that the enemies of the people of J" would be defeated five or six times; as it is, the king has only energy enough to smite them thrice.

There is one other tradition regarding E., and that the most marvellous of all. His wonder-working power does not terminate with his life. In the spring of the year after his decease a burial is taking place in the cemetery which contains his sepulchre, when it chanced that a band of maraud-

ing Moabites comes in sight. The mourners, in their eagerness either to attack or to escape from the invaders, hastily place the corpse in the tomb of Elisha. No sooner does the body touch the bones of the prophet than the dead man revives and stands upon his feet (13^{20c}).

The foundation of E.'s character is laid in the strong affections of his home-life (1 K 19²⁰). He learns to call the great ascetic prophet his 'father,' but he never ceases to be attached to his fellow-men. While his career is less impressive than that of Elijah, his achievement is to make a common life illustrious. It cannot be said that all the narratives show him in an equally favourable light, but on the whole he is represented as humane, large-minded, tender-hearted, a prophet called to comfort, heal, and reconcile. Interesting sidelights are thrown on his character. His quick perception of the fitness of things is evidenced by his choice of beasts for a burnt-offering and fuel for his sacrifice (1 K 19²¹), his sense of humour by his treatment of the Syrian emissaries (2 K 6¹⁹), and his tenderness of heart by his tears over Israel's coming misfortunes (2 K 8¹¹). He is constantly (29 times in all) called the man of God, and he proves his love of God by loving men. His religion is to visit the fatherless and widows in their affliction (2 K 4¹). And amid all the seductions of court favour he retains the true prophetic simplicity of character and contempt for worldly wealth (5¹⁶). Like his great master Elijah, he is eulogized by the son of Sirach (Sir 48¹²⁻¹⁴).

Some of E.'s miracles—the dividing of the Jordan, the increase of the widow's oil, the restoration of the Shunammite's son—are almost identical with the recorded miracles of Elijah. The healing of the leper and the multiplying of the barley loaves bring to mind some of the miracles of Jesus. But it has often been remarked that to find parallels to the miracles of the iron axe-head made to swim, the noxious well healed with salt, the poisoned pot rendered harmless with meal, and the dead man quickened by the touch of the prophet's bones, we must go outside the Scriptures. Stanley says that 'E.'s works stand alone in their likeness to the acts of the mediæval saints. There alone in the sacred history the gulf between biblical and ecclesiastical miracles almost disappears.' And Farrar compares the stories of E. to 'other Jewish haggadoth, written for edification in the schools of the prophets, but no more intended for perfectly literal acceptance in all their details than the life of St. Anthony or St. Francis.'

Elisha is canonized in the Greek Church, his festival being on the 14th of June.

ELISHAH (עִישָׁה, 'Ελισά, 'Ελιστα, *Elisa*).—The eldest son of Javan according to Gn 10⁴. In Ezk 27⁷ the Tyrians are said to have procured their purple dye from the 'isles' or 'coastlands' of E., which shows that we must look for the locality in the Greek seas. Josephus (*Ant.* i. vi. 1) identified E. with the Æolians; phonetically, however, this is impossible; moreover, Greek ethnology made Æolus the brother, and not the son, of Ion, the Heb. Javan. Many modern writers have seen Elis in E.; but the name of Elis properly began with digamma, and is probably the same as the Lat. *vallis*. Dillmann proposed to identify E. with Southern Italy, and Movers with Carthage; both identifications, however, are inconsistent with the

statement that it was the source of the purple dye, and it is difficult to find any name on either the Italian or the African coast which can be compared with that of Elishah.

The Tel el-Amarna tablets have thrown a new light on the question. Several of them are letters to the Pharaoh from 'the king of Alasia,' a country which a hieratic docket attached to one of them identifies with the Egyptian Alsa. Alsa, sometimes read Arosa, was overrun by Thothmes III., and is mentioned in the list of his Syrian conquests engraved on the walls of Karnak (Nos. 213 and 236). Maspero (*Recueil de Travaux*, x. p. 210) makes Alsa or Alasia the northern part of Cœle-Syria. An unpublished hieratic papyrus, however, now in the Hermitage of St. Petersburg, which describes an embassy sent by sea to the king of Gebal in the time of the high priest Hir-Hor, states that the Egyptian envoys were wrecked on the coast of Alsa, where they were afterwards hospitably entertained by the queen of the country. Alsa or Alasia therefore must have adjoined the Mediterranean, and Winckler and W. Max Müller accordingly propose to see in it the island of Cyprus. Conder had already suggested that Alasia and E. are one and the same. The two chief objections to the identification with Cyprus are that the ordinary Egyptian name of that island was Asi, and that Thothmes III. includes the country among his Syrian conquests.

It is tempting to identify E., on the phonetic side, with the Greek Hellas. We might assume that the Egyptian form of the name, Alsa, was taken from the cuneiform Alasia, in which the initial aspirate of the Greek would not be expressed. But the Homeric poems seem to show that the name of Hellas could not have migrated from its original home in northern Greece to the eastern basin of the Mediterranean so early as the age of the Tel el-Amarna tablets. Moreover, as late as the reign of the Assyrian Sargon, Cyprus was still known to the inhabitants of Asia as 'the country of the Ionians,' not of the Hellenes, while a *Yavana* or 'Ionian' is mentioned in two of the Tel el-Amarna letters. The termination of Alasia implies a Greek adjective in *-σος*, and it is possible that Crete, rather than Cyprus, is intended by the name.

LITERATURE.—Sayce, *HCM* 130; Conder, *Bible and the East*.
A. H. SAYCE.

ELISHAMA (עִשְׁמָא) 'God has heard'.—1. A prince of the tribe of Ephraim at the census in the wilderness, son of Ammihud, and grandfather of Joshua (Nu 1^o 23, 1 Ch 7²⁶). 2. One of David's sons, born in Jerusalem (2 S 5¹⁶, 1 Ch 3⁸ 14⁷). 3. In 1 Ch 3⁸ by mistake for Elishua (which see) of 2 S 5¹⁵, 1 Ch 14⁵. 4. A descendant of Judah, son of Jekamiah (1 Ch 2⁴¹). 5. The father of Nethaniah, and grandfather of Ishmael, 'of the seed royal,' who killed Gedaliah at the time of the Exile (2 K 25²⁵, Jer 41¹). Jerome, following Jewish tradition, identifies him with No. 4. See Sayce *HCM* 380 f. 6. A scribe or secretary to Jehoiakim (Jer 36^{12, 20, 21}). 7. A priest sent by Jehoshaphat to teach the law in the cities of Judah (2 Ch 17⁸). R. M. BOYD.

ELISHAPHAT (עִשְׁפָּת) 'God hath judged'.—One of the captains who helped Jehoiada to instal king Joash (2 Ch 23¹).

ELISHEBA (עִשְׁבָּה) 'God is an oath', LXX, Ἐλισάβεθ B, Ἐλισάβερ A¹ (cf. Lk 1⁷), daughter of Amminadab, sister of Nahshon, a prince of the tribe of Judah, and wife of Aaron. The name occurs only in Ex 6²³ (P). W. C. ALLEN.

ELISHUA (עִשְׁוָה) 2 S 5¹⁵, 1 Ch 14⁵.—A son of David born at Jerusalem. The variant in 1 Ch 3⁸,

עִשְׁוָה, is due to the similar name occurring in the next line. J. F. STENNING.

ELIUD (Ἐλιούδ).—An ancestor of Jesus (Mt 1¹⁵). See GENEALOGY.

ELIZAPHAN (עִזָּפָן) 'God has protected'; cf. Phœn. לעזפן, Ἐλειαφάν.—1. Prince of the Kohathites, son of Uzziel, Nu 3³⁰, 1 Ch 15³ (Ἐλειαφάν), 2 Ch 29¹³ = Elzaphan (עִזָּפָן, Ἐλειαφάν), Ex 6²², Lv 10⁴ P. 2. Zebulun's representative for dividing the land (Nu 34²⁵ P). G. H. BATTERSBY.

ELIZUR (עִזְרָא) 'God is a Rock,' cf. ZURIEL, Ἐλειαούρ.—Prince of Reuben at the first census (Nu 1⁵ 2¹⁰ 7^{30, 35} 10¹⁸ P). A similar name occurs in the Zinjerli inscriptions (8th cent. B.C.), Bir-tsur, 'the god Bir is a rock' (Hommel, *Anc. Heb. Trad.*, 320), or Bart-súr, 'son of a rock' (D. H. Müller). G. H. BATTERSBY.

ELKANAH (עִלְכָּנָה) 'God has possessed'.—1. The second son of Korah, brother to Assir and Abisaph, one of the clans of the Korahites (Ex 6²⁴). We are told that 'the children of Korah died not' in the overthrow of Korah, Dathan, and Abiram (Nu 26¹¹). 2. The son of Jeroham, the son of Elihu, the son of Tohu, the son of Zuph, an Ephraimite of Ramathaim-zophim,* of the hill country of Ephraim, the husband of Hannah, his favourite wife, and Peninnah. Hannah felt her childlessness very much, especially as Peninnah mocked her for it; but E. endeavoured to comfort her. At length, after several yearly visits to the temple at Shiloh, Hannah was promised a son. This son was called Samuel, and Hannah and her husband offered him to the Lord when he was but an infant, and left him with Eli on their return to Ramah (1 S 1¹⁻²¹). 3. The son of Assir, the son of Korah (1 Ch 6²³), apparently identical with (1), and an ancestor of (2). 4. The father of Zuph or Zophai (1 Ch 6^{26, 35}). 5. An ancestor of Berechiah, the son of Asa, 'that dwelt in the villages of the Netophathites' (1 Ch 9¹⁶). 6. One of David's mighty men, a Korahite (1 Ch 12⁶). 7. One of the two doorkeepers for the ark (1 Ch 15²³), perhaps identical with (6). 8. 'That was next to the king,' slain in the reign of Ahaz with 'Maaseiah the king's son, and Azrikam the ruler of the house,' by Zichri, 'a mighty man of Ephraim' (2 Ch 28⁷).

H. A. REDPATH.

ELKIAH (Ἐλκεία).—An ancestor of Judith, Jth 8¹.

ELKOSHITE (עִלְכֹשִׁי, LXX Ἐλκωσιώτης).—A gentile adjective employed to describe the prophet Nahum (1¹), implying that a place named Elkosh was his birthplace. Three identifications have been proposed for the latter. (1) Jerome (in his *Comm.*) locates Elkosh at a village in Galilee named *Elcesi* (cf. also Capernaum=עֵרְסִי נָחִי (?), 'village of Nahum'). (2) In a work ascribed to Epiphanius, *On the Prophets, how they died and where they were buried*, we are told that 'Nahum was of Elkosh, beyond Bêt Gabrê, of the tribe of Simeon.' This Bêt Gabrê is *Beit Jibrin*, the ancient Eleutheropolis, N.E. of Lachish. (3) Mediæval tradition connected Nahum with *Elkush* on a tributary of the Tigris, 2 days' journey N. of Mosul (Nineveh). We must be content to leave the prophet's birthplace uncertain, although weighty considerations plead

* For this name see art. RAMATHAIM-ZOPHIM. In 1 Ch 6²⁶⁻²⁸ and 33-35 Samuel is represented as a Levite, and the three names, Elihu, Tohu, Zuph, appear as Eliab, Nahath, Zophai (6²⁶⁻²⁸); Eliel, Toah, Zuph (*Kethubh* Ziph) (6³³⁻³⁵). It is noticeable that in the first of these places there is no connecting link between the Elkanah mentioned and Samuel. The usual explanation given of this apparent discrepancy is that the Levites in any particular city were counted as part of the tribe amongst whom they were dwelling; but this does not seem very satisfactory.

in favour of the second of the above identifications.

LITERATURE.—A. B. Davidson, *Nahum*, Introd. § 1; Nestle, *Zeitsch. d. deutsch. Pal. Vereins*, i. 222 ff. (transl. in *PEFS* (1879), p. 136 ff.); G. A. Smith, *Hist. Geog.* 231 n.

J. A. SELBIE.
ELLASAR (עֲלָסָר, Ἐλλάσαρ, *Pontus*).—Arioch, king of Ellasar, was one of the vassal Babylonian kings who took part along with their suzerain, Chedor-laomer of Elam, in his campaign against Canaan (Gn 14). In the early days of Assyriology (see F. Lenormant, *La Langue primitive de la Chaldée* (1875), pp. 377-379) he was already identified by the decipherers of the cuneiform inscriptions with Eri-Aku, king of Larsa, who was called Rim-Sin (or Rim-Agu) by his Semitic subjects. The identification has now been verified by further discoveries, which have shown that Eri-Aku was a contemporary of Kudur-Lagamar (Chedor-laomer) of Elam, Tudghula or Tid'al, and Khammurabi or Ammi-rabi, whom recent research has proved to be the Am-raphel of Genesis. Larsa is now represented by the mounds of Senkereh, in Lower Babylonia, on the east bank of the Euphrates and about midway between the sites of Erech (*Warka*) and Ur (*Mukayyar*). One of its early names was Ararma, and it was celebrated for its temple and worship of the Sun-god (see Sayce, *Religion of the Ancient Babylonians*, pp. 166, 167). The temple, called Bil-uri by the Semites, was of very ancient date, and had been restored by Ur-Bau (?), B.C. 2700, by Khammurabi, by Nebuchadrezzar, and by Nabonidus. Among the ruins of its library and tombs Loftus found fragments of a mathematical work (*Chaldea and Susiana*, pp. 255, 256). The biblical form of the name probably represents *al Larsa*, 'the city of Larsa' (but see Ball's note on Gn 14 in Haupt's *OT*).

LITERATURE.—Sayce, *HCN* 165 ff.; Loftus, *Chaldea and Susiana*, 240 ff.; Delitzsch, *Wo lag das Paradies?* 223 f.; Tiele, *Gesch.* i. 86; Schrader, *COT* on Gn 14. See also Hommel's art. BABYLONIA, p. 226^b in present vol., and his *Ancient Hebrew Tradition*, 143 f. A. H. SAYCE.

ELM.—A mistranslation of AV for *terebinth* (Hos 4¹³).

ELMADAM (Ἐλμαδάμ, AV *Elmodam*, perh. = עֲמָדָם Gn 10²⁶).—An ancestor of Jesus (Lk 3²⁸). See GENEALOGY.

ELNAAM (עֲנָאָם 'God is pleasantness').—The father of two of David's mighty men (1 Ch 11⁴⁶).

ELNATHAN (עֲלִנָּתָן 'God has given'; cf. יְהִיָּה, 2 K 24⁸, Jer 26²² 36^{12, 25}, Ezr 8¹⁶.—1. The father of Nehushta, the mother of Jehoiachin. 2. The son of Achbor. A person of influence in Jehoiakim's court. He was the chief of those sent to Egypt to fetch Uriah, who had offended Jehoiakim by his prophecy, and one of those who had entreated Jehoiakim not to burn the roll. It is possible that (1) and (2) are the same person, but by no means certain when we consider the commonness of the name. 3. The name occurs no fewer than three times in the list of those sent for by Ezra when he encamped near Ahava in the course of his journey to Jerus., twice among the chief men, and also as one of the teachers. But it is extremely probable that the second occurrence of the name is a corrupt reading, arising out of the following name Nathan.

F. H. WOODS.

ELOHIM.—See GOD. **ELOHIST**.—See HEXATEUCH.

ELOI.—See ELI.

ELON (עֵלֹן 'a terebinth').—1. Of the tribe of

Zebulun, one of the minor judges (Jg 12^{11, 12}). All that is told of him is simply that he judged Israel for ten years, that he died, and was buried in Elon (עֵלֹן) in Zebulun. The MT points עֵלֹן Aijalon; but the distinction thus made between the name of the judge and his burying-place is quite arbitrary. Baer, *Libri Jos. et Jud.* p. 98, reads עֵלֹן Elon, in both verses. 2. A son of Zebulun (Gn 46¹⁴, Nu 26²⁶, where gentile name *Elonites* occurs). 3. A Hittite, the father-in-law of Esau (Gn 26³⁴ 36²).

G. A. COOKE.

ELON (עֵלֹן), Jos 19⁴³.—A town of Dan, perhaps the same as *Elon-beth-hanan* (1 K 4⁹), which was in Solomon's province corresponding to the territory of Dan. The site of Ananiah seems too far E., being in Benjamin. In some MSS *Elon* and *Beth-hanan* are made distinct places, in which case the latter may be Ananiah, and the former is unknown unless Aijalon was the original reading.

C. R. CONDER.

ELON-BETH-HANAN.—See ELON. **ELOTH**.—See ELATH.

ELPAAL (עֲלֵפָאֵל 'God of doing' (?)).—The head of a Benjamite family (1 Ch 8^{11, 12, 13}). See GENEALOGY.

ELPARAN (Gn 14⁶).—See PARAN.

ELPELET (עֲלֵפֶלֶט, AV *Elpalet*).—One of David's sons = ELIPHELET No. 1.

EL-SHADDAI.—See GOD.

ELTEKEH (Jos 19⁴⁴ עֲלֵתֶקֶה, 21²³ עֲלֵתֶקֶה).—A town of the territory of Dan, mentioned in connexion with Ekron and Gibbethon. It is probably the same as *Altaḳu* (Al-ta-ku-u), a town mentioned in the Prism Inscription of Sennacherib as the scene of the defeat of the Philistines and their Egypt. allies by the Assyrians in the days of Hezekiah. G. A. Smith (*Hist. Geog.* p. 236) urges that *Altaḳu* (*Eltekeh*) cannot have been situated up the valley of Aijalon, where it is marked on the *PEF* map, for such a site is unsuitable as the meeting-place of the main Assyrian and Egyptian armies. The *PEF* identification may, however, be correct, and the fight may have been between detachments. Yet a site near Ekron suits Sennacherib's narrative, for after taking *Altaḳu* he tells us next that he took Ekron (*Am-ḳar-ru-na*). In any case it is improbable that the retreat of Sennacherib was the result of the encounter. W. E. BARNES.

ELTEKON (עֲלֵתֶקֹן), Jos 15⁵⁹.—A town of Judah, noticed with Maarath and Beth-anoth. It was in the mountains. The site is unknown. Possibly Tekoa.

ELTOLAD (עֲלֵתֹלָד), Jos 15³⁰.—A town in the extreme S. of Judah, given to Simeon (19⁴); probably *Tolad* (1 Ch 4²⁹). The site is unknown.

ELUL (עֲלֻל, Ἐλούλ, *Elul*, Neh 6¹⁵, 1 Mac 14²⁷).—See TIME.

ELUZAI (עֲלֻזָּי 'God is my strength').—One of the mighty men who joined David at Ziklag (1 Ch 12⁵).

ELYMAEANS.—See ELAMITES.

ELYMAIS (Ἐλύμαϊς).—This name, which represents the OT *ELAM*, was given to a district of Persia, lying, according to Strabo (xvi. p. 744), along the southern spurs of Mt. Zagros, S of Media and N of Susiana. In 1 Mac 6¹, according to the common reading, which is adopted by the AV,

Elymais is named as a rich city in Persia. No such city, however, is mentioned elsewhere, except by Josephus (*Ant.* XII. ix. 1), who is simply following 1 Mac. There can be no doubt, therefore, that we should correct the text with A (*év 'Ελύμας*), κ (*év Λύμας*), and most cursives, and read 'in Elymais in Persia there was a city'; so Fritzsche and RV. In the year B.C. 164 Antiochus Epiphanes made an unsuccessful attack upon the rich treasures of a temple of Artemis in this province, but the name of the place is unknown. Polybius (xxx. 11), like 1 Mac, merely speaks of the temple as being in Elymais; while Persepolis, which is mentioned by the later account in 2 Mac 9², was not situated in this district. Comp. Rawlinson (*Speaker's Comment.*), and Strack and Zöckler on 1 Mac 6¹.
H. A. WHITE.

ELYMAS.—See BARJESUS.

ELYON.—See EL ELYON, GOD.

ELZABAD (עֲזַבָּד 'God hath given').—1. A Gadite chief who joined David (1 Ch 12¹²). 2. A Korahite doorkeeper (1 Ch 26⁷).

EMADABUN ('Ημαδαβούρ, AV *Madiabun*, after the Aldine text *Μαδιαβούρ*), 1 Es 5³⁸ (66 LXX).—E., of the sons of Jesus (AV 'the sons of Madiabun'), is mentioned among the Levites who superintended the restoration of the temple. There is no corresponding name in the parallel Ezr 3⁹, and it is omitted in the Vulg.: it is probably due to a repetition of the name which follows, *Ελιαδούρ*.
H. ST. J. THACKERAY.

EMATHEIS (Β 'Εμαθθίς, Α 'Εμαθίς, AV *Ama-theis*), 1 Es 9²⁹.—Called *ATHLAI*, Ezr 10²⁸.

EMBALMING.—See **MEDICINE**.

EMBROIDERY was the ornamentation of cloth, usually linen, by means of variegated colour and artistic design.

(1) תַּשְׁבֵּץ *tashbēz* (the verb in *Pi.* and *Pu.* occurs Ex 28^{20, 39} [all], the noun תַּשְׁבֵּץ 8 times in Ex 28. 39, and in Ps 45¹⁹) is used (only) of the high priest's coat (תְּהוֹנֵן). AV has 'broidered,' RV 'chequer-work,' Ex 28⁴. This was simply a surface device of lustre upon one colour giving an effect of broken light, like the sparkle of jet-bead ornament. Work of this kind is still done by hand by the Jewish women of Damascus, and by the people around Iconium. The coat is cut in two kinds of material, the outer one often of silk or of shining linen, the inner of white or coloured cotton. Then threads of cotton-twist are inserted between the two, and are carefully and patiently stitched in according to pattern. This has been copied in modern manufacture in such articles as the white honeycomb bedcover, except that the hand-wrought article is the same on both sides. This ornamental effect of light upon a uniform surface seems to be the origin of damask in all its beautiful varieties. The 'coat' of the high priest would be of this description, either sewn by hand or woven in squares and lines, so as to give the effect of chequer and lustre.

(2) רִקְמָה *rikmah*, needle-work, broidered-work, Jg 5³⁰, Ezk 16^{10, 18, 26} 27^{7, 16, 24} (cf. Ex 26³⁸ 35³⁸, Ps 45¹⁴). The same word is used in 1 Ch 29² of stones, and in Ezk 17³ of feathers. In both instances AV and RV tr. 'of divers colours.' רִקְמָה 'work of the variegator' (*QPB* uses this term consistently) occurs 6 times in Ex, and רִקְמָה 'the variegator' by itself twice (cf. Ps 139¹⁸ רִקְמָה 'I was curiously wrought,' AV, RV).

(3) קַעֲשָׂה הַשֵּׁב 'work of the designer' (of artistic designs in weaving; *QPB* 'pattern weaver'), Ex 26^{1, 31, 23^{6, 18}, 36^{8, 35}, 39⁸}, cf. הַשֵּׁב Ex 38²³ and (some-

what more generally) הַשֵּׁב קַעֲשָׂה Ex 31⁴ ('to devise designs') 35^{32, 35}, 2 Ch 2¹⁸, cf. Ex 35³⁸ ('designed work').

Where the process was that of needlework, the cloth was stretched and held in a frame, and the sewn work in coloured thread was added; or it might be introduced during the weaving.

Anything in nature or art that was variegated by spots, lines, squares, etc., was *rikmah*, something embroidered. Where a principal part of the charm was due to originality of decorative design, or successful drawing of resemblances, the intellectual distinction would give it the name *cunning-work* ('work of the designer').

Oriental broidered cloth, whether hand-wrought or woven, is usually the same on both sides. In Damascus, prayer-cloths are made in stripes of crimson, sky-blue, white, purple, etc., with gold thread interwoven, after the manner of the tabernacle fabrics.

LITERATURE.—Wilkinson, *Anc. Egypt.* ii. 81; Moore on Jg 5³⁰; Hartmann, *Hebräerin*, i. 401 ff., iii. 138 ff.; Schroeder, *De vestitu mulierum*, 221 f.; Braun, *De vestitu sacerdotum*, 301 ff.; Knob-Dillm. on Ex 26^{1, 31, 23¹¹}.
G. M. MACKIE.

EMEK-KEZIZ (עֵמֶק קֶזֶז, Jos 18²¹, AV 'Valley of Keziz,' mentioned among the towns of Benjamin.—A place apparently in the Jordan Valley near Jericho. The site is unknown. See Dillmann, *ad loc.*
C. R. CONDER.

EMERALD.—See **STONES (PRECIOUS)**.

EMERODS (that is, hæmorrhoids).—The word used in AV to denote the disease brought upon the Philistines when they had captured the ark (1 S 5). Two Heb. words are used for this disease. One of these is *'ophel* (עֹפֵל). It is supposed to mean something swollen. It is the name of a portion of the fortifications of Jerus. (2 Ch 27³ 33¹⁴, Neh 3^{36, 27} 11²¹). The verb of the stem is used twice, in the sense of being puffed up, presumptuous (Hab 2⁴, Nu 14⁴⁴). This exhausts the use of the stem, except in the six places where *'ophel*, in the plural, is used for the disease in question (Dt 23²⁷, 1 S 5^{6, 9, 12} 6^{4, 5}). So far, the disease seems to be something tumid, a swelling of some sort.

The other word, *l'hōrim* (לְחֹרִים), is the only word of its stem in the language. It is used in the six places last mentioned, as the *kerē*, or marginal reading, to be substituted for *'ophel*, and is also used in 1 S 6^{11, 17}. Cognate words in Syr. and Arab. convey the idea of breathing hard, of easing the belly with violent effort, of tenesmus with flow of blood. It is said that the Massorettes directed this word to be substituted for the other as being a less indelicate term.

As to the nature of the disease, not much can be inferred from 1 S 5⁹, where AV tr. 'They had emerods in their secret parts,' and RV 'tumours brake out upon them,' for the verb there used appears nowhere else. That the disease was externally loathsome is evident from Dt 23²⁷, where it is classed with the boil of Egypt, the scurvy and the itch. That it was terribly fatal seems to be implied in 1 S 5¹⁰⁻¹². That it had some particularly noteworthy symptom appears from the fact that they made golden images of it.

The traditions handed down in Josephus, and in the added specifications in the Sept. and Vulg., are sufficiently specific and horrible. According to the Vulg. 'computrescebant prominentes extales eorum.' Josephus says, 'They died of the dysentery, a sore distemper that brought death upon them very suddenly; for . . . they brought up their entrails, which were eaten through, and vomited them up entirely rotted away by the disease' (*Ant.* VI. i. 1). Josephus is imaginative, but the evidence

indicates some form of dysenteric or typhoid disease, in which a loathsome rectal protrusion was a prominent symptom. See MEDICINE.

LITERATURE.—Driver and Dillm. on Dt 28⁷; Thienus, Wellhausen, and Driver on 1 S 56. 9 64; Hitzig, *Urgesch. d. Philistiner* (1846), p. 201; Geiger, *Urschrift*, 408 f.; *Oxf. Heb. Lex.* and Siegfried-Stade, *s.vv.* W. J. BEECHER.

EMIM (עִמִּים, 'Ommaeln, 'Oomeln; AV Emims).—The name is that of a body of Rephaim or giant people, living E. of the Jordan, in the S. half of the territory between Bashan and Seir (Dt 2^{10. 11}). The name signifies 'formidable ones,' and we are told that it was given them by the Moabites. The Emim were in this region in Abraham's time, and were attacked by the four invading kings during their march S. (Gn 14⁹). They are said to have been 'a people great and numerous, and tall as the Anakim.' We are not told what became of them, but the natural suggestions of the narrative are to the effect that the Moabites destroyed and superseded them. See GIANT. W. J. BEECHER.

EMINENT is now only metaphorical, 'exalted,' but in AV it is always literal: an 'eminent place,' Ezk 16^{34. 31. 39} (עִמָּוֶת, RVM 'a vaulted chamber,' see Davidson on Ezk 16³⁴), 2 Es 15⁴⁰ (*locus eminentis*); 'an high mountain and eminent,' Ezk 17²² (עִמָּוֶת). Cf. Elyot, *The Governour*, i. 4, 'he made not only herbes to garnisse the erthe, but also trees of a more eminent stature than herbes.' **Eminence** occurs in AV only in the compound 'pre-eminence' (Ec 3⁹, Sir 33²², 1 Mac 11²⁷, Col 1¹⁸, 3 Jn 9). RV gives 'eminency' in Ezk 7¹¹ 'neither shall there be eminency among them' (עִמָּוֶת עִמָּוֶת), AV 'wailing for them,' so RVM), using the word in its modern sense, and following the Arab. for the translation. See Davidson, *ad loc.* J. HASTINGS.

EMMANUEL.—See IMMANUEL.

EMMAUS (Ἐμμαούς).—1. Lk 24¹³ only. This place was 60 furlongs from Jerusalem. Some MSS follow N in reading 'an hundred and sixty'; but this is probably a corruption, to suit the views held as to the site in the 4th cent. A. D.; for a journey of 320 furlongs, or 40 miles, in one day (see vv. 13, 28, 29, 33), would have been improbable. In the *Onomasticon* (*s.v.*) it is placed at Emmaus Nicopolis—now *Amwās*, 20 miles from Jerus., near Aijalon. Josephus, however, speaks of an Emmaus 60 furlongs from Jerusalem (*Wars*, VII. vi. 6), the habitation of a colony of Titus' soldiers. The direction is unknown. The name *Kulōnieh* or 'Colony,' and the distance from Jerus. (which, however, is not exact), have suggested the village so named in the valley W. of the Holy City. In the twelfth cent. Emmaus was shown at another village, *Kubeibeh*, to the N.W., at about the required distance. To the S.W. of Jerus., near the main road to the plain, is a ruin called *Khamasah*, which recalls the name of Emmaus. The distance is more than 60 furlongs, but perhaps not too great for a rough estimate. The site, however, remains uncertain. See *SWP* vol. iii. sheet xvii.

2. Emmaus Nicopolis is not mentioned in OT, but appears as a place of importance in the time of the Maccabees. It was in the neighbouring plain that the Syrian army was defeated by Judas (1 Mac 3^{40. 57 43-29}). Emmaus was one of the towns fortified by Bacchides in order to 'vex' Israel (1 Mac 9⁵⁰, Jos. *Ant.* XIII. i. 3).

EMMER (A 'Εμμήρ, B 'Εμήρ), 1 Es 9²¹.—In Ezr 10²⁰ IMMER.

EMMERUTH (A 'Εμμηρούθ, B 'Εμμηρος, AV Meruth), 1 Es 5²⁴.—A corruption of Immer in Ezr 2²⁷. Probably 'Εμμηρ was first Grecized into 'Εμμηρος, and the form in A arose from mistaking 'Εμμηρούθ for a nominative. The AV is due to the Aldine text, which has *υιοι εκ Μηρούθ* for *υ. Εμμ.*

H. ST. J. THACKERAY.
EMULATION is now used only in a good sense, healthy rivalry. But about 1611 it wavered between that and a distinctly bad meaning, 'ambitious strife,' or 'malicious envy.' Shakespeare uses it in both ways, and of the three occurrences in AV, two are bad (1 Mac 8¹⁶, Gal 5²⁰, both ζήλος) and one good (Ro 11¹⁴ 'If by any means I may provoke to e., *ει πως παραζηλώσω*, RV 'to jealousy'). The Douay Bible uses 'emulation' of God, after Vulg. *emulatio*, in Ps 78³⁸ 'in their grauens they provoked him to emulation,' where AV has 'jealousy' ('moved him to jealousy with their graven images'). For the sense of 'malicious envy' take the Rheims tr. of Ac 7⁹ 'the Patriarches through emulation, sold Joseph into Ægypt.' Emulation and envy are distinguished and discussed by Trench, *NT Synonyms*, p. 83 ff., in his article on the Gr. words ζήλος and φθόνος.

J. HASTINGS.
ENABLE occurs only 1 Ti 1¹², and it is used, without an infinitive following, in the obsolete or at least archaic sense of 'strengthen.' Cf. Mulcaster (1581), *Positions*, xli. 232, 'Exercise to enable the body'; and Melvill, *Diary* (Wodrow, p. 280), 'obtaining of God's mercie that night's repose, quihik I luiked nocht for, to inable me for the morne's action.' J. HASTINGS.

ENAIM (עֵנַיִם), probably the same as Enam (עֵנַם) which is mentioned among the towns of lowland Judah in Jos 15³⁴. From the reference to Enaim in Gn 38^{14. 21} we gather that it was the name of a village on the road to Timnah; and, as the incident recorded in this chapter is prefaced by the mention of the sojourn of Judah with his friend Hirah the Adullamite, the village possibly stood on the road between Timnah and Adullam. In Jos 15³⁴ Enam stands in the same group of towns with Tappuah and Adullam and Azekah.

The AV in its rendering Gn 38¹⁴ 'in an open place' (RV 'in the gate of Enaim'), and Gn 38²¹ 'openly by the way side' (RV 'at Enaim by the way side'), has followed the explanation adopted by the Targums, the Pesh. Syriac, and the Latin Vulgate (*in bivio itineris*), on the supposition that 'enayim had its usual meaning 'eyes,' and was not a proper name. Cf. Jerome, who, commenting on the words 'Et sedit ad portam Enam,' remarks 'Sermo Hebraicus Enaim transfertur in oculos. Non est igitur nomen loci; sed est sensus: sedit in bivio, sive in composito, ubi diligentiū debet viator aspicere, quod iter gradiendi capiat.' The Old Latin (Lyons Pent.) and the LXX (Αἰνάν) rightly rendered the word as a proper name. The double form Enaim and Enam may be compared with Dothain and Dothan (Gn 37¹⁷ and 2 K 6¹³). The meaning of the name was presumably 'the two springs.' Conder has identified it with *Kh. Wady Aliv*, which is close to Beth-shemesh and En-gannim. H. E. RYLE.

ENAN (עֵנַן 'having fountains,' or 'eyes' i. e. 'keen-eyed,' Αἰνάν).—Prince of Naphtali at the first census (Nu 1^{15 229 778. 88 1027 P}).

ENASIBUS (A Ένδσιβος, B -ei-), 1 Es 9³⁴.—In Ezr 10³⁶ ELIASHIB. The form is probably due to reading AI as N.

ENCAMPMENT BY THE SEA.—One of the stations in the itinerary of the children of Israel, where they encamp after leaving Elim, Nu 33¹⁰ [see ELIM]. If the position of Elim be in the Wady Ghurundel, then the camp by the sea is on the shore of the Gulf of Suez, somewhere south of the point where the Wady Tayibeh opens to the coast. The curious return of the line of march to the seashore is a phenomenon that has always arrested the attention of travellers to Mt. Sinai: and if Mt. Sinai be really in the so-called Sinaitic peninsula, the camp can be located within a half-mile. [But it is within the bounds of a reasonable probability that the 'Encampment by the Sea' may mean the Gulf of Akabah, and Sinai be out of the peninsula.] St. Silvia of Aquitaine [? in the year 388] returned from the traditional Sinai, and especially notices the approach of the line of march to the seashore ('pervenimus ad mansionem, quae erat iam super mare, id est in eo loco, ubi iam de inter montes exitur, et incipitur denuo totum iam iuxta mare ambulari; sic tamen iuxta mare, ut subito fluctus animalibus pedes cedat'). Her identification is that of an accepted tradition which must be many years older than herself. It is very valuable evidence for a Christian tradition which is sensibly constant in her time, and shows no signs of having undergone any revision at the hands of ecclesiastics.

J. RENDEL HARRIS.

ENCHANTMENT.—See DIVINATION.

END.—The uses of this word are not so often obsolete as biblical, and demand attention from their very familiarity.

1. The end as opposed to the beginning. To the Heb. mind, especially in the later and more rigorous days of the history of Israel, the most perplexing problem was the prosperity of the wicked; and the conclusion which gave the most satisfying shelter, was the thought of the end. Ps 37^{37, 38} 'Mark the perfect man, and behold the upright: for the end (RV 'latter end') of that man is peace. But the transgressors shall be destroyed together; the end (RV 'latter end') of the wicked shall be cut off.' So even the author of Ps 73, who, though a true worshipper, felt the perplexity so keenly that he said, 'Surely in vain have I cleansed my heart' (v. 13), found rest when he went into the sanctuary of God and 'considered their latter end' (v. 17). Moreover, this is the solution of the Book of Job, if (apart from the Elihu chapters) that book may be accepted as a unity. It is Bildad who utters the prophecy (Job 87), unconsciously as Caiaphas; but it is fulfilled to the letter (42¹²), for the word used of Job's 'latter end' is the same in both places. And it is a truly religious solution, since it is God that declares the end from the beginning (Is 46¹⁰). Nor was it so precarious as we may suppose, for the word (ahârûth) had a certain elasticity of meaning, and did not absolutely restrict the thought to the end of this present life. Its sense varied with the context, but it was capable of standing for even the great Messianic future. Still, we must observe that this source of encouragement, while frequent in the Apocr. (Wis 2¹⁸ 54, Sir 11³ 738 911 1127 [1622] 1312 219. 10), is scarcely found in NT; cf. (doubtfully) He 13⁷ 'considering the end of their conversation' (τὴν ἐκτέλειαν τῆς ἀναστροφῆς, Wyc. 'the goynge out of luyynge'; but Rendall takes it in another sense, 'the issue, sc. of the word which they had preached, presented to the observer by their daily course of life'); and 2 P 2²⁰ 'the latter end is worse with them than the beginning' (τὰ ἔσχατα, RV 'the last state').

2. The 'end' is used to denote the extremity. The Heb. words are (1) gabhâth, only Ex 28²² 39¹⁵ (AV 'at the ends, RV 'like cords,' tr. [gabhal] to twist). (2) peh, lit. 'mouth,' 2 K 10²¹ 21⁸, Ezr 9¹⁴ 'full from one end to another' (AV 'full from mouth to mouth,' but Eyle thinks the metaphor has been taken from a drinking vessel). (3) p'êh, Ezk 41² (usually 'side,' as RV here). (4) r'ôsh, 'head,' 1 K 8³ = 2 Ch 5⁹ 'the ends of the staves' of the ark. (5) sôph (a late word, 2 Ch 20⁶, Ec 31¹ 72 121³, Jl 2²⁰, and in Dn). But the most freq. is (6) ephes, only in the phrase 'aphes erez,' 'ends of the earth'; which is also the tr. of (7) kanêphôth hâ'arez, lit. 'wings of the earth' in Job 37⁹ 38³. On the last passage Davidson says, 'The figure is beautiful; the dawn as it pours forth along the whole horizon, on both sides of the beholder, lays hold of the borders of the earth, over which night lay like a covering; and seizing this covering by its extremities it shakes the wicked out of it. The wicked fee from the light. The dawn is not a physical phenomenon merely, it is a moral agent.'

In NT cf. Mt 24³¹ 'from one end of heaven to the other' (ἀπ' ἄκρας οὐρανῶν ἕως ἄκρας αὐγῶν), Ro 10¹⁸ 'the ends of the world' (τὰ πέρατα τῆς οἰκουμένης). See EARTH, WORLD.

3. The end may also be the conclusion, as Is 24⁸ 'the noise of them that rejoice endeth' (hâthal). The Heb. is nearly always kâzâh and its derivatives; but once we find yâzâh, 'to go out,' Ex 23¹⁶ 'in the end of the year'; and twice the subst. kâkâphâh, 'the circuit' (of the sun, Ps 196), used of the year, Ex 34²², 2 Ch 24²³ (AVM and RV 'revolution'). In NT the chief word is τέλος, but the more precise συντέλεια is found in Mt (13³⁹ 40. 49 24³ 28²⁰, always followed by τῷ αἰῶνι, EV 'end of the world,' RVm 'consummation of the age') and in He 9²⁶ (σ. τῶν αἰῶνων, AV 'end of the world,' RV 'end of the ages,' RVm 'consummation of the ages'). See ESCHATOLOGY; also MILLENNIUM, PAROUSIA, WORLD, and B. W. Bacon in Old and New Test. Student, xiii. 225-233. 'End' in the sense of conclusion is common in Apocr., as 1 Es 9¹⁷ 'their cause . . . was brought to an end' (ἔχθη ἐν τῷ πέρασι); with which cf. He 6¹⁶ 'an oath for confirmation is to them an end of all strife' (πίστις εἰς βεβαίωσιν, RV 'is final for confirmation'). 'In the end of the Sabbath' (Mt 28¹) is lit. 'late of the Sabbath' (ἐπὶ σαββάτου).

4. A work may be ended, not merely because it is concluded or terminated, but because it is completed or perfected. In this sense 'end' occurs both as vb. and subst. The Heb. is mostly either kâlâh or tāmam in some of their parts; and the meaning is either completeness, as of the end of sin (Dn 9²⁴), or perfection, as of the end of God's creative work (Gn 2²). The subst. kâlâh is tr. 'a full end' in Jer 27⁵ 51¹³ 30¹¹ bis 46²⁸ bis, Ezk 11¹³, and 'an utter end' in Nah 1^{8, 9} (RV 'a full end'). The phrase εἰς τέλος carries the sense both of termination and of completeness, so that in Jn 13¹ it is difficult to decide between 'he loved them to the end' and 'he loved them to the uttermost.' In 1 Th 2¹⁶ 'to the uttermost' is clear; in Lk 18⁵ 'to the end' is most natural. In 1 P 1¹³ the adv. τελείως, which occurs in bibl. Gr. only here, is tr'd in AV 'to the end,' in RV more probably 'perfectly.' These meanings easily pass into that of perpetuity, which is manifest in Ps 11^{933, 112}, EV 'unto the end' (Heb. 'êkebh); Job 34³⁶ (adh-nezah); Jer 3⁵ (ânegah); and 'world without end' Is 45¹⁷ (עַד עַד עַד עַד), Eph 3²¹ (τῷ αἰῶνι τῶν αἰῶνων, RV 'for ever and ever').

Like Lat. finis (and probably owing to it), 'end' is used in Eng. for the purpose, as in Tomson's NT (1576) Heading of Ep. to He, 'The drift and end of this Epistle is.' In AV this meaning is found only in the phrase 'to the end . . . ' or 'to this end . . . ' and once 'to what end?' (Am 5¹⁸). In old Eng. this phrase is sometimes followed by the infin., as Bacon's Essays, p. 201, 'Some undertake Sutes . . . to the end to gratify the adverse partie.' But in AV it is followed by 'that,' or the conj. is omitted. The constructions in the orig. are: 1. לְמַעַן 'in order that,' Ex 8²² 'to the end thou mayest know'; Lv 17⁵, Dt 17^{16, 20}, Ps 30¹², Ezk 20²⁶ 31¹⁴, Ob 9. 2. לְדַבְּרָה 'for the sake of' (see Ec 3¹⁸ 8³), Ec 7¹⁴ 'to the end that man should find nothing after him.' 3. τὸ with infin., 1 Mac 13³⁴ 14²³. 4. ὅπως, 1 Mac 14⁴⁹. 5. εἰς τὸ with infin., Ac 7¹⁹, Ro 1¹¹ 4¹⁶, 1 Th 3¹³. 6. εἰς τοῦτο, 'to this end,' Jn 18³⁷, Ro 14⁹, 2 Co 2⁹. 7. πρὸς τὸ, Lk 18¹ 'to this end that men ought always to pray' (RV 'to the end that'). RV has shown much fondness for this phrase, introducing 'to the end that' in place of the simple 'that' of AV, for לְמַעַן in Gn 18¹⁹ bis, Ex 33¹³, Nu 16⁴⁰; for εἰς τὸ with infin. (on which see Votaw, The Use of the Infin. in Bibl. Gr., 1896, p. 21) in Ro 4¹⁸, Eph 1¹², 2 Th 1¹ 2^{2, 6}, 1 P 3⁷; and for τὸ in Eph 3¹², 2 Th 3¹⁴, Tit 3⁸. RV also introduces 'to this end' for εἰς τοῦτο in Mk 1³⁸, 1 Ti 4¹⁰ (AV 'therefore'), Ac 26¹⁶, 1 Jn 3⁸ (AV 'for this purpose'), and Jn 18³⁷ (AV 'for this cause'); 'unto this end' in 1 P 4⁶ (Gr. εἰς τοῦτο, AV 'for this cause'); and 'to which end' in 2 Th 1¹¹ (Gr. εἰς ὃ, AV 'wherefore'). J. HASTINGS.

ENDAMAGE.—Ezr 4¹³ 'thou shalt e. the revenue of the kings' (קָנַתָּ), and 1 Es 6³⁸ 'that stretcheth out his hand to hinder or e. that house of the Lord in Jerusalem' (κακοποιήσαι). The word is still used, but is somewhat old-fashioned. Cf. Quarles, Emblems, i. xi. 47, 'The Devil smileth that he may endamage'; and H. Vaughan, Silex, i. Pref., 'No loss is so doleful as that gain that will endamage the soul.' J. HASTINGS.

ENDEAVOUR.—'Endeavour' seems a very in-

adequate tr. of *σπουδάσω*, which in 2 Ti 4^{9, 21} is rendered 'do thy diligence,' in Tit 3¹² 'be diligent,' (RV 'give diligence'), and in Gal 2¹⁰ 'was forward' (RV 'was zealous'). But 'endeavour once denoted all possible tension, the highest energy that could be directed to an object. With us it means the last feeble hopeless attempt of a person who knows that he cannot accomplish his aim, but makes a conscience of going through some formalities for the purpose of showing that the failure is not his fault' (Maurice, *Lincoln's Inn Ser.* quoted by Trench, *On the AV*, p. 43). One of the places where in AV *σπουδάσω* is tr. 'endeavour' is Eph 4³ 'endeavouring to keep the unity of the Spirit in the bond of peace,' and in his comment on that passage, Abp. Laud (*Sermons*, i. 155) shows the force of 'endeavour' in his day: 'If you will keep it you must endeavour to keep it. For it is not so easy a thing to keep unity in great bodies as it is thought; there goes much labour and endeavour to it.' Cf. also Act 7, Henry VII. c. 22, 'Endevour youre self and put to your hand and spare no cost.' The subst. occurs only Ps 28⁴ 'according to the wickedness of their endeavours' (עֲשֵׂוֹתָם, RV 'doings'). The vb. is found for Gr. *ζητέω* Ad. Est 16³, Ac 16¹⁰ (RV 'seek'); for *παιδάσω* 2 Mac 11¹⁹; for *σπουδάσω* Eph 4³ (RV 'give diligence'), 1 Th 2¹⁷, 2 P 1¹⁵ (RV 'give diligence').

To 'endeavour' is 'to do one's *devoir*' or duty: *en* having a verbal and active force as in 'encumber,' 'enforce,' etc., it is the expression in one word of Chaucer's 'Doth now your *devoir* (*Cant. Tales*, 1600). 'Devoir' is the Fr. form of Lat. *debere*, to owe, and 'en' is the Fr. form of Lat. *in*. The spelling in AV 1611 is always 'endeavour' (except 2 Th 2¹⁷, by accident 'endeour'). But about this time it was customary to affect the Latin form, so in Pref. we find 'that hath bene our *indeavour*, that our marke.'

J. HASTINGS.

ENDIRONS.—Ezk 40^{48m} (text 'hooks' [which see] m. 'or endirons, or the two hearth-stones').

The spelling of 1611 is 'andirons.' The change into 'endirons' was first made in 1638, under the impression, no doubt, as Wright says, that being the *iron* standards, one at each *end* of the fireplace, to support the log of wood that was burning, this was the derivation, and should be the spelling. But this is not the derivation. It cannot be traced farther back than old Fr. *andier* and late Lat. *anderia*; and the form *-iron* is an Eng. corruption as much as *end-*. Another false spelling is 'handiron,' as Florio (1591), *Sec. Frutes*, 159, 'Set that firebrand upon the handiron.'

J. HASTINGS.

EN-DOR (עֵדֹר Jos 17¹¹, עֵדֹר 1 S 28⁷, עֵדֹר Ps 83¹⁰).—A town in Issachar belonging to Manasseh, mentioned with Dor as one of 'three countries' (AV); the text עֵדֹר is undoubtedly corrupt) which appear to have been in the Jordan Valley (Bethshean and Ibleam), in the Esdraelon plateau (Dor and En-dor), and in the low hills to the W. (Taanach); but for 'countries' we may read 'heights' (RV), as referring only to Dor, En-dor, and Taanach. It was not far from Shunem and Gilboa, and near the Kishon and Tabor, where Sisera is said in the last passage (Ps 83¹⁰) to have perished. In the fourth cent. A.D. it was known as a large village 4 Roman miles south of Tabor—now the hamlet *Endâr* in this position, on the N. slope of the conical hill of *Nebi Dhahy*. Possibly the site of Dor should be placed near En-dor, which means the 'spring of Dor'; but it may be objected that both are noticed in a single passage (cf., however, Sheba and Beersheba in Jos 19²). * En-dor was one of the places conquered by Tahutmes III. about 1600 B.C. See *SWP* vol. ii. sheet viii. See DOR.

LITERATURE.—Lagarde, *Onom.* 96, 121, 226; Robinson, *ERP* iii. 460, 468 f.; Baedeker-Soein, *Pal.* 2 460 f.; Van de Velde, ii. 383;

* W. H. Bennett in Haupt's *OT* remarks on Jos 17¹¹ 'As the Endor clause does not occur in Jg 12⁷, and Endor is about 25 miles E. of Dor, the clause is probably due to accidental repetition of the Dor clause.' In Jos 19² in like manner Sheba, which is wanting in 1 Ch 4²⁸ and in some Heb. MSS, may be an accidental repetition of the שבוע שבוע בִּבְרָךְ.

Tristram, *Land of Israel*, p. 127; Conder, *Tent-Work in Pal.* 63; Porter, *Giant Cities of Bashan*, 247, 250.

C. R. CONDER.

ENDOW, ENDUE.—These words are distinct in origin. Endow is fr. Lat. *in-dotere* (fr. *dotem*, a dowry), through the Fr. *en-douer*. Its proper meaning is, therefore, to provide with a dowry. Endue is fr. Lat. *inducere*, through the old Fr. *induire*, and properly means 'to lead on,' 'introduce.' But a supposed derivation from Lat. *inducere*, 'to put on (clothing),' helped to give the word its meanings of 'clothe,' and then 'invest' with some quality or spiritual gift. Then this was so close to the meaning of 'endow,' and the spelling was so uncertain, that the two words were often confounded. When the spelling is 'endow' the meaning is rarely wrong; but 'endue' (often spelt 'indue' from the influence of Lat. *inducere*) took on all the meanings of both words.

In AV they occur Gn 30²⁰ 'God hath endued me with a good dowry' (עֲדָוָה, RV 'endowed'); Ex 22¹⁶ 'he shall surely endow her to be his wife' (קָדָהָהּ, RV 'pay a dowry for her'); 2 Ch 2^{12, 13} 'endued (1611 'indued') with prudence . . . understanding' (עֲדָוָה); Sir 17³ 'he endued them with strength' (עֲדָוָה); Lk 24⁴⁹ 'till ye be endued (1611 'indued') with power from on high' (עֲדָוָה); and Ja 3¹⁸ 'endued (1611 'indued') with knowledge' (עֲדָוָה, RV 'understanding'). That the distinction between the words was not always forgotten about 1611 is shown by this quot. from Hieron (1616), *Works*, ii. 37, 'Was it with what religion is the woman endewed, or with what portion is shee endowed?'

J. HASTINGS.

EN-EGLAIM (עֵיגְלַיִם).—A locality on the Dead Sea, mentioned along with En-gedi, Ezk 47¹⁰. It has not been identified, but is not improbably 'Ain Feshkah' (Robinson, *BRP* ii. 489). Tristram (*Bible Places*, 93) would make it 'Ain Hajlah' (Beth-hoglah). In any case, it probably lay to the N. towards the mouth of the Jordan. Eglaim of Is 15⁸ is a different place, its initial letter being *g*, not *y*, and its situation apparently to the *south* of the Dead Sea (cf. Davidson on Ezk 47¹⁰).

J. A. SELBIE.

ENEMESSAR (עֲנַמְסָר).—The name of a king of Assyria, found in Gr. codd. of To 1², where Heb., Aram., and Lat. codd. all read Shalmaneser. Shalmaneser is explained by recent Assyriologists to mean 'Salman (the god) is chief'; but, in accounting for the form Enemessar, it is possible that the Hebrews interpreted the name to mean 'Esar (or Assur) is peaceful' (cf. Esarhaddon); then the Gr. translator capriciously altered עֲנַמְסָר 'Esar is peaceful' to עֲנַמְסָר 'Esar is gracious,' toning down the final *ṣ* to *ś* as in Hanamel (Jer 32⁷) for הַנְּמָל 'El is gracious.'

Other explanations are: 1. That Enemessar is for Senemessar (*śh* changed to *s*, and then to the light breathing, as in Arkeanos for Sargon), *l* being dropped, and the *m* and *n* transposed (so Pinches). 2. That Shalmaneser drops the *ś* (which was possibly mistaken for the genitive) and then transposes *m* and *n* (so Rawlinson). 3. It is an unrecorded private name of Sargon, for Anumasir = 'the god Anu is gracious' (so Oppert). 4. It is a corruption of Sarru-kinu = Sargon reversed (so Bickell).

J. T. MARSHALL.

ENENEUS (Εὐνήμιος, AV *Enenius*), 1 Es 5⁸.—One of the twelve leaders of the return from Babylon under Zerubbabel. The name is omitted in the parallel list in Ezr 2, which gives only eleven leaders; but answers to NAHAMANI, Neh 7⁷.

ENFLAME.—This is the spelling of mod. edd. of AV in Is 57⁵, though that of 1611 was 'inflamm.'

In Is 5¹¹ 1611 had 'enflame,' mod. edd. 'inflame.' The word also occurs Sir 28¹⁰, Sus 8, 1 Mac 2²⁴ (1611 and mod. edd. 'inflame'). The meaning is always 'excite,' and the ref. is to lust in Is 57⁵, Sus 8; to wine Is 5¹¹; to anger Sir 28¹⁰; while the sense is good in 1 Mac 2²⁴ 'Mattathias . . . was inflamed with zeal' (ἐξήλωσε). Wyclif uses the word in Ja 3⁸ of the tongue, 'it is enflawmed of helle, and enflawmeth the wheel of oure birthe.'

J. HASTINGS.

ENGAGE.—Jer 30²¹ only, 'who is this that engageth his heart to approach unto me?' (נָקַד לְבָבוֹ; Vulg. 'applicet cor suum'). Engage is used in the sense of 'pledge,' though to 'engage one's heart' seems to be a unique expression. Shaks. has 'I do engage my life,' and 'I will engage my words,' where the meaning is nearly the same. The older VSS vary: Cov. 'what is he, that geveth over his herte'; Gen. 'that directeth his heart'; Dou. 'that applieth his hart.' RV tr. 'that hath had boldness to approach unto them,' with marg. 'Heb. hath been surety for his heart.'

J. HASTINGS.

EN-GANNIM (עֲנַנִּים).—Two places so named are noticed in the Book of Joshua, the name signifying 'the spring of gardens.' 1. Jos 15³⁴. A town of Judah noticed with Zanoah and Eshtaol. It is supposed by Clermont-Ganneau to be the ruin *Umm Jina* in the valley near Zanoah—a suitable site. See SWP vol. iii. sheet xvii. 2. Jos 19²¹ 21²⁹ (in 1 Ch 6⁵⁸ Anem). A town of Issachar given to the Levites, now *Jenin*, a town on the S. border of Esdraelon, with a fine spring, gardens and palms. It marked the S. limit of Galilee, and appears to have been always a flourishing town. The 'garden house,' *Beth-hag-gan*, in 2 K 9²⁷ has been thought to be En-gannim, but it is more probably *Beit Jenn* E. of Tabor. See IBLEAM. See SWP vol. ii. sheet xvii.

LITERATURE.—Guérin, *Samarie*, i. 327; Robinson, *BRP* iii. 116, 337; Baedeker-Socin, *Pal.* 2 237; Van de Velde, p. 359; Tristram, *Land of Israel*, 65, 130; Conder, *Tent-Work in Pal.* 68; *Bible Places* (ed. 1897), 67, 180, 265.

C. R. CONDER.

EN-GEDI (עֵדֵי, Arab. *Ain Jidi*, 'fountain of the kid'), the name of a spring of warm water which bursts forth from the cliffs overlooking the W. shore of the Dead Sea near its centre, and 2 miles S. of Rás Mersed. The ancient name of the spot was Hazazon-tamar (2 Ch 20²), by which it was known in the days of Abraham (Gn 14⁷); and it has been suggested by Tristram that a group of ruins below the cascade near the shore of the Dead Sea may mark the site of a town through which marched the Assyrian host of Chedorlaomer (Gn 14⁷). The place was included in the wide skirts of the tribe of Judah (Jos 15⁶²), and is associated with the City of Salt, which probably lay a few miles farther S. on the shore of the lake near Khashm Usdum (the Salt-mountain). The name 'Wilderness of En-gedi' applies to the wild rocky district forming the E. part of the Wilderness of Judah; and here amongst the deep ravines, rocky gorges, and the caves, which nature or art have hewn out in their sides, David found a safe hiding-place from the vengeance of Saul (1 S 24¹). At a later period it was the scene of the slaughter of the hordes of Ammon, Moab, and Edom, who had invaded the kingdom of Judah in the reign of Jehoshaphat (2 Ch 20²). The limestone cliffs of En-gedi are deeply intersected by numerous river channels which descend from the table-land of Judah towards the Dead Sea. At the place itself two streams, the Wady Sudeir and Wady el-'Are-yeh, enclose a small plateau, nearly 2000 ft. above the waters and bounded by nearly vertical walls of rock. Terraces of shingle and white calcareous

marl envelop their bases to a height of several hundred feet, and mark the level at which the waters of the lake formerly stood. Only a few bushes of acacia, tamarisk, *Solanum*, and *Calotropis procera* (Apple of Sodom) decorate the spot where palms and vines were formerly cultivated (Ca 1¹⁴). The district is tenanted by a few Arabs of the Jâhalin and Rashâybeh tribes, and is the safe retreat of the *Ibex* ('wild goat,' 1 S 24²), the coney (*Hyrax syriacus*), and numerous birds of prey. The spot is amongst the wildest and most desolate in the whole of Palestine.

LITERATURE.—Lagarde, *Onom.* 119, 254; Seetzen, *Reisen*, ii. 227 ff.; Robinson, *BRP* ii. 439 ff.; Baedeker-Socin, *Pal.* 2 175; Tristram, *Land of Israel*, 280 ff., 296; Schürer, *HJP* ii. i. 160; Neubauer, *Géog. du Talmud*, 160; G. A. Smith, *Hist. Geog.* 269 ff.; Conder, *Tent-Work in Pal.* 266; *Bible Places* (1897), 8, 113; Sayce, *Patriarchal Pal.* 40.

E. HULL.

ENGINE.—Besides the battering-ram, 'forts' *dâyêk*, נִצְרֹת (LXX προμαχώνας, *Oxf. Heb. Lex.* 'bulwark,' 'siege-wall'), are mentioned as used in sieges in the Chaldean era (2 K 25¹=Jer 52¹, Ezk 4² 17¹⁷ 21²² (27) 26⁸ [all]). These forts were prob. towers on wheels manned with archers, and pushed forward by degrees against the wall to be attacked (cf. 1 Mac 13⁴³⁻⁴⁵). Such a tower might be combined with a battering-ram, or at least used to cover the attack of the ram. See BATTERING-RAM.

In 1 Ch 26¹⁵ Uzziah is said to have 'made in Jerusalem engines invented by cunning men (lit. 'contrivances, the invention of inventive men,' מְחִיטֵי חֵיטָה וְהַיָּדָה, see *Oxf. Heb. Lex. s. הַיָּדָה*) to be on the towers and upon the battlements, to shoot arrows and great stones withal.' These 'engines' were probably similar to the Roman *catapulta* and *balista*. The only other occurrence of the word הַיָּדָה is in Ec 7²⁹ 'God made man upright, but they have sought out many inventions.'

In Maccabæan times several different kinds of engines were in use. 'He encamped,' writes the author of 1 Mac, 'against the sanctuary many days, and set there artillery, and engines, and instruments to cast fire (or 'fiery darts'), and others to cast stones, and tormenta (*σκορπίδια*) to cast darts, and slings' (6⁵¹).

W. E. BARNES.

ENGRAFTED.—Ja 1²¹ only, 'the e. word.' This tr^a may be traced from Tind. 'grafted' (which would be the mod. form), through Gen. 'grafted,' Rhem. 'engrafted.'*

J. HASTINGS.

ENGRAVING.—1. חָרַטְתָּ *hârôsheth*, Ex 31⁵ 35³³⁻³⁵ [חָרַטְתָּ in Ex 32¹⁶ is prob. text. error for חָרַטְתָּ, cf. Jer 17¹]. 2. פִּתְּיָאֵחַ *pittâ'ach*, Ex 28¹¹. 21. 26 39¹⁴⁻³⁰, Zec 3⁹ (cf. 2 Ch 26¹³), 1 K 6³⁹, Ps 74⁶. 3. מִקְלָאֵת *miklâ'ath*, 1 K 6¹⁸. 29. 32 7³¹. 4. מְחִיטֵי חֵיטָה *mêhûkêch*, 1 K 6³⁵ (cf. Is 49¹⁶, Ezk 8¹⁰ 23¹⁴, Job 13²⁷). 5. χάρωμα, Ac 17²⁹.

Of these terms, the first possibly refers to the artistic skill of the worker, and the others to indicate the process or result of etching, punching, gouging, relief, etc. The material used was stone, wood (2 S 5¹¹=1 Ch 14¹), metal (1 S 13¹⁹), and jewels (Ex 28¹¹). The effect sought was either that of engraving into the surface, as in the signet-ring, and the jewels of the high priest's dress, or that of relief by the removal of the surrounding material, as in the cherubim carvings on the temple doors.

The incisions made by the graving-tool (חָרַט, Ex 32⁴) gradually led to ornamental inlaying in

* The Gr. (ἐμπεριέσθαι), which occurs only here in NT, gave the late Lat. *impotus*, whence our Eng. word 'imp.' An 'imp' is orig. a graft, as *Piers Plowman*, v. 137—

'I was sum-tyne a frere,
And the Couentes [Convent's] Gardyner, for to graffe ympes.'
So 'an imp of Satan' is a graft, scion, child of the devil.

metal, and to mosaic of marble, ivory, and mother-of-pearl in palaces (Ps 45⁸).

WOOD, IVORY, AND METAL 'ENGRAVING.'

The final form of engraving, amounting to complete separation, was that of the לִפְּסָה (Arab. *fast*) graven image (see CARVING).

LITERATURE.—Benzinger, *Hab. Arch.* 255 ff.; Wilkinson, *Anc. Egypt.* ii. 337; Herod. vii. 69; Müller, *Hab. d. Archäol. der Kunst*, § 311. G. M. MACKIE.

EN-HADDAH (עֵין הַדָּדָה), Jos 19²¹. — A city of Issachar noticed with En-gannim and Remeth. It is perhaps the present village *Kefr Adhân* on the edge of the Dothan plain, W. of En-gannim. See *SWP* vol. ii. sheet viii. C. R. CONDER.

EN-HAKKORE (עֵין הַקְּרוֹרָה) 'spring of the part-ridge'; cf. 1 S 26²⁰, Jer 17¹¹. — The name of a fountain at Lehi (Jg 15¹⁹). The narrator (J (?)) of the story characteristically connects *hakkōrē* with the word *yikrā* ('he called') of v. 18, and evidently interprets *En-hakkōrē* as 'the spring of him that called.' The whole narrative is rather obscure, and the tr. in some instances doubtful, but probably the story is something to the following effect. After his exertions in slaughtering the Philistines, Samson was very thirsty, and, finding no water, he cried to J, who clave the *maktēsh* ('mortar' or 'hollow place') which is in Lehi, and from a cleft in one of its sides water flowed (so Moore). This certainly seems preferable to the interpretation represented by AV, which understands the water to have sprung from a hollow place in the jaw (*lehi*).

There is much difference of opinion regarding the situation of *En-hakkōrē*. In Jerome's time it was shown at Eleutheropolis; Conder identifies it with 'Ayūn Kāra, N.W. of Zorah; Van de Velde

with a large spring between Tell el-Lekiyeh (4 miles N. of Beersheba) and Khuweilfeh.

LITERATURE.—Conder, *Tent-Work*, i. 277, *Bible Places*, 67; Guérin, *Judée*, ii. 318 f., 396 ff.; Van de Velde, *Memoir*, 343; Moore, *Judges*, 346 ff.; Reuss, *AT* i. 153; *PEFSt*, 1869, 182. J. A. SELBIE.

EN-HAZOR (עֵין הַחֹזֶר), 'spring of Hazor,' Jos 19³⁷. — A town of Naphtali, noticed between Kedesh, Edrei, and Iron. There were three Hazors in Upper Galilee, and the site is uncertain; but the most probable place for En-hazor seems to be *Hazvreh*, on the W. slopes of the mountains of Upper Galilee, W. of Kedesh. See *SWP* vol. i. sheet iii. C. R. CONDER.

ENJOIN.—To enjoin is first to 'join together' (Lat. *in-jungere*), as Mt 19⁶ Wyc. (1380), 'therefore a man departe nat that thing that God enjoynge, or knytte to gidre.' But it early came to mean to 'impose' something on some one. Generally it is a duty or penalty; but in Job 36³³ it is used in the rare sense of commanding or directing one's way, 'Who hath enjoyned him his way?' (קָרַב). The later and mod. sense of 'command' is found in Est 9³¹, He 9³⁰ ('enjoined unto you'; RV 'commanded to youward'), and Philem 8 'I might be much bold in Christ to enjoin thee.' J. HASTINGS.

ENLARGE, ENLARGEMENT.—To 'enlarge' is to 'cause to be large' that which is narrow or confined. It also signifies 'to make larger' that which may be considered large already, as Mt 23⁵ 'they make broad their phylacteries, and enlarge the borders of their garments' (*μεγαλύνω*); but the prefix *en-* (= Lat. *in*) has properly a strong causative force, as in 'enable,' 'enfeeble,' 'enrich.' Hence arises the meaning of 'set at large,' 'liberate,' as in Sidney, *Arcadia* (1622), 329, 'Like a Lionesse lately enlarged.' This is undoubtedly the meaning of **enlargement** in its only occurrence Est 4¹⁴ 'For if thou altogether holdest thy peace at this time, then shall there e. and deliverance arise to the Jews from another place' (נָחַם , AVm 'respiration,' RV 'relief'). Cf. Act 32, Henry VIII. c. 2, § 9 (1540), 'After his enlargement and commyng out of prison.' And that 'enlarge' is used in this sense in AV is evident, as Ps 4¹ 'thou hast enlarged me when I was in distress' (RV 'hast set me at large'); prob. also 2 S 22³⁷ = Ps 18³⁶ 'thou hast enlarged my steps under me.' So when applied to the heart, Ps 119⁹² (קָרַב), Is 60⁵ (קָרַב), 2 Co 6¹¹ (*πλατύνω*), the sense is first of all freedom, and then the joy that flows from it (cf. 2 Co 6¹³ *πλατύνω*, and 10¹⁵ *μεγαλύνω*), the opp. being 'to be straitened,' as in La 1²⁰ (cf. Jer 4¹⁹ 'I am pained at my very heart,' lit., as RVm 'the walls of my heart!'), and 2 Co 6¹². J. HASTINGS.

EN-MISHPAT (עֵין הַמִּשְׁפָּט), 'spring of judgment,' or 'decision' (by oracle), Gn 14⁷.—A name for Kadesh—probably Kadesh-barnea. See KADESH.

ENNATAN (*Ἐννατάν*, AV *Eunatan*), 1 Es 8⁴⁴ (⁴³ LXX).—See ELNATHAN.

ENOCH (חֵנוֹךְ).—1. The eldest son of Cain (Gn 4^{17, 18}). His father is said to have built a city and called it after his son's name. Its identity is quite uncertain (cf. Dillm. and Del. *ad loc.*, also Budde, *Urgesch.* 120 ff.). 2. The son of Jared, and father of Methuselah, seventh in descent from Adam in the line of Seth. His life is described by the remarkable expression, 'Enoch walked with God' (Gn 5²⁴). Not less remarkable is the brief account given of his death. After 365 years 'he was not, for God took him.' This is under-

stood by the writer to the Hebrews to mean, 'By faith Enoch was translated that he should not see death; and he was not found, because God translated him' (He 11⁵). In Jewish tradition many fabulous legends gathered around Enoch. He was represented as the inventor of letters, arithmetic, and astronomy, and as the first author. A book containing his visions and prophecies was said to have been preserved by Noah in the ark, and handed down through successive generations. (See Ryle in *Expos. Times*, iii. (1892), 355, and *Early Narratives of Genesis*, p. 90 f.; and the next three articles.)

R. M. BOYD.

ENOCH IN NT.—Enoch, the son of Jared (Gn 5^{18ff.}), is mentioned in three passages of the NT; traditional exegesis has found an allusion to him in a fourth.

1. In Lk 3³⁷ he has a place among the ancestors of our Lord.

2. In He 11⁵ it is said that 'by faith Enoch was translated.' His faith is inferred (v. 6) from the LXX word *ἐντρέττησεν* (Gn 5^{22, 24}; this verb is used in translating the Heb. 'to walk with [before]' in Genesis *ll. cc.* 6⁹ 17¹ 24⁴⁰ 48¹⁵, Ps 114⁹, Sir 44¹⁶, cf. Ps 25³ 34¹⁴). Nothing is added in He 11⁵ to the record of Gen. *l. c.* (LXX), except the explanatory phrase *τοῦ μὴ ἰδεῖν θάνατον*. With this exposition in the Alexandrian Epistle to the Hebrews it is interesting to compare the allegorical interpretation of Philo *de Abr.* §§ 3, 4. The name 'Ἐνώχ is explained by him as meaning (ὡς ἂν 'Ἕλληνες εἶποιεν) *κεχαρισμένος* (i. e. *ἔρη* is connected with *ἔρη*). The *μετάθεσις* is explained as *πρὸς τὸ βέλτιον μεταβολή*; the *οὐχ ἠῤῥίσκετο* as signifying either that after repentance the old evil life is blotted out as though it had never been, or that the good man (ὁ ἀστέιος) *ἐποχωρεῖ καὶ μόνωσιν ἀγαπᾷ*. Though in the original Hebrew of Sir 44¹⁶ Enoch is described as 'an example (*lit. sign*) of knowledge' (cf. *σύνεσεν αὐτοῦ*, Wis 4¹¹), yet in the Greek and Old Latin (Cod. Am. 'ut det gentibus pœnitentiam'), as in Philo, he is represented as 'an example of repentance.' In Sir 49¹⁴ (*ἀνελήμφθη ἀπὸ τῆς γῆς*; cf. Cod. Am. in 44¹⁶ 'translatu est in paradiso') his translation is interpreted literally. Josephus (*Ant.* i. iii. 4) uses an ambiguous classical phrase, 'He went unto the Deity (*ἀνεχώρησεν πρὸς τὸ θεῖον*); hence neither is his death recorded.' For Jewish and Christian legends about Enoch, see the references in Schürer, *HJP* II. i. 342, II. iii. 70.

3. In Jude 14 the description *ἔσθλομος ἀπὸ Ἀδάμ* is taken from the Book of Enoch (60⁸ 93³), and a passage from that book (1¹⁻⁹) is quoted as a warning actually uttered by the patriarch, dealing prophetically (*ἐπροφ. καὶ τοῦτοις*) with the false teachers of the apostolic age. The text of the passage in Enoch comes to us in three forms. (a) The Akhmîm fragment: *ὅτι ἐρχεται σὺν τοῖς [sic] μυριάσιν αὐτοῦ καὶ τοῖς ἁγίοις αὐτοῦ ποιῆσαι κρίσιν κατὰ πάντων, καὶ ἀπολέσει πάντας τοὺς ἀσεβεῖς καὶ ἐλέγξει* (MS *λέξει*) *πᾶσαν σάρκα περὶ πάντων ἔργων τῆς ἀσεβείας αὐτῶν ὧν ἠσέβησαν καὶ σκληρῶν ὧν ἐλάλησαν λόγων καὶ περὶ πάντων ὧν κατελάλησαν κατ' αὐτοῦ ἀμαρτωλοὶ ἀσεβεῖς*. (b) *Ad Novatianum* 16 (Hartel, *Cyprian*, iii. p. 67; Harnack, *Texte u. Untersuch.* xiii. 1, assigns the treatise to Sixtus II. of Rome, cf. Benson, *Cyprian*, p. 557 ff.): 'Sicut scriptum est: Ecce venit cum multis milibus nuntiorum suorum facere iudicium de omnibus et perdere omnes impios et arguere omnem carnem de omnibus factis impiorum quæ fecerunt impie et de omnibus verbis impiis quæ de Deo locuti sunt peccatores.' (c) The Ethiopic version (ed. Charles, p. 59): 'And lo! He comes with ten thousands of (His) holy ones to execute judgment upon them, and He will destroy the ungodly, and will convict all flesh

VOL. I.—45

of all that the sinners and ungodly have wrought and ungodly committed against Him.' It is clear that Jude * quotes loosely and abbreviates, but it will be noticed that (1) in *ἰδοὺ* Jude agrees with *Novat.* Eth. against Gr.; (2) in *ἐλέγξει* he coincides with *Novat.* alone, as possibly (for the tense of *venit* is ambiguous) in *ἦλθε*. On the importance of the citation in *ad Novat.* and its independence of Jude (contrast Westcott, *Canon*, p. 374), see Harnack, *op. cit.* p. 57, and especially Zahn, *Gesch. des Neut. Kanons*, ii. p. 797 ff. It may be added that Jude's quotation from Enoch was regarded (a) by Tertullian, *De Cult. Fem.* i. 3, as upholding Enoch; (β) by some referred to by Jerome, *De Vir. Illust.* 4, as condemning Jude.

4. A very common Patristic opinion, found as early as Tert. *De Anima*, 50; Hippol. *De Antichr.* 43 (cf. Bonwetsch, *Texte u. Untersuch.* xvi. 2, p. 48), identified 'the two witnesses' of Rev 11 with Enoch and Elijah (see the references in *Speaker's Commentary*, p. 651).

F. H. CHASE.

ENOCH, (ETHIOPIC) BOOK OF—

I. SHORT ACCOUNT OF THE BOOK.—In Gn 5²⁴ it is said of Enoch that he walked with God. This expression was taken in later times to mean that he enjoyed superhuman privileges, by means of which he received special revelations as to the origin of evil, the relations of men and angels in the past, their future destinies, and particularly the ultimate triumph of righteousness. It was not unnatural, therefore, that an apocalyptic literature began to circulate under his name in the centuries when such literature became current. In the *Book of Enoch*, translated from the Ethiopic, we have large fragments of such a literature proceeding from a variety of Pharisaic writers in Palestine, and in the *Book of the Secrets of Enoch* (see next art.), translated from the Slavonic, we have additional portions of this literature. The latter book was written for the most part by Hellenistic Jews in Egypt.

The Ethiopic Book of Enoch was written in the second and first centuries B.C. It was well known to the writers of NT, and to some extent influenced alike their thought and diction. Thus it is quoted as a genuine work of Enoch by Jude (1^{4f.}). Phrases, and at times entire clauses, belonging to it are reproduced in NT, but without acknowledgment of their source. Barnabas (*Ep.* iv. 3, xvi. 5) quotes it as Scripture. It was much used by the Jewish authors of the *Book of the Secrets of E.* and of the *Book of Jubilees*; in the *Testaments of the XII Patriarchs* its citations are treated as Scripture, and in the later apocalypses of Baruch and 4 Ezra there are many tokens of its influence. Thus during the 1st cent. of the Christian era it possessed, alike with Jew and Christian, the authority of a deuterocanonical book. In the 2nd cent. of our era it was rejected by the Jews, as were also many other Jewish Messianic writings that had been tr^d into Greek and well received in the Christian Church. But with the earlier Fathers and apologists of Christianity it preserved its high position till about the close of the 3rd cent. Henceforth it gradually fell into discredit, and finally was banned by the chief teachers of the Church. Thus the book ceased to circulate in all but the Church of Abyssinia, where it was rediscovered in 1773 by Bruce. This traveller brought home two MSS of this book, and from one of these Lawrence made the first modern translation of Enoch in 1821.

II. ORIGINAL LANGUAGE.—Apocalyptic scholars

* In the text of Jude there are some important variants, the chief being these: (1) in v. 14 *κ* cur.³ sah. arm. read *ἰν* *μυριάσιν ἁγίων ἀγγέλων* (cf. *Novat.*); (2) in v. 15 *κ* sah. for *π*. *τοὺς ἀσεβεῖς* read *πᾶσαν ψυχὴν*.

are now practically agreed that E. was derived from a Sem. original. The only question at issue now is: Was the original in Heb. or Aramaic? Halévy, in the *Journal Asiatique*, 1867, pp. 352-395, decides in favour of the former; and, so far as our present materials go, this view may be regarded as valid. Some Dutch and German scholars, it is true, think that it is possible to prove an Aram. original by means of the Aram. forms preserved in the Gizeh Greek fragment, *i.e.* *φουκα* in 18^s, *μαροβαρα* in 28^s, and *βαβδονα* in 29^s. The first is undoubtedly an Aram. form of *בָּבֶל*, and the two latter of *בָּבֶל*. But it is over-hasty to conclude from the presence of these two Aramaisms upon an Aram. original; for exactly on the same grounds we should be obliged to conclude to an Aram. original of Neh 2⁴, where the Aram. form *אֲרָא* is found in the LXX as a transliteration of *אֲרָא*. In the Eth. VS also of Jos 5⁶, 1 K 5²⁵ [Eng. 11], and Ezk 1⁴ there are transliterations of Heb. words in Aram. forms.

III. VERSIONS.—*Greek, Latin, and Ethiopic.*—The Heb. original was translated into Greek, and the Greek in turn into Ethiopic and Latin. Of the Gr. VS chs. 6-9^a 8^a-10¹⁴ 15-16¹ have been preserved in the *Chronography* of George Syncellus (c. A.D. 800); 89⁴²⁻⁴⁹ in a Vatican MS published by Mai in the *Patrum Nova Bibliotheca*, vol. ii.; and 1-32 in the Gizeh MS discovered only a few years ago, and published in 1892. A critical edition of this last fragment by M. Lods appeared shortly afterwards, and in 1893 it was edited by the present writer with an exhaustive comparison of the Eth. and Gr. VSS of 1-32 as an appendix to his work on Enoch. This study led to the following conclusions:—The Eth. VS preserves a more ancient and trustworthy form of text than the Gizeh Greek MS; it has fewer additions, fewer omissions, and fewer and less serious corruptions of the text (Charles, *Book of Enoch*, p. 324). The other two Gr. fragments will be found in the same work.

The Lat. VS is wholly lost with the exception of two small fragments: of these the first is 1⁹, and is found in the pseudo-Cyprian treatise, *Ad Novatianum* (see Zahn's *Gesch. des Neutest. Kanons*, ii. 797-801). The second, which embraces 106¹⁻¹⁸, was found by James in an 8th cent. MS in the British Museum, and published in his *Apocrypha Anecdota*, vol. i. A critical ed. of its text will be found in Charles, *Book of Enoch*, pp. 372-375. To these we might also add Tertullian's *De Cult. Fem.* i. 2, and *De Idol.* iv., which may point to a Latin text of 8¹ and 99⁷.

The Eth. VS alone preserves the entire text, and that in a most trustworthy condition. (a) *The Ethiopic MSS.*—There are twenty or more of these in the different libraries of Europe. Of these about half are in the British Museum alone, which happily also possesses the most valuable of all the MSS—that designated Orient. 485 in its catalogue of Eth. MSS. (b) *Editions of the Eth. Text.*—Only two edd. have appeared—that of Lawrence in 1838 from one MS, and that of Dillmann in 1851 from five MSS. Unhappily, these MSS were late and corrupt. The present writer hopes to issue later a text based on the incomparably better MSS now accessible to scholars. Such a text is actually presupposed in his translation and commentary of 1893. (c) *Translations and Commentaries.*—Translations accompanied by commentaries have been edited by Lawrence (1821), Hofmann (1833-1838), Dillmann (1853), Schodde (1882), and Charles (1893). Of Dillmann's and Schodde's translations the reader will find a short review in Charles (pp. 6-9). (d) *Critical Inquiries.*—Some account of these will be found in Schürer, *HJP* II. iii. 70-73, and in Charles, *Book of Enoch*, 9-21, 309-311.

Of the many scholars who have written on this book, the works of the following deserve special mention here:—Lücke, *Einleit.*

in d. Offenb. d. Johannes, 1852; Ewald, *Abhandl. über d. äthiop. B. Henoch Entsteh., Sinn, und Zusammensetzung*, 1855; Köstlin, 'Ueber d. Entsteh. d. B. Henoch' (*Theol. Jahrb.* 1856, pp. 240-279, 370-386); Hilgenfeld, *Die Jüd. Apokalyptik*, 1857, pp. 91-184; Gebhardt, *Die 70 Hirten d. B. Henoch u. ihre Deutungen* (Merx' *Archiv*, 1872, vol. II. Heft II. pp. 163-246); Drummond, *Jewish Messiah*, 1887, 17-73; Lipsius in Smith and Wace's *Dict. Chr. Biogr.* 1880, ii. 124-128; Schürer, *HJP* II. iii. 54-73; Lawlor in *Journ. of Philology*, xxv. (1897) 164-225.

IV. THE DIFFERENT ELEMENTS IN THE BOOK, WITH THEIR RESPECTIVE CHARACTERISTICS AND DATES.—The Bk. of E. is a fragmentary survival of an entire literature that once circulated under his name. To this fact the plurality of books assigned to E. from the first may in some degree point; as, for instance, the expression 'books' in 104¹²; *Test. XII Patriarch. Jud.* 18; Origen, *c. Celsum*, v. 54, *In Num. Homil.* xxviii. 2, and elsewhere. Of this literature five distinct fragments have been preserved in the five books into which the Bk. of E. is divided (*i.e.* 1-37. 37-71. 72-82. 83-90. 91-108). These books were originally separate treatises; in later times they were collected and edited, but were much mutilated in the course of redaction and incorporation into a single work. In addition to this E. literature, the final editor of the book made use of a lost Apocalypse, the Bk. of Noah, from which, as well as from other sources, he drew 6²-8⁸ 9⁷ 10¹⁻³. 11 17-20 39¹. 2a 41³⁻⁸ 43-44. 50. 54⁷-55² 56⁵-57^{8a} 59-60. 65-69²⁵ 71. 80-81. 105-107. This Bk. of Noah is mentioned in the Bk. of Jubilees 10¹³ 21¹⁰. Another large fragment of the Bk. of Noah is to be found in the latter.

We have already remarked that in the five books into which the whole work is divided we have the writings of five different authors. Before we proceed to give some of the grounds for this statement, we shall give in merest outline the different constituents which the chief scholars on this subject have found in this work. Lücke in his *Einleit. in die Offenb. d. Johannes* regards the book as consisting of two parts. The first part embraces 1-36. 72-105, written at the beg. of the Maccab. revolt, or, according to his later view, in the reign of John Hyrcanus; the second consists of the Similitudes, 36-71, and was written in the early days of Herod the Great. In the latter, however, there are some interpolations. Hofmann (J. Chr. K.) ascribes the entire work to a Christian author of the 2nd cent. In this view he was followed later by Weisse and Philippi. Hofmann deserves mention in this connexion on the ground of his having been the first to give the correct interpretation of the seventy shepherds in 89-90. Ewald (*Abhandl.* 1855) gives the following scheme:—Bk. I. 37-71, c. b. c. 144; Bk. II. 1-16. 81¹⁻⁴ 84. 91-105, c. b. c. 135; Bk. III. 20-36. 72-90. 106-107, c. b. c. 128; 108 later. Bk. IV., the Bk. of Noah, 6²⁻⁸ 8¹⁻³ 9⁷ 10¹⁻³. 11. 22b 17-19. 54⁷-55² 60¹⁻¹⁰. 2a. 26 64-69¹⁶, somewhat later than the preceding. Köstlin in his essay, 'Ueber d. Entsteh. d. B. Henoch' (*Theol. Jahrb.* 1856), a contribution of great worth, arrives at the following analysis:—The groundwork, 1-16. 21-34. 72-105, c. b. c. 110. The Similitudes, 37-71 and 17-19, before b. c. 64. Noachic fragments, 54⁷-55² 60. 65-69²⁵, possibly also 20. 82⁹⁻²⁰ 106-107. 108 is an Essene addition. Hilgenfeld (*Jüd. Apok.* 1857) regards the groundwork, consisting of 1-16. 20-36. 72-105, as written before b. c. 98; and the remaining chapters as coming from the hand of a Christian Gnostic after the time of Saturninus. We should mention also the interesting studies of Tideman, *ThT.* 1875, pp. 261-296; Lipsius, art. 'Enoch' in Smith's *Dict. Chr. Biogr.*; Schürer, *HJP* II. iii. 54-73; Drummond, *The Jewish Messiah*, 1877, pp. 17-23; and Schodde, *The Book of Enoch*, 1882. As Dillmann changed his mind three times, and in each instance for the better, it will be enough to give his final analysis. The groundwork, 1-36. 72-105, in the time of John Hyrcanus; the Similitudes and 17-19, before b. c. 64; the Noachic fragments, 6²⁻⁸ 8¹⁻³ 9⁷ 10¹. 11 20. 39¹. 2a 54⁷-55² 60. 65-69²⁵ 106-107. 108, from a later hand.

We shall now proceed to discuss this question directly, and try to carry the criticism of the book one stage further towards finality. Disregarding the interpolations from the Bk. of Noah already mentioned, as well as the closing chapter, we shall adduce a few of the grounds on which the compositeness of the rest of the book is determined.

First of all, critics are agreed in ascribing the Similitudes (37-71) to a different authorship from the rest. This is done on the following grounds:—(a) Certain names of God are found frequently in 37-71, but not elsewhere in the book. (b) The angelology differs. (c) The demonology differs. (d) The Messianic doctrine not only differs from

that of the rest of the book, but is unique in apocalyptic literature.

As for the remaining chs. 1-36, 72-104, all critics but Ewald and Lipsius have regarded them as the work of one and the same author. But these scholars have differed much from each other on the determination of the different elements present in these chapters, and have failed to gain the suffrage of other scholars as to the justness of their views. In one respect they are undoubtedly right. These chapters are of a composite nature; the more closely they are examined, the more clearly they exhibit conflicting characteristics. When submitted to a searching criticism they fall naturally into four distinct parts, i.e. 1-36, 72-82, 83-90, 91-104, differing from each other in authorship, system of thought, and date.

For the grounds for these conclusions the reader must refer to Charles' *Book of Enoch*, pp. 55-56, 187-189, 220-221, 260-263. It will be sufficient here to give some of the reasons for differentiating 83-90 and 91-104, as an illustration of the method there pursued in the criticism of the earlier sections. (a) The Messianic kingdom in 91-104 is finite in duration, whereas in 83-90 it is eternal. (b) In the former the Messianic judgment takes place at the close of the Messianic kingdom, in the latter at its beginning. (c) In the former there is a resurrection of the righteous only, in the latter a resurrection of apostate Jews also. (d) In the former the building of the temple precedes the final judgment, in the latter it is subsequent to the final judgment. (e) In the former the scene of the Messianic kingdom is apparently heaven, in the latter a purified earth. Now, our conclusion as to the distinct authorship of these two sections on the grounds just given is strikingly confirmed when we observe the forcible dislocations that 91-104 have undergone at the hands of the final editor in order to adapt them to the chapters that precede. Former critics have remarked that 93 must originally have preceded 91¹²⁻¹⁷, because we have in 93 an account of the first seven weeks of the ten into which the world's history is divided, and in 91¹²⁻¹⁷ the account of the remaining three weeks. They failed, however, to observe that 92¹, 'Written by Enoch the scribe, this complete doctrine of wisdom,' etc., formed originally the real beginning of this section. Next, on 92 follows 91¹⁻¹⁰ as a natural sequel, where E. summons his children to receive his parting words. Then comes the short Apocalypse of ten weeks, 93¹⁻¹⁰ 91¹²⁻¹⁷, while 91¹⁸⁻¹⁹ form a natural transition to 94. This section underwent these derangements in the process of its incorporation into a larger work.

As our space does not admit dealing further with the actual criticism of the book, we shall confine ourselves to the statement of results, and to a brief sketch of the various independent writings contained in the entire work, with their probable dates.

Part I., consisting of chs. 1-36 (for the Noachic interpolations see above), was written at latest B.C. 170, and mainly from the prophetic standpoint of such chs. as Is 65-66. This is, undoubtedly, the oldest part of the book, being anterior to 72-82, 83-90, 91-104, as it is used by the writers of these sections. As 83-90 was written not later than B.C. 161, 1-36 must be some years earlier; and as there is no allusion to the massacres of Antiochus Epiphanes, the above date (170) is the latest reasonable limit for its composition. This book, i.e. 1-36, is the oldest piece of Jewish literature that teaches the general resurrection of Israel, that describes Sheol according to the conception that prevails in NT as opposed to that of OT, and that represents Gehenna as a final place of punishment. The problem of the author is to justify the ways of God to men. The righteous will not always suffer (1¹). Sin is the cause of this suffering, and the sin of man is due, not to Adam, but to the lust of the angels—the watchers (9⁶ 9¹⁰ 10⁸). Hence the watchers, their companions, and their children will be destroyed (10⁴⁻¹⁰ 12). and their destruction will form the prelude to the first world-judgment, of which the Deluge will form the completion (10¹⁻³). But sin still prevails after the Deluge, through the influence of the evil spirits that go forth from the slaughtered children of the watchers and the daughters of men (16¹). These act with impunity till the final judgment. In the meantime, character finds its recompense, in some measure, immediately after death (22). In the last judgment the watchers, the demons, and all classes of Isr., with one exception, will receive their final award (1⁹ 22¹³). This judgment is preceded by a general resur. of Israel (22). The wicked are cast into Gehenna (27), the earth is cleansed from sin (10²⁰⁻²²), the Mess. kingdom is established with Jerus. as its centre (25⁵), and God abides with men (25³). The Gentiles become righteous and worship God (10²¹). The righteous eat of the tree of life (25⁴⁻⁶), and thereby enjoy patriarchal lives (5⁹). As to what befalls the righteous after the second death, there is no hint in this fragmentary section.

Part II., consisting of 83-90, was written between B.C. 166-161 by a Hasid in support of the Maccab. movement, and mainly from the same standpoint as Daniel. On a variety of grounds we are obliged to discriminate this section from the preceding. It will be enough to mention that, whereas there is a Messiah in the latter, there is none in the former; in the latter the

life of the righteous is apparently unending, in the former it is finite; in the latter the scene of the kingdom is the New Jerus. set up by God Himself, in the former it is Jerus. and the entire earth unchanged though purified. Finally, the picture in 83-90 is developed and spiritual, while that in 1-36 is naive, primitive, and sensuous.

The date assigned above is not difficult to fix. The Hasidim, symbolized by the lambs that are born to the white sheep (90⁶), are already an organized party in the Maccab. revolt. The lambs that become horned are the Maccab. family, and the great horn who is still warring while the author of the section is writing, is Judas the Maccabee (90⁹), who died B.C. 161. Chs. 83-90 recount two visions, 83-84 deal with the first world-judgment, 85-90 with the entire history of the world till the final judgment. In the second vision the interest centres mainly in the calamities that befall Isr. from the exile onwards. Why has Isr. become a byword among the nations, and the servant of one Gentile power after another? Is there no recompense for the righteous nation and the righteous individual? Isr. has indeed sinned, but the punishment immeasurably transcends the guilt. But these undue severities, according to the author, have not come upon Isr. from God's hand, but from the seventy shepherds into whose care God committed Isr. (89⁵⁹). These shepherds or angels have proved faithless to their trust, but not with impunity. An account has been taken of all their deeds and of all whom they have wickedly destroyed (89⁶¹⁻⁶⁴). Moreover, when the outlook is darkest, a righteous league will be established in Isr. (90⁶), and from a family belonging to it will come forth the deliverer, i.e. Judas Maccabæus (90⁸⁻¹⁶). Every effort of the Gentiles to destroy him will prove vain, and God's intervention personally will be the signal for their destruction (90¹⁹). The wicked shepherds and fallen watchers will be cast into the abyss of fire (Tartarus), and the apostates into Gehenna (90²⁰⁻²³). Then God Himself will set up the New Jerus. (90²³ 22), the dispersion will be brought back to Jerus., the righteous dead raised to take part in the kingdom, and the surviving Gentiles will be converted and serve Isr. (90³⁰). Finally, the Messiah will appear amongst them (90³⁷), and His kingdom will endure for ever. It should be observed that we have here the earliest appearance of the Messiah in non-canonical literature.

Part III., consisting of 91-104, was written between B.C. 134-95. The clearly defined opposition between the righteous and their Sadducean opponents which appears so frequently in this section cannot have been earlier than the breach between John Hyrcanus and the Pharisees, hence not earlier than B.C. 134, and not subsequent to B.C. 95; for it is not reasonable to suppose that the savage cruelties that won for Jannæus the title 'slayer of the pious' could have been referred to only once, and that incidentally, in the general terms of 103¹⁵. On the derangements which this section has sustained at the hands of the final editor we have already touched above.

The internal difference that subsists between this section and Part II. is very remarkable. As we pass from 83-90 to 91-104 we feel we are entering into a world of new conceptions. In all previous apocalyptic writings the resur. and the final judgment have been the prelude to an everlasting Mess. kingdom, and not till then, in fact, do the righteous enter on their reward. But the Mess. kingdom to which this writer looks forward is only of temporary duration (91¹²⁻¹⁵). In this kingdom no place is found for a Messiah; the righteous, with God's help, vindicate their just cause and destroy their oppressors. On the close of this kingdom follow the final judgment and the risen spiritual life of blessedness in a new heaven (91¹⁰ 92³). From such a view of the future it is obvious that, for the writer, the centre of interest has passed from the material world to the spiritual, and the Mess. kingdom is no longer the goal of the hopes of the righteous. Their faith finds its satisfaction only in a blessed immortality in heaven itself. The righteous, it is true, who are living on the advent of the Mess. kingdom will indeed be recompensed with all good things, but the departed righteous will not rise thereto, but to the everlasting spiritual life which will follow the final judgment. This blessed immortality after the final judgment is an immortality of the soul only (103³⁻⁴), a view that is implied also in the later books, the Ps-Sol and the Book of Jubilees. As for the wicked, they shall descend into the Sheol of darkness and flame, and abide there everlastingly (93³ 10 104⁷⁻⁸). In this section Sheol appears as hell, possibly for the first time in literature (103⁷).

Part IV. The Similitudes, consisting of 37-70, were written between B.C. 94-79 or B.C. 70-64. With some of the characteristics which distinguish these chapters from the rest of the book we have already dealt above. We are here concerned mainly with the determination of the date. 'The kings and the mighty,' so often denounced in the Similitudes, are the later Maccab. princes and their Sadducean supporters; for the blood of the righteous was not shed, as the writer complains, before B.C. 95:—the later Maccab. princes and not the Herods; for the Sadducees were not allies of the latter, and Rome was not as yet known to the writer as one of the great world-powers. This last fact necessitates an earlier date than B.C. 64, when Rome interposed authoritatively in the affairs of Judæa. If the reader will turn to the list of Noachic interpolations he will find that many of them are to be found in this section. These have, as a rule, been drawn from an already existing Apoc. of Noah and adapted by their editor to their adjoining contexts in Enoch. This he does by borrowing characteristic terms, such as 'Lord of Spirits,' 'Head of Days,' 'Son of Man,' to which, either through ignorance or of set intention, he generally gives a new connotation.

In his attempt to solve the problem of the suffering of the

righteous, this author has no interest save in the moral and spiritual worlds. His view, too, is strongly apocalyptic, and follows closely in the wake of Daniel. The origin of sin is traced one stage farther back than in 1-36. The first authors of sin were the Satans (407). The watchers fell through becoming subject to these, and leading mankind astray (546). Though the watchers were forthwith confined in a deep abyss, sin still flourishes in the world, and sinners deny the name of the Lord of spirits (382) and of His Anointed (4810), and the kings and the mighty oppress the children of God (6211). But suddenly there will appear the Head of Days, and with Him the Son of Man (462.3.4 482), to execute judgment upon all alike. And to this end there will be a resur. of all Isr. (511 619), and all judgment will be committed to the Son of Man (419, 6927), who will judge all according to their deeds (411). Sin and wrong-doing will be banished from the earth (492), and heaven and earth will be transformed (454.5), and the righteous will have their mansions therein (396 412). The Elect One will dwell amongst them (454); they will be clad in garments of life (6215.16), and become angels in heaven (514), and continue to grow in knowledge and righteousness (535).

It will be observed that the Messianic doctrine in this section is unique, not only as regards the other sections of E., but also in Jewish literature as a whole. The Messiah pre-exists from the beginning (482); He sits on the throne of God (453 473), and possesses universal dominion (626), and all judgment is committed unto Him (6927). If we turn to the other sections we find that in 1-36 and 91-104 there is no Messiah at all, while in 83-90 the Messiah is evidently human, and has no real rôle to play in the doctrine of the last things.

Before we pass to Part V. it will be advantageous to observe that the varying relations in which the Maccabees stood to the Hasid or Pharisaic party are faithfully reflected in the Books of E., i.e. Parts II., III., and IV. In Part II., i.e. 83-90, the Maccabees are the leaders of the righteous, and their efforts form the prelude to the Mess. kingdom. In Part III., i.e. 91-104, they are no longer at the head of the Hasids, but as yet they have not become their declared foes: they are the secret abettors of their Sadducean oppressors. But when we come to Part IV., i.e. the Similitudes, the Maccab. princes have ceased to disguise their enmity, and now take the lead in every act of oppression and murder practised on the Pharisees.

Part V. The Book of Celestial Physics consists of 72-78. 82. 79. Here, as in Part III., the order of the chapters has been changed by the final editor: 79, which forms the true conclusion of this work, has been placed immediately after 78, and two chapters, 80-81, which are quite alien in spirit and statement, have been interpolated.

The chronological system of this book, which is most perplexing, constitutes an attempt to establish an essentially Heb. calendar over-against the heathen calendars in vogue around. Though quite valueless in itself, it gives us some knowledge of the chronological systems that were known to Pal. Jews. Thus the writer is acquainted with the signs of the zodiac, the spring and autumn equinoxes, the summer and winter solstices, and the synodic months. He is familiar also with the Gr. eight-year cycle, and the seventy-six years' cycle of Calippus.

Part VI. The interpolations from the Book of Noah. These have been enumerated above. By means of these fragments, and of the large section of this lost book preserved in the Book of Jubilees, and of others still surviving in later Heb. literature, it would be possible to restore the Book of Noah in some of its main outlines.

V. INFLUENCE ON LATER LITERATURE.—The influence of E. on Jewish literature, to exclude for the moment the NT, is seen in the Bk. of Jubilees (written about the beginning of the Christian era), the Slavonic Enoch (A.D. 1-50), the Testaments of the XII Patriarchs, the Apocalypse of Baruch, and 4 Ezra. It is important to observe that, in the last two books just enumerated, E. is not mentioned by name, although their writers laid the Enochic books not infrequently under contribution. This silence, however, was intentional. E.'s acceptance among Christians as a Messianic prophet was the ground of his rejection among the Jews; and although, prior to A.D. 40, he was the chief figure, next to Daniel, in Jewish apocalyptic, in subsequent Jewish literature his functions and achievements are assigned to others, such as Moses, Ezra, Baruch. This opposition to E. is unwaveringly pursued in the Talm., and his name and works are always studiously ignored (see Charles, *Apocalypse of Baruch*, pp. 21-22, 101). On these facts we might find an Enochic canon. *No early Jewish book which extols E. could have been written after A.D. 50, and the attribution of E.'s words and achievements in early Jewish works to some other OT hero is a sign that they were written subsequent to the Pauline preaching of Christianity.*

In Patristic literature Enoch is twice cited as Scripture in the Ep. of Barnabas (4³ 16³). It is

also quoted with approval, though not always by name, by Justin Martyr, Irenæus, Athenagoras, Tertullian, Clement Alex., Origen, Anatolius. Thenceforward it is mentioned with disapproval by Hilary, Chrysostom, Jerome, Augustine, and finally condemned in explicit terms in the *Const. Ap.* vi. 16.

Far surpassing in importance the preceding was its influence on NT (a) diction and (b) doctrine.

(a) We shall here draw attention only to the indubitable instances. It is quoted directly in Jude 14, 15. Phrases, clauses, or thoughts derived from it are found also in Jude 4, Rev 27 310 4⁶ 6¹⁰ 9¹ 14²⁰ 20¹³, Ro 8³⁸ 9⁵, Eph 1²¹, He 11⁵, Ac 3¹⁴, Jn 5^{22.27}, Lk 9⁵⁵ 16⁹ 23³⁵, Mt 19²⁸ 25⁴¹ 26²⁴.

(b) The doctrines in E. that had a share in moulding the corresponding NT doctrines, or formed a necessary link in the development of doctrine from OT to NT, are those concerning the Messianic kingdom and the Messiah, Sheol and the Resurrection, and demonology. As we cannot here enter into a discussion of these questions, we shall confine our remarks to the doctrine of the Messiah in Enoch. First, we should observe that four titles, applied, for the first time in literature, to the personal Messiah in the Similitudes, are afterwards reproduced in NT. These are 'Christ' (or 'the Anointed One'), 'the Righteous One,' 'the Elect One,' and 'the Son of Man.' The first title, found repeatedly in earlier writings, but always in reference to actual contemporary kings or priests, is now for the first time (48¹⁰ 52⁴) applied to the Messianic king that is to come. It is here associated with supernatural attributes. In Ps-Sol, written a few years later, it is applied to a merely human Messiah. The second and third titles, 'the Righteous One,' 'the Elect One,' which are found first in E., have passed over into NT, the former occurring in Ac 3¹⁴ 7⁵² 22¹⁴, the latter in Lk 9³⁵ 23³⁵. The last title, 'the Son of Man,' appears for the first time in Jewish literature in E., and is historically the source of the NT designation. To the latter it contributes some of its most characteristic contents, particularly those relating to judgment and universal authority. Thus statements in E. respecting the Son of Man are quoted by the evangelists respecting the NT Son of Man. Jn 5^{22.27} 'He hath committed all judgment unto the Son . . . because he is the Son of Man,' is a quotation from Enoch 69²⁷ 'The sum of judgment was committed unto him, the Son of Man.' It should be here observed that in E. the Messiah is represented for the first time as Judge of mankind. Again, Mt 19²⁸ 'When the Son of Man shall sit on the throne of his glory' is from Enoch 62⁸ 'When they see the Son of Man sitting on the throne of his glory.' It is well known that the use of this phrase as a Mess. title is confined in NT, with two exceptions, to the Gospels, and in them it is used only by our Lord in speaking of Himself. Its survival, however, as a Mess. designation among the Jews, is attested by a passage in the Talm. Jer., *Taanith* ii. 1: 'Abba said: "If a man says to thee—I am God, he lies; I am the Son of Man—he will at last repent it: I ascend to heaven—if he said it, he will not prove it."' See further, ESCHAT. OF APOCR.

R. H. CHARLES.

ENOCH, BOOK OF THE SECRETS OF.—In Origen's *de Princip.* i. 3. 2 we find the following statement in reference to the Bk. of Enoch:—'Nam et in eo libello . . . quem Hermas conscripsit, ita refertur: Primo omnium crede, quia unus est Deus, qui . . . esse fecit omnia . . . sed et in Enoch libro his similia describuntur.' Now, as a matter of fact, this statement cannot be justified from the Ethiopic Enoch. Accordingly, till the discovery of the present book it was necessary to assume either

that we had here a mistake of Origen, or else that he had before him a portion of the Enoch literature unknown to later generations. That the latter assumption was the true one we are now able to see; for in the 'The Book of the Secrets of Enoch' we have an elaborate account of the creation, 24-29, and an insistence on the unity of God, 33^o 36^o. Further, in the *Testaments of the XII Patriarchs* there are several direct references to the Bk. of Enoch. Some of them have clearly to do with the Ethiopic Enoch, but others have as clearly no connexion with it. Now, the bulk of the latter may be traced to the book with which we are at present dealing. This book, as it has been preserved only in Slavonic, it will be convenient to call 'the Slavonic Enoch' in contradistinction to the older book, which we may fitly designate 'the Ethiopic Enoch,' seeing that it has come down to us in its entirety only in that language.

This new fragment of the Enoch literature has only recently come to light through certain MSS which were found in Russia and Servia. Although the very knowledge that such a book ever existed was lost for probably 1200 years, it was nevertheless much used both by Christian and heretic in the early centuries. Thus citations appear from it, though without acknowledgment, in the Book of Adam and Eve, the Apocalypses of Moses and Paul (A.D. 400-500), the Sibylline Oracles, the Ascension of Isaiah, and the Ep. of Barnabas (A.D. 70-90). It is quoted by name in the apocalyptic portions of the *Testaments of the XII Patriarchs* (c. A.D. 1). It was referred to by Origen, and probably by Clement of Alexandria, and was used by Irenæus. Some phrases of NT may be derived from it.

The Slavonic MSS.—There are five Slav. MSS. The first (i.e. A) belongs to the 17th cent., and contains the complete text. It was edited by Popov in 1880, and forms the basis of the text which appears in the Morfill-Charles ed. of 1896. The second MS—a 16th cent. one—was discovered by Sokolov in 1886. This also preserves the complete text. The remaining three MSS are very incomplete. The most important of these (i.e. B) is preserved in the Public Library of Belgrade.

Editions and Translations.—The present writer, learning through a German review in 1892 of the existence of a Slav. VS of the Ethiopic Bk. of Enoch, at once proceeded by Mr. Morfill's help to make himself acquainted with two distinct recensions of this work. This speedily led to the discovery that it was not a Slav. VS of the Ethiopic Enoch, but of a hitherto unknown and extremely valuable pseudigraph. By means of Mr. Morfill's tr. of the MSS A and B and of Sokolov's texts, an Eng. VS and ed. of this book was issued in the beginning of 1896. Six months later Bonwetsch's *Das Slav. Henochbuch* appeared, in which German tr. of the MSS A and B are given side by side, preceded by a short introduction, founded professedly in the main on Charles' edition. This is a serviceable work.

II. LANGUAGE AND PLACE OF WRITING.—The main part of this book was written at the first in Greek. This is clear from such statements as (1) 30^o 'And I gave him a name (i.e. Adam) from the four substances: the East, the West, the North, and the South.' Adam's name is thus derived from the initial letters of the Gr. names of the four quarters, i.e. ἀνατολή, δύσις, ἄρκτος, μεσημβρία. This fanciful derivation was first elaborated in Greek, as it is impossible in the Sem. languages; but the idea that Adam was created from dust belonging to the four quarters of the earth is Jewish. (2) The writer follows the chronology of the LXX. (3) In 50^o he reproduces the LXX text of Dt 32^o against the Hebrew. (4) He constantly uses Sir, which was chiefly current in Egypt. But though the main part of the book was written originally in Greek, certain portions of it were based on Heb. originals. Such an hypothesis is necessary to account for the quotations from or references to it which appear in the *Testaments of the XII Patriarchs*. The fact that the latter work was written in Hebrew obliges us to conclude that its authors drew upon Heb. originals

in their references to and quotations from the Slavonic Enoch.

The book was written in Egypt. This is deducible from the following facts:—(1) From the variety of speculations which it holds in common with Philo and other Hellenistic writers: thus souls were created before the foundation of the world, 23^o; cf. Philo, *de Somno*, i. 22; Wis 8^{19, 20}. Again, man has seven natures, 30^o; cf. Philo, *de Mundi Op.* 40. (2) The whole Messianic teaching of OT finds not a single echo in the work of this Hellenized Israelite of Egypt, although he shows familiarity with most of its books. (3) The Phoenixes and Chalkydries of ch. 12 are natural products of the Egyp. imagination. (4) The syncretistic character of the creation narrative in 25-26 betrays Egyp. elements.

III. RELATION TO JEWISH AND CHRISTIAN LITERATURE.

Materials originally derived from this book are discoverable in Cedrenus and Joel (A.D. 1050-1200), though in these authors these materials are assigned to other names. Two passages of the Book of Adam and Eve in i. vi. and viii. are all but quotations from 29^o and 31^o of our book. Again, in the Apoc. of Moses (ed. Tisch. 1866), p. 19, we have a further development of 142^o of our text, just as in the Apoc. of Paul, p. 64, οὗτος ἴσται ὁ παράδεισος, ἕνθα . . . δίδρον . . . ἐν ᾧ ἐπανσταύεται τὸ πνεῦμα τὸ ἅγιον, is a Christian adaptation of 83^o 'And in the midst (of Paradise is) the tree of life . . . on which God rests when he comes unto Paradise.' Again, the words, p. 64, ἐκ τῆς βίβης αὐτοῦ ἐξήρχετο . . . ὕδωρ, μετρίμενον εἰς τέσσαρα ὀρύγματα, and p. 62, ποταμοὶ τέσσαρες . . . βίνοντες μέλι καὶ γάλα καὶ ἕλαιον καὶ οἶνον, are verbal reproductions of 85^o 'From its root in the garden there go forth four streams which pour honey and milk, oil and wine, and are separated in four directions.' The passage in the anonymous *De Montibus Sinae et Sion*, 4, is ultimately derived from 80^o, and Augustine's peculiar speculation on the eighth eternal day (*De Civ.* xxii. 30. 5) from 33^o.

Still earlier we find almost a verbal reproduction of 50^o-51^o in the Sibylline Oracles, ii. 75. In Irenæus, *Contra Her.* v. 28. 3, the Jewish speculation of 33^o is reproduced, and possibly in Origen (see Lommatzsch, ed. xxi. 59). However this may be, there is no doubt as to the direct reference to 24-30. 33^o, in the *De Princip.* i. 3. 2, as we have already shown above. In a still earlier period, A.D. 50-100, the writer of the Ascension of Isaiah 8¹⁶ was most probably acquainted with 19^o, and the writer of the Apoc. Bar 69^o. 8. 10. 11 with various passages of this book. In the Ep. of Barnabas 15^o-3, and probably in 18^o, the thought and diction are dependent on 32^o-33 and 30^o15.

In NT the similarity of matter and language is sufficiently great to establish a close connexion, if not a literary dependence. With Mt 5^o 'Blessed are the peacemakers,' cf. 52^o 'Blessed is he who establishes peace'; with Mt 5^o 34. 37 'Swear not at all,' etc., cf. 49^o 'I will not swear by a single oath, neither by heaven, nor by earth, nor by any other creature which God made. . . . If there is no truth in man, let them swear by a word, yea, yea, or nay, nay.' Again, with Mt 7^o 20 and 25^o cf. 42^o 14 and 9^o; with Jn 14^o cf. 61^o; with Eph 4^o cf. 42^o 12; with Rev 9^o and 10^o cf. 42^o and 63^o.

Still earlier we find this book not only used, but quoted by name in the *Test. Dan.* 5, where the statement, τὸν πνευματικὸν τῆς πλάνης ἀνέγνων γὰρ ἐν βιβλίῳ 'Ενὸς τοῦ δικαίου, ὅτι ὁ ἄρχων ἡμῶν ἴσται ὁ Σατανᾶς, is drawn from 18^o 'These are the Grigori (i.e. Ἐργηγοροί) who with their prince Satanail rejected the holy Lord.' Finally, the references to Enoch in *Test. Naph.* 4, ἀνέγνων ἐν γραφῇ ἁγία 'Ενὸς, ὅτι καίμε καὶ ὑμεῖς ἀποστάντες ἀπὸ Κυρίου, πορεύμενοι κατὰ πάσαν πονηριανθῶν, καὶ ποιήσετε κατὰ πάσαν ἀνομίαν Σοδόμων καὶ Ἰσάβη ἡμῶν Κύριος εὐχμαλοῦσιν . . . ἕως ἂν ἀναλάβῃ Κύριος πάντας ὑμᾶς, are an adaptation of 34^o 3 'I know the wickedness of men . . . that they will cast off my yoke . . . and fill all the world with . . . sodomy and all other impure practices . . . and on this account I will bring a deluge upon the earth, and I will destroy all.' In the *Test. Sim.* 5, *Test. Benj.* 9, we find additional references to this prophecy, in which Enoch foretold the impure practices of men. *Test. Jud.* 18 may be derived from the same source.

IV. DATE AND AUTHORSHIP.—The question of the date has to a large extent been determined already. The portions which have a Heb. background are at latest pre-Christian. This follows from the fact of their quotation in the *Testaments of the XII Patriarchs*. Turning to the rest of the book, the *terminus a quo* is determined by the fact that it frequently uses Sir, cf. 43^o-3 47^o 52^o 61^o 2 4 etc. The Ethiopic Enoch, further, is continu-

ally presupposed in the background. Its phraseology and conceptions are reproduced, 7⁴. 5 33⁴. 9-10 35² etc. At times its views are put forward in a developed form, 8¹. 6-6 40¹³ 64²; and occasionally divergent conceptions are enunciated, 16⁷ 18⁴. Finally, explanations are claimed to have been given by this writer which, as a matter of fact, are not to be found in his writings, but in the Ethiopic Enoch, see 40⁵. 6. 8. 9. It is possible that Wis was also used by our author, see 65⁴. Since, therefore, Sir, Eth. Enoch, and Wis (?) were used by this author, his work cannot have been earlier than B.C. 30.

The *terminus ad quem* must be set down as earlier than 70 A.D. For (1) the temple is still standing. (2) This book was known and used by the writers of the Ep. of Barnabas and the Ascension of Isaiah, and probably by some of the writers of NT. We may therefore with reasonable certainty assign the composition of this book in Greek to the period A.D. 1-50, to an author who is thus a contemporary of Philo, and who holds many speculations in common with him.

The author was an orthodox Hellenistic Jew who lived in Egypt. He believed in the value of sacrifices, 42⁸ 59¹. 2 66² (but he is careful to enforce enlightened views with regard to them, 45³. 4 61⁴. 5), in the law, 52⁸. 9, and in a blessed immortality, 50² 65⁵. 8-10, in which the righteous will wear 'the raiment of God's glory,' 22⁸. In questions affecting the origin of the earth, sin, death, he allows himself the most unrestricted freedom, and borrows from every quarter. Thus Platonic 30¹⁶, Egyptian 25², and Zend 58⁴-6 elements are incorporated in this system. The result is highly syncretistic.

V. ANALYSIS OF CONTENTS.—The book opens with a short account of Enoch as 'a very wise man' whom 'God loved and received, so that he should see the heavenly abodes, the kingdoms of the wise, great, and never-changing God.' In ch. 1 two angels appear to E., and bid him to make ready to ascend with them unto heaven. In ch. 2 E. admonishes his sons 'not to worship vain gods; not to turn aside from God, but to walk before the face of the Lord and keep his judgments,' and directs them not to seek for him till he is brought back to them. Thereupon (3-6) the angels carry E. aloft through the air to the first heaven, where he sees a very great sea, greater than the earthly sea; likewise the elders and the rulers of the stars, and the treasures of the snow and ice and the dread angels that guard them, and the treasures of the clouds and of the dew and their guardian angels. Thence (7) he is carried to the second heaven, where he sees 'the prisoners suspended, reserved for, and awaiting the eternal judgment.' And these angels, who together with their prince had rebelled against God, besought E. (just as in Eth. Enoch 13⁴) to intercede for them. And E. answered, 'Who am I, a mortal man, that I should pray for angels? Who knows whither I go, or what awaits me?' Next E. is carried up to the third heaven (8), and placed 'in the midst of a garden.' And he sees there 'all the trees of beautiful colours, and their fruits ripe and fragrant . . . and the tree of life . . . on which God rests when he comes into Paradise,' and the four streams which go forth from its root, 'pouring honey and milk, oil and wine. . . . And these go down to the Paradise of Eden, between corruptibility and incorruptibility. . . . And the angels inform E. that 'this place is prepared as an eternal inheritance' for those 'who turn their eyes from unrighteousness and accomplish a righteous judgment, and give bread to the hungry, and clothe the naked, and raise the fallen, . . . and walk without blame before the face of the Lord.' E. is then taken to the northern region of this heaven (10), and shown 'a very terrible place' of 'savagery and darkness and impenetrable gloom,' with 'fire on all sides, and on all sides cold and ice.' He is then told that 'this place is prepared as an eternal inheritance' for those 'who commit evil deeds on earth, sodomy, witchcraft, . . . who oppress the poor, who are guilty of stealing, lying, calumnies, envy, evil thoughts, fornication, murder, who 'worship gods without life.' Thence E. is conducted to the fourth heaven, where he is shown the courses of the sun and moon (11), and the phoenixes and the chalkadri (12), 'with the feet and tails of lions and the heads of crocodiles; their appearance was of purple colour like the rainbow; their size nine hundred measures. Their wings were like those of angels, each with twelve, and they attend the chariot of the sun.' And the angels show him also the eastern and western gates of the sun (13-16), and 'an armed host serving the Lord with cymbals and organs' (17). In 18 E. is taken up to the fifth heaven, where he sees the watchers who had rebelled, and whose brethren were already confined in torment in the second heaven. Then he passes to the sixth heaven (19), where are the angels who regulate all the powers of nature and the courses of the stars, and write down the deeds of men. Finally, E. is raised to the

seventh heaven (20-21), where he sees God sitting on His throne, and the heavenly hosts in their ten orders on the steps of the throne, and the seraphim singing the trisagion. And E. (22) fell down and worshipped; and Michael, at God's command, took from him his earthly robe and anointed him with the holy oil from the *arbor misericordiae*, the olive tree that stood in the garden, and clothed him with the 'raiment of God's glory.' And thus E. became like one of the glorious ones. And E. (23), under the instruction of Vretil, wrote 366 books in thirty days and thirty nights about things in heaven and earth, and about the souls of men created from eternity, and their future dwelling-places. In 24-26 God makes known to E. how He created the invisible out of the visible: how He commanded Adoil (possibly a corruption of Uriel=light of God) and Arkhas to come forth and burst asunder, and so the light on high and the world below were produced. And God divided the light and the darkness (27), and made the seven heavens. And God caused the waters which are under the heavens to be gathered into one place, and out of the waters He made the earth and an abyss in its midst (28). Such was the work of the first day. And on the second day God 'fashioned for all the heavenly hosts a nature like that of fire' (29¹-3), and one of the archangels, Satanail, rebelled, and God cast him down from the heights (29⁴ 5). And on the third day God (30¹ 2) caused the earth to produce trees and herbs and every seed that is sown, and planted Paradise. And on the fourth (30³-6) God ordered great lights to be in the various circles of the heavens, i.e. Kruno, Aphrodite, Ares, the Sun, Zeus, Hermes, the Moon. And God appointed the sun and moon to give light to the earth, and to proceed through the twelve signs of the zodiac. And on the fifth (30⁷-13) God created the fish of the sea and the fowl of heaven, and everything that moveth on the earth. And on the sixth He made man from seven substances, and called him Adam, from the four quarters of the world, and showed to him the two ways of light and darkness. And while Adam was in Paradise the heavens were open so that he could see the angels in heaven (31); but Satan envied him, and deceived Eve. And God established the eighth day (33¹-2), at the beginning of which time should be no more. And God announced Himself to E. as 'the eternal One, and the One not made with hands.' 'My wisdom is my counsellor, and my word is reality.' The corruption of the earth and the Deluge are then foretold, and the preservation of Noah, ch. 35. God bids E. to return to the earth for thirty days and teach his sons during that time (36-38). E. admonishes and instructs his sons, and tells them what he has seen, the courses of the sun and moon, the seasons, the winds, the thunder and lightning, Hades and hell and Paradise, and gives utterance to nine beatitudes (39-42). He impresses on them the incomparable dignity of goodness—'none is greater than he, who he fears God' (43). They are not to revile the person of man, for he who reviles man in reality reviles God: they are to make their offerings, and yet not to value them unduly, but consider the motive rather from which they spring (44-46). E. gives his books to his sons (47); instructs them not to swear, neither by heaven nor by earth nor by any other creature which God made (49); bids them in meekness to accomplish the number of their days, to refrain from avenging themselves, and to be open-handed to those in need (50-51). Again he enunciates seven beatitudes and their corresponding woes (52). The departed saints do not intercede for the living (53). At the close of the appointed time (55-59) E. again addresses his sons. He announces to them his coming departure to the highest heavens. He declares that no soul shall perish till the final judgment, and that the souls of beasts will then bring charges against the men who ill-treated them. He gives further instruction as to sacrifice, and their duty to the needy, and warns against unnatural sins, contempt and lying (60-63). The people assemble in Achuzan to take leave of E. He addresses them on various topics, and exhorts them to faithfulness. He announces the great judgment, after which 'the times shall perish, and there shall be no year, nor month, nor day; and there shall be no hours.' 'Moreover, there shall be no labour, nor sickness, nor sorrow, anxiety, nor need, nor night, nor darkness, but a great light.' He is then carried off to the highest heaven. And his sons thereupon build an altar in Achuzan and hold high festival, rejoicing and praising God (64-68).

VI. THE AUTHOR'S VIEWS ON ANTHROPOLOGY.

—All the souls of men were created before the foundation of the world, 23⁸, and also a future place of abode in heaven or hell for every individual soul, 49² 58⁵ 61². Man's body was made of seven substances, 30⁸, and his name, as we have already seen, was given to him by God from the four quarters. Man was created originally good; free will was bestowed upon him, with the knowledge of good and evil. He was instructed in the two ways of light and darkness, and then permitted to mould his own destiny, 30¹⁵. But his connexion with the body biassed his preferences in the direction of evil, and death ensued as the wages of sin, 30¹⁸. All men will be judged finally, 40¹². 13; the righteous will escape the last judgment, 65⁸ 66⁷, and be gathered to eternal life; but hell will be the eternal abode of the wicked, 10⁴. 6, and there is no place of repentance after death, 42².

VII. VALUE OF THE BOOK IN ELUCIDATING CONTEMPORARY AND SUBSEQUENT THOUGHT.—Fresh evidence on the following beliefs is contributed by this book. i. *The millennium*.—This Jewish conception is first found in 32^d–33^d. From this its origin is clear. The account in Gn of the first week of creation came in pre-Christian times to be regarded, not only as a history of the past, but as a forecast of the future history of the world so created. Thus, as the world was created in six days, its history was to last 6000; for 1000 years with God are as one day (Ps 90^d, *Jub.* 4th, 2 P 3rd); and as God rested on the seventh day, so at the close of 6000 years there should be a rest of 1000 years, i.e. the millennium. Thereupon followed the future world of eternal bliss, designated as the *eighth eternal day*. ii. *The seven heavens*.—The detailed account of the seven heavens in this book has served to explain difficulties in OT conceptions of the heavens, and has shown beyond the reach of controversy that the sevenfold division of the heavens was accepted by St. Paul and the author of Hebrews, and probably in Rev. From this book, further, it is clear that a feature impossible in modern conceptions of heaven shows itself from time to time in pre-Christian and also in early Christian conceptions, i.e. the belief in the presence of evil, or in the possibility of its appearance in the heavens. For a discussion of this question the reader should consult *Expository Times* (art. 'The Seven Heavens'), Nov. and Dec. 1895, and Charles, *The Book of the Secrets of Enoch*, pp. xxx–xlvii.

R. H. CHARLES.

ENOCH (City).—See ENOCH 1 (p. 704^b).

ENOS (so RV in Lk 3rd), the same as Enosh (עֲנוֹשׁ), the name of the son of Seth (Gn 4th). He was the father of Kenan; and the length of his life is stated as 905 years (Gn 5th). It is said in connexion with the mention of his birth, 'then began men to call upon the name of J^h' (4th). 'Enosh' denotes 'man in his frailty and weakness.' The fact of prayer being made to J^h first when Enosh was born, perhaps indicates allegorically the belief that men were then first driven by sickness, and by a sense of frailty and dependence, to cry for help to the invisible Creator. The LXX, which translates the second clause of 4th οὐδὸς ἠπίσεν ἐπικαλεῖσθαι κ.τ.λ., associates Enosh himself with this step in the spiritual life of the human race (cf. parallels 4th and 10th). The advance thus made by the generation of Enosh the son of Seth is evidently intended to stand as the counterpart to the advance in another aspect of life represented by Enoch—the parallel generation in the line of Cain (4th). It has been suggested that this mention of Enosh and of the first recourse to prayer to J^h must have been derived from a source of J^h tradition distinct from that which records the sacrifices of Cain and Abel, inasmuch as sacrifice would imply supplication to the Deity.

H. E. RYLE.

EN-RIMMON (עֵין רִמּוֹן 'spring of [the] pomegranate').—One of the settlements of Judahites after the return from the Exile, Neh 11th. In Jos 15th amongst the towns assigned to Judah we find 'Ain and Rimmon,' and in 19th (cf. 1 Ch 4th) amongst those assigned to Simon are 'Ain, Rimmon.' In all these instances there can be little doubt that we ought to read neither עֵין רִמּוֹן nor עֵין רִמּוֹן, but עֵין רִמּוֹן (En-rimmon). This reading is accepted by Bennett and Kittel in *Joshua* and *Chronicles* in Haupt's OT. En-rimmon is probably to be identified with the modern *Umm-er-Rumâmîn*, about 9 miles N. of Beersheba.

LITERATURE.—Lagarde, *Onom.* 120, 256; Robinson, *BRP* iii. 233; Van de Velde, *Memoir*, 344; *PEF Mem.* iii. 392, 398.

J. A. SELBIE.

EN-ROGEL (עֵין רֹגֵל 'spring of the fuller'), a spring in the immediate vicinity of Jerus., on the boundary between Judah and Benjamin (Jos 15th 18th). Owing to its position close to but yet out of view of the city, Jonathan and Ahimaaz, the sons of the priests, were stationed there during the rebellion of Absalom, in order that they might secretly receive and carry news from Hushai in Jerus. to David in his camp by the Jordan (2 S 17th). At a later period of history it was the scene of a great feast given by Adonijah, the eldest son of David, presumably with a view to forcibly seizing the crown (1 K 1st 9th 'by the stone of Zoheleth, which is beside E.'). Jos. (*Ant.* VII. xiv. 4) describes it as being 'without the city, in the royal gardens'; and again (*Ant.* IX. x. 4) speaks of a place called Eroge (clearly, as Mr. Grove has pointed out, a mistake for En-rogel), at which the earthquake consequent on the sacrilegious act of Uzziah dislodged a portion of the eastern hill, 'so as to obstruct the roads and the royal gardens.' Modern authorities are somewhat divided as to the exact site of the spring; but the bulk of the evidence is certainly in favour of the identification of E. with 'the Fountain of the Virgin.' This spring, now called 'Ain Umm ed-Deraj' = 'the spring of the steps,' lies in the Kidron valley, close to the village of Siloam, and is, in fact, the source from which the Upper Pool of Siloam derives its supply of water; the latter flows through a rock-hewn tunnel 'dating from the time of the Kings' (Sir C. Wilson). The latter authority further considers that originally this supply of water was carried as far as the Lower Pool (*Birket el-Hamra*), and that it was stored there for irrigating the king's gardens. The arguments brought forward in support of this identification are, briefly, as follows:—(1) The 'Fountain of the Virgin' is the only real spring near to Jerusalem. (2) Immediately fronting it, on the farther side of the valley, there is a rude flight of steps, cut out of the precipitous face of the cliff, which leads to the village of Siloam; this place is called at the present time *ez-Zehweleth*, and is identified by M. Clermont-Ganneau (*PEFSt.* 1869–70, p. 253) with the stone of Zoheleth. (3) The spring must have always been well known, and so would naturally form a landmark on the boundary-line between Judah and Benjamin. (4) In the account of St. James' martyrdom, he is said to have been cast from the temple wall into the valley of Kidron, and finally slain by a fuller with his stick. From this it has been inferred that St. James was cast down near the spot where the fullers were working. (5) This spring is still the great resort of the women of Jerus. for washing and treading their clothes.

Others, however, identify E. with *Bir Eyûb* = 'the well of Job,' or 'the well of Nehemiah' (acc. to a later tradition). Three points are urged in favour of this view: (1) that in the Arab. VS of Jos 15th E. is translated by 'Ain Eyûb; (2) that in an early Jewish itinerary (Uri of Biel in Hottinger's *Cippi Hebraici*) it is called 'the well of Joab,' as if referring to Joab's connexion with Adonijah; and (3) that its situation agrees better with the common boundary of Judah and Benjamin. But these arguments are not sufficiently weighty to counter-balance the following objections: (1) The *Bir Eyûb* is a well, not a spring, its waters, as a rule, being 70 to 80 ft. below the level of the ground. (2) Its situation does not suit the narrative of 2 S 17. Lying below the junction of the valleys of Kidron and Hinnom, it is at once too far from the city and from the direct road over the Mt. of Olives to the Jordan; and if *ez-Zehweleth* is the same as Zoheleth, it would also be too far from this latter spot. (3) Its date is uncertain; but it

is hardly probable that it goes back to the time of Joshua.

LITERATURE.—Besides the authorities cited above, see Baedeker-Socin, *Pal.* 2 113; Robinson, *BRP* i. 331 f.; Williams, *Holy City*, ii. 489 ff.; *PEF Mem.* 'Jerusalem', p. 365 ff.; Benzinger, *Heb. Arch.* 42; W. R. Smith, *RS²* 172, 489; *PEFSt*, 1874, 70; 1884, 185; 1885, 20, 184, 228; 1886, 56; 1889, 45 ff.; 1890, 125. J. F. STENNING.

ENROLMENT.—See QUIRINIUS.

ENSAMPLE.—This is the tr. in AV of *τύπος*, 1 Co 10¹¹, Ph 3¹⁷, 1 Th 1⁷, 2 Th 3⁹, 1 P 5³; and of *ὑπόδειγμα*, 2 P 2⁶; while 'example' is the tr. of *τύπος*, 1 Co 10⁶, 1 Ti 4¹²; of *ὑπόδειγμα*, Jn 13¹⁵, He 4¹¹ 8⁵, Ja 5¹⁰; of *δειγμα*, Jude⁷; of the vb. *παράδειγμα* τίσω ('make a public example'), Mt 1¹⁹; and of *ὑπογραμμός*, 1 P 2²¹. Both forms have the same meaning, and in AV they are always synonymous with 'pattern' or 'model.' Thus in He 8⁵ *ὑπόδειγμα* is tr^d 'example,' and *τύπος* 'pattern,' after Tindale's 'ensample' and 'patrone,' though in both places Wyclif has 'saumpler,' Gen. (1560) 'paterne,' Rhem. 'exampler.' But the pattern may be either for imitation or avoidance. In mod. Eng. wherever 'ensample' is used, it has a biblical flavour, and suggests a good example. Hence RV retains 'ensample' in Ph 3¹⁷, 1 Th 1⁷, 2 Th 3⁹, 1 P 5³, but gives 'example' in 1 Co 10¹¹, 2 P 2⁶.

'Ensouple' seems to be an Eng. spelling. The Lat. *exemplum* appears in old Fr. as *essample*; this becomes in Eng. 'assuple,' of which *Oxf. Eng. Dict.* quotes a single instance (but it may be noticed that Wyc. has the *u* always, 'ensample'). Then 'assuple' becomes 'ensample.' Skeat quotes an old Fr. tr. of Ru 4¹¹ 'que ele soit ensample de vertu,' evidently after Vulg. 'ut sit exemplum virtutis' (cf. Cov. 'that she may be an ensample of vertue'). But *Oxf. Eng. Dict.* rejects this French spelling, and reckons 'ensample' only English. The earliest instance of 'example' that has been found is dated 1447 (though there is a various reading 'exsample' in the Wycliffe version of 1382 at Jude⁷), while 'ensample' is found as early as 1250. And 'ensample' is most common by far till it began to be fashionable to spell Eng. words after their Lat. originals. Tindale has 'ensample' (though he spells it thrice 'insample') in all the passages given above; and he is followed by all the Eng. VSS till the Rhemish.

J. HASTINGS.

EN-SHEMESH (עִשְׁמֶשׁ), 'sun-spring,' Jos 15⁷ 18¹⁷.—A spring E. of En-rogel, on the way to Jericho. It is believed to be the spring on the Jericho road, E. of Olivet, generally known as the 'apostles' fountain' (*Ain Hôd*). See *SWP* vol. iii. sheet xvii.; also Tristram, *Land of Israel*, 196; *PEFSt*, 1874, 70; and Dillmann on Jos 15⁷.

C. R. CONDER.

ENSIGN.—See BANNER.

ENSUE.—Coverdale's tr. of Ps 34¹⁴ is 'Let him seke peace and ensue it'; and this was retained in the Bishops' Bible, and is now read in the Pr. Bk. But AV adopted the Douay word 'pursue.' In 1 P 3¹¹, however, which is a quot. of Ps 34¹⁴, AV accepted 'ensue,' which had come from Tindale, the Rhemish having here 'follow.' 'Ensue' is thus used with the unusual force of 'strive after' or 'pursue' (Gr. *διωξάτω*), as Caxton, *Cato*, 2b, 'Eschewe alle vyces and ensiewe vertue.' RV gives 'pursue.' As intrans. vb. 'ensue' is found in Jth 9⁵ 'the things . . . which ensued after' (so RV; Gr. *τὰ μετέπειτα*). We still use the word in dates, as 'the ensuing year.' J. HASTINGS.

EN-TAPPUAH (עִנְיָא) 'the spring of citron or apple'.—A place on the boundary of Manasseh (Jos 17⁷). It is mentioned between Michmethath, which is before (east of) Shechem, and the 'brook of Kanah.' Michmethath is generally (but see Dillm. *ad loc.*) identified with *Mukhna*, E. of *Nablus*, and the brook Kanah is *Wady Kānah*. Conder's identification of En-tappuah with a spring, near *Yāsuf*, in a valley to the S. of *Mukhna*, which drains into *Wady Kānah*, is accepted by most

authorities. The place is probably the Tappuah (which see) of Jos 16⁷ 17⁸. C. W. WILSON.

ENTREAT.—See INTREAT.

ENVY is a feeling of uneasiness or displeasure occasioned by beholding the prosperity or advantages enjoyed by others. Butler, in a note to the first of his *Sermons on Human Nature*, indicates it as the vice of that quality of soul of which Emulation is the corresponding virtue. The latter is that 'desire and hope of equality with, or superiority over, others, with whom we compare ourselves,' which not only may be free from any unworthy feeling towards them, but is obviously the very spring of human progress. The characteristic of Envy, on the other hand, is 'to desire the attainment of this equality or superiority by the particular means of others being brought down to our own level or below it.'

The scriptural use of the term is quite in accordance with this description of it, and of its relation to the emotion of which it is a perversion. Of the three words, one in OT and two in NT, of which it appears as a translation, only one, *φθόνος* (with its cognate verb *φθονέω*), has uniformly the evil signification. The difficult verse Ja 4⁵ 'Do you think that the Scripture saith in vain, The spirit that dwelleth in us lusteth to envy?' is scarcely an exception. If, as seems probable, having regard to the context, the rendering of the second clause given in RVm is correct—'That spirit which he made to dwell in us yearneth for us even unto jealous envy'—the phrase must be held as merely illustrating the intensity of the divine affection, which requires the exclusive devotion of its object, by a reference to the human passion of jealousy or envy. (See *Expos. Times*, viii. [1896] p. 76 f.)

The other two words, of which mention has been made, are *κῆρ* (noun *κῆρ*) in OT, and *ζῆλος* (verb *ζηλώω*) in NT; and of each of these words both meanings, the worthy and the unworthy, often appear. *κῆρ*, the original force of which is, apparently, *burning, glowing*, naturally denotes, in the first instance, intense emotion. It is used to express the indignation of Joshua (Nu 11²⁹), the zeal of Phinehas (Nu 25¹³), and the jealousy of Elijah (1 K 19¹⁰⁻¹⁴), as well as the envy of Rachel for her sister (Gn 30¹), of his brethren for Joseph (Gn 37¹¹), of the people for Moses (Ps 106¹⁶), or the mutual envy of Judah and Ephraim (Is 11¹⁵). In the Book of Proverbs the evil sense alone appears. Contrasted with 'a sound heart,' which is 'the life of the flesh,' Envy is 'the rottenness of the bones' (Pr 14³⁰); it is more formidable than wrath or anger, for 'who is able to stand before envy?'

The corresponding NT term is *ζῆλος*, in which the same variation of sense is found. In 1 Co 14¹ (RV) we read 'Desire earnestly spiritual gifts'; in Gal 4¹⁸ 'it is good to be zealously affected (RV 'sought') always in a good thing'; and in Rev 3¹⁹ the command 'Be zealous' is coupled with an admonition to repent. In like manner the 'zeal' of Jn 2¹⁷, Ro 10², 2 Co 7¹¹ 9², Ph 3⁸, Col 4³, the 'fervent mind' of 2 Co 7⁷, and the 'jealousy' of 2 Co 11², illustrate the commendable aspect of the emotion indicated. In lists of vices, on the other hand, such as those in Ro 1²⁹, 1 Ti 6⁴, envy has a conspicuous place. Trench, in *New Testament Synonyms*, points out that in the list given in Mk 7²¹⁻²² the place of *φθόνος* is taken by the circumlocution *ὀφθαλμὸς πονηρός*, 'an evil eye' (compare Mt 20¹⁵, also 1 S 18⁹ 'Saul eyed David'), which reminds us of the derivation of the Lat. *invidia*, Eng. 'envy,' from *invideo* 'to look closely at,' so 'to look maliciously.'

It may be noted that in the following passages, Job 5², Pr 27⁴, Ac 7⁹ 13¹⁵ 17⁷, Ro 13¹³, 1 Co 3³, 2 Co

12²⁰, Ja 3¹⁴. 16 RV substitutes 'jealousy,' or its cognates, for 'envy.'

For the difference between ἡλός and φθόνος see Trench, *Synon. of NT*, p. 83 ff., and art. ZEAL.

A. STEWART.

EPAENETUS (Ἐπαίνετος).—One of the Christians greeted by St. Paul at the end of the Ep. to the Romans (16⁹). He is mentioned at the beginning of the list immediately after Prisca and Aquila, is described as 'my beloved' (τὸν ἀγαπητὸν μου), and as the 'first fruits (ἀπαρχή) of Asia unto Christ' (the reading Achaia of TR is clearly wrong, being derived from 1 Co 16¹⁵). The name, which is Greek, is not uncommon, occurring in inscriptions both of Rome and Asia. One from the former place mentions an E. who was a native of Ephesus (*CIL* vi. 17171).

The mention of Prisca, Aquila, and E. forms the basis of the theory that Ro 16⁹⁻¹⁶ was addressed to the Church at Ephesus; but three names—two of them belonging to persons originally resident at Rome—out of a total of more than twenty, are not sufficient evidence for it. It was natural that the Christian body in the capital should consist largely at first of foreigners; and even one hundred years later, in the time of Justin Martyr, out of a body of seven Christians condemned to death in Rome, three are foreigners (*Acta Justinii*, § 4).

LITERATURE.—Renan, *St. Paul*, p. lxxv; Lightfoot, *Biblical Essays*, p. 301; Sanday and Headlam, *Romans*, p. 421.

A. C. HEADLAM.

EPAPHRAS (Ἐπαφρᾶς, a shortened form of Ἐπαφροδίτος; see EPAPHRODITUS) was a native of Colossæ (ὁ ἐξ ἑμῶν Col 4¹²), and as we learn from the correct reading of Col 1⁷ the founder of the Col. Church (καθὼς ἐμάθετε ἀπὸ Ἐπαφρᾶ, 'even as ye learned of Epaphras,' where the omission of καί (also) of TR makes Epaphras more than an accessory teacher). It is prob. that he was also the evangelist of the neighbouring towns of Laodicea and Hierapolis (Col 4¹²⁻¹³). He visited St. Paul during his first Rom. imprisonment, bringing him an encouraging report of the state of the Colossian Church (Col 1⁴⁻⁶), and for his zeal would seem to have been condemned to share the apostle's imprisonment (ὁ συναικμαλώσθης μου Philem²³), though the reference may be to spiritual rather than physical captivity (cf. Ro 16⁷, Col 4¹⁰). To him alone (except once Timothy, Ph 1⁷) does St. Paul apply the designation he uses several times of himself, 'a bond-servant of Jesus Christ' (δοῦλος Χριστοῦ Ἰησοῦ Col 4¹²); while the extent of his services is further proved by the description 'a faithful minister of Christ' (πιστὸς δίακονος τοῦ Χριστοῦ, Col 1⁷).

G. MILLIGAN.

EPAPHRODITUS (Ἐπαφροδίτος 'handsome' = Lat. 'venustus,' a common name in the Rom. period; see, e.g. Tacit. *Ann.* xv. 55; Suet. *Domit.* 14; Jos. *Life*, § 76), to be distinguished from Epaphras [which see], and known to us only from one or two allusions in the Ep. to the Philippians. From these we learn that he visited St. Paul during his first Roman imprisonment, bringing pecuniary aid to him from the Church at Philippi, and that instead of at once returning home he remained with the apostle in Rome, devoting himself to the ministry under his guidance (Ph 2²⁵⁻³⁰ 4⁰⁻¹⁸). The strain, however, was too great for him. He lost his health, and 'was sick nigh unto death'; but the danger passed. 'God had mercy on him,' says St. Paul, 'and not on him only, but on me also, that I might not have sorrow upon sorrow' (Ph 2²⁷). On his recovery E. was anxious to return to Philippi to quiet his friends' alarm on his behalf (Ph 2²⁰); and this St. Paul approved, making him at the same time the bearer of the Ep. to the Philippians. St. Paul's sense of E.'s services is marked by his description of him as 'my brother

and fellow-worker and fellow-soldier,' the three words being arranged in an ascending scale to denote 'common sympathy, common work, common danger and toil and suffering' (Lightfoot on Ph 2²⁰).

LITERATURE.—The *Comm.* on Ph 2²⁵, esp. Lightfoot, p. 61 ff., 122; Ellicott, p. 60; Moule, p. 79; and Vincent, pp. xxiii, 75. Also Thayer, *NT Lex. s. Ἐπαφρᾶς*; Winer, *RWB, s. Ἐπαφρᾶς*; and Beet in *Expositor*, 3rd Ser. ix. (1839) 64-75, 'Epaphroditus and the gift from Philippi.'

G. MILLIGAN.

EPHAH (ἔφα).—1. A son of Midian, descended from Abraham and Keturah (Gn 25⁴=1 Ch 1³³), the eponymous ancestor of an Arabian tribe whose identity is uncertain. This tribe appears in Is 60⁶ as engaged in the transport of gold and frankincense from Sheba. According to Frd. Delitzsch (*Paradies*, 304), and Schrader (*KAT²* 146 f., 613), followed by Hommel (*Anc. Heb. Trad.* 238 n.), 'Ephah' is properly 'Ayappa, the Khayappa Arabs of the time of Tiglath-pileser III. and Sargon (see further, Dillmann on Gn 25⁴). 2. A concubine of Caleb, 1 Ch 2⁴⁶. 3. A Judahite, son of Jaldai, 1 Ch 2⁴⁷. See GENEALOGY. J. A. SELBIE.

EPHAH.—See WEIGHTS AND MEASURES.

EPHAI, עֵפַי (Kerē), but **Ophai**, עֵפַי (Kethibh), Sept. Ἴωφέ, Ὠφή, described in Jer 40 (Gr. 47)⁸ as 'the Netophatite,' whose sons were amongst the 'captains of the forces' who joined Gedaliah at Mizpah, and were murdered along with him by Ishmael (Jer 41³).

J. A. SELBIE.

EPHER (עֶפֶר 'a [deer] calf').—1. The name of the second of the sons of Midian mentioned in Gn 25⁴, 1 Ch 1³³, and recorded as one of the descendants of Abraham by his wife Keturah (Gn 25³). For precarious attempts to identify this Epher with 'Ofr in Arabia (Wetzstein), with Appar-u mentioned in Assurbanipal's Inscriptions (Glaser), see the references in Dillmann. 2. The name of one of the sons of Ezrah, a branch of the family of Judah (1 Ch 4¹⁷). 3. The first of a group of five heads of fathers' houses belonging to the half tribe of Manasseh, who dwelt in the land between Bashan and Mt. Hermon (1 Ch 5²⁴).

H. E. RYLE.

EPHES - DAMMIM (עֶפְרַיִם דָּמִיִּם, 'Ἐφεριμέν, 'Ἀφειδορμειν).—The place in Judah where the Philistines were encamped at the time when David slew Goliath (1 S 17¹). The same name appears in 1 Ch 11¹³ as **Pas-Dammim**. The form עֶפְרַיִם דָּמִיִּם is strange and probably corrupt (see Driver, *Sam.* 292).

W. J. BEECHER.

EPHESIAN (Ἐφέσιος), an inhabitant of the city of Ephesus (which see), is a term used in Ac 19³⁵. 34. 35 21²⁹. The usage of St. Luke is more correct than that of Stephanus Byzant.; the latter gives Ἐφεσεῖς as the ethnic; but the coins and inscriptions show that in the local and universal usage Ἐφέσιος meant an inhabitant of the city, while Ἐφεσεῖς denoted a member of the tribe Ἐφεσεῖς, the first of the six tribes into which the E. population was divided (the other five were called Σεβαστή, Τήσιος, Καρχαῖοι, Εὐώνυμοι, Βευβυαῖοι, of which Σεβαστή was added in compliment to Augustus, the total number having previously been five). The term Ἐφέσιος is also applied in the Bezan and Philoxenian Syr. texts of Ac 20⁴ to Tychicus and Trophimus, where the true reading is 'Asians' (Ἀσιανοί, men of the province Asia). Trophimus was an E. (Ac 21²⁹); but we may fairly understand that St. Luke refrained from using that term about both Tychicus and Trophimus, on the ground that it was not strictly applicable to the former. The reason can hardly be that Tychicus belonged to some other city of Asia, for the usage in this verse leads the writer to state the city where each delegate was

a citizen; and we should expect that he would have mentioned Tychicus by the ethnic of his own city. Moreover, Tychicus probably inhabited Ephesus.* We may, then, perhaps conclude that Tychicus, though a resident (*incola*), did not possess the citizenship of Ephesus; and hence Ἐφέσιος, which strictly is restricted to citizens of Ephesus, could not properly be used about him. There were many families of residents who, for various reasons, were not enrolled in any of the tribes, and were therefore not entitled to be called citizens of Ephesus. The entry Ἀσία ἢ Ἐφεσος in a late Byzantine list of cities which had changed their names (published by Parthey, *Hieroclis Synecd. et Notitia*, p. 316; Burkhardt, *Hieroclis Synecd.* p. 68) cannot be relied on to justify the taking of Ἀσιανός in 20^a as a mere synonym for Ἐφέσιος: the document is not earlier than the 12th cent. (cf. the entries Κιλικία, Κολωνία, etc.), and affords no trustworthy evidence for the usage of the time of St. Luke. W. M. RAMSAY.

EPHESIANS, EPISTLE TO—

- i. Substance and purpose, as gathered
 - (a) From internal evidence.
 - (b) From a comparison with Colossians.
- ii. Authorship and Date, as gathered from
 - (a) Internal evidence.
 - (b) External tradition.
- iii. Destination.
- iv. Place of Composition.
- v. Doctrinal Importance.
- vi. Literature.

i. SUBSTANCE AND PURPOSE.—The questions of the authorship, date, and destination of this Epistle have been, and are still, so much disputed that it will be well to deal first with the subject-matter and the purpose which reveals itself on a close examination of that. The Ep. might be summed up in the words of the Anglican song (Lk 2¹⁴)—

δόξα ἐν ὑψίστοις Θεῷ καὶ ἐπὶ γῆς
εἰρήνη ἐν ἀνθρώποις εὐδοκίας.

Or, again, it might be described as an expression of thanksgiving that the Lord's prayer for His Church as embodied in Jn 17 was in process of fulfilment. For the writer's tone is eucharistic and his main theme is unity: he does not argue, he makes dogmatic statements; he blesses God for the great truths revealed in the Gospel; and calls upon his readers to rise to the high dignity of their calling; and, as he does so, there emerges a picture of the Church as the body predestined before the ages to unite Jew and Gentile together, which through ages yet to come has to exhibit before the universe the fulness of the Divine life, living the life of God, imitating God's character, wearing God's panoply, fighting God's battles, forgiving as God forgives, educating as God educates; and all this that it may fulfil the wider work whereby Christ is to be the centre of the universe. Two dangers seem to threaten it when the writer writes, —the danger lest it should slip back into the lower moral standard of the surrounding heathendom, and the danger of a want of unity between the Jewish and Gentile Christians. To meet these, the writer presents the ideal of a body predestined before all ages and to last to all ages, whose aim it is to make men holy and without blemish, and to unite all mankind in peace and love.

A fuller analysis will bear out these outlines.

1-3 DOCTRINAL.
11-2 greeting.

(a) 13-14. Thanksgiving to God for the blessings given to the whole Chr. Church. These blessings are represented as corresponding in spiritual form to the material blessings granted to

* We regard the Bezan and Syr. reading as founded on a good tradition (cf. 2 Ti 4¹²; Ramsay, *Church in Rom. Emp.* p. 154); while Blass and others consider it to originate from St. Luke himself.

the Jewish nation, especially as summed up in the year of Jubilee, and they are described in what may be called a hymn of three stanzas, ending with the same refrain; the three stanzas expressing the work of Father, Son, and Holy Spirit. For these blessings were (1) predestined by the Father, who chose us to be sons, holy and without blemish, before the foundation of the world, for the praise of the glory of His grace (14. 5).

(2) Communicated in Christ at the right moment, conveying redemption, forgiveness, knowledge of God's universal purpose for all creation, and inheritance among the saints—to the praise of His glory (16-11).

(3) Sealed first to the Jews (ἡμεῖς), then to the Gentiles (καὶ ὑμεῖς), by the Holy Spirit, as an earnest of the complete redemption which lies in the future—for the praise of His glory (12. 13).

(b) 115-19. Thanksgiving to God for the spiritual state of the readers, and a prayer to the Father of this glory that they may have a yet fuller knowledge of their privileges and of the power of God.

(c) 120-222. A dogmatic statement of this power of God, which has shown itself in a threefold way.

- (1) As exerted upon Christ Himself, granting Him
 - Resurrection from death (20).
 - Ascension to God's right hand (21).
 - Supremacy over the whole universe and Headship over the Church (22. 23).

(2) As exerted upon individuals, whether Gentile (21. 2) or Jew (23), granting them a similar threefold gift, viz. Resurrection from spiritual death (24).

Ascension with Christ to a spiritual sphere above the world (25).

The power to do good works and manifest God's grace through the coming ages (26-10).

- (3) As exerted upon the whole of Humanity.

The Gentiles who formerly were alienated from God have been brought nigh by the Cross; so that both Gentile and Jew have peace with God and peace with each other: they form one city, one family, one temple, built on the foundation of apostles and prophets, and the Gentiles are now being built into that (211-22).

(d) 31-19. Personal relations between the writer and his readers.

The writer, who emphasizes his authority to preach this great truth of God's choice of a universal Church intended to exhibit his richly-variegated wisdom to the universe (31-12), begs his readers not to be faint-hearted owing to his imprisonment (313), and once more prays for them to the Father, that they may have spiritual strength so that Christ may dwell in them in love and knowledge to understand the greatness of their privileges, so that the fulness of the Divine life may be exhibited through them (314-19).

(e) 320. 21. This section of the Ep. ends with a doxology, emphasizing the power of God manifested in man, and the eternal duty of praise to Him both in heaven and on earth.

4-6 HORTATORY.

A. An appeal to the whole Church

(1) To live a life worthy of the members of a Society whose essential characteristic is unity (41-16). (This is based on 112. 13 211-22; cf. also 425-52.)

An appeal for the moral qualities which preserve unity (41-3) is followed by a fuller description of the unity, as one of both form and spirit, and resting upon the unity of God (44-6); and a recognition of the variety of gifts, especially the ministry, given to the Church by the Risen Christ, the Lord of the whole universe, in order to produce unity and spiritual perfection and steadfastness in truth; so that the body may ever grow into closer union with its Head (47-16).

(2) To live a life different from the old evil Gentile life (417-24). (This is based on 17-9 21-10, cf. 53-21.)

A description of the old Gentile life as one of aimlessness, ignorance, impurity (417-19) is contrasted with

A description of the Christian life as implying renewal of intellect, righteousness, and holiness in conformity with God's standard (420-24).

(3) To cultivate certain particular virtues and avoid particular vices (425-52). The choice of these rises out of the two preceding paragraphs; they are either such virtues as make for unity and such vices as destroy it (so mainly 425-52, cf. the motives appealed to in 25. 27. 28. 29. 32), or such virtues as form the antithesis to the old Gentile life, either on the side of morality or of knowledge (so mainly 53-22; cf. the motives in 430 53 καὶ ὡς πρὸς ἀγαθόν, 5. 6. 15. 16. 18).

These virtues are—1. Truthfulness: based upon our close union with each other (425).

2. A right use of anger: based upon the harm which the devil may do (426).

3. Honest toil: based on the duty of helping others (427).

4. Pure conversation: based on the duty of helping those who hear (428), and the danger of grieving the indwelling Spirit (429).

5. Gentleness and forgiveness: based on God's forgiveness of us (431-32).

6. Love: based on Christ's love and self-sacrifice (51. 2).

7. Avoidance of all impurity and covetousness as unworthy of our consecration (53), and of all foolish jesting and talk, as excluding from the kingdom of Christ and of God (54-6), as sure to incur God's wrath (57), as inconsistent with the Christian life, which is one of light (58-14).

8. Wise use of opportunities: based upon the evil of the time (515. 16).

9. An intelligent understanding of God's will (5¹⁷).
10. Temperance in wine—perhaps especially at the Love-feasts (5¹⁸).

11. Fulness of spiritual joy and thankful praise of God—perhaps especially at the meetings for common worship (5¹⁹⁻²¹). This leads back through the thought of the common worship of the Church to the ideal of unity and subjection, and so forms a transition to

B. 5²³⁻⁶⁹. An appeal to various classes in the Church.

Wives exhorted to submission to their husbands (5²²)

Because of the relation of man to woman (5²³),

And the analogy of the Church's submission to Christ (5²⁴).

Husbands exhorted to love their wives (5²⁵)

Because of the analogy of Christ's love for His Church (5²⁵⁻²⁷

30-33),

And the closeness of the union between man and wife (5^{28, 29}).

Children exhorted to obey their parents

Because of the natural sense of right (6¹)

And God's commandment and promise (6²⁻⁴).

Parents exhorted to train their children patiently

Because of the analogy of God's training of His sons (6⁴).

Slaves exhorted to loyal obedience to their masters (6⁵⁻⁷)

Because of the impartiality of God's judgment (6⁸).

Masters to avoid threatening

Because of the thought of their own Master in heaven (6⁹).

(N.B.—This is no accidental digression, nor is it merely an attempt to lay down a new decalogue or moral code for Gentile Christians (Ewald), which should draw them nearer to the Jewish Christians by removing one of the great stumbling-blocks (Ac 15²⁰); but the writer takes a Christian household with all its members, and treats it as a type of the Church, in which the duties of subjection, love, obedience, forbearance, which are needed for the unity of the Church, may be first learned. Cf. 5^{24, 25-27} 6^{1, 4, 7, 9, 11} Ti 3². The thought of 3¹⁵ *πᾶσα κεντρία* is the link between the two.)

C. Addressed to the whole Church.

An exhortation to be true soldiers, to put on the full armour of God, that they may realize His strength and fight His battles (6^{10, 11}, cf. 1^{19, 22}).

Description of the seriousness of the conflict (6¹²).

Description of the armour, as complete (1³), as consisting of truth and righteousness (cf. 4²⁴), of peace (cf. 2¹⁵), and faith (cf. 1¹³), of God's saving grace (cf. 1^{13, 23}), of God's word of truth (cf. 4^{21, 5²⁶}), of prayer and watchfulness (6¹³⁻¹⁸). The choice of the weapons is partly motivated by the description of J's armour in Isaiah (59, etc.), partly by the virtues already emphasized in this Epistle, partly perhaps by the armour of the soldier to whom the writer is chained (2⁰).

A request for their prayer for himself (6^{19, 20}).

An account of the purpose of the mission of Titus (6^{21, 22}).

Final salutation, with prayer for peace, love, and faith, to those who have love for the Lord (6^{23, 24}).

The Ep. is thus marked by extraordinary unity of structure and interlacing of paragraph with paragraph, and the analysis shows that there is no sense of controversy on the surface of it; 2¹ hints at the controversial nicknames of the Jewish and Gentile struggle (*οἱ λεγόμενοι ἀκροβυστία ὑπὸ τῆς λεγομένης περιτομῆς*); 4¹⁴ and perhaps 4²¹ point to the danger of false teaching, but the allusions are vague. The purpose is to emphasize the moral and spiritual fulness of the Christian life (cf. *πληροῦν* and *πλήρωμα*, 1^{10, 23, 3¹⁹, 4^{10, 13}, 5¹⁸}), and the closeness of the union which binds Christians to Christ and to each other: cf. *ἐν Κυρίῳ* or *ἐν Χριστῷ* (Eph 30 times, Col 11); *ἐνότης* (4^{3, 13} here only); *ἀγάπη* and *ἀγαπᾶν* (19 times in Eph as compared with 16 in Ro and 1 Co); *εἰρήνη* (8 times Eph, 11 Ro, in no other Ep. oftener than 3); and the many compounds of *σύν*, emphasizing the 'with'-ness of Christians with Christ *συνκαθίσειν* (2⁶ only), *συνωσοποιεῖν* (2⁵ and Col 2¹³), *συνεγείρειν* (2⁶, Col 2^{12, 3¹}); or with each other, *συνκληρόνομος* (3⁶, Ro 7⁹), *συμβιβάσειν* (4¹⁶, Col 2¹⁹), *συμμέτοχος* (3^{9, 5⁷} only), *συμπολίτης* (2¹⁹ only), *συναρμολογεῖν* (2^{21, 4¹⁶} only), *σύνδεσμος* (4³, Col 2^{19, 3¹⁴}), *συνωκοδομεῖν* (2²² only), *σύσσωμος* (3⁶ only). The purpose of all this, too, lies beyond itself. The Church must be one, because a great conflict lies before it; the spiritual forces of evil are gathering, and it must be on its guard.

A comparison with Colossians will partly confirm, partly supplement this result. Whoever may be the author of this Ep., it is clear that there is a close relation between it and that. The salutations are almost identical: the structure of the Epistles is the same: the subjects are mainly the same, the need of knowledge is emphasized, and the relation of Christ to the universe and to the Church: the same moral virtues are inculcated; the laws of

family life are laid down in each; the same phrases and words recur; they are both conveyed by Tychicus (cf. Holtzmann, *Einleitung* p. 291, for exact details). But there are important differences; the personal element is strongly marked in Col (2^{1-4, 4¹⁰⁻¹⁷}) and almost absent here; the controversial tone (Col 2⁴⁻²³) is dropped; the stress there was on Christ's relation to the universe, here on His relation to the Church; there Christ was spoken of as the *πλήρωμα* of God, here the Church as the *πλήρωμα* of Christ and of God. Again, there are new points emphasized in this Ep.; the sense of the continuity of the Church throughout the ages (Eph 1³⁻¹⁴), the work of the Holy Spirit (12 times in Eph, 1 in Col), the unity of the Church (2^{11-22, 4⁴⁻⁶}), the analogy between family life and the Church (5^{22-6⁹}), the simile of the Christian armour (6¹⁰⁻¹⁸), are all additions in this Ep., or at best are expansions of very slight references there.

The points of similarity justify us in finding below the surface allusions to the Col. controversy. That arose from teaching which either grew simply out of Jewish soil, or perhaps was influenced by extraneous Oriental speculation (cf. Lightfoot, *Colossians*: 'The Colossian Heresy'; and Hort, *Judaistic Christianity*, pp. 116-129), laying great stress on a system of elaborate rules, termed a philosophy, and separating God from the material world by the introduction of the worship of angels. In answer to this the Ep. to the Col emphasized the cosmic work of Christ, and the need of a truer and higher wisdom, and of faith as the means of approach to God. This controversy is now in the background; but it is justifiable to fill out the vague allusions in such passages as 1^{9, 10, 21, 22, 8, 3¹⁰, 15, 19, 4¹⁰, 14, 21, 6¹²}, by the more detailed parallels in Col (cf. esp. Findlay in *Expositor's Bible*).

On the other hand, the points of dissimilarity which cover the larger part of the Ep. show that the stress of that controversy is absent here, and that other motives are prominent.

The purpose, then, is *primarily* to stir up the readers to a higher activity and a closer unity by reminding them of the ideal of the Church in God's eternal purposes; *secondarily*, to guard them against false teaching that was current at the time, tending to take a low view of the created world.

ii. AUTHORSHIP AND DATE.—Three possible alternatives are open to us: either the author is St. Paul, or some friend writing for him and with his knowledge, or some later writer assuming after St. Paul's death that he is justified in writing in his name. The second of these alternatives may be put aside; it is only another form of the first, as the Ep. would practically be St. Paul's and have all his authority. Now, as the third alternative is possible, we must eliminate at first from the discussion all that speaks of the exact situation in St. Paul's life; for on that alternative, that will be part of an imaginary situation. But, apart from this, we have a few indications of date and writer.

Date.—The *terminus a quo* is A.D. 58 or 59, the earliest date at which St. Paul could be described as having suffered a long imprisonment (3^{1-13, 4¹}) as the champion of the Gentiles.

The *terminus ad quem* is more doubtful. The Church organization implied is very slight; there is a ministry, both of apostles and prophets for the first foundation of Churches (2^{20, 3^{5, 4¹¹}), and of evangelists, shepherds and teachers for the building up of Churches once founded (4¹¹). There is stress laid on Baptism, perhaps an allusion to the profession at Baptism of faith in God, the Lord, and the Spirit (4^{4-6, 5²⁶}), perhaps also an allusion to a formula or hymn used at Baptism (5⁴). There is evidence of the growth of Christian hymnody (5^{14, 19, 3²⁰?}), and apparently of its use in the Love-feasts}

(cf. 5^{18, 19} with 1 Co 10²¹. Tert. *Apol.* 39). But this evidence is indeterminate; it might all be illustrated from 1 Co (6¹¹ 12^{4-7, 28} 14²⁶); while the absence of mention of ἐπισκοποι, πρεσβύτεροι, and διάκονοι is against a late date. The absence of the freer χαρισματα of 1 Co 12 is no objection, as they were esp. characteristic of the Corinthian Church, and as, even there, St. Paul discouraged them in comparison with the more fixed ministry.

The controversies referred to are again undecided. The attempt to see allusions to a developed 2nd cent. Gnosticism are now abandoned, for its technical words αἰῶνες, πλήρωμα, γενεαί are clearly used here in a less technical sense; again, possible allusions to a false Docetism in 4⁹ 5²¹ are too uncertain to build upon. On the doctrinal side there is nothing which may not be explained as falling within the 1st century. So with the struggle of parties within the Church. There is still a certain friction between the Jewish and Gentile Christians, and the danger is that the Gentiles may despise the Jewish Christians; they need reminding that they have been brought into a commonwealth which existed before (1¹² 2¹¹). Such a condition would have been possible even in the 2nd cent. (cf. Justin Martyr, *Trypho*, ch. 47); but it would also have been possible at any date after St. Paul's missionary work (cf. Ro 11¹⁸⁻²⁴), and the language used seems to imply that the readers belonged to the first generation of converts, who had themselves come over from paganism to Christianity (1¹³ 2^{2, 12} 4²⁰).

Again, the absence of any mention of the destruction of Jerus. possibly points to a date earlier than A.D. 70, and the absence of any clear allusion to any danger of persecution by the state (though that may be included in the dangers against which the Christian has to arm himself, 6¹²) is, when compared with 1 P, a strong indication of a date before A.D. 70 if St. Peter refers to the Neronian, before A.D. 80 if to the Flavian persecution. On internal grounds, therefore, A.D. 70 forms the most probable limit, though a date even in the 2nd cent. would be conceivable.

The use of the letter in other Christian literature supports an early date. By A.D. 150 it was known widely by Catholics and heretics, and treated by both as Scripture; for it was included in the Lat. and Syr. versions; its destination was discussed by Marcion (see below); it was used by the Ophites, Valentinians, and Basilideans, prob. by Basilides and Valentinus themselves, perhaps even commented upon by them (Westcott, *Canon*, 291, 295). It was included with the title 'to the Laodiceans' in Marcion's Canon (c. 140): a canon the existence of which implies a Church Canon, to which it was placed in opposition (Sanday, *BLP*, 19). In the years 95-150 we have probable reminiscences of its language in Clement, cf. xxxvi. with Eph 1¹⁸, xxxviii., σωζέσθω οὖν ὅλον τὸ σῶμα ἐν Χριστῷ Ἰησοῦ καὶ ὑποτασσέσθω ἕκαστος τῷ πλῆθει αὐτοῦ, with 5²¹⁻²³, xlvi. with 4⁴⁻⁶, lxiv. with 1⁴(?); in Ignatius, *ad Ephes.* i. 1 with Eph 1³ ff.; ix. and xv. with Eph 2²¹; xii. with 3⁴, Παύλου συμμύσται . . . ὃς ἐν πάσῃ ἐπιστόλῃ μνημονεύει ὑμῶν, possibly a direct reference to the letter (Smith, *DB*² p. 952 n; but see Lightfoot, *ad loc.*, and Hort, *Ro and Eph*, p. 113); *ad Polyc.* v. with 5²⁵.

In *The Two Ways*—the document which underlies the Didaché (iv. 10) and Ep. Barnabas (xix.) there seems a reminiscence of Eph 6⁹.

In Polycarp, *ad Phil.* ch. i. may be compared with Eph 2^{5, 8, 9}, and xii. with Eph 4²⁶. In Hermas, cf. *Mand.* iii. 4 and x. 2-5 with 4²⁰, and v. and xii. 5 with 4²⁶; *Similarity* ix. 13 with 4^{4, 5}.

Moreover, in nearly all these sub-apost. writings there is an advance in thought or church life. The stress on episcopacy, the development of Docetism, the elaboration of the metaphor of the Church as a

temple in the Ignatian letters; the stress on the threefold ministry and the more marked use of liturgical language in Clement of Rome; above all, the fuller working out into detail of the many similes in this Ep. in the Shepherd of Hermas, all seem to imply a later date. In this latter treatise, the phrase 'giving place to the devil' is elaborately drawn out in *Mand.* v. and xii. 5. The conception of the Church as existing through all ages is expanded in *Vis.* ii. 4; of the Church as a bride without spot or wrinkle in *Vis.* iii. 10-13; as a building in *Vis.* iii. 2, *Sim.* ix. 9; as resting upon the apostles as foundation in *Sim.* ix. 15. In each case the simile is at a later stage of development.

'It is all but certain on this evidence that the Epistle was in existence by A.D. 95, quite certain that it was in existence by about 15 years later, or conceivably a little more' (Hort, p. 118). But there is possibly other evidence to be drawn from NT. The points of comparison with the Synoptic Gospels (e.g. Lk 21³⁶ with Eph 6¹³, Mk 4¹¹ with Eph 3⁴, Mk 12¹⁰ with Eph 2²⁰, Mt 16¹⁸ with Eph 2^{20, 49}), or with the Acts (2³⁹ with Eph 2¹³, 2³³ with Eph 4⁸, 10³⁶ with Eph 2¹⁷), do not prove literary dependence nor go beyond parallels found in the earlier Epistles. [For details cf. Holtzmann, *Kritik*, pp. 248-255, but his analogies are often fanciful. For possible allusions to Agrapha of our Lord in 2^{16, 17} 3¹⁵ 4^{26, 27, 36} cf. Resch, *Agrapha*, p. 109.] There are striking similarities between the Ep. and the Fourth Gospel; e.g. the stress on χάρις, the use of πλήρωμα, the contrast between light and darkness, the continuity of the work of the Logos, the predestination of the disciples, the activities of the Holy Spirit, the purifying power of baptism and of the word. The most striking similarity in thought is with Jn 17, where almost every verse offers a parallel to this Ep.; e.g. ¹ the stress on God's fatherhood, ² the power over all flesh, ³ life identified with knowledge, ⁵ the pre-existent glory of Christ, ⁶ the revelation to a few, ¹⁰ Christ glorified in His disciples, ¹¹ the prayer for unity based on God's unity, ¹² Christ's joy fulfilled in His disciples, ¹⁴ the antagonism of the world, ¹⁵ the protection from the evil one, ¹⁷ sanctification by truth, ²¹ the unity of Christians as a means of promoting Christ's work, ²³ God's love for Christians like His love for Christ, ²⁴ God's love for Christ before the foundation of the world. So again between the Ep. and the Apoc. [e.g. the city with foundations, which are the twelve apostles (21¹⁴), the Church as a bride (21²), the prominence of the prophets (10⁷ 11¹⁸ 18²⁰): even more frequent are the points of contact with 1 P; e.g. 1 P 1² with Eph 1³⁻¹⁴, 1¹² with Eph 3¹⁰, 2⁴ with Eph 2²⁰, 2¹⁸⁻³⁷ with Eph 5²²⁻⁶⁹, 3¹⁹ with Eph 4⁹, 3²² with Eph 1²⁰.

It is doubtful whether in any case the amount of similarity is sufficient to prove literary dependence. The similarity with St. John is one mainly of thought. It is possible that the language of St. John was influenced by this Ep., but it is more probable that this Ep. was written by one who had heard of that great prayer of our Lord. May not St. Paul have heard it direct from St. John's lips, possibly at Jerus., when they met to discuss the terms of unity between Jew and Gentile in the one Church; or possibly at Rome, if, as Renan suggests, St. John had been there, or even was there when St. Paul was writing? In the case of 1 Peter there is a stronger probability of literary dependence; if so, and if we assume the priority of 1 Peter (but see Weiss, *Introd.* i. p. 355), we should have indication that our Ep. was in existence before A.D. 70 or 80—at least it proves that the tone of thought and phraseology is such as was possible and natural before that date.

Author.—The author must have been a Jewish Christian, proud of his Jewish privileges, steeped

in OT symbolism (1³⁻¹⁴ 6¹⁴⁻¹⁸). Further, he must have been an original thinker, able to trace out a philosophy of history through the ages, able to move in the mystical sphere of heavenly places, and yet able to pass thence into the lower region of simple daily duties and of family life. Lastly, he was one who cared that his writing should appear under the name and with all the authority of St. Paul. There is, then, a *prima facie* probability that it was St. Paul himself; and a detailed examination will bear this out.

(a) The structure of the Ep. is clearly Pauline. The commencement with words of thanksgiving (cf. Ro 13, 1 Co 14, 2 Co 13); the great statement of doctrine as the basis for moral exhortation (cf. Ro 13-8); the moral exhortation, introduced by *οὖν* (cf. Ro 12¹, Gal 5¹), and passing from the general to the particular (cf. Ro 12-15); the apparent digression on family life, which really proves to be an important illustration of the whole subject (cf. 1 Co 7¹⁷⁻²⁴ 9¹⁻¹⁰ 13, Ro 9-11), all find parallels in St. Paul.

(b) The main thoughts often show an advance on the earlier Epp., but it is an advance on a line already marked out. Thus the continuity of the Christian Church with the Jewish, as a part of God's eternal plan (13-14), finds parallels in Ro 9-11. 16²⁵⁻²⁷, Gal 4¹⁻⁴; the conception of Christ as the original source of creation and the restorer of its unity (1¹⁰), in 1 Co 8³, 2 Co 5¹⁸⁻¹⁹, Ro 8¹⁸⁻²³; the conception of the Church as the body of Christ, which receives His life and shows it forth to the universe, is an expansion of the germs in 1 Co 4⁹ 12²⁷; the unity of the Church is presupposed in the whole argument of 1 Co, where St. Paul is anxious to keep the customs and doctrines of the Corinthian Church in a line with those of all the Churches of the Saints (1 Co 12⁴⁷ 17¹¹ 11¹⁶ 15³⁻¹¹)—even the use of *ἐκκλησία* for the Church universal is probable in 1 Co 12¹⁰ 12²⁸ (?), 12²⁸; the stress laid on the Holy Spirit as the inspirer of the Church's life is analogous to 1 Co 12; the identification of the events of Christ's death and resurrection with those of the life of each Christian (2¹⁻¹⁰), to Ro 6 and 1 Co 15; the residence of sin in the *σάρξ* (2³), and its effect on intellect as well as will, to Ro 7; the universal sinfulness of Jew and Gentile alike as the basis of a universal redemption (2¹⁻⁴) is a summary of Ro 11⁸⁻²², cf. Gal 2¹⁵⁻²¹; the destruction of the barrier between Jew and Gentile (2¹¹⁻²²) is St. Paul's most favourite doctrine.

But it is urged that here the parts are changed: elsewhere St. Paul is the champion of the Gentile against Jewish narrowness; here he reminds Gentiles of the privileges of the Jews, and appears as the champion of Jewish Christians against Gentile exclusiveness. This is true, but the balance between the preponderance of Jew and Gentile might differ in each Church, or even at different moments in the history of one Church; and St. Paul was bent always, not on upholding one side, but on securing the rights of both within the Church. Further, this attitude on his part towards the Gentile Christians finds an exact parallel in Ro 11¹⁷⁻²⁴. Indeed the strongest argument for the Pauline authorship lies in the undesigned coincidences between Eph and the Ep. to the Romans. Both are of the nature of a general treatise; both are an attempt to show that Jew and Gentile are united by the work of Christ; both base this on the sinfulness of Jew and Gentile alike; both emphasize the privileges of the Jews; both build up a new morality, centring in love and made possible by the gift of the Spirit; both hint at the extension of Christ's work beyond man to the whole creation; both emphasize the eternal plan of God, hidden for ages, hinted at in prophetic writings and revealed at the due moment; both express the writer's amazement at the depths of the wisdom of God, and in each case the style rises into the beauty and cadence of a poem (Ro 3³¹⁻³⁹).

There are two points indeed which present a rather striking difference from the earlier Epistles. The thought of the quick return of the Lord is absent, and in its stead we have a vista of generations yet to come, through which the Church is to glorify God (3²¹). But it is conceivable that these generations are thought of by the writer as following the Lord's return; it is conceivable, in accord with this, that the struggle which lies before the Church (6¹²) is that which is to precede the coming of the Lord (cf. 2 Th 2⁸⁻¹²); and further, it is clear that St. Paul, when he wrote the Ep. to the Romans, had contemplated the possibility of some long period of Church history before the Lord's coming (Ro 11²⁵).

Once more, the high conception of family life is at first sight inconsistent with the preference for celibacy and discouragement of marriage in 1 Co 7. But that was written in the presence of a pressing necessity: even there St. Paul recognizes that both the celibate and the married have a gift from God; and as time went on and the Lord did not return, it became necessary to build up a true conception of marriage in the face of heathen laxity. It is as likely that St. Paul should organize family life as that he should organize church order, and this he had done from the first.

(c) The style is again admittedly Pauline up to a point. There are some twenty words peculiar to St. Paul in his earlier Epp.; others common to Eph with the Pastoral Epp. (cf. Holtzmann, *Kritik*, p. 257); there is the love of paradoxical antithesis (cf. 6¹⁵ 20); the play upon cognate words (4⁸⁻¹⁰ 5¹³ 14); the same free paraphrasing of OT (4⁸⁻¹¹, cf. Ro 10⁸⁻⁸); the same unacknowledged adaptation of OT language (1²² 2¹³⁻¹⁷ 4²⁵ 28 5² 6¹⁻⁴ 6¹⁴⁻¹⁸, cf. 1 Co 3¹⁰⁻¹⁵, 2 Co 3¹²⁻¹⁸). On the other hand the sentences are

less broken, rather more elaborate and complicated by parentheses; * but this applies mainly to the earlier part of the Ep., where we have great statements of doctrine rather than controversial arguments, so that it may be adequately explained as due to the quieter tone in which St. Paul was writing. So, too, of verbal differences; there is a large number of *ἄραξ λεγόμενα* (76), but not proportionately larger than in the other Epp. (for details cf. Von Soden, p. 87; Holtzmann, *Einführung*, p. 289). Some of them occur in quotations; the majority of them rise naturally out of the subject-matter of the Ep.; even where the application is different from that in the earlier Epp., e.g. in *οἰκονομία*, *πλήρωμα*, *καθάλι*, *θεμέλιον*, this, too, grows naturally out of the change of subject; and certainly there is no one word which St. Paul could not have used. The two that have been most objected to are the use of *ὁ διάβολος* (4²⁷ 6¹¹) and *οἱ ἄγιοι ἀπόστολοι* (3²). To the first it is objected that St. Paul elsewhere uses *ὁ σατανᾶς* or *ὁ πειράζων*; but St. Mt., St. Lk., St. Jn (Gosp. and Apoc.), the writer of 1 Ti, and St. Paul himself as reported by St. Luke in the Acts (13¹⁰ 26¹⁸), use both *ὁ διάβολος*; and *ὁ σατανᾶς*; and the stress on unity in this Ep. makes the use of *διάβολος*, i.e. the slanderer, more appropriate than *σατανᾶς*. Possibly, too, the word means here 'any human slanderer' (Zahn, *Einf.* 367). Again, the phrase 'the holy apostles' sounds like the ecclesiastical formula of a later generation looking back on its canonized founders; but, apart from the consideration that the reading is a little doubtful (cf. Smith, *DB*² pp. 956 and 964), the context shows that *ἄγιοι* refers to special consecration of the apostles and prophets as recipients of the new revelation, in contrast to the sons of men (cf. Rev 21¹⁴ and Lk 17⁰).

(d) The relation of the Ep. to that to the Col adds to the complexity of the problem. The extent of this has been brought out already, and the fuller details may be seen in Holtzmann, *Kritik der Epheser- und Kolosser-briefe*, cap. ii., or in Von Soden, pp. 94, 95. There is nothing exactly like the problem elsewhere in NT. The nearest parallels are the relation of the Synoptic Gospels to each other, or the relation of 2 Peter and Jude: in those cases the similarity is due partly to the use of common documents, partly to the deliberate use of the earlier writer by the later. In this case a somewhat similar theory has been propounded by Holtzmann; he holds that St. Paul himself wrote a short letter to the Col., that some later writer elaborated this into the Ep. to the Eph. and that the same writer, or another, subsequently composed our present Ep. to the Col., based upon the two preceding letters. Such a theory rests upon the fact that in some resemblances priority seems to be on the side of Eph. in others on the side of Col.; but such an argument is very subjective and precarious; it has not met with any acceptance, and may safely be set aside as too artificial (see Smith, *DB*² pp. 959, 960, for a fuller examination of it).

The more probable theory, then, is that of simultaneous authorship by one writer; and that such a similarity is not unworthy of St. Paul may be seen by comparing instances of similar though less marked resemblance between Ro and Gal (cf. Lightfoot, *Galatians*, Intro. cap. iii.), and between 1 Ti and Titus.

(e) The indications of the personal character of the writer are naturally few in so general an Ep.; yet such as they are, they are quite true to the character of St. Paul as revealed in the earlier letters. The spirit of thankfulness bursting out into doxologies (1³ 3²¹), the courteous recognition of good in his converts (1¹⁰), the prayerfulness for them (11⁸ 31¹⁴), the longing for their intercession (6¹⁸), the fondness for applying great principles to the details of daily life (5²⁸), the sense of his own personal unworthiness (a sense which has grown stronger with advancing years, but yet was destined to grow stronger still, 3⁸, cf. 1 Co 15⁹, 1 Ti 1¹⁵), combined with the bold appeal to his authority as based upon revelation and upon his sufferings for the truth (3¹ 4¹),—all these may indeed be the accidental outcome of borrowing from the early letters, but far more probably are they the natural outcome of the work of the same man.

There can, then, be little doubt that the writer is St. Paul. The alternative is a Jewish-Christian Paulinist, steeped in St. Paul's language, doctrine, and character, composing 'a mosaic out of the material of the Pauline Epistles' (Von Soden), giving a slightly wider scope to his conceptions of Christ and of the Church, emphasizing the universal character of the Church as a part of God's eternal purpose, 'in the spirit of the Fourth Gospel' (Hort, p. 126). It would be a tenable view that the writer was the author of the Fourth Gospel, writing in the name of St. Paul. But if our alternatives are limited so narrowly as this, the witness of the early Church may be regarded as absolutely decisive. We have seen how early the evidence is of the existence of the Ep., and evidence of existence is in this case evidence of

* There are scarcely any interrogatory sentences; one only in Eph, as compared with 88 in Ro 1-11, and 4 in Ro 12-16. (Sanday and Headlam, *International Commentary on the Romans*, the best discussion in English of the difference of style between Ro and Eph.)

belief in the Pauline authorship. The work is not anonymous (like the Fourth Gospel or the Ep. to the Hebrews); it has not merely a salutation easily separable from the Ep.; the claim to Pauline authorship is knit into the very fabric of the letter, and some of the earliest reminiscences of its language are of the parts which imply the authorship. It was, then, written by St. Paul himself.

iii. DESTINATION.—The readers to whom the letter was addressed were mainly Gentiles (1¹⁸ 2¹³ 3¹ 4¹⁷ 5⁸); but this does not, any more than Ro 11¹³, exclude the presence of some Jewish Christians. Indeed, 2¹³ seems to require the presence of Jewish Christians as forming a minority in the Church. St. Paul is laying down guidance to the Gentiles in their treatment of the Jewish Christians. Hence some commentators have treated the Ep. as a general encyclical to all Gentile converts throughout the world.

But there are personal bonds between him and them; he has had recent news of their faith and love (1¹⁵); they have heard of his imprisonment and are sad at heart about it (3¹³), and are anxious as to the issue of it (6²¹); they seem acquainted with Tychicus (6²¹, 22); and they are distinguished from other Christians (1¹⁵ 3¹⁸ 6¹⁸). There is little doubt, then, that the destination must be localized. But in 1¹ the words ἐν Ἐφέσῳ are of very doubtful authority. They are absent in the first hand of A and B, and are marked as an interpolation in 67; but found in all other MSS. Further, Basil (*c. Eunom.* ii. 19) says that there was a tradition of their absence, and that he found them omitted in the *old* copies known to him. Again, the interpretation of τοῖς ὄσοι as 'those who have true life,' 'those who really are,'—an interpretation which presupposes the omission of the words,—is quoted by Basil as a traditional interpretation, and is found in Origen (*Cramer, Cat. ad loc.*), and is repeated by Victorinus Afer, Jerome, and Hilary. Further, Tertullian, in arguing against Marcion that the Ep. was addressed to the Eph., does not appeal to the salutation. It is, then, a fair inference that the words were absent from some copies in the 2nd cent., as it is a certainty that they were absent from many in the 3rd and 4th centuries.

The title πρὸς Ἐφεσούς gives us surer ground, and yet not quite sure. It is universally found in all MSS and versions, and all Church tradition has connected the Epistle with Ephesus. But Tertullian tells us that some heretics, and notably Marcion (*adv. Marc.* v. 11 and 17, cf. Epiphanius, *Hær.* 42), had a different title 'ad Laodiceanos': now this may have been a mere critical conjecture by Marcion, based upon the obvious likeness of this Ep. with the Col, and the indication of Col 4¹⁶ that there was a letter written to Laodicea at this time. If so, this at least implies the absence of ἐν Ἐφέσῳ from the copies: but it is equally probable that the alternative title is a real fact, and that the Ep. was originally sent to Laodicea.

Tradition, then, points to two Churches of Proconsular Asia, Ephesus and Laodicea, and internal evidence is consistent with this. As long as it was regarded as addressed only to Ephesus, the language of 1¹⁵ 3² 4²¹ and the absence of any special ref. to the circumstances of a Church in which St. Paul had spent three years, and on which he had been on the intimate terms implied in Ac 20, was a stumbling-block; but this difficulty entirely disappears on the theory that the letter was intended for several Churches.

That Ephesus was one of these Churches is practically certain; the unanimity of Church tradition in its favour is conclusive itself; but besides this the points of similarity with the speech to the elders of Ephesus (Ac 20¹⁹ ταπεινοφροσύνη (=4²), 24²⁸ the stress on χάρις; 27 δευρά (cf. 3¹), 27 βουλῆν

(cf. 1¹¹), 28 περιποιήσατο (cf. 1¹⁴), πομαίνεω (cf. ποιμένας 4¹¹), κληρονομίαν (cf. 1¹⁴, 18)); with the Gospel of St. John and esp. with the Prologue (see above), with the letter of Ignatius to the Eph. (see above); in a less marked degree with 1 Ti (*e.g.* 2³⁻⁷ 4⁴ the stress on the universality of creation and redemption; 3¹⁶ 5²¹ the appeal to the angels as witnessing the Christian life; 3⁵ the treatment of the family as a type of the Church),—all strongly confirm the tradition.

It may be added that the mention of Tychicus (cf. Ac 20⁴, 2 Ti 4¹²), the ref. to the power of the spirits of evil (cf. Ac 20¹³⁻¹⁹), the stress on the unity of Baptism (cf. Ac 20¹⁻⁷), all fall in with the same tradition, though too indeterminate in themselves to prove the destination.

The address to Laodicea is borne out by Col 2¹ 4¹³⁻¹⁶, which witness to St. Paul's anxiety for Laodicea at this moment, and show that he was writing at the same time a general letter—not necessarily addressed to Laodicea only, but one which could be obtained from Laodicea (τὴν ἐκ Λαοδικέας), and is quite consistent with Rev 3¹⁴⁻²², where the Church at Laodicea is rebuked for lukewarmness.

Nor is there any reason why the destination should be limited to these two Churches. Col 4¹³ suggests that it may also have been sent to Hierapolis, while the analogy of Rev 1-3 and 1 P 1¹ might lead us to infer that it was intended for all the Gentile converts of Proconsular Asia (cf. Ac 19¹⁰).

iv. PLACE OF COMPOSITION.—St. Paul was at the time a prisoner, suffering imprisonment on behalf of the Gentiles (3¹ 4¹), and an imprisonment lasting long enough to have caused anxiety to his converts (3¹³ 6²²). Hence the place must be either Cæsarea (Ac 24²⁷) or Rome (*ib.* 28³⁰). As between these two places this Ep. gives no guidance, save that the points of similarity with the Pastoral Epp. (cf. Salmon, *Introd.* cap. xx.) indicate the later date, and the tone of imperialism (see below) suits Rome better. But owing to the great similarity with Col we may certainly use any indications of date found there; and this is linked on by the personal allusions in it to the Ep. to Philemon (Col 4⁹⁻¹⁷ with Philem 22), so that indications there too may be used; again, the allusions to the imprisonment in Ph 1¹²⁻²⁵, make it probable that that too was written at the same place. Some commentators would place Ph at Cæsarea, the other three at Rome, but more probably all are to be placed at Rome; for the phrase ἐν δλω τῷ πραιτωρίῳ (Ph 1¹³), though applicable to Herod's prætorium at Cæsarea (Ac 23³⁵), is equally applicable to the prætorian soldiers or the Supreme Court at Rome; the phrase οἱ ἐκ τῆς Καισαροῦ οἰκίας (Ph 4²²) is more applicable to Rome; the state of feeling between Jewish and Gentile Christians as reflected in Ph 1¹⁵⁻²⁰ corresponds well with that implied in the Ep. to the Romans: the freedom for preaching which St. Paul enjoys, and the importance which he attaches to it (Ph 1¹², Eph 6²³), are more natural at Rome: the expectation of a speedy release (Philem 22) points the same way; and, although Cæsarea was nearer for a runaway slave from Colossæ, yet there were more frequent opportunities of communication with Rome, a greater chance of hiding, and an easier access there to St. Paul. Finally, the points of contact between all four Epp. and the Pastoral Epp. in phraseology, in stress on organized church and family life, and in Christology, all favour the later date. We place, then, all four Epp. at Rome. Of their relative order it is again impossible to speak with certainty; but most probably (so Lightfoot, *Phil.*; Hort, *Rom. and Eph.* p. 102; but see on the other side, Ramsay, *St. Paul the*

Traveller, p. 357) the Ep. to the Phil. stands by itself comparatively early in the Rom. imprisonment; for it offers more points of comparison in phraseology and doctrinal discussion with the earlier group; there is more discussion of the doctrine of justification by faith, more protest against the Judaizing Christians. On the other hand, Eph Col Philem form a group by themselves, written comparatively late in the imprisonment—with fewer points of contact with the earlier group, and with more agreement with the Pastoral Epistles. They may, then, be all placed about A.D. 63 at Rome.*

By that time St. Paul had been in prison for three or four years. That imprisonment had been incurred at Jerus. just at the moment when he had taken up the alms of the Gentile Churches to the Churches of Judæa; his anxiety about his reception by the brethren there (Ro 15²²) had been removed; he had been welcomed, misunderstandings had been smoothed over, he had shown his willingness to work with them (Ac 21¹⁷⁻²⁶). The unity between Jewish and Gentile Christians was assured. But an outburst of Jewish fanaticism, on the false charge that he had taken a Gentile Christian, an *Ephesian*, within the centre wall of partition in the temple precincts (cf. Eph 2¹⁴ τὸ μεστέριον), had led to his arrest; he had been kept two years at Cæsarea, thence on his own appeal had been transferred to Rome; on his way he had been marvellously protected from danger of shipwreck; he had been welcomed once more by the brethren at Rome on his arrival (Ac 28¹⁵), and since he had been in prison he had had freedom to preach and wonderful success in preaching. Naturally, then, one of his main thoughts was of God's overruling power, which could bring good out of apparent evil, and turn even imprisonment into the means of furthering His work (Ph 1², Eph 3¹³).

Further, he was now in Rome, the great centre of the empire, which he had for many years longed to see. He would look, with the eyes of a provincial, upon the centre of the world's administration; he would see a power, small at first, confined to one Italian town, growing by steady growth till it launched itself forth on the whole world, brought all nations under its subjection, opened its franchise freely to all, and allowed them to enjoy its privileges, yet still requiring its prætorian soldiers ready to defend its emperor or to move out against any enemies that might attack its borders; while as ultimate source of authority stood the one man, the Emperor, the head, the ruler, the court of appeal for the oppressed, set forward more and more even as an object of worship. At the same time St. Paul would hear more of the teaching of Seneca and of the great Stoic conception of a universal city, of which all men were citizens, and in which each true citizen rose above the limitations of place and of environment, and became independent, self-centred (*αὐτάρκης*), the master and not the slave of circumstances (cf. Lightfoot, *Phil.*, 'St. Paul and Seneca').

Naturally, then, his thoughts would dwell upon the new brotherhood of the Church, 'the kingdom of Christ and of God' (Eph 5⁵), 'the citizenship in the heavens' (Ph 1²⁷ 3²⁰, Eph 2¹⁹). That, too, had grown out of a small centre, and by a longer growth, for it had begun before the foundation of the world; that, too, had at the right moment launched itself on the world, and all divisions of race had been broken down in it; that, too, centred in its king, who had won his triumphs and given

gifts to his followers (4⁸, cf. 2 Co 2¹⁴), who himself was the source of peace (Eph 2¹⁴), who was the head of the body; that, too, had its enemies to conquer, and therefore needed its soldiers ever prepared to fight (Eph 2² 6¹⁰⁻¹⁷); but its citizenship was in heaven, its enemies were spiritual, the scene of battle was in the heavenly places; its aim was wider, for it had once more to bring to a unity (*ἀνακεφαλαιώσασθαι*, 'recapitulare,' Iren. *adv. Hær.* iii. 18; 'instaurare,' Vulg.; 'ad initium reciprocare,' Tertul. *Monog.* c. 5) the whole universe; as it was founded on all past history, so its rule was to embrace all future time (Eph 3²¹). Dead as well as living were its subjects (4⁹ (?)).

Such thoughts might of themselves almost account for the genesis of this Ep.; but a new turn was given to them by the arrival of Epaphras from Colossæ. He brought news of the development of teaching there tending to degrade the dignity of Christ, to substitute the worship of angels, to take low views of the material world, to lay an undue stress upon knowledge as the one method of access to Christ. At the same time he brought news of the neighbouring Churches of Proconsular Asia; their faith was sound, their love strong; but they were disheartened by the apostle's imprisonment, and, as in all Churches in Gentile cities, there was the danger lest the surrounding heathenism should draw them back, lest 'empty arguments' (*κέραι λόγοι*, Eph 5⁶) should lead them to treat immorality lightly and indifferently; and, as in all mixed Churches of Jews and Gentiles, there was the danger lest racial jealousy should destroy unity. With the special danger at Colossæ, St. Paul dealt in the Ep. to the Col; then he turned to the wider condition of the Asiatic Churches, with his thoughts perhaps mainly fixed on Ephesus, his favourite abode, the centre of Gentile Christendom in that neighbourhood. No longer associating Timothy with him (contrast Col 1¹, Ph 1¹), but speaking only in his own name, he writes what is rather an encyclical treatise, a Cath. Ep., than a mere letter (cf. Ro and 1 P). Dropping all tone of controversy, and with only side allusions to false teaching, he tries to win them to a higher standard by a picture of the ideal Church which had been growing in his mind. He had done something of the kind to the Romans before; but that was an elaborate argument trying to convince them that all needed redemption, and that it had been brought to all by the power of Christ. This is a statement that the redemption has come, and that it has come—for here he is writing to Orientals—as part of a divine wisdom, and leading men to a fuller knowledge (*ἐπιγνωσις*, cf. 1 Co 1²⁴ αὐτοῖς δὲ τοῖς κλητοῖς, 'Ιουδαίοις τε καὶ Ἑλλησι, Χριστὸν Θεοῦ δύναμιν [the theme of Romans] καὶ Θεοῦ σοφίαν [the theme of Ephesians]). He is anxious that they too (*καὶ ὑμεῖς*, 'you in the recesses of Provincial Asia as well as the brethren at Rome,' Hort) should know what is happening in his imprisonment, that it is bringing fresh glory to the Gentile Christians (3¹³); they need not be out of heart, for God is watching his fortunes with that same overruling power which has ordered all history. He it was—thanks be to Him—who eternally planned our redemption; who chose the Jews for special privileges and promises; who at the right moment revealed His Son and broke down the division between Jew and Gentile; who has now drawn both Jew and Gentile into one body; who raised Christ and made Him Head of the Church; who enabled individuals to do good works; who is now building up His Church and watching over His apostle. Therefore, you must lift up your hearts and minds; you must keep the unity which He has given; you must not be drawn back into the old impure aimless life; you must build up family life; and you must remember that

* Von Soden, while rejecting the Pauline authorship of Eph, hesitates between Rome and Asia Minor as the place of its composition.

round about you, as about the Jews of old or about the Rom. Empire now, there are enemies, spiritual enemies; you must be ready both for defence and for attack, for you have to fight God's battles, and to represent His cause and to illustrate His wisdom in the eyes of the angels. Peace, Love, and Faith: these are the graces which I ask for you.

Such was the substance of the letter: whether St. Paul inserted any address must be uncertain. Either he inserted *ἐν Ἐφέσῳ*, but as Tychicus was intended to leave it at other Churches too, other names were inserted by these Churches in their own copies, or more probably a blank was left from the first that Tychicus might fill it up with the name of each Church to which he read the letter; possibly, again, several copies may have been made at Rome for the different Churches, and carried by Tychicus. It is a legacy of peace left to the Church by Paul the aged, 'das Testament des greisen Apostels' (Jülicher); 'one of the divinest compositions of man' (Coleridge, *Table Talk*); *νοημάτων μετῆ ἡ ἐπιστολὴ ὑψηλῶν καὶ δογματῶν* (S. Chrys. *Comm.*); truth expressed 'sub specie gratiarum actionis' (Theod. Mops. on 1³). 'Though the vehement moods of the earlier contests have subsided, many parts of the Ep. glow with a steady white heat' (Hort, p. 153). It is a letter rising at times to the level of a poem, 'the Christian's 68th Psalm' * (Dr. Kay); 'ipso verborum tenore et quasi rhythmo canticum imitatur' (Bengel on 2¹⁴⁻¹⁸); 'der ganze erste Haupttheil (1-3) hat liturgischen Charakter und erscheint in seinen Höhepunkten wie einer jener *ἕμνοι* durch welche nach Col 3¹⁶, Eph 5¹⁹, die Christen sie belehren sollen' (Von Soden). When St. Paul wrote this letter, he was, as at Philippi, singing hymns in prison.

v. DOCTRINAL IMPORTANCE.—The doctrines implied in the whole group of the Epp. of the Captivity are well analyzed, and their relation to that of the previous Epp. drawn out, in B. Weiss, *Bibl. Theol.* part iii. § iii. Those which are most prominent in this particular Ep. are—

(a) *The Universal Fatherhood of God* (*πατήρ* applied to God eight times; in Ro only four times). While the unity of God's nature is the starting-point of the whole argument (4⁶), yet He is represented as the Father of the Lord Jesus Christ (1³), i.e. there is within the Godhead a relationship of Father and Son, there is a giving forth of life and love (1⁶ τῷ ἡγαπημένῳ), there is a social bond, so that every community, whether of angels or of men, is named after and reflects the fatherhood of God (3¹⁵ *πατὴρ* here only in St. Paul). He is in the widest and most absolute sense 'the Father' (2¹⁸ 3¹⁴ 5²⁰ 6²³); the Father of the glory manifested in men (1⁷); the Father of all (4⁶); the Father of us Christians (1²).

(b) *The Pre-existence of Christ*—and this not merely in relation to God, as elsewhere, but in relation to man, so that before the foundation of the world He contains within Himself ideal Humanity (1⁴), and men have only to grow up into that which He already is (4^{15, 16}); and also in relation to the whole universe which centred originally in Him, and is re-centred in Him by the Incarnation (1¹⁰ ἀνακεφαλαιώσασθαι, 2¹² 4¹⁸ ἀγγελουποιημένοι).

(c) *The Dignity of Human Nature*, as redeemed within the Church, lifted above this earthly sphere into the heavenlies, showing forth the attributes of God Himself to the world, and becoming a link for the whole creation (1²³ 2⁵ 3^{18, 19} 4⁸ [τῆς ζωῆς τοῦ Θεοῦ] 4³² 5¹ *μυηταὶ τοῦ Θεοῦ*, 6⁴ 6¹²).

(d) *The Continuity of all History* in the past

* Ps 68¹⁸ is quoted in 4⁸; there are other possible reminiscences of it; e.g. cf. Ps 5 with 5¹⁹; 10 with 1¹⁸; 17 with 2²²; 20 and 26 with 1³; 27 and 35 with 3^{21, 22}; 28 and 36 with 3¹⁶ 6¹⁰.

and in the future. Each *καιρὸς* is regarded as contributing its quota to the whole, until the whole complement of *καιροὶ* shall be complete (1¹⁰ τὸ πλήρωμα τῶν καιρῶν [cf. Mk 1¹⁵, Lk 21³¹] and 3¹¹).

(e) *The Essential Unity of the Church*, as based upon the unity of God, as an ideal already realized, yet needing to be secured (4³), and in a sense still future (4¹⁵); as practically begun by baptism (4⁵), and as secured by the gift of an organized ministry, whose purpose is to fit all Christians for the work of service (*πρὸς καταρτισμὸν τῶν ἀγίων εἰς ἔργον διακονίας*), to build up Church life until the complete unity is secured (4^{12, 13}).

(f) *The Insistence on Wisdom and Knowledge*, as an integral and necessary part of the true religious life. This truth, which St. Paul had first proclaimed in the centre of Gr. philosophy at Athens (Ac 17²², cf. Hort, *Hulsean Lect.* p. 62), is here more explicitly laid down in an epistle to Gentiles. The value of this insistence is all the more striking as addressed to converts who were inclined to give an apparently undue value to knowledge. The remedy for a little knowledge is more knowledge.

(g) *The Consecration of Family Life*. Family life is regulated in Col (3¹⁸⁻⁴): it is dignified in 1 P (2¹⁸⁻³) as a means whereby Christians may hope to attract heathens to the faith; but here it is lifted to a higher level still, as a type and nursery of Church life.

(h) *The Picture of the Christian as a Soldier*, and his life as a warfare, which finds its fullest expression here, has had a wonderful influence both on Christian history and on Christian literature, enriching the latter with poems and allegories such as the *Psychomachia* of Prudentius, and the *Pilgrim's Progress* and the *Taking of Mansoul* by Bunyan, and nerving many a Christian hero and martyr for his task.

vi. LITERATURE.—If we may see a literary dependence of 1 P and of the Apoc. upon our Ep., its importance must have been recognized at once, and it must have been at once known in Rome; the reminiscences found in the sub-apos. writers show a knowledge of it at least in Asia Minor and Italy. There is some evidence that it was commented upon by the Gnostics in the 2nd cent. Origen wrote three books upon it, large fragments of which are preserved in Cramer's *Catena*, vol. vi.; probably a much larger part is embodied in Jerome's *Commentary*. In the next cent. Ephraem the Syrian, Victorinus the African, Ambrosiaster, St. Chrysostom, and Severianus, and rather later Theodore of Mopsuestia, Theodoret, and Jerome, treated it in their general comm. on St. Paul's Epp. For an account of these comm. see Lightfoot, *Gal.* (pp. 217 ff.), and Swete's ed. of Theodore of Mopsuestia (vol. i. pp. lix-lixix). For later comm. cf. Meyer's *Comm.* (Introd.), or Macpherson, pp. 96-106.

St. Chrysostom remains still the best comm. for his combination of exegetical, doctrinal, and spiritual power, and for sympathy with the writer's mind and character. He wants exact treatment of exegetical difficulties, and is at times fanciful; but he seizes well the whole drift of a passage; he never avoids discussing a difficulty; he has a firm hold on doctrine, and is especially strong in the spiritual application of truth, dwelling on the contrast between virtue and vice; on the strength of the will, on the beauty of the Christian character in contrast to the unnaturalness and impotence of sin. Theodore of Mopsuestia is acute as an exegete, but has less spiritual insight; e.g. he explains all the blessings spoken of in the Ep. as referring to a future life.

Of mod. comm. Macpherson (Edinr. 1892) is full and useful, but not very stimulating; Elliott, Alford, Moule (Camb. Bible), Beet, are all good; Bishop Lightfoot's notes on 11-12 have been published posthumously (*Notes on the Epp. of St. Paul*, 1895). W. Schmidt in Meyer's *Comm. on NT*, and Von Soden in the *Handkommentar zum NT* (Freiburg, 1891), are excellent in exegesis.

For the doctrinal treatment of the Ep., Dale, *Lectures on Eph.*, and Findlay in *The Expos. Bible*, are equally good, though both fail to rise to the writer's conception of the Church. For devotional use, Bernardine of Picquigny, in Lat. or in Eng. (tr. by A. H. Fritchard, 1888), is most useful. The introductory questions are best dealt with by Pfäfflerer, *Paulinismus*, ii. pp. 162-193; Von Soden, *briefe supra*; and Holtzmann, *Kritik der Epheser- und Kolosser-briefe*, Leipzig, 1882, as against the Pauline authorship: on behalf of it, by Lightfoot, *Bibl. Essays*; Hort, *Prolegomena to the Ro. and Eph.* 1895; A. Robertson in Smith's *DB*; Weiss, *Introd. to NT*; Zahn, *Bibl. i.*

W. LOCK.

EPHESUS (*Ἐφέσος*) was the metropolis of the

Roman province of Asia (wh. see), and one of the three great cities of the East Mediterranean lands (along with Antioch in Syria and Alexandria in Egypt), a rank to which geographical and historical causes conspired to raise it. It was situated within 3 miles of the sea, on the river Cayster, which was navigable as far up as the city in the Rom. period. It stood at the entrance to one of the four river valleys that extend upwards and eastwards like long narrow clefts in the high plateau forming the main mass of Asia Minor; these valleys are separated by chains of mountains, which are really prolongations, like fingers, stretching out towards the W. from the main plateau. The roads connecting the western sea, the Ægean, with the central and eastern lands, must necessarily follow the lines of these four valleys; and near the mouth of each of them stood a Gr. city, in which the importance of the valley was centred. The four valleys are those of the river Caicus with the city Pergamus, of the Hermus with Smyrna, of the Cayster with E., and of the Mæander with Miletus. The four cities played a prominent part in the early history of Christianity in Asia Minor. The shorter courses of the Caicus and Cayster make their valleys unsuited for routes of communication with the far East; and natural circumstances make the road that leads up from the Hermus valley to the plateau too difficult. Hence the route up the Mæander to its junction with the Lycus, and thence up the Lycus by Laodicea (wh. see) towards Apamea, has been the great road of history, and was one of the chief avenues of intercourse, of commerce, and of advancing civilization and thought under the Rom. Empire. Now E., from the beginning, competed with Miletus as the seaport towards which the trade of that great road was attracted; for, owing to the configuration of the coast and of the valley, the line from the Lycus down the Mæander, and across the mountains by a pass only about 600 ft. high to E., is shorter by many miles than the line down the Mæander to Miletus. The superior energy and more thoroughly Gr. character of the people of Miletus, combined with their more advantageous harbour, gave them the advantage in earlier times; but under the later Gr. kings, and still more decisively under the Roman rule, E. had established itself in undisputed supremacy as the sea-end of the great eastern highway, while the silting up of the Mæander seems to have been permitted to interfere with the excellence of the harbour of Miletus. Thus E. became the great commercial centre for the whole country within, *i.e.* on the Roman side of, Mt. Taurus, as Strabo mentions (p. 641, cf. pp. 540, 663).

On the great line of communication between Rome and the East in general, E. was one of the knots where many side roads converged to feed the main route. From the N. and the S. coasting ships and land roads (Ac 19²¹ 20¹⁷, 1 Ti 1³, 2 Ti 4¹²) brought travellers to the city on their way to Rome, or carried away travellers and officials who were going from Rome to other parts of the province. Thus it was a regulation that the Rom. governors under the empire must land at E.; and the system of roads was such as to make the city the most easily accessible from all quarters of Asia. Hence it was naturally marked out as the centre where St. Paul should station himself in order to affect that great province; and from thence the new religion radiated over the whole of the province (Ac 19¹⁰), partly through the fact that great numbers of the provincials came to E. for various purposes (*e.g.* to trade, to see the great Rom. festivals and shows, to worship the great goddess, etc.), and heard the word, and carried it back to their homes, partly through special missions on

which, doubtless, St. Paul's helpers, like Timothy and others, were sent by him. Corinth was the next great knot on the way to Rome, and communication between E. and Corinth must have been very frequent. The ship that conveyed St. Paul to Jerus. from Corinth, doubtless a pilgrim ship carrying Jews to Jerus. expressly for the Passover, crossed first to E. (Ac 18¹⁰), and thence coasted round Asia Minor, and crossed, doubtless by the W. side of Cyprus, to the Syrian coast (as in Ac 21³). The same character, as a pilgrim ship, doubtless belonged to the ship by which St. Paul intended to sail from Corinth for the Passover four years later (Ac 20²); on board of such a ship Jewish fanaticism would have been specially strong, and the conspiracy which was dreaded by St. Paul's friends would have had every chance of being successful.

After St. Paul's work in Asia was ended, Timothy seems to have been stationed in E. for a time (1 Ti 1³), with general authority, extending probably over the whole province, as is implied throughout the first Epistle; and he was summoned thence by St. Paul to join him in Rome during his second imprisonment (2 Ti 4⁹); and John Mark must have been in Asia, perhaps in or at least near E., at that time, as Timothy was charged (4¹¹) to bring Mark with him to Rome. A wide acquaintance of Mark with the Asian Churches is implied in Col 4¹⁰, 1 P 5¹³; and on each of the journeys between Rome and Asia which are implied in these passages, he must have passed through Ephesus. The rank of the Ephesian Church in the province is attested further by its being named first in Rev 1¹¹ 2¹. It became the home of St. John in the latter part of the century; and a few incidents of his residence in E. are preserved by Eusebius. According to tradition, not merely Timothy and John, but also the Virgin Mary, were buried at Ephesus.*

The connexion of the Ephesian city harbour with the sea depended on the proper maintenance of the channel of the Cayster; but this was difficult, for the river, which drains a valley of fertile alluvial soil, carried much silt in its water, and deposited this toward its mouth, as the current became weak. According to Strabo (p. 641), an ill-advised engineering scheme under the Pergamian king Attalus Philadelphus (B.C. 159-138), when a breakwater was built to narrow the entrance from the river, increased the tendency to silt up the mouth of the city harbour; and in A.D. 65 measures had to be taken by the governor of Asia to improve the connexion between the harbour and the sea (Tacit. Ann. xvi. 23). Either then or at some other time, an embankment, which can still be seen as one rides down from E. to the sea (see Weber, p. 52), was built along the lower course of the river, to help the action of the stream in sweeping the silt out towards the sea. The harbour of E. was maintained, apparently, under the Rom. Empire; but in later centuries the care and energy needed for so great a task failed, the harbour became a mere marsh, and with it E. necessarily decayed, as its qualifications for being the sea-end of the great highway had ceased. Even in the time of St. Paul,

* As to the supposed connexion of St. Luke with E., no ancient evidence for it exists (but rather only contrary evidence); in Ac there is nothing to suggest personal knowledge of the city on the part of the author; and the so-called 'Tomb of St. Luke' is the creation of a mere error on the part of Mr. J. T. Wood, who mistook a rude cross, incised in later times on the marble door of an old Gr. *polyandron* or family tomb, for a proof of the Christian origin of the monument, imagining that the figure of a bull (a Gr. ornament) which was sculptured on it was the symbol of St. Luke, and completing his delusion by the false belief that the modern name Ayassaluk (on which see below) was derived from Ἄγιος Λουκάς. Yet from his idea there has been developed a modern legend; and in recent years there has been some attempt to institute a ceremonial at this false 'tomb of St. Luke.'

it was somewhat troublesome to ascend the channel to the harbour; and ships which were trading between the N. Aegean ports and Syria, avoided E., unless the exigencies of loading or discharging freight required them to enter the harbour (Ac 20¹⁶).

While the road up the Cayster valley towards the East was too difficult to be a commercial route, it afforded decidedly the shorter path from E. to Pisidian Antioch and the East in general; and naturally foot-passengers, to whom precipitous descents caused no difficulty, would prefer that road to the longer but more level route by Apamea and Laodicea. The Cayster route leads over higher ground than the other, and does not descend into the low coast valley till it comes nearer E.; and this also would make it preferable in the summer. Hence St. Paul, journeying from Pisidian Antioch to E., preferred the Cayster route, and traversed the higher-lying districts (τὰ ἀνωτερικὰ μέρη, Ac 19¹);* and the statement of Ac on this point is confirmed by Col 2¹, which shows that the apostle had never visited Colosse or Laodicea (which were situated on the great highway). He had doubtless entered on the same path in his second journey, when, after revisiting Derbe, Lystra, Iconium, and Antioch, he advanced into Asia, but found himself 'forbidden of the Holy Ghost to preach the word in Asia' (Ac 16⁹).

The lower end of the Cayster valley is divided from the middle valley (called the Caystrian plain) by the projection of the bounding mountain ranges, for Mt. Galleus on the N. stretches down towards the S., as if trying to reach across the valley to Mt. Messogis (the part of which overlooking E. was called Pactyas), and forces the Cayster to wind southward, when it is coming near the sealevel. Below this narrow pass, the valley opens again to form a low marshy plain, raised very little above the sea, from which the hills spring very sharply, as Mt. Coressus, the outermost peak of Pactyas, overhanging the site of E., extends in a long sharp ridge westward towards the sea; and the Cayster turns again sharply to the W. through this 13 miles long plain to the sea. In the open plain, about 5 miles from the sea, on the S. side of the river, stands a little hill, close on the W., above the modern railway station; this hill has always been the religious centre of the valley; below its S.W. slope stood the sacred precinct of the Asian goddess, who was identified by the Greeks with their own Artemis (see DIANA); on the hill Justinian built one of his greatest ecclesiastical foundations,† the church (whose ruins, projecting out of the hill, can still be traced) dedicated to St. John the Evangelist (ὁ ἅγιος θεολόγος, from whom the hill and the little village beside it is still called Ayo-solúk or Ayas-salúk, i.e. Ayo-thológ); and between the two was built a fine mosque, formerly one of the most exquisite monuments of late Arab. Pers. art, now seriously dilapidated (founded probably by one of the Seljuk princes, who reigned and coined money with Lat. inscription ‡ at Ayo-solúk). Round this religious centre the earliest and the latest inhabitants have congregated; whereas, in opposition to the religious foundation, the Gr. colonists built the city of E., at a distance of 1 to 2 miles S.W., partly on the slope of Coressus, partly on the low ground at its foot, and

partly on a low isolated hill, called Pion or Prion (about 500 ft.), which rises in the plain.

The history of E. turns, to a great extent, on the opposition between the Greeks, the party of progress and freedom and maritime enterprise, and the non-Gr. population, centred at the temple, and championed by the priesthood, the party of stagnation and ignorance and Asiatic submission. The Lydian conquest by Croesus for a time enslaved the city to the temple; the new foundation of E. by Lysimachus in B.C. 295 again redressed the balance;* but the proximity of the temple gave it always an immense power in the city. The city owed its pre-eminence in the province in part to the temple, for the temple was the greatest and most influential in Asia, and the city boasted of the title 'warden of the temple of Artemis' νεωκόρος τῆς Ἀρτέμιδος, Ac 19³⁵, lit. 'temple-sweeper,' in RV 'temple-keeper,' in AV 'worshipper.' The title 'Temple-Warden' is more commonly applied to E., and to many other Asian cities, as warden of a temple of the imperial cultus; in the time of St. Paul, E. was warden of one such temple, and later she became warden of two temples, and finally of three temples of the imperial religion (δῖς, τρις, νεωκόρος); and when the Eph. Neocate simply is mentioned, that is the sense in which it is ordinarily to be understood.† But the ref. to the Eph. Neocate of Artemis in Ac 19³⁵ is justified by an inscription of the 2nd cent., in which E. is said to be 'doubly temple-warden of the Emperors, and warden of Artemis' (δῖς νεωκόρος τῶν Σεβαστῶν καὶ νεωκόρος τῆς Ἀρτέμιδος, Wood, *Appendix Inscr.* vi. 6, p. 50); and coins of the 3rd cent. have the legend Ἐφεσίων τρις νεωκόρων καὶ τῆς Ἀρτέμιδος, i.e. 'triple temple-warden (of the emperors), and (temple-warden) ‡ of Artemis.' The festivals of the goddess were thronged by pilgrims and devotees from the Cayster valley and from the whole of Asia. The crowds which attended these festivals contributed greatly to the wealth of the city; many trades were mainly dependent on the pilgrims, who required entertainment, food, amusement, victims to sacrifice, offerings to dedicate, curiosities and images for worship to carry home.§ The order of events during St. Paul's long residence in E. of 2 years and 3 months (Ac 19^{8, 10}, called 3 years by the apostle himself, Ac 20³¹, in the usual ancient style of reckoning an intermediate period by the superior round number) illustrates in a striking way the relation of the priestly centre to the preaching of Christianity. At first there was no opposition; for new religions, which were often brought in from the east, had never been found prejudicial to the influence of Artemis and her priests. Then the missionaries were brought into collision with the practisers and votaries of magic; E. was one of the great centres of magical art, and a kind of magic formulæ,

* Even under the Delian confederacy it seems clear that the Eph. contribution of 6 to 7½ talents was paid only under compulsion (Head, p. 18), and the Gr. spirit was nearly dead. Lysimachus called his new city Arsinoe, after his wife, but this name lasted only a few years.

† The Eph. Neocate in the imperial cultus is first mentioned on coins of Nero; probably the ref. is to the *Augusteum*, a temple built in the precinct of Artemis to Rome and Augustus by the city E. (not by the *Commune Asiae*, see ASIA, ASIARCH) before B.C. 6 (Wood, *Appendix*, i. 1); Buchner, *de Neocoria*, p. 33, indeed considers that the reference is to a temple of Claudius, which he supposes to have been dedicated by the *Commune Asiae*, on account of aid given to the city by the emperor, Malalas, p. 246, ed. Bonn; but there is no evidence that such a temple ever existed. The second imperial neocate was granted under Hadrian, and the third under Caracalla. A decree of the Senate was required to grant this distinction (as Asia was a senatorial province).

‡ The phrase νεωκόρος νεωκόρος on the later coins refers to this same fact.

§ Artemis Ephesia was worshipped more widely by private persons than any other deity known to Pausanias (iv. 81. 3; cf. also Xen. *Anab.* v. 3. 4).

* In this sentence we speak only on the 'South Galatian' theory (Ramsay, *Church in Rom. Emp.* p. 931., esp. ed. 2 or later editions); those who hold the 'North Galatian' view may omit this sentence.

† It is briefly described by Procopius, *Edific.* v. 1, as equalling in size and magnificence Justinian's great foundation in Constantinople, the Church of the Holy Apostles. Justinian built it in place of an earlier church on the same site, dedicated to St. John.

‡ *Moneta quæ fit in theologo.* Several of these coins were among a find made in the soil, a little to the north of the temple, by Mr. Wood. The coins had been buried about 1370.

called Ephesian Letters (Ἐφέσια γράμματα), became famous;* the magicians were naturally soon arrayed in opposition to the religion which freed the human mind from such superstitions; but their discomfiture (Ac 19¹³⁻¹⁹) would not directly and immediately affect the priests and the temple. As time passed and the new religion became more powerful, it began to affect the worshippers, who did not need so many articles for dedication (ἀναθήματα), and ceased to purchase the small representations of the goddess in her shrine, which were produced in vast numbers and in various materials—silver, marble, and terra-cotta (see DIANA). Thus several trades were seriously affected, and the associated trades (τοὺς περὶ τὰ τοιαῦτα ἐργάτας, Ac 19²⁵), under the leadership of one of their wealthy merchants (who dealt in silver ‘shrines,’ and therefore needed more capital for his business in the precious metal), Demetrius, probably master of the guild for the year,† eager to defend their interests, raised a demonstration against the Christian preachers. It is clear that in the riot the Christians ran serious risk (19³¹), and that, even after (and also before) the riot, the passions and superstitions of the vulgar mob, having once been roused against the puritanic tendencies of the Christians, continued to be a serious danger to St. Paul (1 Co 15³² 16⁹, 2 Co 18¹⁰).

The early stages of the riot involve some reference to the topography of Ephesus. It is obvious that the inflammatory speech of Demetrius was delivered at a meeting of the associated trades, doubtless held in a building belonging to the guild (19²⁵). The text of the Bezan Codex explicitly states (what obviously must have occurred) that the assembled tradesmen and craftsmen then rushed out into the street (εἰς τὸ ἀγορῶν), and at last congregated in the theatre. The ruins of the theatre are on a large scale; and it has been calculated that the building could hold 24,000 people. It was situated on the western slope of Mount Flion, overlooking the city harbour (which is now a marsh).

It is an interesting and important point that the Asiarchs were friendly to St. Paul, and intervened to save him from adventuring himself in the crowd. They doubtless pointed out to him that his presence would still further enrage the excited crowd; that if the mob once proceeded to violence, they were more likely to extend their violence to his companions; and that the best course therefore was for St. Paul not to show himself at the moment. The attitude of the Asiarchs may be taken as a fair indication of the feeling entertained towards St. Paul by the educated and influential class in the city, and also of the attitude of the imperial administration, for they were officials of the province, not of the city; they were part of the Rom. imperial machinery. It is perhaps implied in Ac 19³¹ that they were present as a body or council in the city: this may be accounted for either by a festival which was in progress about the same time, or by the natural appropriateness of a provincial body or council meeting in the capital of the province. A council of the Asiarchs is probably referred to in an Apamean inscription (Ramsay, *Cities and Bishopsis of Phrygia*, li. No. 299).

In the narrative (Ac 19³²⁻⁴¹) allusions occur to the government of E., and also of the whole province of Asia. The Town-Clerk, or ‘Secretary of the City’ (γραμματεὺς), appears as an official of great authority; the assembly of the citizens (ἐκκλησία) is mentioned as the highest municipal authority; and the Roman courts (conventus, αἱ ἀγοραὶ, i.e. ἀγοραὶ δικαί) and proconsuls are declared to be the final judicial authority in case of any complaint against individuals. The government of the municipality of E., like that of the other great Asian cities, was lodged in the hands of two deliberative bodies, the Senate (βουλὴ) and the Assembly (ἐκκλησία, συνέλευσις). All power ultimately resided in the Assembly of the citizens; and in the old free Gr. city-constitution the Assembly had really held the reins of power, and exercised the final control over all the other departments of the government. But its meetings under the Rom. system tended to become mere formalities, at which the Bills sent to it by the Senate were merely approved; for the imperial government, which had abolished the powers of the popular assembly in Rome, naturally discouraged popular assemblies in the cities of the empire; when St. Paul, however, was at E., the Assembly was still, in name at least, the supreme and final authority in the city (Ac 19³⁹), where the last decision lay on matters that did not properly fall within the cognizance of the Rom. courts and

officers; and it is also regularly mentioned in the preamble to decrees, along with the Senate, as giving validity and authority to decrees which had been prepared by the Senate and submitted to it for its approval.* The Senate (βουλὴ) in the Asian cities was transformed by gradual steps from the old Gr. form of a body elected annually by the citizens, to the Rom. form of a body filled up by distinguished citizens (esp. all who had held any of the higher magistracies), retaining their seats for life. Concurrently with this change in its constitution, it encroached more and more on the powers of the Assembly. But at the same time another transforming process went on simultaneously, as the Rom. imperial authority encroached on the municipal privilege of self-administration; and in this transformation the Senate was made by slow steps a mere instrument of the Rom. imperial government.

The Secretary of the city (γραμματεὺς τῆς πόλεως, called also ὁ Ἐσείων γραμματεὺς, or γραμματεὺς τοῦ δήμου) was perhaps the most influential individual in the city. Mr. Hicks well says that ‘as the real vigour of the Assembly declined in the atmosphere of imperial rule, it was more and more left to the Secretary to arrange the business of the Assembly. Together with the Strategoi he drafted the decrees to be proposed.† He had the decrees engraved. He took charge of money left to the people of Ephesus.’ Further, it is clear that he acted as a channel of communication between the Rom. provincial administration and the municipality (e.g. in the inscription, Hicks, p. 154); and thus, as the Rom. central authority encroached on the municipality, the Secretary became more and more important. These facts explain the part played by this official in Ac 19³²⁻⁴¹, an incident which throws a clear light on this obscure subject, and is in perfect accord with all that we learn about it from other sources. He came forward as the agent of the municipal government, and calmed the mob by a skillful speech; he spoke of the close relation between the city and the temple, and the sacredness of the goddess, as universally acknowledged; he mentioned, as an obvious and familiar fact, that Paul and his associates had not been guilty of acts or words disrespectful to the goddess (see CHURCHES, ROBBERS OF); he pointed out that there was an established method of legal procedure, whereby they should seek redress for any injury of which they complained, but that persistence in their riotous conduct was criminal, and likely to call down severe punishment; and then he dismissed the assembly. His recognition of the meeting as an ἐκκλησία was important: he did so in order to shield it, so far as he could, from Roman censure.

The Secretary advised the concourse to disperse, and wait until the lawful Ecclesia (so AV, regular assembly RV) should meet, and settle anything further which they wished to bring before it. The old Gr. distinction between regular ordinary meetings on days agreed beforehand (νόμιμοι ἐκκλησίαι, Hicks, No. 481, l. 340) and extraordinary meetings, specially summoned, had been modified by the Rom. government in such a way that permission of the Rom. officials was required before a meeting of the Ecclesia could be legally held; and from this it resulted that no extraordinary Assembly could be summoned except by the Rom. officials themselves, who had the right to call the people together at any time.‡ Hence this suddenly convened meeting was not legal, and could not carry any business through; and, moreover, it might provoke inquiry from the Romans (who were always jealous of the right of free meeting), and even result in punishment (such as the prohibition for a time of all right of holding the Ecclesia); for, as the Secretary pointed out, the city could not justify it by pleading any cause for it.

In the city of E., then, there were three distinct powers, which were brought into contact or conflict in the 1st and 2nd cent.: the hierarchy of the temple, the government of the city, and the new religion preached by St. Paul. At first it is clear that there was no opposition on the part of the municipal government to Christianity. The Secretary of the city speaks for the government, and points out that the Christians have not been guilty of disrespect in act or word towards the established system, while the rioters have brought the city into danger of reprimand and punishment from the imperial rule. The whole tone is one of superiority to, and almost of contempt for, the superstitious vulgar, together with recognition of the right of St. Paul to preach, so long as he showed proper respect to the laws and institutions of the city. A convinced Christian, who was at the same time a man of affairs, could not have taken a line that was better calculated to put St. Paul in the right and the rioters in the wrong; and we shall probably not err in believing that the general tone of the educated officials and the priests of high rank at this time was one of perfect

* Perhaps an example of these *Ephesia Grammata* occurs on a coin of the imperial time, as Mr. Head suggests in his *Cat. Brit. Mus. (Ionia)*, p. 70.

† At E. the guilds of the Woolworkers (λανάνοι), the Surveyors (προμέτρηται), and the Workmen before the Gate (ἐργάται προκειμένοι πρὸς τὴν Πύλιν) are mentioned in inscriptions. A list of trade-guilds in the Asian cities is given by Oehler in *Eranoos Vindobonensis*, p. 276f.; cf. Liebenam, *Römische Veretnswesen*, p. 15f.

* It is best described by M. Lévy, *Revue des Études Grecques*, 1895, p. 203 ff.

† This implies that he sat on the board of the Strategoi as an assessor (or perhaps as a chairman).

‡ Lévy in *Revue des Études Grecques*, 1895, p. 216.

equanimity and general philosophic interest in the preaching of St. Paul, whereas the superstitious and vulgar mob were strongly opposed to him. This state of opinion lasted till near the end of the 1st century. But the violent feelings roused during the persecution of Domitian, combined with the realization on the part of the officials and the higher priesthood that the growing power of Christianity threatened the existing order of things, and would, if successful, sweep it away, led to a union among all the classes which were not opposed to the existing order, *i.e.* among all who were not Christians. We may confidently assume, also, that at first Christianity spread with great rapidity, and produced a neglect of the Eph. ritual similar to that which Pliny describes as having existed in Bithynia, until the measures carried out by him in A.D. 112 caused a revival of the pagan worship (*Epist. ad Trajan.* 95). A similar revival of paganism in E. about the same period is attested by ancient documents, as Canon Hicks was the first to recognize clearly. A great inscription, dating A.D. 104 (Hicks, No. 481, p. 135), contains a series of decrees honouring C. Vibius Salutaris, a Rom. citizen resident in E., who had presented to the goddess and the city government a number of statues, images, and moneys, and arranging for the acceptance and use of the gifts and for the institution of a new festival and procession which should unite and bind more closely together the sanctuary and the city of Artemis. From this time onwards the city began to boast more than before of its title of 'temple-guardian of Artemis' (*νεωκόπος Ἀρτέμιδος*); and the imperial government also allied itself with the religion of Artemis, for under Hadrian imperial silver coins bear the type and legend of DIANA EPHESIA, showing that the vindication of the goddess was accepted as a duty by the emperor as Pontifex Maximus (for Rom. coins could not bear the effigy and title of any but a Rom. deity). This agreement of the imperial government, the municipal authorities, the temple-hierarchy, and the superstitious mob of the city, lasted unbroken until Christianity triumphed. It is true that the text of a decree, passed by the Senate and Assembly of E. in A.D. 161, is commonly quoted 'as an involuntary confession of the decline of the Artemis-worship under the growing influence of the new faith,' and as an indication that the reaction visible in A.D. 104 had ceased. The text (Hicks, No. 482, p. 145), according to the usually accepted interpretation, states that 'the Eph. goddess, whose worship had hitherto been universally recognized, was now being dishonoured, not only in her own city (*ἐν τῇ ἐαυτῆς πατριδι ἀριμᾶται*), but also among Greeks and barbarians.' But, as has been urged in *Classical Rev.* 1893, p. 100, it is impossible to accept the idea that a decree in honour of the goddess had such an ill-omened introduction (for to ancient feeling it was profane and impious and dangerous to use such words); and probably there has been a slight error of the engraver, who wrote *δὲ* once instead of twice, thus reversing the meaning; the true text, then, states that Artemis is honoured in her own city and everywhere (*πατριδι διαριμᾶται*).*

The temple of Artemis at E. was one of the greatest and most famous architectural works known to the ancient world. The building which existed when St. Paul lived in E. was not the oldest temple. An earlier temple, containing columns dedicated by Croesus, king of Lydia, B.C. 560-539 (fragments of which are now exhibited in the Brit. Mus. containing parts of the king's dedicatory inscriptions—Hicks, p. 173, No. 518),

* In his *addenda*, Canon Hicks also is disposed to recognize an engraver's blunder.

but not finally completed until about B.C. 400, was burnt to the ground in B.C. 356, on the same night that Alexander the Great was born; and a vast temple, measuring, according to Pliny, 425 ft. by 220,* was built in its place with the help of contributions from the whole of Asia (*tota Asia exstruente*, Pliny, *Nat. Hist.* xvi. 40, 213; cf. Hicks, p. 174)—a fact which attests the veneration paid to the goddess by the whole province (Ac 19²⁷, see also *CIG*, No. 2954, and Hicks, p. 144, No. 482, on the reading of which see above). Owing to the marshy soil on which it stood, it required much care and contrivance to lay the foundations firmly (Pliny, *Nat. Hist.* xxxvi. 95). Possibly, the impressiveness of this great temple suggested to St. Paul the allegory in 1 Co 3¹⁰⁻¹⁷ (written from E.), and gave point to his words addressed to the Ephesians (2²⁰⁻²²); but it is unnecessary to suppose that on each occasion, when he refers to the ideas of foundation or building, as in 1 Ti 3¹⁵ 6¹⁹, 2 Ti 2¹⁹⁻²⁰, Ac 20³², he was thinking of this temple. The site of this temple was discovered by Mr. J. T. Wood in 1870, after many years' patient and laborious search; but, unfortunately, he has given no sufficient indications as to what remains of the building he found actually *in situ*, and has left no plan of the site as it was when he uncovered it. He merely gives his own restorations, and his own theories as to what the temple must have been when it was perfect; but his knowledge of Gr. architecture was not so thorough as to make his views trustworthy; and it is hardly possible now to acquire sufficient knowledge of the facts to form a clear conception of the building. Officials called *νεωποιοί* or *νεοποιοί* were charged 'to take care of the fabric and repairs of the temple, and to superintend any additions such as the setting up of inscriptions' (Hicks, p. 80).

There can be no doubt that the Temple of Ephesian Artemis was used as a place of deposit for treasure both by the city and by private individuals (as, *e.g.*, by Xenophon, *Anab.* v. 3. 4). This function strengthened the bonds that united the city and the temple. It is uncertain how the treasure deposited in the temple by the city was managed, but, as Canon Hicks says (p. 82), 'it is remarkable how little is said in the Ephesian inscriptions about any financial officers.' The temple and its precinct were inviolable: no arms might be borne within the sacred precinct (implying that in primitive times, when arms were commonly carried, the goddess provided that her worship should be a peaceful influence). The Rom. government, in A.D. 22, recognized the right of asylum that belonged to the soil of Artemis (Tacit. *Ann.* iii. 63); but the local limits of asylum varied widely at different periods.

The twelve disciples of the baptism of John whom St. Paul found at E. (Ac 19³) had possibly been converted by Apollos during his recent visit; though it is more probable that a small sect of Jews had emigrated to E., as a great centre of commerce and intercourse, soon after the coming of St. John. St. Paul, on his first brief visit, seems to have found the Jews in E. very well disposed towards the new teaching; and, though a rupture between him and them is recorded (Ac 19⁹), it is hardly described in such terms as to suggest that it was so serious as those that occurred in Corinth or Thessalonica. The existence of a Jewish colony at E. in B.C. 44 is vouched for by Jos. *Ant.* xiv. x. 12 (cf. xiv. x. 25, xvi. vi. 2 and 7), when Dolabella granted them religious freedom (esp. from engagements inconsistent with proper observance of the Sabbath) and exemption from military service. When Augustus afterwards confirmed the privileges of the Asian Jews, esp. guaranteeing them safe-conduct for transmission of their offerings to Jerus., he doubtless had E. prominent in his mind (Jos. *Ant.* xvi. vi. 2, cf. Ac 29⁶⁹). Jewish inscriptions at Eph. are published, Hicks, Nos. 676, 677. Some of these Jews appear to have made a practice of exorcism and magic, Ac 19¹⁴⁻¹⁶, like Bar-jesus at Paphos, Ac 13⁶ (see Scève). Similar practices were engaged in by the Jewish settlers at Thyatira (wh. see).

* According to Mr. Wood's measurements the temple itself measured 343 ft. by 164, and the stylobate or basement 418 ft. by 239.

When St. Paul broke with the Jews, he passed forth beyond the narrower circle which had come within the influence of the synagogue, and addressed the entire Eph. population. He was understood by the Ephesians to be the teacher of a new school of philosophy; and, agreeably to this view, he lectured daily in the school of Tyrannus (wh. see), just as other philosophers gave public lectures. In the Bezan Text there is added the statement that he taught from the 5th to the 10th hour. It is probable that this is correct, showing that St. Paul employed the hours when the building would no longer be in use; for the business in the Asian cities seems to have ended at the 5th hour (one hour before midday).* We may, then, picture Paul's life in Eph. as spent thus: he wrought 'night and day' with his hands, i.e. he started his craft before sunrise and continued at work through the earlier hours of the day (Ac 20³⁴, 1 Co 4¹², † 1 Th 2⁹); then, after the ordinary day's work was finished, he began to teach publicly in this building, and expounded his philosophy to all comers freely. These public lectures were, as we might naturally expect, supplemented by teaching in private houses (Ac 20²⁰).

The name *St. Paul's Prison*, which is applied to a Gr. tower forming part of the line of fortification along the ridge of Coressus, near its W. end, is purely fanciful. There is no record that St. Paul was imprisoned in E.; and, if he had been imprisoned, this tower is not the kind of place where he would have been immured. 'It is a two-storeyed fort with eight chambers, and the upper storey is reached by an external staircase' (Wilson, *Hand-book*, p. 99). There are some important Christian remains in the city, notably the double church near the gymnasium adjoining the theatre. This church is older than the great Basilica of St. John the Evangelist on the hill at Ayo-Solúk; and may well be the very church where the Council was held in A.D. 431. ‡ On the E. side of Mount Pion, overhanging the road that leads from the temple of Diana to the Magnesian Gate of the city, is a rock-hewn church, close to a cave in which the 'Seven Sleepers of E.' were, according to the legend, saved from the Rom. persecution by a slumber of some centuries' duration.

The actual foundation of a Christian community in E. may be ascribed to Priscilla and Aquila (wh. see), whom St. Paul left there at his first hurried visit (Ac 18¹⁹), and whom he found there on his return.

LITERATURE.—The vast mass of lit. about E. is to a great extent antiquated by recent works. The inscriptions, with the commentaries of Boeckh and Hicks, must form the foundation of all methodical study. On the topography, see esp. Weber, *Guide du Voyageur à Ephèse*, Smyrne, 1891 (excellent maps); also Sir C. Wilson, *Handbook to Asia Minor*, etc. (Murray) 1895; on the antiquities, Hicks, *Gr. Inscrip. of the Brit. Mus.* iii. p. 67 ff.; Menadier, *Qua condicione Ephesii usi sint*; Zimmermann, *Eph. im erst. christl. Jahrh.*; Lévy, in *Revue des Études Grecques*, 1895, p. 203 f., and subsequent artt., gives a careful and admirable study of the constitution of the Asian cities; and Ramsay, *Cities and Bishoprics of Phrygia*, ch. ii., gives a brief sketch of the same subject. Guhl's *Ephesiaca* is not wholly antiquated, and Falkener's *E. and the Temple of Diana* contains some things to reward study. Wood's *Discoveries at E.* is almost purely a popular book (except for the appendix of inscriptions, most of which are republished by Hicks, l.c.); and the scientific account of his discoveries, which doubtless he contemplated, was never published. The sketch of the history, esp. the early history, given by E. Curtius in 'Beiträge z. Ges. u. Topog. Kleinasiens' in *Abhandl. Akad.* Berlin, 1872 (repub. in his *Gesam. Abhandl.* i. 233-265), is singularly charming and instructive. Lightfoot's 'Discoveries illustrating the Acts of the Apostles' in *Contemp. Rev.* May 1873 (repub. as app. to his *Essays on Supernat. Rel.* p. 291 ff.), is useful; see also Ramsay, *Church in Rom. Emp.* pp. 112-156, and

St. Paul the Traveller, pp. 267-282. On the coinage, see Head's excellent *Hist. of the Coinage of E.* (which unfortunately ends with the Christian era, but may be completed from his 'Catalogue of the Gr. Coins in the Brit. Mus.' *Ionia*, pp. 70-115. On the great highway between E. and the East see G. Hirschfeld, 'Kalamai-Apameia-Kibotos,' in *Abhandl. Akad.*, Berlin, 1875; Ramsay, *Hist. Geog. of As. Min.* pp. 35-51. On the supposed 'tomb of St. Luke,' see Weber, Rylands, and Falkener, in *Trans. Soc. Bib. Arch.* vii. 1881, and Simpson, *ibid.* vi. p. 323.

W. M. RAMSAY.

EPHLAL (עֲפָלָל).—A descendant of Judah (1 Ch 2⁸⁷). See GENEALOGY.

EPHOD (עֲפֹד, אֲפֹד; ἑπωδὸς Ex, Lv, but ἐφόδ, ἐφόδδ, Jg and 1 S).—In treating of this term, which is apparently used in different meanings, it will be convenient to consider first the passages in which there is least doubt about the signification of the word.

1. The 'ephod' was a priestly garment made of white linen (רָגַל), and attached to the body by a girdle (קִמְצֵי). An ephod such as this was worn by Samuel as a temple-servant (1 S 2¹⁸), by the 85 priests belonging to the sanctuary at Nob, who were slain by Doeg (1 S 22¹⁸), and by David when he danced before the ark (2 S 6^{14b}; cf. 1 Ch 15^{27b}). The nature of this priestly garment is not further described; but it may be assumed to have been a simpler form of the more ornate garment of the same name described in P (Ex 28⁶⁻⁸, 27¹, 29⁵, 39²⁻⁵, 19¹, Lv 8⁷) among the vestments peculiar to the High Priest. This more ornate 'ephod' was, in a word, an ornamental kind of *waistcoat*. It consisted of an oblong piece of richly variegated material (blue, purple, scarlet, and fine twined linen, interwoven with gold thread, the 'work of the designer'), bound round the body under the arms, and reaching down as far (apparently) as the waist. The ephod was supported by two 'shoulder-pieces,' i.e. two flaps or straps attached to it behind, and passing over the shoulders to the front, where they were again fastened to the ephod: on the top of each of these shoulder-pieces was an onyx-stone, engraved with the names of six of the tribes of Israel. Round the body, the ephod was further held in its place by a band (הַשָּׂרָבֵת הָאֲדָמָה, i.e. prob. the 'ingenious work of the ephod' *), of the same material as the ephod, and woven in one piece with it, by which it was 'girt' (Lv 8⁷) round the waist. The ephod was worn over a blue frock, woven entirely of blue, and put on by being drawn over the head, something in the manner of a cassock (but without arms), called the 'robe' (הַכִּתְיָה) of the ephod. The skirt of this robe was adorned with a border of pomegranates in colours, with golden bells between them, the sound of which was to be heard whenever the High Priest was ministering in the Holy Place (Ex 28³¹⁻³⁵). On the front of the ephod was fastened the jewelled BREAST-PLATE, containing the pocket or pouch in which were put the Urim and Thummim, or sacred lots (Ex 28¹⁶, 29¹, Lv 8⁸). †

2. There is, however, a second group of passages in which 'ephod' has been supposed to denote, not a priestly garment, but some kind of idol or image. a. In Jg 8²⁶. Gideon is said to have made an 'ephod' of the gold rings ‡ taken from the Ishmaelites and Midianites, which he 'set'—or 'stood' (שָׁבַד, implying location somewhat more definitely than שָׂרָבֵת; see Gn 30³⁸ 43⁹, and of the

* According to others, 'the band of the ephod,' שָׂרָבֵת being supposed to be transposed from שָׂבָדָה. The verb שָׂבָדָה is, however (in connexion with dress), used only of binding on head-gear.

† It is possible that the ephod was of Egyptian origin. At least V. Annessi (*Annales de philos. chrétienne*, 1872, pp. 45, 47) gives illustrations from Lepsius, *Denkmäler*, iii. plates 22A, d, 274b (cf. 222h), of divine and royal personages having similarly a richly decorated garment round the body, supported by two shoulder-straps, fastened at the top by a gem, and secured round the waist by a girdle.

‡ 'It' in v. 27a refers naturally only to the 'gold' of v. 26a: the crescents, etc., of v. 26b do not seem to be included.

* See illustrations collected *Expositor*, March 1892, p. 223; *St. Paul the Traveller*, p. 271.

† This Epistle was written from Ephesus.

‡ The Council was held in E. (not outside the city) in τῆ ἀγία τῆ ἑκκλησίᾳ τῆ καλοῦμένης Μαρίας, as is stated in the *Acta*.

ark, 1 S 5², 2 S 6¹⁷)—in Ophrah. That this was an object of idolatrous worship seems plain from the comment of the later historian (v. 27), who states that 'all Israel went a whoring after it,' and that 'it became a snare to Gideon and to his house.' The amount of gold spent upon this ephod (1700 shekels = about 75 lbs. troy, which would be worth now some £3600) points also to something more than an ornamental vestment for a priest: indeed the ephod appears to be the chief object in the sanctuary.* b. In other passages also the ephod figures as part of the regular equipment of a sanctuary. In Jg 17^{4c}, 18¹⁴, 17, 18, 20, Micah provides for his private shrine in Ephraim a graven and molten image (*pesel* and *massékāh*),† and an ephod and teraphim; and in Hos 3⁴ the prophet speaks of a time when Israel should be left 'without king and prince, without sacrifice and pillar (*mazzēbāh*), and without ephod and teraphim.' The juxtaposition of ephod and teraphim in these passages is noticeable. The latter were idols (Gn 31¹⁹, cf. v. 30), apparently of human form (1 S 19¹³⁻¹⁶), and were used in divination (Ezk 21²¹ (28), Zec 10²; cf. Hab 2¹⁹); hence it is reasonable to conclude that the ephod was in some way associated with the teraphim in divination. It does not, however, follow that it was any kind of image: rather, as the teraphim were idols, the ephod will have been something different. c. In 1 S 21⁹ [Heb. 10] the sword of Goliath was preserved at Nob as a trophy, wrapped in a mantle 'behind the ephod,' which therefore would seem to have been something having a fixed place by the wall, but standing free from it. d. In the Books of Samuel, the ephod is several times mentioned as a means of ascertaining the will of J'; the verb used in connexion with it, when thus employed, is—not 'put on,' but—'bring near' (שָׁנַן 1 S 14¹⁸ LXX, † 23⁹ 30⁷, 7): the priest (whose privilege it is to possess it) is said to 'carry' or 'bear' it (שָׁנַן 1 S 23¹⁴, 18 LXX, §—not 'wear'); and Abiathar brings it down with him 'in his hand' to David in Ke'ila (1 S 23⁶). These passages seem to imply that the 'ephod' was something moved about or carried, rather than something worn as a garment. e. The derivative עֲפֹדָה—the same word which is used in connexion with the high priest's ephod in the phrase (Ex 28³⁹) 'the band of its attachment'—is used actually of some part of the metal plating of an idol in Is 30²² 'the silver overlaying (עֲפֹדָה) of thy graven images, and the gold attachment, or casing (עֲפֹדָה), of thy molten images.' On the strength of these passages, Wellhausen (*Hist.* 130 n.), summarizing the conclusions of Vatke (*Bibl. Theol.* 1835, pp. 267, 269), writes, 'Outside the Priestly Code, ephod is the image, ephod bad the priestly garment'—the term, when used in the latter sense, being thus distinguished by the addition of 'linen' (Stade, Kautzsch, Smend, Nowack, Benzinger).

The places in which *ephod bad* occurs are 1 S 21⁹ 22¹⁸, 2 S 6¹⁴; so that, taken strictly, the passages in which *ephod* denotes, upon this view, an image would be Jg 8, 17, 1, 1 S 22¹⁴ 14⁸ 21⁹ 23⁶, 9 30⁷, Hos 3⁴ (to which 1 S 14¹⁸ LXX must naturally be added); though Vatke excludes 1 S 14⁸, and Smend, Kittel, and Budde ('perhaps') exclude 1 S 23⁶ ('to bear the ephod before me'). It may, however, be doubted whether, the connexion being so similar (esp. in the Sam. passages,—though 1 S 22¹⁸ is, no doubt, later than the rest), the term must not be understood throughout in the same sense.

* It is argued (e.g. by Berth. *ad loc.*) that the money may have been used for defraying the entire cost of establishing the sanctuary; but the expression is distinctly 'made into an ephod'; and *set* (or *stood*) is hardly applicable to a movable priestly garment.

† In reality, it may be, only a *pesel*: see 1890.31, and cf. Moore, *Judges*, p. 375 f.

‡ Bring hither the ephod. For he bare the ephod at that time before Israel.

§ Read also by Klost. in 1 K 22⁶ ('ephod' for אָרֹן 'ark'). The same verb is used in 1 S 22¹⁸ of the 'linen' ephod.

The explanation of the passages quoted is possible, but not certain. (1) The difficulty that the same term should be used to denote both a priestly vestment and an image is not insuperable. The 'ephod' was essentially a *casing* round the body; and hence the same word might well have denoted the casing of precious metal, which (as was usual in ancient images) was spread over a wooden core (cf. Is 40¹⁹); the derivative עֲפֹדָה appears actually to be used in this sense in Is 30²² (quoted above): and a term denoting properly the decorated casing of an image, might easily have come gradually to be used for the entire figure. (2) It is true, שָׁנַן (to carry or bear) is not elsewhere used of garments, but only of shields, weapons, burdens, etc.: if, however, at the time to which Jg 17 f. and 1 S refer, the ephod worn by the principal priest at a sanctuary was in any sense a prototype of the later high priest's ephod, and had a pouch containing the sacred lots (cf. 1 S 14^{4c}, esp. v. 41 LXX [Urim and Thummim],—provided, at least, as seems a natural inference from what is stated on other similar occasions, and from v. 18 LXX 19. 36f., the ephod may be presumed to have been used in Saul's inquiry,—and 28⁶), it might be fairly described as 'carried' or 'borne,' and mentioned (in Jg 17 f., Hos 3, for instance) as a prominent and essential part of the priest's dress, without which the oracle could not be consulted. It is, however, strange that the same term שָׁנַן should be used also of the *linen* ephods of the priests at Nob.* (3) In 1 S 21⁹, as also in 14⁸, 18 LXX, 23⁶, 9 30⁷, the term does seem to denote something different from what it does in 22¹⁸: in 21⁹ the 'ephod' is spoken of in terms implying that there was but one at a sanctuary (here Nob);† and 14⁸, 18 (LXX) mention one as being, apparently *κατ' ἐξοχήν*, in the possession of the principal priest in Israel; whereas 85 priests, belonging to the same sanctuary as the one named in 21⁹, are said in 22¹⁸ to have borne linen ephods. The single ephod may, of course, have been the more elaborate ephod of the high priest (though this would hardly suit well in 21⁹); but for those who doubt whether the high priest's dress had yet acquired the ornate character described in P, the way is open for the inference that it was an oracular image.

On the whole, we can hardly be said to possess the *data* for deciding this controverted question with confidence. There is, however, a decided probability that, at least in Jg 8²⁷, the term 'ephod' is used of the gold casing of an oracular image. And if it has this meaning (in addition to that of a priestly linen waistcoat) in one passage, the presumption against its having the same second meaning in other passages is lessened, though, naturally, it is not proved that it has it actually.

The opinion that עֲפֹדָה denotes a plated image is adopted by Ges. (for Jg 8, 17 f., Hos 3); Studer, *Comm. on Jud.* (for Jg 8 only); Stade, *Gesch.* 466 (for Jg 8, 17, 1 S 21⁹: with regard to the 'ephod' in which the sacred lots were kept, he merely says, p. 471 bottom, that it is disputed whether it was an image, or the priestly vestment); cf. (for Jg 8) Ewald, *Alt.* 298 n.: generally for these and the other passages named (sometimes with the exception of 1 S 22¹⁸) by Vatke, *l.c.* (except 1 S 14⁸), Weilh. *l.c.*; Reuss, *Gesch. d. Heil. Schr. AT.* 1, §§ 102, 139;

* Smend, Nowack, and Benzinger explain the identity of name by the conjecture that originally the body of the image was dressed in an 'ephod' of linen, which was afterwards replaced by one of precious metal, while the ephod of linen became the priest's garment, and think consistently that 'bear the linen ephod' in 1 S 22¹⁸ is a survival from the time in which the expression was applied, as they consider it still is in 1 S 14⁸, 18 LXX, to carrying the oracular image. LXX omits 'linen' in 1 S 22¹⁸; but this does not seem to be right: as said above (No 3), the ephod of 22¹⁸ appears (upon grounds independent of the word 'linen') to have denoted something different from the ephod of 14⁸, 18 LXX, 23⁶, 9 30⁷.

† Whether this was the same ephod as that which was brought afterwards from Nob by Abiathar to David (23⁶, 9 30⁷), is uncertain; for in 23⁶ both MT and LXX have 'an ephod' (not 'the ephod').

Kuenen, *Höb. Lect.* 82 ('probably'); Kautzsch in Herzog's *PRE* 2, xvi. (1885), 229; Budde, *Richt. u. Sam.* 115 f.; Kittel, *Gesch.* ii. 174 n.; Smend, *AT Rel.-Gesch.* 41; Nowack, *Arch.* ii. 21 f.; Benzinger, *Arch.* 382; cf. W. R. Smith, *OTJC* 2, 241; G. A. Smith, *The XII Proph.* 23, 33; Dillm. *AT Theol.* 136, 153. See further Moore, *Judges*, 232, 379, 381, who adopts the same view without hesitation for Jg 8, and seems to prefer it for some of the other passages, but allows that they do not 'imperatively' require it, and that 'all that can with certainty be gathered from them is that the ephod was a portable object which was employed or manipulated by the priest in consulting the oracle' (p. 379). It has been opposed by Thenius on 1 S 21¹⁰; Bertheau, *Richter* 2, 164; Nowack on Hos 34 (in his *Comm.* of 1880); Riehm, *HWB*, s.v.; and especially by König, *Hauptprobleme*, 59-63 (who does not, however, appear to maintain more than that the view is not 'undoubtedly' correct).

The etymology of עִפְדֹּת is too uncertain to throw light on the meaning of the word. The Heb. verb עִפְדָה (Ex 29⁸, Lv 8⁷) seems to be a denominative. Lagarde (*Bildung der Nom.* 178; *Mittheil.* iv. 17) derived עִפְדָה from the root preserved in the Arab. *wafada*, to come as an envoy (to a ruler, etc.), supposing that *ephod* = 'approach' was abbreviated for '(garment of) approach (sc. to God),' and comparing Syr. *pedthā* (which would be another derivative of the same root), a long robe (oft. in Pesh. for עִפְדָה). But this etymology, though ingenious, cannot claim to be more than a conjecture. In usage, the word was probably felt to denote something *closely surrounding or encasing*.

S. R. DRIVER.

EPHOD (עִפְדָה).—Father of Hanniel, Manasseh's representative for dividing the land (Nu 34²³ P).

EPHPHATHA.—The word spoken by our Lord (acc. to St. Mark, 7³⁴) to a deaf and dumb man brought to Him on His return through Decapolis to the Sea of Galilee. It is the Ithpeel (or Ethpa'al) imperat. of an Aram. verb meaning 'to open'—the n of the prefix being assimilated to the foll. consonant; but as respects philological details the specialists are not agreed (see Dalman, *Gram. des jüdisch-paläst. Aramäisch*, p. 222 n.). The evangelist interprets it in Greek by the 2 pers. sing. 1 aor. pass. impv. 'Be (thou) opened.' The word was used in the Western rites of baptism (cf. Ambr. *de Myst.* 3).

J. H. THAYER.

EPHRAIM (עִפְרַיִם).—The name of a patriarch and tribe in Israel. E. was the second son of Joseph and Asenath, the daughter of Potiphera, priest of On, and was born in Egypt (Gn 41⁵⁰ff.). He was adopted, along with his elder brother Manasseh, by Jacob, who thus gave his favourite son Joseph two tribes among his descendants. At the ceremony of adoption (Gn 48¹³ff.) Jacob, in spite of Joseph's resistance, reversed the order of birth, gave E. the precedence over Manasseh, and prophesied that the younger should be the greater. In Jacob's testament (Gn 49) E. and M. are included under the name of Joseph, their future fortunes being conjoined. The tribe of E. is said (Nu 1³³) to have, at the Exodus, contributed 40,500 men to the army of Israel, a number reduced, presumably by war and privations, to 32,500 at the close of the wanderings in the desert (Nu 26³⁷). The value of these figures may be estimated by the fact that during the same period the warriors of Manasseh increased from 32,200 to 52,700 (Nu 1³⁵ 26³⁴).

Apart from this, however, there is sufficient evidence to show that, in the earliest period of Isr. history in Canaan, the tribe of Joseph, or of Rachel, was still undivided. It embraced not only E. and M., but Benjamin; and therefore we find Shimei the Benjamite regarding himself as a member of the house of Joseph (2 S 19²⁰). After Benjamin constituted a separate tribe, E. and M. still remained undistinguished for a considerable time; they formed together the house of Joseph in the more general sense; and this can alone explain their union for administrative purposes under Solomon (1 K 11²⁸). To what precise period we

should assign the subdivision of Joseph it is impossible to discover. All we can say is that it would naturally result from the ever-increasing extent of territory occupied by the tribe, and the emergence of different and conflicting interests in the separate regions of it.

E., like the other tribes of Israel (see ALLIANCE), was far from owing its territory entirely to force of arms (see TRIBE). Can. elements are found in its midst at a comparatively late date (Jos 16¹⁰), and Jg 5¹⁴, though very corrupt, may imply that the population was composed to some extent of Amalekites. The earliest settlement was in Mt. Ephraim, which was densely wooded. Hence when a complaint was made to Joshua that the territory assigned was too small for the tribe, he advised them to make clearances, and thus make good the defect (Jos 17¹⁴⁻¹⁸). From this point E. extended northwards over the wooded hill-country of Samaria to the borders of the plain of Jezreel. The boundary between E. and Manasseh is stated to have been the brook Kanah (Jos 16³), but this line of demarcation was not strictly observed. The S. limit was fixed at the two fortresses of Upper and Nether Beth-horon, on the borders of Benjamin. To the W. of these lay the territory of the Can. town of Gezer, received by Solomon on his marriage with the daughter of Pharaoh (1 K 9¹⁵⁻¹⁷).

The Ephraimites were the most powerful tribe in Israel, and their ambition and sense of superiority are continually in evidence in the history. Their later characteristics and conduct are foreshadowed in the Bk. of Jg. Here we find them attacking Gideon for going to war with the Midianites without summoning them to his aid; their resentment is allayed only with the greatest difficulty (Jg 8¹⁻³). In the same way they complain against Jephthah, and on this occasion they actually come to blows with their kinsmen, with the most disastrous consequences to themselves (Jg 12¹⁻⁶). But they not only aspire to leadership in war. Shiloh, the seat of the 'house of God' until the destruction of this sanctuary by the Philistines, is within their borders. Samuel still further adds to the prestige of the tribe from whose midst it was only natural that the kingmaker should arise, thus realizing the idea of monarchy in the land, if not among the people, of Jerubbaal and Abimelech. After Saul's death E. set up Ishbosheth, and instigated, or at least joined in, the opposition to David and the tribe of Judah (2 S 2⁹); but after the assassination of their prince they yielded to the force of circumstances, and gave in their adherence to David. The traditional jealousy of Judah was not, however, allayed. It can hardly be doubted that this had much to do with the initial success of Absalom's revolt, and it found expression after the failure of the conspiracy in a formal complaint (2 S 19⁴⁰⁻⁴³). The succession of Rehoboam to the throne furnished a favourable opportunity for a final attempt at obtaining independence. The first intimation of the meditated secession is stated to have come from Shiloh, the ancient headquarters of the priesthood and of the first kingmaker. The revolt was precipitated by the tyranny of Solomon and Rehoboam, and was consummated under the leadership of Jeroboam, who became the first ruler of the N. kingdom. From that date E. and Judah were irrevocably divided, and the history of the former tribe is merged in that of Israel. The capital, whether Shechem, Tirzah, or Samaria, was always situated in E., and the name of that tribe was constantly applied, especially by the prophets, to the whole kingdom. See ISRAEL.

Mount Ephraim occurs repeatedly in AV (Jos 17¹⁵ 19⁵⁰ 20⁷, Jg 2⁹ 3²⁷ etc., 32 times in all) as tr. of עִפְרַיִם הַר, which RV more correctly tr. 'the hill country of Ephraim.' It designates the mountain-

ous ridge in Central Palestine, stretching N. to S. from the Great Plain to the neighbourhood of Jerusalem, occupied by West Manasseh, Ephraim, and Benjamin. It had fruitful land on both slopes, especially the western (see Moore on Jg 3²⁷, Dillm. on Jos 16¹, and G. A. Smith, *HGHL* 325, 338).

LITERATURE.—Moore, *Judges*, 152, 205, 314 ff.; Budde, *Richt. u. Sam. (passim)*; Kittel, *Hist. of Heb.* (see Index).

J. MILLAR.

EPHRAIM (Ἐφραΐμ).—A town not mentioned in the Synoptic Gospels, nor in any other part of the NT except Jn 11⁵⁴. In that passage we are told that, in consequence of the plots formed by the rulers of the Jews after the raising of Lazarus, Jesus went from the neighbourhood of Jerus. and Bethany 'into the country near to the wilderness, into a city called Ephraim, and there he tarried with his disciples.' The 'wilderness' (ἡ ἔρημος) apparently means the grassy mountain lands near Jerus.; and Josephus (*Wars*, iv. ix. 9) mentions a small fort named Ephraim in the mountain district north of Judea, which he couples with Bethel. In 2 Ch 13¹⁹ we have Ephraim (עֶפְרַיִם) instead of Ephron (עֶפְרוֹן) suggested in the *Kerē* and RVm as the correct name of one of the towns taken by Abijah; and in this verse we again find it coupled with Bethel, if the suggestion be adopted. Lightfoot remarks that, whether the *Kerē* be the right reading or not, it shows that such a place existed just in the region where from St. John's account we should expect it to be. Robinson suggests that it is the same as *Ophra* mentioned in 1 S 13¹⁷, and enumerated by Joshua among the cities of Benjamin (Jos 18²⁸). He identifies it with a village now called et-Taiyibeh, situated on a conspicuous conical hill commanding a view over the valley of the Jordan and the Dead Sea (Robinson, i. 444). This site is a very probable one; it is 4 miles N.E. of Bethel, with which Ephraim is coupled both in 2 Ch and by Josephus; and it is about 14 miles from Jerusalem.

Ewald identifies it with the Ephraim in the neighbourhood of which Absalom's sheep farm was situated (2 S 13²⁸); but the Ephraim there referred to is differently spelled, beginning with *s*, whereas Ephraim of Benjamin begins with *y*. If Ewald is right in accepting as genuine the words which the LXX puts in the watchman's mouth in 2 S 13²⁴, and in interpreting them as referring to Beth-horon, this would in reality put a further difficulty in the way of the identification which he proposes; for this would indicate a site N.W. of Jerus., whereas et-Taiyibeh lies N.E. of the capital, and the neighbourhood of Bethel seems to show that Ephraim of Benjamin must have been in the same locality. Jerome describes it as being 'In tribu Juda, villa prægrandis, Ephræa nomine, contra septentrionem in vicesimo ab Ælia miliario.'

LITERATURE.—Robinson, *BRP* i. 444-447; Guérin, *Judée*, iii. 45-51; Ewald, *HI*, Eng. tr. iii. 172; Schürer, *HJP* i. i. 246; *PEFSt*, 1886, p. 57; Andrews, *Life of Our Lord*, 409-411; Smith, *HGHL* 352; Driver, *Sam.* 233. J. H. KENNEDY.

EPHRAIM, FOREST OF (עֵשֶׂר אֶפְרַיִם).—The scene of the battle between the forces of David and the followers of Absalom (2 S 18⁶). As 'the city' (18⁸) out of which David was to succour Joab, if needed, was Mahanaim (17²⁷), the battle must have been fought on the other side of a plain from that city (18²⁸). Though the site of Mahanaim has not been certainly determined, it must have been in Gilead (see MAHANAIM). The most probable site is *Mukh-nah* on the eastern side of the circular plain 'El-Bukeia.' Instead of Ἐφραΐμ of LXX, Luc. has Μαδων (= מַדוֹן). This is accepted by Klosterm., and Budde (in Haupt's *OT*) remarks that Mahanaim 'would be good, but is perhaps a guess.' עֵשֶׂר אֶפְרַיִם is 'unquestionably wrong' and could well be dispensed with, but

can hardly have originated 'out of nothing.' It has been suggested that the 'F. of E.' got its name from the battle recorded Jg 12¹⁴. It is more prob. that it was from a settlement of Ephraimites on the east of Jordan, an attempt to have a lot there as well as Manasseh, for the Ephraimites were from the first dissatisfied with their portion (Jos 17¹⁴⁻¹⁸). To this the obscure words of Jg 12⁴ may refer. See Smith, *HGHL* p. 335 n.2. A. HENDERSON.

EPHRAIM, GATE OF.—See JERUSALEM.

EPHRATHAH (עֶפְרַתָּה, LXX Ἐφραθά, AV wrongly *Ephratah*) in Ps 132⁵ is prob. not an ancient name of Bethlehem, but means the territory bordering on Judah and Benjamin, in which lay Kiriath-jearim, where the ark rested for a time, and where it is represented as being 'heard of,' found 'in the field of Jaar.' So Ges., Del., and see RVm. 2. A place near Bethel where Rachel died and was buried, Gn 35¹⁹ 48⁷ (in both of which passages 'the same is Bethlehem' is a gloss). 3. A name of Bethlehem, Ru 4¹¹, Mic 5². 4. The wife of Caleb (1 Ch 2⁵⁰ 4⁴, abbrev. in 1 Ch 2¹⁹ to *Ephrath*). See CALEB.

W. T. DAVISON.

EPHRATHITE (עֶפְרַתִּי).—1. A native of Bethlehem (Ru 1²). 2. An Ephraimite (Jg 12⁴, 1 S 1¹ [cf. Driver, *ad loc.*, and see art. SAMUEL], 1 K 11²⁶).

EPHRON (עֶפְרוֹן).—The son of Zohar the Hittite, from whom Abraham purchased the field or plot of ground over-against Mamre, in which was the cave of Machpelah (Gn 23). The purchase is described with great particularity; and the transactions between Ephron and Abraham are conducted with an elaborate courtesy characteristic of Oriental proceedings. Ephron received 400 shekels' weight of silver (23¹⁵); coined money apparently did not exist at that time. If we compare the sale of the site with other instances (Gn 33¹⁹, 1 K 16²⁴), Ephron seems to have made a good bargain.

The presence of Hittites in Palestine in the days of Abraham is noticeable. It is possible that Ephron belonged to a different group of Hittites from those who dwelt in Asia Minor. 'Indeed it seems probable that before either Canaanites or Aramæans appeared west of the Euphrates, the Hittites had settled throughout Syria, and the Amorites in Palestine. . . . It is also not without a special allusion to the distant past that the learned Ezekiel (16³, 4⁶) says of ancient Jerusalem, "the Amorite was thy father and thy mother a Hittite"' (McCurdy, *History, Prophecy, and Monuments*, vol. i. p. 196). See further under HITTITES.

H. E. RYLE.

EPHRON (עֶפְרוֹן), Jos 15⁹.—A mountain district, containing cities, on the border of Judah, between Nephthoah and Kiriath-jearim. The ridge W. of Bethlehem seems intended. 2. (Ἐφρών) 1 Mac 5⁴⁶⁻⁵², 2 Mac 12²⁷. A strong fortress in the W. part of Bashan between Ashteroth-karnaim and Bethshean. The site is unknown. 3. See EPHRAIM in preceding col. C. R. CONDER.

EPICUREANS (Ἐπικουρείοι).—We read in Ac 17¹⁸ that when St. Paul came to Athens 'certain of the Epicurean and Stoic philosophers encountered him.' Whether he discussed their tenets with them is not related, nor what they thought of him; for we need not refer to the two sects the unfavourable criticisms, that St. Paul was a babbler and a setter forth of strange gods.

Epicurus was born B.C. 342, and spent his early life in the Ionian Islands. In 307 he domiciled himself at Athens, and soon gathered round him a group of friends and pupils who never forsook him. Their meeting-place was a small garden and villa which he owned in the suburbs, and which he

afterwards bequeathed to the sect or 'thiasus.' He died in B.C. 270 of stone, the pain of which he bore with philosophic calmness.

The moral or ethical theory of Epicurus was suggested by that of his predecessor Aristippus of Cyrene, who formulated the human good or end of life as consisting in the pleasure of each moment. E. adopted pleasure as the end; but insisted that it is the pleasure of an entire life at which we must aim, and taught that this can be secured, not by indulging whims and instincts as they momentarily arise in us and solicit us, but only by reconciling them into a systematic whole, in which each will receive the amount of satisfaction which belongs to each. Before indulging any instinct, bodily or mental, we are to consider, said Epicurus, what will be the consequences to ourselves and those whose happiness or pleasure is bound up with our own. Thus the general upshot of his teaching is not unlike that of Bishop Butler; and the charge made against him by the ancient Stoics, that he encouraged sloth and sensuality, was unjust. Conybeare and Howson are right when they speak (*Life and Letters of St. Paul*, ch. x.) 'of the quiet garden, where E. lived a life of philosophic contentment, and taught his disciples that the enjoyment of tranquil pleasure was the highest end of human existence.'

The Stoics also stigmatized E. as an atheist, because he held that the gods live a sublime life of divine calm, as far removed from the passions and hatreds which make men unhappy as from the turmoil of the elements. The contemporaries of E., like the Greek or Italian peasantry of to-day, believed that every clap of thunder, every flash of lightning, every earthquake, was a direct act of a god, who, except in abnormal paroxysms, never acted at all. If a man was blind from birth, the gods were angry with him or his forefathers. If there was a drought, the gods meant to signify their displeasure with someone or other. The gods were perpetually meddling with nature and man, and oftener in a malign than in a loving manner. An instinctive dislike for such peddling views of Providence inclined E. to the philosophy of secondary causes, which Anaxagoras and Democritus had already broached in an earlier generation; and he elaborated a philosophy of nature according to which all phenomena, especially the thunder and lightning, in which Zeus was popularly supposed to vent his ire, were referred to the play of atoms moving about in a void space. To this regular action and interaction of atoms were to be ascribed the stars and their movements. Here, again, Epicureanism struck at the widespread superstition of astrology, and rendered a great service to humanity. For if a man's whole life and destiny depended on the position of the stars at his birth, he was not free to mould his own character, but was the slave of alien forces. In opposition to such a degrading and paralyzing fatalism, E. taught that man has a free will, and can make the best of himself.

A modern writer (Mr. Pater, in his work *Marius the Epicurean*) has shown how naturally Epicureanism, the most humane of ancient creeds, could in the 2nd cent. pass into Christianity. And indeed the two had much in common. Both were opposed to the vulgar mythology of antiquity; both ascribed to the Deity a lofty immunity and repose from every lower passion and feeling; both taught the doctrine of free will in opposition to the astrologers; both inculcated kindness and gentleness to man and beast; both frugality and contentment with moderate circumstances. And as Epicureanism, being the offspring of an age when the intense but narrowing patriotism of the ancient city-state was gone by, was capable of being practised under any form of political institu-

tions, so the moral system of Christianity was formed in detachment from any special set of institutions, and even in defiance of many which, both before and since, have been held essential.

LITERATURE.—The best short account of Epicureanism is Wallace's *Epicureanism* in 'Chief Ancient Philosophies' (S.P.C.K.). See also his article in *Encyc. Brit.* For a fuller treatment of the subject, and for a knowledge of the Greek sources, consult Ritter and Preller's *Historia Philosophiæ Græcæ*, or Zeller's *Hist. of Gr. Philosophy*; also H. Usener's *Epicurea*. Among older works, Gassendi's *De Vita, Moribus et Doctrina Epicuri*; *The Life of E.*, by Diogenes Laertius; the poem of Lucretius in Latin, or as tr. by Munro. Late in the last cent. an entire library of Epicurean writings was found at Herculaneum. Many of these rolls have been deciphered and printed since 1793, when the task of unrolling them was first essayed. But many of them are too much charred by the hot lava which overwhelmed the city in A.D. 79 to be of much use. Still many writings of E. and of the leading members of his school, which would have been lost except for this famous cataclysm of nature, have been thus preserved to us.

F. C. CONYBEARE.

EPIPHANES.—See ANTIOCHUS IV.

EPIPHI (Ἐπιφι, 3 Mac 6³⁸).—See TIME.

EPISTLE.—1. IN OT.—The epistle is so spontaneous a form of literature that it may be regarded as one of the earlier applications of the art of writing (see WRITING). Letter-writing must, however, have been confined at first to the few; and official rather than private correspondence would be the prevailing type. In OT verbal messages alone appear prior to the Kingdom in Israel, the letter of David to Joab touching Uriah (2 S 11^{14, 15}) being the first recorded example. Here the message was one which could not have been sent verbally through Uriah; and a similar need for secrecy explains the use of sealed letters by Jezebel in the matter of Naboth (1 K 21^{8, 9}, cf. 2 K 10¹⁻⁷, Jehu and the sons of Ahab; also 2 Ch 21¹²). The answer in each case was verbal; hence we infer that writing was still the rare exception even in high official matters. Other reasons for resorting to written messages were the desire to be emphatic or peremptory, as in the cases of Benhadad's letter sent with Naaman to Jehoram of Israel (2 K 5⁵⁻⁷), and of Sennacherib's open letter to Hezekiah (2 K 19¹⁴, Is 37¹⁴, 2 Ch 32¹⁷); or the wish to be specially courteous, as with the letters and present sent by Merodach-baladan on hearing of Hezekiah's recovery from sickness (2 K 20¹² = Is 39¹). So far letters have been chiefly those of kings. Akin to these, in formal or authoritative character, is the letter sent by Jeremiah to the exiles in Babylon (Jer 29¹), which also alludes to similar letters sent by a certain Shemaiah, a false prophet, to Jerusalem in order to undermine Jeremiah's own position (vv^{25, 31}). From this it would seem fair to infer that the conditions of the Captivity gave a marked stimulus to the use of letters by the Hebrews as a medium for important messages. Certain it is that hereafter we find not only more frequent reference to such correspondence, but also a new and more precise terminology used to express the notion 'epistle' as a specific form of writing. Hitherto the term employed, as in 2 S, K, (= Is), and even Jer, has been quite vague and general. A letter is simply 'a book' (ספר, βιβλίον, βιβλος), its precise nature being learnt only from the context. But henceforth there emerge, in Ch, Ezr, Neh, Est, certain specialized terms, the most distinctive coming from foreign tongues. Besides words for a 'writing' (כתב, 2 Ch 21¹¹ כתבתי . . . ויאמר, Est 3^{13, 14} 8^{10, 13} with קָרָא hard by in either case; or ספר, 2 Ch 21¹² = γράφη, as in Dt 10⁴), we find the strange מִשְׁתָּר of Assyrian (*šgirtu*, so Frd. Delitzsch) or at least Pers. origin (2 Ch 30¹⁻⁶, Ezr 5^{5a}, Neh 27⁹ 6^{5, 17, 19}, Est 9^{26, 27}). Cf. ἀγγελίον, Herod. viii. 98; Xen. *Cyrop.* viii. 6. 9), and מִשְׁתָּר, a Pers. form [Ezr 4^{7a}, where מִשְׁתָּרִים (v. 7) = מִשְׁתָּרִים (vv. 8, 11) = מִשְׁתָּרִים (v. 18);

while Artaxerxes' ἀπαρῆς (rescript, v.¹⁷) also = ἀπαρῆς (v.²³). The two latter terms are regularly rendered by ἐπιστολή in the LXX. From all this it seems probable that familiarity with the royal posting system of the Persians (cf. ἀγγαρεύειν in Mt 5⁴¹) helped to make the letter stand out more clearly to the Jewish mind as a distinct literary type. In the post-exilic historical books the exact epistolary form is often preserved, including a formal address in certain cases. This is a marked feature in the Bks. of Mac, belonging to the Greek period, where also a closing 'Farewell' occurs, sometimes with the addition of the exact date (e.g. 2 Mac 11^{27, 33, 38} χαίρειν . . . ἐρωθεῖτε or ὑγιαίνετε). As yet, however, we have no models of private correspondence among the Hebrews; so that here, as often, we are dependent upon the light shed backwards by NT.

2. IN NT.—In view of the numbers and influence of the Diaspora, the collateral evidence of non-Heb. analogies now becomes of moment. But the letters of literary men, like Cicero or Seneca, are hardly to our purpose. It is rather to the Egypt. papyri, and to the collections of epistles mostly fathered upon great Greek names during the Alexandrine age, that we must look for hints of real value.* The evidence has been well collected by G. A. Deissmann, who, in his *Bibelstudien* (pp. 189-252), reaches the following results. A broad line is to be drawn between the letter and the epistle. The one is essentially a spontaneous product, dominated throughout by the image of the reader, his sympathies and interests, instinct also with the writer's own soul: it is virtually one half of an imaginary dialogue, the suppressed responses of the other party shaping the course of what is actually written: it is confidential in the sense that it is meant for particular readers known to the writer. The other has a general aim, addressing all and sundry whom it may concern: it is like a public speech, and looks towards publication. But publication is the very note of literature proper. Hence the letter, as private, differs from the epistle in being a 'pre-literary' type of self-expression, akin to a diary. But, like a diary, if meant ultimately for the public eye a letter may, in spite of its original use, be in fact an epistle (e.g. certain letters of Cicero, Seneca, and Pliny). The literary epistle would arise from actual experience of the posthumous value placed on a great man's letters, and might take one of two forms: (1) those written to make or enhance one's own fame; (2) those forged under some great name, either for practice, after the fashion of the schools of rhetoric, or to give weight to propaganda of some sort. But in any case it will betray care, effort after finish—in a word, art; whereas the letter proper is unstudied, a thing of nature. This being so, letters require an exegesis all their own, one which sets their contents in vital relations with author and readers. Thus only can their proper sense be ascertained.

These principles have a real bearing on NT epp., and must rank among the tests of authenticity. But certain special features of primitive Christianity modify their application; and the universal nature of the interests involved makes the line between letter and epistle a fainter one, as we see by placing 1 Th alongside an epistle like Romans, or even the encyclical Ephesians. It was, no doubt, by writing letters that St. Paul came to feel an epistle a fit medium of exposition. And it seems that he, partly in virtue of his unique missionary labours, partly as a Jew of Gr.-Rom. culture, was the creator of the NT type of epistle, itself the most characteristic blossom of the New Life in the souls of men, the most notable differentia of NT among sacred books. It is even possible that all other NT

epistles owe their birth to St. Paul as pioneer. Be this as it may, the relevant data can best be grouped as (a) pre-Pauline, (b) Pauline, (c) post-Pauline.

(a) PRE-PAULINE EPISTLES.—Letters of instruction to the synagogal authorities even outside Pal. were sent by the supreme court of the mother-city as occasion arose (Ac 9² with 22⁵, cf. 28²¹). It was, perhaps, not without some vague sense of this analogy that the Jerus. community, acting through the apostles and the elder brethren (Ac 15^{22, 23}, cf. 2 Mac 1¹⁻¹⁰), addressed their Gentile brethren of the province Syria-Cilicia touching terms of communion. Common use of 'letters of introduction' is implied in 2 Co 3¹ (see Ac 18²⁷, and cf. Ro 16^{1, 2} as a sample), and in a slightly different sense in 1 Co 16². No doubt, too, foreign synagogues were wont to refer doubtful points to Jerus. and thus elicit written responses. But we cannot view the letter of the Cor. Church to its spiritual father or apostle (1 Co 7¹, 4¹⁴⁻¹⁷ 9^{2, 7, 12}) exactly in this light. Rather it seems a natural result of the unique relation which St. Paul's personality, at once strong and tender, caused to grow up between him and his 'children in the gospel.' This is the secret of the Pauline letters.

(b) PAULINE EPISTLES.—There was an imperative need for the single Apostle of the Gentiles to multiply his presence, as it were. This he did in part by trusted companions, but in part also by letters. Doubtless, their exact form would have been other than it is had the current models been other than they were.* But existing literary usages, whether Jewish or Gentile, gave to them no more than Rabbinism gave to his gospel—certain vehicles of thought that lay readiest to use. What his gospel adopted, it transfigured; and nowhere more strikingly than in the conventionalities of the epistolary form. Address, salutation, final benediction, all pulsate with life, and expand at his touch into clauses charged with emotion, every word of which reveals his estimate of some group of souls that were ever in his heart's prayers. One may well see in 2 Th 3¹⁷ (cf. 2²) tokens that Thessalonica was not the first Church addressed by St. Paul. Yet it is equally certain that the true cause of his very first letter lay deep in the same spirit as breathes in 1 Th, the essentially 'pastoral' instinct. His letters were indeed the life-blood of a noble spirit, ever ready to be poured forth to nourish its spiritual offspring (1 Th 2^{7, 8}). Of a temper too ardent for the more studied forms of writing, St. Paul could yet by letter, and so on the spur of occasion, concentrate all his wealth of thought, feeling, and maturing experience upon some particular religious situation, and sweep away the difficulty or danger. Such 'waiting upon Providence' was the attitude of the apostolic age, which took no thought for a future the next event of which might be the return of Jesus Messiah in heavenly power. In this sense, likewise, the occasional epistle was the typical form of its literature.

The Pauline letters have a style all their own—though style was far from the writer's thoughts. It was indeed the man. Hence their enormous value: first, as the data for his *journal intime* and *Life* all in one; and next as the immovable critical basis of historical Christianity. Just as certain of these letters articulate a unique personality, manifold yet mastered by one absorbing passion, so surely must all theories reckon with what they

* A certain proportion of the Alexandrine pseudo-epistles, being Græco-Jewish in origin, have a special claim to attention.

* Renan, relying apparently on Talmudic and mediæval data, asserts that 'correspondence between synagogues already existed in Judaism; the envoy charged with such letters was even a dignitary drawn from the synagogues,' and he implies that doubtful points of doctrine or practice were thus discussed (St. Paul, 223, 229 and n²). But he gives no references. Sanday speaks more guardedly, and indeed doubts if 'the writing of doctrinal epp. would come to the first generation of Christians as a matter of course' (*Bamp. Lect.* 335, 344).

imply as to the origins of Christianity. They reflect the mood of the time and given circle with perfect vividness of light and shade, ere it fades into the neutral tints of a set narrative. No criticism can ignore them. But neither can Christian theology. This means that they are to be read first of all as letters, and by the canons which govern such a reading. Until any reading can be put into relation to both writer and correspondents, so far as yet known, it cannot be held real and valid. We must reach the theology, if we reach it truly, through the missionary and man of God. So reached, it is full of qualification, of the flexibility that marks spirit off from letter. And, most valuable of all, a feeling for the practical reference of Christian truth—the ideal of 'being,' even more than 'knowing' or even 'doing'—can never be lacking when these writings are read as letters. To this end their very ordering contributes. For the body of the contents falls into two parts. The prophet—for herein lies their continuity with OT (cf. Jer 29)—carries the soul, on the wings of vision, to a level where the will finds its feet free to run in the ways of God, and life is seen *sub specie eternitatis*, in the light of God. But then the apostle never fails to depict what this means for daily life, ere he turns the eye once more to the founts of inspiration with a closing Doxology or Benediction. It is in such applications that the actual face-to-face nature of the Pauline letter allows certain self-revelations to be elicited by the virtual dialogue. Some of these are among our most precious hints towards a theory of biblical inspiration, which by its very recognition of human limitations stands out in contrast to the pagan notion of inspiration as uniform dictation through a passive organ; an idea which soon tainted the ecclesiastical theory from Justin onwards (see Sanday, *BL* 350 ff., cf. 31 ff., 391 ff.).

Finally, it may be noted, even as regards the growth of thought marked by certain Pauline epistles, that of all literary forms the letter least professes to exhaust a writer's ideas—the limit being given rather by the reader's conditions—or commits the writer to his own past. It is, in fact, the ideal form of utterance for a spirit in which great germs are ever being quickened by the touch of practical problems.

(c) POST-PAULINE EPISTLES, in a broad sense at least, we may style the other NT epistles (for *James*, see Sanday, *BL* 344). Some of them largely partake of the 'epistle' in contrast to 'letter.' Deissmann, indeed, goes too far when he puts at least half of them into the former class in such a sense as to infer their pseudonymity (pp. 242 ff.). But we may group them as 'letters' and 'epistles' according as they were or were not meant originally for readers more or less known to the writer. Here *Hebrews* first claims notice; for, though not actually Pauline, it was most likely suggested by St. Paul's example, seeing that Timothy is known to its author (13²³). Its closing greetings mark it a true letter; yet its abrupt opening makes it, even more than some Pauline epistles, hover between a letter and a homily. Possibly, the writer does not feel his name weighty enough to prefix in formal fashion (cf. *Ep. Barn.* 1¹⁻³). On the other hand, *James* has a formal address, but no final greetings; which marks it an epistle proper, meant for a class, not for given circles personally known to the writer. Otherwise it is with 1 *Peter* (1¹⁻² 5¹²⁻¹⁴), which is quite on the lines of an epistle like *Ro*, and involves some familiarity with the readers' concrete relations. And this seems true even of 1 *Jn*, devoid as it is of the usual marks; for the tone of paternal affection (*τεκνία*) seems best to suit a Church or Churches that knew and revered the writer—probably those addressed out

of full knowledge, though in a public or literary fashion, in the Bk. of Rev (2-4). 2 *Jn* is surely a real letter, in due form, to one such Church by the same apostle, whose cryptic use of *ὁ πρεσβύτερος* and *ἐκλεκτὴ κυρία* is due to fear of a hostile State (v. 12). So is it with 3 *Jn* (v. 13), a sequel (cf. 9) sent to a private friend when access to this Church was cut off by an ambitious official. In all of the above one seems to feel personality going forth in subtle ways to reach its proper audience. This is hardly so with *Jude*, whose address is quite vague; still less with 2 *Peter*, which as it stands seems dependent on *Jude*. Nor need this surprise, when its author, in implying anxious study of certain Pauline epistles, can rank them as Scripture (3^{15, 16}).

To sum up. While we gain new insight into differences of type among NT epistles by placing them in line with other ancient epistles, yet on reflexion we see afresh the strange distinctiveness of the former as a whole. It turns on the special nature both of the originating impulse and of the ties binding writer and readers in virtue of their common faith. Outside Judaism, religion meant neither passionate belief nor elevated conduct so much as correct ritual. From this could spring no literature of persuasion, least of all in epistolary form. But given the new motive for the religious letter, its native form could hardly stop short where it began, in the splendidly personal prophesyings and exhortations of St. Paul the inspired missionary. Even in him new and more settled conditions evoked a new manner; the sermon gets the upper hand, changing Christian letter into Christian epistle. Of the later, or strictly pastoral type, 1 *Jn* seems a true sample. Placed alongside 1 *Th*, it, or even 1 *P*, might appear marked off as Deissmann's 'artistic epistle' from his 'pre-literary letter.' But, with all intervening stages supplied in even acknowledged Pauline letters, these categories cannot apply with such rigour as to be synonymous with 'Catholic' and 'Pauline' epistles respectively. Various problems remain, e.g. as to the Pauline Pastoral Epp., whose integrity is open to doubt; but flexibility and nice discrimination must here be the order of the day. This is not the place to see how the NT epistles became, first literature, and then canonical literature. But it here falls to note that even the most personal Pauline letters thereby became for the Church pure epistles or theological pamphlets. They were, that is, read for the most part *in abstracto*, their writer and original readers—and therefore the original sense—alike becoming of little or no moment.

LITERATURE.—FARRAR, *Messages of the Books* (1884), ch. vii.; Sanday, *BL* 334 ff., 344; and esp. *Proleg. zu den bibl. Briefen und Episteln*, in G. A. Deissmann's *Bibelstudien*, 1895.

J. V. BARTLET.

EQUAL.—1. As adj. in the sense of 'impartial,' 'fair' (= Lat. *aequus*), Ps 17² 'Let thine eyes behold the things that are equal' (קִיְיָרִים, either the obj. of the vb. hence AV, and RV 'Let thine eyes look upon equity'; or, more probably, an adv. [=קִיְיָרִים] as Del. and RVM 'Thine eyes behold with equity'). This meaning of 'equal' is elsewhere in OT found only in Ezk (18^{25 bis. 29 bis 33^{17 bis. 20}}, Heb. מִשְׁכָּל, lit. 'is proportioned' or 'adjusted') in ref. to God's dealings. In Apocr. it is found 2 Mac 13²⁸ 'sware to all equal conditions' (τὰ δίκαια, RV 'to acknowledge all their rights'); and in NT, Col 4¹ 'Masters, give unto your servants that which is just and equal' (τὴν ἰσότηρα, RVM 'equality,' Lightft. 'equity,' 'fairness'). Tindale in *Prolog* to Genesis, says 'that Joseph brought the Egyptians into such subjection would seem unto some a very cruel deade, howbeit it was a very equal waye'; and in 'The Obedience of a Christian Man' (*Works*, i. 209) he says, 'it is impossible that a man should be a righteous, an egal, or an indifferent judge in

his own cause—lusts and appetites so blind us.' Cf. Milton, *PL* x. 748—

'As my will
Concurred not to my being, it were but right
And equal to reduce me to my dust.'

2. As subst. in the sense of a contemporary, one of the same generation (=Lat. *equalis*), Gal 1⁴ 'And profited in the Jews' religion above many my equals in mine own nation' (συνηλικιώτης, RV 'beyond many of mine own age'). In the argt. to *Samson Agonistes*, Samson is 'visited by certain friends and equals of his tribe.' In Ps 55¹³, however, 'equal' is one of my own rank, as AVm Heb. אָנֹכִי שֶׁנִּקְרָא, a man after my valuation, i.e. esteemed as I am esteemed. So Elyot, ii. 417, 'to acquire by the executyng of justice nat only an opinion of tyrannye amonge the people, and consequently laterede, but also malignitie amonge his equalles and superiours.'

3. As verb—(1) to 'come up to,' 'match,' Job 28^{17, 19} 'The gold and the crystal cannot equal it'; 'The topaz of Ethiopia shall not equal it' (עָרָה); and (2) to 'compare,' La 2²³ 'What thing shall I liken to thee, O daughter of Jerusalem? what shall I equal to thee?' (הֲאֵי אֲשֶׁרֶיךָ).

J. HASTINGS.

ER (עַר).—1. The eldest son of Judah by his Canaanitish wife, the daughter of Shua. He was married to Tamar, who was apparently also of Canaanite origin. For wickedness, the nature of which is not described, 'J' slew him' (Gn 38⁷; Nu 26²⁰). 2. A son of 'Shelah the son of Judah' (1 Ch 4²¹). 3. The name of 'Er the son of Jesus' appears in the genealogy of our Lord (Lk 3²⁸) in the 7th generation before Zerubbabel, and the 15th after David.

H. E. RYLE.

ERAN (עֲרָן 'watchful').—Grandson of Ephraim, Nu 26²⁶ P. Patronymic, *Eranites*, *ib*.

ERASTUS (Ἐραστὸς) occurs three times as the name of a companion of St. Paul. 1. From Ac 19²² we learn that during St. Paul's long stay at Ephesus he sent Timothy and E., two of those that ministered unto him (δύο τῶν διακονούντων αὐτῷ), into Macedonia. 2. In Ro 16²³ E. 'the treasurer (οἰκονόμος) of the city' is mentioned among those who send their salutations. His office implies that he was a man of some considerable importance. 3. In 2 Ti 4²⁰ E. is mentioned as having 'remained in Corinth.'

Whether these refl. apply to one, two, or three persons we have no means of conjecturing. It is, however, not probable that the 'treasurer of the city,' who held an office which implied residence in one locality, should have been, like the others, an itinerant companion of St. Paul.

A. C. HEADLAM.

ERECH (עֲרַךְ) was called by the Babylonians and Assyrians Uruk (or Arku), whence Heb. Erech and Arab. Warka. A very ancient city, thought at first to be Edessa or Calirrhœ (Urfah) in the N.W. of Mesopotamia. It is the second in the list of the four towns of Gn 10¹⁰ (Babel, *Erech*, Accad, and Calneh), comprising Nimrod's kingdom in the land of Shinar (Babylonia). *Erech* (or Warka) lies halfway between Hillah and Korna, on the left bank of the Euphrates, and W. of the Nile Canal. It is supposed by Fried. Delitzsch that this river must have flowed nearer to the city at the time of Gilgamesh, as the legend relates that Gilgamesh and Ea-bānî washed their hands in the stream after having killed, in *Erech*, the divine bull sent out by the goddess Ishtar. Its orig. name was Unu, Unug, or Unuga, translated in the bilingual texts by *subtu* * 'seat' 'dwelling.'

*The pronunciation of the word seems, from a Greek transcription, to have been *sobthu*.

It was a very important city—the capital, in fact, of the mythical hero-king Gilgamesh. The ruins found on its site show the remains of elegant buildings with fluted walls, sometimes decorated with patterns formed with the circular ends of various coloured cones imbedded in mortar, bricks bearing archaic Accad. and Bab. inscriptions, etc. Remains of canals traverse the mass of hillocks (which in some parts are nearly 90 feet high) and the country around the city, showing that it must have been well drained in ancient times. Those portions of the walls of the city which can be traced seem to have been in the form of an irregular circle about 40 feet high, and show that its average circumference was about six miles. The houses of the people are supposed to have extended beyond the walls.

The antiquity of the city is indicated by the non-Semitic (bilingual) version of the creation-story, in which its foundation is attributed to the god Merodach (*EP* 2nd ser. vi. 107-114). Another and important proof of its antiquity is given in the number of names it bears in the inscriptions. Besides its original appellation of Unug, it was called Illag (or Illab) (*WAI* v. pl. 41. 15), Namerim (ii. 50. 58; v. 41. 16), Tir-ana 'the heavenly grove' (v. 41. 16), Ara-imina 'the seven districts' (*ib*. 17), Gipar-imina * 'the seven enclosures' (*ib*. 18), Ki-nana 'the heavenly resting-place' (*ib*. 19)—poetical names implying that the city and its surroundings were regarded by the Babylonians as fertile and beautiful in the extreme, and very different, naturally, from the scene of desolation which now meets the traveller's eyes. The *Archevites* mentioned in the Bk. of Ezra, 4⁹, were inhabitants of the Bab. Arku or Erech, which was the seat of a celebrated school of learned men. Strabo speaks of the *Orcheni* (*Archevites*) as a sect of Chaldean astronomers dwelling near Babylon (xxi. p. 739); Ptolemy, as a people of Arabia near the Persian Gulf (v. 19, § 2); and Pliny, as an agricultural population, who banked up the waters of the Euphrates and compelled them to flow into the Tigris (vi. 27, s. 31).

Two deities who had temples in the city seem to have been worshipped in E., namely, Ishtar and Nanā. The temple dedicated to Ishtar (Venus, as the evening star) was called Ê-ulmaš 'the house of the oracle'; the other, dedicated to Nanā (the goddess whose image was carried off by the Elamite king, Kudur-nankhundi, B.C. 2230, and only restored to its place 1635 years later by Assur-bani-pal, king of Assyria), was called Ê-ana 'the house of heaven,' and is now represented by the Buwariyya mound.

Among the inscribed and stamped bricks found in Erech are many of the time of the historical kings—Dungi, Ur-Bau, Gudea, Sin-gašid, Merodach-baladan I., etc. Tablets of the reigns of Nabopolassar, Nebuchadrezzar, Nabonidus, Cyrus, Darius, and some of the Seleucidæ, have been excavated in the site. In the ruins of the town and the country around, a large number of glazed earthenware coffins and other receptacles, used no doubt for the burial of the dead, mostly of the Parthian period, has been found, showing that part of the town and its neighbourhood must have been used as a necropolis.

LITERATURE.—Schrader, *KAT* 2 94 f.; Loftus, *Chaldea and Susiana*, 162 f.; Delitzsch, *Paradies*, 221 f.; Smith, *Chaldean Genesis*, 194; Sayce, *Hib. Lect. on Rel. of Anc. Babylonians*, 184 f., *HCM* 102; Hommel, *Anc. Heb. Trad.* 122 n., 129, 108, 177, also art. *BABYLONIA*, p. 224 b.

I. A. PINCHES.

ERI (עֲרִי 'watcher').—Son of Gad, Gn 46¹⁶, Nu 26¹⁶ P. Patronymic, *Erites*, *ib*.

* This apparently refers to the great tower there, in seven stages, similar to the tower of Babel. It was called E-gipar-imina (*WAI* ii. 50. 20).

ESAIAS.—The familiar AV spelling of ISALIAH in Apocr. and NT is retained by RV only in 2 Es 2¹⁸.

ESAR-HADDON (אֶסַרְחַדְדִּן, Σακερδότης, Ἀσροδάν).—Esar-haddon, in Assy. Assur-akh-iddina, 'Assur has given a brother,' seems to have been the favourite son of Sennacherib, by whom his name was changed to Assur-etil-yukin-abla, 'Assur, the hero, has established the son.' Sennacherib bequeathed to him golden bracelets, necklaces, and other valuables, 1½ manehs, 2½ shekels in weight, which were stored up in the house of a certain Amuk, and probably intended him to be his successor. In B.C. 681 Esar-haddon was at the head of the Assy. army fighting against Erimenas of Ararat (Van), when Sennacherib was murdered by his sons Adrammelech (or rather Arad-malik) and [Nergal-]sharezer (2 K 19³⁷, Is 37³⁸) on the 20th of Tebet (December). For forty-two days the conspirators held the capital, but on the 2nd of Adar (January) they were compelled to fly to the Armenian king. Esar-haddon met his brothers and the army of Ararat near Malatiyeh on the 12th of Iyyar (April); the veterans of Assyria won the battle, and at the end of it saluted Esar-haddon as king. Eusebius quotes from Abydenus that the battlefield was at 'the city of the Byzantines,' which von Gutschmidt corrects into Bizana on the Cappadocian frontier. After the victory Esar-haddon returned to Nineveh, and on the 8th of Sivan (May) was crowned king.

He was an able general, and by his conciliatory policy prevented such rebellions as had troubled his father's reign. His first care was to rebuild Babylon, which Sennacherib had destroyed (in B.C. 689), and to make it the second capital of his empire. Manasseh of Judah became his vassal, and was called upon, along with the other kings of the west, including those of Cyprus, to furnish timber and stone for the palace of their Assyrian lord. The statement in 2 Ch 33¹¹, that he was carried prisoner to Babylon after his revolt from Assyria, is explained by the fact that Babylon had become one of the residences of Esar-haddon.

The early part of Esar-haddon's reign was occupied in defending his kingdom against the hordes of Gimirra or Kimmerians, called Gomer in OT, and included by the Assyrians under the general title of Manda or 'Nomads,' who were now pouring into Western Asia. For a time the issue seemed doubtful, and a hundred days of humiliation and prayer to the gods were ordered that the empire might be protected against the Kimmerians and their allies, Kastarit of Karkassi, Mamiti-arsu the Mede, the Minni, and the people of Saparda (Sephara) and Asguza (Ashkenaz). At last Teuspa the Kimmerian was overthrown in a decisive battle on the northern frontier of Assyria, and driven westward into Asia Minor. Then came a campaign against the Medes.

In B.C. 677 Sidon revolted, but was promptly captured and destroyed, and another city, called 'the city of Esar-haddon,' was built in place of it, and colonized with captives from Elam and Babylonia (see Ezr 4²). The following year the king of Sidon and his ally, a Cilician prince, were beheaded, and their heads sent to Nineveh. In the autumn Esar-haddon marched into the heart of Arabia, through a waterless desert, a distance of more than 600 miles, and conquered the eight kings of Bazu and Khazu (the Buz and Hazo of Gn 22^{21, 22}). In B.C. 674 he invaded Egypt, and the invasion was repeated in the February of the following year. In 672 his wife died on the 5th of Adar, and in 670 came the final attack on Egypt. The Egyptian forces were driven before the Assy. army (from the 3rd to the 18th of Tammuz or June) all the way

from the frontier to Memphis, being thrice defeated with heavy loss; while Tirhakah, their king, was wounded. On the 22nd of Tammuz, Memphis surrendered, Tirhakah and his son fled to Ethiopia, and Egypt became an Assy. province. In B.C. 668 it revolted, and while on the march to punish it Esar-haddon fell ill, and died on the 10th of Marcheshvan (October). His empire was divided between two of his sons, Samas-sum-ukin having Babylonia, while the rest of the empire passed to an older son, Assur-bani-pal, whose suzerainty Samas-sum-ukin was called upon to acknowledge. A third son, Assur-mukin-paliya, was raised to the priesthood, while a fourth became priest of the moon-god at Harran.

A. H. SAYCE.

ESAU.—1. (עֵשָׂו), elder of Isaac's twin sons. The name ('hairy')* is said to have been suggested by his appearance at birth (Gn 25²⁶, J). The surname Edom ('red'), applied chiefly to his posterity, commemorated, according to Gn 25³⁰ (J), the incident there related, but referred also, possibly, to his red hair. Sayce [see EDM, p. 644^b] derives the name from the red colour of the sandstone cliffs of Idumæa. The struggle between E. and Jacob, prior to birth,† foreshadowed subsequent relations between the brothers as well as their descendants (see EDM), and was oracularly declared to signify that 'the elder shall serve the younger.' The premature tokens of manly strength were premonitory of E.'s future. When he grew up, he preferred the wilder life of the chase to the quieter routine of sheep-farming at Beersheba. He became a 'man of the field,' an expert hunter, and eventually chief of a tribe occupying the hilly land of Seir, whose Horite inhabitants were displaced or subdued by E., his followers, and their posterity (Gn 25²⁷ 32^{3, 6} 36, Dt 2¹²).

The main incidents of E.'s life are (1) *Sale of birthright*.—Hungry, faint, and feeling as if about to die, he arrives one day,‡ after a (presumably) unsuccessful hunt, at the patriarchal camp, finds his brother cooking lentils, and cries, 'Let me devour some of that same red food.'§ Jacob, taking mean advantage of E.'s condition, and aware probably of the oracle in his own favour, demands, as price of the pottage, || a renunciation of the birthright. The latter included precedence, and authority after his father's death (Gn 27²⁹); perhaps, also, as in later times, a double portion of the patrimony (Dt 21¹⁷), and the domestic priesthood (Nu 3^{12f}). Along therewith would naturally, in the case of the chosen family, be transmitted the covenant blessing, which secured for its possessor the divine special favour, with promise of Canaan for his posterity, and the honour of conveying a blessing, through future seed, to 'all the families of the earth' (Gn 12⁸ 22^{17f}). In E.'s eyes the temporal advantages of the birthright were distant and shadowy; to spiritual privilege he was apparently insensible. 'What profit shall the birthright do to me?' he cries, and barter it away

* Ges., Kalisch, etc. Acc. to Pseudo-Jon.'s Targ. 'ready made,' from עָשָׂו to make, or make ready, because E. 'was born with hair of head, beard, and teeth.'

† Cf. the story of the twins Acrisius and Proetus, related by Apollodorus, *De Deor. Orig.* ii. 2. 1.

‡ Ps.-Jon.'s Targ. records a tradition that it was the day of Abraham's death.

§ So Ges. (עֵשָׂו). Lit. 'that red, red thing,' as if he could not wait to recall the proper word.

|| Farinaceous food may have been a tempting luxury owing to 'famine in the land' (Gn 26¹, assigned to the same J document as 25^{27f}).

with a levity which even the oath exacted by Jacob fails to turn into gravity. (2) *E.'s marriages.*—One who 'despised his birthright,' as heir of Abraham, was not likely to value highly connexion with Abraham's kindred. He associated freely with Canaanites, who were 'strangers from the covenants of promise,' and, at the age of 40, married two Hittite wives, Judith and Basemath, to the grief of his parents, who could not forget Abraham's anxiety to avoid such alliances. Afterwards, when Jacob had been directed by Isaac to seek a wife among their kinsfolk in Paddan, E., in hope of propitiating his parents, married, in the lifetime of his first two wives, his cousin Mahalath, daughter of Ishmael.* Of these wives five sons were born (Gn 36^{4d}). (3) *Loss of patriarchal blessing.*—When Isaac's death apparently approached, E. seems to have realized the temporal profit of the benediction. Not forgetting (Gn 27³⁶), but ignoring his bargain with Jacob, he enters readily into Isaac's plan for the bestowal of the blessing on his favourite first-born. When the blessing is lost through Jacob's repulsive artifice, and E. receives a lower benediction,† indicating that he would live by the spoils of war and chase (27⁴⁰), he resolves to slay his brother after Isaac's death, and thus regain all he has lost. (4) *Reconciliation with Jacob and final departure from Canaan.*—During Jacob's sojourn in Paddan, E., while retaining connexion with Canaan (Gn 36⁶), seems to have become a 'duke' in Seir (Gn 32³).‡ When Jacob is on his way back to the S. of Pal., E. meets him with 400 men. It is not clear that his purpose was hostile, as Jacob supposed: the men may have been mustered for war against Horites. Twenty years had intervened since J.'s departure; time is a great healer; and E.'s wrath may have been mollified by success. Any remaining animosity was appeased by Jacob's abundant gifts (which had the aspect of tribute), and vanished at the sight of the prostrate brother. 'E. ran to meet him, and embraced him, and fell on his neck, and kissed him' (Gn 33⁴). They met once more, in peace, at Isaac's funeral, after which E., partly because their substance was too great for them to dwell together, severed his connexion with Canaan, and made Seir his permanent abode (36⁶).

The epithet βέβηλος 'profane' (He 12¹⁶), § i.e. unconsecrated, secular (Lv 10¹⁰, 1 S 21⁴, Soph. *Ed. Col.* 10), rather than blasphemous, supplies a key to E.'s character and history. Frank and manly, affectionate and impulsively generous, irascible but not implacable, E. is naturally lovable, and exhibits materials out of which a fine character might have been developed. But he discloses no spiritual aspiration or God-ward bent; no sense of unworthiness or devout surrender to divine guidance, such as Jacob, amid grave faults, exemplifies. This lack of consecration leaves E. subject to animal appetite; leads him into secularizing, if not demoralizing, alliance with Canaanites; renders him careless of spiritual blessing and insensible to high ideals; causes his conduct to be dominated by impulse, not regulated by principle; and prevents that moral

* The differences in the names and parentage of E.'s wives, as given in Gn 26³⁴ 26³⁹ and 36² are due, perhaps, not to divergent traditions (for these passages are all assigned to the same 'source,' P), but (1) to double names, (2) to errors in transcription by the editor of the documents.

† The words in Gn 27³⁹ may mean either (partitively) that E.'s dwelling would be 'of the fatness' or (privatively) 'away from the fatness.' The latter suits better the character of Seir.

‡ Gn 36 (P) suggests, when taken by itself, that E.'s departure to Seir took place only after Jacob's return to Canaan, not before it, as 32³ (J) intimates; but if we suppose that, so long as Isaac lived, E., while dwelling much in Seir, retained an abode in Can., the discrepancy disappears.

§ If ἄνομος 'fornicator' in this verse refer to E. (which is doubtful), the ref. is either to his marriages with idolatresses, or to Heb. traditions of his gross immorality.

growth through which Jacob, originally far less amiable, is transformed from a tricky 'supplanter' into Israel, a prince of God. Even E.'s natural frankness and generosity fail him, when he tries, without Jacob's knowledge, to obtain the blessing virtually forfeited, and resolves to slay his brother, not in the first heat of resentment, but prudently, in cool blood, after Isaac's death has removed the peril of paternal curse. His later pacification—the outcome, directly, of affectionate impulse—was probably due also to the conviction that the head of a host of 400 had, after all, lost nothing through being supplanted by one whom the coveted blessing, after twenty years, had made only a successful cattle-breeder.

Some modern critics* regard the history of E. and Jacob as more or less mythical. Ewald supposes the details about E. were suggested by the rough nature of Idumæa (רַעַשׁ Seir=rough), and by the later relations of Edom and Israel. Kuenen lays stress on the representation of E. and Jacob (with other personages in Gn) as 'progenitors of tribes'—a 'theory of the origin of nations' which 'the historical sense of the present day rejects.' Families, he declares, become nations, not so much by multiplying as by conquest of and combination with other populations. For discussion of the general question, see TRIBE. As regards Esau in particular, (1) the roughness of Edomite territory may be reasonably traced to the disposition of a progenitor whose rough strength prompted him to choose an abode suited to his habits. (2) Nothing in Gn precludes the supposition that the Edomites (as well as the Israelites) included within their communities the descendants of retainers and immigrants. (3) It is difficult to believe that legends containing so much that is derogatory to the venerated Jacob, and favourable (comparatively) to the ancestor of unfriendly Edomites, should grow up among the Jews. Of the stories and features of character which would naturally cluster round E.'s name in Heb. circles, we have specimens in Rabbinical writings which represent E. as thief, fornicator, blasphemer, etc., as committing five heinous sins in one day, as giving his father dog's flesh for venison, and biting Jacob after the latter's return.† The impartiality of Gn in revealing much that is attractive about E. and repulsive (even to an Eastern mind) about Jacob, suggests a substantially historical record which could hold its ground in spite of its (to the Jews) unpalatable character.

H. COWAN.

ESCHATOLOGY (τὰ ἔσχατα, *the last things*).—Eschatology gives an account of the final condition of man and the world as this is represented in scripture. The idea of a final condition of mankind and the world rests on the other idea that history is a moral process, with a goal towards which it is moving. In scripture this moral process is specifically a redemptive process, of which the author and the finisher is God, He Himself being the end towards which mankind is being drawn, for the perfection of man lies in full fellowship with God; and the perfection of man is reflected in, and subserved by, a new condition of the world, which is transfigured with his redemption. In this view

* Ewald, *Hist. of Isr.* bk. i. sec. i. C; Kuenen, *Rel. of Isr.* ch. ii.; more moderately, Kittel, *Hist. of Hebrews*, Eng. tr. i. 169. † See instances collected by Wetstein, on He 12¹⁶, and by Stanley, *Jewish Church*, i. p. 47.

the Messianic idea and hope becomes an important element in eschatology; but in OT, at least in its earlier portions, the Messianic is not yet so developed as to be a constant feature in the eschatological picture, much less that which gives its whole colour to the picture. The redeemer is God—'salvation belongeth unto the LORD' (Ps 3); and if the Messiah anywhere be redeemer or king of the redeemed people, he is so in virtue of the *divine* in him, as being in some way God in manifestation (Is 9³⁻⁷). The nomenclature, therefore, of some writers, who employ eschatological and Messianic as synonymous terms, is somewhat confusing; for, though this terminology be more and more justified as revelation advances, there are many eschatological passages even in late writings in which there is not only no mention of the personal Messiah, but in which there is no reason to suppose that the idea of a personal Messiah lay as a presupposition in the background of the author's thought. The OT reveals its conceptions piecemeal. Its writers are like subordinate workmen, each absorbed in his own particular task, in polishing a corner or carving a chapter or wreathing a pillar; it is only when the master-builder appears, with the full idea of the house in his mind, that each of the separate parts takes its place in the building. While, therefore, every Messianic passage is eschatological, there are many eschatological passages not Messianic.

Besides exhibiting the scripture views of the final condition of things, eschatology may take notice of the phenomena, the physical convulsions, or the national commotions amidst which the final condition is ushered in; or it may go a step farther back and refer to the moral forces bringing about these manifestations and revealed in them. In OT physical nature has no meaning of its own; it is a mere medium for the transmission and manifestation of moral impulses; and the same is true in a sense of human history, for, though men and nations act voluntarily, ultimately all their movements are inspired and led by God, the First and the Last (Is 41⁴ 48¹²). The final condition of men and the world is therefore regarded in OT less as the perfect issue of a gradual ethical advancement in the mind of men and the nations than as the result of an interposition, or a chain of interpositions, on the part of God, though these interpositions, under whatever external forms they may be revealed, are of course all moral.

THE ESCHATOLOGY OF OT may be treated under two heads: The eschatology of the People, and the eschatology of the individual Person. As the People in their final condition have necessarily some relation to the nations, the eschatology of the People widens out in many passages to be an eschatology of mankind and the world; while, on the other hand, owing to the idea prevalent in OT, particularly in the prophets, that the religious subject in relation with God is the People, the eschatology of the individual Person in distinction from the People is little developed, and some of the passages that appear to relate to it are uncertain in meaning. In other words, the eschatology of the People is the doctrine of the perfection of the kingdom of God upon the earth, while the eschatology of the individual Person is the doctrine of Immortality.

I. ESCHATOLOGY OF THE PEOPLE.—Though formally the people came into existence only at the Exodus, yet ideally it already existed in the patriarchal family from Abraham downwards (Is 41⁸), and some of the widest hopes and aspirations cherished by the people in later times in regard to their place in the religious history of mankind are already expressed in connexion with Abraham. But previous to the time when, by a

process of divine selection, the religious destinies of mankind were entrusted to his family, some eschatological intimations were given. It is characteristic of all these early intimations that they are general both in meaning and in regard to time. The earliest of them, the promise that the seed of the woman would bruise the head of the serpent (Gn 3¹⁵), bears upon the family of mankind universally. It may not be easy to say what sense our first parents or even Israelitish readers put into these words. The fulness of meaning which we are now able to express by them, and the individual application of 'the seed of the woman' which we can make, can hardly have been suggested to them. But they would be assured that the family of mankind would have the upper hand in the struggle against the author of their calamitous transgression; and as the meaning and consequences of what had befallen them became clearer, so would their conception of what was meant by bruising the serpent's head, and how alone that could be done. Equally universalistic, though more definite in regard to the means of its accomplishment, is the promise given to Abraham, 'In thee shall all the families of the earth be blessed' (Gn 12³). Such a promise could not soon be fulfilled, and there might be room for conjecture even as to the manner of fulfilment; yet the patriarch, knowing wherein his own blessedness lay, in his knowledge of God and fellowship with Him, would surmise that through his seed this true knowledge of God would reach all peoples. The sense is little altered if for 'be blessed' we render 'bless themselves,' *i.e.* wish for themselves the same blessings as Abraham and his seed are seen to enjoy (cf. Nu 23¹⁰). Some other passages, such as the Blessing of Noah (Gn 9^{25a}), are international, religious prominence being given to the family of Shem; while others, such as the Blessing of Jacob and Moses (Gn 49, Dt 33), are more national, having respect to the place of the tribes in Canaan. The phrase 'the last days' (אַחֵרֵי הַיָּמִים) describes the farthest future into which the eye of the seer reaches, and may have different senses. In Gn 49¹ it refers to the final disposition of the tribes in Canaan (though 49¹⁰ may have a wider outlook; see PROPHECY); while in Is 2² it refers to the final condition of the family of mankind, when all nations shall appeal to the God of Jacob as the righteous arbiter in all international causes. Dt 32 ends with the hope of the victory of Israel over all its enemies, and in his Last Words (2 S 23) David expresses the assurance that under his family a kingdom of Righteousness will arise.

The Day of the Lord.—In the 8th century B.C. the faith of Israel was virtually complete. Amos taught that God is Righteousness; Hosea, that He is Love; Isaiah, that He is the Lord the King, who has founded His kingdom in Zion, on the throne of which shall sit for ever one of the house of David, the Prince of Peace, filled with the fulness of the Spirit of God (Is 9. 11). But besides this Messianic eschatology belonging to the second period of Isaiah's career, there is another belonging to the earliest period (chs. 2. 3), which he calls 'the Day of the Lord.' The prophet does not expressly combine the two, though they are probably to be regarded the one as the dark side and the other as the light side of the same cloud of judgment. In the earlier chapters he moves more among principles, moral necessities; in the second period (ch. 7 ff.) the actors are already on the scene who shall carry out the programme which in his first days he perceived to be inevitable. The phrase 'the Day of the Lord' is first heard in the mouths of the people (Am 5^{18a}). The term 'day' is much used in Arabic of a battle day, as the day of Badr, Ohod, and the like, and so in Heb. 'the day of

Midian' (Is 9⁴), and this may be its primary meaning. The day of the Lord to the popular mind would be the day when Jⁿ their God would interpose in their behalf to deliver them. The deliverance would be primarily from external hostile oppression, but internal social miseries might also be included. The idea and the phrase may thus be very ancient, though they appear first in Amos. All that the phrase connotes in the mouth of the people is the sense of misery and oppression, the belief that only their God can deliver them, faith in His power, and a hope or conviction of His approaching intervention, though on what this conviction was founded does not appear. But to the prophets of this age Jⁿ is a purely ethical Being, the moral ruler of Israel and the nations, and the sin of Israel and the world demands His intervention. Hence the first aspect of the day of the Lord is always a day of judgment. But judgment is not an end in itself; it is only in order to redemption, and behind the storm of judgment there always rises clear the day of salvation. The conception of the sin of the world which compels the intervention of the Judge differs in different prophets. In Amos it is social and civil unrighteousness; in Hosea, religious unfaithfulness; in Isaiah, insensibility to the majesty of the great King, who must interpose to bring the sense of Himself home to men's minds.

'The day of the Lord' is an eschatological idea; the phrase cannot be rendered 'a day of the Lord,' as if any great calamity or judgment felt to be impending might be so named; the 'day' is that of the final and universal judgment. But, of course, a prophet's presentiment of its nearness might not be realized; the crisis which he saw impending and deemed the great 'day' itself, or the beginning of it, might pass over and the 'day' be deferred. But this fact should not lead us to suppose that the prophets call any great visitation of God by the name of 'the day of the Lord.' Again, the term 'day,' if it originally meant battle day, suggests the presence of some foe whom God uses as His instrument of judgment. This feature, however, is not always present in descriptions of the day. Sometimes the terrors of the day of the Lord are represented as due to His manifestation of Himself and the convulsions of nature that accompany His appearing, 'when He arises to shake terribly the earth' (Is 2¹⁰⁻²²). But at other times, besides the supernatural gloom and terrors that surround Him when He appears, He is represented as using some fierce, distant nation as the instrument by which He executes His judgment (Is 13, Zeph). The judgment of the day of the Lord is a judgment on the known world, and the nation that executes the judgment is some wild people emerging from the dark places of the earth lying beyond the confines of the known world.* Once more, when the prophets speak of the day of the Lord they always regard it as near (Is 13⁹, Jl 1¹⁵ 2¹). The coming of the 'day' itself was a settled belief, but of its time knew no man; the presentiment of its nearness was awakened in the mind of the prophet by what he saw of the moral condition of mankind or of the operations of God in the world. To one prophet the insensibility of men to the majesty of the Lord the King seems so frightful that He must interpose to cast down everything that is high, so that He alone shall be exalted in that day (Is 2. 3); to another He is so visibly operating in the convulsions of the nations that His full manifestation of Himself seems at hand (Is 13, Zeph); while to a third the severe natural calamities with which He is visiting His people seem the tokens and heralds of His final judgment (Jl 1. 2). The prophets' hearts

* Davidson, *Nah, Hab, and Zeph* in 'Cambridge Bible,' p. 118; Driver, *Joel and Amos* in same series, p. 185.

were filled with great religious issues, with presentiments of the future of the world in God's hand. These presentiments were so vivid in their hearts that they were constantly looking for the fulfilment of them. And thus when the currents of providence, often too sluggish to their eager eyes, received a sudden quickening, when great events were moving and Jⁿ visibly interposing in the affairs of the world, they felt that He was taking to Him His great power. It was but a step or two when the kingdom would be the Lord's.

(1) In the pre-exilic prophets the day of the Lord is a judgment primarily on Israel (Am 3²), though it also embraces the nations. It is Israel's national dissolution, though the dissolution is only in order to a new reconstruction. The sinners of the people shall be destroyed, and a poor and humble people left behind (Zeph 3¹², Is 2. 3, Hos 4² 2^{18ff.}). (2) With the Exile the judgment on Israel seemed to have been fulfilled, and during the Exile and at the period of the Restoration the judgment of the day of the Lord is represented as falling on the heathen world, and its issue is Israel's redemption (Is 13, Hag, Zec 1-8). And this feeling is often expressed in passages where the day of the Lord is not formally mentioned (Is 40 ff., Ps 93-99). (3) But after the Restoration, when Israel was again a people, and the old internal antagonisms and wrongs once more manifested themselves, prophets have to threaten it anew with the refiner's fire of the Day of the Lord (Mal 3^{2ff.}). Still, though in the post-exilic literature the judgment is also a sifting of Israel itself (e.g. Ps 50), it is mainly regarded as falling on the heathen world, and issues in Israel's deliverance and the restoration of the Diaspora (Dn 7^{21ff.}). This idea largely pervades the later Psalms. Psalms differ from prophecy. Like the hymns of all peoples, they are not creative but representative. They give back, in thanksgiving, in praise, and often in prayer, the faiths and hopes already contained in the mind of the community and long cherished. And these hopes and faiths are in the main eschatological. When the Psalms speak of the judgment (1⁵ 7^{6ff.} 35²³ etc.), and of the meek inheriting the earth (37¹¹), of the nearness of the day of the wicked (37¹³), of seeing God's face in righteousness (17¹⁵), of the upright having dominion speedily over the unrighteous (49¹⁴), and much of the same kind, they are not uttering vague hopes never before expressed, but reflecting the certainties of a faith as old at least as the prophets of the 8th cent., the certainty of a judgment of God (Is 1^{24ff.} 2. 3), and of the rise behind it of a kingdom of righteousness (Is 1²⁶ 9⁷ 11^{4ff.}), and peace (Is 2⁴ 9⁷ 11⁵), and everlasting joy (Is 9³, Hos 2^{18ff.}).

To follow the scripture statements regarding the Day of the Lord through the three periods just mentioned would lead to much repetition: it will be enough to state some general points connected with the Day. The Day of the Lord is His time for manifesting Himself, for displaying His character, for performing His work, His short and strange work upon the earth. 'The Lord of Hosts hath a day upon every one that is proud and lofty, and he shall be brought low . . . and the Lord alone shall be exalted in that day' (Is 2¹² 17).

1. As it was a day of the manifestation of Jⁿ, God of Israel, in His fulness and therefore in a way to realize His purposes, which with Israel and even with the world were those of grace, it is fundamentally a day of joy to Israel, and even to the world—the Lord is king, let the earth rejoice, let the multitude of the Isles be glad thereof. Say among the nations, The Lord is King; let the heavens rejoice, and let the earth be glad' (Ps 96). That Jⁿ should reign, and that He should come to the earth as king, must, in spite of all the terrors that might attend His coming, bring to the world

a pervading gladness. For the falsehood and injustice that had cursed the earth so long would disappear, and the longing of men, who were ever in words or sighs saying, Show us the Father, would be satisfied. But it would be a day of joy above all to Israel, His people, when He should plead her cause, for the day of vengeance was in His heart and the year of His redeemed was come. Naturally, an accompaniment of the manifestation of J^o was the disappearance of the idols—'On that day men shall cast their idols of silver and their idols of gold to the moles and to the bats' (Is 2²⁰). But in the view of the prophets those gigantic oppressions, the empires of Assyria and Babylon, were but projections of their idolatry, with its cruelties and licentiousness and pride. The later prophet Daniel expresses this idea in a graphic figure when he represents the heathen monarchies under the symbol of various savage beasts, while the kingdom of God is represented under the image of a man.

2. To those in Israel who looked for His coming, apart from the natural terrors of it, it was unmixed joy (Hab 3). And it would have been so to all Israel had fidelity to their God been universal. But this was far from being the condition of Israel. There were many who belonged to Israel only in race. They were filled from the East, and soothsayers like the Philistines. They imitated the idolatries and practised the sins of the nations. Hence the prophets warn the people against a superficial conception of the Day of the Lord, as if it would be a mere interference of J^o in behalf of His people as a nation, and not a revelation of His righteous judgment—'Woe unto you that desire the day of the Lord. Wherefore will ye have the day of the Lord? It is darkness and not light; as if a man did flee from a lion and a bear met him' (Am 5¹⁸). Hence the Day is first of all judgment, and only through this salvation. Sometimes one side is made prominent and sometimes another, the side of judgment (as has been said) in the pre-exile prophets, and the other side in prophets later down (e.g. Ob 15). It is around the Day as one of judgment that all the terrible pictures of gloom and the dissolution of nature are gathered (Is 2. 3. 13. 24, Hos 10⁸, Am 5¹⁸, Jl 2²⁻¹⁰ 3, Zeph 1). These convulsions in nature which accompany the Day of the Lord may not be all to be explained in the same way, but the general idea seems this: the universe is a human world; man is the head of creation, and creation is virtually the earth; the heavens are a mere appendage of the earth, subserving the moral life of mankind—being for signs and seasons, and days and years. Hence in man's judgment the world suffers dissolution, and in his redemption it is renewed and transfigured.

3. As has been said, the coming of the Day was an article of faith as much as our belief in the Last Day, but the presentiment of its nearness was awakened by what the prophet perceived around him: the moral condition of the world (Is 2. 3, Mic 3), God's operations among the nations of the earth (Is 13, Zeph 1), His judgments on His people (Jl 1. 2), or the beginnings of their redemption already experienced at the Restoration, which led to the hope of His full manifestation to dwell in His House when it should be prepared (Hag, Zec). Naturally, though the Day of the Lord was a crisis, and itself of brief duration, the phrase 'that day' is often used to cover the period ushered in by the day. This is the period of final perfection and blessedness. It is identical with what in other passages is the Messianic age, and with the ideal condition following the Restoration as conceived by such prophets as Deuterio-Isaiah (Is 60). It is a period entirely homogeneous. There are no occurrences within

it. It has characteristics, but no internal development. It is a period of light and peace and the knowledge of God, which covers the earth as the waters cover the sea. Subsequent revelation has broken up the coming of the Messiah into a coming and a coming again, and history has intercalated between the two an age full of developments and vast changes. But the prophets embrace all in one period over which there hangs a divine light. The characteristics they assign to the Messianic age or the period introduced by the Day of the Lord are in the main those characteristics which we assign to the age which the second coming shall introduce. These characteristics are the issue of the first coming, the natural expansion of its principles; and to the prophets the principles and their realization all seem condensed into one point.

4. The prophets are not interested in giving mere predictions of external events or conditions of the world, but in setting before the people the moral development and issues of the kingdom; and just as the Day of the Lord seems to them to issue out of the conditions of the world of their own day, so they sometimes bring down the moral issues of the kingdom upon an external condition of the world such as it was in their own time. There is perfect realizing of moral principles, but the condition of the world in its kingdoms and the like remains unchanged. But ordinarily this is not the case.

(a) A constant feature in the eschatological picture is Israel's restoration to its own land. The Lord will say to the North, Give up; and to the South, Keep not back: bring my sons from far, and my daughters from the ends of the earth; even every one that is called by my name (Is 43⁶). And in this land all earthly blessings attend the people (Am 9¹¹⁻¹⁵); they attain joy and gladness, and sorrow and sighing shall flee away (Is 35¹⁰ 65¹⁹). The people are also truly the people of God—'Thy people shall be all righteous'; 'In the Lord shall all the seed of Israel be justified, and shall glory' (Is 45²⁵). The people's restoration to everlasting felicity and their righteousness are but different sides of the same thing. Cast out because of their sins, they are restored because of their righteousness, although the righteousness be one bestowed on them by God (Is 43^{26a}); and their restoration is the outer side of their justification, the token to their own heart and to the eyes of the nations that they are in truth now the people of God (Is 61⁹ 65^{17a}). The question how in our day we are to interpret such prophecies is a double one. It is a question, first, of what the prophets meant. And to this question there can be but one answer—their meaning is the literal sense of their words. They spoke of the people Israel and of the land of Canaan, and predicted the restoration of the people to their land, and their everlasting abode there with their God in the midst of them. This was their view in their day of the final condition of the people. Of course, to the prophets the essential thing was the spiritual perfection and blessedness of the people given by the presence among them of their God in His fulness, but they were unable to conceive this except as reflected in an external condition of the people. The other question is how we may expect these OT prophecies to be fulfilled now that the NT dispensation is come. There is no question as to the meaning of the OT prophecies; the question is how far this meaning is now valid. The question is not one to be dogmatic on, but we should naturally say that it is to be decided by the principles of the NT dispensation. The only NT writer who seems formally to argue the question is St. Paul (Ro 9-11). Now, he argues only on the spiritual side

of the Abrahamic covenant, or rather he regards the covenant as an exclusively spiritual or redemptive instrument (see art. COVENANT, last par.). Those, therefore, who, in advocating the idea of the Restoration of Israel to their own land, think themselves entitled to reason on the material side of the covenant (the promise of the land), cannot plead the apostle's authority nor his example. It may be made a question, indeed, whether his reasoning does not exclude theirs, for his view appears to be that the covenant from the moment it took effect was a purely spiritual and redemptive deed. To his mind the covenant guarantees the final salvation of Israel. The church of God is historical and continuous. It was planted in Abraham, and it is perennial. Israel was the church, and continues to be; and if the Gentiles be in it, they have been grafted in; and if some of the natural branches be meantime broken off, God is able to graft them in again; and this He will do, 'and so all Israel shall be saved.' This is St. Paul's manner of stating the idea of Deutero-Isaiah, that the true knowledge of the true God has been given once for all to Israel, and given to be the heritage of mankind. If the OT prophecies are to be brought into the argument, the order in which they place things must be observed. That order is, first, righteousness and faith, and then restoration to Canaan. A return of Jews to Canaan while still in unbelief, however interesting a thing in itself, does not come into contact with OT prophecy.

(b) Another feature in the eschatological picture is the relation of the nations to Israel and their God. In some prophecies, especially those that are apocalyptic in their character, there is the idea of a final attack on Israel by the nations, and a great conflict near Jerusalem or in Canaan, in which the nations are overthrown and destroyed (Ezk 38, 39, Jl 3, Zec 14, Ob v.¹⁸, Dn). But usually the nations are represented as attaching themselves to Israel, drawn either by the righteousness and humanity of the Messianic King (Ps 72), or convinced that the God of Israel is God alone (Is 2)—a conviction which they receive in various ways, as through J[']'s terrible revelation of Himself (Zeph 3^{s. 9}, Is 66^{18a}), but chiefly through the teaching of Israel, the servant of the Lord, who becomes the light of the nations, and the peoples wait on His arm (Is 42^s 49^s 50^a 51^a 60). But while already in the OT the Gentiles are fellow-heirs of salvation with Israel, the racial distinction is not obliterated. Jews and Gentiles do not amalgamate into one people or church—Israel 'inherits the Gentiles' (Is 54^s), 'the kingdom is given to the people of the saints of the Most High' (Dn 7²⁷). The nations occupy a subordinate place. There may be different shades of view in different passages. Of course, when the prophets wrote, Israel alone possessed the knowledge of the true God, and its place was that of benefactor of the nations, while theirs was that of recipients of blessing from Israel. Therefore the nations do homage to Israel, but it is to Israel as having the only true God within it—'they shall make supplication unto thee, saying, Surely God is in thee; and there is none else, no God' (Is 45¹⁴ 49²³, cf. 14² 60⁹ 61⁵).

5. From what has been said, it can be seen what general conceptions the OT contributes to Christian Eschatology. They are such as these: (1) the manifestation or advent of God; (2) the universal judgment; (3) behind the judgment the coming of the perfect kingdom of the Lord, when all Israel shall be saved, and when the nations shall be partakers of their salvation; and (4) the finality and eternity of this condition, that which constitutes the blessedness of the saved people

being the Presence of God in the midst of them—this last point corresponding to the Christian idea of heaven. All this is said of the people as a people. The people is immortal and its life eternal; and this life is conceived as lived in this world, though this world transfigured—a new heavens and a new earth (Is 65¹⁷). But are the individuals of the people immortal, or is their life, however prolonged and blessed, yet finally closed by death? It is probable that in most passages the prophets have in view the destinies of the people as a unity, the ultimate fate of individuals not being present to their mind. In some passages, however, the destiny of the individual is referred to, and a progress of idea may be observed, though, owing to the uncertain authorship of the passages, it may be precarious to infer at once that the more advanced are the later. In Is 65^{20a}, only a very prolonged life appears promised, 'the days of a tree,' he that dieth at a hundred years shall die a child (cf. Zec 8^s). But in the apocalyptic passage Is 24–27 death is represented as abolished, 'the Lord will swallow up death for ever' (25^s); and the promise extends to the nations as well as to Israel (ver.^{6a}). The conception of a resurrection first appears in the prophets, who speak of a resuscitation of the dead nation (Hos 6, Ezk 37). In Is 26¹⁹, however, the literal resurrection of individuals is predicted. This is the complement of the Restoration of the living members of the people. And in Dn 12 a resurrection both of the just and unjust is prophesied, though it remains somewhat uncertain whether the resurrection be universal, or be only of those who, in the preceding troublous times, had been specially prominent, whether on the side of righteousness or of evil.

II. ESCHATOLOGY OF THE INDIVIDUAL PERSON. —One of the strangest things in OT is the little place which the individual feels he has, and his tendency to lose himself in larger wholes, such as the tribe or the nation. When in earlier times the individual approached death, he felt that he had received the blessing of life from God and had enjoyed it in His communion; his sojourn with God had come to an end, he was old and full of days, and he acquiesced in death, however strange his acquiescence may seem to us. He consoled himself with the thought that he did not all die—'The memory of the righteous is blessed' (cf. Is 56⁴⁻⁵). He lived, too, in his children and in his people. He saw the good of Israel; his spirit lived, and the work of his hands was established. The great subject was the people, the nation; J['] had established His covenant with the nation, and the individual was blessed in the blessing and fortune of the whole. And he was content to have poured his little stream of life and service into the tide of national life, and in some degree to have swelled it. This was particularly the case, so far as can be judged, in earlier times. But when the nation came to an end with the Captivity, when national life and religion no more existed, the individual rose to his own proper place and rights, and felt his own worth and responsibility. Though the nation had fallen the individuals remained, and J['] and religion remained, though religion remained only in the heart of the individual. The religious unit, formerly the people, now became more and more the single person, and the truths regarding duty and responsibility, and the hopes of the future, enunciated by the prophets in regard to the people, were appropriated by the individual to himself.

In regard to the Eschatology of the individual person there are two things which require to be carefully distinguished. There are, *first*, certain ideas regarding death and the state of the dead lying in the popular mind, though cherished by

all classes, the righteous as well as others, alike. These ideas are common to Israel with some other Shemitic peoples. They have in themselves no moral significance. But some of them, such as the idea that the person, though he died, was not extinguished, but still subsisted as a person, however shadowy the state of subsistence was; and the other idea, that the dead person, though still subsisting, was in death cut off from all fellowship with the living, whether men or God,—these ideas formed points to which the aspirations of the pious might attach themselves, whether in the way of development, as of the first idea, or protest, as against the second idea. And, *secondly*, there are the aspirations, intuitions, or inferences of the pious mind itself. It is only these that can properly be called OT teaching. Such aspirations and intuitions may be either intellectual or emotional, that is, virtually, either ethical or religious, though the basis even of the religious is ethical. The fundamental idea is the moral one: God and man are moral beings, their relation is moral; the universe is a moral constitution, the stage where God displays His righteousness, and where man sees God's face in righteousness. Righteousness must win, and righteousness is eternal (Is 51⁶). This is the idea that underlies the Book of Job and such Psalms as 37, 49, and 73. There are thus three things to look at: (1) Death and the state of the dead; (2) Life; and (3) the Reconciliation of Death and Life.

(1) By death OT means what we mean when we use the word. It is the phenomenon which we observe. Now, all parts of OT indicate the view that at death the person is not annihilated; he continues to subsist in Sheol, the place of the dead, though in a shadowy and feeble form occasioned by the withdrawal of the spirit of life. In this condition of subsistence, which is not life but death, in Sheol, the common abode of all dead persons, there is no distinction in destiny between the righteous and the ungodly. OT does not name those in Sheol either souls or spirits, they are persons. It is possible that they were conceived as retaining a shadowy flickering outline of their former personality, for in Is 14 they sit on thrones, from which they rise up and speak. Subsistence in Sheol is a feeble, nerveless reflection of life on earth. These conceptions, as has been said, are not properly scripture teaching, only the popular notions from which its teaching starts. Illustrations of them are such passages as these among others, Ps 6, 30, Is 14, 38, Job 3, 10. Thus, to start with, OT is not materialistic, death is not the extinction of the formerly living person. Neither is it philosophic, regarding the body as the prison-house of the soul, released from which it can spread its wings and soar unfettered into regions of pure and perfect life. Nor is it, to begin with at least, Christian in the sense that the spirit attains to perfection at death.

(2) As by death so by life OT means what we mean by it. It starts from the idea, not of the soul, but of the person. Life is what we so call when we see it, the subsistence of the complete personality in the unity of its parts, body and soul. An essential part of man's being is the body; and life is life in the body, such as it is before the analysis which we call death, and corresponds therefore to the Christian synthesis called the resurrection life. Hence Job, when the idea of a second life first dawns upon him, can conceive it only as a renewal of the natural life—'If a man die, shall he live again?' (ch. 14). But as life was due to the communication by God of the spirit of life, and death to the withdrawal of this spirit, these operations came under the moral idea, and 'life' meant moral life in the favour of God (Ezk 33)—'in the way of

righteousness is life'; 'righteousness delivereth from death.' OT scriptures occupy themselves chiefly with the condition of man on this side of death, and they teach that whatever principles are involved in the relations of men to God they come always to light in this life; death does not change these relations; on the contrary, by its manner or circumstances it reveals them (Ps 37, 73).

(3) Now, this conception of life naturally came into collision with the fact of death. And OT doctrine of immortality, when *death* is had in view, consists of the efforts made by the faith of pious men to gain for the idea of life just referred to the victory over the fact of death. These efforts are of two kinds: one consists of an appeal against the fact of death, a demand for immortality or not dying, a protest against the fellowship of the living man here with God being interrupted, or a lofty assurance that it cannot be interrupted. It is quite possible that the examples of this may have to be referred to particular circumstances, when death might be actually threatening; but the language used, the demand made for the continuance of life, the lofty assurance of faith that the relation of the person to God cannot be interrupted, rise to the expression of principles, and are by no means merely the expression of an assurance that God would save from death on this particular occasion. This is the meaning of Ps 16, 'I have set the Lord always before me; because he is at my right hand, I shall not be moved. Thou wilt not leave my soul over to Sheol; thou wilt not let thine holy one see the pit.' What the speaker is assured of is deliverance from death. But his assurance has an absoluteness in it. It expresses principles. In his ecstasy of life in God he feels life to be eternal. The tie between him and J^o is indissoluble. With our more reflecting habits of thought this ecstasy of faith is hard to conceive. To us the fact of death is so inevitable that we cannot imagine any one resisting it. We accept the fact, and rest on what lies beyond. But the resistance of the pious Hebrew was due just to his not knowing what lay beyond, and was but a mode of making a demand for that which we now know to lie beyond.

The other line of thought was somewhat different; it was not so much a protest against dying, as a protest that dying was not death; it was a denial that death was to the saint of God that which the popular mind regarded it to be—a separation from God and descent into Sheol. The fellowship with God had in life, and which was life, would remain unbroken in death. This amounted to the faith that the godly soul would overleap Sheol and pass to God. This appears to be the faith expressed in Ps 49 and 73, and in a certain sense in Job 19.

Before these poetical passages, which are obscure, are briefly looked at, something must be said of Sheol and the state of the dead; though, as has been said, OT statements about Sheol chiefly reflect the popular sentiments, and have little positive value. It might be surmised from the strong expressions used many times of death in the OT that in death existence absolutely came to an end. Thus Ps 146⁴ 'his breath goeth forth, he returneth to his earth; in that very day his thoughts perish'; Ps 39¹³ 'O spare me, that I may recover strength, before I go hence, and be no more.' And perhaps most strongly of all Job 14^{7th} 'for a tree hath hope, if it be cut down, it will sprout again; but man lieth down, and riseth not; till the heavens be no more, they shall not awake, nor be raised out of their sleep' (cf. 7²¹). But these are only the strong expressions of despondency and regret over a life mournfully soon ended, and that never returns to be lived on this earth again. The conception of

Sheol is sufficient answer to the apparent doctrine which they teach. The word Sheol (שְׁאוֹל, twice written defectively, and usually *fem.*, as nouns of place mostly are), is of uncertain derivation. Its root has been supposed to be a softened form of another root (שָׁוַל, represented by שְׁוַל the hollow hand, Is 40¹²) signifying perhaps 'to be hollow,' in which case it would have the same meaning as our word 'hell' (Germ. *Hölle*); and the name 'pit' with which it is interchanged in OT (*ἀβύσσος* in NT) might seem to favour this derivation. A corresponding Assyrian *Suālu* (Fried. Del., *Jeremias*) is denied by Jensen. Sheol is the opposite of the upper sphere of light and life; it is 'deep Sheol' (Ps 86¹³ 63⁹), the region of darkness, 'a land of darkness as darkness itself, without any order, and where the light is as darkness' (Job 10²²). There is no strict topography to be sought for Sheol; it is in great measure the creation of the imagination, deep down under the earth or under the waters (Job 26⁶). It is not to be identified with the grave, though the grave be often regarded as the mouth of it; and it is sometimes represented as a vast burying-place (Is 14¹¹, Ezk 32²³). Sheol is the place of departed personalities; the generations of one's forefathers are there, and he who dies is gathered unto his fathers; the tribal divisions of one's race are there, and the dead is gathered unto his peoples, and if his descendants have died before him, they are there and he goes down to them, as Jacob to his son, and David to his child (Gn 37³⁵ 42³⁸, 2 S 12²³).

(1) *The state of those in Sheol.*—As death consists in the withdrawal by God of the spirit of life, the source of energy and vital power, the personalities in Sheol are feeble and flaccid. They are shades (שֵׁטֶט Job 26⁵, Is 14⁹). Their abode is called 'silence' (Ps 94¹⁷); it is 'the land of forgetfulness' (Ps 88¹²); 'the living know that they must die, the dead know not anything' (Ec 9⁶); 'his sons come to honour, and he knoweth it not; and they are brought low, and he perceiveth it not of them' (Job 14²¹). But other passages represent the existence of the dead in Sheol as a dreamy reflection of life on earth, in which self-consciousness and ability to recognize others still remain—'Art thou become weak as we; art thou become like unto us?' is the language addressed by the Shades to the prince of Babylon when he descends among them. (2) *There is no distinction of good and evil in Sheol.*—All must go into Sheol, and all alike are there (Job 3¹⁷). Sheol itself is no place of punishment nor of reward (Ec 9⁶), neither is it divided into compartments having this meaning: 'To-morrow,' said Samuel to the king whom God had rejected, 'to-morrow shalt thou and thy sons be with me' (1 S 28¹⁹). The idea of a deeper or darker Sheol in any penal sense cannot be verified. 'The farthest recesses of the pit' into which the prince of Babylon is thrust in death forms a mere antithesis to the 'farthest recesses of the North,' the abode of the gods, where he aspired to seat himself when alive (Is 14¹⁵). If the 'prison' referred to Is 24²² be Sheol, incarceration in Sheol, i.e. death, is regarded as the penal issue of the judgment. And the state of the dead being a reflection of life on earth, any dishonour done to one on earth, such as being deprived of sepulture, may still cleave to him when he descends into the Underworld (Is 14, Ezk 32). The language of Is 66²⁴ 'their worm dieth not, and their fire is not quenched,' refers to the bodies of the ungodly, which are cast out upon earth, an abhorring to all flesh, and not to the ungodly themselves in Sheol. (3) *All connexion with the world of the living is broken off.*—The dead can neither return to earth, nor does he know anything of the events passing there (Job 7⁹ 14¹², Ec 9⁶). Yet with the strong belief in the existence

of the persons in Sheol, there was naturally a popular superstition that they could be reached. This belief gave rise to the necromancy practised among the Hebrews, as among most peoples, though it is proscribed in the law and ridiculed by the prophets (Is 8¹⁹). The practice probably did not repose on any general idea that the dead must have a wider knowledge than the living, that 'there must be wisdom with great Death,' but on the idea that great personages continued still to be in death that which they had been in life. This appears to have been the idea of Saul in seeking unto Samuel. There is no record of any one answering from the dead except Samuel. The question whether any connexion was thought to exist between the person in Sheol and his body can hardly be answered. No such connexion existed as to interfere with the passage of the person into Sheol, whatever befell the body. The want of burial was in itself dishonouring, and the dishonour continued to cleave to the person among the dead, but it did not, as among some nations, prevent his descent to the world of the dead. There are some passages which seem to speak of a sympathetic rapport still existing between the body and the person in Sheol, but probably they hardly go further than to suggest the idea that the body, though thrown off, was still part of the man, and not mere common unrelated dust. (4) The main point is that *the relation between the dead person and God is cut off.* This is what gave death its significance to the religious mind. Fellowship with God ceases—'In death there is no remembrance of thee; in Sheol who shall give thee thanks?' 'For Sheol cannot praise thee; they that go down to the pit cannot hope for thy truth' (Is 38¹⁸).

The passages relating to the eschatology of the individual person are mostly poetical, and they are in some points obscure. They are such passages as Ps 16. 17. 22. 37. 49. 73, and many fragments of others, and Job. Now, with regard to these passages several things must be said: first, they are all late, later at all events than the prophetic faith of the 8th cent. This faith—belief in the coming manifestation of God, in the judgment, and in the eternal rest of the people in God's perfect kingdom—was the faith of the writers. Again, all the passages repose upon an acknowledged distinction among men, the distinction of the righteous and the ungodly. This distinction is visible, men are differently related to God. But the problem arose from the fact that men's destinies in the world were not seen to correspond to this distinction: in a moral world morality was not triumphant, in the government of the righteous God righteousness was not acknowledged. No doubt, the pious mind sometimes composed itself by a deeper analysis of that wherein true prosperity or felicity lay—the portion falling to it, even God Himself, was a pro-founder good than all earthly possessions (Ps 17. 73). Nevertheless, the problem remained and demanded solution. The solution was always an eschatological one, and was just the distinction between the righteous and the ungodly truly realizing itself. In other words, immortality or eternal life is the corollary of religion, as Christ, summing up the whole OT teaching, said, God is not the God of the dead, but of the living; it might even be said to be the corollary of morality—if the universe be a moral world there is everlasting life. The general position of OT saints, with their faith in the advent of God to judge, was very similar to that of the early Christians, who looked for the speedy coming of Christ. This coming would change the world and the Church, but the Church would pass living into perfect blessedness; and, of course, individuals would share the change—'We

shall not all die, but we shall all be changed.' Now, this was very like the feeling of OT saints. The individual would share the transition of the community, the Day of the Lord would break, and the living would enter into fulness of life without tasting death. True individualism is little seen in OT. It is real to this extent: the individual realized keenly his own personal life, and longed earnestly to share for himself in the blessings upon which the community would enter when God appeared to abide for ever among them. He longed that he, the living man, should see with his people the glory of the Lord revealed, and enter with his people into life. It was, perhaps, only the prospect of death, or reflection on it, that rounded off individualism and revealed its energies. The life of the community was perennial, but with death before him the individual could not share this life, and he sought to forecast his own personal destiny.

Thus there may be two classes of passages: (1) passages which, though spoken perhaps by individuals, express the hope of the living people, and refer to that great change which the Day of the Lord shall introduce, and which the individual, as part of the people, shall experience without tasting death; and (2) passages where the individual contemplates death, but expresses the assurance that he will not, like the ungodly, fall into Sheol, but see life. Ps 37 belongs to the first class, and possibly Ps 73, though the phrase 'take me' might, as in Ps 49, refer to escaping Sheol at death. Ps 49 has two peculiarities: first, its opening verses imply that its teaching on immortality is no more an aspiration, but a firm conviction; and secondly, it seems to start from the assumption that death is universal. If this be the case, the words, 'God will redeem my soul from Sheol,' must refer to the Psalmist's hope in death. This interpretation may certainly be supported by reference to the parable of Lazarus in Abraham's bosom, which shows that the idea of a blessedness of the spirit at death had been reached before the time of our Lord. It is enough here to state some general principles and give a classification of passages; for details the commentaries must be consulted.* The prophets and saints of the OT were not speculative men. They did not reason that the soul was immortal from its nature,—this was not the kind of immortality in which they were interested,—though, for all that appears, the idea that any human person should become extinguished or be annihilated never occurred to them. They did not lay stress in a reflective way on man's instinctive hopes of immortality, though they may be observed giving these instinctive desires expression. So far as they reasoned, their assurance was based on the moral idea—Righteousness is eternal. So far as they experienced and felt, their assurance was immediate—religion is reciprocal, the consciousness of God is God's giving Himself in the consciousness.

It has always been felt strange that the Pentateuch, which gives the constitution of the people of God, should be silent on death and immortality, or only refer to the popular idea of Sheol. In explanation it may be said that the earliest part of the Pent. is anterior to the prophets of the 8th cent., while the later portions are the reflection of the prophetic teaching. Deut. reposes on Isaiah and the prophets of the Assyrian age, and the Priests' Code on Ezekiel. The constitution which they furnish for Israel is the embodiment of the prophetic conceptions. But the conceptions of the prophets are ideal, their pictures of the true Israel are pictures of Israel of the future, Israel of

the perfect and final state; in other words, of Israel in what may be called its condition of immortality. The legislation seeks to impose this ideal on Israel of the present. Of necessity, when applied to the conditions of the actual Israel, the ideal was imperfectly realized, and was anew projected into the future.

LITERATURE.—Von Orelli, *Prophecies of the Consummation of the Kingdom*; Bertheau, 'Die Alt. Weissagung von Israel's Reichsherrlichkeit in seinem Lande,' *Jahrb. für Deutsche Theol.* vols. iv. v. The older literature on Immortality is given in Boettcher, *De Inferis*, 1846, and particularly in W. R. Alger, *A Critical History of the Doctrine of a Future Life, with a Complete Bibliography by Ezra Abbot*, New York, 1871. Besides the relative sections in the *Bib. Theologies*, useful works are: Oehler, *Vet. Test. Sententia de rebus post mortem futuris*, 1846; Perowne (Bp.), *Immortality* (Hulsean Lecture), 1869; Schultz, *Voraussetzungen der Christ. - Ascension of Isaiah }

Josephus.

The above authorities vary indefinitely in the degree of light they shed on the evolution of eschatological thought among the Jews. Thus very little help in this direction is to be derived from Sirach, the Book of Baruch, Judith, and 1 Maccabees. It is, in fact, to the pseudonymous apocalyptic writings that we are almost entirely beholden for the materials of which we are in quest. These not only supply the missing links which unite in orderly development the thought of OT to that of NT, but also in not a few cases are the only documentary authorities for views and doctrines which in later times established themselves securely in Christianity or Judaism.

II. SOME OF THE CONCEPTIONS WHICH GAVE BIRTH TO AND CONTROLLED THE EVOLUTION OF

* See particularly the *Anhang* to Studer's *Das Buch Hiob*, Bremen, 1881.

LATER JEWISH ESCHATOLOGY.—These conceptions were already at work in OT, but were applied only sporadically, and in a partially developed form. In the later period they gradually attain to their full rights.

1. *The enlarged conception of God as the Creator and Moral Governor of all the world, and its consequences.*—When once this idea is fully comprehended, the OT conception of Sheol can no longer logically exist. And yet these two conflicting conceptions did exist side by side for several centuries. So long as J^o was conceived simply as the tribal God of Israel, and as one among other gods, whose sole concern was the moral well-being and prosperity of His people on earth, then Sheol was naturally conceived as beyond the sphere of His dominion, and so preserved its ancient non-moral character. It is not, indeed, till almost the Maccabæan period that the former conception has transformed the latter, and the abode of the shades has become a place of moral retribution.

Another consequence of this enlarged conception of God was an enlarged conception of judgment. Since God was the Creator and Ruler of all men, the idea of a final and world judgment, in which the destinies of all should be decided, naturally arose. It must be conceded, however, that in Judaism this idea was, so far as the Gentiles went, always of the most one-sided and inequitable character. In their case, judgment, as a rule, meant simply condemnation. At best they were spared only to become subject to Israel.

2. *The conception of the individual, and his growing claims.*—The doctrine of individual retribution was evolved in OT.* It is the direct antithesis of the earlier view of the solidarity of the family, tribe, or nation. The latter doctrine, which identified the responsibilities of the individual with his family or nation, naturally led to strange consequences. Ezekiel (esp. in ch. 18) was the first to attack this doctrine in its entirety, and to replace it by an equally exaggerated and false individualism. As the consequences of sin were still confined to this life, the difficulties of this conception soon came to light. According to it every misfortune is a divine punishment, and every piece of prosperity a special instance of God's favour. The antinomies arising from such a view are discussed in Job and Ecclesiastes, and its untenableness demonstrated no less certainly than that of the doctrine it was intended to supersede. As long as the consequences of man's action were regarded as limited to this life, these antinomies were incapable of solution, and God's dealings with His righteous servants incapable of justification. But notwithstanding the bankruptcy of both these theories, or rather in consequence of it, the faith and religious thought of Israel were set free to attempt a truer and profounder solution of the problem. On the one hand, the *faithful servant* of J^o in due time came to be assured that neither here nor hereafter could he be separated from the love and presence of God; and that for him the ancient Sheol would stretch out its arms in vain. On the other, the *religious thinker* of Israel was equally assured that since God's righteousness did not attain to its full consequences here, it must do so elsewhere; and thus the doctrine of retribution was carried into the after-life, and a personal blessed existence, whether of limited or endless duration, whether as a member of the Messianic kingdom or a direct participant in a blessed immortality, became a postulate of religious thought. In due course the moralization of the old conception of Sheol was effected, not indeed in OT times, but in the sub-

* Cf. Gn 18²³⁻³³, Ex 32³³, Nu 16²², Dt 7¹⁰ 24¹⁶ etc.

sequent centuries, as we find in Apocalyptic literature.

3. *The growing transcendence of the Messianic expectations.*—In OT the hopes of Israel were in the main confined to *this world and to the well-being of the nation*. Thus they looked for the destruction of their national foes, for the purification of their people, and the establishment of an earthly kingdom of limited or endless duration. The scene of this kingdom was to be the earth purged from all violence and sin. But in the later period the gulf between the present and future begins to widen, and this process goes on till the last resemblances vanish, and the present appears a moral chaos under the rule of Satan and his angels, and the future is conceived as an unending kingdom of blessedness under the immediate sway of God or the Messiah.

III. THE HISTORICAL DEVELOPMENT OF JEWISH ESCHATOLOGY.—(A) 2nd cent. B.C.

Sirach.—The eschatology of this book belongs to the OT. Hades is the place of the shades and the region of death (9¹² 14¹². 16 21¹⁰ 41⁴ 48⁵). There is no delight there (14¹⁶), no praise of God (17²⁷⁻²⁸), man is plunged in an eternal sleep (46¹⁹ 22¹¹ 30¹⁷ 38²³). Retribution does not follow a man into the after-life (41⁴), but his sins are visited through the evil remembrance of his name, and in the misfortunes of his children after him (11²⁸ 23²⁴⁻²⁶ 40¹⁵ 41⁵⁻⁸). As regards the future of the nation, the writer looks forward to the Messianic kingdom of which Elijah is to be the forerunner (48¹⁰), when Israel will be delivered from evil (50²³. 24), the scattered tribes restored (33^{13a}, AV 36¹¹), the heathen nations duly punished (32²²⁻²⁴, AV 35¹⁸. 19). He expects also the eternal duration of Israel (37²⁵), and likewise of David's line (47¹¹).

*Ethiopic Enoch** 1-36.—This fragmentary writing represents the earliest, and at all events the most primitive, view of the 'last things' in the literature of the 2nd cent. B.C. According to this writer, retribution inevitably dogs the heels of sin. Thus punishment has already befallen sinful angels and men (10⁴⁻¹⁰. 12) in the first world-judgment (10¹⁻³). But the final judgment is yet to come. Meanwhile all who die enter one of the four divisions of Sheol, where they have a foretaste of their ultimate bliss or woe (22). In due course the final judgment comes, ushered in by the resurrection of the righteous and the wicked (with the exception of one class of the latter, 22¹². 13). The resurrection seems to be limited to Israel and its progenitors. The fallen angels, demons, and men then receive their final award (10¹² 16¹ 19). The former are plunged into an abyss of fire (= Tartarus, 10¹⁸. 14), while the wicked amongst men are cast into Gehenna, and their punishment is a spectacle for the righteous (27². 3). Then the eternal Messianic kingdom is established, with Jerusalem and Palestine for its centre (25⁹). God makes His abode with man (25⁹)—there is no Messiah. All the Gentiles become righteous and worship God (10²¹). The righteous eat of the tree of life, and enjoy patriarchal lives (5⁹ 25⁶) and every material blessing (5⁷ 10¹⁸. 19 11²), begetting each 1000 children (10¹⁷). There is no hint as to what becomes of the righteous after the second death.

Observe that (1) justice is done to the claims of the righteous nation by the establishment of an eternal Messianic kingdom; (2) and likewise to those of the righteous individual by his resurrection to a long life in this kingdom; also (3) that Sheol has undergone transformation, and become an *intermediate place of moral retribution* for the righteous and the wicked for the first time in literature; (4) Gehenna appears as the final place

* For some treatment of the critical and exegetical questions of this work, the readers should consult the article on this book.

of punishment for apostate Jews, and Tartarus for the fallen angels; and (5) that the final judgment precedes the Messianic kingdom, and is limited to Israel.

Daniel.—The eschatology of this book in some respects marks an advance on that of the writer just quoted. When the need of the 'saints of the Most High' is greatest (7²¹, 22, 12¹, in the persecution under Antiochus), the Ancient of Days will intervene, and His throne of judgment will be set up (7⁹), and the kingdoms of the world will be overthrown (7¹¹, 12), and supreme and everlasting dominion given to His saints (7¹⁴, 22, 27); and these will 'break in pieces and consume' (2⁴⁴) all the kingdoms of the world, and all 'peoples, nations, and languages shall serve' them (7¹⁴); their 'dominion is an everlasting dominion which shall not pass away' (7¹⁴). And the righteous who 'sleep in a land of dust * shall awake,' to share in the eternal life and blessedness of this kingdom (12¹⁻³).

Observe that (1) the Messianic kingdom—there is no Messiah—is established not only through the personal intervention of God, but also through the active efforts of His saints. The latter feature reappears frequently in the later Apocalypses as the 'period of the sword.' (2) The resurrection is a resurrection of the body, and embraces all Israel. (3) The scene of the kingdom is the earth; for 'all peoples, nations, and languages' are its subjects (7¹⁴). (4) The context does not decide whether the risen body will possess its natural appetites, as in Eth. En. 1-36, but seems to favour this idea. (5) 'Everlasting life' (12², or rather 'æonian life' חַיִּים עוֹלָמִים) may mean nothing more than a very long life, as in Eth. En. 1-36. (6) Nothing is said as to the future abode of the Gentiles.

Ethiopic Enoch 83-90 (B.C. 166-161).—The writer of this book has advanced considerably beyond the naïve and sensuous views presented in Eth. En. 1-36. His views are more spiritual, and closely allied to the Daniel Apocalypse, which was written a few years earlier. His eschatology is developed at greater length than that of Daniel. Like Daniel, he regards every people under heaven as being under the control of a guardian angel. But this view is peculiarly applied in this author. The undue severities that have befallen Israel are not from God's hand, but are the doing of the 70 shepherds (i.e. angels) into whose care God had committed Israel (89⁵⁹). But these angels have not wronged Israel with impunity; for judgment is at hand. When their oppression is sorest, a righteous league will be formed (i.e. the Ḥasidim, 90⁶), and in it there will be a family from which will come forth Judas the Maccabee (90⁹⁻¹⁰), who will war victoriously against all the enemies of Israel. While the struggle is still raging, God will appear in person, and the earth will swallow the adversaries of the righteous (90¹⁵). The wicked shepherds and the fallen watchers will then be cast into an abyss of fire (i.e. Tartarus, 90²⁰⁻²⁵), and the apostates into Gehenna (90²⁶). Then God Himself will set up the New Jerusalem (90²⁸, 29), and the surviving Gentiles will be converted and serve Israel (90³⁰), and the dispersion will be brought back, and the *righteous* Israelites will be raised to take part in the kingdom (90³³). When all is accomplished, the Messiah will appear (90³⁷), and all will be transformed into his likeness.

Observe (1) the growing consciousness of the evils and imperfections of the present world. Thus even Israel for a time is ruled by wicked angels. This dualism manifests itself also in the picture of

the future kingdom. Then its centre is not the earthly Jerusalem, but the New Jerusalem, brought down from heaven obviously on the ground of the unfitness of the former. Yet the writers of Eth. En. 1-36 and Daniel were not conscious of this unfitness. (2) As against the two preceding books, Eth. En. 1-36 and Daniel, this book teaches the resurrection of the righteous only. (3) We have here the earliest reference to the Messiah in Apocalyptic literature. But he has no real part to play in the kingdom, and his introduction seems due merely to literary reminiscence.

Ethiopic Enoch 91-104 (B.C. 134-94).—As we pass from the eschatological views of the three preceding books to those of the present, we feel conscious we are entering into a world of new conceptions. In the former books the resurrection and the final judgment were the prelude to an everlasting Messianic kingdom, but in this these great events are relegated to its close. The author acknowledges that the wicked are seemingly sinning with impunity; but this is not so: their evil deeds are recorded every day (104⁷), and for these they will suffer endless retribution in Sheol (99¹¹); and from this hell of darkness and of flame, into which their souls enter on death, they will never escape (98³, 10 104⁷⁻⁸). In the eighth week, moreover, the Messianic kingdom will be set up, and the righteous will slay the wicked with the sword (91¹² 95⁷ 96¹ etc.). At the close of this kingdom in the tenth week the final judgment will be held, and the former heaven and earth will be destroyed, and a new heaven created (91¹⁴⁻¹⁶). Then the righteous dead, who have hitherto been guarded by angels (100²), will be raised (91¹⁰ 92³), but not in the body, but as spirits only (103³⁻⁴), and they shall joy as the angels (104⁴), and become companions of the heavenly hosts (104⁶), and shine as the stars for ever (104²).

Observe that (1) the dualism we have noticed above has already led to its logical results. (2) Thus the Messianic kingdom is apparently for the first time in literature conceived of as temporary. (3) Sheol has for the first time become the equivalent of hell (yet see Eth. En. 22¹³). (4) The resurrection is for the first time regarded as of the spirit only. (5) Even the heavens need to be created anew.

Tobit.—The eschatology of this book, like that of Sirach, belongs to the OT. The same view of the after-life prevails (4¹⁰). It entertains, like the OT, high hopes for the nation. Thus Jerusalem and the temple will be rebuilt with gold and precious stones, the scattered tribes restored, and the heathen, forsaking their idols, will worship the God of Israel (13¹⁰⁻¹⁸ 14⁴⁻⁶).

Sibylline Oracles, Proemium and 3⁹⁷⁻⁸¹⁸.—This book contains many details concerning the last times; but as it belongs to Hellenistic Judaism, it is only of secondary interest in this study of Jewish Palestinian eschatology. It contains, however, a vivid account of the Messianic kingdom. Very soon the people of the Mighty God will grow strong (3¹⁰⁴⁻¹⁰⁶), and God will send the Messiah from the East, who will put an end to evil war, slaying some and fulfilling the promises in behalf of others, and he will be guided in all things by God. And the temple will be resplendent with glory, and the earth teem with fruitfulness (3⁶⁵²⁻⁶⁶⁰). Then the nations will muster their forces and attack Palestine (3⁶⁶⁰⁻⁶⁶⁸); but God will destroy them, and their judgment will be accompanied by fearful portents (3⁶⁶⁷⁻⁶⁹⁷). But Israel will dwell safely under the divine protection (3⁷⁰²⁻⁷⁰⁹); and the rest of the cities and the islands will be converted, and unite with Israel in praising God (3⁷¹⁰⁻⁷³¹). The blessings of the Messianic age are recounted (3⁷⁴⁴⁻⁷⁵⁴; cf. also 3³⁶⁷⁻³⁸⁰, 619-623). And the kings of the earth will be at peace with one another (3⁷⁵⁵⁻⁷⁵⁹).

* This is the natural translation of אֲשֶׁר יִשְׁכַּח. For Sheol in this sense compare Job 17¹⁶. Sheol here seems to preserve its OT sense as a place of semi-conscious existence where moral retribution is unknown. Only by waking from this condition can man enter on the retribution that is his due.

And God will establish a universal kingdom over all mankind, with Jerusalem as centre (3⁷⁶⁷⁻⁷⁷¹), and the prophets of God will lay down the sword and become judges and kings of the earth (3⁷⁶¹⁻⁷⁸²), and men will bring offerings to the temple from all parts of the earth (3⁷⁷²⁻⁷⁷⁸).

Testaments of the XII Patriarchs.—Until a critical edition of this composite work is published, it is dangerous to quote it as an authority. While it contains many sections that appear to be as early as B.C. 140, the body of the work seems to have been written about the beginning of the Christian era. There are, moreover, numerous Christian interpolations. Till a critical edition of the text and contents is published, it is best not to cite it as evidence on the present subject. Its evidence, though valuable, is in no respect extraordinary, or unvouched for elsewhere.

Judith.—This book is singularly barren in eschatological thought. It speaks of the judgment of the heathen (16¹⁷).

(B) 1st cent. B.C.

Ethiopic Enoch 37-70 (B.C. 94-64).—These chapters form the well-known 'Similitudes,' the most important element in the Book of Enoch. The writer's eschatological views are as follows:—In the latter days sin will flourish in the world; sinners will deny the name of the Lord of Spirits (38² 41²) and of His Anointed (48¹⁰); and the kings and the mighty will oppress the elect of the children of God (62¹¹). But suddenly the Head of Days will appear, and with Him the Son of Man (46² 48²), to execute universal judgment. And all Israel will be raised from the dead (51¹ 61⁹), and all judgment will be committed to the Son of Man (41⁹ 69²⁷), who will possess universal dominion (62⁶) and sit on the throne of God (47³ 51³). And he will judge all the angels, unfallen and fallen (61⁸ 55⁴), and the righteous and the sinners amongst men (62² 8), and the kings and the mighty (62³⁻¹¹ 63¹⁻⁴ 11). And the fallen angels will be cast into a fiery furnace (54⁹), and the kings and the mighty will be tortured in Gehenna by the angels of punishment (53³⁻⁵ 54¹⁻²), and the remaining sinners and goddess will be driven from off the face of the earth (38³ 41² 45⁶); the Son of Man will slay them by the word of his mouth (62²). And heaven and earth will be transformed (45⁴ 5), and the righteous will have their mansions therein (39⁶ 41³). And the Elect One will dwell amongst them (45⁴). And they will be clad in garments of life (62¹⁶ 16), and become angels in heaven (51⁴), and grow in knowledge and righteousness (58⁵).

Observe that (1) the Messianic kingdom is here of everlasting duration, but its scene is no longer the present earth, as in the literature of the preceding century, but a transformed heaven and earth. Thus in the process of evolution Messianic thought has become more transcendent. (2) The Messiah for the first time in Jewish literature is represented as a supernatural being and as the Judge of men and angels. (3) The hopes of a Messiah, which in the 2nd cent. B.C. were practically dead, have, owing partly to the circumstances of the time, risen to a new and vigorous life. See the review of the Pss. of Solomon, below. (4) Several Messianic titles appear in this book for the first time in literature: 'Christ' (48¹⁰ 52⁴), 'the Righteous One' (38² 53⁶), 'the Elect One' (40⁶ 45³ 4), 'the Son of Man' (46² 48² etc.). (5) All questions affecting the future destinies of the Gentiles are ignored, if we regard 50 as an interpolation; but if it belongs to the context, the writer teaches that when the kings and the mighty and the sinners are destroyed, the remaining Gentiles will be saved if they repent and forsake their idols. God will have mercy on them, but give them no honour or glory.

1 Maccabees.—This book is entirely wanting in eschatological teaching, if we except the writer's expectation of a prophet in 4⁴⁶ 14⁴¹.

Psalms of Solomon (B.C. 70-40).—Like the Similitudes, this book is of Pharisaic authorship. They proclaim in common a vigorous Messianic hope, but on very divergent lines. In the preceding century this hope was practically non-existent. So long as Judas and Simon were chiefs of the nation, the need of a Messiah was hardly felt. But in the first half of the next century it was very different. Subject to ruthless oppression, the righteous were in sore need of help. As their princes were the leaders in this oppression, they were forced to look for divine aid. Thus the bold and original thinker to whom we owe the Similitudes conceived the Messiah as the supernatural Son of Man, who should enjoy universal dominion and execute judgment on men and angels. But other religious thinkers, returning afresh to the study of O.T., revived, as in the Psalms of Solomon, the expectation of the prophetic Messiah, sprung from the house and lineage of David (17²³). As the hopes of this Messiah are confined to Pss 17, 18, and in all the Pss that precede there is not even the remotest hint of such hopes, it is reasonable to infer a difference of authorship. There are other grounds for the same inference, but we cannot deal with them here. In recounting, therefore, the eschatology of Ps.-Sol, we shall first deal with Pss 17, 18.

Pss 17, 18. The Messiah—specifically so called in 17³⁶ 18⁸—is to spring from the lineage of David (17²³), to be a righteous king (17³⁶), pure from sin (17⁴¹). He will gather the dispersed tribes together (17²⁸ 30), and purify Israel (17²⁸ 29), and will suffer no Gentile to sojourn amongst them (17³¹), nor any iniquity to lodge in their midst, nor any that knoweth wickedness (17²⁹ 30); and all the people will be holy (17²⁶), even sons of God (17³⁰). But as for the ungodly nations, he will destroy them with the word of his mouth (17²⁷, cf. 17³⁹), for his weapons will not be carnal; nor will he trust in horse or rider or bow, or in silver or gold (17³⁷), but he will overthrow sinners by the might of his word (17⁴¹). And the remaining Gentiles will become subject to him (17³¹ 32); and he will have mercy on all the nations that come before him in fear (17³³), and they will come from the ends of the world to see his glory (17³⁴), and bring her sons as gifts to Zion (17³⁴). And the Messiah will not faint all his days (17⁴²).

Observe that (1) the Messiah is, however highly endowed, a man and nothing more. (2) It follows that his kingdom can only be of temporary duration. (3) It falls in with both these observations, that there is not a hint of the righteous rising from the dead to share in it. This conclusion is confirmed by the beatitude of 17⁵⁰, 'Blessed are they that shall be born in those days to behold the blessing of Israel which God shall bring to pass in the gathering together of the tribes.' Thus only the surviving righteous share in this temporary earthly kingdom. (4) The Gentiles are still mercifully dealt with. Such as have not been hostile to Israel are spared and become subject.

Pss 1-16. The bulk of these Pss are silent as to the future. They are all absolutely silent as to the Messiah. On the other hand, they paint in glowing colours the restoration of the tribes (8³⁴ 11³⁻⁹). A Messianic kingdom was therefore probably expected—at all events a period of prosperity, when God's help is promised (7⁹). But beyond prophesying vengeance on the hostile nations and the sinners, the psalmists do not dwell on this period. The real recompense of the righteous is not, in their thoughts, bound up with this earthly kingdom. The righteous rise not to any kingdom of temporal prosperity, but to eternal life (3¹⁶ 13⁹), they inherit life in gladness (14⁷), and live in the

righteousness of their God (15¹⁵). There seems to be no resurrection of the body. As for the wicked, on the other hand, 'their inheritance is Hades (here=hell) and darkness and destruction' (14⁶), destruction and darkness (15¹¹), and into their heritage in Hades they enter immediately on dying (16²), and their iniquities pursue them thither (15¹¹). Thus the eschatology of Pss 1-16 agrees in nearly every point with that of Eth. En. 91-104, and so calls for no further comment here.

2 *Maccabees*.—There is no direct reference to a Messianic kingdom in this book, though it might be possible to reason back to it from the expectation of the restoration of the tribes (2¹⁵). There is certainly no hint of a Messiah. On the other hand, however, the doctrine of retribution, present and future, plays a significant rôle. Present retribution follows sin alike in the case of Israel and of the Gentiles, but in the case of Israel its purpose is corrective, whereas in that of the Gentiles it is vindictive (6¹²⁻¹⁵). Though God punish His people, He does not withdraw His mercy from them (6¹²⁻¹⁶ 14¹⁶). In order to show the certainty of retribution in this life, the writer rewrites history, and makes individual sinners suffer the penalties which he thinks, in strict justice, they ought to have suffered: thus compare the final earthly destinies of the heathen oppressors, Epiphanes (7¹⁷ 9⁶⁻¹²) and Nicanor (15²²⁻²⁵); and of the Hellenizing Jews, Jason (5⁷⁻¹⁰) and Menelaus (13⁸). Even the martyrs confess their sufferings to be due to sin (7¹⁸ 22³⁸). Immediate retribution is a token of God's goodness (6¹³). But our present concern is mainly with retribution beyond the grave. The righteous and the wicked of Israel enter after death the intermediate state (Hades), where they have a foretaste of their final doom (6²⁶), which takes effect after the resurrection. There is to be a resurrection of the righteous (7⁹ 11 14 23 29 36), possibly even of all Jews (12⁴³⁻⁴⁴). The resurrection is to be clearly that of the body (7¹¹). Apparently, it is to accompany the final judgment. Of the heathen there will be no resurrection: when they die they enter at once on their eternal doom (7¹⁴). There appears to be no blessed future for any of the Gentiles.

(C) 1st cent. A.D.

Book of Jubilees.—Like many of the books just reviewed, the Book of Jubilees makes no mention of a Messianic king. It sketches, however, in vigorous terms, the woes that are to be the prelude of the Messianic kingdom, the attacks of the heathen powers, and then the gradual introduction of the kingdom effected through devotion to and observance of the law. Thus the Messianic woes are described in 23¹⁸ 19 22 'Calamity follows on calamity, and wound on wound, and tribulation on tribulation, and evil tidings on evil tidings, and illness on illness, and all evil judgments such as these, one with another, illness and overthrow, and snow and frost and ice, and fever, and chills, and torpor, famine, and death, and sword, and captivity, and all kinds of calamities and pains. 19. And they will strive one with another, the young with the old, and the old with the young, the poor with the rich, and the lowly with the great, and the beggar with the prince, on account of the law and the covenant; for they have forgotten His commandment, and the covenant and the feasts, and the months, and the Sabbaths, and the jubilees, and all judgments. 22. And a great punishment will befall the deeds of this generation from the Lord; and he will give them over to the sword and to judgment and to captivity, and to be plundered and devoured.'

And thereupon will ensue the invasion of Palestine by the Gentiles (23²³ 24). 'And he will wake up against them the sinners of the Gentiles, who will show them no mercy or grace, and who respect

the person of none, neither old nor young, nor any one, for they are wicked and powerful, so that they are more wicked than all the children of men. And they will use violence against Israel and transgression against Jacob, and much blood will be shed upon the earth, and there will be none to gather it and none to bury. 24. In those days they will cry aloud, and call and pray that they may be saved from the hand of the sinful Gentiles; but none will be saved.'

Then Israel will repent (23²⁶). 'And in those days the children will begin to study the laws, and to seek the commandments, and to return to the paths of righteousness' (23¹⁶ 27-30). '16. And in that generation the sons will convict their fathers and their elders of sin and unrighteousness, and the words of their mouth and the great wickednesses which they perpetrate, and concerning their forsaking the covenant which the Lord made between them and Him, that they should observe and do all His commandments and His ordinances and all His laws, without departing either to the right hand or the left. 27. And the days of the children of men will begin to grow many, and increase from generation to generation and day to day, till their days draw near to one thousand years, and to a greater number of years than (before) were their days. 28. And there will be no old man nor one that is not satisfied with his days, for all will be (as) children and youths. 29. And all their days they will complete in peace and in joy, and they will live, and there will be no Satan nor any evil destroyer; for all their days will be days of blessing and healing. 30. And at that time the Lord will heal His servants, and they will rise up and see great peace and drive out His adversaries, and the righteous will see and be thankful, and rejoice with joy for ever and ever, and will see all their judgments and all their curses on their enemies.' Finally, when the righteous die their spirits will enter into a blessed immortality (23³¹). 'And their bones will rest in the earth and their spirits will have much joy, and they will know that it is the Lord who executes judgments, and shows mercy to hundreds and thousands of all that love Him.'

Observe that (1) apparently there is no resurrection of the dead, and that the soul enters at death on its final destiny. (2) Sheol has thus become hell (24³¹). 'For though he ascend unto heaven, thence will he be brought down; and whithersoever he flee on earth, thence will he be dragged forth; and though he hide himself amongst the nations, even from thence will he be rooted out; and though he descend into Sheol, there also shall his condemnation be great, and there also he will have no peace.'

Assumption of Moses (A.D. 7-29).—This book is closely allied to that of Jubilees in many respects. Thus the preparation for the advent of the Theocratic or Messianic kingdom will be a period of repentance (1¹⁸). 1750 years after the death of Moses, God will intervene on behalf of Israel (10¹²), and the ten tribes will be brought back from the captivity.* During this kingdom Israel will destroy her natural enemies (10⁸), and finally be exalted to heaven (10⁸), whence she shall see her enemies in Gehenna (10¹⁰).

Observe that (1) there is no Messiah. Indeed the author in 10 appears to be really inimical to this expectation: 'The eternal God alone . . . will punish the Gentiles.' (2) There appears to be no resurrection of the body, but of the spirit only after the final judgment, similarly as in Eth. En. 91-104, Pss of Solomon, and Jubilees. (3) Gehenna, which originally was the specific place of punishment for apostate Jews, has now become the final abode of the wicked generally.

* See Charles' *Assumption of Moses*, pp. 59, 60.

Philo (B.C. 25–A.D. 50).—We shall touch only on the main points of Philonic eschatology. Philo looked forward to the return of the tribes from captivity, to the establishment of a Messianic kingdom of temporal prosperity, and even to a Messiah. The *loci classici* on this subject are *De Exæcrat.* § 8–9, and *De Præm. et Pæn.* § 15–20. The inclusion of the Messiah and the Messianic kingdom in Philo's eschatology, though really foreign to his system, is strong evidence as to the prevalence of these expectations even in Hellenistic Judaism. Apparently, he did not look forward to a general and final judgment. All entered after death into their final abode. The punishment of the wicked was for everlasting (*De Cherub.* § 1); even wicked Jews were committed to Tartarus (*De Exæcrat.* § 6). As matter was incurably evil, there could of course be no resurrection of the body. Our present life in the body is death (*De Leg. Alleg.* § 1).

*Slavonic Enoch** (A.D. 1–50).—As the earth was created in six days, its history, according to this book, will be accomplished in 6000 years; and as the six days of creation were followed by one of rest, so the 6000 years of the world's history will be followed by a rest of 1000 years—the millennium or Messianic kingdom. Then time will pass into eternity (32^a–33^a). In this Messianic kingdom there is no Messiah. At the close of this kingdom the final judgment is held, variously called 'the day of judgment' (39^a 51^a), 'the great day of the Lord' (18^b), 'the great judgment' (52^b 58^b 65^b 66^b), 'the day of the great judgment' (50^d), 'the eternal judgment' (7¹), 'the great judgment for ever' (60^d), 'the terrible judgment' (48^b), 'the immeasurable judgment' (40¹²). But prior to the final judgment the souls of the departed are in intermediate places. Thus the rebellious angels are confined to the second heaven, awaiting in torment the eternal judgment (7¹⁻³). The fallen lustful angels are kept in durance under the earth (18^a). Satan, being hurled down from heaven, has the air as his habitation (29^{a-5}). There is no definite account of the intermediate place for men's souls. The writer declares, however, that places have been prepared for every human soul (49^a 58^a). From the latter context these appear to constitute the intermediate place for human souls. In 32^a Adam is sent back to this receptacle of souls on his death, and is transferred from it to paradise in the third heaven after the great judgment (42^a). Even the souls of beasts are preserved till the final judgment, in order to testify against the ill-usage of man (58^{a-6}). On the conclusion of the final judgment the righteous enter paradise as their eternal inheritance and final abode (8. 9. 42^{a-5} 61^a 65¹⁰). The wicked are cast into hell in the third heaven, where their torment will be for everlasting (10. 40¹² 41² 42¹⁻² 61³). There is apparently no resurrection of the body—the righteous are clothed with the garments of God's glory (22^b, cf. *Eth. En.* 62¹⁶ 108¹²). The seventh heaven is the final abode of Enoch (55² 67²), but this is an exceptional privilege.

Observe that (1) we have here the first mention of the millennium. (2) There is no resurrection of the body; but at the final judgment the souls of the righteous, which have in the interval been in the intermediate place, are now clothed with God's glory and admitted to paradise.

Book of Wisdom.—In this Alexandrian work there is no Messiah, but there is an expectation of the Messianic or Theocratic kingdom, where the righteous will judge the nations and have dominion (37^{a-8}). There will be no resurrection of the body; for the soul is the proper self; the body is a mere burden taken up by the pre-existent soul, but in

* For further details see Morfill and Charles' *editio princeps* of this book; also the art. ENOCH (Bk. of Secrets of).

due season laid down again. Accordingly, there is only an immortality of the soul. The immortality of the righteous soul and its future blessedness are set forth in terms remarkable at once for their beauty and vigour (3¹⁻⁴ 4² 7. 10 15³). As for the wicked, they will be punished with death (1¹² 16. 2²⁴); they will be bereft of hope (3¹¹ 18. 5¹⁴); the time for repentance is past (5²); they will be utterly destroyed (4¹⁹), yet not annihilated; for they will be subject to pain (4¹⁹); and be aware of the blessedness of the righteous (5¹⁻²).

Observe that the righteous in Israel are to judge the nations. This seems to be a later development of the judgment by the sword frequently mentioned in previous literature (cf. *Dn* 2⁴⁴; *Eth. En.* 91¹² etc.). Thus the judgment of the saints has become a *forensic* one, as that of the Messiah (cf. 1 Co 6²).

4 Maccabees.—This book is a philosophical treatise on the supremacy of the reason. The writer adopts, so far as possible, the tenets of Stoicism. He teaches the eternal existence of all souls, good and bad, but no resurrection of the body: the good will enjoy eternal blessedness in heaven (9² 12¹² 13¹⁷ 15² 17³); but the wicked will be tormented in fire for ever (9⁹ 10¹⁵).

*Apocalypse of Baruch** (A.D. 50–80).—Of this composite work the six or more independent constituents may be ranged in three classes when treated from the standpoint of their eschatology. Thus the Messiah Apocalypses A¹ A² A³, i.e. 27–30¹ 36–40 53–74, form the first class. i. This differs from the remaining part of the book in being written prior to A.D. 70 and in teaching the doctrine of a personal Messiah. The rôle of the Messiah in A¹ is entirely a passive one, whereas in A² and A³ he is a warrior who slays the enemies of Israel with his own hand. In all three Apocalypses the Messiah-Kingdom is of temporary duration. In A² 'his principate will stand for ever until the world of corruption is at an end' (40³); in A³ his reign is described as 'the consummation of that which is corruptible, and the beginning of that which is incorruptible' (74²). In A² and A³ the kingdom is inaugurated with the judgment of the sword (39⁷–40² 72²⁻⁶). The Gentiles that had ruled or oppressed Israel should be destroyed, but those that had not done so should be spared, in order to be subject to Israel (72²⁻⁶). The final judgment and the resurrection follow on the close of these kingdoms. Of the two remaining classes, the second consists of B¹ and the third of B² and B³, written after A.D. 70.

ii. In B¹, i.e. 1–9¹ 43–44⁷ 45–46⁶ 77–82. 84. 86–87, the writer looks forward to the rebuilding of Jerusalem (6⁹), the restoration of the exiles (77⁶ 78⁷), the Messianic kingdom, but no Messiah (1⁵ 46⁶ 77¹²). There is no consideration shown for the Gentiles (82²⁻⁷).

iii. In B², i.e. 13–25. 30²–35. 41–42. 44⁸⁻¹⁵ 47–52. 75–76. 83, the writer has relinquished all hope as to the present corruptible world, and fixes his regards wholly on the incorruptible world that is to be. The world will be renewed (32^a), and in this renewal, from being transitory and verging to its close (48⁵⁰ 85¹⁰), it will become undying (51²) and everlasting (48⁵⁰); from being a world of corruption (40³ 74² 21¹³ etc.), it will become incorruptible and invisible (74² 51³). The teaching as to the resurrection proceeds on parallel lines. Thus in answer to the question, 'Wilt thou perchance change these things (i.e. man's material body) which have been in the world, as also the world?' (49³), it is shown in 50 that the dead will be raised with their bodies, exactly in the same form in which they had been committed to the earth, with a view to their recognition by those who knew them. When this

* For a fuller treatment of the questions touched upon here see Charles' *Apocalypse of Baruch*.

recognition is completed, the bodies of the righteous will be transformed, with a view to a spiritual existence of unending duration and glory (51¹. 3. 7-9); and they will be made like unto the angels and equal to the stars, and changed from beauty into loveliness, and from light into the splendour of glory (51¹⁰). They will surpass the angels in excellency (51¹²). In B³, *i.e.* 85, there is the same despair of a national restoration as in B², and only spiritual blessedness is looked for in the world of incorruption (85⁴. 5).

Observe that (1) in B² Sheol is the intermediate abode of the souls of the departed prior to the final judgment (2³ 48¹⁸ 52², cf. 56⁶). This intermediate place is one involving certain degrees of happiness or torment. For the wicked it is an abode of pain (30⁸ 36¹¹), but not to be compared with their torments after the final judgment. As for the righteous, these are preserved in certain 'chambers' or 'treasuries' which are in Sheol (4 Ezr 4⁴¹), where they enjoy rest and peace and are guarded by angels (Eth. En. 100⁵, 4 Ezr 7²⁶). From these they issue forth at the final judgment, to receive their everlasting reward (30⁹). (2) From the account of the resurrection in 49²-51, it is clear that the Pauline teaching in 1 Co 15³⁵⁻⁵⁰ is in some respects a developed and more spiritual expression of ideas already current in Judaism.

Book of Baruch.—In this composite work there is little that demands our attention. 1-3³ is undoubtedly derived from a Hebrew original, and possibly part of 3³-5. It is composed of at least three independent writings. As to their dates, nothing satisfactory has been yet arrived at. It is noteworthy that in 2¹⁷ Hades still possesses its OT connotation. The restoration of Jerusalem is looked for (4¹⁹⁻²⁵) and the return of the exiles (4²⁶-5).

4 *Ezra.*—We shall adopt provisionally some of the critical results attained by Kabisch on this book. Of the five independent writings which he discovers in it, two were written prior to A.D. 70, and three subsequently. The two former he designates respectively as an Ezra Apocalypse and a Son-of-Man Vision. (a) The Ezra Apocalypse consists of chapters 4⁵²-5^{13a} 6¹²⁻²⁵. 28 7²⁶⁻⁴⁴ 8⁶³-9¹², and is largely eschatological. The signs of the last times are recounted at great length (5¹⁻¹² 6¹³ 9¹⁻³. 6), the destruction of Rome (5³), and the advent of the Messiah, the Son of God (5⁸ 7²⁸). Certain saints will accompany the Messiah (7²⁸), and all the faithful who have survived the troubles that preceded the kingdom will rejoice together with the Messiah for 400 years.* Then the Messiah and all men will die (7²⁸), and in the course of seven days the world will return into its primeval silence, even as in seven days it was created (7³⁰). Then the next world will awake and the corruptible will perish (7³¹), and all mankind will be raised from the dead (7³²) and appear at the last judgment (7³³). Then Paradise (=final abode of the righteous) and Gehenna will be revealed. And the judgment will last seven years (7⁴³).

Observe that besides the general resurrection in 7³¹. 32 there seems to be a preliminary resurrection of some special saints to the Messianic kingdom in 7²⁸, but this is doubtful.

(b) A Son-of-Man Vision.—This writing consists of chapter 13, and was probably composed before A.D. 70. Many signs will precede the advent of the Messiah (13³²), who will appear in the clouds of heaven (13³. 32); and the nations will assemble from the four winds of heaven to attack him (13⁵. 34), but

* This number has originated as follows. According to Gn 15¹³ Israel was to be oppressed 400 years in Egypt. Now in Ps 90 the writer prays: 'Make us glad according to the days wherein thou hast afflicted us, and the years wherein we have seen evil.' From the combination of these two passages it was inferred that the Messianic kingdom would last 400 years, as a set-off against the period of oppression in Egypt.

the Messiah will destroy them, not with spear or weapon of war (13⁹. 28), but 'by the law, which is like fire' (13³⁸. 40). And he will restore the ten tribes (13⁴⁰. 47), and preserve the residue of God's people that are in Palestine (13⁴⁸).

We shall now set forth the eschatological expectations which appear in the remaining three constituents of this work, which were composed between A.D. 70 and 100. (c) The Eagle Vision, *i.e.* 10⁶⁰-12³⁵. Here the destruction of Rome is predicted, through the agency of the Messiah sprung from the house of David (12³²), who will judge its people and destroy them (12³³). He will save the residue of God's people in Palestine, and he will fill them with joy to the end, even the day of judgment (12³⁴). (d) An Ezra fragment, *i.e.* 14^{1-17a}. 18-27. 36-47. Ezra is to be translated and live with the Messiah till the times are ended (14³). These times are twelve. Of these, ten and a half have already elapsed (14¹¹). There seems to be no Messianic kingdom.

(e) The Apocalypse of Salathiel, *i.e.* 3¹⁻³¹ 4¹⁻⁵¹ 5^{13b}-6¹⁰ 6³⁰-7²⁵ 7⁴⁵-8⁶² 9¹⁵-10⁸⁷ 12⁴⁰⁻⁴⁸ 14²³⁻³⁵. The world is nearly at an end (4⁴⁴⁻⁵⁰). As it was created, so it will be judged by God alone (5⁵⁶ 6⁹). Very few will be saved (7⁴⁷⁻⁶¹ 8². 5). Judgment and all things relating to it were prepared before the creation of the world and of man (7⁷⁰). The day of judgment will arrive when the number of the righteous is completed (4³⁶); for the sins of earth will not retard it (4³⁹⁻⁴²). In the meantime retribution sets in immediately after death (7⁶⁹. 75. 80. 85. 95 14³⁵). On dying, the souls of the righteous will be allowed seven days to see what will befall them (7¹⁰⁰. 101); they will be guarded by angels in the 'chambers' (7⁷⁵. 85. 95. 121). They will have the joy of rest in seven ways (7⁹¹⁻⁹⁸). These chambers form their intermediate abode: after the final judgment glory and transfiguration await them (7⁹⁵. 97). But the souls of the wicked will not enter into the 'chambers,' but roam to and fro in torment in seven ways (7⁸⁰⁻⁸⁷. 83). After the final judgment they will be tormented more grievously still (7⁸⁴). Intercession, though permissible now (7¹⁰⁶⁻¹¹²), will not be allowed on the day of judgment (7¹⁰²⁻¹⁰⁵). All things will then be finally determined (7¹¹³⁻¹¹⁵). With the final judgment this world closes and the next begins (7¹¹³): it will be a new creation (7⁷⁵). With its establishment the righteous enter on their final reward. They shall be bright as stars (7⁹⁷); and, beyond them (7¹²⁵), they shall shine as the sun and be immortal (7⁹⁷). Paradise will be their final abode (7¹²³).

Josephus (A.D. 37-101).—Josephus' interpretation of Messianic prophecy as pointing to Vespasian (*BJ* vi. v. 4) must be set down to the exigencies of his position with regard to the Romans. For it is clear from *Ant.* iv. vi. 5 that he looked forward to a Messianic era. As the troubles predicted by Daniel had befallen Israel, so likewise would the prosperity (*Ant.* x. xi. 7). Apparently, he believed in an intermediate state for the righteous. Thus in *Ant.* xviii. i. 3 it is said that 'souls have an immortal vigour, and that under the earth (*ὑπὸ χθονός*, cf. *BJ* ii. viii. 14 *καθ' ἑδου*) there will be rewards and punishments, accordingly as they have lived virtuously or viciously in this life; and the latter are to be detained in an everlasting prison, but the former will have power to revive and live again.' Here the wicked enter at once into everlasting punishment. Sheol is here hell. But the righteous rise from the intermediate place of happiness and enter into other bodies, probably spiritual bodies (*BJ* ii. viii. 14). Such was the Pharisaic doctrine according to Josephus. The Essenes believed that a blessed immortality awaited the souls of the righteous (*BJ* ii. viii. 11), but that those of the wicked were destined to a dark, cold region, full of undying torment.

The above account of Pharisaic belief which we derive from Josephus may be regarded as fairly trustworthy; but that which he gives in *BJ* III. viii. 5 is misleading in a high degree. There he describes the soul as a 'particle of Divinity' (*θεοῦ μοῖρα*) which has taken up its abode in a mortal body. After death the souls of the righteous 'receive as their lot the most holy place in heaven, from whence, in the revolution of ages, they are again sent into pure bodies.' For the souls of suicides the darkest place in Hades is reserved.

IV. SYSTEMATIC EXPOSITION OF JEWISH ESCHATOLOGY (B.C. 200—A.D. 100).—In the preceding section we have given a survey of eschatological ideas in the order of their historical attestation, and consequently, in large measure, of their actual evolution. By presenting the eschatological scheme of each writer by itself in that section, we have made it possible for the reader to see the various conceptions, such as Sheol, Gehenna, Messiah, Resurrection, in their actual organic relations and historical environment. In this section, however, we shall isolate several of these conceptions, and deal briefly with the various forms they assumed from B.C. 200 to A.D. 100 in Jewish circles. These conceptions are: the Last Woes, the Messiah, the Messianic Kingdom, the Return of the Dispersion, the Resurrection, Judgment, Sheol or Hades, Gehenna, Paradise, Heaven.

The Last Woes.—It will be sufficient for our present purpose to mention the passages where these woes prelude the Messianic kingdom are recounted. These are: *Dn* 12¹, *Or. Sibyll.* 3⁷⁹⁶⁻⁸⁰⁴, *2 Mac* 5^{2, 3}, *Jubilees* 23^{13, 19, 22}, *Apoc. Bar* 27. 48³¹⁻⁴¹ 70²⁻⁸, *4 Ezr* 5¹⁻¹³ 6¹⁸⁻²³ 9¹⁻¹² 13²⁹⁻³¹. For further information the reader should consult Drummond, *The Jewish Messiah, in loc.*; Schürer, *HJP* II. ii. 154-156; Schoettgen, *Hor. Hebr.* ii. 509 sqq. 550 sqq.

The Messiah.—As this subject will be treated under the general art. MESSIAH, we shall sketch here only its leading phases.

i. The Messiah—conceived merely as a passive though supreme member of the Messianic kingdom. He is so represented in *Eth. En.* 83-90, where his appearance is largely otiose, and due probably to literary reminiscence. He rules over a transfigured Israel, with the Heavenly Jerusalem set up as the centre of his kingdom, and his reign is apparently for ever. In the 1st cent. of the Christian era this conception reappears twice in *Apoc. Bar* 27-30¹ where his rule is of temporary duration, and in *4 Ezr* 7²⁸ (*i.e.* in the *Ezra Apoc.* See p. 747^a), where he dies after a reign of 400 years. In the second and third cases the Messiah appears after the Messianic woes and judgment; in the third, simultaneously with the first resurrection.

ii. The Messiah—conceived as an active warrior, who slays his enemies with his own hand. This conception is attested in the *Or. Sibyll.* 3⁶⁵²⁻⁶⁶⁰, which belongs to the 2nd cent. B.C.; in the *Pss.* of *Sol* 17^{23, 26}, where the Messiah is to be of Davidic descent—but this book belongs properly to the next division; in *Apoc. Bar* 36-40; also in another independent writing in the same book, 53-74; *4 Ezr* 10⁹⁰⁻¹²⁵. In the last the Messiah is of Davidic origin. In all these books save the first (?) the Messianic kingdom is of temporary duration.

iii. The Messiah—conceived more loftily as one who slays his enemies by the word of his mouth, and rules by virtue of his justice, faith, and holiness (cf. *Pss.-Sol* 17^{27, 31, 37, 39, 41}). A similar conception is found in *4 Ezr* 13. In both writings his reign is probably of temporary duration.

iv. The Messiah—conceived as supernatural, as eternal Ruler and Judge of mankind (*Eth. En.*

37-70). This conception of the Messiah is logically in some measure a development of that in the third division, and yet it is chronologically antecedent to it. It is the most sublime conception of the Messiah to be found in all Jewish literature outside the Canon. For further details see above, p. 744^a.

The Messianic Kingdom.—Three views in the main prevailed amongst the Jews as to this kingdom. i. It was to be of eternal duration. ii. It was to be of temporary duration. iii. There was to be no Messianic kingdom.

i. The Messianic kingdom was to be of eternal duration.

(a) On earth as it is (*Eth. En.* 1-36, *Dn, Or. Sibyll.* 3⁷⁶⁶⁻⁷⁸³ (?)).

(b) On a transformed earth and in heaven (*Eth. En.* 37-70). As the Messianic kingdom is here eternal, it is preceded in Palestinian literature by the resurrection and the final judgment.

ii. The Messianic kingdom was to be of temporary duration on earth (*Eth. En.* 91-104, *Ps.-Sol* 17. 18, *2 Mac*, *Jubilees*, *Slav. En.*, *Assumption of Moses*, *Book of Wisdom*, *Apoc. Bar*—parts A¹ A² A³ B¹,—*4 Ezr*—all parts but *Salathiel Apoc.*).

When the Messianic kingdom is of temporary duration, there appears to be no transformation of the earth. The resurrection and final judgment take place at its close. The resurrection is all but universally a resurrection of the righteous only. Hence in many of these books the wicked are held to enter at once into their final abode. Thus Hades in these cases becomes Hell.

iii. No Messianic kingdom expected [*4 Mac* (?), *Apoc. Bar* (B²), *4 Ezr*, *Salathiel Apoc.*].

In these books man does not enter till after the last judgment on his final award. After death he meets with a foretaste of his final lot in Hades or Sheol.

The Return from the Dispersion.—The promise that God would turn again the captivity of Israel is frequently made in the OT; also in *Sir* 33¹¹ (*AV* 36¹¹), *To* 13¹³, *Eth. En.* 57^{1, 2} 90⁸³, *Or. Sibyll.* 2¹⁷⁰⁻¹⁷², *Bar* 2²⁷⁻³⁵ 4^{86, 87} 5⁵⁻⁷, *Ps.-Sol* 11, *2 Mac* 2¹⁸, *Apoc. Bar* 77⁶ 78⁷ (cf. 84^{2, 8, 10}), *4 Ezr* 13^{12, 39-47}, *Targ. Jon.* on *Jer* 33¹³, and *Shemoneh Esreh*: 'Lift up a banner to gather our dispersed, and assemble us from the four ends of the earth.' Yet Rabbi Akiba (*Sanh.* 10³), in the 2nd cent. A.D., denied this return.

The Resurrection.—The resurrection is very variously conceived. The earliest attested view in the 2nd cent. B.C. is that of (a) the resurrection of all Israel (*Dn* 12¹⁻³). About the same period the doctrine of (b) the resurrection of the righteous only is taught in *Eth. En.* 83-90. Towards the close of the same century another writer looks forward, not to a resurrection of the body, but to (c) a blessed immortality of the soul or spirit after the final judgment (*Eth. En.* 91-104). These views hold the field throughout the next century, and it is not till the 1st cent. of the Christian era that they are in some measure displaced by others. These latter, which are developments of the former, are: (d) a blessed immortality for the souls of the righteous after death. This is one side of the larger doctrine of an immediate and final retribution after death affecting only the soul or spirit; (e) a general resurrection of all mankind preceding the final judgment.

(a) The resurrection of all Israel (*Eth. En.* 1-36 (see 22), *Dn* 12¹⁻³, *Eth. En.* 37-70 (see 51, etc.), *2 Mac* 7^{7, 11, 14}, etc. 12^{43, 44}, *Apoc. Bar* (B²) (see 24. 30²⁻⁵ 50. 51)).

In *2 Mac* 12⁴²⁻⁴⁵ the possibility of a moral change taking place in Sheol seems to be implied.

(b) The resurrection of the righteous only [*Eth. En.* 83-90 (see 90⁸³)].

In this book the righteous have no concern in the last judgment, and do not rise till it is over.

(c) A blessed immortality for the souls of the righteous after the final judgment [Eth. En. 91-104 (see 103³, 4 91¹⁰ 92² 104⁴), Assumption of Moses (see 10⁹), Slav. En. (?), Eth. En. 108 (?)].

(d) A blessed immortality for the souls of the righteous immediately after death [Jubilees (see 23), Philo, Book of Wisdom (see 3¹⁻⁴ 4². 7. 10 etc.), 4 Mac (see 5³⁷ 9⁸ 13¹⁷ etc.)], Essene doctrine according to Josephus, *BJ* II. viii. 11.

Observe the expression in 4 Mac 13¹⁷ *θανόντας ἡμᾶς Ἀβραάμ καὶ Ἰσαὰκ καὶ Ἰακώβ ὑποδέξονται* (cf. Lk 16²³).

(e) Resurrection of all mankind [Apoc. Bar 30²⁻⁵ 50-51, 4 Ezr (Ezra Apoc. See 7³². 37), Test. XII. Patr., Benj. 10].

Judgment.—Judgment is variously conceived, either as retribution which takes effect from day to day, or at great crises in national history, or as retribution which is universal and final. The last may take place either at the beginning or the close of the Messianic kingdom. In Apocalyptic literature little attention is paid to the first division. A most emphatic presentation of the doctrine of retribution in this life pervades 2 Mac and Jubilees. We shall here, however, confine our attention to judgment as connected with the consummation of the world. Now, in the last times there were generally two stages in this judgment. The former was executed by human agents,—the saints of Israel or these led by the Messiah,—and may be designated as the judgment by the sword, or, better, the Messianic judgment; the latter was administered by God or, in one instance only, by the Messiah, and constitutes in reality the final judgment.

(a) *The Messianic Judgment.*—This judgment (i.) may be realistically conceived as involving the destruction of the wicked by the *personal prowess* of the Messiah or the saints; or (ii.) it may be *forensically* conceived: the word of the Messiah or of the saints judges or destroys the wicked. The latter form of judgment is obviously a development of the former, but the two are not always kept apart.

i. The Messianic judgment realistically conceived:

(a) Executed by the Messiah [Ps.-Sol 17. 18 (?), Apoc. Bar 39. 40. 72. 73, 4 Ezr 12²²⁻²⁴].

(β) Executed by the saints (Dn 2⁴, Eth. En. 90¹⁹ 91¹² 96¹ 98¹², Or. Sibyll. 3⁷²¹, Jubilees, Assumption of Moses 10⁹).

ii. The Messianic judgment forensically conceived:

(a) Executed by the Messiah (Ps.-Sol 17. 18, 4 Ezr 13²⁸. 22-50).

(β) Executed by the saints (Book of Wisdom 3⁸, cf. 1 Co 6²).

(b) *The Final Judgment.*—This judgment is always administered by God save in Eth. En. 37-70, where it is committed to the Messiah, the Son of Man. This judgment takes place either at the beginning of the Messianic kingdom or, where this kingdom is of temporary duration, at its close; or, where no such kingdom is expected, simply at the end of this world (see section above on *The Messianic Kingdom*, p. 748^b).

As to Sheol, Gehenna, Paradise, Heaven, see the separate articles.

LITERATURE.—The Jewish eschatology of our period has been greatly neglected in the past. This has been due partly to the ignorance of Christian scholars, and partly to the deliberate ignoring by Jewish scholars of the chief sources of information on this subject, i.e. the Apocalyptic books. To Lücke, Hilgenfeld, and Drummond belongs, in large measure, the merit of emphasizing the importance of this literature. Drummond's work, *The Jewish Messiah*, is a splendid contribution to our knowledge of Jewish thought, though much of it is no longer abreast of our knowledge of this subject. Schwally's *Das Leben*

nach dem Tode is very stimulating on this period, though frequently misleading. The reader may consult also Salmon's *Christian Doctrine of Immortality*, and Stanton's *The Jewish and the Christian Messiah*, where they deal with our subject.

Abundant information, and copious, though indiscriminating, references to authorities will be found in Schürer, *HJP* II. ii. 128-187. Marti also (*Geschichte der Israelitischen Religion*, pp. 270-310) is well worth consulting.

The present writer hopes to edit, towards the close of next year (1898), a critical work on Jewish Eschatology from the earliest OT times down to A.D. 100. R. H. CHARLES.

ESCHATOLOGY OF THE NEW TESTAMENT.

—The eschatology of the NT attaches itself in the first instance to that of the OT. The Heb. Scriptures do not contain anything like a definite or complete doctrine of the things of the end. They are the records, however, of an important contribution to the faith in a future life, and that contribution was an ever-enlarging one. It had its reason in the two fundamental articles of Israel's faith—the doctrine of one *God*: a living, personal, righteous, gracious God, who made Himself known to His people and entered into fellowship with them; and the doctrine of *Man* as a creature different in origin and in end from other creatures, the bearer of God's image, made for communion with God, and for life in that communion. These great truths, unfolding their meaning more and more, and acting on the popular conceptions of Death and the Hereafter which Israel had in common with the Babylonians and other nations, led by steps of gradual advance to a clearer, more determinate, and more moral conception of existence beyond the grave. The experiences and intuitions of saints, the visions and forecasts and inferences of faith, seen in the poetical books, combined with thoughts and words of sublime suggestion occasionally found in the historical books, and with the more definite teaching of the prophets, to further this enlargement of belief and the march towards a definite doctrine. So the popular ideas of a dark Sheol with a chill attenuated existence in its sunless deeps gave way to higher views; the thought of the lot of the individual disentangled itself from that of the destiny of the community; the belief in a moral order with judicial awards following men into the other world took shape and became increasingly distinct; and at last the faith and the teaching of the OT rose to the great hope of a resurrection to life. This eschatology of the OT, which grew from less to more in the course of Israel's history, remained nevertheless incomplete at its highest, and pointed to something beyond itself. The eschatology of the NT became its heir, passing beyond its limits and carrying its principles to their issues.

But the eschatology of the NT attaches itself also, though in another way, to the popular faith of the Jews of its time, and to certain developments of thought and belief which had taken place in the period following that which produced the last of the OT books. These developments were considerable. We gather what they were from the literature of Judaism which has descended to us, the Apocr. of the OT, to some extent the Rabbinical books, and most particularly the pseudepigraphic and apocalyptic writings. This literature furnishes the key to much in the NT doctrine of the Last Things. It shows in what way the OT faith was retained and enlarged in harmony with its essential principles; in what way also it was materialized and subjected to changes which were not consistent with its true spirit; in what directions belief became more positive; and in what respects it became fanciful, speculative, grotesque; how certain OT terms and ideas were modified in sense and application, and in what measure new terms and ideas were intro-

duced. The eschatology of the NT bears the impress of these things. It cannot be understood apart from them. From much that emerged in this intervening period it stands aloof. Other things in this development, which were consistent with the principles of the OT revelation, are reflected in it, purified of the gross, exaggerated, and unspiritual elements which mixed themselves with them.

The eschatology of the NT is not given in systematic form, neither is it expressed in the precise and measured language of metaphysics or theology. It appears in the shape of a number of ideas which are common to the NT books, but which are presented in different aspects and connexions by the several writers. It is given in occasional form, in Christ's words, the discourses in the Bk. of Acts, the records of evangelists, the Epistles of apostles, on the promptings of circumstances which from time to time called forth declarations in speech or in writing on the matters of the end. It is not given in the terms of the schools nor with a view to speculative interests, but always for the purposes of life and practice, and in the language of the people. It makes free use of the figurative, parabolic, imaginative phraseology in which the Eastern mind naturally expresses itself. It never claims to give an exhaustive disclosure or a constructive account of the Last Things. The message of the NT also being distinctively a message of hope, the eschatology is occupied mainly with the issues of the kingdom of God and the destiny of the righteous. It says less of the graver issues of the future of the unrighteous.

The eschatology of the NT being conveyed in this occasional and discontinuous form, we may best understand it by following out the great ideas as they appear first in one and then in another of the main groups of writings. The fundamental question is that of Christ's own mind on the subject. It will be convenient, therefore, to deal with the eschatology *first* as it appears in Christ's own words reported in the Gospels, and *then* as it is found in the teaching of the several divisions of the NT writings. It will thus be seen whether or how far the NT has a consistent doctrine of the Last Things.

I. CHRIST'S ESCHATOLOGY.—There are questions of criticism to which regard must be had in studying the eschatology of the NT. In the case of our Lord's teaching there is the debated question of what is primitive and what is secondary in the records of His words, with the various tests proposed for distinguishing between the one and the other. It is impossible to enter at length into these things here. It is enough to say that the substance of Christ's teaching will be found to be the same whichever of the leading theories of the construction of the Gospels is followed. Its main points belong to the large stream of narrative and discourse which is common to the first three Gospels, and in which the most primitive tradition is probably preserved. There is also the question of the relation in which the report of Christ's words given in the Fourth Gospel stands to that contained in the Synoptists. Of this it must suffice to say that the difference in the form is a reason for taking the two accounts separately; from which, however, it does not follow that there is an essential difference between them.

In the Synoptic Gospels the eschatology centres in the great idea of the KINGDOM OF GOD (which see). Christ's whole disclosure of the Future has its point of issue in this doctrine of the Divine kingdom and its consummation. In this His teaching connects itself with the large ideas of the OT, carrying them further and fulfilling them.

As the OT, too, in its conceptions of the future knew nothing of the philosophy of the subject and furnished no reasoned statement, but followed the logic of experience and the heart, giving no dogma of immortality, but the expression of a living fellowship with God which involved the continuance of life; so Christ's teaching lies apart from all theoretic questions, all speculative discussions, all that is of curious interest, and deals with practical relations and broad moral issues. It offers no proof of the reality of a future existence, but presupposes it, and speaks of life as man's destiny. It unfolds the course of the Divine kingdom which had been the object of OT faith and the centre of OT hope. It presents that kingdom as a thing of the actual present, brought to men in and by the Teacher Himself, but also as a thing of the future which looks through all historical fulfilments to a completer realization,—a thing, too, of gradual, unobtrusive growth, yet destined to be finally established by a great conclusive event. Christ's whole teaching on the subject of the Last Things, as regards the Church, the world, and the individual, is connected with this lofty OT idea of a new order in which God shall be confessed to be Sovereign, and has regard to it in its primary deliverances.

Among these deliverances a large place is given to the promise of His own *Return*. In the OT the consummation of the Divine kingdom was to be brought about by a descent of God to earth, and in certain prophecies it was further connected with the coming of an ideal King, the agent of J^u in the fulfilment of His purpose. So Christ connects the completion of the kingdom with a decisive occurrence, the great event of His own Parousia (Mt 24^{3, 27, 29}). The time of this new interposition is not declared, it is not known even to the Son (Mt 24³⁶ RV, Mk 13³² RV). But it is to come when the times are ripe for it, and there are prelusive tokens of it. This event of His coming is the burden of the great eschatological discourse in Mt 24, 25, in which there are problems both for criticism and for interpretation. In that discourse two distinct occurrences, the destruction of Jerusalem and the end of the world, seem to be spoken of as coincident and as near. This is in accordance with the nature of biblical prophecy as it is seen in the OT, which brings together in prophetic perspective or 'timeless sequence' events which were widely separated in actual occurrence (Is 8, 9, Zeph, Ob). It does not require for its explanation the affirmation of mistake on Christ's part (Strauss, Renan, Keim, Weizsäcker, S. Davidson, etc.), the supposition of misunderstanding or misreporting on the part of the evangelists (Baur, Colani, De Wette, Holtzmann, etc.), the limitation of the whole declaration to the single catastrophe of the fall of Jerusalem and the Jewish state (J. S. Russell, etc.), the theory of a double coming, or the hypothesis either of a Jewish (Weizsäcker) or of a Jewish-Christian (Colani, Keim, Pfeiderer, Wendt, Weiffenbach, Vischer, etc.) apocalypse in the discourse. Nor is this form of statement confined to this particular section of the Synoptic Gospels. Sayings of similar import are given elsewhere (Mk 13³⁰, Lk 21³², Mt 10²³ 16^{27, 28}; cf. also Mk 8³⁸ 9¹, Lk 9^{26, 27}). In these Gospels, too, the Return appears to be an objective event, the expression given to it being such as goes beyond any figurative description simply of the final victory of principles or the supersession of old forms of religion. In the Fourth Gospel the case is somewhat different. It is the coming of the Spirit that chiefly appears there, and that in such measure as to suggest to many that only a dynamical coming is in view (Neander, Godet, etc.). Yet a distinction is observed between the coming of the Spirit

and Christ's coming, and there are passages in which the idea seems to be the same as that of the Synoptic records (14³ 21²², cf. 1 Jn 2²⁸). The first point, therefore, in Christ's teaching on the subject of the future is the announcement of the objective event of His own Return. But His declarations on this Parousia know nothing of the minute and fantastic inventions of Jewish theology, as seen in the Book of Enoch, the Assumption of Moses, the Sibylline Oracles, and similar products of Jewish thought, with their elaborate machinery of signs and portents and mystic numbers, their extravagant chronologies, their grotesque descriptions of the literal re-settlement of the Jews in their own land, their many eccentricities and ineptitudes. They know as little of those *Chiliasitic* conceptions of the future, those curious calculations of the duration of Messiah's kingdom, those puerile ideas of the erection of a new Jerusalem on the ruins of the old, which took hold of the Jewish mind before Christian times, and, entering into Christian thought, gave shape to the doctrine of a millennial reign of Christ on earth which was to end in a great apostasy and to herald the consummation.

With this doctrine of the second advent is associated the doctrine of a *Final Judgment*. This judgment is presented as the object of the coming, and it occupies a place of like prominence in Christ's teaching. It is expressed in various of His sayings, but at greatest length in the eschatological discourse in the First Gospel. According to the consentient teaching of the Synoptic Gospels, it is a judgment at the end of the world, a judgment of individuals (Mt 22¹⁻¹⁴ etc.), a judgment of universal scope (Mt 13³⁶⁻⁴², 47-50 16²⁷ 25³¹ etc.), and a judgment in which Christ, the Son of Man, is Himself to be the Judge (Mt 25³¹ etc.). In the Fourth Gospel the judgment appears for the most part under another aspect. In that Gospel the emphasis is laid upon a judgment which is *present* and subjective, fulfilling itself in a probation of character and a self-verdict which proceed now (3¹⁷, 18 12⁴⁷, 48). But this subjective judgment of the present in life and conscience is not inconsistent with an objective judgment of the future. And the latter is not strange to the Fourth Gospel. The Johannine phrase 'the last day' (12⁴⁸) points to it, and it is contained in such words as those in 5²⁷, 28 (cf. 1 Jn 2²⁸ 4¹⁷, in which Johannine writing the judgment is connected, as in the Synoptists, with Christ's coming). The doctrine of a final judgment so declared by Christ stands in intimate relation to certain leading ideas of the OT, completing these and giving them certainty. The Heb. Scriptures, penetrated through and through by the idea of a Divine retribution, have a large doctrine of judgment, a judgment for Israel, more frequently a judgment for the nations or a world-judgment. But for the most part it is a world-judgment which has its scene in this world, a triumph of the kingdom of God in the form of an overthrow of its living adversaries on earth. And in this J' Himself is the Judge. In certain prophecies (Is 9. 11, Mic 5, Jer 23. 33. 34. 36, Ezk 34. 37, Zec 9-11) the triumph of the kingdom of God is connected with the advent of a great Davidic King, and Messiah appears as the agent of J'. But in the OT the final arbitrament of men's lives is not committed to the Messiah or the ideal King, as in Christ's teaching it is given to the Son of Man. Further, while the foundations of the doctrine of a final universal and individual judgment are laid in the OT ideas of the righteousness of God, His covenant relations with Israel, and His sovereignty over the nations, the conception of a judgment after death does not take distinct and definite form till near the close of the OT. Even when the idea of

an individual judgment at the end of things appears, the subjects of the judgment seem to be limited to those of Israel. Christ's doctrine has also its relations to the ideas of the non-canonical literature. In the representative books of Judaism the doctrine of a judgment bulks largely, and is taught with much novel and peculiar detail. It has also different forms. In certain books (*e.g.* the *Book of Enoch* 90¹⁸, 19, the *Assumption of Moses* 3. 4, etc.) the OT idea of a destruction of living enemies of J''s kingdom here on earth survives. In many cases, though not in all, the Messiah is the agent of God in this judgment; and the judgment is placed usually at the beginning of His reign, but sometimes (where a limited duration is ascribed to that reign) at its close. In other books, however, and especially in the *Book of Enoch*, this passes over into the idea of a final judgment, in the forensic sense, occurring after death, extending to all men and to angels as well. In these books, too, God is the Judge and Messiah His instrument. Only in the later section of the *Book of Enoch* does the Messiah appear in any certain and definite form as the Judge at the last day. Christ's doctrine of a universal, individual judgment at the end of things, in which judgment He Himself is Arbiter of human destinies, carried the OT conception to its proper issue, while it gave a new certainty, consistency, and spirituality to the developed ideas which had arisen in Judaism in the period following the last of the Jewish prophets.

In conjunction with these doctrines of the Parousia and the Judgment, the doctrine of a *Resurrection* has an essential place in Christ's eschatological teaching. The doctrine of a resurrection from the dead is implied in the doctrine of a final universal judgment at the end of things. It lies also in the great principles of OT. The Psalmists and the Prophets have their visions of a limitation of the power of death, a destruction of death, a deliverance from Sheol, a life superior to death; and, in the progress of the prophetic teaching, the faith in a resurrection of the dead rises gradually into distinctness. It appears first as a belief in the re-animation of the dead nation, and at last in Isaiah (26¹⁹) and Daniel as a belief in the return of deceased individuals to life. In the final utterance of OT on the subject (Dn 12², 3) this enlargement of the idea appears to have its occasion in the question regarding the fate of departed members of Israel—whether there is reward for the faithful among these, whether there is penalty for the unfaithful. But OT does not seem to go beyond the case of Israel. It carries with the announcement that Israel's dead, true and false, shall come forth from the dust of earth to receive the awards of their truth or falsehood. In the period between this and the Christian era the belief passed through various fortunes. It did not become the universal faith of the Jewish people. In some of the non-canonical books the old idea of Sheol continues (Sir 17²⁷, 28 41⁴, Bar 2¹⁷). In some the hope appears to be that of an incorporeal immortality (Wis 2²² 3¹⁻⁴ 4¹³, 14 15³, 4 Mac 14⁵ 16¹² 18²³). But in others the belief in a resurrection is seen in more or less definite form (Enoch 91¹⁰ 92³, Ps.-Sol 3¹⁶ 13⁹ etc., most distinctly and most frequently in 2 Mac, *e.g.* 7⁹, 14, 23; cf. also Sibyll. Oracles 1⁴⁴⁰ 2²⁷⁴, 275 4²²⁸, 229, Apoc. Bar 30¹⁻⁵ 50¹ 51⁵, 2 Es 7⁸²). Rejected by the Sadducees, it became the belief of the Pharisees and the majority of the Jewish people. It had become, too, a belief in the resurrection of the unjust as well as the just, although in certain cases the limited belief in a rising only of the righteous seems to have persisted (Ps.-Sol 3¹⁶ 14³ etc.). Opinion varied to some extent as to the object of the resurrection,

whether it was for judgment or for participation in the glories of Messiah's kingdom, and as to its time, whether it was to be immediately before Messiah's era or at its close (cf. on the one hand Enoch 51, on the other Apoc. Bar and 2 Es). The doctrine, then, which had its roots in the great principles of the OT touching *life*, the nature of man, and his relation to God; which in the OT had grown gradually in magnitude and in definiteness; which also in Judaism had undergone changes in part natural and consistent, in part forced and inharmonious, forms an integral part of Christ's eschatological teaching. It is given in discourses which belong to the triple tradition in the Synoptic records (Mt 22²³⁻³³, Mk 12¹⁸⁻²⁷, Lk 20²⁷⁻⁴⁰). It is implied in utterances reflecting current Jewish opinion (Mt 8¹¹, Lk 13^{28, 29}). It is presupposed where it is not affirmed in terms (e.g. in Mt 24. 25). It is stated in its essential relations to the great principles of the OT, and is relieved of the extravagances, the crudities, and the literalities with which it had become associated in Jewish speculation and Jewish popular thought. It is the doctrine of a real bodily resurrection, far removed from Hellenic or Essene ideas of a bare immortality of soul, affirming in harmony with the OT view of man's relation to God (Mt 22^{31, 32}, Mk 12^{26, 27}, Lk 20^{37, 38}) a continuance of life for man in his entire self. In this the Synoptic records and the Fourth Gospel agree. In the latter, it is true, the fact of the resurrection is presented mainly in its spiritual aspects and its immediate relations. Some of Christ's largest words on the subject go beyond the idea of the resurrection at the last day (11²¹⁻²⁶); and others, if they stood alone, might perhaps be taken as strong descriptions of a spiritual renovation only (5^{25, 26}). But in the Johannine record there are also words too definite to admit of being limited to the expression of a purely spiritual resurrection (5^{28, 29}). Christ's doctrine, further, is the doctrine of a *universal* resurrection. Certain passages in the Synoptic Gospels (Mt 22³⁰, Mk 13²⁷, Lk 20^{36, 37}, Mt 24³¹, Lk 14¹⁴), indeed, have been supposed to imply that Christ taught only a resurrection of the righteous. But there are others with a different implication (Mt 5^{29, 30} 10²⁸). The 'resurrection of the just' (Lk 14¹⁴) suggests its own antithesis. The Fourth Gospel, too, declares a 'resurrection unto condemnation' as well as a 'resurrection unto life,' and in speaking of the re-awakening of the dead uses terms too large for the limited view. This resurrection, which extends to just and unjust, is further referred to the last day. In Christ's own words there is no statement of a separation of the resurrection of the unrighteous from that of the righteous as if they were events belonging to different times.

In contrast with the fulness and explicitness of Christ's declarations on the Parousia, the Judgment, and the Resurrection, is the reserve of His teaching on the subject of the *Intermediate State*. This is the more remarkable in view of the position given to that topic in the theology and the popular thought of the Jews of the time. The OT idea of Sheol, originally that of an underworld forming the final abode of men, in course of time passed through changes which are indicated to some extent in the canonical books themselves, but which took larger effect at a later period, and are known to us from the non-canonical literature. These changes followed different directions, and various ideas of Sheol continued to prevail. In part the old conception survived, with some modification (e.g. Sir 17²³⁻³⁰ 41¹⁻⁴, Bar 2¹⁷, To 3¹⁰ 13², 1 Mac 2⁶⁰ 14³⁰); in part the term came to denote a place of relative retribu-

etc.). Most particularly in the Apocalyptic books it is found to have assumed the sense of an intermediate state with relative rewards and penalties (Enoch 10¹² 22. 100⁵ 103⁷; cf. Jubilees 5²⁴³ 7²⁴³ 22²¹ 24^{27, 38}, 2 Es 7^{75, 80}, Apoc. Bar 52¹⁻³). Jewish thought seems thus to have occupied itself largely with the idea of the period between death and judgment, and with the conditions and the possibilities of an intermediate state. Of all this there is little or no recognition in Christ's words. He uses, it is true, the word *Hades*, the Greek equivalent to the Heb. Sheol, thrice. But in two of these cases the application is obviously metaphorical (Mt 11²³ 16¹⁸); and in the third (Lk 16²³) the term forms part of the imagery of a parable intended to teach the broad moral lesson of the penalty of a selfish life, the retribution that pursues it and changes its conditions in the other world. In the same parable He uses the term *Abraham's bosom* (Lk 16²²), but in a connexion that does not suggest a definite doctrinal intention. He also uses the term *Paradise*, a term with which various and uncertain ideas had been associated in Jewish thought. But He uses it only once (Lk 23⁴³), and in a large and general sense, as a word of hope and comfort; in which sense also He uses the word *sleep*,—not to inculcate the doctrine of an intermediate state as a space of unconsciousness, or as a place for the detention, the recompense, or the purification of souls. Some of His words appear to point rather to the hope of an immediate entrance of the just dead into the Father's house and the Father's glory (Jn 14^{2, 3} 17²⁴). But in general His attitude to the question of the condition between death and judgment is one of reserve, and His words convey nothing approaching to a doctrine of the intermediate state.

It is otherwise with the question of what follows the resurrection and the judgment. The eschatology of NT as it is given by Christ Himself has a pronounced doctrine of the *Moral Issues* of life. It speaks largely and distinctly of final reward for the good, and final penalty for the evil. These are expressed by a great variety of suggestive terms. The recompense of the righteous is described as an inheritance, entrance into the kingdom, treasure in heaven, an existence like the angelic, a place prepared, the Father's house, the joy of the Lord, life, eternal life, and the like; and there is no intimation that the reward is capable of change, that the condition is a terminable one. The retribution of the wicked is described as death, outer darkness, weeping and wailing and gnashing of teeth, the undying worm, the quenchless fire, exclusion from the kingdom, eternal punishment, and the like. Different measures of reward and of penalty are intimated, according to different degrees of merit and demerit (Lk 12^{47, 48}). In Christ's own words there is no certain declaration of the terminableness of the penalty of the finally impenitent, no indication either of an intermediate purgatorial process or of an ultimate universal restoration. In the Synoptic Gospels, and in the groundwork of their narrative, the term *Gehenna*, *Hell*, is applied to the future condition of the lost (Mt 5^{22, 29, 30} 10²⁸ 18⁹ 23^{15, 33}; Mk 9^{43, 45, 47}, Lk 12⁹). This term, though in the later Judaism it had at times the sense of an intermediate condition, whether as a temporary purgatory or as a place of punishment, appears to have been in the earlier Judaism and in our Lord's time a term for the retributive state after judgment (cf. e.g. Enoch 27^{2, 3} 90²⁴⁻²⁶ etc., which are probably its first occurrences in this sense; cf. also 2 Es 6¹⁻⁴ 7³⁶). The question whether Christ teaches the *permanence* of the penal condition resulting from the judgment is variously answered. Certain of His sayings are taken to point to a terminable penalty. These,

however, are few in number, and appear either to be irrelevant (e.g. Lk 12^{47, 48}, where the question is, not the *duration* of the judicial awards, but their adjustment to different degrees of wrong), or to suggest the opposite conclusion (e.g. Mt 5^{25, 26}, Lk 12^{58, 59}, where the idea seems to be that of a liability that cannot be discharged, and a justice that is inexorable; Mt 12^{31, 32}, Mk 3^{28, 29}, Lk 12¹⁰, where the terms appear to be exclusive terms, expressing the irremediableness of the condition, the fact that there can be no forgiveness at any period for the sin in question). It is urged, too, but on grounds open to challenge, that the distinctive terms 'eternal' (*αἰώνιος*) and 'punishment' (*κόλασις*) may have in this connexion other than their usual and obvious applications. But, on the other hand, the finality of destiny appears to be expressed unmistakably and in many different forms—in the words with which at the close of the great eschatological discourse the moral issues of life are summed up (Mt 25⁴⁶), in such contrasts as that between the 'kingdom prepared from the foundation of the world' and 'the eternal fire which is prepared for the devil and his angels' (Mt 25⁴¹); in the statements of the issues of God's kingdom and of man's life given in the parables (e.g. Mt 13^{24-30, 37-43}); in the figures of 'the unquenchable fire' (Mk 9⁴³), the 'worm' that 'dieth not' (Mk 9⁴⁸), the salting with fire (Mk 9⁴⁹), and the like; in the many other terms of solemn moment by which the final lot of the unworthy is described—banishment from Christ (Mt 7²¹⁻²³), rejection (Mt 10³³, Lk 9²⁸), the loss of the soul or the life (Mk 8³⁶), dying in one's sins (Jn 8^{21, 24}), perishing (Jn 3¹⁶), being judged already (Jn 3¹⁸), its being good never to have been born (Mt 26²⁴, Mk 14²¹), etc. These sayings are to be understood in the light of the beliefs which prevailed among the Jews on the nature and the duration of the retribution of the wicked. These are by no means easy to determine, as they varied at different periods and in different schools. Yet the general condition of opinion in our Lord's time and in the immediately preceding period can be stated with approximate certainty. The Jewish books relevant to the question contain little to bear out any large belief in the final restoration of all. They often use terms—*death, perdition, destruction*, and the like, which might be taken to point to annihilation as the final lot of the wicked, if interpreted apart from the old popular ideas of Sheol (e.g. Ps.-Sol 3¹³ 9¹² 12¹⁰ 15¹³; cf. 2 Es 7³⁰ 8⁵²⁻⁶², Apoc. Bar 30). But in many cases the language is definitely expressive of the finality of the retribution (e.g. Jth 16¹⁷, 4 Mac 9^{8, 9}, Enoch 5⁶ 10¹¹⁻¹⁴ 12³⁻⁶ 22⁴⁻¹¹ 27^{2, 3} etc.). The schools of Hillel and Shammai, too, seem both to have taught, though in different ways, the immediate sealing of certain classes of sinners to Gehenna, or their punishment there to 'ages of ages.' It would appear, therefore, that in Christ's time, with certain variations and exceptions, the belief was general in an enduring penalty in the other world for the absolutely evil—unrighteous Gentiles, guilty and apostate Jews. Christ's eschatology is one of grace. His doctrine is a revelation of life. But it throws into strong relief the responsibilities of the present existence, the certainty of the retribution of sin, the possibility of an eternal sin (Mk 3²⁹) with an eternal penalty.

II. THE APOSTOLIC ESCHATOLOGY.—Under this title we include the eschatological ideas and truths delivered in the various groups of NT writings outside the evangelical records of Christ's own words. Taking each writer separately, we have to ascertain what contribution he makes to the eschatological system, in what relation it stands to Christ's doctrine, in what sense it is in harmony with that, in what degree it is supplementary. There are questions of literary criticism connected

with not a few of the writings, questions both of genuineness and of integrity. Into these it is not necessary to enter here. In increasing measure these writings are being lifted above the uncertainties of criticism. It is enough for our present purpose to take them as representatives of different types of NT doctrine, earlier and later. Their ideas exhibit certain characteristic differences in form in the different groups. They bear the impress of the beliefs, opinions, and ways of speech that were current among the Jews of the time. They have obvious points of affinity with the ideas of the OT. They stand in a special relation, of dependence and agreement, to Christ's doctrine.

The *Epistle of James*, a notable product of primitive Jewish Christianity, says comparatively little on the things of the end. It speaks most definitely of the *Parousia*, of that as an event nigh at hand, and as having judgment associated with it (5⁸). It speaks also of a *Kingdom* that is promised (2⁵); of a *Judge* who 'standeth at the door' (5⁹); of a judgment that will be according to character and responsibility (2¹³ 3¹); of recompenses for the tried and proved (1¹²), and retributions for the oppressive rich (5^{1-4, 7}); of a penalty which appears to be eternal (5²⁰).

In the *Epistle of Jude* Christ's Return is the great event of the future (v. 24); the reward of the good is 'eternal life' (v. 21); the truth of the final judgment (vv. 7-14) is asserted; the doom of the evil is described as the 'blackness of darkness,' a doom 'reserved for ever' (v. 13). A peculiar feature (appearing also in 2 *Peter*), in the eschatology of this Epistle, is the place given to the judgment of fallen angels—a subject on which the Jewish imagination ran riot (see especially the Book of Enoch 6-10. 21; cf. also Jubilees 5, Apoc. Bar 56¹⁰⁻¹³). Here their doom is described, free from the extravagances which meet us in the Apocalyptic books, as that of being 'kept in everlasting bonds under darkness unto the judgment of the great day' (RV v. 6).

The writings bearing Peter's name, together with the discourses ascribed to that apostle in the Bk. of Acts, represent a distinct type of eschatological teaching, as of doctrinal statement generally. The *Second Epistle*, the genuineness of which has been so largely questioned, exhibits an affinity in many things with the Epistle of Jude. It has the same conception of the coming of Christ as the conclusive event of the future (1⁶ 2⁴). It speaks in much the same terms of the judgment, and of the doom of evil men (2^{1, 3, 6, 9, 17}). It designates the recompense of the good as an 'eternal kingdom' (1¹¹), as Jude designates it 'eternal life.' It has the same exceptional doctrine of the punishment of fallen angels, applying the unusual term *Tartarus* to the intermediate place of their detention, and describing them as committed to 'pits of darkness in reserve unto judgment' (2⁴). But it also makes its own peculiar contribution to the eschatology of the canonical writings in a remarkable paragraph, the most detailed of its kind in NT, on the end of the world (3³⁻¹³). It teaches that Christ's *Parousia* is to bring the whole present system of things to its conclusion, and the world itself to its consummation. With the great event of His coming the existing order shall be dissolved; the present heavens and earth are to give place to 'fresh heavens and a fresh earth'; and a reconstructed world is to come forth as the abode of righteousness and the scene of the perfected kingdom of God. In this 2 *P* attaches itself to OT conceptions of a world-conflagration (Ps 50⁸ 97³, Is 66^{15, 16, 24}, Dn 7^{9, 10}), and a dissolution of the present system, effected by fire, in connexion with J[']s judgment and the day of His recompense (Ps 102^{28, 27}, Job 14¹², Is 34⁴ 66²²).

First Peter, which is an epistle of hope, looks at all things in the light of the future. It has a large eschatology, the central point of which is Christ's 'Apocalypse,' His revelation or appearing (1⁷ 5⁴). Its dominant notes are the 'last time,' the 'end of all things,' the judgment (1⁵ 4⁷⁻¹⁷). In the judgment God Himself is Judge (1⁷); Christ also appears to be Judge (4⁹). The judgment is universal, alike of quick and of dead (4⁵). It begins with the house of God now, and it has its fate reserved for the 'ungodly and the sinner' (4¹⁷⁻¹⁸). The judgment of the unrighteous is referred to only incidentally. The reward of the good is declared in various terms, as an 'inheritance,' 'honour,' 'life,' a 'crown of glory,' etc. (14⁷ 5⁴). The question of greatest interest in the eschatology of this Epistle, however, is its relation to the 'larger hope.' This turns upon the interpretation given to the two famous passages touching the preaching to 'the spirits in prison' (3¹⁸⁻²²), and the preaching of the gospel to 'the dead' (4⁹). In connexion with these the application which Peter makes of Ps 16 in his Pentecostal discourse (Ac 2³¹) is also brought into view. The terms in which Peter speaks here of Christ, 'neither was he left in Hades, nor did his flesh see corruption,' have been taken to point to a visit of Christ to the under-world, and a consequent activity of His grace there. It is with Christ's resurrection, however, that Peter is specially concerned in that discourse, and the words do not go beyond the broad statement that Christ at His death passed into the world of the departed like other men, but passed thither only to rise again. The two passages in the Epistle itself are of a different nature, and rank among the chief *crucis interpretum* in NT. The former passage has been expounded in the interest of many different theories—those of the liberation of saints of OT times; Christ's penal endurance of God's wrath; the purgatorial detention and purification of souls; Christ's descent to Hades for the purpose of a judicial manifestation of Himself, for a fresh proclamation of the gospel [there, for the provision of a continuous ministry of grace there, for the prolongation of opportunities of repentance and offers of forgiveness to the departed, and the like. The latter passage has also been very differently interpreted. On the basis of both, the eschatology of this Epistle has been understood by many to favour the 'larger hope,' and to suggest that this life is not in every case the theatre of human fates, if not to teach the doctrine of the existence of a ministry of grace in the world of the departed with untold possibilities of after-death repentance and salvation. For the details of the interpretation and for its history the commentaries must be consulted. It must be enough here to say that, while the view in question has been largely adopted, it has not commended itself to all scholars of authority. The exegesis of these passages has still many uncertainties, and waits yet for its key; while the passages themselves stand entirely alone in NT. (See especially Güder, *Die Lehre von der Erscheinung Christi unter den Todten*; König, *Die Lehre von Christi Höllenfahrt*; Dietelmaier, *Historia dogmatis de Descensu Christi ad Inferos litteraria*; Hofmann, *Schriftbeweis*; Usteri, *Hinabgefahren zur Hölle*; Schweitzer, *Hinabgefahren zur Hölle*; Spitta, *Christi Predigt an die Geister*; Brunton, *La Descente du Christ aux Enfers*.) The further question has been raised whether Peter's eschatology does not contain the doctrine of a *Universal Restoration*. In his discourse to the people in Solomon's porch (Ac 3¹⁹⁻²¹) he is reported to have spoken of a *restoration or restitution of all things*. This has been sometimes supposed to intimate the final restoration of all men. But the words have their key in the passage of Malachi

(4⁵⁻⁶) to which they refer, and in Christ's application of that passage (Mt 17⁹⁻¹³). So regarded, the *restoration* of which Peter speaks becomes either the moral renewal of Israel, as some explain it, or the renovation of the world, as others think. It is in any case a restoration, not of persons, but of *conditions*. Peter's eschatology, therefore, is in general concord with that which has so far been recognized in NT. The points in which it has been supposed to be different yet remain doubtful.

The writings associated with *John's* name have a distinct and peculiar character in their doctrine of the end as in all things else. There is a marked difference, too, between the Apocalypse and the Epistles. The former is an eschatological writing, following the order of the Jewish Apocalyptic. In the latter eschatological truths also appear, but in a subordinate place. The *Epistles of John*, with their ideal teaching, find the future in the present. As in the version of Christ's teaching which is given in the Fourth Gospel, their great conception is *life*, and that as opposed to *death and perdition*. As in the one, so, too, in the other, this *life* is in the first instance a present thing (1 Jn 5¹²⁻¹³). But it is also a thing of the future (1 Jn 2²²), and it is an *eternal* life, life after the divine order, life with the ethical quality of real, perfect life. But it is none the less a life that looks to a future—to a manifestation yet to be made of what the children of God *shall* be (1 Jn 3²). In these Epistles the eschatological relations are not lost in the ideal. They speak of the 'last hour' (1 Jn 2¹⁸); of an 'antichrist' that 'cometh' as well as of antichrists that already are (1 Jn 2^{18-19, 22} 4³, 2 Jn 7); of a future 'full reward' (2 Jn 8); of a vision of Christ and a conformity to Him which are not of the present (1 Jn 3²⁻³); of a manifestation of Christ yet to be made, of His expected *Parousia* (1 Jn 2²⁸). The use of the term *Parousia*, which elsewhere, and especially in the Pauline writings, has a very definite sense, indicates that, while to John Christ's Return was in one sense a spiritual advent, a present act of grace or judgment, it was in another sense an objective event of the future. While in John's writings, too, the *Resurrection* and the *Judgment* are for the most part spiritual processes and present conditions, they are also events of the future associated, as they are elsewhere, with the *Parousia*. That it is so with regard to the former is implied in what is said of the judgment and the manifestation of the children of God. That it is so with the judgment itself appears especially in 1 Jn 2¹⁸ 4¹⁷.

In the *Apocalypse of St. John* we have a large and impressive eschatology, in which Christian truth appears in the garb of Jewish ideas and Jewish terms. This book is beyond all others the book of the future. That future is near, and it is filled with the figure of the returning Christ. Its whole doctrine of the end has its centre in the event of the *Parousia*, and that doctrine is conveyed in a form which bears the stamp both of the visions of OT prophets (especially Ezekiel, Zechariah, and Daniel) and the symbolism of the Jewish Apocalyptic books. The *Parousia* appears occasionally as a spiritual advent taking effect in history (2⁵ 3²⁰), but usually as the objective return which belongs to the end of things. It is regarded as near (2¹⁷ 3¹¹ 22^{12, 20}); it is to be an event of *glory*, and to have *judgment* for its object (1⁷). The Judge is God Himself (20¹²); but Christ also appears as Judge (1¹⁸ 6^{16, 17} 22¹²). Like the non-canonical books of the same class, it speaks much of the signs of the end, and of the prelusive events, but avoids the trivialities and the gross imaginings, the fanciful and long-drawn-out calculations, which are characteristic of the ordinary Jewish Apocalyptic (e.g. Enoch 10¹² 91¹²⁻¹⁷ 93, Assump. Moses 10²⁹, Sibyll.

Or. 4⁷, 2 Es 14^{11, 12} etc.). At times it seems to combine different ideas which prevailed in Judaism of the things of the end. In one paragraph (20¹⁻¹⁰), of difficult interpretation, it appears to follow a view of the final events which differs from the general doctrine of the NT, but is given in certain of the Jewish books—the idea of a millennial reign of Christ on earth, to be followed first by a final burst of Satanic power, and then by Christ's judicial advent. The paragraph, which will not fit a purely figurative interpretation, represents the Day of the Lord as consisting of two divisions, with a double resurrection and a double judgment—a first resurrection, which is only of the saints, and more particularly the martyred saints, and a second, which is for 'the rest of the dead'; a first judgment taking effect in the overthrow of Satan, and a second, which is in forensic form, and for all classes of the dead. The book is also understood to express two views of the lot of the righteous dead: one in which they are presented as having immediate entrance into heaven (13⁶), another in which they are presented as in the underworld, in consciousness and rest, waiting for their complete reward (6⁹⁻¹¹). In the latter case, however, the martyrs alone are in view, and in both cases the language is that of the imagination. The Apocalypse, however, has a pronounced doctrine of the final awards. The reward of the righteous is conveyed in a varied imagery of the OT order—'hidden manna,' a 'new name,' the 'crown of life,' 'right to the tree of life,' the place of a 'pillar' in the temple, a reign with Christ, a position before the throne, entrance into the city, the vision of God's face, the heirship of all things (2^{7, 10, 17, 31, 21, 71, 21, 22, 14}). The penalty of the unrighteous is described as 'great tribulation,' being 'without,' killing with death, burning with fire (2^{22, 23, 18, 9, 22, 15}); but above all by two terms, 'the second death' (2^{11, 20, 6, 14, 21, 8}) and 'the lake of fire' (19^{20, 20, 10, 21, 3}), which are peculiar to this book among the NT writings, but which occur in one form or other in the Rabbinical and Apocalyptic literature (e.g. Enoch 18^{11, 21, 7-10, 90, 42}). In this book they appear to denote a lasting retribution. Further, the Apoc. expresses the doctrine of a perfected world as well as that of a perfected society. It has the vision of a new heaven and a new earth (21¹⁻⁵) as well as that of a perfected city of God (21^{1-22, 3}).

In the *Epistle to the Hebrews*, where we have a series of ideas and forms of expression in general affinity with the Pauline type of doctrine, and not less with the older apostolic type, eschatology is not the prominent subject. Even the 'rest' and 'the world to come' are not presented primarily as of the future. Yet the things of the end make a considerable element of the thought of the Epistle. The doctrines of 'resurrection of the dead' and 'eternal judgment' are dealt with as things that should be well understood (6¹⁴). The day of Christ's coming is in the writer's eye; it is a day that draws nigh, and with it the judgment is connected (9^{28, 10, 24, 25}). In the judgment it is God Himself, not the Son, that is Judge, and He is 'Judge of all' (12^{23, 10, 30, 31}). The Epistle also has a definite doctrine of *final awards*. The recompense of the righteous is the 'heaven' into which the Forerunner and High Priest has passed, an 'eternal inheritance,' an 'enduring substance,' a 'better country,' a 'city prepared,' a 'kingdom which cannot be moved' (4^{8, 6, 15, 20, 9, 15, 10, 34, 36, 11, 16, 12, 28}). The retribution of the unrighteous is 'judgment,' 'fierceness of fire,' 'perdition' (10^{27, 29}).

In the *Pauline Epistles*, together with the discourses attributed to St. Paul in the Book of Acts, we find a remarkable eschatology, larger, more developed, and in some points, especially in

the doctrine of the resurrection, having more of the aspect of reasoned statement. Even this eschatology, however, is not given in anything like orderly or systematic form, but incidentally as occasion arose from time to time in the discharge of St. Paul's ministry. Nor is it the fundamental doctrine of the Pauline writings. The questions of its precise nature and measure, its consistency, and its relations to what is found elsewhere in Scripture, have been made dependent on questions regarding the authenticity and integrity of the Epistles and the growth of St. Paul's ideas. In its main elements, however, it is unaffected by these questions. Its essential points would remain the same had we only the four primary Epistles accepted by Baur. They appear in all the four distinct groups into which the Pauline writings fall. They do not appear in the same proportions and relations, or under precisely the same aspects, in the several groups. But the differences which have to be recognized do not amount to inconsistency. They do not imply any essential change of view, and do not appear to go beyond what finds its explanation in differences of circumstance, occasion, and circle of readers.

As in other sections of NT, the doctrine of the things of the end is closely related in the Pauline writings to that of the kingdom of God, an idea which recurs in all the four groups of Epistles. This 'kingdom,' though sometimes described as a *present* kingdom (Ro 14¹⁷, cf. 1 Co 4²⁰, Col 1¹³), is usually a kingdom of the future, and the idea of its consummation is the centre of the Pauline eschatology. A foremost place is given in this eschatology to the doctrine of Christ's *coming*, which event is described under a variety of terms—His 'day,' His 'revelation,' His 'Parousia,' etc. (1 Co 1^{7, 8, 5, 5}, 1 Th 2^{19, 31, 4, 15, 5, 2, 23}, 2 Th 1^{7, 21, 8, 9}, Ph 1¹⁰, 1 Ti 6¹⁴, 2 Ti 1^{12, 4, 8}, Tit 2¹³ etc.). This Parousia is regarded as an objective event. The passages in which this 'coming' is declared are not confined to any one section of the writings; and when compared with each other they do not suggest a change in St. Paul's mind from a less spiritual idea in the earlier Epistles to a more spiritual in the later. The doctrines of the *Resurrection*, the *Judgment*, and the *Final Awards* also appear in essentially the same form in the Pauline writings, and in the several groups of these writings, as elsewhere in the NT. The *resurrection* finds its largest exposition in the primary Epistles, but it is given also in others, and it is a real *bodily* resurrection, a return of the complete man to life (Ro 4^{17, 8, 1}, 1 Co 15, 2 Co 1^{10, 4, 14, 5, 1-5}, Ph 3^{11, 21}). The *judgment* is the judgment of *God* (Ro 2^{3, 14, 11}, cf. 3¹⁹), of *Christ* (2 Co 5¹⁰, 2 Ti 4¹), of *God through Christ* (Ro 2¹⁶); a future, final judgment (Ro 2⁵, 1 Co 3¹³); a righteous judgment, discovering the secrets of all hearts, giving to every man according to his works (Ro 2⁵, 2 Th 1⁵, 2 Ti 4⁸); a universal judgment, for both quick and dead (Ac 17³¹, cf. Ro 14¹¹, 2 Ti 4¹). The issues of that judgment are declared with remarkable frequency and variety of statement; they are described as 'eternal' (*aiónios*), which term in the Pauline Epistles is essentially, and in most applications, one of duration (cf. e.g. Ro 16²⁶, 2 Co 5¹ etc.). The lot of the unrighteous has a subordinate place, but is expressed as 'wrath,' 'the wrath to come,' 'death,' 'punishment,' 'destruction,' 'eternal destruction from the face of the Lord' (Ro 2⁵, 1 Th 1¹⁰, Ro 2^{8, 6, 21}, 2 Th 1⁹, Ph 3¹⁹). The lot of the righteous is a salvation 'with eternal glory,' a 'prize,' a 'crown,' an 'inheritance,' a 'manifestation,' a 'reign,' a 'life' with Christ, 'eternal life,' 'the life which is life indeed' (Ro 2^{7, 5, 8, 21, 6, 8, 23}, 1 Co 9²⁵, Gal 5⁶, Ph 3¹⁴, Col 1^{12, 3, 24}, 1 Ti 1^{16, 6, 12, 16}, 2 Ti 2^{1, 10, 4, 8}, Tit 1² etc.).

The Pauline eschatology has elements which are,

in some sense, peculiar to itself. Among these are the doctrines of the Rapture of the Saints (1 Th 4¹⁷) and the Man of Sin (2 Th 2³⁻¹⁰). Of these the former has a certain affinity with one of the apocalyptic visions (Rev 11¹¹⁻¹²), as well as with Christ's word regarding the 'gathering of the elect' (Mt 24²¹), and the narratives of the ascension, especially those by Luke (Mk 16¹⁹, Lk 24⁴⁵, Ac 1⁹⁻¹⁰). The latter takes its form from Daniel's predictions (9²⁷ 11^{36, 37} 12¹¹), and is in affinity with Christ's eschatological discourse (Mt 24²⁴), and John's declaration on Antichrist (1 Jn 2¹⁸).

There are also things in the Pauline eschatology on the interpretation and relations of which opinion has been divided. It is thought by some to depart from the general view of the NT, and to join the Apocalypse (20¹⁻¹⁰) in teaching the intervention of a *millennial* period between two distinct resurrections. But this idea, which is otherwise alien to St. Paul's writings, turns upon the particular interpretation of a single passage (1 Co 15²⁰⁻²⁴), in which the immediate question is not one of *succession* or chronological order, and in which nothing is said of any other resurrection than that of those who are Christ's. The Pauline Epistles have also been supposed to contain a definite doctrine of the *intermediate state*, with activities of grace in it. The doctrine of a *purgatory*, or some provision for the purgation of souls in the other world, has been ascribed to the great paragraph in 1 Co 3¹²⁻¹⁵, in which, however, the 'day' in question is that of the judgment, and the action referred to is that of *testing*, not purifying. The doctrine of a *middle state*, with a descent of Christ implying the extension of grace and opportunity, is supposed to be contained, in particular, in certain passages of the greater Epistles. One of these is the section in Romans (10⁵⁻¹⁰) in which use is made of Dt 30¹¹⁻¹⁴. But the main idea there is the *accessibility* of the Divine commandment, the *nearness* and *attainability* of the righteousness of God, and the words say nothing of a Hades-ministry of Christ, nothing of the world of the dead, beyond the fact that Christ entered it and was raised from it. Another is the paragraph in Ephesians (4⁷⁻¹⁰) in which the subject of *gifts* is dealt with, and the 68th Psalm is introduced in that connexion. It speaks of a *descent* of Christ, by which some understand the descent from heaven in the incarnation, and others the descent from earth to Hades. But even on the latter interpretation the paragraph says nothing of any work of Christ, or any possibilities for the dead in Hades. Of greater interest is the question whether the Pauline eschatology contains the doctrine of a *universal restoration*. The answer turns mainly on certain passages of large suggestion in the Epistles of the Captivity, together with one or two in the earlier Epistles. The comparison between *Adam* and *Christ* in 1 Co 15²⁰ is cited in this interest. The universality expressed there, however, does not mean that all shall in the end be made certain of blessedness. The point is either, as some take it, that all who are Christ's shall be raised (the 'all' being limited by the nature of the case); or, as others think, that, as in Adam all are made subject to physical death, so in Christ all shall be raised out of it. The statement in the same chapter (1 Co 15²⁴⁻²⁸) on the subduing of all things, and the consummation in which God shall be 'all in all,' is also supposed to imply Paul's hope of a final restoration of all. But the subjects to be subdued are not sinful men, but 'all rule and all authority and power'—all powers opposed to God; and the end expressed by the 'all in all' is a condition of things in which the world in all its parts will answer to God's will, or in which the will of God will be recognized as the sole authority. The declaration of the uni-

versal adoration that is to be paid to the exalted Christ (Ph 2^{10, 11}) is also cited as a distinct witness to the same; in which, however, there is probably nothing beyond the broad statement of a homage wide as universal nature, or an acknowledgment of sovereignty made by three great classes of living beings. The passages which are most definite and most relevant are the one in Ephesians (1^{3, 10}) which speaks of a 'summing up' of all things in Christ, and the one in Colossians (1²⁰) which speaks of a 'reconciliation' of all things. In these the terms are large enough to include all created things, and go beyond the case of universal man, or even the whole animate creation. They are passages which express the cosmic effects of Christ's work, and appear best interpreted as declarations of the Divine purpose to bring back all things to their pristine condition of harmony, through Christ as the centre of unity and bond of reconciliation.

The Pauline eschatology has its point of culmination in its doctrine of the *resurrection*. That doctrine is a consistent as well as a lofty one. It does not limit itself to a resurrection of the just, but has its place also for that of the unjust. Neither does it regard the resurrection of the just and that of the unjust as two successive acts, separated by a millennial period, the passage (1 Co 15²⁰⁻²⁸) chiefly relied on for that being insufficient to sustain it. Nor does it seem to predicate the provision of an *interim* body, as some have argued on the basis of a single paragraph (2 Co 5¹⁻⁸), for the existence between death and the resurrection. Nor, again, does it entangle itself with curious questions regarding the *how* of the resurrection, the nature of the risen body, or the conditions of the future life, but contents itself with the simplest analogies drawn from nature and from Christ's own case. It consistently affirms for man a real and complete continuance of being, not an incorporeal immortality like that to which Greek thought looked, but a bodily immortality, a permanence of life in the integrity of man's entire nature. It connects its doctrine of the resurrection with other cardinal Pauline doctrines—the indwelling of the Spirit, the inward presence of Christ, the mystical union. It links it further with the doctrine of a renovated earth and a ransomed creation (Ro 8¹⁹⁻²³).

The eschatology of the NT, therefore, is in its broad outlines a consistent though not a systematized doctrine. In the different sections of NT, and with all differences in detail, the eschatology turns on the great truths of the Parousia, the bodily resurrection, the universal, righteous judgment, the final awards of recompense and penalty. It is in essential harmony with the faith and teaching of the OT, and requires for its explanation no theories of derivation from ethnic thought. The distinctive points in the Pauline eschatology are in affinity with Hebrew faith, not, as some argue (Pfeiderer, etc.), with Greek thought. The same is even more obviously the case with the eschatology of the NT writings outside the Pauline circle. Essene or Alexandrian (Philonic) ideas are not in place as sources of Christ's teaching on the things of the end. Even the doctrine of the *resurrection* as it is given in the NT cannot be said to be dependent, in the sense affirmed by some (L. H. Mills, etc.), on the Zoroastrian theology. It is possible that in some of its affirmations the NT eschatology has been influenced to a certain extent in its form by external modes of thought. In all that is of its substance it is in relation to Hebrew faith, and has its point of issue in the principles and ideas of the Old Testament.

ESCHEW.—In the older versions 'eschew' is common, and is used in two senses. — 1. To 'escape,' as Pr 11¹⁵ Wyc. 'He that escheweth snaris, schal be sikur'; cf. Knox, *Hist.* p. 70, 'If they will not convert themselves from their wicked error, there shall hastily come upon them the wrath of God, which they shall not eschew.' Of this meaning AV has retained no example.

2. To 'turn away from,' as Pr 17¹⁶ Wyc. 'He that escheweth to lerne, schal falle in to yuels.' Of this AV preserves three examples in OT, Job 1¹⁻⁸ 2³, all in the phrase 'to fear God and e. evil' (Heb. פֶּחַח); and one in NT, 1 P 3¹¹ 'Let him eschew evil, and do good' (Gr. ἐκκλίω). Cf. Is 7¹⁸ Cov. 'But or euer that childe come to knowledge, to eschue the euil and chose the good.' RV prefers 'turn away from' in 1 P, Amer. RV in Job also. Eschew came into the Eng. lang. from the Old High Ger. *sciuhen* (through the Fr. *eschever*), whence came also 'shy,' adj. and verb.

J. HASTINGS.

ESDRAELON.—This is the Gr. way of writing the Heb. name *Jezeel*—לִזְרְעֵל; 'God soweth'—the royal city of Ahab and Jezebel, which, standing on the E. edge, gave its name to 'the great plain' of central Palestine. It is variously given, e.g. Jth 3⁹ כְּצֵא A 'Ἐσδρηλῶν (B 'Ἐσδραηλῶν); 7²-A 'Ἐσδρηλῶμ (B κ 'Ἐσδρηλῶν); 4⁶ B 'Ἐσρηλῶν, A 'Ἐσρηλῶν. The name by which it is now known among the natives is *Merj Ibn-Amr* 'Meadow of the son of Amr.'

At one time the mountain range must have stretched unbroken from the uplands of Samaria, behind *Jenin*, to those of Galilee, which run N. into the Lebanon. Now it is as if a gigantic mass had been torn from the bosom of the range, leaving the rough protuberances of Gilboa, Little Hermon, and Tabor, along the edge of the Jordan Valley, and thrust violently towards the sea, in a N.W. direction. This mass forms the wooded bulk of Carmel, which, rising to a height of over 1800 feet, terminates in a bold promontory, guarding the S. end of the Bay of Acre. The undulating floor of this great gap among the hills forms the 'valley' or plain of Esdraelon. The name by which it is mentioned 2 Ch 35²², Zec 12¹¹, נַחְלָא 'an opening,' from נָחַל 'to split' or 'cleave asunder,' as distinguished from נַחֲלָה 'a depression' or 'deepening,' applied to its offshoot, the vale of Jezreel, suits the conditions admirably. The word still persists in *El-Beká*, the great hollow between the Lebanon; and in its dim. form, *El-Bakei'a*, a village with a tract of fertile land around it, enclosed by ridges, high in the mountains of Naphtali. So the plain of E. is shut in by hills on every side. It may be described generally as triangular in form. It is bounded by irregular lines, drawn from the foot of Carmel, along the N. edge of the low hills which join Carmel to the Samaritan mountains, to *Jenin*; from *Jenin* to the base of Mt. Tabor; and thence under the Nazareth hills, back again to Carmel. The S. boundary is the longest, extending some 20 miles; the other two are nearly equal, being each about 15 miles in length. From *Jenin* a little bay runs east into the bosom of Gilboa, but finds no outlet. Between Gilboa and Little Hermon a broad and easy descent passes down as far as *Beisán*, and then,

with a sudden leap, plunges to the level of the Jordan Valley. This is properly the vale of Jezreel. Between Little Hermon and Tabor another offshoot of the plain makes its way down to the *Ghór*, throwing off a spur to the N.E. of Tabor. Westward the plain narrows to a gorge between the lower hills of Galilee and Carmel, through which the Kishon forces a passage to the plain of Acre, and thence to the sea. We have practically one continuous plain from the sea-shore to the lip of the Jordan Valley. There is the plain of Acre, running up to the gorge at the E. end of Carmel; the great central plain spreading N. and S., and rolling E. to the base of Gilboa and Little Hermon, the general elevation of which is about 200 ft. above sea-level; then the vale of Jezreel, which, in the 12 miles from *Zer'in* to *Beisán*, sinks about 600 ft., before falling steeply into the Jordan Valley.

For the most part, the plain consists of deep, rich, loamy soil. After the removal of the crops, where it is cultivated, the autumnal suns burn the surface almost to brick; and when the rains come, it sucks them in like a huge sponge. In winter it becomes a nearly unbroken sheet of mud, extremely dangerous to cross; disaster not seldom befalling those who travel even by the most frequented and thoroughly beaten tracks. Its fertility has always been remarkable, ever generously rewarding the toils of the husbandmen. In season you may pass over many acres where the man on horseback can just see over the tall stalks of grain. Where left to itself, the rank luxuriance it produces is proof enough of what it might do in skilful hands. Of trees, in the plain there are few, but on its borders, esp. at *Jenin*, there are clumps of olives and other fruit trees, the stately palm waving high over all. The low hills that run down towards Carmel from the N. are thickly covered by oak trees, and are known among the natives as 'the forest.'

The only stream of importance in the plain is the Kishon, visible, for the most part, only from its own steep banks. Rising at *Jenin*, it pursues its crooked course, justifying its name 'the tortuous,' along a deep muddy bed, gathering contributions from other parts of the plain, and carrying all, through the gorge at Carmel, to the sea. The chief fountains are at *Jenin*, where, creating the gardens, they gave rise to the ancient name *En-Gannim*; at Jezreel, where, in close proximity, are three springs, the principal being *Ain Jalúd*, just under the northern cliff of Gilboa, identified with the well of Harod. The stream which these three supply flows eastward to Jordan. At *Lejján*, the ancient Megiddo, there are also copious springs, sufficient to form considerable marshes to the N., besides turning several mills, and serving largely for irrigation.

The plain owed its importance chiefly to its central position, and to the great highways that lay athwart it. The main gateways of entrance were five in number. (1) That coming down from the N. between Tabor and the Nazareth hills, guarded by the fortress on the mountain. (2) That from the E. up the vale of Jezreel, commanded by this city. (3) The approach from the S. by *Jenin*. (4) That up *Wady 'Arah* into the plain by the old stronghold of Megiddo, now *Lejján*. (5) That through the pass under Carmel, from the plain of Acre, dominated by Harosheth—*Harithiyeh*—on the N., and by Jokneam of Carmel on the edge of the plain. By one or other of these portals the merchant caravans and the armies of contending powers had to enter, and find exit, on their passage N., S., E., or W. These strongholds, together with Bethshean—*Beisán*, Shunem—*Sólam*, Nain, on the N.W. shoulder of Little Hermon, Daberath—*Debúriyeh*, on the W. slope of Tabor, and Chesul-

loth—*Iksâl*, under the Nazareth hills, were the chief cities around the plain. At no time have towns of any importance been built on the plain itself.

E. formed the main part of the 'lot' of Issachar (Jos 19¹⁷⁻²²). This tribe seems to have reverted at once to the old nomadic life, 'dwelling in tents' (Dt 33¹⁸), and the fatness of the land becoming a snare to them, they were ignobly content to secure its enjoyment by stooping as servants 'under task-work' (Gn 49¹⁴). The 'men who had understanding of the times,' of the children of Issachar, who came to David at Hebron (1 Ch 12³²), were probably astrologers, and skilled in the arts of divination, so popular from of old among the children of the wilds. This goes to show how closely the inhabitants of the plain were identified with their *Bedawi* neighbours. In the same chapter, v. 40, we have an indication of the character of its ancient produce. The men of Issachar, Zebulun, and Naphtali 'brought bread on asses, and on camels, and on mules, and on oxen, victual of meal, cakes of figs, and clusters of raisins, and wine, and oil, and oxen, and sheep in abundance.'

Four battles, famous in Israel's history, were fought in this plain. On the banks of Kishon Sisera was overthrown, 'the stars in their courses' contributing to his defeat (Jg 5²⁰). In the hollow between Gilboa and Little Hermon, the swarms of 'the children of the East' perished in the midnight alarm, before Gideon and his brave 300 (Jg 7). Saul and Jonathan, driven back by the victorious Philistines, retired to the heights, and were slain on the 'high places' of Gilboa (1 S 31). Josiah's disastrous mistake, in attempting to arrest the progress of Pharaoh-necho in the valley of Megiddo, was paid for with his life. Wounded in the battle, he was carried to Jerus. dead (2 K 23³⁰) or dying (2 Ch 35²⁰⁻²⁷). Imperishable memories of Elijah's encounter with the prophets of Baal cling to its western border. Up from the way of the Jordan came Jehu, driving furiously, to the slaughter of Ahab's house, and across the plain fled Ahaziah, to perish by Megiddo. The army of Holofernes spread out from the hills above *Jenin* to Cyamon—*Tell Kaimin* (Jth 7⁸). During the long period of the Jewish wars, the plain often resounded with the tramp of armies and the noise of battle. In the vision of the Jewish-Christian seer (Rev 16^{14, 16}), the most fitting place whither 'the kings of the whole world shall be gathered together unto the war of the great day of God, the Almighty,' is the level reaches, so often drenched in blood, which take their name from 'the place which is called in the Heb. tongue Har-Magedon.'

Open of old to the eastern tribesmen, who kept the peasants in constant fear, the Romans inaugurated a period of security, and the people made progress in the arts of civilization. But with the fall of the eastern empire, the Arab hordes rushed back, and restored the ancient conditions. In recent years the Turks have established more effectual control over the nomads; and the peasants, delivered from the rapacity of the Arabs, have been handed over to the tender mercies of certain Greek capitalists in Beirut. We may doubt if their burdens have thus been lightened.

W. EWING.

ESDRAS, FIRST BOOK OF.—TITLE.—The titles of the books that deal with the history of Ezra are confusing. In the Sept. this book is entitled *Esdras A*, *Esdras B* embracing the canonical books

of Ezra and Nehemiah. In the Vulg., however, Jerome had used the words *Esdras I.* and *II.* for the canonical books; *Esdras A* therefore became *Esdras III.*, *Esdras IV.* being the designation of the other and later apocryphal book. In the sixth article of the Book of Common Prayer, and in all the early Eng. Bibles, the four books are numbered as in the Vulgate. The Geneva Bible (1560) was the first to adopt our present classification, which keeps the Heb. names Ezra and Nehemiah for the canonical, and gives the Latin names *Esdras I.* and *Esdras II.* to the apocryphal books.

Another title, *ὁ λεπέβς*, appears as the heading of *Esdras A* in Cod. A of the LXX, which also has *λεπέβς* at the head of *Esdras B*; the subscriptions in both books give the ordinary names.

Yet another name for our book appears in the subscription to the Old Latin, 'Explicit *Esdrae liber primus de templi restitutione*,' which aptly describes the contents of the book. To avoid confusion, 'The Greek *Esdras*' has been suggested as a suitable title.

CONTENTS.—Except for one original section (3¹⁻⁵), the book is made up wholly from materials that exist in canonical books. It is a repetition of the history of the rebuilding of the temple. The first chapter corresponds to the last two of 2 Ch, the last to a portion of Neh 8; the intervening portion runs parallel to Ezra, and contains the whole of that book, with one transposition and one interpolation.

The following scheme gives the canonical parallels, and shows the chronological confusion of the book. (The verses are those of the Camb. LXX.)

Es 1-2 Ch 35. 36. Great passover of Josiah; his defeat at Megiddo, and death; the succeeding Jewish reigns and the Captivity briefly sketched.

Es 2¹⁻¹⁴=Ezr 1. *Cyrus'* proclamation. Delivery of the sacred vessels to Sanabassar, and his return to Jerusalem.

Es 2¹⁵⁻²⁵=Ezr 4⁶⁻²⁴. Opposition to the rebuilding of the temple. Letter of Persian officials resident in Samaria to *Artaxerxes*. The work abandoned *till the reign of Darius*.

Es 3¹⁻⁵. Original. Story of the three pages at the court of *Darius*, who each maintain a thesis before the king. The third, Zerubbabel, as a reward for his wisdom, is granted leave to lead a body of Jews to Jerusalem. Departure of the caravan under *Joachim, son of Zerubbabel*, and others.

Es 5⁷⁻⁴⁵=Ezr 2. Lists of those returning with Zerubbabel.

Es 5⁴⁶⁻⁷⁰=Ezr 3-4⁵. Altar of burnt-offering set up; Feast of Tabernacles celebrated; foundation of temple laid; offer of 'the enemies' to co-operate rejected. The work hindered through their opposition *till the reign of Darius*.

Es 6. 7=Ezr 5. 6. Work resumed in second year of *Darius*. Letter of the Persian governors to *Darius*, and his favourable rescript. Completion of the temple.

Es 8-9³⁶=Ezr 7-10. Return under Ezra in reign of *Artaxerxes*. The abuse of mixed marriages redressed. Names of the transgressors.

Es 9³⁷⁻⁵⁵=Neh 7⁷³⁻⁸¹³. Reading of the law by Ezra.

The history goes directly backwards: first *Artaxerxes* (2¹⁵⁻²⁵), then *Darius* (3-5⁶), lastly *Cyrus* (5⁷⁻⁷⁰), instead of *Cyrus, Darius, Artaxerxes*. After expressly stating that it was *Darius* who gave permission to Zerubbabel to return, the writer in 5⁶⁸⁻⁷⁰ calmly refers this return to the time of *Cyrus*.

The book is incomplete. It breaks off in the middle of a sentence, *καὶ ἐπισυνήχθησαν* (cf. Neh 8¹³). It probably continued the history to the Feast of Tabernacles described in Neh 8, but no further; this is suggested by Jos. *Ant.* XI. v. 5, who describes that feast, using an *Esdras* word *ἐνανθρωσῖς*, and at this point, having hitherto followed Es as his authority, passes on to the Book of Neh. The Latin versions add a clause completing the broken sentence of the Greek. There is no indication that the book ever began at an earlier point in the history than it does now.

RECEPTION AND USE OF THE BOOK.—The first witness to the existence of Es A is Josephus, who uses it in place of the canonical book not only in his description of the Return (*Ant.* XI. i.-v.), but also in his account of Josiah (*Ant.* X. iv. 5ff.). He agrees with Es in shifting the first opposition to

the work, and the letter to the Persian king, from its place in the canonical Ezr, altering Artaxerxes to Cambyses to correct the chronological error; he introduces the story of the three pages; with Es he passes directly from the end of Ezr to Neh 8; and he borrows a good deal of the language of our book. His preference for it was probably due to its more elegant Gr. style, and a desire not to omit the additional matter contained in it. He occasionally supplements his authority by information derived apparently from the Heb. Ezr; the indications of his knowledge of the Gr. Es B are too slight to warrant the supposition that he made any use of that book (but see XI. i. 3, § 15, *ψυκτῆρες*; XI. v. 2, § 136). His narrative is worthless as history, since in trying to remove the inaccuracies of his original he has only introduced greater confusion himself.

Our book is quoted fairly often by the early Christian Fathers, both Gr. and Latin. Among Gr. Fathers, Clem. Alex. *Strom.* i. 392, Potter (*ἑνταῦθα Ζοροβαστὶ σοφία νικήσας τοὺς ἀνταγωνιστάς, κ.τ.λ.*); Origen, *Hom. ix. in Josuam*, § 10, *Comm. in Johann.* vi. 1; Eusebius, *Comm. in Ps.* 78, § 19; Athanasius, *Orat. cont. Arianos*, ii. 20. Tertullian, *De Cor. Milit.* 9, perhaps refers to 1 Es 52; Cyprian, Ep. 74, 9, quotes the passage, 'Veritas manet et invalescit in aeternum, et vivit et obtinet in saecula saeculorum' (iv. 38); and Augustine, *de Civ. Dei*, xviii. 36, refers to the same passage, suggesting that it may be prophetic of Christ, who is the Truth. No passage has perhaps been more freq. quoted, or misquoted, than iv. 41, *Magna est veritas et pravalet* 'Great is truth, and strong above all things' (*ἰσχυροτέρα*). (The patristic references are collected in the *Tübingen Theol. Quartalschrift*, 1859, p. 263 sq.) The first writer to throw discredit on the book was Jerome. He refused to translate the 'dreams' of 3 and 4 Esdras. His words are (*Praef. in Ezeam*), 'Tertius annus est quod semper scribitis atque rescribitis, ut Esdræ librum et Esther vobis de Hebraeo transferam. . . . Nec quenquam moveat quod unus a nobis liber editus est: nec apocryphorum tertii et quarti somnii deletetur; quia et apud Hebraeos Ezræ Nehemique sermones in unum volumen coarctantur; et quae non habentur apud illos, nec de viginti quatuor senibus sunt, procul abicienda.' Consequently, the Old Latin was left untouched by him, and the book is absent from the older MSS of the Vulg. (e.g. Cod. Amiatinus).

It was probably owing to the influence of this estimate of Jerome, that the Tridentine Fathers in 1546 excluded 1 Es from the Canon. 1 and 2 Es, with the Prayer of Manasses, are the only books admitted as apocryphal into the Romish Bibles, the rest of our Apocr. being declared canonical by the Council of Trent. In modern editions of the Vulg. they form an Appendix, being placed after the NT, with a prefatory note stating that they are placed 'hoc in loco extra scilicet seriem canonicorum librorum . . . ne prorsus interirent, quippe qui a nonnullis sanctis Patribus citantur, et in aliquibus Bibliis tam manuscriptis quam impressis reperiuntur.' In the Eng. Bible our book stands first in the Apocrypha.

RELATION TO THE CANONICAL EZRA.—On this question, the most interesting which arises in connexion with the book, the most opposite opinions have been held. The various theories resolve themselves into three.

1. It is regarded as a mere compilation from the Gr. of the LXX (2 Ch and Es B). Those books, according to this theory, have been worked over and modified for the sake of Greek readers, to whom the Hebraic style of the LXX version rendered it unintelligible. Such is the view of Keil, Schürer (in Herzog, *Encycl.* i. 496, 'nach der Septuaginta übersetzung bearbeitet,' and HJP II. iii. 177 ff. Eng. tr.), and Bissell (in Lange's *OT Comm.*). In favour of this view it is urged (i.) that our book often agrees literally with the LXX in the Gr. used, even in rare and unfamiliar words; (ii.) that the LXX is often followed in its *deviations* from the Heb. text; and (iii.) that in the case of deviations from both Heb. and LXX, the readings of Es A are more easily referred to the latter than to the former. The best instances of (i.) are Es A 8⁸⁸ ὁ κοφίσας τὰς ἀμαρτίας ἡμῶν = Es B 9¹³ ἐκούφισας ἡμῶν τὰς ἀνομίας, RV 'punished us less than our

iniquities deserve'; Es A 9⁹¹ = Es B 18¹⁰ φάγете λάπασματα. For (ii.) may be quoted Es A 1¹⁰ καὶ οὕτω τὸ πρωῶν = 2 Ch 35¹² καὶ οὕτως εἰς τὸ πρωῶν, against Heb. 'and so they did with the oxen.' The two Heb. words קָרָן ('oxen') and קָרָן ('morning') are indistinguishable without the vowel points; the agreement need not prove the use of one version by the other. More striking is Es A 1¹¹ μετ' εὐωδίας καὶ ἀπήνεγκαν, compared with 2 Ch 35¹³ καὶ εὐωδῶθη καὶ ἔδραμον. This looks like a confusion of εὐωδέω and εὐοδώ; the Heb. equivalent is 'and in pans.' But here Es renders the Hiphil וָרָן; correctly by ἀπήνεγκαν, which ἔδραμον fails to do, thus showing independent knowledge of the Hebrew. Compare also Es A 1²⁸ πολεμεῖν αὐτὸν ἐπεχειρεῖ, and 2 Ch 35²² ἀλλ' ἢ πολεμεῖν αὐτὸν ἐκραταιώθη, with the Heb. 'disguised himself' that he might fight with him.'

A comparison of the two books, however, renders it impossible to maintain the view any longer, that Es A is compiled solely from the Gr. of the other books. There are numerous passages where Es preserves the Heb. more closely than the LXX, or points to a different word in the Heb. original. An examination of all the passages given by Bissell (p. 69) in support of the opposite opinion will show that there is not one where Es does not preserve some touch in the Heb. which is missed in the LXX Ezr, which cannot therefore have been the only authority possessed by our author in those parts which agree with the canonical book. It still remains possible that Es A is a mere recension of the canonical books by the help of the Heb.; but the Gr. of the two books is of such a different character as to make it improbable that this is the true view of the relation between them.

2. It is regarded as a working over of an earlier Gr. translation of Ch, Ezr, and Neh, but a translation quite distinct from the LXX. This view is held by Ewald (*Hist. of Isr.* v. 126-128, Eng. tr.). He first gives the alternative that the writer 'was either a translator of the books of Ch, or else found them already translated, and worked up the tr.' and then decides for the latter view (p. 128 n.). 'He found the work of the chronicler tolerably freely translated from the original. This tr. was different from that of the LXX, and no doubt much older.'

This theory admits an independent tr. of the Heb. as the basis of the book, but denies that the compiler was himself the translator; it presupposes a lost Gr. version of Ch, Ezr, Neh. It gives a satisfactory explanation of the coincidences in tr. and deviation from the Heb. in Es A and Es B, if we suppose that both are to some extent dependent on a lost Gr. original. We should then have in the two books a parallel case to the two Gr. versions of Dn, the LXX very paraphrastic, Theod. fairly literal, both being dependent on an earlier version (Smith, *Dict. Christ. Biog.* art. 'Theodotion').

3. It is held to be a direct and independent tr. from the Heb., and from a text in some instances superior to the Massoretic; Es B was entirely unknown to the writer. This view is held by Michaelis, Trendelenburg (in Eichhorn's *Allgemeine Bibliothek der bibl. litt.* 1787), Pohlmann (in *Tübingen Quartalschrift*, 1859, p. 257), Herzfeld, Fritzsche, and others. It is simpler than the last, but fails to account for the coincidences in the two books. The question whether (2) or (3) is the true view depends also on the date which, on linguistic and other grounds, we are led to assign to the work. It cannot be said to have been yet decided which is right, but (2) appears to satisfy all the requirements of the problem, while (3) does not.

The two translations are of an essentially

different character. While the writer of Es B shows a slavish adherence to the Hebrew, often transliterating his original, and making no pretensions to style, Es A is marked by a free style of translation, an elegant and idiomatic Gr., a happy rendering of Hebraisms, and an omission of difficulties, which make it a far more readable book than the other. It was clearly intended for Gr. readers unacquainted with Hebrew. The writer was a litterateur in possession of a wide Gr. vocabulary.

A few instances of his manner may be given. He consistently translates the phrase 'beyond the river' (the Persian name for Palestine, Es B *πέραν τοῦ ποταμοῦ*) by *Κατὰ Συρία καὶ Φοινίκη* (7 times in Es A; only 3 times elsewhere, viz. in the Books of Mac). He writes *ἔγειν τὰ πλάκα* for *Ch πάλιν τὰ φάσιγ*. A good instance of idiomatic Gr. style is 569.70 (contrast Es B 44.5). A list of some words peculiar to Es A in the Gr. OT may not be superfluous. ἀκολούθως c. dat. for *κατὰ* (5 times), ἀναγνώστης (of Ezra, ὁ ἱερεὺς καὶ ἀναγνώστης τοῦ νόμου=Es B ὁ ἱερεὺς καὶ ὁ γραμματεὺς, 6 times), ἀναμνησθήτω, ἐρχομένους (of Ezra), βιβλιοφιλῶν, δημογορία, ἐγγράσειν, ἐπαύξειν, ἐμφοσιῶν, ἱσκαουστῆς, ἐπιδῶν, ἱεροδουλος (6 times=Es B Ναβινιμί), ἱερατῆς, ἱεροφάλης (6 times, Es B ἄδοντις), κάρρον 'a car', μεριδάρχια (4 times), μεταγενέστερος, ἑνεματογραφία, πραγματικῆς (subst.), συμμορβαίνειν, συνζωοῦσθαι, σίνουσι, διὰ ταλάαντων λαλῶν, χαμαιαιτῆς, χρηματιστήριον. Other words rarely found elsewhere than in this book (which may for the most part be paralleled from Est, Dn, and Mac) are—ἀνιερῶν 'confiscate,' ἀξίωμα, ἀπινέξιν, δογματίζειν, εἰργίην, ἐνακούειν, ἐπανόρθωσις, ἐπιτιμῶσθαι 'attack,' ἐπιστάσεις (al. τῶστας), εὐλατος, ἐθόδια, ἐφῆς (Es B ταχῆς), θυραῖος (Es B πυλαῖος), καταλοχισμός, καθαινεῖσθαι, μαυιάκη, μεταλλάσσειν τὸν βίον, σκονιμος, ἰδοσθήριον.

The passages which point to a more accurate rendering of the Heb., or a different Heb. original from that tr^d by the LXX, are collected by Trendelenburg (see also Bissell, 65-69). The foll. instances, partly unnoticed before, may be given :-

In the account of the death of Josiah, Es A 1²⁶⁻²⁷=2 Ch 35²¹⁻²³. Es 1²⁵ ἐστὶ γὰρ τοῦ Εὐφράτου ὁ πόλεμος μου ἔστιν; Ch LXX omit; Heb. 'but against the house of my war' (בְּיָמֵי מִלְחָמָתִי לְבַיִתִּי). Es apparently read מִלְחָמָתִי (Euphrates) for מִלְחָמָתִי. The Heb. as it stands is harsh for 'the house with which I have war'; and Es is a decided improvement.

Es 1²⁶ οὐ προέχον βήμασιν Ἱερεμίου προφήτου; Ch LXX οὐκ ἔκουσε τῶν λόγων Νερχάω=Heb. Es perhaps read מְבַרְכֵּי for בְּרַב. Ἰουίμου is a later insertion; the Vulg. has 'non attendens verbum prophetae.'

Es 1²⁷ καὶ κατέβησαν οἱ ἄρχοντες τοῦ βασιλείου; Ch LXX καὶ ἐπέβησαν οἱ τοῦ βασιλ. =Heb. Es read יָרְדוּ 'and they came down' for יָרְדוּ 'and they shot').

In Es A 8³⁰ καὶ μετ' αὐτοῦ ἀπὸ γραφῆς ἄνδρες ἱκανοὶ πενήτηντα, the Heb. is more closely rendered ('and with him were reckoned by genealogy of the males') than in LXX (Es B 8³⁰) καὶ μετ' αὐτοῦ τὸ σὺν γένει αὐτοῦ καὶ πεντ.

In 8³⁶ ὁ Μωσῆς of LXX is rightly given as Αἰγύπτιοι. A writer working on the LXX without the Heb. could hardly infer that Μωσῆς stood for מִצְרַיִם ('the people of Mizraim').

In 8³⁸ ἐρρήξα τὰ ἱμάτια καὶ τὸν ἱρῶν ἐσθῆτα, the last words of the Heb. יָרְדוּ 'and my mantle are rightly given; the LXX twice misconstrues them (93.5), διερρήξα τὰ ἱμάτιά μου καὶ ἐπαλλόμεν.

In 8⁷⁵ καὶ νῦν κατὰ πόσον τι ἤμιν ἐγνώθη ἔλεος παρὰ τοῦ κυρίου, the Heb. phrase עָנָה לְעַבְדֶּיךָ ('for a little moment') is rendered, and the passive construction kept. Es B 9⁸ καὶ νῦν ἐπεικέυσάτο ἡμῖν ὁ θεός, omits the phrase and changes the construction.

8⁹⁴ ἀνεκάμψαμεν παραβῆναι, and Es B 9¹⁴ ἐπιστρέψαμεν διασκεδάσαι, are independent versions of עָנָה לְעַבְדֶּיךָ ('shall we again break?').

8⁹⁰ ὡς ἐκρήθη σοὶ καὶ ὡς οὐκ ἐπιβάρησασιν τοῦ νόμου τοῦ κυρίου, renders the Heb. ('according to the council of my Lord and of those that tremble at the command of our God') where the LXX (Es B 10⁸) departs from it, ὡς ἂν βούλη ἀνάστηθαι καὶ φοβήσιν αὐτοὺς ἐν ἐντολαῖς θεοῦ ἡμῶν.

In 9² Es A points to a neat and certain correction of the Hebrew. The LXX (10⁶) runs, καὶ ἐπαυθήθη ἐν γαζοφυλακίῳ Ἰωανῶν . . . καὶ ἐπαυθήθη ἐκεῖ, where the second ἐπαυθήθη is tautological. Es A has ἐπαυθήθη ἐν τῷ παστοφῆριον Ἰωάν . . . καὶ αἰλιθθεῖ ἐκεῖ. The compiler clearly read עָנָה לְעַבְדֶּיךָ ('and he passed the night there') for עָנָה לְעַבְדֶּיךָ ('and he went there'). The letters י and ך are very liable to confusion; and αἰλιθθεῖ is the constant rendering of the verb יָדַן ('to dwell') in the LXX.

9¹⁰ εἶπον μεγάλη τῇ σαυτῇ ὅτις ὡς ἐρήκας ποιήσομεν is a literal rendering of the Heb. (יָדַן לִי עִבְדֶּיךָ 'and they said with a loud voice'); LXX (10¹²) is again wrong with καὶ εἶπον Μίγα τούτο τὸ ῥῆμα σου ἐφ' ἡμέας ποιήσαι.

These few instances out of many show beyond a doubt that the compiler, or the author of the version he is using, had a knowledge of the Heb. as against the other Gr. version, and that Es A is an

important authority for a critical emendation of the Heb. text.

The most recent supporter of the third view, and of the claims of this book to attention, is Sir H. H. Howorth, in a series of six articles in the *Academy* for 1893 on 'The real character and the importance of the first book of Esdras.' His attempt to establish the historical credibility of the book and its chronological accuracy, as against the canonical Ezra, is beset by numerous difficulties, and cannot be maintained. Thus he regards the Darius who despatched Zerubbabel as Darius II. Nothus (424), who was a century later than Darius Hystaspes (522), and is forced to date the return under Ezra, and that under Nehemiah, more than half a century later than the dates ordinarily assigned to those events; he regards Sanabassar or Sheshbazzar as a distinct person from Zerubbabel; he says that the misplaced section Es A 2¹⁵⁻²⁵ preserves the original order of the Aramaic chronicle from which it is derived; and he regards the story of the three pages as 'equally valuable and worthy of credit with the rest of the book.' It is lost labour to attempt to reconcile this book with history; the compiler has put together his materials regardless of the inconsequences involved. But Sir H. Howorth's views on the relations between the two Gr. books are far more deserving of notice; he has here been partly anticipated by Pohlmann (*op. cit.* 273-275). He argues that 'Es A represents the true LXX text; Es B represents another tr., which in all probability was that of Theodotion'; and he quotes the parallel of the two versions of Daniel. The existing evidence makes it probable that this view is so far correct, that Es A represents the first attempt to present the story of the Return in a Gr. dress, the story of the three pages being perhaps added by a later compiler. Subsequently a complete and a more accurate rendering of the Heb. was required, and this was supplied by what is now called the LXX version of Ch, Ezr, Neh. Whether this took place so late as the time of Theodotion may be questioned.

In favour of the priority of Es A, these points may be noted :-

1. *The Position of the Book and its earliest Title in the MSS* ("Εσδρας α').—The explanation usually given is that the events described in it precede in part the events in the LXX Ezr. It is equally probable that it was assigned the prior position because it was the earlier of the two Gr. versions.

2. *The Contents*.—These point to a time when Ch, Ezr, and Neh formed one continuous work, and the division into sections had not yet been made. Es A passes without a break from one book to another, and does not contain the reduplication whereby the last two verses of Ch are repeated as the first two of Ezra.

3. *The Use of Es A by Josephus*.—There is no certain evidence of his acquaintance with the other Gr. book, or of its existence before his time. This looks as if he were using the only Gr. materials available to him; that is, that in the LXX as known to him this part of the Bible was represented by Es A.

4. During the first five centuries the Christian Fathers quote the book with respect as canonical. It was included in Origen's Hexapla.

5. As shown above, it has in many places preserved a better Heb. text than the LXX Ezra.

THE ORIGINAL SECTION (3¹⁻⁵).—The source of the story of the three pages at the court of Darius is unknown. In what language it was originally written is also doubtful; but Ewald is prob. right in holding that while the main body of the book is a tr. from Heb., 'on the other hand the work from which he took the story about Zerubbabel was originally composed in Gr.' At any rate there are

no clear traces of Hebraisms (Fritzsche adduces 4⁸⁹ τὰ δίκαια ποιεῖ ἀπὸ πάντων τῶν ἀδικῶν = יס עשה נהג), and the paronomasia ἀνεσον καὶ ἀφεσον in 4⁹² points to a Gr. original. The compiler seems to have been acquainted with traditions of Persian history. The account of Darius and Apame the daughter of Bartacus (4⁸⁹, Jos. gives his name as Παβεζάκης, so the Latin versions Bezaces) is perhaps derived from some book of Persian court stories.* The presence of Zerubbabel at the court of Darius is, of course, an anachronism: it was Cyrus who despatched him to Jerusalem. It is noticeable that in 5⁹, acc. to the most natural construction, it is Joachim the son of Zerubbabel who spake wise words before Darius. In 4⁸⁸ the speaker is merely called ὁ νεανίσκος (a name hardly suitable to Ζ.), and at his first introduction in 4¹⁹ the third speaker is identified in a parenthesis only ὁ τρίτος . . . οὗτός ἐστιν Ζοροβαβέλ, which is certainly a later addition. This has led to the conjecture that Joachim was the hero of the story, and that there were two expeditions—one in the time of Cyrus led by Zerubbabel, one under Darius led by Joachim (Fritzsche and Reuss). But no Joachim is mentioned among the sons of Ζ. in 1 Ch 3¹⁹. These inconsistencies certainly show the composite nature of the book. It would appear that an earlier Pers. story was adopted by the Jews of Alexandria and became attached to Zerubbabel; the speakers in the original story were Persian courtiers (3⁴ οἱ σωματοφύλακες). The second of the theses maintained by the third speaker—the superiority of the truth—may also be a Jewish addition to the original, though the eulogy of truth would not be out of place in a Persian story, since the Persians were taught from boyhood ‘to ride, to use the bow, and to speak the truth’ (Hdt. i. 136).

The story is told in what perhaps was thought a more plausible way in Josephus (*Ant.* xi. iii. 2). There Darius, unable to sleep, proposes a reward to that one of his three pages who shall best prove his thesis: to the first he gives the thesis, that ‘wine is the strongest’; to the second, ‘the king is the strongest’; to the third, ‘whether women are the strongest or truth is stronger than they’? The speeches are held on the following day. In Es the king makes no promise of rewards: the three pages suggest the idea to each other, and while he sleeps they each write the subject which he means to maintain, and put it under the king’s pillow for him to find in the morning. The speeches before the Pers. monarch are not unlike the answers of the 72 translators at the court of Ptolemy Philadelphus, as described in the letter of Aristeas. The applause which greets the third speech (4⁴¹), and the feasting for seven days ‘with music and gladness’ (4⁶⁸), may be illustrated from that work. But there is hardly sufficient ground for saying, with Ewald, that ‘the book of Aristeas must have been already known to the author.’ The story in Es is a composition of the same class, and probably of the same time as the Aristeas letter.

It should be noted that in the third speech there is an allusion to Gn 2²⁴ (Es 4²⁰ ἄνθρωπος τὸν ἑαυτοῦ πατέρα ἐγκαταλείπει . . . καὶ πρὸς τὴν ἰδίαν γυναῖκα κολλάται).

OBJECT OF THE BOOK.—The body of the book appears, as has been shown, to be the earliest version of the work of the Chronicler. It was written to render Gr.-speaking Jews acquainted with the favour which through the Divine Providence was once shown to their nation by foreign monarchs. The original section (3–4) is perhaps the nucleus of the whole, round which the rest is grouped. One object of the compiler was to give currency to this story, from whatever source, Persian or Jewish, he had derived it. He may also have had an ulterior object in view. The exaggerated accounts of the munificence of Cyrus and Darius lead us to suppose that he aimed at

* The name Apame is Oriental, though not found till the Macedonian period. No such person occurs among the wives of Darius I. The first of the name was the wife of Seleucus Nikator, Alexander’s general, and daughter of Artabazus (Strabo). Does this last name give the explanation of the name Bartacus or Παβεζάκης?

securing to the Jews ‘the favour of a Ptolemaic or other heathen power’ (Ewald).

TIME AND PLACE OF COMPOSITION.—The extreme limits between which the book must be placed are given on the one hand by the date of the composition of the Heb. books of Ezr and Neh, which is fixed as late as B.C. 300 (Ryle, *Cam. Bible*, Introd. xxvi), on the other by the date of Josephus, A.D. 100. Within these rather wide limits it is difficult to define the time more accurately with any certainty. As Fritzsche remarks, the writer has kept his own personality in the background and nowhere left any traces of his own time (*Einleitung*, p. 9). Still there remain a few indications to be mentioned. The similarity to Aristeas, as we have seen, shows nothing more than that the Zerubbabel story is of the same character and probably the same time as that book (*circa* B.C. 150).

1. But Ewald notes further (*Abhand. über d. Sibyll. Büch.* p. 36) that this story was known and referred to by the writer of the oldest of the Sibylline books. Now, this book (iii. of the Sibylline Oracles) is definitely fixed to the reign of Ptolemy Philometor (B.C. 181–146). In it is an allusion to Persian kings helping forward the rebuilding of the temple in consequence of a dream: iii. 293–4, ἄνδρς γὰρ ὄψεαι Θεὸς ἔννυχον ἄγρον θνείρον, καὶ τότε δὴ ναὸς πάλιν ἔσεται, ὡς πάρος ἦν περ. This, in Ewald’s opinion, is suggested by Es 3–4. But in Es 4^{40–43} there is no mention of a dream, but only a vow, which influenced Darius. Still, as the dream is not alluded to elsewhere, it is not improbable that the Sibyllist had some older form of this story before him, from which our Esdras also borrowed.

2. The book has, further, some parallels with the LXX version of Dn and Est. The opening of Es 3 seems to be imitated from the opening of Est 1^{1–3}: the phrases ἐποίησεν δοχὴν, ἀπὸ τῆς Ἰνδικῆς μέχρη Αἰθιοπίας, and ‘the hundred and seventy satrapies,’ are common to both. Cf. also Es 3⁹ οἱ τρεῖς μεγιστάνες τῆς Περσίδος with Est 1⁴ LXX, Dn 6². (The Heb. of Est as also Ezr 7⁴ name seven Persian councillors.)

The agreements between Es and Dn LXX are remarkable. Of these the most striking is a clause which they have in common in the account of the treasures which Nebuchadnezzar recovered from Jerus. (Es 2⁹ = Dn 1² LXX, καὶ ἀπηρεύσαστο αὐτὰ ἐν τῷ εἰδῶλιῳ αὐτοῦ). In this place, since ἀπερῆδυσθαι is an Esdras word, occurring three times in this connexion in Es and nowhere else in Dn, and since εἰδῶλιον renders the Heb. of Ezr (יִתְחַלְּלֵנוּ) but not of Dn (יִתְחַלְּלֵנוּ נְאֻם הַיְהוָה, Theod. εἰς τὸν οἶκον θησαυροῦ θεοῦ αὐτοῦ), it would seem that the obligation is on the side of the Dn translator.

But, in view of the other parallels between the books, another explanation is more probable, that the translations are the work of one and the same hand. In one place the same Aramaic phrase, ‘And his house shall be made a dunghill,’ is mis-translated or paraphrased in the same way (Es 6²¹ καὶ τὰ ὑπάρχοντα αὐτοῦ εἶναι βασιδικά, Dn 2⁹ καὶ ἀναληφθήσεται ὑμῶν τὰ ὑπάρχοντα εἰς τὸ βασιδικόν). It may be noted that both books are written in an idiomatic Gr. style foreign to most books of the LXX; both are very free translations; both have interpolations of a similar character (the three pages in Es, the three children in Dn); the original Heb. of both books has Aramaic sections interspersed in it. If this theory be true, the parallel between the two Gr. books of Es and the two versions of Dn is very close.*

* The theory has already been suggested by Dr. Gwynn (*Dict. Christ. Biog.*, s.v. Theodotion, p. 977); cf. Dn 2¹¹ ἰσδοξος (Es 9⁴⁵ ἰσδοξος); δογματίζεν (Dn 2¹⁸, Es 3⁹); Dn 3¹, Es 3² οἱ προσηγορευμένοι (Dn 3⁸, Es 6²¹ [A] only); use of ἕμα c. inf. ἕμα τῆ

3. Graetz (*Gesch. der Juden*, 1863, p. 445) points to the use of ὑπατοὶ in 3¹⁴, and says that the Roman consulate is known to the writer. This would indicate a time later than the first interference of the Romans in the East, i.e. later than B.C. 200.

4. On the other hand, the term Κοιλὴ Συρία which so frequently occurs is used in the sense which it bore during the Gr. period, meaning all S. Syria except Phœnicia. Before the coming of the Romans to Palestine (c. B.C. 63, the date of Pompey's taking of Jerus.) this name had acquired a new significance, being restricted to the country E. of the Jordan (G. A. Smith, *Hist. Geog.* p. 538). The way in which this phrase is used appears, therefore, to afford certain proof that the book is at least as old as the first half of the last century before the Christian era.

Whether it goes back to the 2nd cent. B.C. is more uncertain.

5. That such is the case is the opinion of Herzfeld (*Ges. d. Volk. Isr.* 1863, vol. ii. p. 73), who dates it before the Maccabean wars, on the ground that after that date, when the books of Ezr and Neh had become canonical (Ryle, *Cam. Bible, Ezr. and Neh.* lxxv), a translator would not have been bold enough to excerpt and rearrange materials from those books.

6. This view is also supported by Lupton, who has an ingenious theory as to the occasion when the book was written. He regards it as edited at the time (B.C. 170) when Onias, having fled from the persecution in Pal. under Antiochus Epiphanes, petitioned for leave from Ptolemy Philometor to build a temple for the Alexandrian Jews at Heliopolis on the site of a ruined Egyp. temple of Bubastis. At that time 'a work which described the rebuilding of the temple, and the beneficence of foreign kings to the work, and which also introduced the story of Josiah, slain in an invasion of Syria by the Egyptians, would have a special interest.' The account of the building of the Egyp. temple (ὁμοιον τῷ ἐν Ἱεροσολύμοις, μικρότερον δὲ καὶ πενιχρότερον) is given in Jos. *Ant.* XIII. iii. 1; the reader is referred to the interesting remarks of Lupton (*Speaker's Comm.*, Apoc. vol. i. 11-14). This is, of course, no more than conjectural, and it is unsafe to base any argument upon it; if the theory about the relation to the LXX Dn be correct, the date given is rather too early. The limits within which the book may be placed may be taken to be B.C. 170-100. Most editors, however, assign it to the 1st cent. B.C. (De Wette, Ewald, Fritzsche).

As to the place where the compiler lived, the character of the translation seems to show that it was written for Alexandrian Jews rather than for natives of Palestine, for whom the original Hebrew of the Chronicler would suffice. One slight allusion in 4²³ to 'sailing upon the sea and upon the rivers' for the purpose of 'robbing and stealing' is thought to point to Egypt. Certain small peculiarities of the language also indicate Alexandria as the place of writing: οἱ φίλοι τοῦ βασιλέως (8²⁰) takes the place of Es B οἱ σύμβουλοι (οἱ πρώτοι φίλοι were the third in the scale of courtiers at the Alexandrian court): in 2¹⁸ ἀν φαίνηται σοι is inserted. The phrase ἐὼν φαίνηται ('if it seem good') occurs in Aristeas (in Merx' *Archiv.* i. 1870, p. 19), and repeatedly in Egyptian papyri.

Fritzsche, on the other hand, concludes that the writer was a Palestinian from his knowledge of sites in Jerusalem, referring to 5⁴⁶ εἰς τὸ εὐρύχωρον τοῦ πρώτου πυλῶνος τοῦ πρὸς τῇ ἀνατολῇ (=Es B εἰς Ἱερουσαλὴμ). Cf. also 9³⁸ ἐπὶ τὸ εὐρύχωρον τοῦ πρὸς

ἀκούσαι (Dn 3²⁵, Es 8⁶⁸); καρπῶν = 'to burn' (Dn 3³⁸, Es 4⁵²); ἀχρειοῦ (Dn 4¹¹ 6²⁰, Es 1³⁵); μαυιάκης (Dn 5⁷, Es 3⁶ only); Dn 6¹, Es 3¹; use of ὑπαπίσταιν (Sus 5¹², Es 3¹⁷). The parallels are chiefly in the first six chapters of Dn.

ἀνατολὰς ἱεροῦ πυλῶνος (=Neh 8¹ εἰς τὸ πλάτος τὸ ἐμπροσθεν πύλης τοῦ ὕδατος).

MSS AND TEXT.—Es A exists in two out of the three oldest MSS of the LXX, viz. Cod. Vaticanus (B) and Cod. Alexandrinus (A). It is not found in either of the portions of the Sinaitic MS (S) discovered by Tischendorf (Cod. Friderico-Augustanus and Cod. Sinaiticus Petropolitanus); but this is perhaps due only to the fact that MS is incomplete, and, except for some few fragments of the Pent. and a portion of 1 Ch, contains in its present form no part of the OT earlier than Es B 9, after which it is fairly complete. There has been a curious error in connexion with the Esdras books; 13 chapters of 1 Ch having been apparently inserted in the middle of Es B. Cod. Sin.-Pet. contains one leaf with 1 Ch 9²⁷-11²²; Cod. F.-A. has four more leaves headed Es B, but in reality containing 1 Ch 11²²-19¹⁷; but in the fourth column of the verso of the fourth leaf we suddenly pass in the middle of a line with no break from Ch (καὶ ἐπολέμησεν αὐτόν) to Es B 9⁸ (ἄς ὁ θεὸς ἡμῶν καὶ ἐκλινεν ἐφ' ἡμᾶς εὐεος). A note at the bottom of that leaf in a later hand calls attention to the seven superfluous leaves that are 'not of Esdras' (τὸ τέλος τῶν ἑπτὰ φύλλων τῶ περισσεῶν ἢ μὴ ὄντων τοῦ ἑσδρα). Of these seven leaves we now possess five; and reckoning back we find that the divergence must have begun about 1 Ch 6⁵⁰ (list of the sons of Aaron). This error, whereby fragments of 1 Ch have been interpolated into the middle of Es B, is probably due to 'a mistake in binding in the copy from which the MS was transcribed' (Westcott, *Bible in the Church*, p. 307, Append. B); a less probable explanation is given by Lupton (*Intro.* p. 1). The presence of the title Es B is not sufficient by itself to prove, as Lupton supposes, that Es A ever stood in Cod. S; since the same MS contains only the first and fourth books of Maccabees with the headings μακκ. α', μακκ. δ', and the two intervening books certainly never found a place in the MS.

An interesting problem is presented by the relation of the texts of Codd. A and B in this book. The text of A is always the smoother and more readable; and wherever the reading of B suggests a suspicion of corruption, A almost invariably gives the requisite correction. Several of these corrections may be attributed to an 'Alexandrian' revision of the text, removing grammatical solecisms and harsh phrases; such are 1³⁰ ἰθρῶνον (B ἰθρῶσαν), 1³² ἀπκατίσθησιν αὐτόν . . . τὸ μὴ βλαβεῖον (B οἱ καὶ μὴ), 1³¹ τὰ πνεύματα (B τὰς κινδυνούς), 2²⁹ ὄν· ριπή . . . ἔτι ὁ λόγος αὐτοῦ σωτήριος (B ἔτι ὁ πρῶτος . . . ἔτι ὁ δὲ αὐτοῦ σωτ.), 3³³ ἰβλῆσιν ἕτερος πρὸς τὸν ἕτερον (B ἔτι τῶν ἕτερον), 8¹² ἀκαλοῦσθε ἕξι μὲν ἐν τῷ νόμῳ (B ἀκαλ. ἕξι νόμῳ). But in other places it is hard to suppose that A does not preserve the original text. Thus 1³² (2⁴) καὶ ἰλῆψαν αὐτὸν ἐν αἰσθήσει ('they grieved him to the heart,' a phrase illustrated by Jth 1617; B καὶ ἐλῆψαν αὐτὸν ἰσθί), 1³⁴ Joachim at his accession ἦν ἰσθῶν δίκαι ἑκά (cf. 2 Ch 36⁶, B ἦν ἰσθῶν ἑκά), 4⁴⁵ τὸν καὶ ἐν ἰνεσίμασιν οἱ Ἰδουμαῖοι (B Ἰουδαῖοι), 5⁵³ κατὰ τὸ πρόσταγμα (B καὶ τὸ πρῶτον), 8⁴¹ ἔτι τοῦ λεγόμενον Θιρῶν σσταμῶν (B οἱ οἱ Θιρῶν), 8⁶⁸ καὶ κατίτεια τῶν τριχόμαστος (B κατίτεια τῶν τριχ.), Fritzsche (*Eintleitung*, 1851, § 8) remarks that B is on the whole a very pure and A an emended text; but it is noticeable that in his subsequent critical edition (*Libri Apocryphi Vet. Test.* 1871) in the passages given above and in numerous others he adopts the reading of A and abandons 'the pure text of B.' Still more noticeable is it that the earliest author to quote Es A supports the A text against the B. It is not always possible to reconstruct the text which Josephus used owing to his habit of paraphrasing the authority which lay before him; but out of 13 passages in this book where a comparison is possible, in 10 he agrees with A against B, while in three only does he side with B against A. Jos. *Ant.* xi. iii. 8 προετίθετο τοῖς Ἰδουμαῖοις . . . ἀφίνοι τὰς κόμας (Es 4⁵⁰ καὶ ἴνα οἱ Ἰδουμαῖοι ἀφίνοι τὰς κόμας, B οἱ Χαλδαῖοι), xi. iv. 1 τοῦ ἰδόμενου μαρῶς (Es 5⁵² ἰδόμεν, B πρῶτον), xi. iv. 6 καὶ ἰσθῶν ἑκαπατόνοιο τῇ βάρῃ τῇ ἐν Μηδία βιβλίον, ἐν ᾧ κ.τ.λ. (Es 6²² κ. τ.λ. ἐν ἑκαπ. τῇ βάρῃ τῇ ἐν Μηδία βιβλίον, ἐν ᾧ κ.τ.λ. ἐν ᾧ), B τόσας ἐν ᾧ. A preserves the indefinite article; cf. Es B 6² καφλίς μία; B is a corruption of the Greek of A); xi. v. 1 ἀνετίθηκας δάρα τῷ Ἰερουσαλίμῳ ἕως (Es 8¹² ἀπενετίθη δάρα τῷ κρηῖο τοῦ ἰσθ., B τῷ κρηῖο); ἰδ. κακαθήσονται δ' ἦτοι βανῶν ἢ ζημῆα χρηματικῇ (Es 8²⁴ καλαθήσονται ἰάν τε καὶ βανῶν ἰάν τε καὶ τιμοῖα, ἢ ἀργυρικῇ ζημῆα ἢ ἀπαγογῇ; B μὴ ἀργυρικῇ ζημῆα. A is undoubtedly best); xi. v. 2 συναγαγὼν εἰς τὸ πέραν τοῦ Εὐφράτου (did Jos. read ἐπὶ τὸ λεγόμενον πέραν ποταμοῦ ἐν Es 8¹¹? A Θίρων ποταμῶν, B ποταμῶν); ἰδ. ταύρους δάδικα ὑπὲρ κοίτης τοῦ λαοῦ

καταρτίας, κρίσις ἐναντιότητα, κ. τ. λ. with A in Es 863 (B omits a line through confusion, perhaps, of ΚΤΡΙΩ and ΚΡΙΟΤΣ); xi. v. 3 διέφρησε τὴν ἐσθήτα (Es 868 διέφρηξα, B ἐφρήξα); xi. v. 4 ἰωάννου τοῦ Ἐλιασίβου (Es 91 ἰωάννου τοῦ Ἐλιασίβου, B ἰωάννου τοῦ Νασιτίβου).

These instances form a strong argument for the early existence if not the originality of the A text. The chief passage where Jos. appears to favour B is Es 533 (B καὶ χάρω τοῖς Σιδωνίοις καὶ Τυρίοις εἰς τὸ παράγειν; A κάρα= 'cars'; Jos. xi. iv. 1 τοῖς τε Σιδωνίοις ἢ δὲ καὶ καύφρον ἦν . . . κατάρουσι).

On the MSS generally see Fritzsche, *Einleitung*, § 8.

Of VSS, Sabatier prints two Lat. versions, one of which he calls the Vulg., and a 'versio altera' ('ex MS Colbertino annorum circiter 800'). In reality they appear to be two distinct VSS of the O.L. Jerome left the O.L. untouched, and the Lat. now given in the Appendix to the Vulg. is not his work. A third Lat. version of Es A 3-4 (abbreviated) and of a few verses elsewhere in the book is given in Lagarde (*Septuaginta Studien*, ii. 1892) from a MS in the cathedral of Lucca written about 570. The book did not exist in the Peshiṭta Syriac, but is found in the Syro-Hexaplar of Paul of Tella (A.D. 616); the Syriac is given in Walton's Polyglot, 1657. There is a free rendering of the book in the Armenian version.

ESDRAS, SECOND BOOK OF.—TITLE.—The title which this book bears in the English Apocrypha is derived from the opening words of ch. i., 'the second book of the prophet Esdras'; but it is more commonly known by the name which is given it in most Latin MSS, 'The fourth book of Esdras.' The variation in the titles of the books of Esdras is due to two causes—(1) The adoption of the Latin name Esdras in the Vulg. for the canonical *Ezr* and *Neh*; (2) the composite nature of this book, the first two and the last two chapters being later additions to the orig. work, and reckoned by the MSS as separate books. The most frequent arrangement in the MSS is 1 Es = *Ezr-Neh*; 2 Es = 2 Es 1. 2; 3 Es = 1 Es; 4 Es = 2 Es 3-14; 5 Es = 2 Es 15. 16. The central portion of the book bears every number from one to four. The original Greek had probably no number attached to it. Two suggestions have been made for the original title—(1) Ἐσδρας ὁ προφήτης, adopted by Hilgenfeld in his restoration of the Greek, and based on a quotation of Clem. Alex. from Ἐσδρας ὁ προφήτης, and of Ambrose from 'propheta Ezra' (*Mess. Jud.* 18). The title would then be parallel to δ ἱερεὺς attached to 1 Es in Cod. A. (2) Ἀποκάλυψις Ἐσδρα, suggested by Dr. Westcott, and found in a catalogue of the 60 books, canonical and apocryphal, made in Asia (Westcott, *Canon*, 559). The title is far the most suitable to the contents of the book, but has already become appropriated to a later and inferior Greek Apocalypse published by Tischendorf (*Apocal. Apocryphae*, 1866).

ORIGINAL LANGUAGE AND VERSIONS.—The original language of 2 Es was undoubtedly Greek; two quotations from the Greek exist, Clem. Alex. *Strom.* iii. 16. 100 (= 2 Es 5³⁵), and *Apost. Constitut.* viii. 7 (= 2 Es 8²³). Otherwise we possess the book only in versions. The Latin version abounds in Grecisms, such as the use of the comparative with the genit. ('horum maiora,' 'omnium

maior,' etc.), the genit. abs. (10⁹), the prepositions *ad* and *pro* with the inf. (7¹⁸⁵ 13²⁸), *de* and *ex* followed by the genit., the double negative ('nihil nemini,' 'nunquam nemo'), redundant prepositions after verbs ('timere a,' 15³; 'multiplicare super,' 9¹⁶). The theory of a Heb. original, of which the Greek was a tr^a, has now been given up; one Hebraism, which, however, had become naturalized in Greek, is of constant occurrence, namely, the use of the participle with a finite tense of the same verb (*e.g.* *excedens excessit*, 4²; *proficiscens profectus sum*, 4¹³).

The popularity which this book has enjoyed is shown by the number of versions that have been made of it. For many years the text of the *Latin* depended on a few MSS, Codex Sangermanensis (S, A.D. 822), Cod. Turicensis (T, 13th cent.), Cod. Dresdensis (D, 15th cent.), which presented a text from which it was clear that a considerable section was missing between vv. 35 and 36 of the 7th chapter. The other versions contained 70 additional verses in this place. In 1865 Prof. Gildemeister discovered that this 'missing fragment' had once been contained in Cod. S, from which a leaf had been purposely cut out in early times; and drew the certain and important conclusion that all MSS of 4 Es which do not contain the passages were ultimately derived from Cod. S. The discovery of this missing fragment was made by R. L. Bensly, who in 1874 found a MS of the 9th cent. in the *Bibliothèque Municipale* of Amiens containing the entire Latin text; he thus had the unique distinction of adding a chapter to the Apocrypha, for hitherto the verses in the Oriental VSS had not been universally considered genuine. An account of the MS and its discovery, with a full commentary on the new passage, was published by him in the following year (*The Missing Fragment of the Fourth Book of Ezra*, Camb. 1875). It subsequently appeared that he had been anticipated in the discovery, for a transcript of the lost passage, made in 1826 from a Spanish MS, was found among the papers of Prof. Palmer: this was not published till 1877 (*Journ. of Philology*, vol. vii. 264). The excision of 736-105 was probably made for dogmatic reasons. The verses contain a description of the intermediate state of souls, and an emphatic denial of the efficacy of intercessions for the dead (v. 105), a passage which called forth a severe reproof from Jerome ('Tu . . . proponis mihi librum apocryphum, qui sub nomine Esdræ a te et similibus tuis legitur: ubi scriptum est, quod post mortem nullus pro aliis audeat deprecari: quem ego librum nunquam legi,' *Cont. Vigilant.* c. 7), and this estimate not improbably accounts for the disappearance of the section from Cod. S. The number of known MSS which give a complete text of 2 Es has now been increased, through the discoveries of M. Berger, to five. A complete text of the book, based on four of these MSS and Cod. S, has at length been edited from Bensly's papers, with an introd. by Dr. James (*Texts and Studies*, iii. 2, Camb. 1895); while the missing fragment has been restored to its place in the English Bible in the Revision of the Apocrypha. The Latin MSS fall into two groups: (1) those which preserve a French text. S (Sangermanensis) once in the Abbey of S. Germain des Prés, now in the Bibl. Nat. Paris, 11504-5, Fonds Latin, dated A.D. 822, the oldest extant MS, and the parent of numerous later MSS, and A (Ambianensis), Amiens, *Bibl. Comm.* 10, cent. ix., containing a text very similar to but independent of S, and agreeing with the quotations of Gildas the Briton in his Epistle (6th cent.); (2) a Spanish text, perhaps traceable to Priscillian (*Texts and Studies*, xxxvi.), represented by three MSS. C (Complutensis), now at Madrid, cent. ix., from which Prof. Palmer

copied the missing fragment in 1826. M (Mazarinæus), Paris, *Bibl. Mazarine*, 3, 4, cent. ix.-x., discovered by M. Berger. V (Abulensis), Madrid, *Bibl. Nac. E. R.* 8, cent. xiii., a copy of C, discovered by M. Berger, and a fourth, not yet fully collated, but probably belonging to this group. L (Legionensis), at Leon, of the year 1162. For one section of the book, the *Confessio Esdræ* (8²⁰⁻³⁰), which was often copied in collections of Cantica, an additional group of MSS exists. The two groups differ most widely from each other in the interpolated chapters (1. 2, 15. 16). An examination of their relative values in these chs. has been made by Dr. James (*T. and S.* xliv.-lxxviii.), from which he concludes that in 1. 2. the Spanish form of text is more accurate than the French, which has corrected the text to agree with the canonical Scriptures, whereas in 15. 16 the Spanish is on the whole an emended text, and in 15⁶²-16³² A, which has the support of Gildas, is to be preferred to S C M.

The other versions agree in omitting the interpolated chapters at the beg. and end (1. 2, 15. 16). Of these the best is the *Syriac*, which exists only in a celebrated MS of the Peshitta in the Ambrosian Library, Milan, B. 21 Inf. The *Syriac* was edited by Ceriani in *Monumenta Sacra et Profana*, vol. v. fasc. 1 (1868), and tr^d into Latin in vol. i. fasc. 2 of the same work (1866). There are two independent *Arabic* versions: Ar.¹ in an Oxford MS (Bodl. 251, A.D. 1354), of which an English trⁿ was made by W. Whiston for his *Primitive Christianity Reviv'd*, 1711, and the Arabic text was edited by Ewald in 1863 (*Abhandl. der Königl. Gesellsch. d. Wissensch. zu Göttingen*); and Ar.² preserved in toto in a Vatican MS Arab. 462, and in part in Bodl. 260.

The *Ethiopic* version was first published in 1820 by Dr. Richard Laurence from a Bodleian MS (*Æth.* 7). Dillmann collected readings from other MSS, which are given at the end of Ewald's ed. of the Arabic. The Syr. Ar. Eth. versions were probably all made directly from the Greek; the *Armenian*, however, given in Zohrab's ed. of the Armenian Bible (1805, Venice) was perhaps from the *Syriac*. A reconstruction of the Greek has been made by Hilgenfeld in his *Messias Judæorum*.

CONTENTS.—The original Apocalypse (3-14) consists of a series of revelations or visions given to Ezra by an angel.

1st Vision, 31-520. Ezra, in captivity at Babylon in the thirtieth year after the destruction of Jerus. [the date is nearly a century too early], recounts God's favours to Isr. in their earlier history, and while admitting their 'evil heart,' yet complains of their subjection to Babylon, which is more wicked than they (ch. 3). The angel Uriel replies that E. should not enquire into things beyond his understanding. E. pleads with the angel as Abraham did at Mamre ('If I have found favour in thy sight,' 4⁴⁴; cf. Gn 18), and asks, further, whether the time that is past exceeds the time to come; and is told that it is so. The signs of the end are given to him, 51-13; and he is ordered to fast for seven days.

2nd Vision, 521-634. E. renews his complaints, and is told why God 'doeth not all at once' so as to hasten the judgment; and of the degeneracy of the world, which cannot produce such children as of old (542²⁷). The next world is to follow this as closely as Jacob followed Esau from the womb (610). More signs of the end follow, and E. is again bidden to fast for seven days.

3rd Vision, 635-925. E. recounts the works of creation, including the creatures Behemoth and Leviathan, who were reserved to be meat for the saints (649-52) [this idea is met with also in Enoch 607, Apoc. Bar 294]; and asks, why, if the world was made for us, we do not possess our inheritance. He is told that the narrow way must be traversed before the large room of the next age be attained (71-16). Then follows a picture of the Messianic age, the appearance of 'My Son' [or 'My Son Jesus': the name is omitted in the Oriental versions] with His attendants, their reign of 400 years, succeeded by the death of 'My Son Christ' and all living, and the return of the world for seven days into 'the old silence,' and then the resurrection (78-35). The 'missing fragment' describes the pit of torment and the paradise of delight over-against it; ineffectual intercession of E. for the wicked, leading him to exclaim that the

beasts are more fortunate than man: the seven ways of punishment for the wicked, and the 'seven orders' of blessings for the righteous: the seven days' respite after death, before the souls are gathered to their habitations: and the severe declaration of the inefficacy of intercession for the departed (738-105). E. says it were better if Adam had never been born ('O tu quid fecisti Adam,' cf. Apoc. Bar 48), but acknowledges God's mercy. Ch. 8 contains the same theme, 'Many are created, but few shall be saved,' and fresh intercession in the *Confessio Esdræ*. In answer to the question, When shall the end be? fresh signs are given.

4th Vision, 926-1060. E. eats of the herbs in the field of Ardat,* and sees a vision of a woman mourning for her son, who died on his marriage day. The woman, he is told, is Sion lamenting the fall of her city, and her thirty years' sterility represents the 3000 years before Solomon built the city. The city in building, which appears after the woman vanishes, is the heavenly Jerusalem which is to replace the earthly.

5th Vision, 111-1239. Of the Eagle (Rome) with 12 wings and 8 little wings (*contrariae pennæ*) and 3 heads, which bear rule in turn, until sentence is pronounced on the eagle by a lion (the Messiah), and it is burnt up. A partial interpretation is given of the vision.

6th Vision, 131-58. A man (the Messiah) arises from the sea, and graves for himself a mountain (Sion): his enemies collect to fight against him, and are burnt up; and he gathers to him 'a peaceable multitude,' i.e. the ten lost tribes, who are to return from Arzareth (i.e. 'another land' ארץ ארקה, cf. Dt 29²⁵).

7th Vision, 141-47. E. is told he is to be taken from men; and to console the people for his departure, he in forty days writes ninety-four books (the twenty-four canonical books of the OT that were lost, and seventy books of mysteries for the wise among the people).

The interpolation at the beginning (1. 2), written in an anti-Jewish spirit, contains a reproof of the Isr. for their desertion of God, and threatens the transference of God's favours from them to the Gentiles. The concluding chs. (15. 16) are not of an apocalyptic character, but a denunciation of woe on the nations of the world (Egypt, Asia, Babylon) in the style of the OT prophets. Both sections have numerous reminiscences of the NT (e.g. 1³⁰. 33 = Mt 23³⁷. 38, 1³² = Lk 11⁴⁹. 50, 2¹¹ 'tabernacula æterna' = Lk 16⁹, 2¹⁸ = Mt 7⁷ and 25³⁴, 2³⁸. 42 = Rev 7⁴. 9, 16⁴² = 1 Co 7²⁵).

CHARACTER AND DATE.—The book is written in a tone of deep despondency, and offers a marked contrast in this respect to the Book of Enoch. The prospect of ultimate triumph and blessedness is almost lost in dismal forebodings about the immediate future and the destiny of the world. The time and place in which the scene is laid demanded that this should be so; but the meaning of this despairing tone is greatly enhanced if we suppose that recent events are referred to, that Jerusalem was in ruins at the time when it was written, and that the whole work portrays the hopeless outlook of the Jew after the terrible events of the year A.D. 70. Hence the gloomy picture of the few that shall be saved (8³), the dying of the Messiah and all that draw breath (7²⁹), the discussion of the problem of the origin of evil ('quare cor malignum,' 4⁴), the oft-repeated cry that it were better not to be born, or to be without consciousness of our doom like the beasts (7⁶²⁻⁶⁴ 4¹² 5³⁵ 6⁵⁹), the consolation to be found in the permanence of the law (9³⁷) though the city is gone.

The date of the book has been the subject of much controversy. It is obviously not a genuine work of the time of Ezra, as is shown, e.g., by the error in Ezra's date (3¹) and the allusion to the Book of Daniel (12¹¹. 12). An ultimate limit is given by the quotation of Clem. Alex. from it referred to above (A.D. 200). Internal notices must fix it more nearly. Hilgenfeld adduces for the earlier date (B.C. 30) 6⁹ 'Finis huius sæculi Esau,' which he thinks proves the time of writing to be the reign of the Idumæan Herod. But Edom is found in Rabbinical literature equally as a de-

* This name (in the Arm. Ardat) is explained by Rendel Harris as a corruption of (Kiriath) Arba, the old name of Hebron, which is the scene of the visions of Baruch in the sister Apocalypse (Rest of the Words of Baruch, 35). The oak (14¹) is the terebinth of Mamre. Hilg. takes it to mean Arpad (Αρπαρ, 2 K 18³⁴).

signation of Rome; and the Herodian dynasty, if that is referred to, lasted on through the first century of our era. He also draws an argument from the description of the twelve ages of the world, of which ten and a half are past (14¹¹), taken in connexion with 10⁴⁶ (Solomon built the temple in the year of the world 3000), from which he calculates about B.C. 30 as the date (*Mess. Jud.* 104); but the description of the world-ages is too uncertain (the Syr. omits the verses) to base any inference upon it. Another argument for the early date is that a Jew, writing after the death of Christ, would not have introduced a prophecy of the death of the Messiah (7²⁵) which would have been employed against him by Christians. No inference can be drawn from the signs of the end (5¹⁷, 6^{18ff.}, 9¹) as applicable rather to the portents that preceded the battle of Actium than to those in the time of Vespasian. On the other hand, the allusion to the pulling down of the walls of Jerus. (11⁴² 'humiliasti muros eorum qui te non nocuerunt') was true of Titus, but not of the capture of the city by Pompey in B.C. 63.

But the question of the date really depends upon the interpretation given to the Eagle Vision. The details given about the reign of the several wings show that historic facts are here alluded to; the interpretation which follows the vision is perhaps purposely obscure, and does not help much as to the solution of it. The vision describes the reign of 12 'feathered wings,' 8 subordinate wings, and 3 heads—in all, of 23 kings; the attempt to take the wings in pairs, each pair representing a single king, their number being so reduced to 10 (Volkmar), is opposed to the interpretation given to Esdras (12¹⁴ 'regnabunt xii reges, unus post unum,' 12²⁰ 'exurgunt octo reges'). The following points are to be borne in mind in the interpretation (Schürer, *HJP* III. ii. 100). (1) The author writes during the reign of the third head, in which the Messiah is to appear; the subsequent reign of the two last subordinate wings is not history, but prophecy. (2) The second wing reigns more than twice as long as any of the rest (11¹⁷). (3) Several wings do not get so far as to reign, and represent pretenders only. (4) The wings and heads all belong to one and the same kingdom. (5) The first head dies a natural death (12²⁸); the second is murdered by the third, who also is to die by the sword (11³⁵ 12²⁸). Three main explanations are proposed—(i.) The wings represent Rome under the kings and the republic, and the 3 heads are Sulla, Pompey, and Cæsar; the date of the work is shortly after Cæsar's death (Laurence, Van der Vlis, Lücke). This view has no probability. Early Roman history would have no interest to a Jew, and there is great difficulty in adapting the 8 minor wings to the period before Sulla. (ii.) Hilgenfeld's view, that the wings represent the Greek empire reckoned from Alexander, either, as he first held, the line of the Ptolemies (*Jüd. Apokalyptik*, 217 ff.), or, according to his later theory, that of the Seleucidæ (*Mess. Jud.* liv ff.): in either case the three heads are Cæsar, Antony, and Octavian, and the book was written directly after Antony's death in B.C. 30, thirty years after the capture of Jerus. by Pompey (cf. 2 Es 3¹ 'in the thirtieth year'). It is true that in 2 Es 11³⁹ the eagle is compared to the fourth beast of Daniel (7⁷=the Greek empire); but the fourth kingdom was often referred to the Romans. The chief objections to this view are—(1) The heads and the wings must all refer to a single kingdom, not to a combination of Roman and Greek rulers; (2) the rule of the second in the dynasty, whether Ptolemy I. Lagi or Seleucus I. Nikator, was not more than twice the length of any succeeding reign; (3) Cæsar was assassinated,

and did not die in his bed, as the first head is said to have done.

(iii.) It is now the generally accredited view, and it has most arguments in its favour, that the book should be dated in the reign of Domitian (A.D. 81-96). So Gfrörer, Dillmann, Volkmar, Ewald, Schürer, and others. The eagle represents Imperial Rome, the line of the emperors beginning with J. Cæsar. The second wing is certainly to be identified with Augustus, who, reckoning from his first consulate, held rule for 56 years (B.C. 43-A.D. 14), i.e. more than twice the time of any of his successors. The three heads with equal probability are referred to the Flavian emperors: Vespasian died on his bed in torment (*Suet. Vesp.* 24; 2 Es 12²⁶); Titus was commonly believed to have been murdered by Domitian. The difficulty lies in supplying the twenty rulers to precede Vespasian. The following proposals are made—(1) Gfrörer takes the twelve greater wings to be the first nine emperors, Cæsar to Vitellius, with three usurpers, Vindex, Nymphidius, and Piso Licinianus: the eight lesser wings are petty kings and leaders in Pal. (Herod the Great, Agrippa I., Eleazar, John of Gischala, Simon Bar Giora, John the Idumæan, Agrippa II., and Berenice: the last two attached themselves to Rome in the war). (2) Schürer agrees as to the twelve, but regards six of the lesser wings (the last two being matter of prophecy) as Roman generals who laid claim to the empire in the years of disorder, A.D. 68-70. (3) Wieseler takes the eight subordinate wings to mean the Herodian dynasty, vassals of Rome (Antipater, Herod I. and his three sons, Archelaus, Antipas, Philip, Agrippa I. and II., and Berenice). (4) Ewald, who is followed by Drummond (*Jewish Messiah*, 107), takes the twelve wings to be the twelve emperors up to Domitian: the eight little wings are the eight emperors among these who reigned less than ten years (Domitian included, for whom a short reign was anticipated), and the three heads are the Flavian princes, reckoned a third time under a different aspect. The double and triple repetition of the same names is unsatisfactory; Schürer's view (2) appears on the whole the most free from objection.

The simpler theory, on the other hand, of Gutschmid and Le Hir (*Études Bibliques*, i. 184 ff.), that twenty-three actual emperors are intended, the three heads being Sept. Severus, Caracalla, and Geta, is shown to be wrong by the fact that the book was quoted by Clem. Alex. at an earlier date than these emperors, and can be maintained only by supposing an interpolation, of which there is no sign in the Eagle Vision.

In considering the date, reference should be made to a companion volume to 2 Esdras, which curiously reproduces the language and visions of that book, namely, the Apocalypse of Baruch, first pub. in 1866 by Ceriani from a Syr. MS at Milan (*Mon. sacra et prof.*, tom. i. fasc. ii., and tom. v. fasc. ii.; also in Fritzsche, *Libri Apocr. V.T.* 654). It also is a product of the Jewish literature called forth by the events of A.D. 70, but written before the final destruction of Jerus. in 133, which is not foreseen (Apoc. Bar 32; Jerus. is to be rebuilt, and then again destroyed [A.D. 70] for a time, and then rebuilt for ever). The similarities in tone and language with 2 Es are so striking that Ewald ascribed it to the same author. The general belief now held is that Baruch is the later, and has used Es, because, e.g., Bar corrects the crude notions of Es about original sin (cf. Es 7¹¹⁸ 'O tu quid fecisti Adam? si enim tu peccasti non est factum solius tuus casus sed et nostrum,' with Bar 54, 'Non est ergo Adam causa nisi animæ suæ tantum; nos vero unusquisque fuit animæ suæ Adam'); and whereas Ezra complains that Jerus. should at least

have been punished by the hands of God (5³⁰), Bar accordingly represents it as destroyed by four angels before the entry of the Chaldean army (6-8). Some of the parallels are the division of each book into seven scenes, separated in most cases by intervals of seven days of fasting: the division of time into twelve parts (Bar 27=Es 14¹¹): the legend of Behemoth and Leviathan (Bar 29=Es 6³⁰): the prayer of Baruch (48, cf. the Confessio Esdræ 8²⁰): the importance of Adam's transgression, prefaced in each by 'O quid fecisti Adam?' (Bar 48=Es 7¹⁸): the vision of a cloud ascending from the sea (Bar 53, cf. Es 13): the permanence of the law though the teachers depart (Bar 77, cf. Es 9³⁷): the interest in the lost tribes, to whom Baruch sends a letter of consolation (78-86, cf. Es 13⁴⁰), besides frequent minute resemblances of language.

The writing is a characteristically Jewish work in its apocalyptic form, its knowledge of Jewish traditions (Behemoth, etc.), its interest in the ten tribes, and its deep concern in the fate of Jerusalem. There is no ground for supposing that the author was a Jewish Christian: there is a marked contrast between the Christian interpolations (1-2, 15-16, and the insertion of the name Jesus in 7²³) and the remainder of the book. The place of writing is given as Rome (Ewald) or Alexandria (Hilgenfeld, lxii, and most edd.), from which the added chapters certainly emanate; this would account for the earliest quotation being found in Clem. Alex. On the other hand, the fall of Jerus. would be more impressive to a Palestinian Jew than to an Alexandrian; and the geography (if Ardat is rightly explained by Rendel Harris) points the same way.

The date of the concluding chs. (15. 16) is placed about A.D. 268 by most critics. 15¹⁰⁻¹² refers to the troubles of Alexandria under Gallienus (260-268), when two-thirds of the population were destroyed by a plague following upon a famine (Eus. *HE* vii. 21. 22). 15²⁸⁻³³ refers to the conquests of the Sassanidæ ('Carmonii insanientes'), esp. Sapor I. (240-273), who overran Syria but was repulsed by Odenathus and Zenobia ('dracones Arabum'), the founders of Palmyra; they, in turn, were defeated by Aurelian. 33 describes the murder of Odenathus at Emesa (266) by his cousin Mæonius. 34 ff. are referred to the invasion of Asia Minor by Goths and Scythians from the N. of the Euxine: Gallienus marched against them, but was recalled by the revolt of Aureolus (38 'portio alia ab occidente'). 46 'Asia consors in specie Babylonis' alludes to the association of Odenathus in the empire, A.D. 264 (Hilgenfeld, *Mess. Jud.* 208).

The chapters were written apparently as an appendix to 3-14, and were never current in a separate form.

Chs. 1. 2 are not fixed so definitely, but are probably earlier than the close. They are a compilation from various sources, and perhaps a fragment of a larger work: they show some relation to an Apocalypse of Zephaniah (*T. and S.* lxxix).

RECEPTION.—The early quotations from the book are collected by Dr. James (*T. and S.* xxvii-xliii). The Ep. of Barnabas 12¹ (*ἔσαν ξόλον κλιθῆ καὶ ἀναστῆ καὶ ἔσαν ἐκ ξύλων αἷμα σράξῃ*) is thought to refer to 2 Es 5⁵, and the Rest of the Words of Baruch (A.D. 136), ch. 9, has similar words; the last scene of that book, where a stone takes the form of Jeremiah and speaks to the people, may be an amplification of 'lapis dabit vocem suam' of 2 Es. But the first express quotation is Clem. Alex. *Strom.* iii. 16. 100, who regards it as the work of 'the prophet' Ezra. It is made use of in a Hippolytan fragment *περὶ τοῦ παντός*, and quoted in the Greek in the *Apost. Constit.* viii. 7. The

supposed references in Tert. (*de præscr. hæret.* 3), Cyprian, and Commodian (3rd cent., *Carm. Apol.* 943, on the lost tribes) are doubtful. But it is quoted very frequently by Ambrose (*de bono Mortis*, 10-12, and elsewhere), who regards it as prophetic: in his time chs. 15. 16 were already current in the Latin version, and probably attached to 3-14. In Spain it was known to Priscillian and Vigilantius; and in Britain to Gildas, who quotes 15. 16 (Bensly, 36-40). The legend of the restoration of the books of Scripture (2 Es 14) is widespread, and may be derived from tradition apart from 2 Es (Iren. iii. 21. 2; Tert. *de cult. fem.* i. 3; Clem. Alex. *Strom.* i. 22. 149). Jerome is alone unfavourable to it (*adv. Vigilantium*, 6, *Præf. in vers. libr. Ezræ*, quoted in last art.). It was perhaps owing to his estimate that the book was excluded from the Canon by the Council of Trent: it now with 1 Es forms an appendix to the Vulg. after the NT. The liturgical use of the book shows its popularity: the words of 2^{34, 35} are employed in the 'Missa pro defunctis' of the Breviary ad Usam Sarum, and the word Requiem is derived from this passage; and 2^{36, 37} were formerly used by the Eng. Church as an Introit for Whit Tuesday. Otherwise no use is made of it in the services of the Church.

LITERATURE.—A full list of the wide lit. on the subject is given in Schürer, *HJP* ii. iii. 93-114. The best critical edd. of the Lat. text are in the Camb. *Texts and Studies*, vol. iii. 2, ed. Bensly and James, 1895; and Bensly, *The Missing Fragment of the Fourth Book of Ezra*, 1875. The versions are collected in Hilgenfeld's *Messias Judaorum* (Lips. 1869). Eng. commentaries and introductions are Lupton in the *Speaker's Comm. on the Apoc.*; Bissell (in Lange's *OT Comm.*); Churton's *Uncon. and Apocr. Scriptures*; and Drummond's *Jewish Messiah*, 1877. H. ST. J. THACKERAY.

ESDRIS (Ἐσδρίς).—Mentioned only 2 Mac 12³⁶. The text is probably corrupt. AV has *Gorgias*, and this is likely enough to be correct.

ESEK (Ἐσῆκ), 'contention,' Gn 26²⁰.—A well dug by Isaac, in the region near Rehoboth and Gerar. The site is unknown.

ESEREBIAS (Ἐσερῆβιας, AV *Esebrias*), 1 Es 8⁵⁴. See **SHEREBIAH**.

ESHAN (Ἐσῆν), Jos 15⁵².—A town of Judah in the Hebron mountains, noticed with Arab and Dumah. The site is doubtful.

ESHBAAI.—See **ISHBOSHETH**.

ESHBAN (Ἐσῆβαν).—An Edomite chief (Gn 36²⁶, 1 Ch 1⁴¹). See **GENEALOGY**.

ESHCOL (Ἐσῆκολ).—The brother of Mamre and Aner, the Amorite confederates of Abraham, who assisted the patriarch in his pursuit and defeat of Chedorlaomer's forces (Gn 14^{18, 24}). He lived in the neighbourhood of Hebron (Gn 13¹⁸); and possibly gave his name to the valley of Eshcol, that lay a little to the N. of Hebron (Nu 13²³).

It is noteworthy that Josephus, in recording the event described in Gn 14¹⁸⁻²⁴, mentions Eshcol first. 'The first of them was called Eshcol, the second Enner, and the third Mambres' (*Ant.* i. x. 2). In the Heb. of Gn 14²⁴ they are mentioned in the order Aner, Eshcol, and Mamre. But in the LXX the order is Ἐσῆκολ, Ἀνάν, Μαμβρή; and this order is found also in Philo (*De Migrat. Abrah.* § 30, i. 461). H. E. RYLE.

ESHCOL (Ἐσῆκολ), Nu 13^{23, 24} 32⁹, Dt 1²⁴.—A wady, with vineyards and pomegranates, apparently near Hebron. E. is usually rendered 'bunch of grapes.' The name has not been recovered, since the *Ain*

Keshkaleh at Hebron has no connexion with the Hebrew.

LITERATURE.—Robinson, *BRP* i. 114; Tristram, *Land of Israel*, 338, 393; Conder, *Tent-Work*, 237; *Bible Places*, 89; Besant, *Thirty Years' Work in the Holy Land*, 70, 84.

C. R. CONDER.

ESHEK (עֶשֶׂק).—A descendant of Saul (1 Ch 8³⁹). See GENEALOGY.

ESHTAOL (עֶשְׂתָּאֹל Jos 15³³ 19⁴¹, Jg 13²⁵ 16³¹ 18² s. 11).—A town in the Shephelah, first assigned to Judah, afterwards to Dan, always named with Zorah, now *Sura'a*, which is beside Ain Shems, where the Wady es-Surar is joined by valleys from the N. and S. and a great basin formed, fertile and well-watered, just beneath the hill country of Judæa. *Eshua'*, close to *Sura'a*, represents Eshtaol. Guérin says he heard in the neighbourhood that it formerly was called Eshu'al or Eshthu'al, which, if confirmed, might be held decisive; but the degeneration of Eshtaol into Eshua is not impossible. Between Zorah and E. was the 'camp of Dan'; and there (Jg 13²⁵) Samson's achievements began, and there he was buried (16³¹). (See Smith's *Hist. Geog.* p. 218.) The **Eshtaolites** (*lit.* 'Eshtaolite') were, according to 1 Ch 2³³, descended from the families of Kiriath-jearim, etc., who are there described as Calebites. The narratives of Jos 15³³ and 19⁴¹ suggest how mingling of the tribes of Judah and of Dan might arise, perhaps leading to the Danite migration from Zorah and Eshtaol.

LITERATURE.—*PEFS*, 1874, 17; Conder, *Palestine*, 49; Smith, *HGHL*, 218; Guérin, *Judée*, ii. 12 ff.; *SWP Memoirs*, iii. 25.

A. HENDERSON.

ESHTEMOA (עֶשְׂתֵּמוֹא), named in Jos 15⁵⁰ (where it is called **Eshtemoh**, עֶשְׂתֵּמוֹה) among towns of Judah. It was made afterwards a Levitical city (21¹⁴, 1 Ch 6⁵⁷). During David's wanderings in S. Judah its inhabitants were on his side (1 S 30²⁸). It is said in 1 Ch 4¹⁷ to have been inhabited by the descendants of Ishbah; and Eshtemoa, its founder, is called (4¹⁹) a Maacathite, which would naturally suggest that he came from the small kingdom of Maacah (wh. see). It may have been here 'the Maacathite' among his heroes joined David (2 S 23³⁴). The site was recovered by Robinson some 8 miles S. of Hebron. It is now *Es-Sem'a*, a considerable village (*BR* ii. p. 204), and full of ancient remains (*PÉF Memoirs*, iii. 403, 412).

A. HENDERSON.

ESHTEMOH.—See ESHTEMOA.

ESHTON (עֶשְׂתוֹן, perhaps 'uxorious').—A Judahite (1 Ch 4^{11, 12}). See GENEALOGY.

ESLI (Ἐσλεί, perhaps = עֶשְׂלִי 'J' hath reserved').—An ancestor of Jesus (Lk 3²⁵). See GENEALOGY.

ESPOUSAL, ESPOUSE.—To espouse (fr. Lat. *sponsus*, ptep. of *spondere*, to betroth, through Old Fr. *espouser*) meant either to betroth or to marry. Thus Camden, *Rem.* (1637) 414, 'Two Lovers who being espoused, dyed both before they were married'; but Shaks. *Rich. III.* iv. v. 8—

'Withal, say, that the Queene hath heartily consented,
He should espouse Elizabeth her daughter.'

So also 'espousal' is used in both senses, and Murray (*Oxf. Eng. Dict. s.v.*) thinks marriage is the primary sense. In AV 'espouse' occurs 2 S 3¹⁴ 'Deliver me my wife Michal, which I espoused to me' (RV, 'whom I betrothed to me,' Heb. יָצַדְתִּי לָּאִשְׁתִּי, which always means 'betroth'); Mt 1¹⁸, Lk 1²⁷ 2⁵, all of the Virgin Mary (RV 'betrothed'; Gr. *μηνησθείω*, always 'to ask or engage in marriage'); 2 Co 11² 'I have espoused you to one husband'

(ἡρμοσάμην, lit. 'joined you unto,' and here the ref. seems to be to marriage, not betrothal, 'I have given you in marriage,' though the betrothal, which was also carried out by the bridegroom's friend, may be meant). Espousal is found Ca 3¹¹ 'in the day of his espousals' (הַיּוֹם הַזֶּה, 'on the day of his marriage,' undoubtedly); and Jer 2² 'the love of thine espousals' (אַהֲבַת הַקְּדוּשָׁה, as Cheyne, 'thy bridal state'). Thus it is probable that AV (following older VSS.*) used these words indiscriminately, or at least with a less clear distinction than now obtains between betrothal and marriage. For the solemnity of betrothal in Italy (= England) in Shakespeare's day, see *Twelfth Night*, iv. iii. 26: it enables Olivia to speak of Sebastian as 'husband' (v. 146). It was not less solemn and binding in Israel. See MARRIAGE.

J. HASTINGS.

ESPY.—The verb to 'espy' occurs only six times in AV, Gn 42²⁷, Jos 14⁷, Jer 48¹⁹, Ezk 20⁶, To 11⁶, 1 Mac 5³⁸, while the mod. form to 'spy' is found eighteen times, and RV turns 'espy' of Jos 14⁷ into 'spy.' The word is apparently of Teutonic origin (Old High Ger. *spehon*), though it is connected with Lat. *specere*, to look, Gr. *σκέπτομαι*, and entered Eng. through the Old Fr. *espier*.

1. The most common and the oldest meaning is to *inspect* (secretly) a place, as Nu 21³² 'Moses sent to spy out Jaazer,' when the Heb. is נָחַשׁ, except Nu 13^{16, 17} (חָשַׁד), and the Eng. is always 'spy (Jos 14⁷ AV 'espy') out,' except Jos 2¹ 'to spy secretly' (סְתוּרִים קָרַשׁ, RV 'as spies secretly'), and Ezk 20⁶ 'a land that I had espied for them' (אֶרֶץ אֲשֶׁר עִסְפִּיתִי לָהֶם). Once the ref. is not to land but to liberty, Gal 2⁴ 'false brethren . . . who came in privily to spy out our liberty' (Tindale's trn.; Wyc. 'to aspice our freedom,' Gr. *κατασκοπήσαι*).

2. But we also find the sense of *keep watch*, as Jer 48¹⁹ 'O, inhabitant of Aroer, stand by the way, and espy' (נָחַשׁ). 3. More freq. is the idea of *suddenly perceiving* anything, as Gn 42²⁷ 'And as one of them opened his sack to give his ass provender in the inn, he espied his money'; so Ex 2¹, 2 K 9¹⁷ 13²¹ 23¹⁶ (all נָחַשׁ 'see'). 4. Finally, simply to discover or *perceive*, as 2 K 23²⁴ 'All the abominations that were spied in the land of Judah . . . did Josiah put away' (נָחַשׁ). Cf. Barlowe, *Dialogue* (Lunn's ed. p. 73), 'Woulde God they were as prest to remouue ye balk out of their owne eyes, as they be prompte to aspye a lyle mote in their mens.'

The subst. is always plu. 'spies,' except Sir 11³⁰ 'spy.' The Heb. is generally סְתוּרִים (Gn 42^{9, 11, 14, 16, 20, 21, 24}, Jos 6²³, 1 S 26¹, 2 S 15¹⁰); also שְׂכָרִים (Jg 1²⁴, RV 'watchers'), אֶתְרִים (Nu 21¹, RV 'Atharim' as place-name, wh. see). The Gr. words are *κατασκοπος* (Sir 11³⁰, 1 Mac 12²⁸, He 11³¹), the usual LXX tr. of *mēraggēlim*; and *ἐγκδθετος* (Lk 20²⁰, lit. 'sent down into,' and so, as Plummer, 'suborned to lie in wait.' The word is not found elsewhere in NT).

J. HASTINGS.

ESSENES.—In regard to the origin and nature of this sect very various views have been held. It is therefore best to confine oneself to stating succinctly what is known about them from ancient authors.

Our earliest witness is Philo of Alexandria, who, having visited Jerusalem in his youth, may have come into personal contact with them. In his treatise *Quod Omnis Probus Liber*, which is one of

* Tindale, in his tr. published in 1525-26, rendered the Gr. *μηνησθείσθαι* (Mt 1¹⁸) by 'married,' and in this he is followed by Coverdale. In the ed. of 1534, however, he altered it to 'betrothed.' In 2 S 3¹⁴ Cov. has 'married,' and so have the Geneva and Bishops' Bibles. In the NT our translators were probably influenced by the Rhemish Version, which in Mt 1¹⁸ has 'spoused,' or by Udall's tr. of Erasmus' Paraphrase (1548) which has 'espouse.'

his earlier works, written probably before A.D. 20, he describes them as follows :—

They were a sect of Jews, and lived in Syria Palestine, over 4000 in number, and called Essai, because of their saintliness; for *hosios*=saintly, is the same word as Essæus. Worshipers of God, they yet did not sacrifice animals, regarding a reverent mind as the only true sacrifice. At first they lived in villages and avoided cities, in order to escape the contagion of evils rife therein. They pursued agriculture and other peaceful arts; but accumulated not gold or silver, nor owned mines. No maker of warlike weapons, no huckster or trader by land or sea, was to be found among them. Least of all were any slaves found among them; for they saw in slavery a violation of the law of nature, which made all men free brethren, one of the other.

Abstract philosophy and logic they eschewed, except so far as it could subserve ethical truth and practice. Natural philosophy they only studied so far as it teaches that there is a God who made and watches over all things. Moral philosophy or ethic was their chief preoccupation, and their conduct was regulated by their national (Jewish) laws. These laws they esp. studied on the seventh day, which they held holy, leaving off all work upon it and meeting in their synagogues, as these places of resort were called. In them they sat down in ranks, the older ones above the younger. Then one took and read the Bible, while the rest listened attentively; and another, who was very learned in the Bible, would expound whatever was obscure in the lesson read, explaining most things in their time-honoured fashion by means of symbols. They were taught piety, holiness, justice, the art of regulating home and city, knowledge of what is really good and bad and of what is indifferent, what ends to avoid, what to pursue,—in short, love of God, of virtue, and of man.

And such teaching bore fruit. Their life-long purity, their avoiding of oaths or falsehood, their recognition of a good providence alone, showed their love of God. Their love of virtue revealed itself in their indifference to money, worldly position, and pleasure. Their love of man in their kindness, their equality, their fellowship passing all words. For no one had his private house, but shared his dwelling with all; and, living as they did in colonies (*βάσεις*), they threw open their doors to any of their sect who came their way. They had a storehouse, common expenditure, common raiments, common food eaten in *Syssitia* or common meals. This was made possible by their practice of putting whatever they each earned day by day into a common fund, out of which also the sick were supported when they could not work. The aged among them were objects of reverence and honour, and treated by the rest as parents by real children.

The most cruel and deceitful tyrants, says Philo, that had been the scourge of their country, had yet been moved to admiration of their quiet but invincible freedom, of their common meals, of their consummate fellowship.

Perhaps in these last words Philo refers to Herod the Great, whose subsequent rise to greatness was foretold to him as a child by an E. named Manæmus (Menahem), and who in consequence befriended and honoured the sect (Josephus, *Ant.* xv. x. 5).

Eusebius in his *Præparatio Evangelica* has preserved a fragment of Philo's 'Apology for the Jews,' which repeats much of the information given by Philo, but also supplements it.

Our lawgiver, he says, trains into fellowship and communion thousands of his disciples, who for their saintliness (*σιότιτητα*) are called Essenes. They inhabit many cities of Judæa, as well as many villages and populous tracts. Their tenets are espoused by them of free choice, and not as a matter of race.

There are no children or youths among them, but only full-grown men, or men already in the decline of life. They have no private property, but put all they have into a common fund, and live as members of a thiasus or philosophic colony, having common meals. They are very industrious, and work hard from early sunrise to sunset, as tillers of the soil, or herdsmen, or bee-farmers, or as craftsmen. Whatever they so earn they hand over to the elected steward (*ταμία χειροτονήβεντι*), who at once buys victuals for the common repast.

No Essene, adds Philo in this account, marries, but all practise continence. For women are selfish and jealous, and apt to pervert men's characters by ceaseless chicanery and wiles. While, if they have children, they are puffed up and bold in speech; driving their husbands to actions which are a bar to any real fellowship with other men.

The next writer who describes the Essenes is Philiny the elder († A.D. 79), in his *Natural History*, bk. v. ch. 17. 'The Hessenes,' he says, 'live on the W. side away from the shores (of the Dead Sea), out of reach of their baneful influences. A solitary race, and strange above all others in the entire world. They live without women, renounc-

ing all sexual love. They eschew money, and live among the palm-trees. Yet the number of their fellows (*convenarum*) is kept up and day by day renewed; for there flock to them from afar many who, wearied of battling with the rough sea of life, drift into their system' (*ad mores*). 'Thus for thousands of ages (strange to tell) the race is perpetuated, and yet no one is born in it. So does the contrition felt by others for their past life enrich this set of men. Below them lay Engadi, a town once second only to Jerus. in its fertility and groves of palms. Now 'tis but one more tomb. Next comes Masada, a fort on a rock, and, like the former, not far from the Dead Sea. And here ends our account of Judæa.'

There are two passages in Josephus in which the E. are described at length, and many minor references. The following is an epitome of his information :—

Josephus calls them Esseni in *BJ* ii. viii. 2, *Ant.* xiii. v. 9, x. 6, etc., and with Philo, Essai in *Ant.* xv. x. 4. They arose along with the sects of Pharisees (*Ant.* xiii. v. 9) and Sadducees, about B.C. 144, and formed from the first an *αἵρεσις* or sect.

About B.C. 107 (*Ant.* xiii. xi. 2) a certain Essene, named Judas, had a school, it would seem, in the temple, in which he taught his companions and pupils the art of predicting events. Again, about B.C. 21 we read (*Ant.* xv. x. 4) that Herod excused them along with the Pharisees from taking the oath of fidelity to himself. In the Jewish war (*BJ* ii. xx. 4) we hear of one John the Essene leading the Jewish rebels in Thamma. And at that time (c. A.D. 70) there was a gate at the S.E. corner of the city of David called the Gate of the E. (*BJ* v. iv. 2), which is proof that they were then a numerous sect.

The E. were so called because of their holiness (*σεμνότητα*) (*BJ* ii. viii. 5; *Ant.* xviii. i. 5). They believed that God controls all things, and committed all things to Him. Sometimes, however, Josephus says that they regarded Fate (*ἰμπαρπέμν*) as the supreme determinant of all human affairs (so a Mussulman believes in Allah and Kismet both at once) (*Ant.* xviii. i. 3).

There was no single city of the E., but they were sojourners (*μετατοικοῦντες*) in many, being in number over 4000 (*Ant.* xviii. i. 5). They eschewed marriage, and, adopting others' children as their own, imbued them with their own tenets (*BJ* ii. viii. 2; *Ant.* xviii. i. 5).

There was, however, another sect (*τάγμα*) of E., who made trial of women for three years and then married them if they were fruitful (*BJ* ii. viii. 13). They owned no slaves (*Ant.* xviii. i. 5), and were wholly devoted to agricultural pursuits. They despised wealth and shared their possessions, so that a rich man among them had no more enjoyment of his own property than had a member who owned nothing (*BJ* ii. viii. 3 and *Ant.* xviii. i. 5). For in entering their sect (*αἵρεσις*) a man made over his property to the institution (*τῷ τάγματι*) (*BJ* ii. viii. 3). There was no buying and selling between members; but the elected stewards administered the common fund,* impartially satisfying the needs of all alike (*BJ* ii. viii. 3). In every city a special relieving officer (*καθημέω*) was appointed to take care of the garments and supplies of the sect and entertain its travelling members.

But though so knit together among themselves the Essenes succoured the deserving, and pitied all men and fed the needy (*BJ* ii. viii. 6). This was a primary duty to be fulfilled by each on his own responsibility, and without waiting for a hint from the overseer (*ἐπιμελητής* or *ἐπίτροπος*); without whose authority, however, they might do nothing else, nor even give to their own kinsmen.

Their general mode of life (*δίαίτα*) Jos. in one place declares to be the same as that which Pythagoras instituted among the Greeks; in another place he compares them to Dacians, presumably because of their simple and communal mode of living (*Ant.* xv. x. 4, xviii. i. 5). He thus describes a day of an Essene's life inside his brotherhood :—

As for their piety towards God, it is very extraordinary. For before the sun rises they speak not a word about profane matters, but address to the sun certain prayers, which they have received from their forefathers, as if they supplicated it to rise (*BJ* ii. viii. 5). After this every one of them is sent away by their curators to exercise those arts wherein they are skilled, in which they labour with great diligence till the fifth hour (11 A.M.). After this they assemble together into one place, and when they have clothed themselves in white veils, they bathe their bodies in cold water. And after this purification is over, they meet together in an apartment of their own, into which it is not permitted to any one of another persuasion to enter; and they themselves being pure enter the dining-room as if it were some holy temple, and quietly sit down. Upon which the baker lays them loaves in order, and the cook also brings a single plate of one sort of food and sets it before every one of them. But the priest says grace before meat, and it is unlawful for any one to taste of the food before prayer is offered. And when they have made their breakfast, he again prays over them. And when they begin and when they end, they praise God as

* *χειροτονητοὶ οἱ τῶν κοινῶν ἐπιμεληταί.*

Him that bestoweth life. After which they lay aside their white garments as holy, and betake themselves to their labours again till the evening. Then they return home to supper after the same manner; and if there be any strangers there, they sit down with them. Nor is there ever any clamour or disturbance to pollute their house; but they give every one leave to speak in their turn. Which silence thus kept in their house appears to outsiders like some tremendous mystery; and the same is due to their unswerving sobriety, and to this, that their food and drink is measured out to satisfy them and no more.

Like Philo, Josephus is full of praise for their moral qualities, and lauds their self-restraint in anger, their faithfulness, their peace-making, their truthfulness, which made all oaths to them a mere superfluity.

The mode of joining the sect was this. The intending member remained outside the order one year, following, however, the same discipline, and invested with its symbols, namely a spud wherewith to hide his excrement out of sight of God, the girdle and white raiment. After the lapse of a year, if he had given good proof of his continence, he was allowed to join more closely in their way of life and partake of a purer quality of the waters of purification, though not yet to live entirely with them. Two years of moral probation must yet be passed before he was chosen a member of their band (*σμιλος*). And then before he touched the common food he took tremendous oaths to them: first to reverence the Deity, next to observe justice towards men, to hate the wicked and assist the just. To be loyal ever to all men, but in especial to those in authority, because none hath authority except by God's help. He swore also, if he should ever be in authority, not to abuse the same, nor outshine those subject to him in his garments or in any other finery; to love truth and repel falsehood; to keep his hands clean from theft and his soul from unholy gain; to conceal nothing from members of the sect, nor reveal aught to others, even at peril of his life. Moreover, he swore to communicate to none the dogmas of the sect, otherwise than as he received them himself, to abstain from brigandage, and to preserve with like care the books of their sect and the names of the angels.

Jos. gives many indications that the E. were very strict Jews (*BJ* II. viii. 9). They revered the name of the lawgiver next after God, and punished with death one that blasphemed against Moses. Above all other Jews they observed the Sabbath, not only not cooking on that day, and avoiding the lighting of a fire, but forbearing also to move a vessel, or even evacuate. In the Jewish war many died under torture at the hands of the Romans rather than blaspheme the lawgiver or eat unclean food. Many details supplied by Josephus prove how much importance they attached to ceremonial purity. We have seen how they bathed before each meal, and wore linen garments; linen, of course, being prescribed because it was a vegetable substance, and not made of dead animal refuse, as would be a leathern or woollen tunic. That the waters of purification in their purer quality were denied to novices, proves that the water of the bath was ceremonially cleansed, and probably exorcised. By immersion in it they were themselves rendered *καθαροί* or pure before they sat down to meat, by contrast with the *ερερόδοξοι*, or persons of any other persuasion (*BJ* II. viii. 10). They were distinguished acc. to their purity and seniority into four grades; and a senior member was polluted by the very touch of a junior member, and had to wash after being so touched, as if he had been jostled by Gentiles. So an Indian Brahman is polluted by the touch and even sight of a low-caste native. They did not anoint themselves with oil, regarding it as a defilement; prob. because they could not easily get oil prepared by members of their own caste. Josephus elsewhere assures us that no Jew would anoint himself except with Jewish oil.

The same pursuit of ceremonial purity is to be noticed in regard to their meals. Their food and viands were specially prepared by their priests (*Ant.* XVIII. i. 5); just as in a Hindoo prison the cook must be a Brahman, because any lower-caste man may eat what a higher-caste man has cooked, but not *vice versa*. In each city a special officer (*κρημεύων*) was appointed to supply travelling E. with their ceremonially pure garments and food. Lastly, an E. expelled for his sins by a court of 100 members from the brotherhood was still so held by its oaths and customs that he could not eat of food prepared by others, and in consequence

starved to death. To the same concern for ceremonial purity must prob. be ascribed their attitude of reserve towards the temple sacrifices. 'They send offerings (*ἀναθήματα*) to the temple and perform sacrifices with superiority of purificatory rites,* which they claim to practise (*Ant.* XVIII. i. 5). And being for this reason excluded from the common court of the temple, they perform their sacrifices by themselves.† These words are obscure, and barely reconcilable with Philo's statement that the E. did not sacrifice animals (Philo, ii. 457 = *Quod om. prob. lib.* § 12). The offerings sent, according to Jos., need not of course have been blood-offerings; and as to the nature of the sacrifices (*θυσίας*) which they performed by themselves, *i.e.* without the help of the temple priests, Jos. tells us nothing; but we should certainly connect it with a practice, which he elsewhere attests, viz. that they *elect* their own priests for the making of their own food and eatables. This much is clear, that the ordinary lustrations of the temple were not good enough for an E., and were incompatible with his notions of ceremonial purity. Presumably, they were excluded from the temple court for thus flouting the usual lustrations. Unable to enter it, they sent offerings, but did not go themselves. At the same time they performed their sacrifices by themselves. There seems to be some connexion between this statement and Philo's that they offered up the sacrifice of a devout and reverent mind. They could not possibly have offered up animal sacrifices save in the temple and in the ordinary way; and Josephus' own statement elsewhere, that their mode of life was Pythagorean, is in favour of Philo's declaration that they did not sacrifice animals. It is natural to suppose that they regarded their common meals as of the nature of a sacrifice, just as Christians regard the eucharistic elements. Only thus can we explain the fact that they *elect* priests to prepare those meals; for a priest implies a sacrifice to be offered.

Their abstention from marriage must also be set down to their desire for a levitical purity. For acc. to the Mosaic law sexual relations involved a defilement of the person, and the uncleanness lasted until the even (*Lv* 15¹⁸).

Notwithstanding their attachment to the Mosaic law and striving after levitical purity, there were certainly many non-Jewish elements in their religious practices and beliefs. Thus they adored the sun, and prayed to him to rise. In Appian and other writers we find the phrase, 'the god rose,' or 'the god set,' used instead of 'the sun rose,' or 'the sun set'; and Philo regarded the sun and stars as holy and divine natures.

The Essene beliefs about the soul and a future life were also non-Jewish. They believed that they received their souls back after death (*BJ* II. viii. 11), and so very cheerfully died for the faith. 'The body is corruptible, they taught; and the matter of which it is composed is not lasting. But souls are immortal, and last for ever, and proceeding out of the most subtle ether, are entangled in bodies as in prison-cells, being drawn down by some natural yearning. But when they are set free from the bonds of the flesh, as being now released from a long bondage, they rejoice and mount upwards. And in agreement with the opinions of the Greeks they declare that there lies away across the ocean a habitation for the good souls, in a region that is oppressed neither with storms of rain or snow, nor with intense heat; a region ever refreshed by the gentle breathing of a breeze blowing from the ocean. But they allot to bad souls a dark and tempestuous den full of never-ceasing punishments.'

* τὰς θυσίας ἐπιτελοῦσιν διαφορῆτι ἀγνείων, ὡς νομίζουσιν.
† ἐφ' αὐτῶν.

The Essenes had hereditary prayers to the sun, as well as the usual Jewish sacred books; they had purificatory rites of different sorts or degrees, and utterances of the prophets. By diligent study of these, some of them learned and professed to read the future. And their predictions, says Jos., were rarely belied; indeed he gives several instances up and down his history of the fulfilment of their prophecies (*BJ* II. viii. 12). They also had compositions of the ancients from which they chose out whatever benefited soul and body; and they inquired after such roots and peculiar stones as would ward off their distempers. The regular books and dogmas of the sect, as we have seen, they took oath to carefully keep, as also the names of the angels. These names, of course, were powerful weapons against evil demons, with a belief in which they must, like other Jews of the age, have been imbued. The stones and roots were the ordinary magic remedies against diseases.

This is the sum of what Jos. has to say about the Essenes. Hippolytus in the 9th Book of his *Refutation of Heresies*, § 18-28, substantially copies out Josephus' account in the *BJ* II. ch. 8, here and there adding Christian touches in a way which proves that he was not loth to assimilate them to Christians. Yet some of the information which he adds is not of this sort, but serves to intensify their Jewish complexion. Such are the statements that on the Sabbath some Essenes would not so much as leave their beds (§ 25); that some were so scrupulous that they would not carry a coin, declaring it wrong to carry or look at or make an image (§ 26, cf. Mt 22²⁰); that no one of them would enter a city over the gate of which stood a statue (§ 26); that others of them, if they heard any one talking about God and His law, would waylay him when alone, and threaten to slay him unless he were circumcised, and slay him actually if he did not submit; for which reason, says Hippolytus, they got the name of Zealots and Sicarii; that others would call no one Lord (*Κύριον*) but only God, submitting to torment and death rather than do so. It is difficult to believe that Hippolytus had no authority for these statements; which indeed might seem to be taken from Jos., since they are embedded in his long citation of that author. If so, they have been removed from all the MSS of Josephus. The same account of Jos. was excerpted by Porphyry in the 3rd cent. in his book on Abstinence from Meats, and later by Eusebius in his *De Præp. Evang.* The account given by Epiphanius of the E. is late, confused, and of little value. It is clear that, even if the majority of the E. were cultivators and voluntarily poor, that did not prevent some of their number from occupying important posts in the court and camp; for we hear of one Simon* the interpreter of Archelaus' dream (*Ant.* XVII. xiii. 3), and of John the strategus, and of Menahem the friend of Herod. Nor did their gospel of peace and their prejudice against arms, as reported by Philo, prevent them from taking part in the final struggle against the Romans. Jos., moreover, implies that they were constantly moving about from city to city; and we can only suppose that the object of this travelling was to preach their tenets and secure recruits. We should like to know if the sect was not mainly recruited from Greek-speaking Jews, but on this point Jos. tells us nothing. In his autobiog. (*Vita*, 10) he implies that as a youth he had tried the discipline of this sect, as also of the Pharisees and Sadducees, and this inner acquaintance with them entitles his account to our entire credit; but just because he and his countrymen knew the sect so well, he omits to inform us about so essential a point as in

* Σίμων ἀντὶ γένους Ἑσσηαῖος.

what language their books were written, and what tongue, whether Greek or Aramaic, they usually spoke among themselves.

Some writers, impressed with the fact that Jesus constantly inveighed against the Pharisees and Sadducees, but never against the members of the third of the three great Jewish sects, who yet must have everywhere confronted Him, have inferred that He and John the Baptist, His precursor, were Essenes. The silence of the Gospels about the E. is certainly remarkable; and there are many striking traits in common between the E. and the earliest Christians. These are the following:—

1. The community of goods and voluntary poverty.
2. The art of prophecy. In the earliest Church, as we know from Acts and from the *Didaché*, there was a regular order of prophets.
3. The teaching about the future life, and about a hell. These tenets, however, were equally found among the Pharisees; nor does Jos. support Hippolytus in the latter's statement that the Essenes believed in the resurrection of the flesh, though the picture of the Islands of the Blest implies as much, and answers well enough to the Refrigerium of later Christian belief. As to the teaching of future punishment, we also find it in Philo.
4. Abstention from marriage. This was equally a counsel of perfection in the early Church, but was there held to be right in view of the impending second advent and end of the world (1 Co 7^{25ff.}).
5. Obedience to established authorities.
6. Internal government. The officers of the E. community were variously termed ἀποδίκται τῶν προσόδων 'receivers of the revenue,' ἐπιμεληταί 'curators,' κηδεμόνες 'relieving officers,' ταμίαι 'stewards' (in Philo). These officers were, like the bishops of the early Church, elected by show of hands (χαριστονομήσεις), acc. to the testimony of both Philo and Josephus. It is significant that Hippolytus calls them outright προεστώτες or presidents (lib. ix. § 25), the regular 2nd cent. equivalent of 'bishop.'
7. The common meals, with which we may compare the picture of the early Church of Jerusalem given in the Acts. But whereas the Essenes dined together because of their anxiety to eat no food but what was ceremonially pure, the Christians were chiefly actuated, it would seem, by charitable and communistic reasons. Their love-feast, however, also had from an early date, if not from the very first, a sacramental character and conclusion, and required, like the Essene common meal, the presence of a priest both to prepare it and to give thanks before and after it to God 'the Giver of Life.'
8. The Essene priests (ἱερεῖς) were elected to preside at the common meal, and make the food eaten thereat. Since the Essene common repasts had plainly a sacramental character, the function of their priests, as of Christian ones, was simply to prepare and preside over a sacramental meal, to which none were admitted save those rendered pure by previous baptism.
9. General organization. (α) Obedience to the Essene officers. The brethren in their department and bodily habit were like children under the eye of a schoolmaster whom they feared (*BJ* II. viii. 9). (β) They were all brethren, but the elder members were revered by the juniors as if they were their parents. (γ) The entire body or class of Essenes (γένος, as Jos. calls it) is a θίσιος, an αἰρεσις, an ἑμίλιος, a τάγμα. The two former were generic names for any body of co-religionists, and Christian congregations among the Gentiles were so described. (δ) The travelling precepts of the E. resembled those enjoined by Jesus on the Seventy. They were to take nothing at all with them, but only to go armed for fear of robbers.* (ε) They were to wear their cloaks and shoes right out, never changing them till they were quite worn out. Hippolytus paraphrases this by saying that no E. owned two cloaks or two pairs of shoes (*Hipp. l.c.* § 20). (ζ) The four grades of E. resembled the steps of the catechumenate. Such a distinction, however, of grades of initiation was common to most ancient mysteries, and was not special to Christianity. The *disciplina arcana* of the E. was also reproduced in the Christian Church, but equally in the pagan mysteries.
10. Like the Christians, the Essenes were not content with the ordinary illustrations (ἀγγελίας) of Judaism, but had superior ones of their own. Whereas, however, the Christian baptism was conferred once and for all, the Essene baptism was daily. The Essene affectation of a purity of food superior even to the ordinary purity of the Jews, also recalls the eucharistic meal of the Christians. From it the novice was excluded, just as was the catechumen from the Eucharist. And just as the priest among the E. was elected to make the food eaten in their *syssitia*, so the priest in the Gr. Church, even to this day, himself prepares and bakes the eucharistic loaves. Jos. expressly says that the Essenes elected priests. They were therefore not content with the hereditary Levites of Judaism.

More analogies between the Essenes and the earliest Christians could no doubt be discerned. But it is a fatal objection to any real identification, that the Essenes were ultra-Jewish in the observance of the Sabbath, and, if we may credit Hippolytus, in their insistence on the circumcision of converts. The most we can say is that the

* οὐδὲν μὲν ὅλως ἐπιπολιζόμενοι, διὰ δὲ τοὺς ληστας ἕνδοξοι.

Christians copied many features of their organization and propagandist activity from the Essenes.

The relation of the different sources on which our knowledge of the E. depends requires further sifting than it has generally received. Of course there have been attempts to prove the Philonean sources to be not authentic, but they are based on mere ignorance. There are occasional verbal resemblances* between the accounts of Philo and Jos. which indicate that Jos., besides his own personal experience of the sect, used either Philo or else a document previously used by Philo. The accounts of the two writers, however, do not always agree. Thus Philo says that all the E. were full-grown men, or verging on old age; but Jos. avers that they recruited their sect by adopting other people's children while they were still supple and plastic to receive their teachings (*BJ* II. viii. 2). Yet in the same context Jos. speaks of those who *desired* to become members of the sect,† and also of *their* period of probation, in words suitable only to the view that these recruits were adult men. We may perhaps infer that the sect was recruited in both ways. Philo's statement that the men from all quarters joined it when they repented of their lives, and left the world, agrees well enough with Philo's statement; and, if we translate *penitentia* as 'repentance' rather than mere *enuei*, offers a striking parallel to John the Baptist's preaching: Repent of your sins and be baptized, because the kingdom of God is at hand. There is reason to suspect some close affinity between John, who came fasting, and the E.; the more so as John's sphere of activity in the valley of Jordan lay close to the Essene settlement on the shores of the Dead Sea.

The recluse Bannus, with whom Jos. as a young man spent three years as a disciple, resembled the Essenes. For he lived in the desert, wore garments made of the bark of trees, and lived on anything he found growing about, washing himself often day and night with cold water by way of purification. However, Josephus' context rather implies that he was not one. An almost certain reference to the E. is contained in an eloquent passage of Philo's, from the same treatise in which his longer description of the sect is preserved.

Even in our own day, he writes, there are still men whose only guide is God; men who live by the true reason of nature, not only themselves free, but filling their neighbours with a spirit of freedom. They are not very numerous indeed. But that is not strange. For the highest nobility is ever rare; and then these men have turned aside from the vulgar herd to devote themselves to a contemplation of nature's verities. They pray, if it were possible, that they may reform our fallen lives; but, if they cannot, owing to the tide of evils and wrongs which surges up in cities, they flee away, lest they too be swept off their feet by the force of its current. And we, he continues, if we had a true zeal for self-improvement, would have to track them to their places of retreat, and, halting as suppliants before them, would beseech them to come to us and tame our life, grown too fierce and wild; preaching, instead of war and slavery and untold ills, their gospel of peace and freedom, and all the fulness of other blessings.

The Therapeutæ of Alexandria, of whom Philo has left so striking a description in his tract *De Vita Contemplativa*, in many ways resembled the Pal. Essenes; but were, as was natural in an Egypt. sect, more addicted to contemplation. Here is not the place for a detailed comparison between them and the E.; nor is it possible to review the numerous theories which have been framed with regard to the origin of the E. It, however, deserves to be remarked that acc. to the evidence of Jos.

* *E.g. Ant.* XVIII. i. 5: τὰς πράσσουσιν ἄνδρες ὑπὲρ τετραμισχιλίου τὸν ἀριθμὸν ὄντες. Cf. Philo, ii. 457: πλῆθος ὑπὲρ τετραμισχιλίου. It is not likely that their numbers were the same at the very beg. of our era as in A. D. 70. Again Jos. writes (*BJ* II. viii. 4): τοῖς ἱεράων ἡκούσιν αἰριστιαῖς τὰν ἀναπέταται τὰ παρ' αὐτοῖς. Cf. Philo (ii. 458): ἀναπέταται καὶ τοῖς ἱεράων ἀφικνουμένοις τῶν ὁμοίων.
† τοῖς δὲ ζηλοῦσιν τὴν αἵρσιν.

they arose just at the time when the friendship between Lacedæmon and Jerus. was at its highest. Areus the king of Sparta had written as early as B. C. 309-300 to Onias the high priest in these terms: 'It is found in writing that the Spartans and the Jews are brethren, and that they are of the stock of Abraham' (1 Mac 12²¹). And in B. C. 144 Jonathan the high priest, in renewing the relations of his country with Lacedæmon, reminded the Spartans of this long-standing friendship based on ancient kinship. Is it possible that the E. sect was partly an outcome of this contact with the Peloponnese—an attempt to imitate on Jewish soil, and in a religious and moral sense only, the Syssitia and organization of the Lyeurgæan polity? That most of the Jews mentioned in Jos. as belonging to the Maccabæan period have Greek second names is good evidence of the wide diffusion in Pal. at that time of the Gr. language. And the very information proffered by Jos., that the E. were Jews by race, almost implies in its context that in language they were something else. So Philo assures us that the holy places in which the E. met on the Sabbath were called συναγωγαί, *synagogues*. Unless they spoke Greek, why should this term rather than the usual one σαββατείον* have been employed? Friedländer (*Zur Entstehungsgeschichte des Christenthums*, Wien, 1894) has remarked that the very circumstance of Jos. having used, if not Philo's account, at least a Gr. description of the sect already used by Philo, is some indication that they were a Gr. sect of Jews. Their Pythagorean régime, their belief in the pre-existence of the soul, their view of its nature and incarnation, all point the same way. The statement also of Philo, not repeated by Jos., that they philosophized most things in the Bible allegorically or in a symbolic way with old-fashioned zeal,† is an almost certain proof of their Hellenism. And Philo's own allegorization of the passage Dt 23 ff. is, as Friedländer has seen (p. 118), an allusion to the Essene probation and discipline (Philo, *Legis Alleg.* i. 117).

Again, Philo, when he states that the E. were taught the art of regulating home and state, and a knowledge of what things are really good and bad and indifferent, how to choose what is right and avoid the opposite courses, seems to imply a familiarity on their part with Greek, especially with Stoic, moral philosophy, inconceivable among Jews who spoke Aramaic only. But here we must be cautious, for Philo would naturally describe any sect in terms of his own Gr. culture. That he twice over described this Pal. sect, yet apparently left unnoticed the purely Jewish schools of Pal., is in any case significant, and suggests that they had a Gr. culture which interested him, and led him to couple them, as he does, with the Alexandrine Therapeutæ.

Jos. equally implies that they were more or less Hellenized. Would he have conspired with Philo to misrepresent them? Nothing is more improbable.

The conclusion, then, is probable that they owed their origin to the introduction and diffusion of Greek culture in the early part of the 2nd cent. B. C. They were in some respects very strict Jews, and even fanatical observers of the Mosaic Law; but in others, notably in their election of their own priests,‡ and in the thereby implied supersession of the Levite hereditary priesthood, and in

* Jos. uses σαββατίον (*Ant.* xvi. vi. 2). It is found in a very early Græco-Jewish papyrus, edited by Mr. B. P. Grenfell, of Oxford.

† τὰ γὰρ πλείστα διὰ συμβόλων ἀρχαιοτρόπω ζηλώσει παρ' αὐτοῖς φιλοσοφίται.

‡ *Ant.* XVIII. i. 5: ἀποδίκτας τῶν προσόδων χειροτονοῦντες . . . ἱερεῖς δὲ ἐπὶ ποιήσῃ σίτου τε καὶ βρώματων. If the Essenes dis carded sacrifices, they had no need for priests of the old kind.

their repudiation of animal sacrifices, they were a new departure in Judaism, and very closely akin to Jesus and His disciples.

The literature relating to the Essenes is so vast as to defy detailed reference. The student may be advised to study for himself the very limited documentary sources relating to them, and then to draw his own conclusions.* F. C. CONYBEARE.

ESTATE.—In AV (1611 and mod. edd.) 'estate' occurs 19 times, 'state' 14 times, without difference of meaning; thus Col 4⁷ 'All my state (τὰ κατ' ἐμὲ πάντα) shall Tychicus declare unto you,' but v.⁸ 'that he might know your estate' (τὴν τὰ περί ὑμῶν); and again, Ph 2^{19, 20} 'your state' (τὰ περί ὑμῶν). Cf. Melvill, *Diary*, 289, 'We find him in a miserable estate'; Calderwood, *History*, 144, 'I, Mr. Andrew Melville . . . most earnestly hath prayed at all times, and specially in the fore-said Sermon, for the preservation and prosperous estate of his Majesty.' The meaning is either 'condition' as in those examples, or 'position' as Ps 136²³ 'Who remembered us in our low estate' (נָחַץ), Ec 1¹⁶ 'I am come to great estate' (גָּדוֹל). Cf. T. Elyot, *The Governour* (Croft's ed. i. 26), 'a man of the base estate of the communalitie'; Calderwood, *History*, 149, 'They declare how some of low estate, borne to no heritage . . . have crept in favour with the King.' But in Dn 11^{7, 20, 21, 28} the meaning seems to be 'high rank,' 'dignity,' as 11⁷ 'Out of a branch of her roots shall one stand up in his estate.' The Heb. is בָּ לֵבֵן, which means 'place' (as RV here) or 'office' (as RVm), and the favourite translation before AV was 'in his stead' (Cov. Gen. Bish.); once, however, the word is translated 'state' (Pr 28², AV and RV). Akin to this meaning is Mk 6²¹ 'Herod on his birthday made a supper to his lords, high captains, and chief estates of Galilee' (τοῖς ἀρχαίοις, RV 'the chief men'), where, however, the word is used of the men to whom the dignity belongs. Cf. Fuller, *Ch. Hist.* v. iii. 28, 'Item, that God never gave grace or knowledge of Holy Scripture to any great estate or rich man.' See also Ac 22⁵ 'The high priest doth bear me witness, and all the estate of the elders,' Gr. πᾶν τὸ πρεσβυτέριον, lit. 'all the presbytery,' i.e. the Sanhedrin (which see). Compare Communion Office in Pr. Bk. 1549, 'the whole estate of Christ's Church militant here in earth,' changed in 1552 into 'state.' In Ezk 36¹¹ 'I will settle you after your old estates,' the plu. is used simply because the ref. is to more than one person; so Pref. to AV 1611, 'support fit for their estates.'

J. HASTINGS.

ESTEEM, ESTIMATION.—'Esteem' and 'estimate' both come from Lat. *estimare*, the latter directly, the former through Old Fr. *estimer*. The meaning of *estimare* is to assign a value, appraise, rate; and that is the meaning of 'estimate' (Heb. חָשַׁב) in Lv 27^{14 bis}, its only occurrences in EV. 'Estimation' occurs 20 times in the same chapter; elsewhere Lv 5^{15, 18, 6}, Nu 18¹⁶, and

* Schürer (*HJP* ii. ii. 188 ff.) has a full record of the literature. The important names are Frankel, 'Die Essäer,' in *Zeitschr. für die religiösen Interessen des Judenthums*, 1846, 441-461; and 'Die Essäer nach thalmud. Quellen,' in *Monatschr. für Gesch. u. Wissensch. des Judenth.* 1853, 30-40, 61-73; Jost, *Gesch. des Judenthums u. seiner Secten*, 1857, i. 207-214; Herzfeld, *Gesch. des Volkes Isr.* (2nd ed. 1863), ii. 368 ff., 388 ff., 509 ff.; Lightfoot in *Colossians and Philemon*, 82-98, 349-419; same in *Dissertations*, 323-407; Lucius, *Der Essenismus*, 1881; Hilgenfeld, *Ketzergesch. des Urchristenthums*, 1884, 87-149. Schürer may be supplemented by adding: Ginsburg in Smith and Wace, *Dict. Chr. Biog.* 1880; Ohle, 'Die Essener,' in *JPTH* (1888) xiv; also 'Die Pseudophilosophischen Essäer und die Therapeuten,' in *Beiträge zur Kirchengesch.* 1888; Thomson, *Books which influenced our Lord*, 1889, 75-122; Morrison, *Jews under Roman Rule*, 1890, 323-347; Cheyne, *Origin of the Psalter*, 1891, 418-421, 446-449; Cohn in *JQR*, 1892, 38-42; Friedländer, *Zur Entstehungsgesch. des Christenthums*, 1894, 98-142; Conybeare, *Philo about the Contemplative Life*, 1895, 273 ff.—EDITOR.

always in the same sense as 'estimate,' that is, valuation, price (Heb. אָרַץ). Only once is 'estimation' found in the mod. sense of 'high value,' 'repute,' Wis 8¹⁰ 'For her sake I shall have estimation among the multitude, and honour with the elders, though I be young' (δόξα, RV 'glory').

Cranmer (*Works*, i. 14) says, 'But to mine estimation, as much as I could view the ground, there was not slain upon both parties two thousand men.' This meaning of 'estimation' is not found in AV, but it is the almost invariable sense in which 'esteem' is used, that is, to esteem is to have an opinion (good or bad), reckon, as in He 10²⁹ Rhem. 'estemed the blood of the testament polluted,' where AV and most VSS have 'counted'; and as Knox, *Hist.* 312, 'he shall be esteemed and holden a seditious person.' Thus Ro 14⁵ 'One man esteemeth one day above another: another esteemeth every day alike' (both κρίνει). Then the kind of judgment is expressed by an adverb, 'highly,' 'lightly,' or the like.

Sometimes 'esteem' might appear to be used, like 'estimation,' in the mod. sense of 'think highly of.' But this impression is probably due to the context or the presence of some adverb. Thus Wis 12⁷ 'that land which thou esteemest above all other' (ἡ . . . τιμιωτέραν γῆν, RV 'is most precious'); Sir 40²⁵ 'Gold and silver make the foot stand sure; but counsel is esteemed above them both' (ἐξδοκιμώτεται); Job 23¹² 'I have esteemed the words of his mouth more than my necessary food' (אֲנִי אֶשְׂתַּמְעָה, RV 'I have treasured up'), 36¹⁹ 'Will he esteem thy riches?' (תִּשְׁעֵרֶנּוּ). And in particular, Is 53³ 'He was despised, and we esteemed him not,' is generally taken in the sense of 'highly value'; but the Heb. verb (שָׂרַף) is very rare in that sense, and is used in the next verse in its familiar sense of 'reckon'—'we did esteem him stricken.' Cf. Ridley, *A Brevé Declaration*, 1535 (Moule's ed. p. 101), 'eateth and drynketh his owne damnacion, by-cause he esteemeth not the Lordes body; that is, he reuerenceth not the Lordes bodi with the honour that is due unto him,' where the paraphrase contains more than the translation.

J. HASTINGS.

ESTHER (אֶסְתֵּר, *Esther*, Pers. *stāra*, 'star'), originally named Hadassah (חַדְסָה, 'myrtle').—A Jewess who has given her name to a book of the OT, in which she holds a prominent place. Sprung from a family of the tribe of Benjamin, she spent her life in the Captivity in Persia, where she was brought up in humble circumstances as the orphan ward of her cousin Mordecai (Est 2^{5ff}). On the deposition of the Pers. queen Vashti for refusing to come at the command of her husband Ahasuerus (*Xerxes*, B.C. 485-465), 'to show the peoples and the princes her beauty,' on an occasion of high festivity at the court of Susa (1^{10ff}), E. was selected to fill the vacant place of honour, as the fairest of many beautiful maidens brought before the king (2^{5ff}). Shortly after her elevation a great disaster threatened her countrymen. The grand vizier, 'Haman the Agagite,' enraged at the refusal of Mordecai to do obeisance to him, accused the whole nation of the Jews to the king as a disloyal and unprofitable people, and undertook to pay 10,000 talents of silver into the treasury as the proceeds of pillaging them. An edict was thereupon issued for the extermination of all Jewish families throughout the empire, and for the confiscation of their property, on a certain day, which Haman had previously determined by lot (ch. 3). In this crisis, moved by the tears of her fellow-countrymen, and incited by Mordecai, who urged her to rise to the great opportunity set before her for the deliverance of her nation, E. (after a fast of three days on the part of the whole Jewish community) resolved to venture uninvited, at the risk of her

life, into the presence of Ahasuerus, in order to intercede with him for her people (ch. 4). A gracious reception was accorded to her by the king, who held out the golden sceptre, and agreed to dine with her in her apartments on two consecutive days (ch. 5). On the night preceding the second banquet (at which E. intended to make known her request) it happened by a singular coincidence that there was read to the king, to while away some sleepless hours, a portion of the national archives, which recorded a valuable service rendered by Mordecai in the detection of a plot against the king's life on the part of two of his chamberlains. For this service Mordecai had never been rewarded; and when Haman, elated with the high honour shown him by the queen (who had invited him to the banquet provided for the king), appeared at the palace next morning in order to ask permission to put Mordecai at once to an ignominious death, he was met with the question from the royal lips, 'What shall be done unto the man whom the king delighteth to honour?' Imagining, in his overweening pride, that it must be himself that was meant, he suggested a triumphal procession, in which one of the chief nobles should act the part of attendant. To his surprise and mortification he found himself called upon to serve in a menial capacity in the triumph of his Jewish adversary (ch. 6). This, as his wife divined, was only the prelude to his downfall, which came to pass next day at the second banquet, when the king, learning for the first time the nationality of the queen, and the distressing position in which the edict had placed her, ordered that Haman should be seized, and hanged forthwith on a lofty gallows which (as the king was at that moment informed by one of his courtiers) had been erected by Haman for the execution of Mordecai (ch. 7). The latter was at the same time raised to the vacant post of honour, and through his influence, and that of E., a second edict was issued and circulated, granting to the Jews the same powers, in the way of self-defence, as had been conferred in the previous edict on their enemies for the purpose of attack,—a direct revocation of the former edict being impossible according to the laws of the Medes and Persians. In consequence of these proceedings a dread of the Jews fell upon all peoples, many proselytes being gained—convinced, apparently, by the logic of events (ch. 8); and when the fatal day arrived, the conflict issued in a great slaughter of their enemies and a decisive victory for the Jews, who, however, waived their right of plunder. To commemorate their great deliverance, the joyful Feast of Purim (which see) was instituted by E. and Mordecai as an annual observance for the whole nation.

How far E. is to be regarded as a historical personage, depends on the historicity of the Book of Est (see below), her name not being mentioned in any other book of the OT, nor anywhere else in pre-Alex. literature. The only queen of Xerxes mentioned by Herodotus (vii. 61, 82, 114; ix. 108–112; cf. Ctesias, 20) is Amestris, a cruel and superstitious woman, whom some (Scaliger, Pfeiffer, Eichhorn, Bertholdt, Bunsen, Shickard, etc.) would identify with Esther. But Amestris was a daughter of a Pers. general connected with the royal family, and the chronology and circumstances of her reign cannot be reconciled with the biblical account either of E. or of Vashti. Xerxes (like his predecessors) may have had more wives than one, but, according to Pers. custom, they must have been taken from some of the great families connected with the throne, or from some other royal house; and the most tenable hypothesis seems to be that E. (as well as Vashti) was merely the chief favourite of the seraglio, gaining

a remarkable influence over the foolish and capricious monarch, and using that influence at a critical moment for the benefit of her Jewish compatriots. While there are some things recorded of E. that offend our Christian feeling,—in particular her vindictive treatment of the bodies of Haman's sons (9⁷), and her request for an extension of time to the Jews at Susa for the slaughter of their enemies (9¹³),—regard must be had to the spirit of the age in which she lived, and to the passions that had been excited by Haman's inhuman malignity. On the other hand, her devotion to the cause of her oppressed nationality ('I will go in unto the king; and if I perish, I perish'), and her dutiful bearing towards her foster-father, notwithstanding the sudden rise in her fortunes, explain the honour in which her memory has been held by her countrymen.

J. A. M'CLYMONT.

ESTHER, BOOK OF.—I. CANONICITY.—Est is one of the latest of the *Hagiographa* or *Kethubim*, the third and latest accretion of the OT Canon. It may have been among 'the other books of the Fathers' which the Gr. translator of Sir (B.C. 132) mentions (in his Prologue) along with the 'Law and the Prophets' as well known to his grandfather, the author of that book (c. B.C. 180); but this seems unlikely, in view of the fact that neither Esther nor Mordecai is mentioned in the *πατέρων βιβλος* towards the close of the book. The earliest undoubted reference to E. is in Jos. (c. Ap. i. 8), who includes it among the 22 books long held sacred (*δικαίως θεία πεπιστευμένα*), as is evident from the *terminus ad quem* which he assigns to the history (*μεχρι τῆς Ἀραξέρξου Περσῶν βασιλείως ἀρχῆς*), Artaxerxes being, in Josephus as in the Sept., erroneously identified with Ahasuerus. The secular and foreign character of the book * gave rise among the Jews of the 1st and 2nd cent. of the Christian era to questionings as to its right to a place in the Canon. In the Jerus. Talm. (*Meg.* 70. 4) there is a statement that 85 elders, including more than 30 prophets, had scruples about the recognition of the Feast of Purim (at which the Book of Est was publicly read) because there was no sanction for it in the law of Moses; and elsewhere (*Bab. Meg.* 7a) we find traces of various difficulties felt by Rabbis as to the full inspiration of the book. It appears certain, however, that it formed an integral part of the Jewish Canon when the latter was virtually, if not formally, closed at the Councils of Jerus. and Jamnia in the 1st cent. A.D., as the same books that are in our OT are implied (numerically) in ch. 14 of 2 Es, which was written in end of 1st cent., and are embodied in the Mishna, committed to writing by R. Judah I. about A.D. 200. Breathing a spirit of intense patriotism, the book soon became popular with the Jews, and its annual reading in the synagogue was accompanied with lively tokens of sympathy on the part of the congregation, while the reader pronounced the names of Haman's 10 sons in one breath to indicate that they all expired at the same moment, the names being written by the scribes in large letters in 3 perpendicular lines of 3, 3, 4 to signify that the 10 men were hung on 3 parallel cords. Although the last of the 5 *Megilloth* or *Rolls* which were read at 5 different feasts,† it came to be known as the *Roll* (*Megillah*) *par excellence*, and we may judge of the honour in which it was held from a saying of Maimonides (Carpzov, *Intr.* xx. § 6), that in the days of the Messiah the only Scriptures left would be the Law and the Roll. The excessive love which the Jews

* The name of God is never mentioned in it, but the king of Persia 187 times, and his kingdom 28 times; while the nearest approach to any recognition of religion is to be found in the fasting of 4¹⁶, and possibly also in the confidence expressed in 4¹⁴.

† The order is different in the Eng. Bible, as also in the Sept and Vulg., where Est closes the historical books.

have ever shown for this book (of which Ewald has said that in passing to it from the other books of the OT 'we fall, as it were, from heaven to earth') illustrates their complete surrender to the spirit of the age in which it was produced. It was an age that had fallen out of sympathy with the teaching of the prophets, and was unprepared for the spiritual conception of the gospel,—when national pride and a certain faith in their own fortunes as a people, with a disposition to make the most of their heathen masters by the use of such worldly wisdom as they possessed, seem to have formed the chief characteristics of those who still claimed to be God's people.

In the Christian Church the book has naturally been less esteemed. It is one of the few books of the OT that are not quoted in the NT (nor in Philo). It has no place in the Canon of Melito of Sardis, who had made careful inquiry among the Jews of Syria regarding the books of the OT; of Theodore of Mopsuestia (followed by the Nestorians); of Athanasius, who put it in the second rank among the *ἀναγινωσκόμενα*; of Amphilochius, who mentions that 'some add the Book of Esther'; of Gregory of Naz., and others. Julinius in the 6th cent. mentions that there were grave doubts on the subject in his day; while Luther, after referring to 2 Mac, says (*Tischreden*), 'I have so little favour for this book and the Book of Est that I wish they did not exist; they are too Judaizing, and contain many heathenish improprieties.' In some of these cases, however, it may have been the corrupt Sept. transl. that caused suspicion, while in others it is possible that Est may be included under the name of Ezra or some other book. Est is recognized as canonical by Origen, Cyril of Jerus., Jerome (who puts it last in the list), Augustine, and others. We may also reckon it an indirect testimony to the authority of the book in the beginning of the Christian era, that, according to 2 Mac (15³⁶), 'Mordecai's day' (*ἡμέρα Μαρδοχαϊκή*), doubtless the Feast of Purim, was observed in the writer's lifetime. The fact that it has a place (in an enlarged form) in the Sept., with an epilogue stating that the tr. was brought (to Alexandria) by one Dositheus in the 4th year of Ptolemy and Cleopatra, is regarded by some as a proof that the book existed in its Gr. form as early as B.C. 178, in the reign of Ptolemy VI. (Philometor), who was friendly to the Jews. But there were two later kings of that name, and one earlier (B.C. 204-81), whose wives were called Cleopatra; and the inference is doubtful, even admitting the authenticity of the statement in question (Riehm, *HWB*; Fritzsche, *Handb. z. d. Apocr. i.*). While the Heb. text is good, there are large interpolations in the Sept., of which there are two different texts, A and B, the latter, according to Lagarde, Field, etc., being an improved recension of the 3rd cent. These interpolations contradict the Heb. in several particulars,* and betray their later Gr. origin by representing Haman as a Macedonian who sought to transfer the sovereignty from the Persians to the Macedonians (16¹⁰⁻¹²), and by other inconsistencies and anachronisms,† and were, no doubt, the work of successive Hellenistic writers desirous to give a religious character to the book,‡ and to supplement other apparent defects.§ In the Vulg. these additions are all put by Jerome at the end of the book, beginning with a portion that takes up the narrative where the Heb. ends—with notes to show where the other additions occur in the Sept.

* Cf. 2²¹ and Ad. Est 11²⁷, 6³ and 12⁵, 31. 5 and 12⁶, 91² and 15¹⁸.
† For example, 'month Adar' 16²⁰, 'chosen people' 16²¹, 'Hades' 13⁷, 'I am thy brother' 15⁹, 'Aman's table,' 'drink-offerings' 14¹⁷.

‡ Ad. Est 10⁹, 10. 11. 12. 13. 11¹⁰ 13⁹⁻¹³ 14³⁻⁹ 15²³ 16⁴, 16.

§ For example, by giving the terms of the royal edicts, which are not at all Oriental in style, 13¹⁻⁷ 16.

In the RV Eng. Apocr. (where they are similarly combined under the name of 'The Rest of the Chapters of the Bk. of Esther') these explanations are given in the margin.

Owing to the influence of the Sept. and Vulg. (in the Syr. they have no place) the additions were often read in church, and even regarded as canonical (in common with other Apocr. books of OT), receiving the sanction of several Ch. Councils, from that of Carthage in 397 to the Council of Trent in 1546. They are composed of the following passages—the twofold references showing where they stand in the Sept. and the Rest of Est respectively:—(1) Mordecai's pedigree, dream, and detection of conspiracy, with his immediate reward, exciting Haman's wrath (Intr.; 12^{2-12⁸}). (2) Terms of the king's writ, authorizing the destruction of the Jews (after 3¹³ 13¹⁻⁷). (3) Prayers of Mordecai and Est (after 4; 13^{8-14³}). (4) Fuller account of Est's first intercession with the king (in place of 5. 2 15). (5) Terms of the king's writ, authorizing the Jews to defend themselves (after 8¹³ 16). (6) Mordecai's devout interpretation of his dream in the light of events, and his permanent institution of the Feast of Purim, followed by epilogue regarding the Gr. tr. (End.; 10⁴⁻¹³ 11¹). In Josephus we can trace other additions to the story not found in the Sept., which shows the popularity of the subject, and the tendency to embroider the Heb. narrative with Alex. inventions. Similar embellishments are to be found in the 'first' and 'second' Chaldee Targums or commentaries, independent of the Gr. additions, which only found their way into the Midrashim at a much later time through the medium of the writings ascribed to Josipon ben-Gorion (*Zunz, Gottesdienstliche Vorträge*; Fritzsche, *as above*).

II. HISTORICITY.—On this subject the most diverse opinions have been held. Many old and a few modern writers* maintain the narrative to be thoroughly historical. But an increasing number † hold it to be more or less a work of imagination; while some ‡ regard it as a poetical invention, having no appreciable basis of fact to rest on.

The following are the principal arguments for the historical character of the book.—(1) The narrative claims to be historical, referring more than once to 'the chronicles' of Persia as containing a record of the events in question (10² 2²³ 6¹); and its admission to the Pal. Canon, notwithstanding the absence of any allusion to the Holy Land or to Jewish ordinances, is so far a confirmation of its claim. (2) The Feast of Purim, with which it was so closely connected as to be known among Alex. writers as 'the Epistle of Purim,' and which, in the time of Jos. (*Ant.* XI. vi. 13) was observed by Jews in all parts of the world, is a standing memorial of the remarkable episode in Jewish history which the book records. (3) Its lifelike representation of Pers. manners and customs, especially in connexion with the palace at Susa (1³, 10, 14 2⁹, 21, 23 3⁷, 12, 13 4⁶, 11 5⁴ 8³), is borne out by the results of modern travel and research (Rawlinson's *Anc. Monarchies*, iv. pp. 269-287; Morier, Fergusson, Loftus, Dieulafoy), and finds support in Herodotus and other ancient writers. (4) The conduct of Ahasuerus is in harmony with the vain, capricious, passionate character of Xerxes (the identification of the two names was the first result obtained from the deciphering of the cuneiform inscriptions by Grotefend in 1802), as depicted by heathen writers (Herod. vii. ix.; Æsch. *Pers.* 467 ff.; Juv. x. 174-187); and this may account for some things in the narrative that would otherwise seem almost incredible. (5) It appears from

Herod. vii. 8 that Xerxes held a great council of war in the third year of his reign before setting out for Greece, and that he returned to Susa in the spring of his seventh year,—which agrees with the dates assigned to the great feast and the choice of a successor to Vashti (1³ 2¹⁶). (6) Although the narrative is minute and circumstantial, containing many names (of courtiers, princes, 10 sons of Haman, etc., 1¹⁰, 1¹⁴ 9⁷⁻⁹) as well as other details, it is remarkably free from literary and historical discrepancies, such as have been detected in the Apocr. books of To and Jth and Ad. Est. According to Oppert, there is not a single proper name that may not be regarded as belonging to the idiom of Cyrus and of Darius, and after the conquests of Alexander such writing was philologically impossible. (7) The silence of contemporary and later writings regarding the events narrated in the Bk. of Est is partly due to the disappearance of literature bearing on the history of Persia, and partly to the interest of Herodotus and Ctesias being centred in the points of contact between Persia and Greece. As for the Bk. of Ezra, it leaves the period from B.C. 516 to 459 (between chs. 6 and 7) a blank, except in 4⁵⁻⁶.

On the other hand, the following are the chief objections that have been taken to the historicity of the book. (1) The story bears on the face of it the appearance of a historical romance, a number of its features being in themselves extremely improbable, e.g. the six months' feast, involving such prolonged absence of the governors from their duties in the provinces; the summons of Vashti before the assembled peoples and princes, and the subsequent decree, suggested by 'the wise men,' that every man should bear rule in his own house, which would have been the publication of Ahasuerus' folly; the long interval before the choice of Vashti's successor; the decree for the wholesale massacre of the Jews (not excepting those in Judæa, and numbering probably two millions) on account of the obstinacy of a single Jew; the publication of this decree eleven months before the time for its execution; the issue of a subsequent decree virtually sanctioning civil war; the immense slaughter of the Persians notwithstanding their superiority in numbers, and the wonderful preservation of Jewish lives, as well as the absence of revenge on the part of the Persians; the institution by Mordecai and E. of a feast that would perpetuate the disgrace of the sovereign in the eyes of his subjects, and embitter the relations between Jew and Persian (but cf. the annual commemoration of the massacre of the Magians, Herod. iii. 79—with which Niebuhr was disposed to connect the story). Add to this that the series of coincidences and contrasts culminating in the overthrow of Haman 'the Agagite' (1 S 15—but Oppert connects this name with Agaz, a tribe of Media mentioned in the inscriptions of Sargon) and the exaltation of Mordecai of the tribe of Benjamin, is too perfect to have been drawn from real life. (2) The manifest aim of the writer is to encourage and glorify the Jews; and the whole narrative, which is marked by exaggeration and innuendo, is artfully designed to serve that purpose (2¹⁵, 17, 2² 3², 15 4¹⁴ 6¹⁰, 11, 13 7⁹ 8⁹, 15, 17 9¹⁰ 10). (3) The references to 'the chronicles' may be merely a rhetorical device in imitation of similar allusions in Neh and Ezr (in this connexion it is noteworthy that the terms of the royal edicts are not given); or the sources referred to may be like the Bab.-Pers. chronicles, from which Ctesias professes to have derived information—the story being 'an example of Jewish Haggada founded upon one of those semi-historical tales of which the Pers. chronicles seem to have been full' (Sayce, *HCM* p. 475). (4) A strictly historical interpretation of the nar-

ative is beset with difficulties. Neither Vashti nor Esther can be identified with Amestris, the only queen (judging from Herodotus and Ctesias) that Xerxes ever had. Nor is it easy to reconcile Ahasuerus' and Haman's ignorance of Esther's nationality with the frequent presence of Mordecai (who was known to be a Jew, 3⁴) 'in the king's gate,' and his constant communications with Esther. Moreover, Haman's description of the Jews (3⁸⁻⁹), as 'dispersed among the people in all the provinces of thy kingdom,' and of their disobedience to 'the king's laws,' is not true of the Pers. period (especially so early as the reign of Xerxes), and betrays a Maced.-Greek origin, as does also the stress laid on financial considerations (cf. 9¹⁰), and the part taken against the Jews by 'their enemies' (9⁵, 16, 22). (5) In several respects the writer's knowledge of Pers. customs is alleged to be defective (Grätz in *MGWJ*, Dec. 1886), e.g. the '127 provinces,' cf. the '20 satrapies' of Herod. iii. 89; the command to 'kneel' (כרע) before Haman, an act of worship due to God only and the king, while the refusal to 'do him reverence' by prostration (מחנה=προσκυνών) betrays a Gr. spirit of independence at variance with Gn 23⁷ 33³ (cf. Herod. vii. 136); the un-Oriental toleration so long shown to Mordecai by the vizier; the queen's difficulty of gaining access to the royal presence; the alleged Semitic character of some of the proper names, suspiciously profane, and very few of which occur elsewhere; and Mordecai's obscurity, notwithstanding his officially-recorded services to the king (2²³, cf. Herod. viii. 85). Even admitting the general consistency of the narrative, both with itself and with Pers. surroundings, this is held to be sufficiently accounted for by consummate dramatic skill on the part of the writer, and his possessing such a knowledge of Persia and its ancient régime as was attainable by a Jew who had lived in that country or even in Palestine in the Maced.-Gr. period. (6) The true explanation of the silence of ancient Jewish writers (Ch, Ezr, Neh, Sir, Dn, Philo) as well as of profane writers, is held to lie in the fact that no such facts as those related in the Bk. of Est ever took place. (7) The Heb. of the book, which closely resembles that of Ec, belongs to a much later time than that of Xerxes; and the way in which the writer explains Pers. customs (1¹³ 8⁸) seems to imply that the Pers. rule was over, while his description of Ahasuerus, and of his wide dominions, and the magnificence of his court, gives the impression that he is recalling the glories of a bygone age. (8) In answer to the argument from the Feast of Purim, it is alleged that the story of Est was engrafted on a festival already in vogue among the Jews, borrowed from a Pers. or a Gr. source, for the purpose of promoting its wider observance or imparting to it a more national character; and various attempts have been made to trace it to a definite heathen source. None of these attempts, however (art. PURIM), can be said to be successful, and the connexion of the book with such an ancient Jewish observance still forms a considerable presumption in favour of its being founded on facts. It may be that fresh confirmation of its truth will be found in some of the monumental discoveries which still await the explorer, and that the suspicion attaching to its contents will yet be removed.

III. DATE AND AUTHORSHIP.—The date generally assigned to the book by those who maintain it to be historical is somewhere in the reign of Artaxerxes Longimanus, the successor of Xerxes (B.C. 464-425), or a little later; while most of those who regard the story as more or less of a legend or romance bring its composition down to the Gr. period, say in the 3rd cent. B.C. Hitzig traces its composition (as

well as the introduction of Purim) to the Parthian ascendancy after B.C. 238, and in the description of the Jews in 3^s he finds evidence that it was written subsequently to the colonizing activity of Seleucus Nikator. Others (Reuss, Grätz, Bloch, etc.) give it a still later date, tracing it to the time of the Maccabæan revolt (B.C. 167). Bloch regards it as an attempt to justify the Jewish party at the Gr. court, who thought they could best promote the interests of their country by conciliating the heathen power; but with this it is difficult to reconcile Mordecai's attitude towards Haman, or the slaughter of Pers. women and children and its commemoration. Grätz assigns the book to an adherent of the Maccabæan party, and, with the ingenuity of a special pleader, presents a great array of arguments to prove that Ahasuerus represents Antiochus (with some intentional vagueness as to the identity of Ah. himself), and that the book was intended to appeal to those who, like the deputies to Tyre (2 Mac 4¹⁸⁻²⁰), were disposed to resist the king's attempt to force them into idolatry, although they had very little religion of their own,—hinting at the influences which they might bring to bear upon the king, and at a possible turn in the wheel of fortune,—much as the Bk. of Dn was meant, a year or two later, to tell upon the more devout (Hasidim), who still believed in the possibility of direct divine interpositions. Kuenen and Cornill find in it an echo of the same struggle (cf. 3^s.⁹ and 1 Mac 1⁴¹ 3³⁴.³⁶) after it was over (B.C. 135), when religious heroism had given place to animosity and pride. Similarly, Zunz believes it to have been an Eastern reflex (c. B.C. 130) of the Maccabæan enthusiasm, and lays stress on the lateness and servility of the language, as well as on the want of any recognition of the Jewish community as a whole, Mordecai and Esther being the only Jews who are credited with any influence. But the language, though late, is very far from exhibiting the stage represented by the Mishna;* and as regards the supposed Maccabæan origin for the story, it must be remembered that even under the Pers. rule (Jos. c. Ap. i. 22) there had been times when the Jews suffered persecution for their attachment to their faith. That the book was written by a Persian Jew may fairly be inferred from its tone and structure, notwithstanding Grätz' denial that the use of Heb. for literary purposes was possible outside of Palestine, except during the Bab. Captivity. It is vain, however, to attempt to determine the authorship more particularly. The references to Mordecai's writing in 9²⁰⁻³² have given rise to the idea that he may have been the author; but the peculiarities of the passage, both in language and contents, stamp it as an interpolation or interpolations (vv. 20-28 29-32), perhaps borrowed from another book of Purim (v. 32). Moreover, some of the allusions to Mordecai (e.g. 9³⁴) preclude the idea of his being the writer. All that can be said with confidence is that it was written by a Jew connected with Persia, and full of the nationalist feeling of his time, the absence of religious phraseology being due partly to the decline in the spiritual life of the nation, occasioned by centuries of exposure to heathen influences, leading to reserve in the expression of religious sentiment, partly to the secular character of the Feast of Purim associated with it, which rested on no divine authority, and was marked by a gay conviviality, varied with an occasional outburst of passion that was not favourable to religious solemnity. See further under PURIM.

* At the same time it must be admitted that, even after the Mishna style was formed, books in imitation of the classical style were written, otherwise Ec would have to be placed long after Sirach.

ESTHER (Apocryphal).—See preceding article.

ESYELUS (Ἑσύνλος, Ba^{1b} ἡ σύνολος, AV Syelus) 1 Es 1^s = Jehiel.—One of the rulers of the temple in Josiah's time (2 Ch 35⁸).

ETAM (עֲתָם, possibly 'place of birds of prey,' from עַי 'bird of prey').—It is uncertain whether there may not have been two places so called in Judah. The town Etam (1 Ch 4³.³²) was in Simeon, near Rimmon. It may be the place fortified by Rehoboam (2 Ch 11⁶), though there noticed with Bethlehem and Tekoa. The Rock Etam (Jg 15⁸.¹¹) was Samson's refuge, and had in it a peculiar 'fissure' (ῥῆγῆ) or 'cavern' (AV 'top'). In the Talm. an Etam near Bethlehem is noticed (see Neubauer, *Geog. Talm. s.v.*). These may represent three distinct sites. 1. Etam of Simeon is very clearly the ruin 'Atân near Rimmon of Simeon, on the hills N.W. of Beer-sheba. *SWP* vol. iii. sheet xxiv. 2. Etam near Bethlehem is represented by the present 'Atân 'Atân, at the so-called Pools of Solomon (Rom. reservoirs connected with Pilate's aqueduct to Jerus.), the traditional site of the 'sealed fountain' (Ca 4¹²), identified by the Rabbis with Nephteah. *SWP* vol. iii. sheet xvii. 3. The Rock Etam is an undefined site, but may have been near Samson's home at Zorah. There is a remarkable rocky hill to the E., on which the village Beit 'Atâb now stands, under which is a curious cavern in the rock. The change of B for M is not uncommon (cf. TIMNAH), and this is a possible site for Samson's refuge. *SWP* vol. iii. sheet xvii.

C. R. CONDER.

ETHAN (עֲתָן, LXX Ὀθάν, Ex 13²⁰; Βουθάν, Nu 33⁶.⁷). The Coptic has ἐπεθῶμ, Ex 13²⁰ [Wilkins], and εβουθαί [Wilkins], εβουθῶν [Sah. Ciasca]. LXX and Cop. omit Ethan in Nu 33⁶.—The station at which the Israelites arrived after leaving Succoth. It is described (Ex 13²⁰, Nu 33⁶) as being 'on the edge of the wilderness.' This wilderness (called W. of Etham, Nu 33⁶, and W. of Shur, Ex 15²²) was traversed by the Israelites after crossing the sea. It must therefore be east of the Isthmus of Suez, and Etham would be on its W. edge. If on leaving Egypt the Israelites went along Wady Tumilat [see EXODUS (ROUTE OF), § i.] they would make for the broad tract of dry ground to the N. of Lake Timsah, and the position of Etham would be where their route crossed the Egyp. frontier, i.e. in the neighbourhood of the modern Ismailia. Naville places Etham here, but explains the word as designating the land of Atuma, which is mentioned in the papyrus Anastasi vi. The land of Atuma there mentioned is generally supposed to be the land of Edom. See PIHAHIROTH and the Literature under EXODUS (ROUTE OF), § ii. [Brugsch's 'Exodus and the Egyptian Monuments' may be read in English in vol. ii. of the translation (1879) of his *Egypt under the Pharaohs*, or in New Ed. (1891, in one vol.) p. 318 ff.] A. T. CHAPMAN.

ETHAN (עֲתָן).—1. 'THE EZRAHITE' of 1 K 4¹⁰

and Ps 89 (title). In the first of these passages he is mentioned along with other contemporaries (?) of Solomon, who were all surpassed in wisdom by the Jewish monarch. In 1 Ch 2⁹ he is said to have been a Judæan of the family of *Zerah*, which is prob. another form of *Ezrah* (hence the patronymic *Ezrahite*). Instead of 'the Ezrahite' it has been proposed to render עֲרָאִים of 1 K 4³¹ 'the native,' i.e. the *Israelite*, in opposition to some of the other wise men named, who were *foreigners* (Cheyne, *Job and Solomon*, p. 131). The ascribing of Ps 89 to E. occasioned one of the curiosities of Rabbinical exegesis. עֲרָאִים was connected with עֲרָא (the east), then 'the man from the east' of Is 41² was interpreted of Abraham, and Ethan the Ezrahite was identified with the patriarch, who thus became the author of the psalm (Driver, *LOT* p. xxxiii, n.). 2. An ancestor of Asaph (1 Ch 6⁴²). In v. 21 he is called Joah. 3. The eponymous ancestor of a guild of temple-singers (mentioned along with Heman and Asaph in 1 Ch 6⁴⁴ 15^{17, 19} etc.). His genealogy is traced by the Chronicler back to Merari, one of the sons of Levi. He is generally identified with Jeduthun. (See JEDUTHUN.) J. A. SELBIE.

ETHANIM (עֲתָנִים, Ἀθαμείν B, Ἀθαεῖν A, *Ethanim*, 1 K 8²). See TIME.

ETHANUS, one of the 'swift scribes' who wrote to the dictation of Ezra (2 Es 14²⁴). The name occurs in the MSS variously as Ecanus, Echanus, Elkana, etc.

ETHBAAL (עֲתֵבָאֵל 'with Baal,' i.e. enjoying his favour and protection; Ἴεθεβάαλ B, Ἴαβάαλ A, Ἴεθβάαλ Luc.).—King of the Sidonians, and father of Jezebel wife of Ahab king of Israel (1 K 16³¹).

According to Jos., Itobaal (Ἴθόβαλος, Εἰθώβαλος, i.e. עֲתֵבָאֵל 'Baal is with him,' a form of the name preferred by Thenius, Stade, etc.) was king of the Tyrians and Sidonians (*Ant.* VIII. xiii. 1), and is stated by Menander the Ephesian to have been a priest of Astarte who attained to the throne by the murder of the usurper Phelles (*C. Ap.* i. 18). This identification with the Ethbaal of K is allowed by moderns. The Taylor cylinder, col. ii. 48, mentions a later king of Sidon of the same name; Assy. *Tuba'lu* (Schrader, *COT*, on Gn 10¹⁵).

C. F. BURNEY.

ETHER (אֶתֶר), Jos 15⁴² 19⁷.—A town of Judah noticed with Libnah, apparently near the plain of Philistia, given to Simeon, and near Rimmon. The site is unknown.

ETHICS.—The treatment of this subject is involved in a certain amount of difficulty, from the fact that while the ethical character of the whole Jewish dispensation is strongly and unmistakably marked, there is no ethical system, strictly so called, in the Bible at all. The ethical ideas, like the metaphysical ideas, underlie the histories, the prophecies, the legislation, and the writings of the apostles; they are not deduced or criticised, but assumed as premises. For such a purpose as that of the present article they have to be extracted and presented systematically; and there is always danger that when this is done some greater precision of definition may be given to the ideas than they really possessed.

There is another difficulty, even greater than this, which arises from the critical discussions recently raised over the authorship and date of books. This presses more hardly on the student of OT ideas than of Christianity. For even if the date of individual books of the NT be uncertain, the margin of uncertainty is comparatively narrow; and the period within which they all must fall is, comparatively speaking, a short one. Hence

critical questions may be neglected without any serious loss. But with the OT it is different. We can no longer take for granted the traditional order or date of the books; and, what is much more serious, the period within which they must all have been written is a very long one, so that it would be unreasonable to expect that the ethical point of view can have suffered no serious change. It is obviously impossible to discuss the various critical questions by the way. We can only call attention to the part they play in the whole discussion of our present subject, and then leave them aside. The plan of the present article is, then, to set forth the ethical ideas in the Bible, as far as possible, without reference to the literary history of the books, following such order as the subject itself seems to require.

I. IN THE OT AND APOCRYPHA.—The first point requiring attention is one of great importance, which will have decisive significance in regard to our whole subject-matter. With the partial exception (considered later) of the Sapiential Books, the whole of the Jewish Scriptures are *under the sway of religion*. The ruling idea of life was conditioned by the prevalent conception of God, and the peculiar relation in which the Jewish people stood towards Him. Hence the larger portion of the discussions with which other ethical writings have made us familiar, has no place whatever in Jewish literature. Greek ethical speculation busied itself with the questions of the end of life, or the ideal order of life, or the nature of virtue, or the sanction of the moral law. But to the Jewish mind all these questions were prejudged by the peculiarly close relation of religion with life. The God they worshipped was to the Jews the source and the sanction of the moral law. Their moral evolution consisted in their gradual discovery of the full meaning of their primary ethical conviction. Their notion of the content of the ethical idea varied as time went on; their history is, in a sense, reflected in their ethical evolution. Things which at one time were thought compatible with the due worship of God, cease to be thought so; but the general relation in which they stand to God remains undisturbed: morality is, to them, the embodied will of God.

It follows necessarily from this that there are, roughly speaking, two, and only two, questions for the Jewish moralists. (1) What conduct does God command? (2) What conduct does God forbid? Why He ordains or prohibits one or another line of conduct does not matter to them. They are concerned only with the fact. The answers to these remoter questions may, to some extent, be revealed in the process of moral evolution, but they are not of primary interest or importance. The central question is that of the actual content of the divine law.

It might seem, at first sight, as if this theory of the moral law must exclude a people from any marked development in ethical matters. The most cursory glance, however, at the actual facts would destroy this supposition. The law of God is adapted to various stages in the progress of the people, and enforces the morality characteristic of the stage at which they are. It is obvious that this must necessarily have been the case. If, as the Jews believed, God Himself revealed the moral law to them, it must necessarily have been in terms which they could understand. It would have been idle, for instance, to promulgate to a nation, as yet only in the tribal stage of its existence, a law which assumed the existence of settled civic ideas. Thus the conviction of the special union of God with His people, and interest in their moral life, affects the character of the evolu-

tion of ethical ideas, but does not prevent their real growth.

(A) *The Pentateuch and the Historical Books.*—The note of law is struck in the account of *Paradise and the Fall*. In this story we have all the elements of the ethical idea as it presented itself to the Jews. God gave a command which man disobeyed. In like manner the sin which led to the Flood was disobedience or rebellion against God. The law of murder, enacted after the Flood has disappeared, is given as a definite act of legislation on the part of God (Gn 9⁴⁻⁷). In the same way the sin of Sodom is represented as an outrage upon God; and the destruction of the cities as the judgment of God. When we reach the *times of Abraham* the same phenomena appear in a more complex form. The intercourse between God and man, of which the covenant after the Flood was typical, is concentrated and intensified in the relation of God with Abraham. A demand is made for a more complete and detailed obedience; and the rite of circumcision has a special significance assigned to it. The special covenant is based on the readiness of Abraham to accept the guidance of God; cf. Gn 17¹⁻². 'The LORD appeared to Abram, and said unto him, I am God Almighty: walk before me, and be thou perfect. And I will make my covenant between me and thee, and will multiply thee exceedingly.' The same idea of a covenant is sustained throughout the whole history between Abraham and Moses; the people are regarded as standing in a peculiar relation to God, and bound by it to certain lines of conduct. The protection and interest of God in the chosen family is represented as a thing which they are bound to cherish with the greatest care, and it is implied throughout that the arrangement is part of a larger scheme. The sin of Esau consists in the neglect of this covenanted right of access to God; and the blessing of Jacob consists in his fitness to be the vehicle of the covenant-relation, rather than in any commendation bestowed upon his own character.

Whatever may be the literary history of the books in which this story is preserved, there is no doubt that it represents the belief of the Jewish people, and, that being so, it characterized their ethical ideas. But it is important to notice also the area of moral action covered by the commands of God. We have already noticed the prohibition of murder, and the condemnation of Sodom. Apart from these, the morality consistent with the stage of civilization so far attained is implicitly permitted. There is no condemnation of polygamy; the fraud of Abraham upon Abimelech is not condemned, though its uselessness is displayed by the action of God; and, in like manner, Jacob's fraud upon Isaac is shown to be unprofitable by the fact of his exile. At the same time the witness of God is sought in order to preserve the validity of treaties (Gn 26^{27ff.}), and His worship is regarded as distinct from that of many other deities. There is little sign at present of any elaborate moral reform depending on the covenant-relation; and the morality of the people as it is described is strictly governed by principles which prevail in the patriarchal stage. What is new and has the germs of much of the future development in it, is the intensification of the idea of the tribal God. The relation asserted between God and the family of Abraham is peculiarly close and far-reaching in its character; and the ground is prepared for the substitution of a moral for a physical or tribal basis of the covenant.

The next stage in the history as it is presented in the OT books is marked by *the Levitical legislation*. It is here, probably, that the difficulties caused by critical discussions reach their highest

point. In pursuance of our plan we shall describe, first, the facts of the legislation as they stand, and reserve such discussion as there is space for, of the bearing of criticism upon the matter. Under the head of the Mosaic legislation we have to consider the Decalogue, the Priestly Code, and the Deuteronomic exposition of the Mosaic law. This will involve a brief consideration of the meaning and character of Sacrifice, and the meaning of Sin.

Of the *Decalogue* it is not necessary to say much. We need only call attention to the fact that it consists of two distinct parts: one containing prohibitions concerning man's relations to God, the other dealing more directly with ordinary social questions. The Decalogue throws comparatively little light on the condition of society at the time of its promulgation. It deals with acts forbidden before, such as murder and idolatry; but its last three sections imply the existence of a settled mode of life different from that of the patriarchal family. Theft, false witness, and covetous desire belong to a social state in which there existed within the social whole various houses or families holding property. The process of *ενοικισμός* must have taken place; but beyond this there is nothing that can be said definitely. It is, however, important to notice that the commandments come with the *imprimatur* of God upon them, and that the covenant-relation is alluded to in the prefatory verse as it stands in Ex 20²: 'I am the LORD thy God, which brought thee out of the land of Egypt, out of the house of bondage.'

The *Priestly Code* consists of a number of regulations which are largely ceremonial in character. The laws of ceremonial uncleanness and other kindred matters are precisely defined: the great occasions of the ecclesiastical year are ordained, and the ritual due to them established. Further, the various types of sacrifice are described, the occasions on which they are to be performed, and the method of performing them. In regard to the whole of this legislation, we need only for our present purpose to call attention to two points. In the first place, it is important to observe that the whole order is rested upon the covenant-relation with God, and, more than this, that the character of God is placed in definite connexion with the rules laid down. The holiness of God requires this elaborate ceremonial order to preserve it from the contamination of hasty and unfit intruders, and to retain the condition of the people at a level high enough to enable them to use their covenant privileges. This is proved by the refrain which recurs at intervals in the course of Leviticus—'I am the LORD'; and by such marked phrases as the following: 'Ye shall not profane my holy name; but I will be hallowed among the children of Israel; I am the LORD which hallow you, that brought you out of the land of Egypt to be your God; I am the LORD' (Lv 22^{32, 33}). But, in the second place, it is no less important to notice the extraordinarily limited moral range of the laws enacted. In Lv 6 there is a short list of moral delinquencies which require the atonement of a guilt offering. These consist chiefly of broken pledge and other forms of dishonest dealing. Besides this there are sacrifices ordained for sins of ignorance: 'If any one shall sin unwittingly, in any of the things which the LORD hath commanded not to be done, and shall do any one of them; and if the anointed priest shall sin so as to bring guilt upon the people' (Lv 4²⁻³). If we are justified in referring this command to the legislation which appears in Exodus, it will include a certain number of other moral delinquencies. Thus, besides the Decalogue, there are regulations concerning assault and murder, the proper treatment of slaves, the

relations of parents and children, and specially concerning idol-worship and magic. Besides these there are ordinances referring to lost property; the duty of actively aiding the restoration of straying animals is inculcated; the poor are remembered, and severe condemnations passed upon those who judge unjustly. The service for the Day of Atonement is placed in close connexion with the unwarranted intrusion of the sons of Aaron into the presence of the Lord (Lv 16¹), and is apparently intended to do away with ceremonial breaches of the covenant-relation, though the ritual would lend itself easily to a deeper meaning. See ATONEMENT (DAY OF).

The legislation in the Book of *Deuteronomy*, as it stands at present, covers a good deal of the ground of the preceding books. It repeats and further develops laws elsewhere laid down. There is the same rigorous condemnation of idolatry, the same care for justice and equality between man and man, and the like. But there is a more pronounced insistence on the moral character of God, and the close relation of God to the people in view of His moral character. He is represented as demanding exclusive worship, but as being faithful and long-suffering (Dt 7⁹), caring not only for the people of His choice, but also in a special degree for the fatherless and stranger. The characteristic feature of Dt is that which it is now the fashion to call its *parenthetic* tone; it goes so far, indeed, as to find a spiritual meaning for circumcision as opposed to that which is purely ceremonial. Moreover, the relation of the people to God is presented in a more spiritual manner: the 'first great commandment of the law,' 'Thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy mind,' is in Dt 6⁵.*

It has seemed hardly consistent with the subject of the present article to go into any preciseness of detail as regards the Pent. legislation. Enough, however, has been said to establish the truth of the position maintained at the outset, that morality for the Jew meant that which God had commanded; immorality, that which God forbade. It is obvious that the Bk. of Dt takes a slightly different view of moral life from that which is expounded in Lv. The laws concerning the functions of judges (12^{18, 20}), the kingly office (17¹⁴⁻²⁰), the single central shrine, and the killing of animals for food (12¹⁵), clearly contemplate, either in fact or in anticipation, the position of a settled nation. Similar cases might be quoted from the earlier books. But whereas in Lv the largest portion of the book concerns the ritual order in the land of Canaan, the Bk. of Dt is chiefly concerned with the religious effect upon the people.

One fact, however, is noticeable about all the books alike, and that is the highly archaic character of the regulations themselves. The law and the ritual of sacrifice, the importance given to ceremonial pollution, the practices connected with the avenger of blood, the use of the *lex talionis*, the levirate law of marriage, the use of the ordeal, are all of them archaic in character, and must have survived into later Judaism out of an archaic state of society. As in other cases upon which anthropology has thrown much light, practices have survived after their primary meaning has been lost. It is therefore reasonable to suppose that the evolution of ethics among the Jews followed something like the same course as among other progressive nations. Having been first expressed in terms analogous to those of early humanity all the world over, the distinctively moral elements were disentangled from the mass of rudimentary ideas, and took their place as the ruling principles of the religious polity of Judaea. It has sometimes been maintained that the elaborate ceremonial is a subsequent development to the more spiritual attitude of Deuteronomy. This is surely inconsistent with the teaching of anthropology. The more spiritual conceptions rise naturally out of the less spiritual; the moral truth breaks loose from the half-savage practice in which it was enshrined. It is almost inconceivable that this order should be reversed; and that the mind of the nation should have passed from a lofty spiritual conception of life to

one that belongs by natural association to minds largely buried in matter. The characteristic note of this legislation is that God takes command over life as a whole, and, while the actual condition of the people is left unaltered, the way is prepared for further progress. The fundamental ideas as to right and wrong and the proper means of communicating with the national God are left unmodified; but practices are condemned which degrade and materialize the life of the nation and its conceptions of God.*

It has often been observed that the indications of the operation of the Levitical law are rare, if not altogether non-existent, in the historical books. It is certainly true that the supremacy of the sanctuary at Shiloh, and then later at Jerus., falls considerably short of the unique sanctity ascribed in the law to the central shrine of J^h. Further, there are no records of the celebration of the legal feasts till the time of the later kings. It is plain that the worship of J^h had not established its hold upon the common people; they are continually liable to defections to the gods of neighbouring races. Moreover, the unity of the people is hardly attained; there are obviously differences of opinion and interest between various tribes. These facts and others like them have been quoted, reasonably enough, as bearing on the literary history of the books of the law. They do not affect what has been said above as to the archaic character of many of the legal enactments. And we may say even more than this. The records contained in the historical books are the records of a people emerging from the tribal state into that of national life. The assumptions of such a state of things underlie the action of Jael: they are displayed in the wars of extermination which form a somewhat repellent feature (to modern eyes) in the history of the invasion of Canaan, and in Samuel's denunciation of the Amalekites; they appear in the attitude of the Jews towards the gods of the neighbouring tribes, still more noticeably in such a story as that of the Levite and his concubine (Jg 19. 20), or that of Micah the Ephraimite (*ib.* 17. 18).

The means by which the change is effected is, to a large extent, the institution of the *Kingship*. It is this that prevents the separate action of the separate tribes, and develops the idea of a justice which is due to an individual, as opposed to the tribal notion according to which the tribe, not the individual, is the unit. At the same time it is clear that J^h is regarded as the protector of moral rights. David, for instance, commends Abigail for preserving him from the sin against the Lord that reckless vengeance implies (1 S 25^{27A}). The eating of blood is a sin against J^h (1 S 14³³); there is, to use a modern phrase, a taboo upon the shew-bread offered to J^h;† and other cases might be quoted showing that, though evidence is lacking for a complete ecclesiastical organization, such as is described in the Pent., much of the legislation embodied therein (and therefore the morality implied by it) dates from a time in which these social ideas prevailed.

(B) *The Prophetical Literature.*—We must now turn to the prophets and endeavour to estimate the importance of their work in the ethical development of Israel. They are rightly identified with the higher moral progress of the people; but it is necessary in dealing with them, more even than with any of the other OT authors, to remember that their writings are occasional and not systematic. They deal with the condition of the people as it appears to them, they comment on the vices which arrest their attention, and they give special weight to the effect of these lines of conduct on the field of politics.

* Cf. Lv 18²⁴ 20¹⁻⁶, Dt 12²⁻⁵ etc.

† It is not accurate to say, with Wellhausen (*Proleg.* p. 131, Eng. tr.), that there is no distinction between holy and unholy in the matter of the shew-bread.

* The second, 'Thou shalt love thy neighbour as thyself, occurs in Lv 19¹⁸.

The cycle of ideas in which the prophets move is much the same in outline, though of course some speak more precisely and fully than others.

(a) The most conspicuous feature in their moral doctrine is their sense of the union of the nation with God, and the interest of God in the moral development of men. Condemnations of idolatry and of all forms of defection from the proper allegiance to God are frequent in the prophetic books. The nation is described under the figure of a bride, bound by the marriage-tie to J', and continually breaking it. This appears in Is, Jer, Ezk, Hos; it will not be necessary to quote passages in illustration of so familiar a phrase. The practices most frequently condemned are unrighteous judgment, oppression of the poor, and various forms of luxury and extravagance, especially drunkenness. These do not take us much beyond the ideas which appear in the earliest legislation. The development is to be found rather in the application of the ideas which have already prevailed, and in the appearance of some of the problems which necessarily belong to moral life. Thus the theory of evil receives some consideration. We have seen that the ceremonial legislation referred largely to ceremonial pollutions. It may possibly have been due to this association that the presence of evil was treated as a taint which affected others besides the actual sinner. On the other hand, holiness or righteousness was also regarded as a state which was effectual as a preservation against judgment. Thus in Abraham's colloquy with God (Gn 18) the presence of righteous persons is admitted as a reason for suspending the destruction of Sodom and Gomorrah. There is, of course, a real moral difficulty contained in this doctrine. It must be remembered that evil is inseparably connected by the Jews with acts of rebellion, i.e. with individual self-will and disobedience. If, therefore, others who have not taken part in the sin are involved in its consequences, it is obvious that a serious question must be raised as to the definition of responsibility, and the relation of responsibility to guilt. We find in Is a sense of the polluting effect of the presence of evil. Thus in the account of his call to the prophetic work (6⁵) he says: 'Woe is me, for I am undone; because I am a man of unclean lips, and I dwell among a people of unclean lips.' Isaiah expresses the general effect of evil in the people, and acknowledges its influence upon himself. It is, further, a general doctrine of the OT that the guilt of sin extends to those who are connected with the sinner, as is expressed in the second commandment. These ideas give rise to several lines of moral speculation. In the first place, the sense of individual responsibility is greatly strengthened, so that we find in Ezk a definite restriction or correction of the principle laid down in the Decalogue. Thus (ch. 18²⁰), 'The soul that sinneth, it shall die: the son shall not bear the iniquity of the father, neither shall the father bear the iniquity of the son; the righteousness of the righteous shall be upon him, and the wickedness of the wicked shall be upon him.' This position is carried out on the side of virtue also; the presence even of the three men, Noah, Daniel, and Job, shall not avail to suspend judgment upon a sinful city (Ezk 14¹²⁻²²), nor shall righteousness at one time prevent judgment if a soul relapse into wickedness (Ezk 33^{10ff.}). Responsibility belongs to the individual soul for actual things done, and for nothing else.

On the other hand, the prevalence of evil and the uncertain incidence of affliction absolutely prevent the adoption of the view that each man is punished simply for his own sins. Evil enters far too deeply into the constitution of things to be

explained on these terms. Hence we find in Is and elsewhere the view expressed that God works through evil, and leads men to higher things. This notion is involved in the idea of *visitation*; it gives meaning to the metaphor of the *refining fire*; and it expresses itself in the doctrine of the faithful remnant. These are they on whom suffering and trouble have done their proper work; they have learnt the lessons which God was teaching them. This conception reaches a climax in Is 53. The boldness in language, which is so characteristic of the prophets, is nowhere more noticeable than in some isolated statements to be found on the subject of evil. Not content with describing the probationary functions of it in the divine order, both Amos and Deutero-Isaiah speak of it as the direct effect of God's action. 'Shall evil befall a city, and the Lord hath not done it?' Am 3⁶. 'I form the light, and create darkness; I make peace, and create evil; I am the Lord that doeth all these things,' Is 45⁷. These passages, in which 'evil' has not the moral sense but = 'calamity,' 'misfortune,' are not inconsistent with the condemnation of sin ascribed to God, and with His character as elsewhere described. Their real aim is to express in the sharpest form the absolute supremacy of God over the whole course of things.

(b) A second point in regard to which the prophetic attitude is fairly consistent is the contrast between ceremonial performance and real morality. The emphasis laid by the prophets upon the moral law, the growing sense of the holiness of God, the comparative lack of moral reference in the ceremonial legislation, are factors in this development. Sacrifice in various parts of the world has tended to pass from an act of communion into an act of commerce. Instead of being a means of reopening intercourse that had in some way become suspended, it is a process of barter by which something valuable is given up or destroyed in order to secure some gain. Further, the tendency to polytheism—so rife in Palestine during the time of the kings—rests upon an assumption that it is worth while to make friends with a variety of gods in hopes of benefits to be received from them. This theory, as well as the other, is inconsistent alike with the ceremonial law as we now read it, and with the prophetic doctrine of God. In proportion, therefore, as the sense of moral conditions to communion with God prevailed over every other, it became necessary to insist on the inadequacy of sacrifice in itself as a means of religious approach. This law is a common subject of the declamation of the prophets. We find it in Is (1¹⁰⁻¹⁷), Jer (6^{19, 20} etc.), Hos (2¹¹ 6⁶), Am (ch. 6), Mic (ch. 2), Zec (7⁹), and many other places, and in a most elaborate form in II Is (58). In all these, the close relation of J' to His people, their sinfulness and His hatred of sin, are the basal assumptions. It is the sense of the failure of material means of intercourse, and the difficulty of the more spiritual view of moral life, that gives force to the whole doctrine of salvation. The moral character of God was itself an assertion that evil was not final. If the means at hand of getting rid of it were inadequate, God Himself must take measures to remove it. The one thing certain is that it cannot remain unmodified; the holiness of God forbids this. Hence we find God continually represented as longing to pardon—rising up early and sending His prophets—that men may come back to their allegiance, and realize the blessings of the covenant-union. The two ideas are here held together—the separation from God caused by sin—the prospect of forgiveness from the side of God. It would take us into the region of theology, pure and simple, if we discussed this matter further; but it is impossible to avoid reference to

it, as it is the characteristic feature of the ethics of the prophets, and is perhaps an inevitable result of the peculiarly theological tone of the ethical thought of Israel.

It has already been observed that the ordinary list of virtues and vices in the prophets falls roughly under the same heads as those in the law. They are vices or virtues connected with the intercourse of man with man; in other words, they are political rather than ethical, in the narrower sense. They belong to the political activity of the prophets, and express their influence upon the ordinary life of the State.

There are, besides these, certain other conditions mentioned from time to time which are more purely subjective. Such is the peace which comes to those who are in true union with God, which the wicked can never share. But these are not the most frequent types of virtue. For these and such conditions we must go to the Psalms.

(C) *The Psalms* really require a treatise to themselves to set forth their ethical contents adequately. They have formed men's devotional handbook for century after century; and this, in spite of the fact that they are full of national feeling, and are unmistakably Jewish. There are frequent allusions in them to the situation of the Jewish people in politics or warfare; they must have been written, in many cases, like the prophecies, in close connexion with various political events. Yet their significance is never exhausted. They have the twofold right to perpetuity, that they regard the current history in the light of the permanent principles that underlie all history and all life, and that they present these in the form of the highest poetry. The Psalmists see in the events of their own day the manifestation of the divine laws, and it is often this aspect of them alone which they present. Hence the task of dating the Psalms is no easy one; the particular immediate event is often lost in the sense of the universal laws, the working of which it displays. In this connexion, as before in this article, we must disclaim any intention of discussing or deciding the dates of the individual psalms, and confine ourselves to a general presentation of the moral indications in the book as a whole.

As before in Jewish writings, we have to notice the decisive way in which the character of God is represented as the rule for the character of man. A very striking expression is given to this principle in Ps 18^{25, 26} (RV): 'With the merciful thou wilt show thyself merciful; with the perfect man thou wilt show thyself perfect; with the pure thou wilt show thyself pure; and with the perverse thou wilt show thyself froward.' The reference of all this is put beyond question by the next verse: 'For thou wilt save the afflicted people; but the haughty eyes thou wilt bring down' (cf. Ps 25⁸⁻¹⁰ 97^{10, 11}, and many other passages). Here, therefore, in the most decisive way, the character of God is represented as the moral ideal. If we ask, further, for greater detail in regard to this divine character, we find many points of contact with the books already considered. It is a commonplace throughout the Psalms that God has a fiery hatred of evil. This is especially displayed in a hatred of all forms of oppression. 'For the spoiling of the poor, for the sighing of the needy, now will I arise, saith the LORD' (12⁵). 'Depart from evil, and do good; seek peace, and pursue it. The eyes of the LORD are toward the righteous, and his ears are open unto their cry. . . . The righteous cried, and the LORD heard, and delivered them out of all their troubles. The LORD is nigh unto them that are of a broken heart, and saveth such as be of a contrite spirit' (34¹⁴⁻¹⁶). It is probably this care for the poor that leads, both in the Ps and Dt, to

the condemnation of usury (Ps 15⁵) and of unrighteous judgment (Ps 82 throughout). But the Psalmists take us much further than this condemnation of wickedness. God is represented as a God of loving-kindness—that is, looking with interest and love upon mankind. It is this character which, if the phrase may be used, accounts for and is expressed in the special intimacy between the Lord and His people. 'The earth is full of the loving-kindness of the LORD' (Ps 33⁵): it is 'in the multitude of the loving-kindness' of God that the Psalmist goes to the temple (Ps 5⁷): 'He showeth loving-kindness to his anointed, to David, and to his seed for evermore' (Ps 18⁵⁰). The merciful nature of God shows itself in two directions: in forgiveness and in judgment. The two are not apparently regarded as incompatible. He is full of compassion and gracious, slow to anger and plenteous in mercy (Ps 103⁸). 'If thou, Lord, shouldest mark iniquities, O Lord, who shall stand? But there is forgiveness with thee, that thou mayest be feared' (Ps 130^{3, 4}). At the same time, upon those who work wickedness, the judgment of God falls severely and relentlessly. 'Thou settest them in slippery places; thou castest them down to destruction' (Ps 73¹⁸ etc.).

The character of God as thus described forms the model of the true follower of J^h. His central motive is that of love and adoration to God; but, at the same time, he so far identifies himself with the cause of God that he too burns with anger against the wicked. This is partly the explanation of the tone of unmodified hatred that pervades certain psalms (esp. 69, 109). It is not merely the annoyance of a person whose will is crossed, and who vents himself in petulant cursing of those who stand in his way. It is the wrath of the person who feels that God's cause is attacked through him, and who is persecuted by the powers of evil. Such a condition is no doubt a perilous one; but it is important to observe that these psalms by no means stand alone. The echo of conflict pervades the whole book. The course of this world is largely affected by the presence of sin and unfaithfulness. The followers of God are not by any means in the majority; nor do they always prevail against their enemies. They pass through times of oppression, of menace, of persecution; they are the victims of treachery in the house of friends; they see the ungodly in apparent prosperity, and the holy things of God defiled and insulted. This condition of the world produces the fury against the enemies of God, already mentioned, together with some other remarkable conditions of mind. It is to this—the apparent triumph of the enemy—that we must assign the sense of being forsaken by God Himself which appears in Ps 22; to this also is to be traced the perplexity of mind as regards the providence of God which appears in Ps 73. The moods in which this problem is approached vary greatly. At times it produces deep depression, almost despair; at times it is treated (as in Ps 37) with calm and quiet triumph. But it is important, for it is to the Jewish mind the fundamental problem of ethics, to account for the lack of apparent balance between a man's lot and the life he leads. The idea of the probationary value of suffering appears in some places; but the full discussion of the problem belongs rather to the Sapiential Books than to the Psalms.

It would not, however, be true to suppose that all the evil in the world is due to the action of the enemies of God. There are in many places signs that sinfulness is regarded as a trouble that touches even the good. It erects a barrier between the soul and God which sacrifices and burnt-offerings are powerless to break down. In one place

(Ps 51⁵) it seems to be regarded as affecting the actual birth of men. The man stands in solitary responsibility before God (49⁷ 51⁴); and the essence of sin consists in not having the heart right (78⁸). Together with this sense of incapacity and weakness may be classed the yearning after God which marks Ps 42, and the passionate enthusiasm for the service of God which appears in Pss 119 and 84.

There would be no difficulty in extending largely this account of the ethical features of the Psalms; but the space at our disposal does not permit it. We therefore can only point out here the general character of the whole book. It is essentially a book of reflective devotion. The whole of life is viewed from the point of view of the worship of and intercourse with Jⁿ. It never reaches the point of ethical theory, even in regard to the ethical problem noticed above. The solution, so far as any is offered, is always spiritual and religious, and not philosophical.

(D) *The Sapiential Books.*—It is in these only that we find any definite ethical philosophy among the Jews; and even in these, speculation moves over a restricted area. As in other nations, speculation begins in the proverbial form; the first moral philosophers were men who spoke proverbs. These trace their intellectual lineage to the wise king Solomon, who was wiser than Ethan the Ezrahite, and Heman, and Calcol, and Darda, the sons of Mahol . . . and who spake three thousand proverbs (1 K 4^{31a}). These *proverbs*, if we may judge from the Bk. of Pr as we have it, were of a somewhat utilitarian tone. They started with the assumption that virtue leads to worldly success and happiness; and they dwelt on this relation with various degrees of insistence. They were maxims of ordinary prudence, rather than speculations as to ultimate moral problems, and the religious view of all these questions was somewhat left on one side. Moral practice is still closely allied with the fear of the LORD, but its natural outcome is expected to appear in the form of worldly prosperity. Thus 3⁹⁻¹⁰ 'Honour the LORD with thy substance, and with the first-fruits of all thine increase: so shall thy barns be filled with plenty, and thy fats shall overflow with new wine.' The reflections upon life which fill up the larger portion of the book are also somewhat subdued in enthusiasm, and seem to lack in some degree high moral inspiration. But it must not be supposed that commonplace utilitarian reflections are the sum of the contents of the Sapiential Books. It is to these that we must trace the development of two of the most striking of all the ethical figures of the OT—the Wise Man and the Fool. The wise man is he whose life is orderly and well arranged—the man who follows the law of the LORD. The fool is he who is self-willed and sinful, and whose life therefore lacks principle, and fails to attain success. A large portion of the antitheses in the Bks. of Pr and Sir present the contrasted pictures of these two characters. They are seen in various relations of life; but the essence of the two characters lies in their different relation to the law of the LORD; for the fear of the LORD is the beginning of knowledge (Pr 1⁷, Sir 1⁴⁻²⁰). 'All wisdom is the fear of the LORD, and in all wisdom is the doing of the law' (Sir 19²⁰). The grossest forms of transgression, as well as the less impressive, are regarded as acts of folly (see esp. Pr 7⁸⁻²⁷, and comp. Pr 10⁸, 9 13¹⁶ 14⁸, 9 etc.). It is noticeable that the nature of wisdom and of folly consists, not in an accurate intellectual knowledge of things, but in a prudent or imprudent ordering of life. The wise man shows his wisdom by his right choice, his far-seeing plans, his control of passion, and avoidance of all self-assertion. The

fool is he who does the exact opposite of all these things. See FOOL.

It is this notion of a wise ordering of practical life which reappears in the far more magnificent conception which we owe to these books—of the wisdom of God. This is conceived partly as an attribute of God, partly as a counsellor standing, as it were, by the throne of God. According to the latter view, which appears in some of the finest passages in these books, wisdom was the counsellor and helper of God in the creation of the world (Pr 8, cf. Wis 10, Job 28²⁰ etc.), and has been conspicuously embodied in the law (Sir 24²³). Wisdom is the power that guides the history of man, and has watched over that of the chosen people (cf. Wis 10^{25c}). Hence the previous connexion between morality and wisdom is explained. Man's wisdom consists in following out the embodied wisdom of God in the law.

This particular character of the divine wisdom brings us back to the consideration of the problems which, as has been already pointed out, appear in the Psalms. The problem of the true relation of virtuous action or righteousness is set forth, as in a tragedy, in the Bk. of Job. The author emphasizes the fact that Job was free from all blame in the truest and strictest sense. He bewails his misery—the cruel change of fortune which comes upon him; but in it all 'he sinned not.' He neither rejected the verdict of his conscience, which acquitted him of wrong-doing, nor called in question the supreme justice of God. In this he proves superior to the popular opinion on such matters, as it is represented in the utterances of the friends. And the justification of his attitude is found in the answer of Jⁿ out of the whirlwind, the point of which consists in the assertion of the variety and mysteriousness of the activity of God. The question is not solved by any philosophical formula, but is referred simply to the nature of God Himself.

In the Bk. of Ec we find a much more gloomy point of view. In this case the obscurity of the whole matter presses very hard upon the author's mind. He is impressed with the apparent futility and lack of coherence in the life of man; he can see no purpose served and no object attained by the pursuit of wisdom, or the indulgence of pleasure, or the enjoyment of high place. Everything lies under the doom of vanity; there is no profit under the sun—nothing that endures, and can satisfy man's desire for the enduring. Under these circumstances he approaches the form of ethical thought which, in modern times, is called pessimism. Indeed he only falls short of it in so far as he finds the good of man in the grim adherence to the commandments of God (if Ec 11¹⁸ be genuine).

In both these works the general view of the life of man is closely akin to that which we have had occasion to notice before. It is noted (Job 1⁵) that Job rose up early in the morning and offered burnt-offerings according to the number of them all (*i.e.* his family), 'for Job said, It may be that my sons have sinned, and renounced God in their hearts.' He deemed it necessary to provide against inadvertences of this sort as regards God, and this of course adds to the impression of his complete virtue. In later chapters we find the usual emphasis laid upon the protection of the poor, and the wickedness of oppression (cf. ch. 24. 31¹⁸ etc.), upon purity (ch. 31), and justice (29¹⁶). In like manner, oppression is one of the things which attracts the attention of the preacher (Ec 4¹⁻³), as well as the vanity of the efforts of the righteous, when death comes and cuts short all that he is planning to achieve.

We may now review briefly the drift of this very imperfect sketch of the ethical ideas of the OT.

It seems that the central feature of OT morality is that it is religious; it is grafted on to the national faith and worship. But this must not be taken to imply that the ceremonial order was indissolubly bound up with the moral ideas; the various sacrifices, and the like, are, on the whole, held apart from the definite scheme (so far as there is one traceable) of virtues and vices. It would be truer to say that the ceremonial order and the ethical code are two co-ordinate developments of the one principle—the holiness of J^h. The character of God was the final rule of the life of man, and the archaic details of sacrificial purification were filled with this meaning; the great holiness of God demanded cautious approach. On the other hand, the general impression left upon the mind by the history of the people and the reflections upon their life is one of considerable simplicity. The acts condemned, the ideals commended, belong to a comparatively simple condition of society. Acts of violence and oppression are the chief burden of denunciation; the tendency is manifest to exact usurious interest; and there are some few other forms of sin noticed, such as drunkenness and impurity. But the real depth and value of Jewish moral teaching is found, not in the political or social sphere, but in the religious life. It is in the Psalms and in those passages of the Prophets which come nearest in tone to the Psalms that we find the permanent and supreme value of the Jewish notion of life. Varieties of religious emotion and aspiration such as we find in these forms are possible only to a people whose whole ethical outlook is religious.

II. IN THE NT.—When we pass over into the NT we come into an atmosphere which is in many respects strikingly different from that of the OT. In the first place, the literature covers a comparatively small area in point of time, instead of containing history and tradition from a long series of ages. Hence the type of life and thought, though there are signs of rapid development in it, is much the same throughout. Further, the history in NT describes in fragmentary style a single life, and the results which flowed from its activity. We are not concerned with the history of a people, but of a body that was included in, but claimed to be wider than, the firmly established Roman Empire. Our knowledge of its external history is comparatively slight; the emphasis falls on the development of its mind. Hence, while a large portion of OT requires to be explained out of the political history of the time, the tone of NT is more definitely moral, and deals more positively with the qualities and errors of individual minds; it is ethical rather than political. And once more, the NT stands in much closer relation to our own modern experience than anything in the OT. At the best, it is always difficult to get back to the point of view from which the OT writers spoke and wrote; there is much which it requires careful argumentation to explain at all. But with the NT this is different. In spite of the obvious differences of national character, and the effects of all the history that has happened since, we still feel that we understand and are in sympathy with the ethical attitude of those who wrote the NT books. Indeed, the fact that they seem so little strange is the measure of their effect.

On the other hand, there are points of very close contact between the OT and the NT. We do not find the same external conditions, but the moral attitude is much the same. The morality of the NT is essentially a religious morality; it stands in very close relation to the worship of God. That which was hope or aspiration under the old covenant is fulfilled in the new; the access to God, which was before an object of longing, is attained through

Christ; the forgiveness, the lack of which so seriously complicated the ancient religious efforts, has become possible through Christ. This is, in fact, the central point in the comparison of the two systems; the note of the old covenant is *promise*, that of the new is *fulfilment*. From this most of the other differences may be derived, directly or indirectly.

As in connexion with the OT, so here, it will be impossible to enter into the various critical questions raised over the Gospels and Epistles. Taking the NT as it is, we shall endeavour to indicate its bearing on ethical questions.

(A) *The Sermon on the Mount*.—Different views have been taken as to the actual history of this sermon as it stands in the Gospels, and of its meaning in relation to the purpose of Christ. All are agreed that it stands to the new covenant as the promulgation of the law on Sinai stood to the old; it contains the law of the new kingdom. From this point of view two questions arise in regard to it. (1) What is its relation to the old law? (2) What new features does it add of its own?

(1) In the Sermon on the Mount the old law is revised and fulfilled; the precepts which it contained are interpreted, and their application deepened. Our Lord definitely affirms that He has come, not to destroy (*καταλῦσαι*), but to fulfil (*πληρῶσαι*). Hence He touches on a series of points upon which the law had defined its position, and develops them. The law of Murder includes in its prohibition the sin of anger and the harsh unforgiving temper.* The law against Adultery includes lustful thoughts, and condemns them. The law of Divorce and of Perjury are extended in like manner. But the law of Retaliation is reversed; and the narrow command to love the neighbour is extended so as to cover the enemy. In all this the difference lies not so much in principle as in interpretation. We are still in the region of law. Commands are addressed to the will from without, which it has to obey. But the significance of the law is increased tenfold by means of the application of the rules. They no longer concern outward conduct only; they touch the inmost springs of conduct in the heart. In this they are akin to the deeper aspirations of the Prophets and Psalmists; these too, though with less profound and unflinching moral insight, saw that it was in these inward regions that the real issue of right and wrong was to be tried. In the same way, on the positive side, in the matter of almsgiving, prayer, and fasting, our Lord lays emphasis on the spiritual side of these acts, without in any way condemning the exterior and formal aspect of them.

(2) But the indications given of the character of the citizens of the new kingdom contain the most significant departures from ancient rule. These appear chiefly in the Beatitudes, and in other parts of the NT in which the character of the new kingdom is described. The nature of the description given in the Beatitudes is not, perhaps, easy to bring into formal order; but there is no question as to the fundamental principles of the character therein set forth. Its rules and interests are in the spiritual world, and there alone. The rewards of its virtues are spiritual. The pure in heart see God; those that hunger and thirst after righteousness gain their desire; the merciful receive mercy; the poor in spirit (or the poor, Lk 6²⁰) are those to whom the kingdom of heaven belongs; the peacemakers are called the sons of God. The meek are said to inherit the earth; but this must not be assumed to contradict the blessing upon those whom the world persecutes. The general drift of the passage is to bless those who are characterized

* Cf. Philo, *De Spec. Legg.* Tom. ii. p. 314, ed. Mang.

by certain spiritual qualities, and to leave on one side their relation to the ordinary standards of the world. The opinion of the world is, as such, of no value; all that matters is the spiritual condition of the citizens of the kingdom. In like manner, later on in the sermon, the motive to prayer and fasting is found in the same region. The critical temper is excluded from the true life (Mt 7¹⁻⁵, Lk 6³⁷⁻³⁹); and it is distinctly asserted that care is to be exercised in the presentation of that which is holy. The whole temper indicated is inward and spiritual, though it is affirmed that the character must be expressed in act: the tree is to be known by its fruit.

(B) Similar principles appear in our Lord's *Parabolic teachings*. A large number of the parables refer to the general characteristics of the new Society, and therefore do not immediately concern us.* But others deal directly with moral character. Thus the Parable of the Unmerciful Servant deals with the law of forgiveness; that of the Pharisee and the Publican condemns self-righteousness; the Good Samaritan defines the duty of the love of our neighbour; that of the Two Sons distinguishes true and false obedience. Dives and Lazarus illustrates the peril of the love of this world. Besides these, the Prodigal Son, the Unjust Judge, and the Friend at midnight declare the relations between the true believers and God. In these, and in the generality of the teaching recorded in the synoptic Gospels, our Lord uses a quasi-proverbial method. He does not promulgate rules of conduct, but describes in indirect fashion the principles upon which true conduct is to be based.

(C) In the more profound teaching recorded in *St. John's Gospel*, we are taken still further into the inner secrets of the moral life. While in the Synoptists we have the life presented in the simple picture of the Two Ways, St. John represents the true and the false life as two opposed conditions of being—Life and Judgment. This, while it contains ultimately the same idea as the simpler language in St. Matthew, lies deeper, and contains assumptions which do not appear elsewhere. In this type of teaching, as in the other, the essential principle is that human life is truly seen only on its spiritual side, and that in this view of it there is a single issue offered for the determination of each particular man. That course which places man on the side of God is described as Life; the other is in itself Judgment. Further, whereas in synoptic tradition we find our Lord opening His mission with the preaching of repentance, so, in the first discourse recorded by St. John (ch. 3), He sets forth the necessity of regeneration for the recognition of and entry into the new kingdom. Here, again, the positions are ultimately the same, but that in St. John is the deeper. The new birth spoken of is essential to the repentance. Once more, the need of faith, which is constantly emphasized in the synoptic Gospels, is by St. John shown to involve moral issues of a serious kind. It is the self-assertion, the self-seeking of the Jews, that prevents their understanding the claims of Christ. And, lastly, it is union with Christ, and dependence upon His life, which sustains those who are His representatives in the world. And thus, again, a moral virtue inculcated in the synoptic tradition is asserted in deeper form in St. John. The love which the followers of Christ are to have to one another rests upon their union with Christ, the indwelling of the Spirit, and has as its ideal the love of the Father and the Son.

In this Gospel there is very little direct exhortation, even of the proverbial kind. The most con-

* Such are: the Leaven, the Draw-net, the Hidden Treasure, the Seed growing secretly, etc.

spicuous parenthetic passage is that in which our Lord (as also in the other Gospels) lays down the absolute necessity of sacrifice for all (Jn 12²³). The discourses are concerned rather with the exposition of the final conditions of moral action, and in this sense they are of vital importance for the Christian ethic. It should be noticed that they deal with action, so it seems at first sight, very simply. Truths which are complementary are stated, sometimes in antithesis, sometimes without any sign in the context of the complementary truth, which may appear elsewhere also without qualification. Thus, in ch. 6, the mysterious relations of the work of the Father and the coming of men to Christ are asserted, but not connected by any theory. Or, on the other hand, the judgment given is said to be the coming of the light into the world, and the consequent action of men (3¹⁹); whereas in vv. 22, 30 judgment is placed in the control of the Son of Man. This is largely due to the close connexion of the discourses in this Gospel with the circumstances under which they were delivered, and to the fact that, in life, different aspects of complex unities have a tendency to emerge into exclusive prominence. But the great importance of all these passages for our present purpose is this: they represent the Christian development of the principles already asserted in Judaism—the connexion of the character of God with moral life, and the historic operation of God in the lives of men. Where God declares Himself as a merciful God—in answer to the request of Moses to see Him—and declares His condemnation of the guilty (Ex 34⁷), Christ in St. John sets out the love of God as the rule of life for the Christian society (Jn 17²⁶). Whereas in the OT the hand of God is seen in the guidance of man throughout his life and history, Christ in St. John affirms definitely the entry of the Father's will into the actual life and choice of individual man. The importance of this, in regard to life, can hardly be exaggerated. It means that the apparent simplification of moral ideas attained by referring all things to a spiritual standard must not be regarded as extinguishing all moral problems. The Gospel of St. John contains no elaborate discussion of such problems, such as we find in St. Paul's Epistles; it only indicates, in the direct way which lies close to immediate experience, that they are present. Thus we derive from the preaching of Christ, not only a deeper view of positive duty, but also an indication of a large field of moral thought of which comparatively little had been known before.

(D) In turning to the *Apostolic Epistles* we find the Church engaged in the endeavour to introduce the Christian law into the world. We derive, therefore, from these writings some knowledge of the effect of Christianity upon the life of Greece and Rome. And, further, we find in the Epistles, especially in those of St. Paul, an endeavour to connect the faith of the Church with its practice. It will be desirable to consider these points in the reverse order, as the dogmatic basis of Christian practice in many cases largely determines its form. In the first place, let us observe that there are, in the NT writers, certain moral premises or assumptions which are inherited from the OT, and have been accentuated by the teaching of Christ. The end of man is union or intercourse with God, and sin impedes it. Men are in a position of enmity—sin dwells in them—the wrath of God at present abides upon them—they have not passed from death to life. And they have no power of their own to break loose from this position; the old lamentations of the Psalmist over their moral incapacity are taken up and confirmed by the authority of the apostolic writers. However great and sincere man's desire may be to attain to virtue

and to holiness, there is an impediment. The law did little to improve the position; it killed instead of reviving; it displayed the real nature of sin, so far as man was capable of appreciating it, but it gave him no power to express his knowledge in his life. The sacrifices and other ceremonies, which were part of the legal dispensation, could never take away sin. They only symbolized a purification which they could never convey.

In all this the apostolic writers are using partly ideas which are inherited, partly ideas which are original in them. The sense of failure and ruin appears, as we have said, in the OT, but in the Epistles it is more precise in itself, and its causes and range are more clearly known. The disabilities thus described are removed by the work of Christ. And it is in consequence of this that the dogmatic basis of the Christian practice is so firmly and carefully fixed. The views of man's condition, with which the apostles start, are such that the first thing to be done in order to attain morality is to remove the impediment which at present bars the way. To describe the advantages or the beauties of moral life—to develop a system of new and attractive moral ideas, is secondary to this; to have made it the first interest would have been to leave mankind in the position of the law. It was power they wanted, more even than knowledge. Christ in His teaching had concentrated attention increasingly upon Himself; the central feature of the discourses recorded by St. John had been the presentation of Himself as satisfying in various ways the desires and the needs of man. Thus the apostles had general guidance as to the way in which they were to deal with life, as well as particular instructions for certain occasions. Christ had not, so far as we can gather from His recorded teaching, entered into any detailed and precise account of the effect of His work in the moral world. It is this that the apostolic writers undertake.

In this respect it is possible to observe development and the presence of individual tendencies of thought. At first, the sum of their preaching seems to be contained in the phrase, *Jesus is Lord*. The resurrection, of which all are witnesses, is the proof of this; and the effect is that men have repentance and remission of their sins. The Holy Spirit has been poured out upon them, and they have thus gained various moral and spiritual powers. They are not left, as before, to struggle vainly; a new spring of new life has entered into the world, arising from the person of the risen and ascended Lord. St. Paul develops this position with great fulness in his Epistles. 'If Christ be not risen,' he says (1 Co 15¹⁷), 'ye are yet in your sins.' And this position is elsewhere described as the state 'under law,' the condition of inability and partial knowledge which prevailed in the earlier dispensation (Gal 4^{5ff.}). There is no question that to St. Paul's mind the possibility of moral achievement depends absolutely on the person and work of the Son of God. And we can go further than this. The death of Christ, which was the means of removing the barrier of separation between us and God, was of the nature of a sacrifice—a sacrifice of propitiation (*ἱλαστήριον*, cf. Ro 3²⁵). Thus the ancient efforts at reconciliation were made effectual. In similar fashion St. John represents Jesus Christ the righteous as a propitiation (*ἱλαρὸς*) for our sins and for the sins of the whole world (1 Jn 2²). The author of the Ep. to the Hebrews dwells at length upon the unique importance of the priesthood of Christ, and emphasizes the effect of it upon man's relations with God. St. John, the cast of whose mind is more contemplative than argumentative, sets forth as the essential condition of real Christian life, the confession that

Jesus Christ is come in the flesh (2 Jn 7, cf. 1 Jn 5¹). His characteristic interest is in the truth of the incarnation considered as a fact in history; his treatment of all the other points arises out of this. The others, not less certain than St. John as to the nature of Christ, have given more space to the discussion of the redemptive acts of Christ. But, in spite of differences in the nature and order of the presentation, one salient fact appears on the very surface of the NT, namely, that moral life depends upon the acts and the nature of Christ; in other words, that the true basis for morality is theological. The controversy over the principles of faith and works, which occupies so large a place in St. Paul, has no meaning apart from this; it arises, and is of practical importance, just because it affects the relations of God and man. In like manner, as has been already implied in our remarks upon St. John's Gospel, the controlling will of God in history becomes an element in man's moral life; and in this connexion we have, of course, the Pauline doctrine of predestination. Here, again, we are dealing, not with a mere philosophical speculation, but with a series of facts which must be taken into consideration in any valid account of actual practical life.

It would be beyond our purpose to dwell further on these theological points. We have said thus much about them in order to call attention to the fact that the Christian ethic as it appears in the NT, rests upon certain convictions as to the nature and acts of Christ. The whole bearing and range of morality depends upon these.

We must now return to the other matter remaining for discussion, viz. the attitude of the Church in its endeavour to spread the Christian view of life through the world, and in this connexion we shall consider two points—(1) the general attitude of the Church towards practical life; (2) the system of virtues and vices which flowed from the use of the Christian ideal.

(1) We notice, first of all, that the Church displays an attitude of unflinching hostility to all that is characteristically worldly. The world, to the eyes of St. Paul, presents a spectacle of varied and widespread wickedness. The heathen have lost the light that might once have belonged to them, and, as they have lost the knowledge of God, have fallen into idolatry, and so into gross sin. They have concentrated their attention and interests upon the material side of life, and find their satisfaction in the created world (Ro 1^{25ff.}). The same point appears in connexion with the moral use of the term 'the flesh.' St. Paul does not mean by this that the flesh, as such, is the seat of evil; but it is the material and transient side of man's nature, which has no right to stand as the object of his life. The works of the flesh (Gal 5¹⁹) are all those acts and states of which the real explanation lies in man's choice of the material and transient, his desire for selfish satisfaction. Though there are still higher ideas and signs of moral aspiration among the heathen, yet the predominant note of their life is degradation and sensuality.*

* It is always hard to read St. Paul's descriptions, esp. in Ro 1, without wondering whether he has exaggerated, and, if so, to what extent. It must, however, be remembered that we derive our views of the ancient world rather from the highest minds of the particular periods we consider, than from men on ordinary levels. It was these lower, more ordinary strata of society with which St. Paul was chiefly acquainted. And, further, there can be no question that the entry of Christianity has altered the face of things in many more directions than we ordinarily think; so that, in all probability, the tone of ancient society is much farther from us than we are wont to suppose. St. Paul represents the case of a person with sentiments very like our own acting and thinking under the old conditions. And, lastly, it must always be remembered that St. Paul's method of presenting his ideas is to insist strongly on one aspect of a matter at one time, modifying it or insisting on the complementary truth in

In like manner, St. John speaks of the world as lying in the evil one (*κεῖται ἐν τῷ πονηρῷ*, 1 Jn 5¹⁹), and uses the word *κόσμος* somewhat in the same way as St. Paul uses the word *σάρξ*, for the material creation considered, first as apart from, and then as hostile to God. The world is guided by principles of self-will and self-indulgence, and is doomed to pass away with all the objects of its desire. As Christ had anticipated persecution and hatred for those who followed Him, so St. Paul and St. John recognize an endless hostility between the world and those born of God—between the flesh and the Spirit. There is no compromise and no cessation in the strife.

Hence the first thing which strikes us in the general attitude of the Church towards the world is its uncompromising hostility. But in large measure these phrases, the flesh and the world, stand for tendencies or principles rather than for individuals; but there is quite another aspect in which the individuals arrest the attention of the Church. The world from this point of view is capable of being saved; and this fact determines *the character of the warfare*. There is no limit to the sacrifices which must be expected of the Christian: he must, as Christ said, hate his father and mother if he is worthy of his calling. But he will not retire into himself, and live an isolated withdrawn life in which mankind in general has no part. He will live quietly in the state in which his lot is cast, fulfilling ordinary duties of citizenship (Ro 13, cf. 1 P 4¹⁶), accepting even such an institution as slavery (1 Co 7¹⁷, Philem), without strife or cry. At the same time, he will not conceal his way of life, nor evade inquiry into its motive; the power of example, the mere presence of the new principles of action, will tell. The world will know by this the disciples of Christ—by the fact that they love one another. And the love to the brethren, which is the sign that they have passed from death to life (1 Jn 3¹⁴), is extended to the neighbour, and in this is the fulfilling of the law (Ro 13¹⁰). As God loved the world, even when men were in a state of rebellion against Him, so those who are called by the name of Christ will endeavour, so far as in them lies, to fulfil God's desire to save it. Thus the Christian's attitude towards the world is partly hostile and partly friendly—hostile so far as the world tries to convert him, but friendly in so far as he endeavours to convert the world. We must now consider certain special conditions of mind which, owing to the peculiar views of life characteristic of the Church, are now brought within the ethical sphere.

(a) We propose to consider, first, three moral conditions which are sufficiently similar to admit of such treatment, and which all depend upon a lack of zeal or whole-heartedness. In Ja 1⁵⁻⁸ we find a severe condemnation passed upon the *διψυχος* or *double-souled* man. In Rev 3¹⁵⁻¹⁷ the severest judgment of all those passed upon the Seven Churches is the denunciation of the *lukewarm* (*χλιαροί*). And, again, in Rev 21⁸ the first of those whose portion is the second death are the *cowards* (*δειλοί*). These three words, especially in view of the context they are in, seem to convey more than a reproach upon vacillation of purpose. The man who is double-souled and unstable in all his ways fails to obtain his prayers; his life loses consistency and firmness, and becomes like the sea, driven by the wind and tossed. So the lukewarm is worse than the open enemy ('I would thou wert cold or hot'), and the coward is coupled in his condemnation with the unfaithful

another context. If Ro 1 represents the darker side of his mind, Ro 2, not to mention his practical attitude towards the Gentiles, represents the aspect of the question neglected here.

as well as those who are guilty of open and obvious sin. All three are cases of insincerity. They are attempts to serve two masters, and they lack the absolute singleness of aim which Christ demands of those who follow Him. The severity of the condemnation upon them is the measure of the importance of the demand made upon the believer. He is to live a spiritual life pure and simple, guided by spiritual principles and spiritual aims; cowardice or lukewarmness or double-souledness is nothing less than the surrender of all this; in other words, the rejection of Christ. On the positive side, we have St. Paul's exhortations to sincerity of work (Col 3²²), to tolerance of weaker consciences in all things lawful (1 Co 8⁸⁻¹³, Ro 14), and these exhortations are based upon the same general principle. The sole concern of men is to be their relation to God, and this will colour all that they do in the ordinary ways of life.

Under the same condemnation will be placed various sensual sins. Thus St. Paul bases his exhortation to purity on the true function of the body, and its capacity as a temple of the Holy Ghost (1 Co 6¹² etc.). Covetousness, mentioned at the end of a list of sensual sins, is stigmatized as idolatry (Col 3⁵); the love of money is said to have power to pervert men from the faith, and to be a root of all evil things (1 Ti 6¹⁰); and again the love of pleasure is set over-against the love of God (2 Ti 3⁵). In all these cases the error lies in misdirection of aim, the transient is preferred to the eternal. They are not merely breaches of law, or, as a Greek philosopher might have said, disturbances of the due balance of man's nature. In the light of the faith they are errors in principle, a choice of the wrong thing altogether.

This singleness of aim takes shape in social life in various noticeable forms. The bond which holds the Christian society together is love—love to God and love to the brethren. This, in itself, would prevent any violence of self-assertion or rivalry. But there are also positive virtues based upon the conception of the Christian society. One of the most striking of these is *humility*. This appears in St. Paul primarily as a social virtue. It consists in voluntarily accepting a subdued estimate of oneself. It is distinguished from all diffidence or indisposition to accept the call of God to special work by the fact that it deals fairly and simply with reality. On the practical side it consists largely in doing without hesitation or discontent the work assigned. So St. Paul exhorts the Romans (12³) not to think more highly of themselves than they ought; and gives as his reason their unity in the body of Christ. Immediately afterwards he exhorts them to perform faithfully the function that has been allotted to them in the Church. So in the Epistle to the Philippians (2³) the spirit of humility is opposed to the vainglorious temper, and the factious ungracious service of a hireling. So St. Peter finds in humility the principle of church order (1 P 5⁵). Thus the normal aspect of this virtue in the apostolic writings is social; it answers to the social reserve of the Greeks—the disposition to give and take without savage selfishness or personal rivalry. But it differs widely from this, in that it is not based upon the mere fact that all men cannot have the same thing, and must give way to one another; it rests upon a positive love of men, one to another, and a profound conviction of the unique value of spiritual things. Moreover, it goes back upon the example and the precept of Christ Himself; it is a conspicuous embodiment of His mind and temper.

In this connexion it will be well to speak of another virtue which holds a high place in St. Paul's teaching. In the list of the fruits of the Spirit (Gal 5²²), the virtue which appears at the

end as a kind of climax is *ἐγκράτεια*, *self-control*. It will not be justifiable to press too far its position in this catalogue; but there can be no doubt that it holds an important position in St. Paul's mind. It is one of the qualities required of the bishop (Tit 1⁶); it is inculcated by the example of the zealous athlete (1 Co 9²⁵), and it appears in 2 P 1⁶ as a stage in the progress of men in this world. It is in regard to this virtue, probably, that the ethical ideas of the apostolic writers differ most characteristically from the views of contemporary Gr. writers. The Gr. view of virtue was chiefly that of a condition attained after struggle; it did not contemplate the persistence of temptation, or of any disposition to yield on the part of the virtuous man. The material side of man was not, so to speak, an actual element in virtuous action; it required suppression, not control: on the other hand, the Christian virtue does not pretend to introduce warfare or separation into the organization of man. It recognizes the need of self-control, but the character of the man who manages his physical nature and keeps it in its proper relation to his whole life is selected for commendation. The *ἐγκράτεια* of St. Paul is a more real thing than the *σωφροσύνη* of a Gr. philosopher; and it is not, morally speaking, a lower conception of virtuous life.

(b) We now come to consider three states or conditions or virtues which are most of all identified with the Christian point of view. These are the well-known triad, *Faith*, *Hope*, and *Love*. They are for the most part identified with St. Paul, and found especially in 1 Co 13. But it is not true to suppose that they are limited to that passage. They occur in close connexion, both in St. Peter (1^{21, 22}), and in the Ep. to the Hebrews (10²²), and in other passages of St. Paul (1 Th 1^{2, 3} 5⁸, Col 1³⁻⁵). Indeed their connexion is so remarkable that it has been recently argued that it must have been based on the teaching of Christ Himself.* Without committing ourselves on this point, it is at least worth noticing that the connexion is frequent, and it is natural to infer that it had some definitely ethical significance. The question then arises, What is implied by the combination of these three virtues? There is practically no doubt as to the meaning of *ἐλπίς* and *ἀγάπη*. It is true that *ἐλπίς* means sometimes a particular state of mind, sometimes the object on which it rests, but there is no serious ambiguity. But with the third *πίστις* this is not the case. It is ambiguous (1) because it stands both for the temper of the faithful person and for the object of his faith; but (2) more seriously, because the character of the moral temper is not clear. The word means not only trustfulness, but also trustworthiness. And even in those passages where the context excludes the passive sense, there are further differences in the associations given by various writers to the words. St. James (2¹⁹) seems to mean by it little more than an intellectual assent to a proposition; it is a state of mind in which the devils can be said to be. The word in St. Paul has a moral rather than a purely intellectual meaning. It describes the temper of one who, in full view of all that makes the other way, trusts in the character and power of God (cf. Ro 4¹⁹ RV). And so St. Paul speaks naturally of faith being made active by love (*ἐνεργουμένη δι' ἀγάπης*, Gal 5⁶). It is inspired by the love of the person on whom it rests, and therefore does not fail. In the Ep. to the Hebrews we again notice a slight variation in use. The author describes faith in somewhat precise fashion as 'the substance of things hoped for, the evidence

of things not seen' (11¹). By this he seems to mean a certainty in the mind of the faithful person that the hopes he has will be realized. The confidence is so great that he seems almost to have in his possession the things which are not yet in being. Such a man, like Moses, 'endures as seeing the invisible.'

It is somewhat difficult to describe succinctly the character in which these three virtues converge. It must be remembered that, for the apostles, the death and resurrection of Christ were the primary and salient facts with which all life had to deal. Hence these determine the primary reference of the faith, hope, and love of the believer. His *faith* rests upon Christ as risen and ascended; his *hope* is in the consummation of God's purpose in the world; his *love* is directed to the Father who guided, and the Son who effected, his redemption. The whole atmosphere of the Epistles is full of these facts, and all practical results which flow out from the presence of these virtues are dependent on the truth of these facts. Thus, because the believer holds to the truth of the death and resurrection of Christ, he has certainty, where others doubt, in his view of the history of the world and of himself. His *faith* is not a blind acceptance of anything that happens. He knows as well as any one the difficulties in life, and the darkness which hangs over human things. He sees things occur which he did not foresee and cannot explain. But he is not in presence of a mere chaos of irrational forces, with a blind belief in the existence of a purpose behind them; he has a sure confidence in the death and resurrection of Christ; that is, he is able to take them as a type of the action of God, and to find in them a ground of anticipation for the future. Because Christ has risen from the dead, instead of being of all men the most miserable he is the person of all others who has a sure hold upon life. See FAITH.

In like manner, the natural object of the virtue of *hope* is the second coming of our Lord, and the consummation of all things which that event will bring. It is this hope that enables men to endure the sorrows and pain of the world; it is hidden in some sort in the groaning and travailing of creation (Ro 8¹⁸⁻²⁵). It results from the steady endurance of persecution (Ro 5⁵), and it does not make ashamed. It is not difficult to see how this confidence in the future will affect life on its practical side. It involves no unreality, and no optimistic veiling of the real evil in things. With a full sense of the presence of pain and other troubles in the world, it looks upon the course of history with certainty and fearlessness. There is no haunting dread lest the world may be, after all, a chaos of irrational forces without purpose or true guidance; because the events of Christ's life, the truth of His person, and the certainty of His promises, prevent all such hazy and depressing conditions of mind. The virtue of hope is closely allied with the virtue of faith. They both rest upon the character and self-manifestation of God; they both affect life by bringing within its sphere the realities of the spiritual order.

And, lastly, the virtue of *love* depends upon the cessation of the feeling of hostility and estrangement which had so long been abroad in the world. The efforts of God for the salvation of man, His care for the souls of individual men—that is, the prominent events in the incarnate life of His Son—commend the love of God to us. From of old, men had sought by various means for intercourse with God, and yet had fallen short. The life of Christ opened the way to a fuller communion than they had ventured to anticipate. The law of God, seen in the light of the death and resurrection of Christ, could be a regular principle of action; not imposed

* Resch, *Agrapha*, p. 181; cf. Ropes, *Die Sprüche Jesu*, p. 24. Both these works are in Harnack's series of *Texte und Untersuchungen*, Bd. v. 4 and Bd. xiv. 2.

arbitrarily from without, but accepted and understood as the true form of intercourse with God in life. Again, in regard to men, the old barriers which separated them would tend to be broken down, because all alike came under the condemnation of sin and within the range of salvation. The brotherhood of men amongst themselves is the expression of the knowledge of the love of God towards all. To profess love to God and to fail in love to man is, morally speaking, a contradiction. The one, by the logic of moral life, involves the other.

We have now concluded what it seems necessary to say as to the ethics of the Bible. It would be possible to develop the similarities and the contrasts between the ethics of the Greeks or of modern philosophy and the moral doctrines of Christianity. Or we might endeavour to trace the effect of the principles here indicated in the history of the Christian Church. Both of these topics would be necessary to a complete discussion of Christian ethics. Being restricted here to the ethics of the Bible, we must leave them aside as irrelevant. It remains, therefore, merely to emphasize the general principles which follow from our consideration of the subject. It seems to emerge clearly as a result of the whole, that the ethics of the Bible from one end of it to the other are *religious*. In the early days an ethical meaning was given to religious ceremonies which distinguished them sharply from the generality of such rites. In the hands of the prophets the ethical principles of life were asserted with exceptional vigour and clearness; but always, with however severe a side-glance at ceremonial, as an essential element in the worship of J^h. In the Psalmists the various shades of moral feeling are described with infinite knowledge and fulness, but the further reference is always to the desire for intercourse with God. Even in the Sapiential Books, where the tone is least lofty and spiritual, the wisdom of man is found in the fear of the Lord and in obedience to His law.

The change which results from Christianity is partly due to the deeper insight and more alluring attractiveness of the example and preaching of Christ; but it owes more still to the vast increase in knowledge of actual spiritual truth which Christ brought to man, and the infinite significance of the acts of Christ upon the life of men. The truth is summed up, finally, in the words of St. John, 'The law was given by Moses, grace and truth came by Jesus Christ' (1st). It was not merely that He charmed the world with the example of a sinless Man suffering because other men were sinful; nor, again, does the effect of His life rest merely upon the graciousness or the austerity of His words; but it flows from the fact that He brought truth as well as grace; power to achieve what the world had so long failed to attain; and knowledge of the spiritual order when all had been guesswork and hazardous conjecture before.

Many things follow from this. The various ethical doctrines which are from time to time represented as the only contribution of Christianity to the world's history are really corollaries of the facts upon which Christianity rests. The infinite value of each human soul, with all that has come of it in the changed position of individuals, presupposes, speaking historically, the belief in the scheme of salvation. The idea of universal love is not the result of a change of sentiment in the world, so much as the practical exposition (as we have indicated above) of the true relation of God to man. And, again, the principle of self-sacrifice is not an arbitrary law imposed on men, challenging an explanation which it never receives, but is the practical expression of the law of love, together

with the paramount importance of the spiritual world.

We are well aware of the importance and the difficulty of many of the critical questions which surround the books of the Bible. In the present article, as has been already observed, they have been deliberately left aside. It would have been impossible, in the first place, to treat them adequately in passing, and inadequate discussion is useless. But there is a further reason, which, now that the exposition of the ethics is completed, it seems well to mention again and emphasize. These critical questions are not only irrelevant to the present discussion, they are largely irrelevant to any discussion. Speaking generally, we may say that the Bible has had its effect very largely as it stands. It comes before us a whole, and, though criticism may display for us the process by which some of the OT books have come into existence, it will not seriously alter this fact. And in the case of the NT the date of the formation of the Canon and the publication of the various books is now put back so far that there is not room for a complicated evolution of ideas of which the traces are largely lost. Those who are concerned to trace the formative ideas in the Bible must take it as a whole. For it is in view of the unity of thought which runs through it that the separate books have been gathered into one; this was the chief guiding principle in the formation of the Canon.

T. B. STRONG.

ETHIOPIA (*Aiθιοπία*), the name whereby the LXX translators rendered the Heb. *צִיּוֹן passim*, and in Ps 72⁹ and 74¹⁴ the Heb. *צִיּוֹן*.

1. DERIVATION, etc.—The word occurs in the earliest Gr. literature as the name of a race to be found in the extreme E. and the extreme W.; in later writers* the nation is more definitely localized as dwelling S. of Egypt. The name would seem to be Greek, and to signify 'Red-faces' (cf. the similar word *αἶθος* applied by Homer to wine), a designation derived from the colour of the people, just as many names given by the Gr. geographers to African tribes are derived from their characteristics, habits, or mode of life; and indeed the present inhabitants of Abyssinia are said to call themselves *Kay* ('red' in Amharic), as opposed to the Nubians, whom they term black (*tekour* in Amharic, *salim* in Ethiopic; Lejean, *Voyage en Abyssinie*, 1872, p. 77). As, however, the colour that is associated with the 'Ethiopians' is not red, but black (*Juv. Sat.* ii. 23), it has been suggested that the Gr. name represents the Grecized form of some foreign appellation, such as *Atyāb*, plural of the Arab. *ʿib*, 'scents,' used to designate the inhabitants of the country whence the incense came (Glaser, *Die Abyssinier in Arabien*, p. 10). The word is a loan-word in the language called Ethiopic, imported from the Greek, and only employed by the Abyssinians in Christian times to denote themselves. In the inscription of Adulis, the Abyssinian king claims to have defeated the Ethiopians among other foreign races; meaning by this name, according to Lejean's suggestion, the Shangallas, a tribe placed in the maps of Harris and Lefèvre to the W. of the Abyssinian province Shirē, between the rivers Mareb and Taccazē. The name *Habash*, whereby the Abyssinian country and people are designated in Arabic (whence the European Abyssinia), would appear to represent an ancient Egyp. name for some African race (Glaser, *l.c.*, after W. Max Müller); the native name is Geez.

2. GEOGRAPHY.—Although the Gr. geographers after the time of Ptolemy distinguish the kingdom of Meroë from the neighbouring tribes, they make the term Ethiopia include both. The extent of territory covered by this name is therefore very great: to the ancients it represented all the land bounded by the Upper Nile on the W., and the Red Sea and Arabian Gulf on the E.; the southern extremity they did not profess to be able to fix. Only modern—the most modern—researches have been able to map out accurately the land known to the old geographers by vague reports.

The land whence the Nile derives its waters is described by Lucan as *putres arena*, but this description is not true of the whole of Ethiopia. While the political divisions have constantly been, and are still, fluctuating, the natural divisions are three. The highlands of Abyssinia separate the *Sadān* (usually spelt Soudan), or 'black country,' on the N. and W. from the *Danākīl* country, which lies between the Ethiopian range and the sea.

(a) The Soudan, having been rarely traversed by Europeans before Sir Samuel Baker (*Nile Tributaries of Abyssinia*, 1867), has, since the enterprise of Mohammed Ahmad, been frequently the centre of European interest, and the campaigns that have been fought there have led to the elucidation of its geography; and the works of Wingate (*Mahdism in the Egyptian Soudan*, 1891), Slatin Pasha (*Fire and Sword in the Soudan*, 1896), and others, give accurate details both of the nature of the country (2,000,000 sq. miles in extent) and of the tribes that inhabit it. South of the thirteenth parallel of latitude is fertile country

with a six months' rainfall; N. of it are vast steppes with frequent thorns and thinly-scattered wells (Wingate, p. 8). A narrow strip of rich vegetation is to be found on either side of the Nile, which flows through it, making a gigantic curve between the third and fifth cataracts, and receiving at Al-Damer (about 33° 45' E. long., 17° 30' N. lat.) the Atbara, laden in the rainy season with the waters of Abyssinia, but in the dry season a bed of white sand; and some two degrees farther S. splitting at the modern town of Khartoum into the Blue and White Nile. The scenery is diversified by mountain ranges of no great height.

(b) Very different from this flat rolling plain is the Switzerland of Africa, Abyssinia, a plateau with a mean elevation of 6000 ft., extending from 9° to 15° 26' N. lat., and at its greatest width from 37° to 40° E. long. Never completely severed from communication with Europe, this country was first accurately described in the *Historia Ethiopiae* of the Ethiopic scholar Job Ludolf (1681), while the scientific observations and measurements of the explorers Rüppell (*Reise in Abessinien*, 1838), Lefèvre (*Voyage en Abyssinie*, 1839-1843), and Ferret and Galinier (contemporary with the last), have in recent times vastly increased our knowledge of it, which has been supplemented yet more recently by the researches of M^{me} d'Abbadie (*Géographie de l'Ethiopie*, 1890) and others (e.g. Theodore Bent, *The Sacred City of the Ethiopians*, 1893; Schoeller, *Mittheilungen über meine Reise in der Colonia Eritrea*, etc.). Separated on the E. from the Red Sea by the Ethiopian range (as it was first named by M. Theoph. Lefèvre), bounded on the S. by the rivers Hawash and Abay (afterwards the Blue Nile), on the N. by the rivers Ansaba, Barka, and Gash, and on the W. by the Atbara, the Abyssinian plateau inclines towards the N.W., but reaches its greatest elevation in the mts. of Samen or Semyen, of which the loftiest, Ras Dedjen, is 14,200 ft. high. The four rivers Taccazē (the Nile of Ethiopia), Mareb, Abay, and Hawash, with their numerous tributaries, divide the country into a great number of natural provinces; and as these rivers flow in deep ravines, intercommunication during the rainy season is frequently suspended; while the Mareb and the Hawash lose themselves in the sand after dividing into many channels, the Taccazē (called during part of its course the Settite) flows into the Atbara at Tomat (in the province of Katarif), while the Abay (which near its rise curves through Lake Tsana, the greatest of the Abyssinian lakes) later on in its course is called the Blue Nile. The political and linguistic division of the country into Tigre, Amhara, Shoa, and Galla districts is recent; a more natural division is that according to which the native geographers divide their land into *zones*—the Kola or lowlands (below 5500 ft.), the Woina-Deja (5500-7500 ft.), and the Deja (over 7500 ft.), distinguished by their flora and fauna. (See on these esp. J. Dove, *Ergänzungsheft* 37 to Petermann's *Mittheilungen* 'die Kulturzonen Nord-Abessinien,' and for another division A. Raffray, *Bulletin de la société de Géographie*, 1882.)

(c) Thirdly, on the E. side of the Ethiopian range, and extending to the Red Sea and the Gulf of Aden, is a vast tract inhabited now by three Hamitic races called Oromo or Gallas, Afar or Danākils, and Somālis, not yet thoroughly explored, among the descriptions of which may be mentioned Borelli's *Ethiopia Meridionale* (Paris, 1890), and Paulitsche's *Ethnologie Ost-Afrika's* (Wien, 1893). The geology, botany, and zoology of 'Ethiopia' are elaborately treated in Decken's *Reisen in Ost-Afrika* (1879), ap. iii. 3.

3. SKETCH OF HISTORY.—Portions of this vast region were under some sort of government during the existence of the ancient kingdom of Napata, the earlier history of which has been sketched in the article CUSH. In the time of Ptolemy Philadelphus we find an Amonian king Ergamenes reigning at Meroë (Diod. iii. 6), whose name (Erkamon, 'oath of Amon') was found in cartouches on Nubian monuments shortly after the commencement of hieroglyphic studies (see Champollion, *Voyage en Nubie*, 119; Rosellini, *Monumenti Storici*, ii. 321). To the time of the same Ptolemy, Brugsch (*Zschr. f. Ägypt. Sprache*, etc. 1890, p. 29) assigns the reign of a king Horsiatef or Arsiotes (whose stele with a lengthy inscription is reproduced by Mariette, *Monuments Divers*, plate 11); and two kings of the same family as Ergamenes, Onchmachis and Hormachis, after the death of Ptolemy Philopator seized the Thebaid, where they reigned twenty years (Brugsch, *l.c.*; Révillout, *Rev. Egyptol.* v. 39 ff.). As Euergetes I. is said to have sent an expedition into Lower Nubia (*Mon. Adul.*), the two powers must have been long at variance. The invaders of the Thebaid were ejected by Ptolemy Epiphanes—if the combinations of Révillout be correct—by the aid of the Blemmyans, an Ethiopian tribe, whose princes henceforth become supreme at Meroë, though acknowledging the suzerainty of the Egyptians and their heirs the Romans, whence it comes that

* Still the confusion of Ethiopia with India continues long into the Christian era (Letronne, *Matériaux pour l'histoire du Christianisme*, p. 32).

inscriptions in honour of Tiberius and Nero have been found at Dakke (the ancient Pselcis).

An attempt was made during the reign of Augustus by a queen named Candace to drive the Romans out of the Thebaid, resulting in the taking of Napata and Meroë by O. Petronius in B.C. 24; but as peace was made with the Ethiopian queen by Augustus at Samos in B.C. 21, the defeat of the former may not have been so complete as Strabo represents it (Book xvii.; Révillout, *l.c.*). The same queen has been identified with a *ῥαίρα βασιλισσα*, who is mentioned in an inscription of the year B.C. 13 as sending an embassy into Rom. territory (Wilcken in *Hermes* for 1893, p. 145 on *CIG* iii. 5080); and this name Kandake (in Egyp. *Kndaki-t* with family name *Amn-art*; Lepsius, *Denkmäler*, v. 47 a and b; ap. Brugsch, *Entziff. der Meroit. Denkm.* p. 7) is said to have been the official name of the queen of Ethiopia (Bion of Soli, *Frag. Hist. Græc.*, iv. 351, 5). Beyond a solitary allusion to the queen of Meroë in Ac 8²⁷, the history of this state is blank till a much later period, when the Blemmyans came into collision with the Roman empire (Révillout, *Mém. sur les Blemmyens* in 'Mém. prés. par divers savants à l'Académie,' viii. 2. 371); and Pliny asserts that a tribune with some prætorians sent to reconnoitre by Nero, who was contemplating an Ethiopian war, reported that the regions about Meroë were deserted (*Nat. Hist.* vi. 35). It has been conjectured by Dillmann ('Über die Anfänge des Aksumitischen Reiches' in *Abhandl. der Akad. zu Berlin*, 1878, p. 204) that the downfall of Meroë was the result of the campaign of Petronius. Though this may seem doubtful, he is probably right in connecting with the fall of Meroë the rise of another state in Abyssinia; for whereas the classical geographers prior to A.D. 50 (Atharshides of Cnidus of the 2d cent. B.C., excerpted in Photii *Bibliotheca*; Artemidorus of Ephesus, of the 1st cent. B.C.; Diodorus Siculus, who relies in his elaborate account of Ethiopia, *Bk. iii.* 10-37, chiefly on Agatharchides, but partly on information which he had himself collected in Egypt; Strabo and Pliny) know of no other state but that of Meroë, the author of the *Periplus Maris Erythraei* (of the second half of the 1st cent. A.D.) knows of a metropolis of the Auxumite (*Ἀὐξουμίταις*) situated at a distance of eight days from Adulis, 'whither all the ivory from beyond the Nile is brought through Cyenum to Adulis' for exportation. It was governed by a king named Zoskales; and in one of the inscriptions of Adul recorded by Cosmas Indicopleustes, the king, inferred from the phrases he employs to have been king of Axum, a worshipper of the Greek gods Ares, Zeus, and Poseidon, enumerates conquests extending over a great portion of modern Abyssinia, and into neighbouring tribes and countries, in a list wherein many extant names figure for the first time. Since this king claims to have been the first of his line to conquer tribes which, in the time of the *Periplus*, were subject to Zoskales, Dillmann (*l.c.* 200) argues plausibly that the monument of Adulis is earlier than the *Periplus*; whence it would appear that the empire of Axum came into being somewhere in the middle of the 1st cent. A.D. The date cannot be much earlier, since otherwise its existence could not have escaped the Greeks, who had many factories on the Red Sea coast, dating from the time of Ptolemy Philadelphus, who is said to have organized elephant-hunting expeditions. Although there follows a gap of some centuries in the history of Axum, it is clear that the great antiquity claimed for their empire by the native Abyssinian chroniclers is fabulous (see Dillmann, *ZDMG* vii.) as well as its supposed Jewish basis. Besides Meroë and Axum, the classical writers know only of tribes existing in Ethiopia in various stages of savagery, some of whose characteristics may well be preserved in extant races, while some may be relegated to the region of fable. (See further CUSH.)

4. LANGUAGE, etc.—The chief monuments of Nubian monarchs are in the Egyp. character and language; although, in the opinion of experts, many of them display a very imperfect acquaintance with both. Ergamenes, however, in the 3rd cent. B.C., after overthrowing the power of the priests (it is thought), introduced the native language of Nubia into the monuments, using for it modifications of the hieroglyphic and demotic writing, in which the phonetic value of the Egyp. symbols seems to have been shifted. In his Nubian grammar (1880) Lepsius speaks of these inscriptions as a still unsolved mystery; and the important study of them by Brugsch (*Entziff. der Meroit. Denkm.*, Leipzig, 1887) is not regarded as having finally solved it, although the discovery by Schäfer (*Zschr. für Ägyptologie*, 1896) of elements of modern Nubian in the Nubian words recorded by classical writers makes in favour of Brugsch's system. While the basis of the language is, according to these authorities, to be sought, not in the Beja dialect (as Lepsius had imagined), but in modern Nubian, Brugsch has made it probable that the language of the inscriptions was largely intermixed with Egyp. words, and indeed he fancies that

many such are to be detected in the existing language. While the Ethiopian Pantheon was largely peopled with Egyp. gods, a few native names are recorded by the ancients, as may be made out from the inscriptions; and likewise Ethiopian civilization, though largely borrowed from Egypt, retained not a few native peculiarities.

D. S. MARGOLIOUTH.

ETHIOPIAN EUNUCH.—According to Ac 8²⁷ an Ethiopian eunuch, minister of Candace, queen of the Ethiopians, who was over all her treasure, shortly after the martyrdom of Stephen was met by the deacon Philip when returning from a religious journey to Jerusalem, and converted to Christianity. From the authorities cited in the article ETHIOPIA we know that Gr. literature had spread to the kingdom of Meroë as early as the 3rd cent. B.C.: there is therefore nothing improbable in the LXX translation, which this Ethiopian was found reading, having penetrated thither by the same channels; but whether he also belonged to the Jewish community cannot be made out with certainty. While his journey to Jerusalem 'to worship' (cf. the inscription quoted in ETHIOPIA) might imply it, his apparent unfamiliarity with OT (v. 31) and his physical condition render it improbable. The word 'eunuch' might indeed be regarded as a mistranslation for 'minister' if there were any likelihood that this narrative was originally in Aramaic, since in some dialects of that language the same word signifies both; but the fact that the passage of Isaiah quoted (Is 53⁷⁻⁸) is given according to the LXX, takes away the ground from any such supposition.

The notices of the Eth. kingdom for this period failing us altogether, it is impossible to identify this personage from external sources; but the historical character of the narrative seems to be acknowledged in most quarters.

The confession of faith put into his mouth in v. 37 AV is now universally admitted to be an early interpolation. Assuming the Lucan authorship of the Acts, the source of the above narrative may have been personal information received from Philip (cf. Ac 21⁹). Like the baptism of Cornelius by St. Peter, the case of the Ethiopian eunuch marked an important stage in the question of the admission of the Gentiles to the Christian Church. Its bearing from this point of view will be discussed in art. PHILIP (the evangelist). See also CORNELIUS.

D. S. MARGOLIOUTH.

ETHIOPIAN WOMAN (ἠθίοπις).—According to Nu 12¹ (JE), when the children of Israel were at Hazeroth, Miriam and Aaron 'spake against' Moses on account of his marriage with an Ethiopian (RV 'Cushite') woman. In the sequel, however, Moses' conduct in this matter is neither impugned nor defended; for the complaint brought by Miriam and Aaron turns into a claim of equal inspiration with Moses (v. 2)—a claim which is refuted by J' in a theophany, while Miriam is punished with leprosy, from which she is immediately relieved through Moses' intercession made at Aaron's request, but has nevertheless to be confined for seven days (v. 4th). As the 'Ethiopian woman' is mentioned nowhere else, and the death of Moses' wife Zipporah is not recorded, some of the early interpreters thought the two must be identical; and this view is favoured by the Jewish expositors, who assign reasons for Zipporah's being called Eth. that are either frivolous (as Rashi) or merely uncritical (as Ibn Ezra); Rashi's interpretation being as old as Targ. Onk. On the other hand, LXX has Ἀθίοπισσα, and Jos. (*Ant.* II. x. 2) makes her an Eth. princess. If the woman mentioned in Nu be identical with Zipporah, the word *Káshith* must be used in the sense of non-Israelite—a usage which

is found in late Rabbin. writings (Levy, *NHWB*), and cannot be dissociated from the similar employment of *Káthi* (properly Samaritan). But besides the improbability of this usage being found in the Bible, the text implies (though it does not expressly assert) that the marriage was of recent occurrence. It is therefore more likely that a black slave-girl is meant, and that the fault found by Miriam and Aaron was with the indignity of such a union; and this accords with the statement (v.³) that Moses was the 'meekest' of mankind. The employment of Nubians as slaves dates back to the early dynasties of Egypt (cf. Brugsch, *Gesch. Ägypt.* p. 266). Although no etym. of the name Hazereth is given in the text, this word (from the Arab. *hazara*, 'confine') would seem to stand in some etymological connexion with the confinement of Miriam. Perhaps it is merely accidental that the word *hazir* in Arab. is employed in an idiom meaning to 'calumniate' (Maydani, c. 3); albeit this double etym. would contain implicitly a large portion of the narrative. D. S. MARGOLIOUTH.

ETHIOPIC VERSION.—This subject will be treated under the following heads:—

- i. The Ethiopic Canonical Books.
- ii. The Manuscripts.
- iii. Printed Editions.
- iv. Source of the Text.
- v. Critical Value.
- vi. Date.

i. THE ETHIOPIC CANONICAL BOOKS.—(A) *Old Testament.*—The Eth. OT embraces all the books included in the LXX (except the Books of the Maccabees), together with several others, such as the Book of Enoch, Jubilees, 4 Ezra, Rest of the Words of Baruch, etc. The Maccabees were either never translated or else were early lost. Since, however, the Eth. scholars found the titles of these books in their *Sinódós* and *Fetha Nagast*, they proceeded to supply them from their own imagination. In this way these books came into circulation (Dillmann). In later times, indeed, the Latin version of these books was translated into Ethiopic. (See Wright, *Cat. Eth. MSS Brit. Mus.* p. 14.) No distinction whatever appears to have been made between the canonical and the uncanonical books of OT. The number of books in OT is set down unanimously at 46, but hardly two lists of these books agree. As a rule, the apocryphal and pseudepigraphal books which appear in one list are replaced in another by quite different works of the same class of literature. (See Walton's *Polyglot* i., Proleg. p. 100; Dillmann in Ewald's *Jahrbücher d. bibl. Wissenschaft*, v. 1853, pp. 144-151; Fell, *Canones Apostolorum Ethiopice*, p. 46.)

(B) *New Testament.*—35 books are reckoned in NT. This number is arrived at by including a book of Canon Law with the usual 27 books of NT. As this work, called the *Sinódós*, is counted as 8 books, we thus get 35 in all. (See Zotenberg, *Cat. des MSS Ethiopiens de la Bibliothèque Nationale*, p. 141 ff.; Ludolf, *Historia Ethiopica*, III. iv. 27; Vansleb, *Histoire de l'Église d'Alexandria*, 239 ff.)

The Western division of the Bible into chapters made its way into Abyssinia through the contact in later times of the latter with Western Christendom. The older MSS exhibit quite a different division of the books.

ii. THE MSS OF THE ETHIOPIC VERSION.—The chief MSS of OT, the Apocrypha and Pseudepigrapha, and of NT will be found in the following catalogues:—Wright, *Ethiopic MSS of the British Museum*, OT and Apocr. pp. 1-22, NT pp. 23-29, 1878; Zotenberg, *Catalogue des MSS Ethiopiens de la Bibliothèque Nationale*, OT and Apocr. Nos. 1-31, 49-51, NT Nos. 32-48; D'Abbadie, *Catalogue*

Raisonné de MSS Ethiopiens, Paris, 1859, OT and Apocr. Nos. 16, 21, 22, 30, 35, 55, 99, 105, 117, 137, 141, 149, 195, 197, 203, 204, 205. Some of these MSS contain only single books. MSS of Enoch are found in 16, 30, 99, 197; Gospels, Nos. 2, 9, 47, 82, 95, 112, 173; Pauline Epp. 9, 119, 164; Cath. Epp., Apoc. and Acts, 9, 119, 164. Dillmann, *Catalogus MSS Ethiop. in Bibliotheca Bodleiana*, 1848, OT and Apocr. 1-9, NT 10-15. There are small collections of MSS also in Berlin. See Dillmann, *Abessinische Handschriften der Königlichen Bibliothek zu Berlin*; OT and Apocr. Nos. 1-6, of the Psalms 7-19; NT 20, 21. Of these, No. 1 is a MS of Enoch. For the MSS in Vienna, see *ZDMG* xvi. p. 554; in St. Petersburg, see *Bulletin scientifique publié par l'Académie impériale des Sciences*, ii. 302, iii. 145 ff.; in Tübingen, see *ZDMG* v. 164 ff. There are also a few MSS in Frankfort of some value, and in private libraries in England.*

iii. PRINTED EDITIONS.—We shall mention only a few of these. For further information the reader may consult Le Long, *Bibliotheca Sacra*, 1878, ii. 140-157; Fell, *Literarische Rundschau für das Kathol. Deutschland*, Feb. 1, 1896.

(A) *Old Testament.*—Of OT Dillmann has edited vol. i. Gn-Ruth, 1853 (some of the best MSS were inaccessible when this volume was edited); vol. ii. Samuel and Kings, 1861-1871; Joel (in Merx, *Die Prophetie des Joels*). The Psalms were edited by Ludolf in 1701, and in the various Polyglots and by the Bible Society. Bachmann published texts of Isaiah, Lamentations, and Malachi. The text of the last two books neither adequately nor accurately represents the best Ethiopic MSS in Europe.

(B) *Apocrypha.*—The honour of publishing the first Apocryphal texts belongs to Oxford. Thus Laurence edited the Ascension of Isaiah in 1819, the Apocalypse of Ezra in 1820, and the Book of Enoch in 1838. These are valuable now only from an historical point of view. Dillmann has given us a splendid edition of the Apocryphal books, Baruch, Epistola Jeremiae, Tobit, Judith, Ecclesiasticus, Sapientia, Esdrae Apocalypsis, Esdras Graecus (1894). He edited texts also of Enoch (1851), Jubilees (1859), and the Ascension of Isaiah (1877). In 1893 Charles published an edition of Enoch, in which there is a continuous correction of Dillmann's text from 10 hitherto uncollated MSS, and in 1894 the Ethiopic text of Jubilees from 4 MSS.

(C) *New Testament.*—The NT was first printed at Rome in 1548-49 by the Abyssinian Tasfá-Sion, with the omission, however, of the 13 Pauline Epistles. As the translator possessed only a fragmentary MS of the Acts, he supplied an Eth. version of the missing chapters from the Greek and Latin. This edition, which is disfigured by countless errors, was reprinted in Walton's *Polyglot*. Another edition, *Nov. Testamentum . . . Ethiopice, ad codicum manuscriptorum fidem*, was issued by T. P. Platt for the Brit. and For. Bible Society, 1826-1830. A reprint of this edition appeared at Basle in 1874. These editions are of no critical value.

iv. SOURCE OF THE TEXT.—(A) *Old Testament.*—The Ethiopic or Geez version, which from the earliest times was universally used in all branches of the Abyssinian Church as well as amongst the Jewish Falashas, was, according to some of the poets of the country, derived from the Arabic, its authors being variously said to be the Abba Salâmâ (= Frumentius, the Apostle of the Abyssinians, according to Ludolf, see Zotenberg, *Cat. des MSS Eth.* pp. 3, 4, or a later Abba Salâmâ,

* See also Margoliouth's art. on the Eth. VS in Miller's edition of Scrivener's *Introduction to the Criticism of the NT*.

see Zotenberg, 194; Dillm. *Zur Gesch. des axum. Reichs*, p. 20) or the holy Nine (Guidi, *Le traduzioni degli evangelii in arabo e in etiopico*, p. 33, note). But Ludolf saw reason for doubting this view later (*Historia aethiopiae*, pp. 295, 296) when he came to recognize that the Ethiopic version was closely dependent on the text of the LXX. Subsequent investigation has tended to substantiate the later view of Ludolf. Hence the view of Renaudot, that the version was made from the Egyptian, must be summarily rejected; likewise the preposterous theory of Lagarde, that it was derived either from the Egyp. or Arab. in the 14th cent.

It is unquestionable that our version was made in the main from the Greek,—in the main, for there are certain phenomena in the MSS which cannot be explained from this hypothesis alone. These we will touch upon presently, and in the meantime give Dillmann's account of the various texts attested by the MSS. In his *V.T. Aethiopicæ*, Tom. i. apparat. crit. p. 8 (1853), he draws attention to a large number of readings which agree with the Hebrew against the LXX, and suggests that these are due to the use of the Hexapla of Origen. Later he revises this theory and replaces it by another; thus in Herzog's *RE*, 1877, i. 205, he writes that there are three distinct types of text. i. The original translation more or less corrupted but seldom represented in the MSS. (See also Zotenberg, *op. cit.* 3, 5, 7, 8.) ii. A text revised and completed from the Greek, and found most frequently in the MSS. This is the Eth. *Kawê* or *Textus receptus*. iii. A text corrected from the Hebrew, younger in age. See also *V.T. Aethiopicæ*, Tom. ii. Fasc. i. apparat. crit. pp. 3-6. This theory has been accepted by Zotenberg, and lately by Prætorius, Herzog's *RE*³ iii. p. 87 ff.

It is possible, however, to interpret the evidence otherwise. Thus Dillmann may be wrong (a) in his later rejection of his first theory that the Hexapla of Origen was used by the Eth. translators, and (b) in attributing all Eth. transliterations of Heb. words and many Eth. readings which agree with the Heb. against the LXX to the work of later scholars correcting from the Heb. text.

Some evidence will now be cited which points in this direction. This evidence will be drawn from Lamentations and Malachi. First as regards (a), we find that in La 2¹³ the Eth. *astamâslaki* agrees exactly with the version of Symmachus *ἐξισώσω* *σε* against the Heb., LXX, and all other Gr. VSS. Likewise in 3⁴⁴ and 5¹⁵ our text again agrees with Symm. against the LXX, but this time it is in harmony with the Hebrew. As some other divergences from the LXX can be explained by this version and that of Aquila, it seems reasonable to conclude that the Hexapla was used by the Eth. translators. These divergences, however, may have been derived directly from the Heb. text. In many passages in all the biblical books the Eth. version is independent of and attests a purer form of text than the LXX. Next as regards (b), it is just as likely that many of the transliterations of Heb. words which are found in certain Eth. MSS,* but not in the LXX, may be survivals of the earliest form of the text made directly in many cases from the Hebrew. If they are all to be ascribed to the corrections of later scholars, how are we to account for their appearance in all MSS of La 3¹² and Job 16¹²? What we usually find in the history of a version is that the unintelligible or foreign words are by degrees displaced either by their native equivalents or by emendations, or

else they are simply omitted. The theory that the primitive Eth. version contained a large number of words transliterated from the Heb. receives some confirmation from the fact that the Abyssinians first received Christianity through Aramæan missionaries, and that very many Aram. words were actually naturalized in order to express the new doctrines of the Christian faith. The Levitical character of Ethiopic Christianity points in the same direction, *i.e.* its acceptance of the rite of circumcision, and the Levitical laws regarding the purification of women.

Until, however, we have a complete and critical edition of the Eth. version, it will not be possible to settle finally the above questions. Even Dillmann's edition (vols. i. ii. v.) is inadequate for this purpose, as vols. i. and ii. were completed before the best MSS were accessible.*

(B) *New Testament*.—Zotenberg (*Cat. des MSS Éth. de la bibliot. Nat.* pp. 24, 25, 30, 1877) showed that there were two forms of text present in the MSS,—the first, that which was made from the Greek original; the second, a corrected text. In the same year Dillmann (Herzog's *RE* i. pp. 203-206) suggested that the numerous variations in the more widely read books of the NT, such as the Gospels, were due to the influence of the Copt. and Arab. versions. That such versions were known in Abyssinia he infers on the following grounds: Prolegomena translated from the Arab. were prefixed to the NT writings; names of NT books derived from the Arab. displaced occasionally in later times the native nomenclature of the NT books; *e.g.* the Acts were called *Abraxis* (= Πράξεις), Revelation *Abukalamis* (Ἀποκάλυψις). The Arabic-Coptic *Sinódos* became early naturalized in the Eth. Church.

These hints of Dillmann's are further developed by Guidi, who pointed out that such corrections are derived from an Arab. tr. circulating in Egypt (Guidi, *Le Traduzioni degli Evangelii in Arabo e in Ethiopico*, Accad. Lincei, 1888, p. 33 ff.). The MSS are affected in various degrees by these corrections. In some they appear side by side with the original text.

v. CRITICAL VALUE.—The Eth. version of the OT is generally a very faithful and verbal tr. of the Greek. It frequently reproduces the very order of the words. On the other hand, it is not possible to explain many of its readings by any extant Gr. text, and over-against the LXX it frequently attests a purer text. But its critical value cannot be determined until the questions discussed in the preceding section have been treated exhaustively.

As regards the NT, this version is related to the older type of text attested by the great Greek Vatican and Sinaitic MSS. It has also Western and Alexandrian and Syrian elements. But no critical text has yet been published.

vi. DATE.—Dillmann (Herzog's *RE* i. 203, 204) confidently ascribes the Eth. version to the 4th and 5th centuries of our era, and regards it as constituting not only the oldest memorial but also the foundation of Eth. literature. This conclusion he draws from the following facts: i. Christianity was already firmly established in the 5th cent. ii. The poet and musician Jared had already produced a church hymn in the 6th cent. iii. Chrysostom † (*Hom. in Johan.*, Opera

* For many interesting details see Beekendorf, 'Ueber den Werth der altäthiopischen Pentateuch-Übersetzung für die Reconstruction der Septuaginta,' in *ZATW* (1887) pp. 61-90. Among other points he controverts Cornill's view in his Commentary on Ezekiel (p. 67 ff.), that the Ethiopic version is derived from the Hesyehian recension of the LXX.

† ἄλλὰ καὶ Σύροι καὶ Αἰγύπτιοι καὶ Ἰνδοὶ καὶ Πέρσαι καὶ Αἰθίοπες . . . ἐκ τῆν αὐτῶν μεταβαλόντες γλώτταν τὰ παρὰ τούτου δόγματα ἐισαχθῆναι, κ.τ.λ.

* Such as the MS E for the books of the Kings. See Dillmann, *op. cit.* ii. apparat. crit. p. 5; see also Zotenberg, *Cat.* pp. 9, 10, 11 on *Version corrigée d'après le texte hébreu*. Dorn called attention as early as 1825 to the use of the Heb. text in his Introduction to Ludolf's edition of the Psalter.

[Montfaucon], viii. p. 10) appears to have known of an Eth. version of the Bible. iv. The version is made directly from the Greek. Now, it was only in the first period of Eth. literature that translations were made from the Greek; for after the appearance of the Arab. language in Egypt, Eth. literature came under the sway of the Arabic.

The above views of Dillmann have recently been confirmed by the peculiar title used for God in Sir 31⁸ 37²¹, i.e. *Astâr*. This shows that heathenism still prevailed when this book was translated (Dillmann, *V.T. Æthiopici*, Tom. v. p. 117). Guidi assigns the version to the end of the 5th and the beginning of the 6th cent. Lagarde's view (*Ankündigung einer neuen Ausgabe der griech. Uebersetzung des A.T.s*, 1882, p. 28), that the version was made in the 14th cent., not from a Gr. but from an Arab. or an Egyp. translation of the original, is wholly contradicted by the evidence. We may safely assume that the version was completed before the 7th cent.

R. H. CHARLES.

ETH-KAZIN (ἠθκζν), where AV, misunderstanding the *locale*, writes Iittah-kazin, as in same verse Gittah-hepher for Gath-hepher).—A town on the E. frontier of Zebulun, whose site has not been identified, Jos 19¹³.

J. A. SELBIE.

ETHNAN (ἠθנן).—A Judahite (1 Ch 4⁷). See GENEALOGY.

ETHNARCH (ἠθναρχος).—In 2 Co 11³² it is stated that 'in Damascus the ethnarch under Aretas the king guarded the city of the Damascenes,' the word ethnarch being tr. in both AV and RV by GOVERNOR. Its exact meaning seems doubtful: it is used of Simon the high priest (1 Mac 14⁴⁷ 15^{1, 2}), of Hyrcanus (Jos. *Ant.* XIV. x. 2), and of Archelaus (*Ant.* XVII. xi. 4; *BJ* II. vi. 3). It was also used for the governor of the Jews in Alexandria (Strabo, *ap.* Jos. *Ant.* XIV. vii. 2), and the head of the Jewish community in Pal. in the time of Origen (Origenes, *Ep. ad Africanum*, § 14). The last two instances suggest that the normal use of the word was for the ruler of a nation or *ethnos* living with separate laws and customs amongst those of a different race. But the sense of the term seems to have widened, and it became a little superior to that of tetrarch, but inferior to that of king (Schürer, *HJP* II. ii. 244, etc.).

A. C. HEADLAM.

ETHNI (ἠθני).—An ancestor of Asaph (1 Ch 6⁴, called in v. 21 *Jeatherai*). See GENEALOGY.

ETHNOLOGY.—See RACES.

EUBULUS (Εὐβουλος).—A leading member of the Christian community at Rome, who sends greeting to Timothy through St. Paul at the time of the second imprisonment (2 Ti 4²¹). His name is Greek, but nothing further is known of him.

W. LOCK.

EUERGETES (Prol. to Sirach).—See BENEFACTOR.

EUMENES (Εὐμενής, 'well-disposed') II., king of Pergamus, succeeded his father Attalus in B.C. 197. Through the friendship of Rome he secured a large extension of his territories, so that his kingdom became for a time one of the greatest in the East. In B.C. 169 he was suspected of secret correspondence with the enemies of Rome, but died (probably in B.C. 159; see Clinton, *F. H.* iii. 403, 406) before an open rupture took place. The principal authorities for his life are Livy (*Ann.*, esp. bk. xxxvii. and *Epit.* xlvi.), Polybius, and Appian, with Strabo xiii. p. 264, and Justin xxxi.

8, xxxii. 4. In 1 Mac 8⁸ the Romans are said to have taken 'the country of India and Media and Lydia' from Antiochus the Great, and to have given these dominions to E. The MSS agree in this reading, which is, however, impossible, since India was never under the rule of Antiochus. Media, too, on account of its eastward position, is not likely to have ever been ceded to E. The best correction is to substitute, with Michaelis, Mysia for Media, and, with Grotius, Ionia for India. In agreement with this are Livy's statements (xxxvii. 44) that the Roman Senate required from Antiochus the cession of all Asia north of the Taurus, and of these districts granted (xxxvii. 55) the part north of the Mæander to Eumenes. R. W. MOSS.

EUNICE (Εὐνίκη, so Tisch., WH, with all the uncial MSS; not *Εὐνείκη*, as TR with many cursives).—The mother of Timothy, and probably the daughter of Lois (2 Ti 1⁵). The name is Greek, so that conceivably she may have been a proselyte; but this is not a necessary inference, and more probably she was by birth a Jewess (*Ἰουδαία*, Ac 16¹). She was married to a Gentile husband, and, probably out of deference to his prejudices, her son was not circumcised; but she gave him a God-fearing name (*Τιμόθεος*), and trained him carefully in the OT Scriptures (2 Ti 3¹⁵). She was probably converted to Christianity on St. Paul's first visit to Lystra, as she is described as already a believer on the second visit (Ac 16¹). She is not mentioned afterwards, but the curious addition of *χήρας* (Ac 16¹) in cursive 25, and the substitution of it for *Ἰουδαία* in Gig. fu., may embody a tradition of her widowhood; this would give a fresh point to the injunction in 1 Ti 5⁴. W. LOCK.

EUNUCH (εὐνοῦχος, *εὐνοῦχος*).—*εὐνοῦχος* is rendered in AV eunuch, officer, chamberlain. The employment of eunuchs in Oriental courts was one of the base accompaniments of polygamy and despotism. The harems of the monarchs were committed to their charge, and they frequently superintended the education of young princes. Much influence was thus at times acquired by them in affairs of state (see Rawlinson, *Anc. Mon.* iv. 175). They were often closely connected with the palace intrigues, which played so important a part in Oriental history. It seems that the Heb. word was also used in a wide sense of persons not emasculated, who held offices which were usually entrusted to eunuchs. Such is probably its use in the case of Potiphar (Gn 39¹; Whiston's *Jos. Ant.* x. x. 2 n.). Where the word occurs in 1 and 2 K, it is sometimes difficult to determine whether it bears its proper or its derived signification. Herodotus (viii. 105) says that 'among the barbarians eunuchs are more valued than others on account of their perfect fidelity,' and instances the case of Hermotimus, who was highly esteemed by Xerxes. Xenophon (*Cyrop.* vii. 5. 60 ff.), in giving the reasons why Cyrus employed them, alludes to the alleged fact that their having no domestic ties rendered them capable of peculiar devotion to the interests of their masters, and of gratitude to those who conferred honour and consideration upon them. They also naturally adhered to one able to protect them, as they found themselves objects of contempt to other men. He denies the allegation that they are lacking in vigour and excellent qualities, and illustrates their tendencies by the case of 'dogs, which, when castrated, cease to desert their masters, but are not at all less fitted for watching and the chase.'

The Law of Dt 23¹ (cf. Lv 22²³) attaches a religious stigma to the condition. (See, for the prob. ground of this, Driver on Dt 23¹). The prediction in 1 S 8¹⁵ was designed to intimate the deterioration of the

national life consequent upon the establishment of the kingdom, through the adoption of unsanctioned Gentile customs. Acc. to Herodotus (vi. 32), the Persians made eunuchs of the goodliest of the youth of captured countries; but as to whether Daniel and his companions were thus treated by the Bab. conquerors, no absolutely certain conclusions can be reached (cf. 2 K 20^{17, 18}). Eunuchs were in the courts of the Herods in our Lord's time (Jos. *Ant.* xv. vii. 4; xvi. viii. 1); hence His allusion to them (Mt 19¹²) as familiar to His hearers. See ETHIOPIAN EUNUCH.

G. WALKER.

EUODIA, AV *Euodias* (Εὐδοία, fem. form of *Eὐδοίος*). Both names are found in Gr. literature and on the inscriptions. The *Euodias* of AV seems to have arisen from a mistake of the translators, who took *Eὐδοίαν* for the accusative of the masculine form *Eὐδοίας*, and regarded it as the name of a man.—A Christian woman of Philippi, whom the Apostle Paul beseeches 'to be of the same mind in the Lord' with another Christian woman named *Syntyche* (Ph 4²). They may have been deaconesses, or women of some position in whose houses the brethren were accustomed to meet. The language of St. Paul suggests a religious difference rather than a private quarrel (Ph 2²). They may have represented different types of piety, or may have differed on some question of church life. St. Paul begs a certain *Syzygus*, or, as some critics think, an unnamed 'true yoke-fellow,' to help forward the work of reconciliation, being mindful of the former services of these women to the cause of the gospel (Ph 4³). The theory of Baur, Schwegler, and Volkmar, that *Euodia* and *Syntyche* are symbolical names for Jewish and Gentile Christianity, is now generally abandoned. A mode of speaking so mysterious is out of harmony with the general tenor of the Epistle. J. GIBB.

EUPATOR (Εὐπάτωρ, 1 Mac 6¹⁷ etc., 2 Mac 2²⁰ etc.), the surname of Antiochus V., son and successor of Antiochus IV. Epiphanes. See ANTI-
OCHUS V.

EUPHRATES (ἠρῆ, Εὐφράτης).—The Euphrates was called *Pura-nun*, 'the great water,' or simply *Pura*, 'the water,' in Sumerian, the pre-Semitic language of Chaldaea (cf. Gn 15¹⁸). From this the Semitic Babylonians derived their *Purat* or *Purattu* with the feminine suffix. *Purat* is the Heb. *Pêrath*, the Old Persian *Ufrātu*, where the prosthetic *u* was explained as the word *u*, 'good,' and so gave rise to the Greek *Euphrates*. In the OT it is generally known as 'the river' (e.g. Dt 11²⁴, Ex 23²¹), it being the largest and most notable river of Western Asia, and accordingly in Gn 2¹⁴ alone of the rivers of Paradise no geographical description is given of it.* In Babylonia it was also called 'the river of Sippara' as well as the *Uruttu*, a dialectical form of *Purattu*.

The Euphrates (Arab. *Frat*) has two sources, one of which was called the Euphrates in antiquity; in Armenian, *Yephurat*; while the other, which rises to the south-east, the modern *Murâd-Su*, was termed the *Arsanias*, Arm. *Aradzani*, *Arzania* in the Assy. inscriptions. They rise in two valleys of Armenia, from 6000 to 6500 feet high, the one in the Anti-Taurus, the other in Mount *Ararat*, and unite near *Malatiyeh* (*Melitênê*, Assy. *Melid*) in a valley about 2000 feet high, whence they flow eastward through a narrow gorge towards Syria. From this point to the alluvial plain of Babylonia the fall of the river is about 1000 feet in 700 miles, so that it is navigable only down stream. The high road from east to west passed it in OT

* It is disputed whether Jer 13⁴⁷ really refers to the Euphrates see Ewald, *ad loc.*

times at *Birtu* (*Birejik*) and *Carchemish* (*Jerabis*). There was another passage at *Thapsakos*, the *Tiphisah* of 1 K 4²⁴. A little to the south of *Carchemish* was *Pethor* (Assyr. *Pitru*), on the western bank at the junction of the Euphrates with the *Sajur* (Assyr. *Sagura*). Still farther south, but on the eastern bank, it was joined by the *Belikh* (Assyr. *Balikh*) and *Khabûr* (Assyr. *Khabur*), which came from the land of *Gozan* (Assyr. *Guzanu*, 2 K 17⁶). At the mouth of the *Khabûr* was *Circesium* (now *Karkisia*, Assy. *Sirki*). After this the Euphrates receives no more affluents; but northward of *Sippara* or *Sepharvaim* it approaches the *Tigris* very nearly, and by again widening out forms the plain of Babylonia. The Euphrates and *Tigris* now unite before falling into the sea, owing to the accumulation of silt at the head of the Persian Gulf, but in OT times they still entered the sea by separate mouths. The water of the Euphrates was dissipated over Babylonia by means of canals for the purposes of irrigation, and at its mouth were great salt marshes, called *Marratu* by the Babylonians (see Jer 50²¹). Here lived the *Kaldâ* or *Chaldæans*, with their capital *Bit-Yakin*, of which *Merodach-baladan* was king.

LITERATURE.—Frd. Delitzsch, *Paradies*, 169 f.; Schrader, *KAT* 34 f.; Chesney, *Euphrates Exped.* vol. i.; Lottus, *Chaldaea and Susiana*; Layard, *Nin. and Bab.* chs. xxi.-xxii.; Rawlinson, *Herodotus*, i. Essay ix. A. H. SAYCE.

EUPOLEMUS (Εὐπόλεμος), the son of John, the son of Accos, one of the ambassadors sent to Rome by Judas Maccabæus, after his victory over *Nicanor*, in order to conclude an alliance between the Romans and the Jews in B.C. 161 (1 Mac 8¹⁷, 2 Mac 4¹¹, comp. Jos. *Ant.* xii. x. 6). *Eupolemus* has often been identified with the author of a history of the Jews, written in Greek, which is quoted by *Alexander Polyhistor*, *Clement of Alexandria* (*Strom.* i. 23), and *Eusebius* (*Præp. Ev.* ix. 30-34). Since the historian *Eupolemus* seems to have written about B.C. 157, and was almost certainly a Jew, this identification may be correct (comp. Schürer, *HJP* ii. iii. 203 ff.).

H. A. WHITE.

EURAQUILO.—*Euraquilo* (εὐρακύλων) is the reading adopted at Ac 27¹⁴ by WH and the RV, instead of *Euroclydon* in the TR and AV, as the name of the wind, which, suddenly descending from the heights of Crete on St. Paul's ship as it was sailing closely along the shore, seized it and drove it before the storm, which ended in the shipwreck on *Melita*. St. Luke describes the wind as, in character, 'typhonic' (RV 'tempestuous'), that is, marked by whirlwinds or 'sudden eddying squalls,' as Ramsay calls them, adding that 'every one who has any experience of sailing on lakes or bays overhung by mountains will appreciate the epithet "typhonic" which Luke uses' (*St. Paul the Traveller*, p. 326), and by way of greater exactness adds its nautical name, 'which is called' (ὁ καλούμενος). Unhappily, the state of the text leaves the precise name doubtful. A summary of the various readings will be found in *Sanday, Appendices ad NT*, p. 140. The great mass of later testimony yields 'Euroclydon'; the oldest uncials A⁸ have εὐρακύλων, and this was probably the reading of B*. To B² appear to be due the superimposed T and A which appear in this MS (ΕΤΡΤΑΚΥΛΩΝ). B³ then either turned Δ into Δ, or, if it was done by B², patched up the letter afresh. *Vercellone-Cozza* in the appendix to their facsimile say 'εὐρακύλων B', εὐρακλύδων B³. The Vulg. Cassiod. give *Euro-aquilo*. Apart from ampler attestation, *Euroclydon* may claim a preference as the more difficult reading, by positing which we may explain the others as emendations, but hardly the converse. The word in this form

is not found anywhere else. The meaning of the compound is obscure. Etymologically, it would mean 'a surge raised by Eurus,' the E. or S.E. wind, but such a description of the effect could hardly be applied to the wind itself which caused it. If we should take the form *εὐρακλύδων* (which occurs in B², one or two cursives, and a gloss of the *Etym. M. s.v. τυφών*, and is approved by Griesb.) and derive it from *εὐρός*, 'broad,' it would mean 'a wind raising a broad surge or surf'; but besides its lack of attestation, it is for the very reason of its greater suitability dismissed by Meyer as an obvious correction; and it would yield a character more or less applicable to any wind blowing strongly rather than such a note (e.g. of direction) as we might expect to be the basis of a distinctive nautical name. Eur aquilo, on the other hand, commends itself not only by its early attestation, but by its special precision, as made up of Eurus the S.E. or rather (as Smith adduces strong reasons for holding) the E., and Aquilo the N.E., wind, fitly expressing the direction E.N.E. whence this wind blew. It well accords (a) with the narrative of the incidence and effects of the storm, and (b) with the experience of navigators in the Levant, quoted by Smith and others, in which 'southerly winds almost invariably shift to a violent northerly wind.' The exception taken to the form as 'inadmissible' (Reuss and others), 'because it is composed of a Greek and a Latin element,' vanishes in presence of analogous compounds such as Euronotus and Euroauster, and of the probably mixed nationality of the sailors and traders to whom such coinages were primarily due; to say nothing of the survival, to which Renan calls attention, of the word *Euraquilo* itself in the name *Gregolia* given to the same wind by the Levantines 'as *Euripus* has become *Egripou*.' Following strict analogy, we might expect the word to be, as in the Vulg., *Euroaquilo*, and the presence of a less regular form may have led to conjectural emendation (Overbeck); but we can hardly see how this should have deviated into so enigmatic a word as Euroclydon. Meyer says, 'Far more naturally would the converse take place, and the *Εὐρακλύδων*, not being understood, would be displaced by the similar *Εὐρακίλων* . . . so that the latter form remains a product of old emendatory conjecture'—a curious anticipation, in this particular case, of the theory more recently formulated by Burgon and Miller as to the older witnesses whom they designate 'the licentious scribes of the West.' For them (*Causes of the Corruption of the Traditional Text*, p. 46 f.) this passage supplies a signal confirmation of their view, leading them to denounce in strong language Eur aquilo as 'an imaginary name,' 'an impossible Latin name,' 'utterly missing the point, which is the violence of the wind as expressed in the term Euroclydon' (a remarkable begging of the question, where the violence of the wind had already been explicitly affirmed in the epithet 'typhonic'!). Why should these early copyists be thus severely blamed for suspecting some corruption to underlie the anomalous Euroclydon, and preferring the more intelligible Eur aquilo on such grounds of internal probability as have since commended it to the majority of critics and commentators? But when we consider the mass of testimony on the side of Euroclydon, and the difficulty of accounting for the emergence of this form, if it had not been original, may we not find a feasible key to the solution of the problem in the view put forward by Conybeare and Howson (ii. p. 402 n.): 'The addition of the words *ὁ καλούμενος* seems to us to show that it was a name popularly given by the sailors to the wind; and nothing is more natural than that St. Luke

should use the word which he heard the sailors employ on the occasion?'

LITERATURE.—The subject is discussed in the 'Lives of St. Paul' by Conybeare and Howson, Lewin, and others; at considerable length, but with unequal relevancy, by Falconer, *Diss. on St. Paul's Voyage*, 2nd ed. pp. 12-19, 24-26; most fully and satisfactorily by Smith, *Voyage and Shipwreck*, in his 'Diss. on the wind Euroclydon,' p. 119 ff., with Appendices from Bentley and Granville Penn, pp. 287-292; cf. Blass, *ad loc.*

WILLIAM P. DICKSON.

EUTYCHUS (*Εὐτυχος*).—When St. Paul was at Troas on his final journey to Jerus., on the first day of the week he and his party, with the Christians of the place, assembled in an upper room to break bread. As St. Paul was leaving the next morning, his speech was lengthy, and a young man of the name of Eutychus, who was sitting at the window (*ἐπὶ τῆς θυρίδος*), fell asleep (perhaps owing to the heat of the many lamps that were lighted), and, falling down from the third storey, was taken up dead (*ἤρθη νεκρός*). St. Paul went down and embraced him, and bade them not trouble themselves, as his life was yet in him. Then he went upstairs, broke bread, and continued talking until the morning. As they departed the young man was brought to them alive (Ac 20⁷⁻¹²).

The incident occurs in the 'we' section of the Ac and is clearly authentic, but two opinions are held. It has been pointed out that it may be capable of a perfectly natural explanation, and it is suggested that it illustrates the growth of mythical stories on a basis of fact, and has been introduced here as a parallel incident to that related concerning Peter (9³⁶⁻⁴³). But Ramsay points out that St. Luke's language is very precise; that he does not, as in 14¹⁹, merely state that E. was thought to be dead, and that weight must be attached to his medical knowledge. Even if this be (as is perhaps the case) putting an unnatural strain on the words, it is perfectly clear that the story was related as an instance of the exhibition of power by the apostle, and that the writer, who was an eye-witness, believed it to be such.

LITERATURE.—Ramsay, *St. Paul the Trav.* p. 290; Holtzmann, *Hand-Commentar.* p. 402; Zeller, *Acts*, ii. p. 62, Eng. tr.

A. C. HEADLAM.

EVANGELIST (*εὐαγγελιστής*),—'a preacher of good news,' the substantive of *εὐαγγελίζω*—or *εὐαγγελίζομαι*, the commoner bibl. form). The verb is used in bibl. Gr. occasionally in the general sense of class. Gr. (1 S 31⁹, Lk 1¹⁰), and, when specialized, stands for the work of Gospel preachers of all kinds: the subst., however—which is rare, and entirely sacred and eccles., occurring in bibl. Gr. only in Ac 21⁸, Eph 4¹, 2 Ti 4⁵—is confined strictly to the Christian good tidings, and, apparently, to a particular office or function (see Hort, *Ecclesia*, 158). The clearest evidence for the distinctness of office or function lies in Eph 4¹ '[Christ] gave some to be apostles; and some, prophets; and some, evangelists; and some, pastors and teachers.' It is true that, in the list at 1 Co 12²⁸, evangelists are omitted (also *ἐπίσκοποι* and *διάκονοι*); but there the point is, perhaps, to illustrate spiritual aptitude rather than to give an exhaustive list of eccles. offices. When a similar omission occurs, Ro 12²⁻⁸, St. Paul seems bent chiefly on distinguishing certain charismata, being content to leave the catalogue incomplete. Possibly, in each case local considerations partly account for the omissions. But in Eph the context suggests that the writer desires to mention all the principal offices, whereby Christ had provided for the spiritual edification of the Church universal, and *εὐαγγελιστής* appears to come third in order of institution and of spiritual significance. At the same time it is noticeable that we do not find the word (even in places where it might naturally be looked for) in any of the Pauline Epistles whose

genuineness meets with most general acceptance. Subsequent reference will be made to the passage in the Pastoral Epistles, 2 Ti 4⁵; it will be sufficient here to say that the phrase *ἔργον ποιῆσον εὐαγγελιστοῦ*, 'do the work of an evangelist,' is too marked and peculiar to be satisfactorily interpreted as merely equivalent to 'preach the Gospel.' The third and last instance—that in Ac 21⁸ (a verse in one of the 'we' passages), 'we came unto Cæsarea; and entering into the house of Philip the evangelist, who was one of the seven, we abode with him'—must be compared with Ac 8⁵⁻⁴⁰, where it is said that among those who were scattered from Jerus. after the martyrdom of Stephen, and went hither and thither *preaching the word*, Philip preached the Christ at Samaria, *without being qualified* (v. 14¹) *to impart the Holy Spirit*; was sent *by the Spirit to teach* the Ethiopian eunuch in the desert between Jerus. and Gaza; was afterwards *carried off by the Spirit* and found at Azotus; and, finally, having evangelized 'all the cities' in his route, *took up his abode* at Cæsarea. He may therefore have been called *εὐαγγελιστής*, not because he had been definitely set apart for the office, but because of the missionary work he had done and was perhaps still doing with Cæsarea as centre. He had, in fact, been set apart for something else, 'to serve tables' (Ac 6¹⁻⁶, 21⁸), but had superadded, and possibly, in the end, substituted, the work of a missionary, because he was, like Stephen, 'full of the Holy Ghost' (Ac 6⁵), and possessed the charisma for the work of preaching to those who had not heard the Gospel before.

The three passages, as above discussed and illustrated, suggest the following conclusions: (1) *The evangelists were inferior to the apostles.* They are placed, third in order in Eph; Philip was unable to impart the Holy Spirit to the Samaritans; Timothy was the assistant and delegate of St. Paul. Consistent with this conclusion is the epigram of Pseudo-Jerome (*in Eph* 4¹¹) 'omnis apostolus evangelista, non omnis evangelista apostolus.' (2) *They were travelling missionaries, preaching the Gospel to those unacquainted with it, yet sometimes with a settled place of abode, as Philip at Cæsarea, and Timothy at Ephesus.* Thus they were officers acting for the whole Christian community, not for a single church only. Their function could be general, covering wide districts, or it could be, in practice, local and circumscribed. Thus Theodore's apparently contradictory statements can be reconciled: *περιὸντες ἐκέρυττον*, yet *μη περιὸντες πανταχοῦ*. 'Going about they used to preach,' yet 'not going about everywhere' (as apostles might do). (3) *They were charismatically endowed.* Compare the influence of the Holy Spirit upon Philip, and the *χάρισμα* of Timothy (1 Ti 4¹⁴, 2 Ti 1⁶). Yet the revelations to the prophet and apostle were of a higher and more striking order. The apostles were fitted to be the direct authoritative representatives of Christ (Mt 10⁴⁰, Gal 4¹⁴, 1 Co 11²³); the prophets, to sway the heart and conscience by the demonstration of the Spirit and of power (1 Co 14²⁴); the evangelists were more 'matter-of-fact men,' preaching the word, communicating the facts of the Gospel, paving the way for the more systematic work of the pastors and teachers (see order in Eph 4¹¹) who watched over and trained the churches when founded (2 Ti 4²⁻⁵). But while this may suffice for a distinction in *work*, it must not be taken as exclusive, so that apostles could not be prophets, or that apostles and prophets could not be evangelists, or that evangelists could not be pastors or teachers, or both. In the floating constitution of the half-organized early Church, different kinds of work were amalgamated (as must always happen) according to qualifications

and circumstances (cf. 1 Co 1¹⁷, Ac 8²⁵, and the mixed instructions to Timothy and Titus). (4) *They were, sometimes at any rate, solemnly set apart for the special function.* Thus Timothy (1 Ti 4¹⁴, 2 Ti 1⁶); and probably Paul and Barnabas (Ac 13¹⁻³) were (so far as the Church was concerned) set apart, in the first instance, not as apostles, but as evangelists from among the 'prophets and teachers' at Antioch.

But we are still left in much uncertainty as to the exact position of the *εὐαγγελιστής*, and this uncertainty is increased rather than diminished by the contributions of later literature to the subject. Why, for instance, is there no mention of evangelists in the Apostolic Fathers? Because, says Harnack, there was no definite primitive distinction between apostle and evangelist, and in the *Didaché* the 'apostles' are just evangelists. But why should not evangelist have survived, and apostle have been reserved (as in later days) for the first direct representatives of Christ? And, further, when in the *Didaché* the 'apostles' are forbidden to stay more than two days in the same place, can we regard them as parallels to Paul, or Philip, or Timothy, especially as in a letter to the last named such constant itinerancy is condemned (1 Ti 5¹³)? Of course the strict injunction in the *Didaché* may be due to the growing opportunities for imposing upon the hospitality of well-to-do Christians, and the missionaries referred to in 1 Ti may have been caricatures of the evangelist type; but the difference is striking. A partial reply to the former question may be that the extension of the apostolate beyond the Twelve and St. Paul (an extension obtaining apparently in the apostolic age itself) soon submerged the less familiar and less dignified name of evangelist. This, however, scarcely accounts for the speedy and growing exclusiveness of the apostolic title; or for the fact that Eusebius recognizes in Pantænus the evangelist a type of an old order still largely surviving in the days of the Alexandrian, but not common in his own days (Eus. *HE* v. 10).

The material Eusebius affords us on this subject, though to some extent unhistorical, throws back light on the primitive use of the term evangelist. He tells how Pantænus found that his arrival in India had been anticipated by the written Gospel of Matthew; he tells how Thaddæus, one of the Seventy, had been sent by the Apostle Thomas, under divine impulse, to Edessa, as a preacher and evangelist of the teaching of Christ (*HE* i. 13), and this 'teaching' (also called 'the seed of the word of God') is the story of Jesus (§ 19). We may combine these hints with the fact that Eusebius (leaving the rest unmentioned) avowedly records 'the names of those [post-apostolic evangelists] only who have transmitted the apostolic doctrine to us in writings still extant'; that Theodore definitely restricted the name to this class; that, finally, Œcumenius and Chrysostom confined the name to the writers of the Four Gospels; and that *εὐαγγελιστής* became (in the *Apostolic Ordinances*, Harnack, *Texte*, ii. 5) an appellation of the *ἀναγνώστης*, the reader of the Gospel for the day, who had also to be *διηγητικός*, capable of explaining it. We may further recall that Philip interpreted the prophet Isaiah to the eunuch; that Apollos (probably an evangelist) was mighty in the Scriptures; that he had been taught the 'way of the Lord' more perfectly by Aquila and Priscilla (probably evangelists also, as Theophylact believes); that Timothy the evangelist was strong in the Scriptures, one of the reasons doubtless for his choice; that Paul passes on to Timothy the 'deposit' of the Gospel he had received from Christ, exhorts him to keep the original model of sound words, and reminds him of the word that is trust-

worthy, and of the (open) mystery of godliness which is the story of Jesus (2 Ti 1¹², 1 Ti 6²⁰⁻¹⁵, 2 Ti 2^{11a}; cf. Tit 3⁸, 1 Ti 3¹⁶). We shall, then, favour the conclusion that the NT evangelists, as such, were depositaries of the facts of the Gospel as it gradually crystallized; dealing with these facts orally and in writing, now as missionaries, now as interpreters, without the special *σοφία* of the apostles, or their peculiar weight and authority; demi-apostolic men, with a charisma, but one not so commanding as that of the apostle, or so striking as that of the prophet. In a word, they might be called specially inspired *teachers*; the *εὐαγγελιστῆς* being distinctively and originally a teacher *abroad*, aggressive, awakening; the *διδάσκαλος* a teacher *at home*, quiet and edifying. If this was the practical difference between *evangelist* and *teacher*, we can better understand Eph 4¹¹ 'some (general and missionary) evangelists, and some pastors and teachers' (local officers with the double capacity for moral supervision and for instruction in doctrine). We can better understand 1 Co 12²⁸, where *διδασκάλους* (in the third place) would include evangelists. We can better understand how, in the letters to Timothy the 'evangelist,' so great a stress is laid on *teaching*. Furthermore, we can better understand the meaning of *teacher* in the *Didaché*, when the phrase, 'whoever cometh and teacheth, you,' is followed immediately by 'but in regard to the apostles and prophets' (ch. 11); here the teacher seems to be a wandering teacher, that is, an evangelist; and the order 'apostles and prophets' is so far against the supposition that the apostles are evangelists. This contention is confirmed by the order in other passages, e.g. (ch. 15) 'Bishops and deacons . . . they too render you the service of prophets and teachers' [when, i.e. you have none such sojourning among you]; for 'prophets and teachers' may 'settle among' them (ch. 13), though apostles may not.

If this progressive convergence of *evangelist* and *teacher* be a fact, it is easy to see how the title of apostle became increasingly exclusive, and how the title of evangelist gradually confined itself to the writers of the Four Gospels. See CHURCH, p. 433.

EVE (חַוְוָה *havvah*),* is the name given in J to the first woman, the wife of Adam, the mother of Cain, Abel, and Seth. In Gn 3²⁰ (which is sometimes regarded as a gloss) it is said that she was so named because *חַוְוָה* *חַוְוָה* *אֵם* *קַיִן* 'she was the mother of all living,' i.e. of course, 'all living men.' *חַוְוָה* is a form of the widespread Sem. root *ח*, *ח*, or *ח*, and = *life*, as LXX, *Oxf. Heb. Lex.*; rather than *living* (RVm *Living* or *Life*), or *life-giving* (Symm.), as if a shortened Pl. ptcp. W. R. Smith (*Kinship and Marriage in Arabia*, p. 177) makes *Havvah* a phonetic variation of *hayy*, and thus a personification of the bond of kinship, conceived as exclusively mother-kinship (*hayy*). Wellh. (*Proleg.* 308 n. Eng. tr.) follows Nöldeke in suggesting that *havvah* = *serpent*, as explained in Philo (*de agric. Noe*, § 21) and Midrash Rabba on Gn 3²⁰, and finds here a trace of the primitive belief that all earthly life originated in a primeval serpent (cf. the function of Tiamat in the Bab. cosmology, and Arab. *hayyatun*, serpent).

* LXX Gn 3²⁰ *Ἔβα*, 4l. 25 *Ἐβα* (the *Ἐβα* of v. 25 has no equivalent in the Heb.), so also in NT 2 Co 11³, 1 Ti 2¹³. In Gn 3²⁰ Aq. has *Ἀβα* or *Ἀβα*, and Symm. *Ἐβα*. Tisch. writes *Ἐβα* both in OT and NT, but WH (ii. 313) point out that in the absence of MS evidence as to breathings, the only safe guide is the initial *η* of the Heb. Cf. also the Vulg. *Heva*, both in OT and NT.

For Eve's relation to Adam, and the account of her in the narrative of the Creation* and the Fall, see ADAM. Her utterance on the birth of Cain, Gn 4¹, is very obscure,—*חַוְוָה* *אֵם* *קַיִן* 'I have gotten a man,' AV 'from the Lord,' with Targ. Onk.; RV 'with the help of the Lord,' with LXX, *διὰ τοῦ θεοῦ*; Vulg. *per deum*; Symm. *σὺν κυρίῳ*. Another Gr. tr. quoted in Field's *Hexapla*, *ἐκρησάμην ἀνθρώπων κύριον*, 'I have gotten a man, even the Lord,' has been adopted by Luther and others, and understood as expressing Eve's conviction that the promised Messiah of 3¹⁵ had been born. Umbreit proposed 'I have gotten J' for a husband.' The RV is the only probable translation. The text is possibly corrupt. (See CAIN).

W. H. BENNETT.

EVENING.—See TIME.

EVENT occurs thrice in Ec (2¹⁴ 9²⁻³) as the tr. of *mikreh* in the obsol. sense of 'that which befalls,' 'fate': as 9² 'There is one event to the righteous and to the wicked.' Cf. Shaks. 2 *Henry IV.* IV. ii. 83—

'Against ill chances men are ever merry,
But heaviness foreruns the good event.'

Elsewhere event is found only in the sense of 'issue,' 'result,' Wis 8⁸ '[Wisdom] foreseeth . . . the events of seasons and times' (*ἐκβάσεις*); 2 Mac 9²⁵ 'expect what shall be the event' (*τὸ ἀποβησόμενον*). This, which is the common meaning of Lat. *eventus*, is most frequent in writers of the time of AV, as Shaks. *T. of Shrew.* III. ii. 126—

'I'll after him, and see the event of this.'

The mod. sense of an occurrence is very rare in writers of the period. Carlyle quotes Cromwell (*Letters*, 12 Sept. 1650) '[We do not think] of the hand of the great God in this mighty and strange appearance of His; but can slightly call it an "event."' J. HASTINGS.

EVERLASTINGNESS.—For *everlasting* see ESCHATOLOGY. 'Everlastingness,' once common for 'eternity,' is now used only where its special signification is emphasized, as Cheyne, *Isaiah*, i. 242, 'The idea of the divine everlastingness is one of the primary notes of the prophecy.' It occurs only 2 Es 8²⁰ 'O Lord, thou that dwellest in everlastingness' (*qui inhabitas sæculum*, RV 'abidest for ever,' RVm 'inhabitest eternity'). Wyc. (1388) translates Is 57¹⁵ 'For the Lord high, and enhaunsid, seith these things, that dwellith in euerlastyngnesse.' J. HASTINGS.

EVERY is occasionally found in AV where mod. usage demands 'each,' as 2 S 21²⁰ 'a man of great stature, that had on every hand six fingers, and on every foot six toes'; 2 Es 3¹⁰ 'it came to pass in every of them' (RV omits); † Rev 21²¹ 'every several gate was of one pearl' (RV 'each one of the several gates'). Cf. Cranmer, *Works*, i. 111, 'In my right hearty wise I commend me unto you, and likewise

* The line of an Assy. Bab. magical text is often read as,
'The woman from the loins of the man they bring forth,'

and quoted as a parallel to the formation of Eve from the ribs of Adam. But when this line is correctly tr. and read in its context, the parallel entirely disappears; 'they' are demons, and the passage narrates their ubiquity and mischief; they enter houses through locked doors, like a snake or the wind, and

'A woman [who is] at the loins (?) of a man they lead away.
A child [who is] at the knee of a man they draw forth.
A noble [who is] at the house of his kindred they drive out.'

J. D. Davis, *Genesis and Sem. Trad.* 49.

See throughout, *Oxf. Heb. Lex.* *חַוְוָה*, Dillm. on Gn 3²⁰ 4l.

† Cf. T. Elyot, *The Governour*, ii. 4, 'he made as wel the great as the smal, and careth for euery of them equally.'

to everich * of you.' Cf. also Ex 35¹⁰ 'every wise hearted among you.'

Trench (*On the Auth. Ver. of NT*, p. 63) points out that both 'each' and 'every' take occasionally plu. concord, as Ph 2³ 'Let each esteem other better than themselves'; Rev 20¹³ 'They were judged every man according to their works.' He adds, "'each' and 'every,' though alike implying many, alike resolve that many into its units, and refer to it in these its constituent parts, with only the difference that "each" segregates, and "every" aggregates, the units which comprise it.'

J. HASTINGS.

EVI (עִי 'desire' (?)).—One of the five kings of Midian slain, Nu 31⁸, Jos 13²¹ (*Evi*) P.

EVIDENCE, EVIDENTLY.—Following Coverdale, AV has translated עֵבֶד, *sepher* (lit. 'book') by 'evidence' in Jer 32^{10, 11, 12, 14} *Jer.* 16, 44. The meaning is 'title-deeds.' Coke (1628) says, 'Writings under seale, as Charters and Deeds, and other writings without seale, as Court Rolles, Accounts, and the like . . . are called Evidences.' RV gives 'deed' throughout. Cf. T. Adams, *II Peter*, p. 23 (on 1²), 'Therefore a man should be often perusing and looking over his own evidence, as we review our assurances of worldly possessions, that he may be sure of the whole and every part of it: for it is dangerous to have any flaw or defect in our conveyance of salvation.'

'Evidence' is also the tr. of ἐλεγχος in its single occurrence in NT, He 11¹ (RV 'proving,' R^Vm 'test') 'Now faith is the substance of things hoped for, the evidence of things not seen.' This is the Bishops' tr., Wyclif having 'an argument of thingis not aperyng,' Tind. 'a certayntie of thinges which are not sene,' Gen. 'sheweth evidently the things which are not sene.'

'Evidently' is the tr. of φανερός, Ac 10² 'He saw in a vision evidently about the ninth hour of the day an angel of God coming in to him' (RV 'openly'); and of the prep. προ- in προεγράφη, Gal 3¹ 'before whose eyes Jesus Christ hath been evidently set forth crucified' (RV 'openly'). In both places 'evidently' has the obsol. meaning of 'clearly,' 'distinctly,' as in Knox, *Hist.* 261, 'And lest that your Honors should doubt in any of these premises, we offer ourselves evidently to prove, That,' etc.

J. HASTINGS.

EVIŁ.—This word is likely to become obsolete except in the theological sense of the doctrine of evil (for which see SIN).† In AV it is freely used as subst., adj., and adverb. 1. As subst., often in immed. antithesis to 'good,' as Gn 2⁹ 'the tree of knowledge (RV 'the knowledge') of good and evil' (עֵץ הַיָּדָעַת; 2 Es 2¹⁴ 'I have broken the evil in pieces, and created the good' (malum et . . . bonum): sometimes in the plu., as Pr 14¹⁰ 'The evil bow before the good' (עָוֹן לִפְנֵי יְשׁוּעָה); 2. As adj. 'evil' is applied, not only to things, but even to persons, a usage now quite obsolete; thus Jer 12¹⁴ 'all mine evil neighbours.' Cf. Knox, *Hist.*

* 'Every' is 'ever each'; the above example shows it in process of formation; and the two words are often practically interchangeable, as Milton, *Comus*, 311—

'I know each lane and every alley green.'

† The loss of 'evil' seems to be the result of a discrimination in words with cognate meaning. The AV used 'evil,' 'bad,' 'naughty,' quite indiscriminately. Thus in Jer 24^{2, 3} 'the other basket had very naughty figs, which could not be eaten, they were so bad . . . the good figs, very good; and the evil, very evil, that cannot be eaten, they are so evil.' This goes farther in the way of variety than the earlier versions by introducing 'bad.' The Heb. is the same throughout, and RV gives 'bad' throughout.

In Mt 21⁴¹ the AV has followed the Bishops', 'he will miserably destroy those wicked men,' and has thus lost the force of the Greek (κακούς κακῶς ἀπολέσει ἀνάγκη). Tindale is no better, 'He will cruelly destroy those evil persons.' But Wyclif, 'He schal lese (=destroy) yuel the yuele men'; Rheims, 'The naughty men he will bring to naught'; and RV 'He will miserably destroy those miserable men,' all give the repetition its advantage.

283, 'He had a very evil woman to his wife.' For 'evil spirit' (Lk 7²¹ 8², Ac 19^{12, 13, 15, 16}) see DEMON. In Mt 5³⁷ 6¹³ RV prefers 'the evil one' to AV 'the evil,' and in 1 Jn 5¹⁹ for AV 'wickedness': see DEMON, and consult Lightfoot, *On a Fresh Revision*, pp. 269-323; Chase, *Lord's Prayer in Early Church* ('Texts and Studies,' I. iii.), pp. 71-167. The 'evil eye' is a Heb. expression for ENVY (which see). 3. As adv. chiefly in the phrase 'evil entreat' (Ex 5²², Dt 26⁶, Job 24²¹, To 10¹², Sir 7²⁰ 33³¹, Ac 7⁶): the other phrases are 'went evil with' (1 Ch 7²³); 'evil affected' (Ad. Est 13³, Ac 14²); 'evil spoken of' (Sir 38¹⁷, Ro 14⁶, 1 Co 10³⁰); 'fare evil' (Sir 3²⁶). Cf. Grindal, *Letter to Q. Eliz.* (Parker Soc. ed. p. 381) 'Much like to the Popish Bishops in your father's time, who would have had the English translation of the Bible called in, as evil translated; and the new translating thereof to have been committed to themselves; which they never intended to perform.'

Evilfavouredness.—See FAVOUR.

J. HASTINGS.

EVIŁ-MERODACH (מֶרֶדַּח) was the son and successor of the great Nebuchadnezzar on the throne of Babylon. According to 2 K 25²⁷⁻³⁰, he promoted the captive king of Jerus., Jehoiachin, in the 37th year of his captivity, set his throne above the thrones of the kings who were with him in prison, changed his prison garments, and made him a guest at the royal table to the end of his life. The Sept. reads Εὐαλμαρωδέκ, and Berosus Ἀμλμαρωδόκος. The cuneiform equivalent of his name is Amēl(Avēl)-Maruduk (cf. Haupt in *Zeitsch. f. Assyriol.* ii. 266 and 284 f.), 'man (servant) of Merodach.' According to Berosus, he administered the kingdom during his two years' reign (562-560) with indiscretion and wanton unrestraint. Tiele (*Bab.-Assyriol. Ges.* pp. 457, 464) concludes, on the basis of this character of E.-M., that the benevolent act towards Jehoiachin should be attributed to his successor on the throne of Babylon. We possess as yet none of his annals, though several contract tablets date from his reign. In the year 560 his brother-in-law, Neriglissar (*Nergal-sar-usur*, 'Nergal preserve the king'), in a conspiracy, slew him and seized the throne.

LITERATURE.—Meyer, *Gesch. d. Alterthums*, vol. i. p. 507; Delitzsch, *Heb. Lang.* p. 12; Boscawen, *Trans. Soc. Bib. Arch.* vol. vi. p. 1 ff.; and authorities above cited.

IRA M. PRICE.

EVIŁ SPEAKING.—See SLANDER. **EVIŁ SPIRIT.**—See DEMON.

EXACT.—1. The adj., only Sir 51¹⁹ 'In my doings I was exact' (ἐν ποιήσει μου διεκριβασάμην A, but B has ἐν ποιήσει λιμοῦ διεκριβασάμην, 'in the doing of hunger (?) I was exact'; Fritzsche suggests, and most edd. adopt, νόμου, 'in the doing of the law'). Here 'exact' means 'strict,' 'particular,' as Shaks. *Troil. and Cres.* iv. v. 232—

'Now, Hector, I have fed mine eyes on thee;
I have with exact view perused thee, Hector,'

and Herbert, *The Temple*: 'Faith,' l. 43—

'What though my bodie runne to dust?
Faith cleaves unto it, counting every grain
With an exact and most particular trust,
Reserving all for flesh again.'

2. As verb frequently. Notice Ps 89²² 'The enemy shall not exact upon him' (בִּלְמַד לֹא יִשְׁאָל, R^Vm 'do him violence'): the mod. phrase is 'impose exactions upon.' Cf. Burnet (1687), *Trav.* ii. 86, 'Innkeepers think they have a right to exact upon Strangers.'

In Lk 3¹³ RV has changed 'Exact no more than that which is appointed you,' into 'Extort no more,' etc. But 'exact' was surely strong enough; were they permitted to extort anything? Tind. has 'require.' Following the Vulg. *faciat*, Wyclif has 'do ye no more,' and Rheims 'Doe nothing more,' which seems a natural reply to 'What shall we do?' But the Greek verbs are not the same, Τί ὧν ποιήσωμεν (TR ποιήσωμεν) and Μηδὲν . . .

πράσσει; and πράσσει has the sense of *exacting* both in class. Greek and in Lk 19²³ (EV 'require'). *Agere* is similarly used in Lat., and might have been chosen by Jerome here.

Exactly is found 2 Es 16⁶⁴ 'The Lord will exactly search out' (scrutinando scrutinabit), and Sir 16²⁵ 'declare his knowledge exactly' (ἐν ἀκριβείᾳ). The sense is the same as 'exact' above, i.e. 'precisely'; cf. Shaks. *Temp.* I. ii. 499—

'But then exactly do
All points of my command.'

J. HASTINGS.

EXCEED.—The transitive use is now rare and almost confined to the sense of 'preponderate,' as Jowett, *Plato*², v. 76, 'Men always choose the life which exceeds in pleasure.' But in AV we find the sense of 'go too far,' without introducing a comparison, 1 S 20⁴¹ 'They . . . wept one with another, until David exceeded' (תִּגְדַּל); Job 36⁹ 'Then he showeth them their work, and their transgressions that they have exceeded' (תִּגְדַּל); RV 'have behaved themselves proudly'; 2 Es 4²⁴ 'Do not thou hasten above the most Highest: for thy haste is in vain to be above him, for thou hast much exceeded' (*excessus tuus multus*, RV 'for he that is above [hasteneth] on behalf of many,' reading *Excelsus autem propter multos*, after Syr.): so Coverdale's tr. of Is 31⁶ 'Therefore (O ye children of Israel) turne agayne, like as ye have exceeded in your goinge back' (AV and RV 'have deeply revolted'), and Bacon, *Advancement of Learning*, II. ix. 3 (Selby's ed. p. 53) 'the scruples and superstitions of diet . . . in the law of Mahomet, do exceed.'

Exceeding is rare as an adj., only eight times,* while as adv. it is used 60 times at least, when it always qualifies an *adj.* Thus Mt 8²⁸ 'There met him two possessed with devils, coming out of the tombs, exceeding fierce' (χαλεποὶ λίαν; so Rheims; but Tind. Cov. Cran. and Gen. 1557, 'out of measure fierce'; Gen. 1560 and Bishops', 'very fierce'; Wyc. 'ful wood').

Two cases of 'exceeding' as adv. demand attention: Jon 3⁸ 'Nineveh was an exceeding great city,' and Ac 7²⁰ 'Moses . . . was exceeding fair.' The Heb. of Jon 3⁸ is מְעַלְמַי לְהִלְוֵי עִירָא, lit. 'a city great unto God,' as RVm; and the Gr. of Ac 7²⁰ is ἄσκητος τῷ Θεῷ, lit. 'fair unto God,' as RVm again. AV and RV agree in taking both passages as a form of the superlative; and this is supported by 1 Ch 13²² 'a great host, like the host of God.' But in the only other place where the identical expression occurs, Gn 10⁹ (יָמֵי לְפָנֵי יְהוָה), AV and RV give 'a mighty hunter before the Lord'; and it is probable that in the three passages the intention is to express, not merely the superlative, but the *ideal* of might, greatness, beauty, such as could be admitted into the presence of the All-perfect. There are similar expressions in the Psalter, Ps 36⁸ AV 'the great mountains,' RV as Heb. 'the mountains of God'; 65⁹ 'the river of God,' AV and RV; 80¹⁰ AV 'the goodly cedars,' RV as Heb. 'cedars of God'; 104¹⁶ AV and RV 'the trees of the Lord'; but Perowne (*Jonah*, l.c.) is right in pointing out that in these passages the thought is different, being that of God's proprietorship, as indeed the last passage indicates, 'which he hath planted.'

Exceedingly also occurs some 50 times, being the form used with *verbs* (except Ac 26¹¹, Gal 1¹⁴, passages in which AV first of Eng. versions uses this word). 'More exceedingly' is found Mk 15¹⁴ (TR περισσώτερος, edd. περισσῶς, RV 'exceedingly'),

* The eight occurrences of 'exceeding' as an adj. are 2 Mac 8²⁷ 'yielding e. praise and thanks to the Lord' (παινήσαντες καὶ ἰσχυρολογούμενοι τῷ Κυρίῳ, RV 'blessing and thanking the Lord exceedingly'); 15⁸ 'in e. pride and haughtiness' (μετὰ πάσης ἀλαζονείας ὑψαυχενῶν, RV 'bearing himself haughtily in all vaingloriousness,' RVm 'carrying his neck high'); 2 Co 4¹⁷ 'a far more e. and eternal weight of glory' (καὶ ὑπερβολὴν εἰς ὑπερβολὴν αἰώνιον βάρους δόξης, RV 'more and more exceedingly an eternal weight'); 9¹⁴ 'for the e. grace of God' (διὰ τὴν ὑπερβάλλουσαν χάριν); Eph 1¹⁹ 'the e. greatness of his power' (τὸ ὑπερβάλλον μέγθος); 27 'the e. riches of his grace' (τὸ ὑπερβάλλον πλοῦτος); 1 P 4¹³ 'that ye may be glad also with e. joy' (ὡς καὶ . . . χαρῆτι ἀγαλλώμενοι); Jude 24 'with e. joy' (ἐν ἀγαλλιάσει, RV 'in e. joy'). Thus in every instance the meaning is 'surpassingly great'; the word never has the sense of excessive or immoderate, which we find, e.g., in Sandys, (1585) *Sermons*, 315, 'Why was Anna so exceeding in craving children at the hands of God?'

Gal 1¹⁴ (περισσώτερος); and 'exceedingly the more,' 2 Co 7¹³ 'e. the more joyed we' (περισσώτερος μάλλον ἐχάρημεν). Notice also 'very exceedingly,' Gn 27³³ 'And Isaac trembled very e.' (קָרַע וְיָקַר וְיָרָא וְיָרָא וְיָרָא, lit., as AVm, 'trembled with a great trembling greatly'; LXX, ἐξέστη δὲ Ἰσαὰκ ἐκστασιν μεγάλην σφόδρα; Geneva, 'Then Izhák was stricken with a meruelous great feare'; Bishops', 'And Isahac was greatly astonished out of measure'; Dillmann, 'Da erschrak Isaaκ grossen Erschreckens über die Massen'; other translations are less forcible).
J. HASTINGS.

EXCELLENCY.—The verb to 'excel' occurs 13 times in AV, translating just as many different Heb. and Gr. words, but always distinctly with the sense of 'be pre-eminent over others,' 'surpass.' The idea of pre-eminence is seen even in Ps 103²⁰ 'ye his angels that excel in strength,' though the Heb. is כִּהְיֵה גִבּוֹרֵי כֹחַ, lit. 'heroes of strength'; for, as Delitzsch says, it is because to the angel hosts belong strength unequalled that they are summoned now to praise God in company with the Church on earth, whose dignity surpasses every other created thing.

Pre-eminence is also the leading thought in the word 'excellency.' 1. Sometimes the quality in which the pre-eminence appears is stated; thus Gn 49⁸ 'the excellency of dignity, and the excellency of power' (עָזָה וְקִדְמוּת), i.e. says Delitzsch, precedence, both in respect and in power, is due to Reuben above his brethren, because he is the first-born; Ezk 24²¹ 'I will profane my sanctuary, the excellency of your strength,' i.e. the place of pre-eminent strength (Heb. עֲרֹךְ קִדְמוּת, RV 'the pride of your power'); 1 Co 2¹ 'I . . . came not with excellency of speech or of wisdom' (καθ' ὑπεροχὴν λόγου ἢ σοφίας. 'The word ὑπεροχὴ denotes strictly the act of overhanging, or the thing which overhangs; hence superiority, pre-eminence: by Byzantine writers it is used in the sense "your Excellency" —Godet); Ph 3⁸ 'the excellency of the knowledge of Christ Jesus' (τὸ ὑπερέχον); 2 Co 4⁷ 'that the excellency of the power may be of God' (ἡ ὑπερβολή, RV 'exceeding greatness,' but 'superiority,' 'pre-eminence,' is always the meaning of the word). 2. More often the 'excellency' is of no special quality; but even then the Eng. word, as *understood* in 1611, though less precise is not less forcible than its Heb. or Gr. equivalents, for it has always in it the sense of superiority, uniqueness. Cf. *Pref. to AV* 1611, 'for the worth and excellency thereof above the rest'; *Pr. Bk.* 1552 (Keeling, p. 382), 'Forasmuch then as your Office is of so great excellency, and of so great difficulty'; Bacon, *Adv. of Learn.* II. xxiii. 27 (Selby, p. 149), 'Julius Cæsar . . . at first was an orator or pleader; but when he saw the excellency of Cicero, Hortensius, Catullus, and others . . . he . . . transferred his designs to a martial greatness.' The two words chiefly translated 'excellency' in AV are: (1) קָדַם *gá'dám* (Ex 15⁷, Job 37⁴, of J'; Ps 47⁴, Am 6⁸ 8⁷, Nah 2², of 'Jacob'; Is 60¹⁶ of Zion; Ezk 24²¹ of the temple; Is 13¹⁹ of the Chaldeans), a word which primarily means 'exaltation,' hence majesty which is pre-eminent; (2) קָדַם *gá'dámáh* (Dt 33²⁶, 29, Ps 68³⁴, all of J'), a word of less honour than the preceding, being used indeed most frequently of 'pride' in a bad sense; still it is not inaptly translated 'excellency' in those passages, the reference being always to the unique 'dignity' of J'. (See also Driver, *Joel and Amos*, 1897, p. 238 f.).

In old writers 'excellence' and 'excellency' are both in use without difference of meaning. Shaks. uses 'excellence' 19 times, 'excellency' only thrice; AV has 'excellency' 29 times, 'excellence' not once. 'Excellency' has now given place to 'excellence,' and the word has greatly deteriorated: the only

use of 'excellency' is as a term of courtesy, 'your Excellency,' which may be applied to any petty governor; and 'excellence' itself has accepted the vague sense of general worth. The deterioration may be partly due to the still greater loss that has befallen the adj. **excellent**. In AV 'excellent' is probably never used without a distinct expression of comparison, 'superior,' 'pre-eminent.' Cf. T. Adams, *II Peter* (1633), p. 83, 'Jacob gave Reuben a blessing, but added, Thou shalt not be excellent'; and p. 83, 'Cain's outlawed stock were yet excellent in worldly things.' But comparisons are odious; Shaks. has a fondness for using it ironically, and in course of time it has dropped down to merely 'very good.' J. HASTINGS.

EXCELLENT, or rather **MOST EXCELLENT**, is the regular tr. in RV for the word *κράτιστος*, used as a title of respect four times, and always by St. Luke (Lk 1³, Ac 23²⁶ 24³ 26²⁵). In AV 'most noble' is substituted in the last two instances. In three of those passages we clearly have the formal address of a person of high rank: 'Claudius Lysias unto the most e. governor Felix'; 'most e. Felix'; 'But Paul saith, I am not mad, most e. Festus'; in the fourth (Lk 1³) it is used in the address to Theophilus, to whom St. Luke dedicated both his works, and a question of some interest arises as to whether we can assert from the use of the term elsewhere that Theophilus must have been also of high rank and position. So Theophylact, *Arg. in Ev. sec. Luc*: 'He writes to Theophilus, a man of senatorial rank, and also a magistrate (*συγκλητικὸν ὄντα καὶ ἀρχοντα ἴσως*), for the word *κράτιστος* was used of magistrates and governors (*ἀρχόντων καὶ ἡγεμόνων*), as also Paul says, addressing the governor Festus: "Most e. Festus." The authority of a Byzantine commentator would, however, be delusive on such a question, as the meaning of language changes, and the question must be settled by contemporary usage.

1. There can be no doubt that from the 1st cent. onwards the word was an official title, but there is no proof that it was always so used. For instance in Jos., although in *Ant.* XVIII. viii. 4, xx. i. 2 we find the technical sense, in *Ant.* IV. vi. 8 (*ὁ κράτιστος νεανῶν*) it is certainly not so used, while in the dedication of the treatise against Apion to Epaphroditus, who was a freedman and procurator, the variation *κράτιστε ἀνδρῶν* seems to suggest a different tone (*c. Ap.* i. 1; *Vita*, 76). Cf. 2 Mac 4¹².

2. On the other hand, the usage of St. Luke seems more fixed. In those cases where the word occurs, it is certainly used as an official address, and is probably (we cannot say certainly) so used in the fourth instance. In any case there is certainly a difference in usage between St. Luke and Josephus, which makes it improbable that there is in this case any literary connexion between the two.

LITERATURE.—Otto, *De Epistola ad Diognetum*, 1845, p. 79, ed. ii. p. 51; Krenkel, *Josephus und Lucas*, p. 53; Ramsay, *St. Paul the Trav.* p. 388. A. C. HEADLAM.

EXCEPT.—The verb occurs only 1 Co 15²⁷ 'But when he saith all things are put under him, it is manifest that he is excepted, which did put all things under him,' that is, an exception is made in his favour, he is left out of account. This is Coverdale's trⁿ, and illustrates the oldest meaning of the verb. Cf. Shaks, *Jul. Cæs.* II. i. 281—

'Within the bond of marriage, tell me, Brutus,
Is it excepted, I should know no secrets
That appertain to you?'

In their Preface the translators of AV use 'except against' for take exception to; 'men not to be excepted against by them of Rome'; 'none of them feare to dissent from him, nor yet to except against him'; 'Truly (good Christian Reader) wee neuer thought from the beginning, that we should neede to make a new Translation, nor yet to make of a bad one a good one, (for then the imputation of *Siculus* had been true in some sort, that our people had bene fed with gall of Dragons in stead of wine, with why in stead of milke); but to make a good one better, or out of many good ones, one principall good one, not iustly to

be excepted against; that hath been our ideanour, that our marke.' Cf. Knox, *Hist.* 447, 'the sincerer sort of the Ministrie in England had not yet assaulted the jurisdiction and Church government (which they did not till the year 1572, at which time they published their first and second admonition to the Parliament), but only had excepted against superstitious apparell, and some other faults in the service Booke.'

As past ptep. of the verb to except, we find *excepted*, as Kingesmyll, *Man's Est.* v. (1580) 21, 'They eate of the excepted tree'; and Milton, *PL* xi. 426—

'Some to spring from thee, who never touch'd
Th' excepted tree.'

But more frequently *except* (as Tindale, *Works.* i. 213, 'Here is no man except, but all souls must obey'), and then very often *following* its subst., as Ac 26²⁹ Cov. 'these bondes excepte'; Bacon, *Adv. Learn.* i. (Selby's ed. p. 62, l. 8), 'the divineness of souls except.' When this ptep. *preceded* its subst. it came to be regarded as a prep., though it is obviously hard to say when the change took place. The earliest examples in *Oxf. Eng. Dict.* quoted as a prep. are Langland, *Piers Plowman* (B), ix. 140, 'Alle shal deye . . . Except oneliche of eche kynde a couple'; Henry, *Wallace*, v. 1026, 'Thai entryt in, befor thaim fand no man, Except wemen.' A little later began its use as a conj., introducing not a subst. but a clause, and being equivalent to 'unless.' In AV and RV it is used both as prep. and as conj., most frequently as conj. Once the conj. is strengthened by 'that,' Mk 13²⁰ 'except that the Lord had shortened those days' (RV omits 'that'). Cf. Jn 3³, Tind. 'except that a man be boren of water and of the sprete.'

The only use of 'except' that is now commended is as a preposition. Hodgson (*Errors in the Use of English*, 117 f.) quotes two examples from good modern writers of its use as a conj., but says that 'unless would be generally held preferable'; Keble, *Memoirs*, i. 81, 'Do not trouble yourself about writing to me, except you are quite in the humour for it'; Miss Mitford, *Letters and Life*, i. 150, 'It has no literary pretensions, except the total absence of all pretension may pass for one in these days of abundant conceit.' The Revisers have been somewhat sharply taken to task for using 'except' as a conj. (see esp. Moon, *The Revisers' English* (1882), 94-97, and *Ecclesiastical English* (1886), 205-207). In this, however, they are at one with previous versions and with the history of the word. In the Canonical Scriptures of AV *except* occurs 73 times, and 67 times it is a conjunction. The Revisers have made few changes. In Gn 47²⁶ they prefer 'only,' and in Nu 16¹³ 'but'; twice (2 S 3⁹, 1 Co 14⁷) they turn 'except' into 'if . . . not,' twice (1 Co 14⁶⁻⁹) into 'unless,' and once (2 Co 13⁵) into 'unless indeed.' It is only in connexion with Jn 3²⁴ where they change 'if . . . not,' and 1 Co 15² where they change 'unless,' into 'except,' that they are open to criticism; but no doubt both came under the rule of 'uniformity in rendering.' J. HASTINGS.

EXCHANGER.—See MONEY.

EXCOMMUNICATION is the name applied to the temporary or permanent exclusion, for errors of doctrine or morals, of a member of a Church from the privileges of its communion. The word is not used either in AV or RV, but the practice which it describes meets us in NT, both in the case of the Jewish synagogue and in that of the Christian Church.

The practice in the Jewish synagogue is referred to in Lk 6²² (Blessed are ye when men shall separate you from their company, ἀφορίζω), Jn 9²² (the case of the blind man cast out of the synagogue, ἀποσνάγωγος), Jn 12⁴² (the rulers who feared to confess Christ), Jn 16² (Christ's prophecy concerning the disciples). It rests on the older practice, described in Ezr 10⁸ (the case of those Isr. who at the Restoration refused to give up their idolatrous wives), which in turn is a modification of the still older *hērem* (עֲרִיב) or 'ban,' referred to in Lv 27²⁹ and elsewhere. The word *hērem* means literally devoted, and is used in OT in the twofold sense of devoted to destruction (hence accursed) and devoted to God's service (hence consecrated). See CURSE.

The practice of excommunication as we find it among the Jews in the time of Christ is the outgrowth of the *hērem* in the first of these senses. In the early history of Israel the punishment of idolatry or other gross sins was physical death. Thus we find the prophets referring to the future triumph of Israel over their enemies as the wholesale devotion of them to destruction by J^h (so Is 34^{2, 5}, Mic 4¹³, Jer 50²¹), and Zech. looks forward to the happy time in the future when there shall be no more 'ban' (14¹¹). Temporary exclusion from the services of the sanctuary meets us only, in the case of ceremonial offences, as part of the general requirement of the ceremonial law. At the time of the Restoration we find a modification of the older practice in the interest of greater humanity. Those Isr. who had married foreign wives, and who refused at the command of Ezra to give them up, instead of being put to death had their substance confiscated, and were separated from the congregation of Israel (Ezr 10⁶). In the time of Christ, exclusion from the synagogue was the regular punishment for serious moral and religious offences, and is distinguished by the Rabbis as *hērem* proper, the formal 'ban,' which could be inflicted by not fewer than ten persons, and which deprived him on whom it fell of all religious privileges, from the milder *niddūi* (נִדְּוּי), which could be inflicted by a single person, and which merely cut off him who suffered it from conversation and contact for a period of thirty days. For a supposed third grade, the so-called *shammāthā* (שַׁמְמָתָה), there seems to be no good authority.

The origin of Christian excommunication is often found in Christ's words to Peter (Mt 16¹⁹), 'I will give unto thee the keys of the kingdom of heaven; and whatsoever thou shalt bind on earth shall be bound in heaven; and whatsoever thou shalt loose on earth shall be loosed in heaven.' (Cf. Mt 18¹⁸, Jn 20²³.) But, whatever the particular view taken of this much disputed passage, the reference seems to be rather to the spiritual power which the Church is to exercise through her preaching and witness-bearing than to any formal ecclesiastical procedure. The passage Mt 18¹⁵⁻¹⁷ comes nearer to the mark, and with its threefold admonition, first privately, then in the presence of two or three witnesses (cf. Tit 3¹⁰), and finally before the Church, reminds us somewhat of the graded procedure of the Jewish synagogue. Hence many critics believe that it represents less a direct utterance of Jesus Himself than the practice in the Jewish-Christian circles for which the Gospel of Matthew was written.

In the letters of St. Paul, besides general directions to 'admonish the disorderly' (1 Th 5¹⁴; cf. 1 Ti 5²⁰), and to hold aloof from brothers who are fornicators, or covetous, or idolaters, or revilers, or drunkards, or extortioners (1 Co 5¹¹), or who refuse to obey the word of St. Paul by his letters (2 Th 3¹⁴; cf. Ro 16¹⁷), we have in the Church of Corinth at least one case, and possibly two cases, of ecclesiastical discipline. The first is that of the incestuous person, referred to in 1 Co 5, whom St. Paul delivers unto Satan 'for the destruction of the flesh, that the spirit may be saved in the day of the Lord Jesus' (1 Co 5⁵). The reference in v. 4 to the Corinthians as being gathered together, shows that whatever the exact nature of the punishment described as committing unto Satan, it had ecclesiastical significance. In v. 13 the Corinthians are expressly charged to put away the wicked man from among themselves. If 2 Co 2⁶⁻¹¹ refer, as is most commonly supposed, to this same matter, it would follow that the exclusion from church fellowship was not permanent. 'Sufficient to such a one is this punishment, which was

inflicted by the many; so that contrariwise ye should rather forgive him and comfort him, lest by any means such a one should be swallowed up by his overmuch sorrow' (vv. 6, 7). If, however, as seems not unlikely, this passage refers to an entirely distinct case from that mentioned in 1 Co, we have a case of discipline administered by the Corinthians themselves without special instigation by St. Paul. Interesting and perplexing is the mention of Satan in 1 Co 5⁵ (cf. 2 Co 2¹¹ 'that no advantage may be gained over us by Satan'; 1 Ti 1²⁰ 'Hymenæus and Alexander, whom I delivered unto Satan that they might be taught not to blaspheme'). That St. Paul does not mean by the expression 'delivery unto Satan' a final cutting off from salvation, such as seems to be implied in the anathema of 1 Co 16²², Gal 1^{8, 9}, Ro 9³, is clear from the reference in v. 5 to the salvation of the spirit. On the other hand, that some suffering besides the formal exclusion from church fellowship is intended, seems equally clear from the reference to the destruction of the flesh. Hence the conjecture of some physical punishment miraculously inflicted upon the offender, possibly, as in the case of Ananias and Sapphira, death itself. But the matter is too obscure to warrant a definite conclusion.

The Corinthian letters picture a loose organization, without formal officers, in which discipline is administered, now by the Corinthians, now by St. Paul himself. There is no definite rule of procedure. The general principle is laid down in 1 Co 5⁹⁻¹², and special application is made acc. to the circumstances of each case. In the Pastorals we have already a definite mode of procedure, with its public reproof, and its accusation before witnesses (1 Ti 5^{19, 20}). Not moral offences only, but a schismatic spirit may be the occasion for exclusion from church fellowship (Tit 3¹⁰ 'A man that is heretical [factious] after a first and second admonition, refuse.' Cf. 1 Ti 6³, and esp. 2 Jn v. 10, where false doctrine is made the ground for absolute breach of intercourse). That excommunication might be inflicted by a faction, as well as by the Church at large, is clear from the case of Diotrephes (3 Jn 9, 10). These later instances show that excommunication was not merely disciplinary, having as its end the penitence and subsequent restoration of the offender, but also protective, being designed to guard the infant Church from corruption. In no case, however, is it regarded as consigning the person cut off to eternal punishment, as later theories have sometimes held. That was the work of God alone, with which man had nothing to do. In general, this brief survey of the NT passages shows that we have to do only with the first beginnings, from which the later ecclesiastical procedure, with its elaborate process, was developed. In this matter, as in so many others of interest, the development was a gradual one, a part of that slow process by which the flexibility of early Christian institutions was gradually transformed into the fixed rules of a powerful ecclesiastical organization.

LITERATURE.—The art. in Smith, *DB*², by F. Meyrick, unchanged; and Herzog, *PRE*² 'Bann bei den Hebräern,' by Rütschi, where the older literature is given. For the practice among the Jews, see Nowack, *Heb. Archäol.*; and Benzinger, *Heb. Archäol.* On the case of the Corinthian offender, cf. Weiszäcker, *Das Apostolische Zeitalter*². A full discussion of NT passages in their connexion is still a desideratum.

W. ADAMS BROWN.

EXECUTIONER.—Mk 6²⁷ AV, of the officer sent by Herod to behead John the Baptist, RV 'a soldier of his guard.' The Gr. word *σπεκουλάριον* is a transliteration of Lat. *speculator*, and the *speculatores* were originally scouts or spies (*speculator*, to watch), and then the police or bodyguard of the Roman emperors and military governors. (The word is fully discussed in Benson, *Cyprian*, 505 f.)

Beheading was a Roman, not a Jewish punishment. See CRIMES AND PUNISHMENTS. J. HASTINGS.

EXERCISE.—As a verb: 1. The primary meaning is to occupy oneself with, engage in, Ps 131¹ 'Neither do I exercise myself in great matters' (עָשִׂיתִי לִי, lit. 'neither do I walk,' as RVm); Sir 50²⁸ 'Blessed is he that shall be exercised in these things' (ἀναστροφῆσεται); 2 Es 15⁸ 'those things in which they wickedly exercised themselves' (quæ inique exercent, RV 'which they wickedly practise'). Cf. Pref. to AV 1611, 'in Latine we have been exercised almost from our verie cradle.' 2. To put into practice, bring into use, as Knox (*Works*, ed. Laing, iv. 135), 'Even such, deare brethren, is the blessed Evangelie of our Lord Jesus; for the more that it be entred, the more comfortable and puissant is it to such as do heare, reade, or exercise the same'; or as Dunbar (*The Thrissill and the Rois*, 16) uses *exerce*, the obsolete form of the verb, direct from *exercere*—

'Exerce justice with mercy and conscience.'

So Rev 13¹² 'he exerciseth all the power of the first beast' (ποιεῖ); Jer 9²⁴ 'I am the LORD, which exercise lovingkindness' (עָשִׂיתִי 'doing'); To 12⁹ 'Those that exercise alms and righteousness shall be filled with life' (ποιδόντες); Ezk 22²⁹ 'The people of the land have used oppression, and exercised robbery' (עָשִׂיתִי); Wis 16⁴ 'It was requisite that upon them exercising tyranny should come penury' (ἐκείνοις τυραννοῦσι, RV 'in their tyrannous dealing'); and the passages in the Synoptics, Mt 20²⁵, Mk 10⁴², Lk 22²⁵, where κατακυριεύω (Lk κυριεύω) and κατεξουσιάζω (Lk εξουσιάζω) are translated in AV 'exercise dominion' and 'exercise authority' in Mt, 'e. lordship' and 'e. authority' in Mk and Lk; RV gives 'lord it' for κατακ., and 'e. authority' for κατεξ. in Mt and Mk, 'have lordship' and 'have authority' in Lk. 3. To practise for training or discipline, Ac 24¹⁶ 'And herein do I exercise myself, to have always a conscience void of offence toward God and toward man' (δασκῶ); 1 Ti 4⁷ 'exercise thyself unto godliness' (γυμνάζω; so He 5¹⁴ 12¹, 2 P 2¹⁴); 1 Mac 6²⁰ 'elephants exercised in battle' (εὐδότες πόλεμον, RV 'trained for war'); 2 Mac 15¹² 'exercised from a child in all points of virtue' (ἐκμελετηκότα). 4. All those meanings belong to the Lat. *exercere*, and the influence of the Vulg. is conspicuous throughout. There are even two examples of 'exercise' in the sense of 'afflict,' 'torment,' which also belongs to *exercere*; Ec 1¹³ 'this sore travail hath God given to the sons of man to be exercised therewith,' and 3¹⁰. The Heb. is נָחַץ, 'to be bowed down.' Cf. Fuller, *Holy Warre* (ed. 1640, p. 155), 'they had to do with Meladine King of Egypt, who lay besides them, . . . exercising the Christians with continual skirmishes.' Milton has the same sense in *Par. Lost*, ii. 89—

'Where pain of unextinguishable fire
Must exercise us without hope of end';

and *Par. Reg.* i. 156—

'But first I mean
To exercise him in the wilderness.'

As a subst.: 1. Wis 8¹⁸ 'in the exercise of conference with her, prudence' (ἐν συγγυμνασίᾳ ὁμιλίας, RV 'assiduous communing,' RVm 'practice of communion'); 1 Ti 4⁸ 'bodily exercise profiteth little' (σωματικὴ γυμνασία). 2. In 1 Mac 1¹⁴ and 2 Mac 4⁹ the complaint is made that a Greek 'place of exercise' had been erected in Jerusalem. The Gr. is γυμνάσιον. See GAMES. In 2 Mac 4¹⁴ ἐν παλαίστρᾳ is similarly translated 'in the place of exercise,' RV 'in the palestra.' See PALÆSTRA.

EXODUS AND JOURNEY TO CANAAN.—

- i. Route of the Exodus.
- ii. From Egypt to Sinai.
- iii. From Sinai to Kadesh.
- iv. From Kadesh to the Jordan.

i. ROUTE OF THE EXODUS.—The question of the route of the Exodus has had a good deal of light thrown upon it in recent times, from the standpoint both of archæology and of literature. On the one hand, the work of excavation of lost cities and monuments has gone far to negative certain hypotheses as to the Exodus, if not to render them impossible; and, on the other hand, the decipherment of inscriptions and papyri belonging to the time of the Exodus has furnished us with geographical and historical annotations of the highest value. It must not be supposed that the result is an unmixed confirmation of the biblical account. A recently-deciphered Egyptian inscription, for example, shows that the Béné-Israel were already in Palestine at the time of the Exodus, so that the migration must have been partial and not national. But with this point we are not concerned in the present article, whose business is to indicate what was the route of the Exodus on the hypothesis that it actually took place.

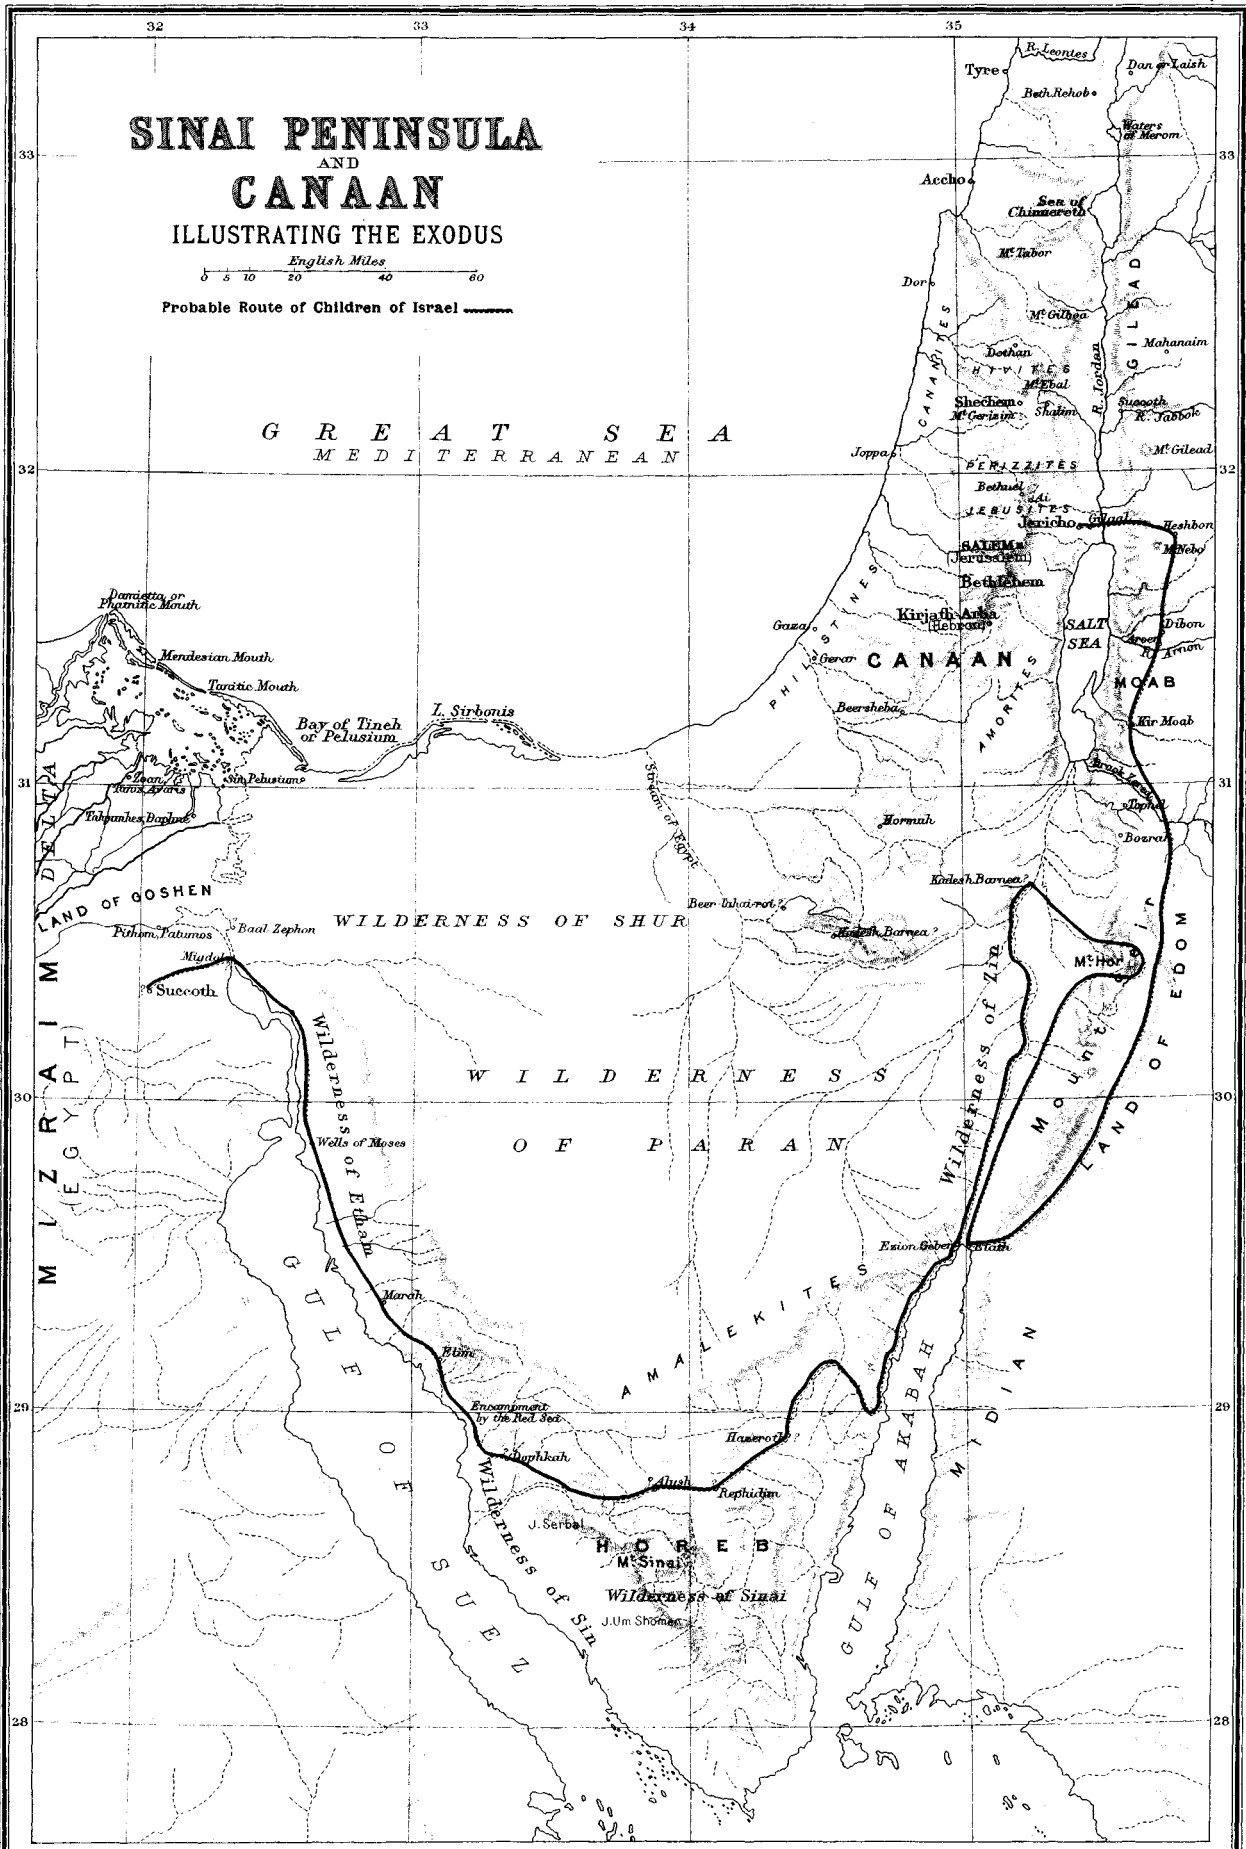

Even though we are not yet in a position to completely vindicate the historical character of the Exodus, we may do much to extract a correct geography from the accounts, and so to prepare the way for accurate history. The researches, for instance, of Naville have practically settled the first stages in the line of march; and in the same way a closer knowledge of the Sinaitic peninsula encourages the belief that there is more to be urged in favour of the traditional Sinai than can be brought forward against it. [See SINAI.] We acquire in this way what are almost fixed points in the route, without being troubled by *a priori* considerations as to whether the whole of the story is historical or whether any of it is miraculous. Indeed this last consideration might altogether be omitted; for as regards such a question as the actual passage of the sea, the configuration of the land at the head of the Gulf of Suez and across the Isthmus is such that the shallow waters of the sea and detached lakes furnish exactly the situation for such a transit as is poetically called a passage 'in the heart of the Red Sea.' Moreover, the action of wind upon shallow water has been constantly the cause of phenomenal effects which are not far removed from the miraculous statements in Exodus. For example, the Russians in 1738 entered the Crimea, which was strongly fortified against them by the Turks, at the Isthmus of Perekop, by a passage made for them by the wind through the shallow waters of the Putrid Sea at the N.W. corner of the Sea of Azov. And Major-General Tulloch has recorded an instance even more to the point, when, as he himself observed, *under a strong east wind* the waters of Lake Menzaleh at the entrance to the Suez Canal receded for a distance of 7 miles (see *Journal of Victoria Institute*, vol. xxviii. p. 267). Other instances of the same effect, which would be counted miraculous if they had been biblical, may be found in a paper by Naville (*Jour. Vict. Instit.* xxvi. p. 12). We may therefore lay on one side any question of direct miraculous agency: where the phenomena are so nearly natural to the country, we may be content to say that they are not necessarily unhistorical, and that the question of miracle is merely one of interpretation. Nor need we be delayed in our inquiry by considerations as to whether the story has suffered from over-colouring; both the numbers of the persons involved and the length of their supposed stay in the desert may be deferred,

Probable Route of Children of Israel

G R E A T
M E D I T E R R A N E A N

if thought fit, for future examination. The account is not to be judged from its weakest points.

The best way to form an idea as to what such a migration would be like, is to compare it with an annual phenomenon of a similar character, viz. the Mecca pilgrimage from Cairo. The analogy is a good one, inasmuch as the account in the Bk of Exodus expressly suggests that the Israelites wished to go into the wilderness for the purpose of a *haj* (the Heb. word in Exodus 10⁹ *haj* is, in fact, the same that is applied to the modern festival, and to the route taken by the pilgrims). What point was aimed at in the proposed three days' journey into the wilderness must remain uncertain; it has been suggested that it was Sarbut el-Khadeem, on the northern road to Mt. Sinai, where the remains of famous Egyptian temples are still to be seen. But, wherever it was, the Israelites could do what the Mecca pilgrims are in the habit of doing; nor is there any *a priori* reason why we should regard the account of the migration as antecedently improbable.

We may go further, and say that whatever may be objected against the general facts of the Exodus, the list of stations (or *mansiones*) in the wilderness which is given in Nu has every appearance of being part of a conventional itinerary or pilgrim book, and is therefore susceptible of identification and verification, altogether apart from the history in which it is embedded. All that we have to do with such data is to make such literary and topographical investigations as will determine whether the routes indicated are possible, and the stages of the journey feasible.

One of the first things that will strike the careful reader of the account of the first stages of the Exodus is that there is a certain verisimilitude about the nomenclature. It is a mixture of Egyptian and Hebrew. Pithom and Pihahiroth are certainly Egyptian; Migdol and Baal-zephon are certainly Hebrew; Succoth will be shown to be a mere Heb. perversion of an Egyp. name; and there is even a suspicion that alternative names in the two languages are found in the narrative, as when the desert into which the Israelites go out is called in one place the desert of Etham, and in another the desert of Shur. This is as it should be, if we bear in mind that we are on the frontier of Egypt, that the country next the frontier on both sides is in the hands of a Semitic people, and that the fortifications and great cities are in the care of the Egyptian Government.

The locality from which the Israelites emigrated is defined by the two store-cities, **Rameses** and **Pithom**, which they built for Pharaoh. From Rameses they started, and their first encampment is **Succoth**, which Naville has shown to be the equivalent of Pithom. The identification of the two cities is of the first importance. According to Brugsch (*L'Exode et les monuments Egyptiens*, Leipzig, 1875), we are to identify Rameses with Zoan (Tanis), and to place Pithom and the district of Succoth in the N.E. corner of the Delta, between Tanis and Pelusium. He then adopts a surprising suggestion (previously ventured by Schleiden), that the Israelites passed along the shore of the Mediterranean on a neck of land between that sea and the ancient Serbonian lake; that the Egyptians followed them along the same course, but were overtaken by a rush of water from the Mediterranean and destroyed. On this hypothesis he identifies **Etham** with the fortification on the frontier of Egypt, **Migdol** with a Magdolon mentioned in the Antonine Itinerary as being 12 miles from Pelusium, and **Baal-zephon** with Mt. Casius; the supposed Red Sea (*yam suph*) turns out to be the Serbonian lake, as is suggested by

the name (*yam suph* = sea of weeds). Unfortunately, this theory, which is stated with great confidence and simplicity by Brugsch, appears to be almost fatally vitiated by the fact that Pithom has been found somewhere else than on the Mediterranean seaboard, where Brugsch had located it. It is to Naville that we owe this important discovery. His excavation of the mounds known as Tell el-Mashkuta, in the Wady Tumilat, on the line of railway from Zagazig to Suez, and in close proximity to the modern Sweet-water Canal and to the line of the ancient Sweet-water Canal, has proved conclusively that this place is Pithom ['abode of Tum'], and that its secular name, or at all events the name of the adjacent district, is Thuket, which may be equated with the Heb. Succoth. It is curious that the French engineers had suspected this mound to be the site of Rameses, and had named the adjacent railway station accordingly. It seems probable that Rameses will be found in the excavation of the mound Tell el-Kebir; Tanis is clearly excluded by Naville's discoveries. We are thus led to conclude in favour of an exodus along the line of the ancient canal, and the fugitives following this course would soon reach the frontier of Egypt and be stopped by the fortifications which ran along the Isthmus from north to south. This is the station Etham, which appears to coincide with the Egyptian *çetem* or *fortification*, and to be the same thing as is meant by the Heb. *shur* or *wall*. [The only difficulty in this identification lies in the fact that we should have expected a stronger guttural in the beginning of the Heb. word]. The route is evidently one of the main roads out of Egypt; and we may compare it with a papyrus translated by Goodwin, which describes the pursuit of runaway slaves who follow this very road, and whose journey is described in very similar terms.

Several difficulties now present themselves. One of them relates to the question as to whether the head of the Gulf of Suez was not at the time of the Exodus much farther north than at present, and whether the sea was not actually connected with the Bitter Lakes. In that case the transit may very well have been made at the head of the Bitter Lakes. There is much to be said in favour of this hypothesis.

Unfortunately, none of the places mentioned in connexion with this part of the Exodus have been identified. Pihahiroth, Migdol, and Baal-zephon have all to be located. It has been suggested that Baal-zephon [Typhon] is the mountain Ataka to the S. of Suez, and that it is dedicated to the god of the north wind because Phœnician sailors used to pray for fair wind on their voyages down the Red Sea. Our own impression is that the case has not yet been made out for moving the head of the Red Sea so far north as the Bitter Lakes, and that it is more likely that the crossing took place not far north of the present Suez. [Its ancient Greek name *Clysm* appears to carry a tradition of the disaster]. The test for a true solution would appear to lie in a search for Baal-zephon, especially by examination of Mt. Casius on the shore of the Mediterranean, and of Jebel Ataka at the head of the Red Sea.

ii. FROM EGYPT TO SINAI.—After crossing the frontier of Egypt the Israelites go three days in the wilderness and find no water. It has been suggested that they went by the *haj* route right across the plateau of the Tih to Akabah, and that this Akabah (or Elath, as it is called in OT) is the Elim of the itinerary, where they found wells of water and palm trees, and from which they proceeded to a Mt. Sinai in Midian. We are not able to accept the theory of a Midianite Sinai. It seems more probable that the route described is

that taken by travellers to the traditional Sinai, which is the same as was taken by St. Silvia of Aquitaine in the 4th century. The route goes along the wilderness between the plateau of the Tih and the E. shore of the Red Sea. **Marah** (see sep. art.) is not identified with any reasonable probability; but **Elim**, which follows it, may very well be the Wady Ghurundel, where there are even at the present time wells and palms (see **ELIM**). From this point the road to Sinai bifurcates; the northern road goes by the Egyptian mines and temples of Sarbut el-Khadeem, the southern winds by the Wady Tayibeh until it strikes the seashore: this is, then, the **encampment by the sea** (see sep. art.) of Nu 33¹⁰; following the shore, the ancient Egyptian port and road are reached, and the route turns inland, passing the entrance to the Wady Maghara, where are the oldest Egyptian mines. This is probably the station **Dophkah** (see sep. art.) of Numbers, Dophkah being a misreading of Mafkah, the Egyp. name for the blue stone which they obtained from the mines in this region. The next station, **Alush**, is not known; it was probably not far beyond the Wady Mukattab or 'written valley' through which the road now passes. The next stage is **Rephidim**, which is commonly identified with *Feiran*, the oasis of the peninsula, the ancient Paran and Paran, and from this point the road winds through the long Wady es-Sheykh, until by a long detour (or, if preferred, by a short cut through a pass called Nukb el-Hawa, or 'Pass of the Wind') the plain is reached at the foot of **Mt. Sinai**, where the Israelites are supposed to have assembled for the giving of the Law. The most striking identification on this route is the encampment on the seashore five days after having left it. But it is clear that, striking as this is, the same thing is true of the route of the Mecca pilgrims: so it can hardly be called a conclusive identification. It is a very weighty consideration that the name Sinai implies a place of sanctity [Sin = the Babylonian moon-god] from very early times; but no Babylonian signs or inscriptions have been found which would settle conclusively that the traditional Sinai is the same as the biblical one. The route described is an ancient trade route of Nabatean traders before the Christian era and in the early years of the Christian era. It is *not* a road worked out by biblical explorers, as has sometimes been suggested. See further art. **SINAI**.

LITERATURE.—The student should consult, *inter alia*, Robinson, *Biblical Researches* (1841, 3rd ed. 1867); Ebers, *Durch Gosen zum Sinai* (2nd ed. Leipzig, 1881); Lepsius, *Tour from Thebes to the Peninsula of Sinai in 1845* (Eng. by Cottrell, London, 1846); Naville, *Store City of Pithon* (Publications of Egypt. Exploration Fund); Brugsch, *L'Ézode et les Monuments Égyptiens* (Leipzig, 1875, Eng. tr. 1879); Gamurrini, *Peregrinatio Sylvia* (Rome, 1887).

iii. **FROM SINAI TO KADESH.**—About this portion of the route little need be said. The account in Nu 10¹¹ states that the first march from Sinai was into the wilderness of Paran. This is described in v. 33 as a three days' journey; and the places mentioned as on the route are Taberah (Nu 11³), Kibroth-hattaavah, and Hazeroth (11³⁴⁻³⁵), whence they removed into the wilderness of Paran (12¹⁶), and from this place (13³) the spies were sent out. Taberah is not mentioned in the itinerary of Nu 33. In Dt 1² the whole route from Horeb to Kadesh-barnea is described as eleven days' journey by the way of Mt. Seir. This indicates a route from Sinai by way of 'Akabah to Kadesh, and accordingly travellers have sought to identify Kibroth-hattaavah and Hazeroth with points in the route between Sinai and 'Akabah. Further particulars are given in the articles on those names; and for the names which follow

Hazeroth in Nu 33, see iv. and the article on **KADESH**.

iv. **FROM KADESH TO THE JORDAN.**—The accounts of this part of the route are found in Nu 20. 21, Dt 1. 2, and in the itinerary of Nu 33. Nu 20. 21 are composite in character, as will be seen from the following analysis (taken from Driver's *LOT*⁶ p. 66):—

P	20 ^{1a}	2	3b-4	6-18	22-29	4 ¹	10. 11
JE		1b	3a	5	14-21	21 ¹⁻³	4 ¹⁻⁹
P		22 ¹					
JE		21 ¹²⁻³⁵					

The first verse of Nu 20 deserves special notice. Its first clause (as far as the word 'month') is due to P. According to that authority, the spies were sent out from the wilderness of Paran, and in *that* wilderness (Nu 14²⁹) the children of Israel remained until the rebellious generation had been consumed. They then moved in the first month (apparently of the fortieth year, and for the first time) into the wilderness of Zin. The next clause, 'and the people abode in Kadesh,' etc., is due to another source, which represents the stay in Kadesh as a prolonged one, and associates with that stay many events, but without assigning dates. Two of these events are recorded in Nu 20²⁻²¹: the first, the judgment passed on Moses and Aaron at Meribah (vv. 2-13), presents difficulties which cannot here be fully discussed, but the following considerations make it probable that this incident occurred at an early period of the sojourn at Kadesh: (a) the account is in many points similar to that in Ex 17¹⁻⁷; (b) lack of water would have been felt soon after the arrival at Kadesh, rather than at the close of their sojourn there; and the complaint, Nu 20⁴⁻⁵, seems more appropriate in the mouths of those who remembered the fleshpots of Egypt, than of those who, having left Egypt in youth, had since passed forty years in the desert; (c) according to Dt 1³⁷ the exclusion of Moses from the promised land was decreed about the same time as the general sentence was pronounced against the generation which came up out of Egypt. Hence two alternatives: either the account Nu 20²⁻¹³ which gives the reason for the exclusion must describe the same event as that referred to Dt 1³⁷ (*i.e.* an event which happened soon after the return of the spies, and therefore at an early period of the journeyings), or there are two varying traditions as to when and why Moses was not permitted to cross the Jordan.

The second passage (Nu 20¹⁴⁻²¹) records Edom's refusal to allow a passage through his territory to the children of Israel, in consequence of which they journeyed 'by the way to the Red Sea to compass the land of Edom' (Nu 21⁴). Comparing this with Dt 2¹, very similar language is there used to describe a compassing of Edom, which is assigned to an earlier stage of the journeyings. It is reasonable to suppose that this circuitous route was adopted because a more direct course towards the E. side of the Dead Sea was not open; Edom's conduct, as described in Nu 20, though not recorded in Dt, was the cause of, and therefore prior to, the compassing mentioned in Dt. Hence both the events in Nu 20²⁻²¹, though in their present connexion they appear as incidents of the fortieth year, may belong to an earlier period of the journeyings. Two distinct geographical pictures of the period are presented,—the one, that of JE, figures Kadesh as the scene of the middle portion of the journey, and is to be traced in Dt 1. 2 (with which the brief summary in Jg 11¹⁶⁻¹⁸ should be compared); the other, that of P, locates these events partly in Paran and partly in Zin. The combination of the two, with the introduction

of exact dates, has produced difficulties which are to be explained, not by the assumption of two places bearing the name of Kadesh, nor by the assumption of a second visit to Kadesh (which is nowhere indicated, and seems excluded by Dt 2¹⁴), but by the resolution of the narrative into its original components.

In the list of stations (Nu 33) Kadesh does not occur until v. 35, where it is identified with Zin, immediately precedes Mt. Hor, and is only eight stations removed from the final settlement in the plains of Jordan. This itinerary makes the identification of Zin with Kadesh, which is implied in Nu 20, and refers to Kadesh for the first and only time towards the close of the journeyings. It might be expected that Paran would be found in an earlier part of the chapter, but it is not; the stations from Egypt, as far as Hazeroth, correspond closely with those mentioned in the narrative portions of Ex and Nu, but after Hazeroth [instead of either Paran or Kadesh] twelve stations are given (Rithmah . . . Hashmonah, vv. 18-29), the names of which occur only in these verses, and no event happening in connexion with these places is anywhere recorded. It has been suggested that Rithmah, or some other of these names, is a designation of Kadesh, but nothing in the nature of an argument has been advanced in favour of such a hypothesis.

The wilderness of Paran (Nu 13³) is a vague indication of locality for the events described in Nu 13. 14, and it may be that more than one of these twelve stations were within that area, but there is no indication that such is the case. The list of Nu 33 has been incorporated with the narrative without specifying the place where the important events recorded in Nu 13. 14 and Dt 1 happened. In this respect the list is independent of the narrative, and any attempt to establish a connexion between the two must be conjectural.

The eight stations following Hashmonah (Moseroth-Mt. Hor) must next be considered. With the first four may be compared the fragment of an itinerary preserved in Dt 10^{6,7}. They are as follows:—

Nu 33 ³⁰⁻³³ .	Dt 10 ^{6,7} .
Moseroth.	Beeroth Bene-jaakan
Bene-jaakan.	Moserah.
Hor-haggidgad.	Gudgodah.
Jotbathah.	Jotbathah.

There can be little doubt that the same four places are referred to in both passages, and it seems also reasonable to suppose that the same part of the journeyings is described in both. The inversion of order, Moseroth preceding Bene-jaakan in the one, and following in the other, may be attributed to an error of transcription, or explained by supposing that some of the wells of the Bene-jaakan were visited both before and after the encampment at Moseroth. Moserah is noted (Dt 10) as the place where Aaron died and was buried, and must therefore be close to Mt. Hor, probably the place of encampment at its base. Further, as Abonah and Ezion-geber follow these four places in Nu, and the position of Ezion-geber at the head of the Gulf of Akabah is known, it follows that these stations describe the journey from Mt. Hor down the Arabah to the Red Sea. Pursuing the journey from this point, as described Dt 2⁹, the children of Israel passed 'from the way of the Arabah from Elath and from Ezion-geber.' This is generally explained by supposing that they completed the circuit of Edom by compassing it on its E. side. From the S. end of the Arabah a valley called Wady Ithem leads upwards in a N.E. direction to the high table-land which lies to the E. of Edom and Moab, across which runs the Haj route from Damascus to Mecca. Along or near

this route the children of Israel, after leaving the Arabah by Wady Ithem, passed in a N. direction until they reached Iye-abarim in the wilderness which is before Moab towards the sunrising (Nu 21), the next definite geographical indication afforded in the narrative.

But against accepting this view of the journey, it may be argued as follows: The two stations in Nu 33³⁰⁻⁴¹ which follow Ezion-geber are the wilderness of Zin (Kadesh) and Mt. Hor. These verses imply that, after reaching the Gulf of Akabah, instead of bearing eastward as above described the children of Israel retraced their steps along the Arabah to visit Mt. Hor, on the occasion of Aaron's death and burial. Moseroth is separated by six stations from Mt. Hor, and, if the identity of Dt 10^{6,7} with Nu 33³⁰⁻³⁴ be maintained, there are two statements concerning the time and place of Aaron's death which cannot be reconciled. In order to harmonize the accounts, many commentators consider that the stations in Dt 10^{6,7} have nothing to do with the same names in Nu 33³⁰⁻³⁴, but must be supplied as part of the journey from Mt. Hor to Zalmonah (Nu 33⁴¹). The omission of these stations in Nu 33 is explained by supposing that names which have been previously mentioned are not repeated in this list. Besides the double visit to Kadesh, two visits to Mt. Hor (for Moserah or Moseroth must be considered as equivalent to Mt. Hor) and two journeys down the Arabah to Ezion-geber must be assumed, before the narrative of Dt 2⁹ can be combined with Nu 33 from Zalmonah onwards, as representing the final departure from the Arabah on the way to the E. of Moab. This reiterated duplication of events, inferred from combining the accounts, but nowhere indicated in the narrative, raises more than a suspicion that this harmonistic interpretation, though possible, does not represent the actual progress of the journey. The main difficulty arises from the position of Zin and Mt. Hor following Ezion-geber in Nu 33³⁰⁻⁴¹. Ewald proposes (*Hist. of Isr.* ii. 201, Eng. tr.) to remove vv. 30^b-41^a from where they now stand, and insert them after Hashmonah in ver. 30. The order of the stations would then be Hashmonah, Zin, Mt. Hor, Moseroth, Bene-jaakan, Hor-haggidgad, Jotbathah, Ebronah, Ezion-geber, Zalmonah, etc. The necessity for assuming the unproved duplication of events is removed, and the direction of the journey would be as traced above. The obvious criticism of Ewald's hypothesis is, that if the arrangement he proposes were the original one, it is difficult to understand why a change which introduces such difficulties should have been made. May a slight variation of his hypothesis be suggested? The verses which he would transpose differ in character from the rest of the chapter; instead of giving only names, they relate events and furnish details. May they be regarded as a later addition? If so, they may be either omitted or transferred, and the same result attained. One other alternative remains: the insertion of Zin and Mt. Hor after Ezion-geber indicates a movement up the Arabah northwards. This northern direction may have been continued to the Dead Sea, where a turn eastwards would bring the children of Israel to the E. side of Moab. The compassing of Edom would then be on its W. and N. border. In favour of this it may be suggested that an Israelite might understand the border of Edom to mean the border towards his own land. So long as the sites of Zalmonah and the stations following remain uncertain, this interpretation of the existing text of Nu 33⁴¹ cannot be rejected as impossible, though it would represent a tradition different from that followed in Nu 21⁴ and (probably) Dt 2⁹.

The concluding section from the E. of Moab

onwards is comparatively free from ambiguity, though definite identification of places is wanting here as in the preceding stages. The children of Israel cross the brooks Zered and Arnon (Nu 21^{12, 13}). The latter is by general consent identified with the Wady Mojib, a stream which is fed by many tributaries, and falls into the Dead Sea about the middle of its E. side. The deep valley, about three miles broad, through which it passes, is a marked feature of the district, and forms a natural boundary line. It was the southern limit of the territory assigned to Israel on the E. of Jordan. The position of the brook Zered is uncertain. The Wady el-Ahsa, which runs into the Dead Sea at its S. extremity, is too far south to be identified with it, for Iye-abarim to the E. of Moab is reached before crossing it (Nu 21¹¹). The Wady Feranjy, the upper portion of the stream passing by Kerak and reaching the Dead Sea at the promontory called El-Lisan, or the main affluent of Wady Mojib (that coming from the S.E.), may with greater probability be considered as the ancient Zered. The nomenclature of the tributaries of Wady Mojib is somewhat unsettled, but Bliss, when exploring the country of Moab in March 1895 (see his memoir in *PEFS*, 1895) took special pains to ascertain the names assigned to them. He follows Tristram in giving the name of Wady Sa'ideh to the E. affluent of the Wady Mojib and not to the S.E. branch, which is generally so called in maps and commentaries. The description in Buhl (*Geog. d. Alten Palästina*, p. 51) is again different. Until arriving at the Arnon, the Israelites probably crossed the upper courses of the rivers and kept away from Moab towards the E. They would thus obey the injunction not to meddle with Moab, and find the rivers shallower, and more easy of passage. The deep and rugged sides of these streams for some distance from their outlets into the Dead Sea cause considerable difficulty to the modern traveller, and would have been impracticable for the hosts of Israel. But after crossing the Arnon it was necessary to turn W. and afterwards in a N.W. direction in order to reach Dibon-Gad and the mountains of Abarim—the high ridge to the E. of the N. extremity of the Dead Sea from which they descended into the plains of Jordan, opposite Jericho. The names given in Nu 21¹⁸⁻²⁰ are different from those in the itinerary of Nu 33, but the last-named place, 'the top of Pisgah that looketh toward Jeshimon' ('the desert' RV), indicates a spot on the Abarim range whence W. Palestine and the Jordan valley were visible. The last stage, Nu 22¹, is given with additional detail in Nu 33^{46, 49}.

LITERATURE.—Commentaries on the Books of Nu and Dt, especially those of Dillmann in the *Kurzgef. Exeg. Handb. z. Alten Testament* and Driver on Dt in the *Internat. Crit. Comm.*, may be consulted for further information. Trumbull's *Kadesh-Barnea* discusses the whole route from Egypt to Canaan, and contains a full list of ancient and modern works dealing with the subject. See also Palmer, *Desert of the Exodus*, and Köhler, *Biblische Geschichte A.T.s*.

J. RENDEL HARRIS AND A. T. CHAPMAN.

EXODUS (עֲשׂוֹת מִצְרָיִם), or simply מִצְרָיִם; Ἔξοδος: see HEXATEUCH) is the 2nd Book in the Heb. Canon. It is also the 2nd division of the great composite work which contains in one complex whole all that has been preserved of old Heb. writings about the origins of the Isr. people. So much is here assumed, and, further, that it is generally possible, if not to distribute the material among four distinct documents, at least to assign it to one or other of four differing schools of writing, Jahwistic, Elohist, Deuteronomic, and Priestly (referred to as J, E, D, P),* whose relative age is shown by

* J (=J-supplements), E, etc., denote later elements, while P is often used for the original groundwork of the Priestly Document before enlarged by the numerous additions marked

the order of the names, the periods of the first two overlapping. For the proof of this, and for general matters of introduction, see HEXATEUCH.

Our aim here is to exhibit the results of such an analysis in detail, with a condensed account of the chief grounds on which it rests. For information about persons, places, things, events, institutions, laws, the student is referred to the separate articles.

The book covers the period from the death of Joseph to the erection of the Tabernacle, and is mainly historical, but contains important legislative sections. It falls readily into three parts—I. Israel in Egypt; II. From Egypt to Sinai; III. At Sinai. The method of treatment here adopted needs little explanation. In the Summary small reference letters show what documents contain the material next following: the sign || preceding means that the parallel is to be found in another chapter or section. The numbers refer to the chapters.

Thus, by following J, E, and P through in turn, the main contents of the documents can be severally traced, and the amount of coincidence noted.

I. ISRAEL IN EGYPT: 1-13¹⁶.

A. Summary.

1 ^{JEP}Increase, and ^{JEP}Oppression of Israel. 2 ^EBirth and adoption of Moses; ^Jhis violence, flight, and ^Jmarriage. 3-4 ^JTheophany and ^{JEP}Commission of Mos. and Aar. ^JMos. returns, and ^Jconvincing the people by signs. 5 ^JFreedom claimed, bondage increased. 6-7 ^{PJ}Commission of Mos. and Aar. 7⁸⁻¹² Eleven ^{JEP}wonders — 7⁸⁻¹³ ^PRod becomes serpent, magicians copy; 7¹⁴⁻²⁵ ^{JEP}Nile smitten, ^Jmagicians copy; 8¹⁻¹⁶ ^JFrogs, ^Jmagicians copy; 8¹⁶⁻¹⁹ ^Plice, magicians fall; 8²⁰⁻³² ^Jflies; 9¹⁻⁷ ^Jmurrain; 9⁸⁻¹² ^Pblains, magicians suffer; 9¹³⁻³⁵ ^Jhail; 10¹⁻²⁰ ^Jlocusts; 10²¹⁻²⁹ ^Edarkness; ^Jbanishment of Moses, who 11 ^Jprophesies death of firstborn and release of Isr. 12-13¹⁶ ^JRules for Passover and Feast of Unleav. Bread; ^Jdeath of firstborn, and ^{JEP}exodus of Isr.; ^Jlaw of firstlings.

B. Analysis.

P²; Ph stands for the Holiness legislation of Lv 17-26 with kindred passages. R stands for one of the redactors, who (1) edited J and E into a single whole JE, in this case cited as R¹; or (2) combined JE with D, cited as R²; or (3) supplemented P² and combined P with JED, and so are called R³. In Exodus, of course, D is not found, and only here and there traces of R⁴.

E	12					
P	40-42"	43-50 51"	1f.			

Note that no passage has been analyzed unless there is reasonable probability, usually indeed practical certainty, that it is composite; but obviously some of the details of divisions of verses must be rather possible than always definitely probable. The analysis has, however, been carried as far as possible, as being more helpful thus to the student. If any one will take the trouble to mark, (say) with blue, black, and red inks, the analysis on a copy of the RV or the Heb. text, and to underline the phrases, etc., referred to under iii. and iv., and then read through all the passages assigned to each document consecutively, he will gain the best possible notion of the reality of the analysis, and the distinct character of the documents.

Displaced passage.—The J portions of 3 and 41-12 prob. stood originally before 42. Yahweh has already told Moses in Midian (41^b) to go back to Egypt, and the theophany accordingly seems to belong to Goshen, or (better) to the journey thither.

C. Parallels and Contrasts.

Each set is marked with the same letter under J, E, and P, respectively to facilitate comparison. † after refs. means that all the instances in the OT are given; * that all in the Hexateuch are mentioned; italics denote biblical quotations; and capitals are used sometimes for emphatic words.

J—(a) The people live in *Goshen* 8²² 9²⁶ Gn 45¹⁰ etc. (only in J); (b) a separate district, so that they and their cattle could be differentiated from the Egyptians 8^{4, 9, 11} 8²² 9^{4, 6} 9²⁶; only brought in gangs into Egypt for forced labour 5^{6ff.}; away from the Nile, so that its pollution seems to cause no inconvenience 7^{21, 24}; (c) so numerous as to alarm the king 1⁹⁻¹², 600,000 12³⁷ Nu 11²¹ cf. Nu 10³⁶; (d) cattle owners Gn 46^{32, 34} 47^{3, 6} having *flocks and herds* 10^{9, 24} 12^{32, 38} 34³ Nu 11²² Gn 12¹⁶ 13⁵ 24³⁵ 32⁷ 33¹³ 45¹⁰ 46³² 47¹ 50²; (e) Mos. demands 3 *days' journey* 3¹⁸ 5³ 8²⁷ cf. Gn 30³⁸ Nu 10^{63ab}, Nu 33⁸ R[†] that they might *sacrifice to Yahweh* or (*our*) *God* 3¹⁸ 5^{3, 8, 17} 8^{25, 27ff.}, or *serve Him* 7¹⁶ 8²⁰ 9^{1, 13} 10^{3, etc.} 12³¹; (f) the *wonders* or *plagues* before Pharaoh are 7, and are natural calamities, as disease of fish in Nile 7^{14ff.}, when *Yahweh smites the river* 7^{17a, 25}; natural causes being sometimes specified, as the wind in the case of the locusts 10^{13, 19} cf. 14^{21b}; Moses speaks freely on each occasion to Pharaoh, and the wonders follow the mere announcement; the hail is on every herb of the field 9^{25b} cf. 9²² and 10^{15c}, and locusts eat the remaining crops and the fruit; (g) the flight is hurried, at instigation of the Egypt. 12^{21ff., 39}; (h) Moses' *father-in-law* is the *priest of Midian* 2¹⁶ 4¹⁸ (3¹ 18¹ R[†]) cf. Gn 41⁴⁵, unnamed here (for Reuel 2¹⁸ is prob. R[†]), called *Hobab* Nu 10²⁹ Jg 4¹¹ 1¹⁶; and Moses has one son 2²² 4²⁴; (i) sprinkling of blood is the main thing in the Passover, eating not mentioned 12²¹⁻²² J[†]; (j) the name of God is *Yahweh* (= *Jehovah*), or *the God of* . . . ; (k) (l) (see below).

E—(a) The people live in *the land of Egypt*, with no hint of separate district being assigned them; (b) rather they seem to be herded in the royal city among the houses 1^{15ff.}; no immunity from plagues mentioned (e.g. hail 9^{25a}) except for the darkness; can beg of *neighbours* jewels, etc. 3²² 11²; near the Nile 1²² 2¹⁻¹⁰; (c) only numerous enough to annoy the king, their women needing only 2 midwives 1^{15ff.}, requiring only 600 chariots for pursuit 14⁷; (d) royal pensioners Gn 46^{15, 23}, never mentioned as owning cattle; (e) Mos. demands merely that Isr. be let go 3^{10f., 21f.} 5^{1a} (5^{1b} R[†] to harmonize with J) 9²⁵ 10²⁰, ulterior end being to get to Can. 13¹⁷⁻¹⁹ cf. Gn 48²¹, and incidentally to *serve God on this mountain*, i.e. Horeb, more than 3 days' journey 3¹²; (f) the wonders or plagues are 5, and have the miraculous element heightened, e.g. *Moses smites all the waters in the river*, and they turn to

blood 7^{17b, 20b}; Moses only once speaks to Pharaoh 5^{1a}, and the wonders follow his mere gesture; the hail is *on man and beast* 9^{22, 25a}, while locusts devour *every herb of the land* 10^{12, 15b}; (g) departure deliberate, the people gathering supplies beforehand 11¹²; time to take up Joseph's bones 13¹⁹; (h) Moses' *father-in-law* is *Jethro* 3¹ 4¹⁸ 18, and he has *two sons* 18^{5f.}, his wife being a *Cushite* Nu 12¹; (j) the name of God is *God* (Elohim) always up to 3¹⁵ and often afterwards, especially in phrases, e.g. *mount of God* 3¹ 4²⁷ 18⁵ 24^{13*}, *rod of God* 4²⁰ 17^{9†}; *angel of God* 14¹⁹ Gn 21¹⁷ 28¹² 31¹¹ 32^{1*} cf. Ex 23²⁰ 32³⁴ Nu 20¹⁶; *statutes of God* 18¹⁶.

P—(a) The people live in Egypt 1⁵; (b) not in separate district, for *the land was filled with them* 1⁷; no immunity mentioned; (f) the direct Divine agency in the wonders is emphasized; Aaron is always with Moses, and speaks, etc. 7¹⁻⁷ etc. (while in J the insertion of Aaron 4¹³⁻¹⁶ seems due to J[†], for where Aaron or a plur. is found, as 8^{8, 12a, 25, 28} 9²⁷ 10^{16f.}, the sing. is found close by 8^{9, 12b, 29} 9³³ 10^{17a, 18}, Moses being sole speaker 7^{14, 26} 8²⁰ 9¹⁻¹³ 10¹); (i) in the Passover the eating is the main thing, the sprinkling is not ordered to be repeated 12^{1-13, 43-50}; (j) the name of the Deity is always *God* up to 6², and always *Yahweh* (= *Jehovah*) afterwards.

(k) Moses' *rod* is the object of Divine power in J, being turned into a serpent (*nahash*) before the people 4²⁻⁴; Moses' rod, given him by God 4¹⁷ and called *the rod of God* 4²⁰ 17⁹, is regularly the instrument of Divine power in E 7^{15, 17b, 20b} 9²³ 10¹³ 14¹⁶ 17^{5, 9}; Aaron's rod is in P the object of Divine power, being turned into a serpent (*tannin*) before Pharaoh 7^{9f.}, and also its instrument 7¹⁹ 8^{5, 16f.} cf. Nu 17. For describing Pharaoh's obstinacy, we have (1) some form of *heavy* in 7¹⁴ 8^{15, 32} 9^{7, 24} J; (2) some form of *strong* 7²³ 9³⁵ 10^{20, 27} E, and 7^{13, 22} 8¹⁹ 9¹² P, who moulds his almost unvarying phrase on 8¹⁵ J, but borrows *strong* from E.

D. Other Clues to the Analysis.

J—That generation 16 (in P always plur.); *mighty* 17. 9. 20^b Gn 26¹⁶ Nu 22⁶ etc.; *come, or go to* 1¹⁰ Gn 11^{3f.} 7. 38^{16*}; *falleth out* 1¹⁰ Gn 4^{24, 38} 49¹; *enemies* (haters) 1¹⁰ Gn 24⁹⁰; *taskmasters* 11[†] cf. 37. 56. 10. 13^{f.}; *afflict* 1¹¹ cf. 37. 43¹; *who made thee a prince?* 2¹⁴ cf. Nu 16¹³; *sought to slay* 2¹⁵ 4²⁴ 21^{8b} cf. Gn 27²⁰; *Angel of Jehovah* 3² Nu 22²² etc. cf. Ex 14¹⁹ etc. E (see C j. above); *cry* 37. 9 Gn 4¹⁰; *I am come down* 38. 19^{11, 18-20} Gn 11^{3, 7} 18²¹ cf. Ex 33⁹ E, cf. Nu 11^{17, 25} 12⁵ E^{3*}; *land flowing with milk and honey* 38. 17 13⁵ 33³ Nu 13²⁷ 14⁸ 16^{13f.} Jos 5⁶, never in E; *Jehovah the God of the Hebrews* 3¹⁸ 5³ 7¹⁶ 9^{1, 18} 10^{3†}; 3 signs to convince the people 41-12. 30; *lodging* 4²⁴ Gn 42²⁷ 43²⁷ Jos 4^{3, 8*}; *intreat* 8^{2f.} 28-30 9²⁸ 10^{17f.} Gn 25^{21*}; *to-morrow*, 8^{10, 23, 29} 9^{5f., 18} 10⁴; *such as hath not been*, 9^{18, 24} 10¹⁴ 11^{6*} cf. 10⁶; *there remained not* . . . 8²⁷ 10^{19, 26} 14²⁸ Gn 47¹⁸ Jos 8^{17*}; *mixed multitude* 12³⁸ Nu 11⁴; *the passover* 12²¹⁻²⁷ 34²⁵; *unleavened bread and firstlings* 13¹⁶, apparently quoted in 33^{18b-20a} J[†] before deuteronomic expansion took place.

E—*fear* (towards God) 17. 21 18²¹ 20²⁰ Gn 20¹¹ 22¹² 42¹⁸ Dt 25¹⁸ E Jos 24¹⁴ (never in J); by the river's brink 2³ 7¹⁵; *handmaid* 2⁹ (= *bondswoman* RVm 21⁷ etc.), never in J; 2¹⁰ cf. II. FROM EGYPT TO SINAI: 13¹⁷⁻¹⁸.

A. Summary.

13¹⁷⁻²² J^{EP} choice of route, J[†] guided by the Pillar. 14 J^{EP} crossing of Red Sea and fate of pursuers. 15 J^{EP} Song of Moses; J[†] Marah, E(? Massah = proving), and J[†] Elim. 16 E[†] Gift of manna and P[†] quails, P[†] provision for Sabbath and memorial pot of manna. 17 J^{EP} water given in drought, J[†] at Massah, E[†] at Meribah; E[†] victory over Amalek. 18 E[†] visit of Moses' father-in-law, E[†] appointment of judges.

B. Analysis.

J	E	P	13 ¹⁷⁻¹⁹	21f.	14	5-6	10a afraid	11-14	15b
J	E	P	14	16b-18	19b	20b	21b	24	25b
J	E	P	14	26-27a sea	28a	29 ¹⁹	15 ²²⁻¹⁸	20f.	25b 26 ²⁷
J	E	P	16	1-3	5 ⁴	8 ⁷	9-12	6f.	13f.
J	E	P	16	22-30 ⁷	31	32-34 ⁶	35b	36	17
J	E	P	17	7a to Massah	7c	8-16 ^b	18 ^{11r}	2-4 ^r	7 9-11 ^r

Displaced passages.—b is out of place here, and fits a later place in the narrative, as is shown by position assigned to Joshua at 33⁷⁻¹¹. c is also subsequent to the legislation at Horeb, and preparatory to departure for Can., cf. 22. d perhaps led up to Nu 10²².

C. Parallels and Contrasts.

J—(a) Moses leads Isr. 15²², a vast host (see I C c), but unarmed and helpless 14¹¹⁻¹⁴, with the Pillar of fire and cloud for guide 13²¹ 14^{19b, 24} Nu 14¹⁴; (b) straight for the Red Sea, perhaps because the Isthmus was fortified: Pharaoh pursues for reasons given 14⁹; (c) Moses uses no gesture, but brave words 14¹³ cf. I C f; Jehovah causes the sea to go back by a strong east wind 21a, and then to return to its wonted flow 27b, and the crossing is by night 20b, 24, 27b, the Pillar moving to the rear and giving light to Isr. 19b, 20b (read, and it gave light by night), while obscuring the Egyptians' path 24; Jehovah fights for Isr. 14, 20b; (d) Moses and Israel sing 15¹; (e) Isr. tempts or proves Jⁿ 17^{2, 7ac} Nu 14²² cf. Dt 6¹⁶ 9²²; (f) see under P below; (g) the people prove Jⁿ, hence the name Massah or proving (see e above), and murmur against Mos. 15²⁴ 17³ Nu 14² cf. Nu 20⁵, for water 17^{3, 2b, 7ac}, which elsewhere in J is provided by natural causes, as 15^{22n, 27}.

E—(a) God leads the people 13¹⁷ (cf. Jos 24⁶ E) few but armed 18; (b) not by the Isthmus for fear of the Philistines 17, but presumably by the next nearest route to Can. (cf. Jos 24⁶, and see I C e); the Egypt. pursue Isr. (Jos 24⁶), who cry out 14^{10b} (Jos 24⁷); (c) the rod (I C k) is lifted up 14^{16a} cf. Is 10²⁶; the sea is crossed by day, for the angel of God (I C j) goes behind and interposes a barrier of darkness 19a, 20a (Jos 24⁷), and then obstructs advance 25a and overwhelms them (Jos 24⁷); (d) Miriam and the women sing responsively 15^{20f}. cf. 1 S 18^{6c}, which suggests that we have here an independent account not following on 15¹, which is thus left for J; (e) God proves Isr. 15^{25b} 16⁴ 20² Gn 22¹ cf. Jg 2²² (Budde E) Dt 8^{2, 16} 13⁴ Jg 3^{1, 4} (? R^d) *; (f) the proving is by the test of their reception of each day's portion (dabar) of bread from heaven 16⁴, the thing (dabar) which Jehovah commanded being to gather only for daily use every man according to his eating, i.e. a variable amount (16a, 19-21) cf. Dt 8^{2, 16}; they knew not what it was, and hence the name 16a cf. Dt 8^{3, 16}, and it lasted till they came to a land inhabited 35a; (g) the people strive with Mos. about lack of water, hence the name Meribah or strife 17^{2a, 7b}; water comes by smiting the rock with Moses' rod 5^t. cf. 7^{20b} and see I C k.

P—(a) Moses and Aaron lead the whole congregation 16¹⁻³ with a high hand 14³; (b) not by Isthmus because deliberately turned back 14²⁻⁴ to give occasion for a wonder, and Pharaoh pursues because hardened 4, 8, 17 cf. I C l; (c) Moses' hand was stretched forth 16a, 21a, 28¹, and the waters were

divided miraculously, not by a wind, for they were as a wall on their right hand and on their left 21b, 22, and so the catastrophe followed 28, 27a, 28a; (f) the whole congregation murmurs for the fleshpots of Egypt 16^{2t} (cf. Nu 11^{4-6a} J); manna, a miraculous gift, is described 14, 23, 31 (cf. and ct. manna, a natural product, described Nu 11^{6b-9} J); the quails are mentioned almost casually 13 manna being the main point (ct. Nu 11^{13, 18-23, 31-34} J); a fixed amount of manna was to be gathered 16b; manna is eaten till they came unto the borders of the land of Can. 35b; the two commands about Sabbath observance 22f. and the memorial pot of manna 22t. are not needed by the context of P, and may have been added after the union of J E P in order to supply clearer explanations of the proving of 4.

D. Other Clues.

J—Divine help by natural means 14²¹ 15^{22-25a} cf. I C e; three days 15²² cf. I C e; and they came to . . . 15^{23, 27} Heb.; spring (lit. eyes) of water 15²⁷ Gn 16^{7ab} 24 (7 times) 49³² Dt 8⁷ 35²⁸ Nu 33⁹ Rp^t.

E—Joseph's bones 13¹⁹ Gn 50²⁵ Jos 24³²; statute and ordinance 15^{25b} Jos 24²⁵; they cried out unto Jehovah 14^{10b} Jos 24⁷; one to another 16¹⁵ see I D; pass on before the people 17⁵ Jos 3⁶; Aaron and Hur 17^{10, 12} 24¹⁴; Moses' father-in-law Jethro, wife, and two sons 18, see I C h.

P—I will get me honour 14⁴ 17^t Lv 10⁸; and the Egyptians pursued 14^{9, 23}; 15¹⁹ Rp cf. 14^{22t} 28a; date after . . . departing out of the land of Egypt 19¹ Nu 11⁹ 33³³ 1 K 6^{1t}.

III. AT SINAI: 19-40.

A. Summary.

19 J^{EP}The encampment at J^PSinai E^tthe mount of God; J^Eawful sights and sounds introduce a theophany; 20-23 God gives, i. E^{1D}the Decalogue, ii. E^{1J}the Book of the Covenant, iii. E^{1D}the Book of Judgments; 24 E^ccovenant sacrifice and J^efeast before God, E^PMoses ascends the mount, and E^rremains 40 days; 25-31 P^J gives full directions for the tabernacle, its ornaments and furniture, its priests, their dress and consecration; E^{1J}Moses receives the two tables; 32-34 Eⁱidolatrous and J^umutinous conduct of the people; E^mMoses breaks the tables and destroys the golden calf; J^mmassacre by Levites; J^Eintercession of Moses; E^{1P}usage of tent of meeting; J^Ethe ten Words of the Covenant J^wwritten by Moses J^{1EP}on two tables; 35-40 P^erection and furnishing of the tabernacle.

This section is the most complicated and difficult in the Hex. It is generally agreed that the sources are much dislocated, and that the material has been repeatedly revised by successive editors and compilers. Most critics abandon the attempt to carry through a systematic analysis or reconstruction. The scheme adopted here for the JE portions is that of Bacon, and its resort to the hypothesis of wholesale transpositions can only be

justified by the hopelessness of less drastic methods and the comparative harmony and order which it introduces. There is, however, a growing consensus of opinion in favour of the main conclusions on which the scheme rests. The sources are for clearness given again separately, in the order conjecturally suggested here. The presence of J^a and E^a is often felt, especially in 32-34, but cannot be clearly delimited.

J = 19^{2b}, 20-22, 24, 11b-13, 25 . . . 24^{1f}, 9-11 34¹-5r, 10-28r, 32⁷-14r, 25r-29 33¹, 3 (Nu 11^{10c}, 11f, 14f.) Ex 33¹²⁻²³ 34⁶⁻⁹ . . .

E = 19^{3a}, 9r-11a, 14-17, 19 20¹⁻²¹ 19^{6b-8} 24¹²⁻¹⁴, 18b 32¹⁻⁶ 31^{15b} 32¹⁶⁻²⁴, 30-34 33⁴, 6 . . . 20²²⁻²⁶ 23^{10-33r} (with 22²⁹⁻³¹) 24³⁻⁸, 18^{1-27r} 33⁷⁻¹¹ and (after the E passages in Nu) 17⁸⁻¹⁶ the war with Amalek, and 21^{1-23⁹} the Book of Judgments, whose original position is supposed to be now occupied by Dt.

P^b = 29^{42-46r} 31^{12-17r}
P^r = 19^{1-2a} 20¹¹ 24^{15b-18a} 25-27¹⁹ 28¹⁻⁴⁰, 42f, 29¹⁻²⁰, 22-37 31^{18a}.

P^s = 27^{20f}, 28⁴¹ 29³⁸⁻⁴⁶ 30-31¹¹ 32^{15b-16} 35-40.

R^d (or R^{1a}) = 19^{30-6a}, 23 20^{2b}, 4b-6, 7b, 9f, 12b, 17b 22^{21b-22}, 24, 26b, 31 23⁹, 11b, 12b-13, 15b, 17, 19a, 23-25a, 27, 31b-33 32⁸, 13, 25b 33², 5 34^{1b}, 4a, 7b, 10b-13, 15, 23f.

C. Parallels and Contrasts.

J—(a) J^r 19^{11b}, 18, 20ab, 21ab, 22ab, 24 etc., (b) came down (see I D) (c) in fire 19¹⁸ (cf. Gn 19²⁴ Ex 3², and the pillar of fire II C, a, c) (d) upon Mount Sinai 19^{11b}, 18, 20, 23^r, 34², 4 (e) in the SIGHT of all the people, 19^{11b}, (f) the PRIESTS only being bidden to sanctify themselves 19²², (g) the people being kept at a distance throughout, 19²¹, 24, 12f, 24^{2b}, 34³, (h) while these (so Heb.) 19^{13b}, i.e. Mos. and the priests which come near, were to come up, 22, 24 (read in 24 and the priests: but let not the people cf. j) 24¹, (i) at the BLAST of the RAMSHORN 19^{13b} Heb. (j) Aaron, Nadab, and Abihu with 70 elders accordingly are called and go up, and (k) celebrate a covenant feast before the God of Isr. 24¹¹, 9f. (this incident may have been incorporated by the author from another source, as it presents several peculiar features); (l) Moses is then summoned ALONE to the top of the mount 34^{2f}, (m) with two tables of STONES (so Heb.) which he is to hew 34^{1-4ab}; (n) upon the tables he is to write 34^{27f}, (cf. 1 where the change of one Heb. letter turns I will into thou shalt write) (o) the Ten Words of the Covenant as soon as he receives them 34^{27f}, (p) remaining with J^r 40 days and 40 nights apparently for the purpose of engraving them. (q) The rebellion of the people (32^{2b}) being announced to him by J^r (7, 9), Moses procures by intercession the repentance of Jehovah (11-14), (r) and on descending quells revolt by means of the sons of Levi (32²⁶⁻²⁹). (s) On learning he is to lead alone, Moses intercedes afresh, and procures a theophany, a revelation of mercy, and a promise of J^r's presence 33¹⁻³ (Nu 11^{10c}, 11f, 14f. which interrupt their present context, fit well here, and, after the great block of P is removed, are seen to lie near at hand) 12-22 34⁶⁻⁹. (t) Moses HAD ALREADY made an ark of acacia wood, and puts the tables in the ark (J^s's account, which Nu 10³³⁻³⁶ and the many references to the ark in Jos prove to have existed, but which is now displaced in favour of P's, is recovered from Dt 10¹⁻⁵), (u) but no trace remains of his allusions to the tent of meeting.

E—(a) God 19^{3a}, 17, 19 20¹, 19, 20, 21 21⁶, 13 22⁸, 9ab, 11 in LXX 28 24¹³ 31^{18b} (cf. D) (b) comes 19⁹ 20²⁰ (c) in a thick cloud 19⁹, 16 20¹⁸, 21 cf. 14^{20a} 33⁹ Nu 11²⁵ 12⁵ Dt 31¹⁵ E (d) to the mount of God 24¹³ (cf. I C j), (e) that the people may HEAR 19⁹, 19 20¹, 19, (f) So Moses has to sanctify the PEOPLE 19^{10f}, 14f., (g) and they only stand afar off through fear 20²¹ (h) after Moses has brought them all near 19¹⁷, (i) when there is the VOICE of a TRUMPET going on and increasing much 19¹⁶, 19 20¹⁸, (j) (see below x, x). Without any individuals drawing nearer, God

speaks the Decalogue to the people 20¹⁻¹⁹, (k) (see below w, y), and the covenant is assented to by the people 19^{30-3r} cf. 24³⁻⁸ Dt 27^{11r}, E Jos 24¹⁶⁻²⁷ 1 S 11^{14-12²⁵} E. (l) Moses is then summoned, and goes up into the mount with Joshua his minister 24^{13f}, cf. 33¹¹ Nu 11²⁸, (m) that God may give him the tables of STONE which He has written, and the law and the commandment that he may teach them 24¹² (with a slight transposition rendered necessary by an alteration presumably made when the Book of Judgments was thrust into the centre of the Book of the Covenant to make way for the Deuteronomic law given in the plains of Moab). (n) On the tables God has already written 24¹² 31^{18b} (o) apparently the Decalogue, see Dt 5²². (p) Moses remains in the mount 40 days and 40 nights for the purpose, it would seem, of receiving the law and the commandment, here supposed to refer to the material of the Book of Judgments 21-23⁹. (q) On descending he discovers with surprise the idolatry of the people, (r) and breaks the tables, and destroys the golden calf 32^{15a}, 17-20. (s) Moses then intercedes for the people, is bidden to lead them himself, but has promise of God's angel to go before him: there is a marked tone of severity in the words of J^r 32³⁰⁻³⁵. (t) That E spoke of the ark here may be implied from his allusions in Jos *passim*, (u) and that he described the making of a simpler form of the tent of meeting, placed without the camp, and possibly adorned by aid of the abandoned ornaments, seems to follow from 33⁷⁻¹¹ Nu 11^{16f}, 24b-30 12^{4f}, Dt 31^{14f}, with Ex 33⁵ 32¹¹, 12^{2f}. (v) J^r gives the Book of the Covenant 20²²⁻²⁶ 22^{29f}, 23^{10-33r}; (w) the covenant is assented to by the people, see k above; (x) certain young men 24⁵ cf. 32⁶ and Joshua 33¹¹, ct. J under k, (y) offer a covenant sacrifice 24⁵ cf. 20²⁴ 32⁶ Dt 27^{9f}.

P—(a) J^r (so throughout) (b) makes His glory (16^{7, 10} 29⁴³ 40^{34f}, Nu 14¹⁰ 16^{19, 42} 20⁶ ct. the less local and physical use of the term 33¹⁶, 22 Nu 14²¹ J, Dt 5^{24⁵}) to appear (c) like devouring FIRE (40³⁸ Lv 9²⁴ 10² Nu 9^{15f}, 16³⁵) . . . out of the midst of the CLOUD (16¹⁰ 24¹⁵, 16ab, 17, 18 40³⁴, 35, 36, 37, 38 Lv 16² Nu 9^{15f}, 11 times 10^{11f}, 34 16⁴²) (d) upon Mount Sinai (e) in the eyes of the children of Israel 24^{15b-18a}, (f) no priests having yet been consecrated 29 Lv 8-10, (g) all except Moses being kept at a distance; (l) Moses is called, and goes up into the mount 24^{16-18a}, (m) that he may receive the two tables of the TESTIMONY 31^{18a} 32^{15a}, (n) which had, written on both their sides 32^{15b}, (o) no doubt the Decalogue, a brief account of the giving of which may have been displaced by R^p in favour of the impressive narrative of JE, 20¹¹ being perhaps the only fragment preserved. (p) Moses remains in the mount (prob. for 40 days and nights) to receive the pattern of the sanctuary (25-30), (s) with a promise of J^r to meet with the children of Israel (hence tent of meeting) and to dwell among the children of Israel (hence Tabernacle or Dwelling) 29⁴²⁻⁴⁶. (t) Moses SUBSEQUENTLY ORDERS to be made an ark of acacia wood, overlaid and ornamented with gold 25¹⁰⁻²² 37¹⁻⁹, and puts the testimony into the ark 25¹⁶ 40²⁰; (u) he also prepares, erects, and furnishes a gorgeous Dwelling for J^r, large and costly and needing a numerous body of priests and Levites to attend to it (35-40).

D. Other Clues.

J—God, when stress is on His nature, deity 24¹¹ Gn 32²⁸ 33¹⁰; stiff-necked 32⁹ 33⁵ 34⁹, quoted Dt 9⁶, 13; consume 32¹⁹, 12 33⁵ Gn 41³⁰ of Nu 16²¹, 45 P etc.; and I will make of thee a great nation 32¹⁰ Gn 12² Nu 14¹² ct. Heb. Gn 21¹⁸ 46³ E and Gn 17²⁰ P; face of the ground 32¹² 33¹⁰ Gn 26 43, 14 61, 7 74, 28 88, 13 ct. Nu 12³ E^s and Dt 6¹⁵ 76 142* ; it repented J^r 32¹², 14 (Gn 6^{6f} ct. Ex 13¹⁷ Nu 23¹⁹; land flowing, etc. I D; find grace (in the eyes of) 33^{13ab}, 16f, 34⁹ Gn 6⁸, 13³, 19¹⁹, 30²⁷, 32⁶, 33⁶, 10, 11⁵ 34¹¹ 39⁴ 47²⁵, 29 50⁴ Nu 11¹¹, 15 32⁵ Dt 24^{1*}; pass by, on J^r or His glory 33¹⁹, 22ab 34⁸; proclaim . . . 33¹⁹ 34⁶ (thn) glory 33¹⁸, 22 cf. C b under P; stress on mercy 33¹⁹ 34^{6f}, Nu 14¹⁴; I make a covenant 34¹⁰, 27

E—*Prove*, 20²⁰, see II C e; *lord of (wife, etc.)*, Heb. *ba'al*, RV *married, owner*, etc. 21³. 22. 23. 23ab. 34ab. 36. 22³. 11f. 14f. 24¹⁴ Gn 20³ 37¹⁹ Nu 21²⁸ Jos 24¹¹, in J only once, in the poem Gn 49¹³; *bondswoman* 25 217. 20. 26f. 32 (Heb. word never used by J); *stress on severity of God* 23²¹ 32³³ Nu 23¹⁹ Jos 24¹⁹; *Aaron and Hur* 24¹⁴ 17¹⁰. 12; *rings (i.e. for ears)* 32^{2f}. Gn 35⁴ Jg 8^{24f}. (perh. E); *sin* 32¹. 30f. Gn 20^{9*}; *Horeb* 33⁶, see I D; *pillar of cloud* 33⁷⁻¹¹, see C c.

IV. THE LAWS IN EXODUS.

The four earliest Heb. codes occur in this section, all in an expanded form. The principal additions have been shown above (end of III B); they either interrupt the context, or contrast with it in phraseology or material, or seem to be quotations inserted from elsewhere. Limits of space forbid any further attempt to justify their excision from the orig. sources.

It is now generally agreed that E contained three out of the four codes. This confirms the view that this document, like others, represents the end of a long process, during which various elements were successively assimilated. Moreover, those who combined E with J (referred to as R^o), who added D (R^d), who finally incorporated the whole in P (R^p), naturally in the case of such important material showed at its strongest the desire to preserve all they could. Is it unreasonable to conjecture that each fresh combination required some dislocation of the existing material to suit the new adjustment? In the text as we now have it, E's three codes form together the basis of the Covenant. It has been suggested above that in E, in its final form as a separate document, the Decalogue was the basis of the Covenant, the *Book of the Covenant* led up to the Renewal of the Covenant, while the *Book of Judgments* belonged to Moses' parting words in the plains of Moab. If R^o used J's version of the Covenant to serve for the account of the Renewal of the Cov. (34¹⁻²⁸), and, to preserve E's *Book of the Cov.*, put it back to form with the Decalogue the basis of the first Cov.; and if R^d, inserting D in the section about the plains of Moab, kept the *Book of Judgments* by incorporating it with the *Book of the Cov.*, then the very order which we now have would have been produced. That this actually took place is only conjecture; but it was worth while showing how the present state of the text might have arisen; and this solution has at least the merit that it only presupposes the action of causes which have been clearly traced at work elsewhere.

The Codes compared.

J—*The Ten Words of the Covenant* (III C 1-p above).—(The list given is only the one thought best of several possible ones. Parallels in E are marked by the corresponding number. Laws in 3 codes are in LARGE CAPITALS; laws given by both J and E in SMALL CAPITALS): (1) MONOLATRY COMMANDED; (2) IMAGES FORBIDDEN; (3) THE FEAST OF UNLEAVENED BREAD, (4) THE SABBATH, (5) THE FEAST OF weeks of FIRSTFRUITS, and (6) THE FEAST OF INGATHERING, COMMANDED; (7) BREAD WITH SACRIFICES TO BE UNLEAVENED; (8) THE *passover sacrifice* TO BE ALL CONSUMED; (9) FIRSTFRUITS REQUIRED; (10) SEETHING OF A KID IN ITS DAM'S MILK FORBIDDEN.

E—*The Decalogue*. (1) MONOLATRY COMMANDED; (2) IMAGES FORBIDDEN; false swearing forbidden; (4) THE SABBATH enjoined; reverence to parents commanded; murder, adultery, theft, false witness, and covetousness forbidden.

E—*The Book of the Covenant* (III C v above). (1) MONOLATRY (?) COMMANDED; (2) IMAGES FORBIDDEN; altars to be built as ordered, (9) FIRSTFRUITS DEMANDED; also FIRSTLINGS (cf. 13^{11f}. J); the Sabbatical year, and (4) THE SABBATH COMMANDED; also (3) THE FEAST OF UNLEAVENED BREAD, (5) THE FEAST OF harvest of FIRSTFRUITS, and (6) THE FEAST OF INGATHERING; (7) BREAD WITH SACRIFICES TO BE UNLEAVENED; (8) THE fat of God's feast TO BE ALL CONSUMED; (10) SEETHING A KID IN ITS DAM'S MILK FORBIDDEN.

[It will be observed that, while the Decalogue (which see) contains both religious and moral laws, the other two concern only religion and the cultus, and are very closely parallel to one another].

E—*The Book of Judgments* (21-23⁹). This code contains a comprehensive series of laws, civil and criminal, all penetrated

by a high ethical and religious spirit. They seem drawn up, perhaps originally in sets of 5 or 10, for use by judges and magistrates, but display no very definite order of arrangement. The appeal lies before God, i.e. (presumably) at the sanctuary, cf. 18¹³⁻²⁶. With this code should be carefully compared Dt 12-26, which is based on it, and Lv 17-26, the Holiness Legislation, which presents many parallels.

The chapters in P relating to the Tabernacle (which see) remain to be considered. They are not without difficulty, for a close inspection discovers reasons for believing that they are not all from the same hand. The full proof of the analysis given above (end of III B) cannot be reproduced here, but the nature of the principal line of argument can be seen from the accompanying table, which gives the sections in the order of 35-40 (Heb. text)=H², while on either side are given references to 25-31 (Heb. text)=H¹, and 35-40 (Gr. text)=G. The letters indicate by their alphabetical order the order of sections in the text referred to; and those sections in H¹ which are judged later than P² are marked by an *italic* capital. A moment's comparison of H¹ and H² shows large variations of order. But while the changes of order in A to K and M to U can be readily accounted for by the mere fact that H² records the fulfilment and H¹ the ordering, the passages L, W, X, Z, A', B' seem so out of place where they are that it is necessary to suppose them to be later than the context that would otherwise have contained them. The golden altar of incense (W=m) is the most important case. (1) It is out of its natural place in H²; (2) the term *the altar* in 27¹⁻³, and 100 times elsewhere in P² and (early) P¹, would be ambiguous if the altar were one of two, and is replaced in 38¹ etc. by a distinctive term, *the altar of burnt-offering*, and so constantly in the later strata of P²; (3) the incense altar is not mentioned in G; (4) in Lv 10 and Nu 16 we only read of censers for incense, and *the*

altar is still the only one Nu 16³⁸. It may be noted that 28⁴¹ 29²¹ are late P^s because Aaron's sons receive anointing, contrary to the clear intention of P^s in 29⁷ 29⁴, and so Lv 8¹² etc. A further comparison of H² with G shows a second set of variations. It is held by many that the facts require us to suppose that the Greek tr. of 35-40 was made before the Heb. text had reached its present symmetrical and complete form. By means of the above table the student can readily test for himself the value of this suggestion.

V. CONCLUDING SURVEY.

i. *The History.*—If we accept the results of this article as in the main correct, we have passed far beyond the boundary of a merely negative criticism. It might be called destructive work to show by detailed proof that we have no contemporary account of the Exodus and subsequent events. But when it is shown that the present narrative is made up of three, so far contrasting with one another as to prove themselves much later in date than the period of which they treat, and the work, not merely of different individuals, but of different schools of historical writing; and when the further step is taken of disentangling, with infinite pains of many labourers in many lands, the several threads of narrative, and recombining them in something like their original connexions, the work of constructive criticism must be held to have been well begun. The summaries will have shown on how many important points the three witnesses are at one. For fuller particulars see MOSES, ISRAEL.

But, while it is well to remember that contrasts are not always, or even usually, contradictions, it would be idle to try to belittle the extent of the change of view brought about. We may rather think of it as the drawing back of a veil of illusion which God wisely allowed to hang over the past, until the growth of truer ideas about history both took away the veil, and made men ready to make use of the facts, whose real relations were at last adequately discovered.

If, therefore, it has to be admitted that the Priestly history (P) has no independent value as a witness to the Mosaic period, and that the materials in E, and to a less extent in J, require careful sifting before being regarded as correctly representing an age which to them was already a distant age, we may set against that two things. First, an exact view of that epoch might have disappointed us, even as a field sown with corn has little beauty till the seeds have shot up into blade and stem. Secondly, we have instead three views of it, so influenced by the ideas of the writers' own times and circumstances as to reveal to us various stages in the after-growth, which was itself entirely dependent on that germinal time. On the face of it, the book tells of the Exodus of Isr. from the bondage of Egypt; in the soul of it, it speaks, to those who have ears to hear, of successive stages in the great outgoing, at once more glorious and more perilous, of the family of man from the bondage of superstition, ignorance, and sin. The events are not merely typical of spiritual realities; but the very fact that they were thus and then recorded, shows the faith of the men of other days in the God whose hand they loved to trace at work in the world.

ii. *The Leading Ideas.*—The Heb. writers are not mere annalists, but interpreters of history. Hence their permanent value. They may be criticised as chroniclers of outward events, but they sought and found God everywhere, and they abide to hand on their secret. In all three documents we find the same fundamental verities emphasized, which give to Ex its real unity. J^r is the supreme God,

ruling in Egypt, and master over nature. He is the faithful God who made His choice of the fathers of the Heb. race, and will not draw back. He is the God of grace, and so loves to give guidance, counsel, help, food, drink, every needed supply. He is the Holy One, and requires obedience to His will, and takes steps to make known that will. He is the Jealous God, and demands that due worship shall be paid to Him, and to none else. He is the Covenant God, and the two sides of the Covenant are: J^r Israel's God, Israel J^r's people.

But each document has its individual standpoint, even as each of the synoptic Gospels presents its own picture of the life of Christ. The oldest, J, perhaps coming from the priestly circle connected with Solomon's temple, is written from the point of view of a highminded patriot, keenly interested in every detail of national history, so quick to see God's hand in providence as to be able to make his story religious with but little use of the miraculous, alive to all the shades of character in men, as well as to the richness of the Divine nature, in which *mercy rejoiceth against judgment*, valuing highly the common ordinances of religion, and recognizing the great opportunities of the priestly office. The document E, probably rather later, and originally coming from Ephraimite circles, reflects the views of the prophets. This work (extending from Gn to Kings) is a series of biographical studies of great prophetic heroes, with Moses as the central figure. Much stress is laid on morality. The people sin, and need to be called to repentance. God is righteous, and His requirements must not be despised. The miraculous element is heightened, of course unconsciously. The moral of each incident must be made clear, the reality of the Divine government set unmistakably forth. Sad experience of the faults of the priesthood leads to the priests being either passed over, or introduced for blame. Worship is strictly secondary to morality.

The priestly writer (P) has lost all hold upon the simplicities and roughnesses of the childhood of the nation. So possessed is he with reverence for the religious institutions of the now ruined temple, that he not only has already in the vision-chamber of his imagination elaborated them to an ideal perfection which they never had, but this ideal picture must be, he has become persuaded, the reflection of what actually existed in the primitive, the perfect days. Each new improvement is unhesitatingly added with the same formula of Divine inspiration, the argument being: 'We see this to be best now, therefore it must have been ordered and done then.' Granted, then, that this stately centralized worship was the Divine purpose for the Second Temple, we may surely accept the unhistorical form of the priestly legislation as being probably the only means by which it could have been successfully introduced. After all, the full corn in the ear *is* present in the seed, if not in miniature, at least in promise and potency.

The Bk. of Ex is like a grand symphony, which was once thought to give harmony without discord, but is now being found, in virtue of elements which by themselves are sharply discordant, to sound forth a yet richer harmony.

LITERATURE.—See Hexateuch. B. W. Bacon's *The Triple Tradition of the Exodus*, and his arts. in the *Journal of Bibl. Lit.* (1890-93) have been of great service to the writer; and Bruston's essay, *Les quatre sources des lois d'Exode*, is plausible and suggestive. We still wait for a good Eng. com. on Exodus.

G. HARFORD-BATTERSBY.

EXORCISM, EXORCIST.—The word ἐξορκίζω is a later form of the classical ἐξορκόω. The latter is employed in Demosthenes in the sense of 'administer an oath to a person.' The verb ἐξορκίζω is used by the high priest to Jesus 'I adjure thee by

the living God . . . (Mt 26⁶⁸), and corresponds to the Heb. *הַקָּדוֹשׁ*. Cf. Gn 24³ LXX. The subst. *exorcist* is only once employed in the NT, viz. in Ac 19¹³. The passage is instructive, since it shows that exorcism in those days was practised as a profession by strolling Jews. The method which they pursued we might infer from the example of Eleazar, to which Josephus specially refers in the passage cited from *Ant.* VIII. ii. 5, in the article DEMON, p. 593^a. The constant and essential element in all these exorcisms was the power wielded by the recitation of special names. In the instance recorded in Ac 19 the Jewish exorcists had observed the expulsions which Paul had effected through the pronunciation of the name of Jesus, and endeavoured, with ludicrously disastrous results, to work the same cures by saying, 'We adjure you (the evil spirit) by Jesus whom Paul preacheth.'

An example of the ancient Babylonian incantations has already been given above, p. 591. Illustrations of Jewish spells may be found in the Talmud. (Respecting these, see Brecher, *Das Transcendentale, Magie u. magische Heilarten im Talmud*, Vienna, 1850, pp. 195-203.) That these were ultimately derived from Babylonian magic can admit of no doubt. Some Aramaic inscriptions, published in the *Zeitsch. für Assyriologie* (Dec. 1893 and April 1894) by Wohlstein, contain instructive examples of these exorcising formulæ. They are inscribed on the interior surfaces of some ancient bowls that were brought from Baghdad in 1886 and placed in the Royal Museum in Berlin. The mode of expression in all of them possesses broad features of resemblance, but special details vary in each case. For the names of the angels which are recited in each bowl differ widely owing to the prevailing belief, which finds expression in the Jewish *Kabbala*, that the ruling angels are constantly changing, and those must be addressed who hold the reins of power at that time and place.

The first of the series (No. 2422), from which we shall quote, was evidently employed to exorcise the demon of a man who was suffering from leprosy.

'In thy name I form a heavenly cure for Achdebu] the son of Achathabu of Daithos, by the compassion of Heaven. Amen. Amen. Selah. Bound, bound, bound shall be all the male spirits and female Astartes* evil spirits, powers of opposition . . . all Satans from West and East, North and South. Bound, bound shall be all evil sorcerers and all who practise violence; bound and sealed shall be all . . . and curses and conjurations. Bound be the angels of wrath, the angels of the house of assembly . . . the mighty princes, the hard princes, the diseases without number, the sufferings, the abscess, the scab, the mange, the skin-eruption, malignant discharge, suppurating wounds, the spirit of the burial-place, the spirit of the dead, the spirit of diseases; bound and sealed up shall ye all be from Achdebu], son of Achathabu. Go and withdraw yourselves to the mountains and the heights and the unclean course [Mt 8², Mk 6¹², Lk 8²²]. If ye come on the first of Nisan [regarded as specially favourable for overcoming demons], go away from Achdebu], son of Achathabu, in the name of Gabriel, who is called Elpassas, and in the name of Michael, who is called (Demu)thja, and in the name of Elbenmez, and in the name of Elba'baz . . .' [The inscription concludes with the formula Amen, Amen, Selah, which occurs in other incantations, sometimes with the addition of Halle-lujah].

The exorcism No. 2416, transcribed by Wohlstein, is much longer, and other names of angels compounded with the name of deity El (as Nuriel, Chathiel, Sesagbiel, etc.) are quoted, with Myta-

* פתיכרי דיכרי ואיסירתה נוקבתא. Note that in פתיכרי 'spirits'

we have practically the same word as the Syriac *ܫܠܬܢܝ* 'idol.' The word *איסירתה* is the *Īstarāti* 'goddesses' of the Assyrian. Similarly, the Talmudic flame-demon *Rešpā* is the Phœnician flame-deity *Rešep* or *Rešpu* (see Baethgen, *Beiträge zur Semit. Relig.-gesch.* p. 50; Wiedemann, *Relig. der alten Ägypter*, p. 83). Cf. Beelzebub of the NT. These are instructive examples of the wholesale conversion of heathen deities into demons.

tron at their head, making seven in all. The formula *איהו אשר איהו* (from Ex 3¹⁴), *ישראל* and all variations on the names of deity, as *יהו* and *יהוה*, and the Athbash equivalent *בן בן*, are pressed into the service.

These spells are ascribed to the 7th cent. A.D., though written in unpointed Hebrew. The characters are of the more recent square type, and a much earlier date than the above is hardly probable. Why they were inscribed in bowls cannot be explained. The bowls were not intended to hold water, otherwise the distinctness of the lettering would have been obscured.

Demonology and exorcism played a conspicuous part in the literature and practice of the Christian Church throughout the earlier period and during the Middle Ages. In the time of our Lord exorcism was regarded as one of the signs of the Messiahship (Mt 12²⁸). It was the universal belief of the early church Fathers that a disciple of Jesus was able to exercise power over demons by uttering His name (Tertullian, *Apologet.* 23; Origen, *cont. Cels.* vii. 334). Naturally, bishops and other ordained clergy were considered to possess this charisma. But there was a special class of individuals who were so endowed without any ecclesiastical conferment (*Apost. Constit.* viii. 26, *ἐξορκιστῆς ὁ χειροτονεῖται*). They received formal episcopal recognition, but not ordination, as *exorcistæ per gratiam*. Nevertheless, we also find another class who did receive episcopal ordination, and were called *exorcistæ per ordinem*. In the ceremony of baptism the catechumen of adult age was obliged solemnly and publicly to renounce the devil and his works, but in the case of children the assistance of the exorcist was necessary. By the priest and attendant exorcist the ceremony of *exsufflatio* and *insufflatio* was performed on the child, who was regarded as a child of the devil, as being subject to inherited guilt. *Sacerdos exsufflat ter in faciem catechumini semel dicens: Eci ab eo (ea) spiritus immunde et da locum spiritui sancto Paraclito. Hic in modum crucis habet in faciem ipsius et dicat: Accipe spiritum bonum per istam insufflationem et Dei benedictionem. Pax tibi.* According to the practice of the Romish Church at the present day, the separate existence of the exorcist is not recognized, but every priest, on ordination, receives previous consecration to the lower orders, including that of exorcist. In Can. 9 of the Fourth Council of Carthage we read: *Exorcista quum ordinatur accipiat de manu episcopi libellum in quo scripti sunt exorcismi.* At the present time the ordaining bishop places a missal in the priest's hands with the words: *Accipe et commenda memoriæ et habeto potestatem imponendi manus super energumenum* [i.e. *ἐνεργούμενον, sc. ἰσὸ πνευμάτων ἀκαθάρτων*].*

Among the Reformers opinion and practice were divided respecting exorcism. Luther and Melancthon favoured it, but it was decisively rejected by Zwingli and Calvin (*Instit.* iv. c. 15. 19). For further details respecting ecclesiastical practice the reader is referred to the article '*Exorcismus*' in the 2nd ed. of Herzog-Plitt's *Realencyklopädie*, from which the facts in Christian ecclesiastical tradition

* The Ritual for exorcism may here be appended. The priest, having arrayed himself in the official robes, first sprinkles the demoniac with holy water and then recites the prayer of the litany of all saints, the paternoster, and Ps 63; after this the two orations, in which he makes the sign of the cross over the demoniac, and commands the evil spirit to depart by the power of the mysteries of the incarnation, passion, death, resurrection, and ascension of Christ, the gift of the Holy Ghost, and Christ's return to judge the world. After this follows the reading of Jn 1. Mk 16¹⁷⁻¹⁸, Lk 10¹⁷⁻¹⁹. Then the priest lays both hands on the head of the demoniac and says, *Eccc crucem Domini. Fugite, partes adversæ: vicit leo de tribu Juda.* After this comes the Oration, with the special formula of exorcism, *Exorcizo te, immunde spiritus*, while the priest crosses the brow and breast of the demoniac three times in the name of the Trinity. If the evil spirit does not then depart, the service is begun anew.

have been derived. The article 'Kabbalah,' in the same dictionary, may also be consulted with advantage. OWEN C. WHITEHOUSE.

EXPECT, EXPECTATION.—Following Lat. *expectare*, 'expect' meant in older Eng. not only 'look forward to,' but also simply 'wait,' or 'await.' Thus in Douay Bible the comment on Sir 11^s is 'Expect the end of another mans speech, before you begin to answer. Expect also if anie that is elder, or better able wil answer first.' Expect is used in this way in Job 32^m, 2 Mac 9^{ss}, and He 10¹³ 'From henceforth expecting till his enemies be made his footstool.' The Gr. of last passage is ἐκδέχουαι, elsewhere in NT tr^d 'wait for' (Jn 5^s, RV omits, Ac 17¹⁶, Ja 5⁷), 'tarry for' (1 Co 11^{ss}, RV 'wait for'), 'look for' (1 Co 16¹¹ RV 'expect,' He 11¹⁰). Cf. Bacon, *Adv. of Learning*, i. (Selby's ed. p. 14, l. 35), 'The most active or busy man that hath been or can be, hath, no question, many vacant times of leisure, while he expecteth the tides and returns of business.'

Expectation is used throughout in the sense of looking forward to with hope. Thus even in Ps 62^s 'My soul, wait * thou only upon God; for my expectation is from him,' the Heb. is *tikwah* (תִּקְוָה), similarly tr^d in Ps 9¹⁸ and in Pr, but most often tr^d 'hope,' and the meaning is 'that which I hope for, my deliverance.' In Ro 8¹⁹, Ph 1²⁰ 'earnest expectation' is an effort to bring out the full force of the Gr. word ἀποκαρδοκία, which is found nowhere else. It is formed from δοκέω in the sense of 'watch,' κάρα, the 'head,' and ἀπό, 'from,' so that it means (Sanday-Headlam) 'awaiting with outstretched head,' the prep. denoting 'diversion from other things and concentration on a single object.' The Vulg. has simply *expectatio*, whence Khemish 'expectation.' Wyc. has 'abiding.' But in Ro 8¹⁹ Tind. gives 'fervent desire,' and is generally followed (Cov. 'fervent longing'). 'Earnest expectation' is the Bishops' translation in both places.

J. HASTINGS.

EXPEDIENT is never found in AV in the sense of 'expeditious,' as so often in Shakespeare. On the other hand, it never means merely 'convenient' (opposed to what is rigidly right), as in modern English. The Greek is always συμφέρον, or (2 Co 12¹) συμφέρον (= 'it is profitable,' as AV and RV elsewhere tr. the word, except in Mt 18⁶ AV 'it were better,' and 19¹⁰ AV 'it is not good,' RV 'it is not expedient'). So even Caiaphas (Jn 11⁵⁰ 'it is expedient for you that one man should die for the people') does not openly prefer, as a modern politician, the convenient to the just. His words are like those of Jeremiah (26¹⁴ Cov.), 'Now as for me: I am in your handes, do with me as ye thinke expedient and good,' though his spirit is the opposite.

J. HASTINGS.

EXPERIENCE, which is the result of 'experiment,' was sometimes used for the experiment itself, as Baker, *Jewell of Health*, 112^a 'The Ancthour . . . hath both seen and done many experiences worthy memorie.' This is no doubt the meaning in Gn 30²⁷, where Laban says to Jacob, 'I have learned by experience that the Lord hath blessed me for thy sake.' It is the Douay translation. The Geneva has 'perceived,' but in marg. 'tried by experience.'

The Heb. (חָזַן) means to observe omens, whence RV 'I have divined.' It is used of Joseph's divining by means of a cup (Gn 44¹⁵, with notes by Del. Dillm. Wade) and elsewhere. The ptc. is found Dt 18¹⁰ 'a diviner,' where see Driver's note.

J. HASTINGS.

* There is no suggested connexion between 'wait' and 'expectation,' as the Heb. for 'wait' is 'be silent unto God,' as RVm (Cheyne, 'be simply resigned to God').

EXPERIMENT is narrower and more concrete now than formerly. Occurring in AV in 2 Co 9¹³ only, 'Whiles by the experiment of this ministration they glorify God,' its meaning is 'test,' 'proof,' as Wither (1618), *Motto, Nec Careo*, 533—

'I want not much experiment to show
That all is good God pleaseth to bestow.'

The Gr. is δοκιμή (tr^d 'experience' in Ro 5⁴ AV, but RV 'probation'). 'Experiment' is the Geneva word; RV 'seeing that through the proving of you by this ministration they glorify God,' which is a return to Wyclif, 'bi the preuyng of this mynysterie.' J. HASTINGS.

EXPIATION.—See ATONEMENT, PROPITIATION.

EXPOSURE.—See CRIMES AND PUNISHMENTS.

EXPRESS.—Only He 1³ 'the express image of his person' (χαράκτηρ, RV 'the very image,' RVm 'the impress'); and Wis 14¹⁷ 'they . . . made an express image of a king' (ἐμφανῆ εἰκόνα, RV 'a visible image'). On χαρακτήρ see Westcott, *in loc.* The tr. of RV is after Tind.; the Geneva ('engraved forme') tries to bring out the sense of the Gr. word, which is properly what stands engraven on any object, as a seal (Davidson), and this is the meaning of AV 'express image'; cf. Shaks. *Hamlet*, II. ii. 299, 'What a piece of work is a man! . . . in form and moving, how express and admirable,' which Aldis Wright explains thus: 'Exact, fitted to its purpose, as the seal fits the stamp.' *Exprimere* (ptcp. *expressus*) has the meaning among others of 'copy,' 'pourtray,' and from this the Eng. word was used before 1611 in the sense of 'exactly pourtrayed.' Thus Sir T. More, (1513) *Rich. III.* 'This is ye fathers own figure . . . ye playne expresse lyknes of ye noble Duke.'

J. HASTINGS.

EXQUISITE.—From Lat. *exquisitus*, ptc. of *exquirere*, to search out, 'exquisite' is properly, and was originally, that which is elaborately devised, 'ingenious,' and its application might be good or bad. In the *Areopagitica* (Hales' ed. p. 16) Milton says Mr. Selden's volume 'proves . . . by exquisite reasons and theorems almost mathematically demonstrative, that all opinions, yea, errors, known, read, and collated, are of main service and assistance toward the speedy attainment of what is truest.' Milton even uses the word *actively* of persons in *Comus*, 359,

'Peace, brother, be not over-exquisite
To cast the fashion of uncertain evils,'

as other writers had done before him. Exquisite occurs Sir 18²⁵ 'They . . . poured forth e. parables' (παροιμίας ἀκριβεῖς, RV 'apt proverbs'), and 19²⁵ 'There is an e. subtilty, and the same is unjust' (so RV, Gr. πανουργία ἀκριβής). J. HASTINGS.

EXTINCT.—Extinct (Lat. *extinctus*, ptc. of *extinguere*, to extinguish) now only expresses a state, 'active and extinct volcanoes'; 'the volcano is extinct.' But formerly it expressed the action which produces the state, and so Job 17¹ 'my days are extinct' (יָמַי נִכְרְתוּ), and Is 43¹⁷ 'they are extinct, they are quenched as tow' (נִכְרְתוּ). Cf. Shaks. *Rich. II.* I. iii. 222—

'My oil-dried lamp and time-bewasted light
Shall be extinct with age and endless night.'

'Extinguished' occurs, however, in Wis 2³.

In the 16th cent. a verb 'to extinct' was coined, of which the past ptc. was sometimes 'extincted' and sometimes 'extinct.' It is thus uncertain whether 'extinct' as ptc. belongs to 'extinguish' or to this verb. Shaks. uses 'extinct' twice, 'extincted' once (*Oth.* II. i. 81, 'Give renew'd fire to our extincted spirits!'), but never 'extinguished.' He uses the verb 'extinguish' only once. J. HASTINGS.

EXTREME is used as an adv. in Sir 42⁸ 'the

extreme aged' (ἐσχατόγητος). So Bacon, *Essays* (Gold. Treas. ed. p. 156), 'Acting in Song, especially in Dialogues, hath an extreme Good Grace'; and p. 178, 'all Deformed Persons are extreme bold'; and again in *Advance. of Learning*, II. xxiii. 38, 'it [is] extreme hard to play an after game of reputation.'

J. HASTINGS.

EYE.—The verb occurs twice: 1. Gn 29¹⁷ 'Leah was tender eyed' (לֵאָה רַחֵם עֵינֶיהָ, RV 'L.'s eyes were tender'). Whether 'tender' is appreciative or depreciative is disputed. Modern commentators usually say depreciative, after LXX (ἀσθενείς) and Peshitta. But others, the tender brightness of a child, after Onk. and Sa'adya, and quoting Gn 33¹³ 'My lord knoweth that the children are tender' (same Heb.). See Spurrell, *in loc.*; also Otts, *The Fifth Gospel*, p. 41 f.; and *Expos. Times*, v. 97. The Vulg. *lippiis oculis*, 'blear-eyed,' is certainly wrong. 2. 1 S 18⁹ 'And Saul eyed David from that day and forward' (עָיַן יְהוָה, *Kêrê* עָיַן, a denom. from עָיַן to eye). For the construction and Heb. parallels, see Driver, *in loc.* The meaning is to look on with envy (cf. *invidia*; and see the 'Evil Eye' under art. ENVY, and Trench, *NT Synonyms*, p. 106 f.), but there is no other example in English of the verb 'eye' in the sense of 'envy.'

J. HASTINGS.

EYE (עַיִן).—The eyes of Orientals are usually well formed, large, and lustrous, but deficient in that play of expression which accompanies thought, humour, and fancy.

As the chief of the organs of sense, the eye had a leading place in the *lex talionis*, 'eye for eye' (Ex 21²⁴). To put out the eyes of an enemy or prisoner was like breaking the teeth of a captured wild animal, the removal of the chief power to injure. It was also a great degradation (Jg 16²¹, 1 S 11², 2 K 25⁷). Among the begging classes of Palestine, blindness, next to the revolting spectacle of leprosy, makes the strongest claim upon the charity of the benevolent. Blind men are sometimes known to decline the offer of the medical missionary, as restored sight would mean a loss of privilege (see **Blindness** under **MEDICINE**).

The fig. references to the eye are many and varied. As the chief means of contact with the outer world, the eye is the source of pleasurable sensations and the principal avenue of temptation (Gn 3⁶, Pr 27²⁰, Ezk 24²¹, 1 Jn 2¹⁰). Knowledge is the opening of the eyes (Gn 3⁷, Ps 119¹⁸, Eph 1¹⁸).

The prophet was first called the 'seer' (נָבִיא) 1 S 9⁹, and his message a 'vision' (חֹזֶן) Is 1¹, Ezk 7²⁶ etc. In connexion with the feelings, sorrow is associated with a consumed or wasted eye (Ps 6⁷), and satisfaction in worldly prosperity with an eye standing out with fatness (Ps 73⁷).

Tear-bottles are often found in the ancient tombs, as affecting tokens of regret and grief. This memorial act may be referred to in Ps 56⁸ 'Put thou my tears into thy bottle.' (See **BOTTLE**.) To have the eyes delivered from tears takes rank with the deliverance of the soul from death and the feet from falling (Ps 116⁸); to have all tears wiped from the eyes (Rev 21⁴), is part of the riches in glory.

As a judge of what is pleasant or offensive, the eye indicates an intention of favour or hostility. Thus in an Arabic salutation, in answer to the opening inquiry as to health, the usual reply is, 'Well, by your looking upon me' (favour of your eye), and the conventional parry of politeness is to say, 'By God's looking upon you.' A similar thought of the eye's protective favour lies in the words *providence*, *episcopos*, *overseer*. On the other hand, there is the widespread and deeply-rooted superstition about the power of the **evil-eye**, and

one of the chief uses of the amulet (wh. see) is to obtain protection against it.

The **Eyelids** (עַיִנוֹת) are mentioned as a means of seduction employed by the 'evil woman' (Pr 6²⁵), and not infrequently appear in poetical language as a synonym for, or parallel with, the eyes (Job 16¹⁶, Jer 9¹⁸, Ps 11⁴ 132⁴, Pr 6⁴ 30¹⁸). By a beautiful metaphor in Job 3⁹ 41¹⁸ the first rays of dawn are called the 'eyelids of the morning.'

Eye-paint (קְרֵן, Arab. *kuhl*; cf. קְרֵן Ezk 23⁴⁰) was a paste made of antimony powder, giving a brown-black burnished stain to the eyelashes. The practice which is depicted on the monuments still continues in Egypt (see Lane, *Mod. Egypt*,⁵ i. 45 f.). The paint is kept in a small horn or ornamental metal vase with a thin rod for applying it. It makes the eyes look larger and more lustrous (2 K 9³⁰, Jer 4³⁰, Ezk 23⁴⁰). One of Job's daughters was called *Keren-happûkh*, 'horn of eye-paint' (Job 42¹⁴).

The **Eye-salve** (κολλούριον, *collyrium*) of Rev 3¹⁸ was a preparation used for healing or strengthening the eye (cf. Hor. *Sat.* i. 5. 30; *Epict. Diss.* ii. 21. 20, iii. 21. 21; *Cels.* vi. 6. 7). (See **MEDICINE**).

HORN FOR EYE-PAINT.

G. M. MACKIE.

EYESERVICE.—This is a literal tr. in Eph 6⁶, Col 3²² of the Greek ὀφθαλμοδοουλία, and seems to have been coined by Tindale, although he uses it only in Col, in Eph giving 'service in the eye sight.' The word was at once adopted into the language, Crowley (1550), *Last Trump*, 163, having 'Se thou serve him . . . not wyth eye-seruice fainedly.' The AV of 1611 is, however, the first Version that has eye service in Eph (it writes two separate words as all the Versions do in Col). The Greek word is found nowhere else: 'This happy expression,' says Lightfoot, 'would seem to be the apostle's own coinage.'

J. HASTINGS.

EZBAI (עִזְבַּי).—The father of Naarai, one of David's mighty men (1 Ch 11³⁷). The parallel passage 2 S 23³⁵ reads 'Paarai the Arbit' (עִזְבַּי אַרְבִּי) for 'Naarai the son of Ezbai' (נָאֵרַי בֶּן־עִזְבַּי). It is impossible to decide with any confidence between the rival readings. (See Kittel's note on 1 Ch 11³⁷ in Haupt's *Sacred Bks. of OT*).

J. A. SELBIE.

EZBON (עִזְבֹּן, עִזְבֹּן).—1. Eponym of a Gadite family (Gn 46¹⁶), called in Nu 26¹⁶ **Ozni** (which see). 2. A grandson of Benjamin (1 Ch 7⁷). See **GENEALOGY**.

EZEKIAS.—1. (A 'Ezekias, B 'Ezēlas, AV Ezechias) 1 Es 9¹⁴ = JAHZEIAH, Ezr 10¹⁵. 2. ('Ezekias, AV Ezechias) 1 Es 9⁴³.—Called **HILKIAH**, Neh 8⁴.

EZEKIEL (Vulg. *Ezechieel*, LXX 'Ιεζεκιήλ, Heb. עִזְקִיֵּאל, 'God is strong,' or 'God strengthens'), the son of Buzi, was one of the temple priests who shared the exile of Jehoiachin in B.C. 597 (Ezk 1^{2, 3}, cf. 2 K 24¹⁴⁻¹⁶). His work as a prophet commenced in the fifth year of his banishment (1²), and extended over a period of not less than 22 years (592-570); the latest date in the book being the 'seven and twentieth year' of his sojourn in Babylonia (29¹⁷). This part of his life was spent (so far as appears) in a Jewish settlement at Tel-Abib (1¹ 3¹⁵), an unknown place near the 'river Chebar' (כְּבַר), which was probably a canal or a tributary of the Euphrates in the vicinity of Babylon,—certainly not the Haboras (חַבּוֹר 2 K 17⁶) in N. Mesopotamia. The life of this colony of expatriated Jews is but dimly reflected in the pages of

Ezk; the picture is partly supplemented by the 29th ch. of Jer. Those carried captive were the *élite* of the nation; and they seem to have lived in tolerably easy circumstances, enjoying a large measure of freedom and self-government, forming a little world of their own, and cherishing a passionate interest in the concerns of their native land. They kept up by some means an active intercourse with Jerus.; and, in spite of intense mutual antipathy between them and the ruling classes at home, they never ceased to regard themselves as part and parcel of the Heb. nation, confidently expecting that some great political upheaval would speedily restore them to their old place at the head of the state. This delusion was fostered by the rise of prophets of the same type as Jeremiah's opponents in Jerus.—an event which was hailed with immense satisfaction, not unmixed with surprise, by the exiled community (Jer 29¹⁵). The false patriotism thus engendered threatened to bring down the heavy arm of Nebuchadnezzar on the captives, and Jer., though his sympathies were with the patrician exiles rather than with the people left in the land (Jer 24¹⁻³), endeavoured to allay the dangerous political excitement which blinded them to their true position. Altogether, it would seem that the main currents of feeling and opinion prevalent in Pal. were reproduced with remarkable fidelity in the community where E. was destined to labour.

Although little is known of E.'s previous life, it cannot be doubted that he found himself from the first in an uncongenial social atmosphere. In spite of the statement of Jos. (*Ant.* X. vi. 3, *παῖς ὄν*), he was probably no longer a young man when deported to Babylon. The meaning of 'the 30th year' in ch. 1¹ is too obscure to throw light on the matter, but his familiarity with the technical details of the temple and its ritual seems to show that he had officiated for a considerable time in the national sanctuary. The numerous points of contact between him and Jer. would indicate that he had come early under the influence of that great prophet, and from the whole trend of his thinking it seems probable that he had belonged to the reforming party in the state, which sought to purify the national religion in accordance with the requirements of the Deuteronomic legislation. That party had been powerless since the death of Josiah, and it is reasonable to suppose that E.'s stern and even embittered attitude towards the people was in part the fruit of the years of reaction and disappointment spent under the reign of Jehoiakim. As we have seen, there was nothing in the state of mind of his fellow-exiles to draw him into sympathy with them, although he certainly agreed with Jer. in regarding them as superior to those left behind (11¹⁴⁻²¹). Accordingly, at the time of his consecration as a prophet, he appears with his convictions matured as to the character of his countrymen and the reception he may expect at their hands (2. 3 *pass.*). They are, to use one of his stereotyped phrases, a 'rebellious house,' brazen-faced and stiff-hearted children, a people that refuse to hear J^h, separated from Him by a moral and spiritual barrier more formidable than that caused by a strange language (2³. 4 3⁵⁻⁷). Although these facts are expressed in the form of divine communications to the prophet, they are not to be regarded as a new revelation of the disposition of his compatriots; they are rather the settled convictions of his life assuming definite shape in the light of his commission to speak the word of the Lord. They show, at all events, how fully he recognized the depth of the antagonism that prevailed between the prophetic conception of religion and the impulses that swayed the national mind both in Judæa and in Babylonia.

The actual circumstances of E.'s prophetic career are greatly obscured for us by the difficulty we have in separating what is real from what is merely imagined, in the representation given by the book. That everything did not happen literally as it is recorded, is evident enough from several indications. The symbolic actions described as performed by the prophet are in some instances incapable of a literal acceptance (see, e.g. 4^{5a}. 5^{1a}. 12¹⁸ etc.); yet there is no external criterion by which these can be distinguished from others which are possible. A similar uncertainty hangs over the events that are mentioned. These are never introduced for their own sake, but only as the setting of some idea which the writer wishes to enforce, and it is frequently impossible to determine how far the allusions correspond with actual experiences. In such incidents as the death of the prophet's wife (24^{15a}) or the opening of his mouth in the presence of 'the fugitive' (24²⁷ 33²²), fact and symbolism seem to be so intimately blended that we cannot tell where the one ends and the other begins. The book, in short, is not an autobiography, but a systematic exposition of prophetic ideas, and any attempt to extract historical information from it has to be made with a certain measure of caution. At the same time, it is quite incredible that the whole representation should be nothing but an elaborate fiction, without any basis in fact. There can be no reasonable doubt that E. really exercised an oral public ministry amongst his fellow-captives, or that its main outlines may be gathered from the thin thread of narrative that runs through the book. His work was divided into two sharply contrasted periods by the overthrow of the Jewish state in the year 586; or, to speak more accurately, the first period ends with the commencement of the siege of Jerus. (Jan. 587, cf. 24¹), and the second opens with the reception in Babylon of the tidings of its fall (Jan. 585, cf. 33²¹).^{*} During the interval of two years, his public activity appears to have been suspended. Throughout the first period the almost exclusive theme of his preaching was the approaching destruction of Jerus., and the lessons of that event for the nation. His reiterated predictions of that inconceivable calamity made no impression on the mind of the exiles, and the prophet felt his energies cramped and paralyzed by the stolid incredulity which his message encountered. It is probable, however, that from the outset his character commanded respect; we read of visits paid to him in his own house by the 'elders' to inquire the word of the Lord (8¹ 14¹ 20¹), and there is no reason to dismiss these as dramatic inventions. Still less can we doubt the popularity of his public orations; for the picture of the people beguiling the tedium of their exile by listening to his fervid eloquence (33³⁰⁻³²) is one of the notices which convey an irresistible impression of historical reality. In the second part of his career the tension between him and his hearers is greatly relaxed. The people were crushed by the terrible disaster that had befallen their nation, and the immediate effect was a feeling of despair expressed in such woeful utterances as those of 33¹⁰ 37¹¹. The prophet on his part adopts a more conciliatory attitude towards them, as he addresses himself to the task of setting forth the hopes and ideals on which the formation of a new Israel depended. The circle of his immediate auditors was probably widened at this time by the arrival of the new bands of captives from Judæa, amongst whom there must have been

^{*} The MT gives as the date 'the 12th year' of Jehoiachin's captivity, i.e. 584. But it is hardly credible that the transmission of the news should have been delayed so long as 18 months, and hence the reading '11th year' found in the Syr. and some Heb. MSS is generally regarded as correct.

at least a few adherents of Jer., who would naturally rally round E. as the representative of their master's teaching. It has even been surmised that it was through this channel that E. first became acquainted with the writings of Jer., which have left so deep a mark on his thinking. This is unlikely, because it is hardly credible that he should have recast the substance of his oral prophecies under the literary influence of another prophet; and, moreover, he must have had abundant opportunity of knowing Jeremiah's teaching before his own captivity. But it must be admitted that with regard to all that took place after the fall of the city we are left almost entirely in the dark. There is but one allusion in the book to the relations between the earlier exiles and the later (14^{22a}); and if it is at all coloured by the prophet's actual impressions after the event, it certainly does not encourage the notion that he found the new-comers hopeful material to work upon. It was probably not very long after the commencement of the second phase of his work that E. prepared the first written edition of his prophecies (see below). There is an interval of about 13 years (584-572) from which no prophecy is dated. What his occupations were during this period is of course unknown, but there are some signs that chs. 1-39 had been edited practically in their present form before the composition of 40-48. This last section may reveal the direction in which the prophet's thoughts had been moving in those years; and a still later oracle (29^{17a}) shows that he did not cease to be a close observer of public events.

While the character of E.'s ministry does not differ essentially from that of his predecessors, it presents some exceptional features of a very instructive kind. The mere fact of his being an exile accounts for much that is peculiar in his method of working and his conception of his office. To say that he was no prophet at all, but merely a pastor exercising the cure of souls amongst those who came under his personal influence, is an exaggeration, but it is the exaggeration of a truth. His insistence on the independence of the individual soul before God (18. 33^{22a}), and his comparison of himself to a watchman responsible for each person who perishes through not being warned of his danger (31^{7a}, 33^{12a}), suggest that the care of the individual must have occupied a larger place in his work than was the case with the pre-exilic prophets. At a time when the unity of the nation was broken up, and the new kingdom of God had to be born in the hearts of those who embraced the hope set before them by the prophets, it was inevitable that a religious teacher should devote much of his attention to the conversion and spiritual direction of individuals. This, however, is a side of E.'s activity which does not directly come to light in the book; there are more subtle indications of the effect which his position as an exile had on his prophetic mission. It was by no means a matter of course, according to the ideas of the age, that prophecy could be transplanted to a foreign soil, and in reality it could not flourish there without losing some of its most characteristic functions. The older prophets had all more or less been religious politicians, in touch with the pulsations of a vigorous popular life, and bringing the word of God to bear directly on those national problems which arose out of the relation between J" and the community of Israel. E.'s audience, on the other hand, was but a dismembered limb of the body politic; his political interests were remote and secondary, and the whole cast of his thinking betrays a sense of isolation from the main current of national life. This appears most clearly in his habit of treating

the exiles as representatives of the larger Israel, with whose destinies he never ceased to concern himself. From the first he recognized that his mission had a double aspect: on the one hand he was sent to 'them of the Captivity'; and on the other hand he was a prophet to the whole house of Israel (cf. 3¹¹ with 2³ 3⁴). Thus he had two audiences, one real and present and the other ideal; and for the most part they are identified to such a degree that in addressing the exiles or their elders he fancies himself speaking to the idealized nation, whose members were then scattered far and wide over the world. It is an extension of the same tendency when he delivers imaginary discourses to those left in the land, or apostrophizes the mountains of Israel (6. 36), or exhibits the whole religious history of the people in elaborate allegories (16. 23), or even calls up from the past the vanished cities of Samaria and Sodom, and treats them as if they had a present existence, and a real interest in the unfolding of the divine purpose (16^{46a}, 23^{36a}). It is obvious that oratory of this description comes very near being independent of an audience altogether; and some perception of this fact is perhaps revealed by the too facile appreciation which it received from the immediate hearers. And although E. never abandoned the practice of public speaking, it is undoubtedly the case that in his hands prophecy became far more of a literary occupation than it had hitherto been. A perusal of the book shows that it has been carefully planned with an eye to literary effect; and if the prophet had simply worked out his conceptions in the solitude of his chamber, the result would hardly have differed much from what we actually find. More than any of his predecessors he lives in a world of abstract ideas, which are more vividly real to his imagination than the circumstances of his everyday life; though now and then an echo from the outer world breaks in to remind us that after all he was no mere recluse, but a man of large experience, keenly observant of the life of his time. Several things, indeed, go to show that his intellectual interests reached far beyond the Jewish world in which he lived. His long and accurate enumeration of the natural and industrial products of different countries (27), exhibits a knowledge of contemporary commerce which is surprising in a Heb. prophet. It is probable also that he had gained some new impressions from his sojourn amidst the monuments of a strange civilization in the Euphrates valley. The conception of the cherubim in chs. 1. 10 appears to borrow some of its features from the composite animal figures of Babylonian art; and in other parts of the book some striking phraseological coincidences have been thought to suggest a direct influence of the cuneiform inscriptions (Müller, p. 56 ff.).

There is, however, another feature of E.'s work which cannot be wholly explained by the novelty of his position, and has sometimes been regarded as the result of abnormal physical states to which the prophet was subject. Amongst the most perplexing references in the book are those to a spell of 'dumbness,' which lay upon him from near the commencement of his ministry till the announcement of the fall of Jerus. (cf. 3^{26c}, 24²⁷ 33²²). Closely akin to this is the representation of his being bound with ropes (3²⁶), and lying immovable for months together on one side or the other for a sign to the house of Israel, although at the same time performing actions which formed a necessary part of the sign (4^{4a}). There seems no strong reason why all these descriptions should not be treated as of a piece with the general symbolism which runs through the book. But to some recent interpreters they have suggested the theory that

throughout the earlier part of his ministry E. laboured under nervous diseases of the most distressing kind, and utilized his symptoms as a means of impressing certain truths on the minds of his fellow-exiles. This view was first expounded, with great learning and ingenuity, by Klostermann, who found in E.'s condition all the marks of catalepsy, hemiplegia, alalia, hallucination, and so forth. It is difficult to believe that he has advanced the cause of sober and scientific interpretation of Scripture. The truth would seem to lie rather with those writers who regard these representations as imaginative symbols, interesting as illustrations of the prophet's mode of thought, but not answering to anything external in his life. The 'dumbness' is but a strong figure for the sense of restraint and defeat caused by the incredulity of the people, lasting till the prophet's authority was established by the fulfilment of his main prediction (cf. 29²¹). So the actions of ch. 4 symbolize partly the siege of Jerus., and partly the captivity of the two branches of the house of Israel; and their meaning as signs is inconsistent with the supposition that they were exhibitions of a bodily malady, unless we are to assume a miracle, to which the history of OT prophecy furnishes no parallel. It is, of course, equally inconceivable that the signs should have been enacted in pantomime, either in presence of the people or in solitude; and the same remark applies to many others of the symbolic actions which are described. Except in so far as the suggestions may have originated in an ecstatic state of mind, they do not appear to differ from the ordinary operations of the fancy in bodying forth mental processes by means of sensible imagery.

The Book of Ezekiel (save for a somewhat corrupt text) exists in the form in which it left the hands of its author, differing in this respect from the two other great prophetic collections, which took shape through the labours of successive editors. Neither the unity nor the authenticity of Ezekiel has been questioned by more than a very small minority of scholars.* Not only does it bear the stamp of a single mind in its phraseology, its imagery, and its mode of thought, but it is arranged on a plan so perspicuous and so comprehensive that the evidence of literary design in the composition becomes altogether irresistible. Critics are divided as to the best principle of classification, some preferring a twofold, others a threefold or even a fourfold division; but all are agreed that the work falls into certain large sections intended to represent successive phases of Ezekiel's ministry. Within the general scheme the order is on the whole chronological, although it may be doubted how far the chronology is to be taken literally, or how far it is meant to separate different groups of oracles.

CONTENTS.—i. The first division (chs. 1-24) embraces about a half of the book, and corresponds to the first period of E.'s work, consisting almost exclusively of prophecies of judgment, such as he uttered before the destruction of Jerusalem. These have no doubt been considerably altered and amplified in the course of writing, and it is possible that here and there traces of a later point of view may be apparent. Minor sections are partly suggested by the dates prefixed to certain chapters (see §1 201); in other cases they can be recognized by internal indications. 1. Chs. 1-3 describe the ecstatic experiences by which the prophet was prepared for his work, including, first, an elaborate description of the divine chariot which occupies so prominent a place in the book (cf. 323 84 433), and the glory of Him who sat on it (ch. 1); second, his commission to declare

the word of God to Israel, his inspiration being set forth under the symbol of eating the roll of a book (chs. 21-315); third (after an interval of 7 days), a more precise definition of his office as that of a watchman to warn every individual of his danger (316-21); lastly, a second ecstasy, in which he receives the command to shut himself up within his house, and to appear in public only when charged with a special message to the people (322-27). It has been supposed that this last passage refers to a time considerably later than the inaugural vision, and marks the close of a tentative phase of the prophet's work, in which he sought to exercise the function of a public censor, until compelled to desist by the obstinate resistance of the community. It is more probable, however, that the verses merely express on its negative side the same conception of his office as is given in vv. 16-21; the prophet is a watchman, because the function of a 'reprover' is denied to him from the outset by his peculiar situation. 2. In chs. 4-7 the fate of the city and nation is set forth, first, dramatically in a complicated series of symbols (41-54), then in three impassioned orations addressed to the city (55ff.), the land (6), and the people (7). In the signs of ch. 4 the prophet appears to represent simultaneously two facts—the siege of Jerus. and the captivity of the two branches of the Heb. nation. The time of Judah's exile is fixed as 40 years,—a round number for the period of Chaldean supremacy,—that of N. Israel at 390 years in the MT, but 190 according to the LXX. Since the destruction of Samaria preceded that of Jerus., roughly speaking by a cent. and a half, and since both captivities terminate simultaneously, the latter figure must be accepted as the orig. reading. 3. The next group of prophecies (chs. 8-11) is an account of a vision of the destruction of Jerus., which is important for the glimpses it gives into the state of things in the city at that time. After reciting the abominations practised in the temple (8), it describes, under symbols, the slaughter of the people (9), and the burning of the city (10), and ends with the departure of the Lord from the sanctuary, in token that city and temple were abandoned to their fate (11). The visionary form in which these truths are clothed is remarkable; the prophet falls into a trance in presence of the elders of Judah, the scenes mentioned pass before his inward eye, and he awakes with a special message of consolation to the exiles, who felt keenly the reproach of being cast out from J''s heritage. 4. A new section begins with ch. 12, and extends apparently to the end of ch. 19. The fundamental theme is still the same, but the treatment of it is more discursive and theological. The author appears to have in view various false ideals to which the people clung, and which he seeks to demolish as obstacles to the reception of his message. Thus in 121-20 17, 19 he announces the fate of the king (Zedekiah), on whom the people naturally looked as the anointed of J'' (cf. La 420), but who, by his perfidy to the king of Babylon (17), had brought ruin on himself and his kingdom. A certain sympathy with the misfortunes of the royal house is manifested by the beautiful dirge of ch. 19. Another section (122-141) deals with the wrong use of prophecy, and the existence of false prophets, as causes of the popular unbelief. Ch. 15 (Israel a charred and worthless vine branch) strikes a blow at the false patriotism which sustained the people's pride under their accumulated national calamities, and ch. 16 exhibits in an allegory the true character of Jerus. as the ungrateful and unfaithful spouse of J''. Ch. 18 asserts the absolute righteousness of God in His dealings with individual men, and thus indirectly assails the prevalent doctrine of the solidarity of the nation, which had begotten a cynical temper of mind expressed by the proverb: 'the fathers have eaten sour grapes, and the children's teeth are blunted' (v. 2). But it must be admitted that this group of discourses hardly differs in general character from that which follows. 5. The last division (chs. 20-24) contains three oracles (20, 22, 23) of the nature of formal arraignments of the people of Israel, in which the moral necessity of its destruction is shown from its past history and its present condition. The keynote of ch. 20 is found in the remarkable purpose attributed to the people, that they would assimilate themselves to the heathen, worshipping wood and stone (v. 32). It is impossible to say whether this refers to a particular current of opinion beginning to prevail among the exiles, or whether it is an expression of the spirit manifested by the nation at all times of its history. In either case the argument of the chapter is directed to show that the destinies of Israel had been determined by a power higher than its own natural proclivities,—namely, J''s regard for the glory of His name,—and that that power would yet break the idolatrous tendencies of the nation, and make Israel to be in fact, as it was in name, the people of J''. Ch. 22 is an enumeration of the religious and social corruptions prevalent in Jerus., now on the eve of its destruction; ch. 23 is an allegory, in the manner of ch. 16, exhibiting the immoralities of the two profligate sisters, *Ohola* (Samaria) and *Oholibah* (Jerus.). The two remaining discourses were composed under the immediate influence of contemporary events. Ch. 21 (containing the wild 'song of the sword', vv. 14-21 [EV 9-17]) refers to the march of Nebuchadnezzar's army against Jerus. Ch. 24 records the dramatic close of the first period of E.'s activity. On the very day when the Chaldeans invested Jerus. he uttered a final oracle announcing its fate. The death of the prophet's wife on the evening of the same day becomes the occasion of a symbol of the despair and bewilderment that will seize on the exiles when they receive tidings of the fall of the city.

ii. The next eight chapters (25-32) consist of prophecies against the foreign nations (seven in number) lying immediately round the land of Canaan; viz. Ammon, Moab, Edom, and the Philistines (25), Tyre (26-28¹⁹), Sidon (28²⁰⁻²⁶), and Egypt (29-32).

* The chief exceptions are Zunz, who first (*Gottesdienstliche Vorträge der Juden*, 1832) assigned the book to the early Pers. period, and afterwards (*ZDMG* xxvii. 676 ff.) brought it down to the years 440-400 (the earlier view, however, is allowed to stand in the posthumous ed. of the *Vorträge*, 1892); Geiger (*Urschrift*, p. 23), who held a similar view; and Seinecke (*Gesch. d. V. Israel*, i. p. 138, 1876), who placed the author as late as a.o. 164-163.

The insertion of these oracles in this place is an instance of the constructive skill which planned the order of the book. They fill up the interval of silence which separates the two periods of E.'s public ministry; and although most of them no doubt belong chronologically to the two years of retirement, there are some which bear a later date (see 2917 321. 17), showing that the principle of arrangement is literary and not historical. The section, moreover, embodies a distinct idea in the prophet's eschatological scheme. The motive of the judgments announced is to prepare the way for the restoration of Israel, by removing the evil influences which had sprung from the people's contact with its heathen neighbours in the past (23²¹⁻²⁶ 29¹⁶). Historically, these judgments are conceived as taking place within the 40 years of the Chaldaean dominion (29¹³), and of Israel's banishment. In the case of Tyre and Egypt, Nebuchadnezzar is expressly named as the instrument of J's purpose; the extinction of the smaller nationalities is ascribed to other agencies, which, however, are probably indirect consequences of a Bab. invasion. The supplementary oracle on Tyre (29¹⁷⁻²¹) was written after the 13 years' siege of that city by Nebuchadnezzar, and was evidently intended to counteract the impression produced by the non-fulfilment of the original prediction.

iii. Chs. 33-39 contain the discourses delivered in the period immediately succeeding the arrival of the 'fugitive' with the intelligence of Jerusalem's fall, when the prophet's mouth was again opened to declare the word of J' (33^{21f.}). The collection is prefaced (33¹⁻²⁰) by a re-statement of the function of the prophet under the figure of a watchman, as in 31^{7ff.}; then comes the account of his meeting with the bearer of the evil tidings, and the oracles uttered (apparently) on that occasion (33²¹⁻³³). These are followed by three distinct and complete pictures of the redemption and restitution of Israel: (a) the ideal monarchy as contrasted with the corrupt administration of the pre-exilic kings (34); (b) the land, reclaimed from the Edomites, endowed with supernatural fertility, purified from its ceremonial defilement, shall be given as an eternal possession to Israel (35 f.); (c) the people, now scattered and dead like dry bones, shall arise to a new life, Ephraim and Judah being united under one sceptre for ever (37). Ch. 38 f. describe the final assault on the kingdom of God by the distant nations of the world under Gog from the land of Magog, and their annihilation on the mountains of Israel, resulting in a demonstration of the might of J' to all the ends of the earth. This remarkable prophecy, representing the utmost limit of E.'s prophetic horizon, has the appearance of being intended as a conclusion to the book. This fact, taken in connexion with the long period of silence which follows, and a certain change of view manifested in 40 ff., strongly suggests that the first edition of the prophecies really ended here, the remaining section having been added afterwards as an appendix.

iv. Chs. 40-48, a vision of the ideal theocracy, with the institutions by which the holiness of the redeemed people is to be expressed and maintained. There is, first, a description of the sanctuary where J' is to dwell in visible splendour (40-43); then, regulations as to the ministers of the temple, the duties and revenues of the priests and the 'prince,' and the system of ritual to be observed (44-46); lastly, a delimitation of the holy land,—which is transformed by a miraculous river issuing from the sanctuary,—and a new disposition of the tribes within it (47 f.). Although these chapters may have been a later addition to the volume, they rest throughout on the teaching of the earlier part of the book, and are the development of principles there enunciated. The chief point of difference relates to the position of the prince, whose office is hedged about with constitutional safeguards and restrictions, hardly applicable to the perfect Ruler spoken of in ch. 34.

LITERARY STYLE.—The style of the book exhibits a falling off from the idiomatic purity of earlier writers, like Amos or Isaiah. The influence of Aramaic is more perceptible than in any previous prophet; the construction is loose, and, as a rule, prosaic; the constant recurrence of mannerisms and set phrases is at times monotonous, although the lack of variety is often compensated by a large rhythmic movement of the thought, running like a ground-swell through some of the longer orations. It is, on the whole, the careful and elaborate style of a literary man rather than that of a public speaker in living touch with his audience. With obscurity it cannot fairly be charged, for the serious difficulties which the book presents are mostly due to the imperfect condition of the text.

Of the higher qualities of E.'s genius the most striking is a powerful and grandiose imagination, which reveals itself in a variety of directions, now revelling in weird mythological conceptions (28, 32), and at other times clothing itself in the peculiar artificial realism which has been already remarked as a feature of the book. That there was a vein of true poetry in his nature is proved by his effective use of the *kinah* or dirge (especially

in the beautiful lament over the banished princes of the royal house, ch. 19), as well as by the many fine images which occur throughout the book. His first conceptions, indeed, are almost invariably beautiful and true, although to our minds their æsthetic effect is frequently lost through over-elaboration. E. is perhaps not more deficient in plastic power than Heb. writers generally; but in his case the defect is more apparent from his love of detail, and his anxiety to exhaust the didactic significance of every conception before he can persuade himself to let it go. Thus the comparison of Tyre to a stately vessel, moored by the shore (27), which Isaiah might have presented in a verse or two, is spread out over a long chapter by the help of an inventory of the ship's cargo, which is really a valuable statistical survey of Phœn. imports. Again, the image of Jerus. as a foundling child (16) is intrinsically as beautiful as any to be found in prophecy; but when drawn out into an allegory of the whole history of the nation, its unity is dissipated by the multitude of details that have to be crowded into it. A similar criticism has often been passed on his description of his opening vision, as contrasted with the sixth chapter of Isaiah. On the other hand, the prophet's talent for lucid and methodical exposition appears to advantage when he comes to deal with practical and technical matters, as in the description of the sanctuary (40 ff.). A certain architectonic faculty is, in truth, a marked characteristic of his intellect, being visible alike in his plan of the temple buildings, in his sketch of the theocratic institutions, and in the orderly arrangement and division of the book.

RELIGIOUS TEACHING.—E.'s rank as a religious teacher may be summed up under two general aspects. In the first place, he gave definite and almost dogmatic expression to the great religious truths which were the presuppositions of all previous prophecy, combining these into a comprehensive theory of the divine providence; and, in the second place, by giving a peculiar direction to the Messianic hope, he made it a practical ideal in the life of the nation, and the starting-point of a new religious development.

The first of these aspects is abundantly illustrated by the contents of chs. 1-39. While the substance of these chapters presents no single element which may not be traced in the writings of earlier prophets, there is none which does not receive a more distinct intellectual expression in the hands of Ezekiel. He is concerned to exhibit the immanent logic of the abstract principles involved in the relations between God and the world; and, as we read, the outlines of a grand theological system are gradually disclosed to the mind. Only a few outstanding features of this system can here be mentioned. 1. The prophet's idea of God, which is expressed by the visions in chs. 1. 8. 10. 43, has more of a transcendental character than that of his predecessors. Those divine attributes which we call metaphysical, expressing the relation of the Godhead to created existence as a whole, are emphasized more than by previous writers, and are those chiefly symbolized by the heavenly chariot of the visions. And this view of God enters deeply into the fibre of E.'s teaching. While he does not lose hold of the truth that J' is a moral person having the attributes of anger, jealousy, pity, etc., he is never weary of insisting that the activity of the divine being must be self-centred, the supreme motive of all His dealings with men, whether in mercy or in judgment, being the manifestation of His own Godhead ('They shall know that I am J'). It is easy to exaggerate this doctrine in a way that would misrepresent the prophet's meaning; but

the reiterated assertion of it shows that it is a truth to which he himself attaches the utmost importance. 2. Another instance of the same tendency to rigorous and even extreme statement of a prophetic principle is found in his conception of Israel. In opposition to Hosea, Isaiah, and Jeremiah, he denies that there was any good time in the nation's past, tracing the idolatrous proclivities of the people back to the sojourn in the wilderness and the oppression in Egypt (20^b, 24, 23²). Thus, while all the prophets teach or assume that the relation between J^w and Israel rests on a free elective act of God, E. takes the further step of assigning as the positive ground of this relationship J^w's regard for the glory of His name in the eyes of the nations (20 *pass.*). 3. From this position an important consequence follows. Since the honour of J^w is historically identified with the destinies of Israel, the final disclosure of His divinity can be accomplished only by the restoration of this people to its own land, under conditions which reflect the holy nature of J^w. E. is alive to the false impression of the God of Israel naturally produced on the heathen mind by the great national calamity of the Exile (36²⁰). This effect must be wiped out when the lesson of the history is complete (39²³). The same principle of the divine action which caused the temporary rejection of Israel becomes the guarantee of its ultimate redemption. The prophet is thus led to a conception of salvation in which everything depends on the sovereign irresistible grace of God, which breaks the stubborn heart of the people, and produces in them an abiding sense of shame and self-contempt, and bestows on them a new spirit, causing them to walk in His statutes and keep His judgments to do them (6⁹ 11¹⁹ 16⁵³ 20⁴³ 36^{26d}, 37¹⁴ 39^{26f}). 4. The doctrine which is usually considered E.'s most distinctive contribution to theology is the doctrine of the freedom and responsibility of the individual soul before God. But even here he builds on the foundation laid by his predecessors. The conception of religion as personal fellowship between the individual and God is implicitly contained in the consciousness which all the prophets have of their own relation to J^w; and in Jer the truth is enunciated that what had hitherto been the possession of the prophets is the form which the perfect religion must assume universally. It was reserved for E., however, to formulate the principle logically, showing that neither the burden of hereditary guilt nor the sins of a man's past can hinder the action of God's forgiving mercy towards the penitent sinner (18).

But the part of Ezekiel's work that was destined to have the most direct and powerful historical influence was the ideal embodied in the vision of chs. 40-48. The unique significance of that remarkable creation lies in the fact that under the form of a Messianic prophecy it presents the scheme of a politico-religious constitution in which the fundamental idea of holiness is applied to the regulation of every part of the national life. It is a picture of the kingdom of God in its final and perfect state as this prophet was led to conceive it. The ruling conception is that of J^w dwelling in visible glory in His sanctuary in the midst of His people, and the practical purpose of the vision is to set forth the conditions on Israel's part which such a relation involves. That the institutions prescribed are mainly of a priestly character is partly due to the fact that E. was himself a priest, deeply imbued with the traditions of his office; but still more to his perception of the inherent fitness of the priestly idea of holiness to be the formal principle of a theocratic polity giving expression to the essential character of Israel as the people of J^w. How fully the ideal

met the needs of the time is shown by its operation in all the best tendencies of the Restoration period. This is not the place to discuss the bearing of E.'s ideal legislation on the development of the pentateuchal laws (see HEXATEUCH). The view of most recent critics is that he occupies a position intermediate between the Book of Deut. and the composition of the so-called Priestly Code; and it can hardly be denied that the peculiar features of E.'s system are more fully explained on this theory than on any other (see esp. the regulations as to the status of the Levites, ch. 44). But, setting aside the purely critical question, the fact is clear that the whole movement by which the new Israel was consolidated proceeded on the lines foreshadowed in E.'s vision. His position in this respect may be compared with that of Augustine in the history of the Latin Church. What the *civitas Dei* was to mediæval Christendom, that the vision of E. was to post-exilic Judaism: each furnished the ideal that moulded the polity of the age that followed. To what extent this section of the Book of E. was adopted as a legislative programme by the leaders of the Return cannot be precisely determined from the somewhat meagre records at our disposal (see Smith, *OTJC*² p. 442 f.). But it is important to observe that the Messianic hope as set forth by E. formed one of the most powerful impulses that made for the reconstruction of the Jewish state. We learn from Hag and Zec that the erection of the second temple was carried through under the conviction that that unpretentious edifice was to be the centre of a renovated world, and the earnest of the latter-day glory just about to dawn; while the expectation that the Lord would suddenly come to His temple meets us nearly a cent. later in the book of Malachi. These are conceptions which it would be difficult to understand otherwise than as consequences of the work of Ezekiel.

As compared with his master Jeremiah, or Is 40 ff., Ezekiel's teaching as a whole appears lacking in breadth of sympathy and evangelical freedom, and to be a preparation for an age of legalism rather than for the fulness of the Christian dispensation. He is not quoted expressly by any NT writer, and it is doubtful if he has directly influenced any except the author of the Apoc., who was familiar with the book and has drawn largely on its imagery. But while all this is true, there are many things in E. which give him a high place amongst the heralds of Christ in OT. His clear assertion of the value of the individual soul and of the efficacy of repentance, his profound sense of sin as ingratitude, and of the need of a new heart in order to fulfil the law of God, his impassioned vindication of the character of God as merciful and eager to forgive, are amongst the brightest gems of spiritual truth to be found in the pages of prophecy.

LITERARY HISTORY.—Of the literary history of the book little needs to be said. It is mentioned by the son of Sirach (49⁸) in a connexion which shows that it formed part of the prophetic Canon in his time (c. B.C. 200). In the order given by the Talmudic treatise *Baba bathra* (14^b) it stands second amongst the greater prophets, being preceded by Jer and followed by Isaiah. A further statement in the same source that the book was written (like Dn, Est, and the Twelve Prophets) by 'the men of the Great Synagogue,' has no significance, unless it be an inference from the theory that no prophetic book could be written outside of the Holy Land (so Rashi, quoted by Ryle, *Canon of OT*, p. 263 f.). According to Jerome (*præfatio ad Ezech.*), certain parts of it were, on account of their obscurity, forbidden to be read by any Jew under the age of 30 years; and its deviations from the Mosaic Law caused doubts to be expressed as

to its canonical authority as late as the 1st cent. A.D. According to one tradition, it narrowly escaped being 'hidden' (*i.e.* reduced to the rank of an apocryphal work) for this reason, but was saved from that fate by one Hananiah ben-Hezekiah, who reconciled the discrepancies. Unfortunately, the works of this self-sacrificing scholar have perished as completely as the 300 measures of oil which he is reported to have consumed in their preparation.

J. SKINNER.

EZEL (עֶזֶל [עֶזְלָה]) ['stone of] departure'.—The spot where Jonathan arranged to meet David before the latter's final departure from the court of Saul (1 S 20¹⁹). The place is not mentioned elsewhere, and it is now generally admitted that the Heb. text of this passage is corrupt. The true reading seems to have been preserved by the LXX, which renders v.¹⁹ *καὶ καθήσθη παρὰ τὸ Ἐργάβ* (A, *ἐργον*) *ἐκεῖνο*, and again, at v.⁴¹ *ἐν* (where the same place is mentioned), renders *καὶ Δαυεὶδ ἀνέστη ἀπὸ τοῦ ἀργάβ* (A, *τοῦ ἄρραβ*). The translators evidently had the same word before them in both verses, and did not understand it; they therefore simply transliterated the Hebrew. If, then, we restore from the LXX in v.¹⁹ (תְּלֵא) תְּלֵא = 'yonder cairn,' for הָאֵן הָאֵל; and in v.⁴¹ כְּאֵל הָאֵרָב = 'from beside the cairn,' for כְּאֵל הָרָב, the unknown 'Ezel' of v.¹⁹ disappears, and the indefinite terms of v.⁴¹ are replaced by a suitable reference to v.¹⁹ (so Thenius, Wellh., Driver, Budde; cf. W. R. Smith, *OTJC*² 80 f.).

J. F. STENNING.

EZEM (עֶזֶם), 1 Ch 4²⁹.—See AZMON.

EZER.—1. (עֶזֶר) A Horite 'duke' (Gn 36²², 1 Ch 1³⁸). In the latter passage AV has **Ezar**. 2. (עֶזֶר) A son of Ephraim who, acc. to 1 Ch 7²¹, was slain by the men of Gath. 3. A Judahite (1 Ch 4⁴). 4. A Gadite chief who joined David (1 Ch 12⁹). 5. A son of Jeshua who helped to repair the wall (Neh 3¹⁰). 6. A priest who officiated at the dedication of the walls (Neh 12⁴²).

J. A. SELBIE.

EZION-GEBER, עֶזְיוֹן גִּבְרָה, is mentioned amongst the stations of the Israelites (Nu 33³⁵ and Dt 2⁸). In the latter passage and elsewhere in the OT it is coupled with Elath in such a way as to imply that the one was in the immediate neighbourhood of the other. This circumstance enables us to fix the situation of Ezion-geber with tolerable confidence. It lay in the extreme south of the territory of Edom, at the head of the *Ælanitis Sinus* or Gulf of Akabah. Edom having been subjugated by David (2 S 8¹⁴), Solomon naturally utilized E. for ship-building purposes, and made it the port for his navy, which was engaged in the gold trade with Ophir (1 K 9²⁶). His success encouraged Jehoshaphat to undertake a similar enterprise, but with disastrous results. 'Jehoshaphat made ships of Tarshish to go to Ophir for gold; but they went not, for the ships were broken at Ezion-geber' (1 K 22⁴⁸ and 2 Ch 20^{36, 37}). Ezion-geber is mentioned also by Josephus (*Ant.* VIII. vi. 4), who tells us that it was afterwards known by the name of

Berenice. E. is prob. the modern *Ain el-Ghudyan* (Robinson, i. 169 f.). See further, Driver on Dt 2⁸.

EZNITE.—See ADINO.

EZORÁ (Ἐζωρά, AV Ozora).—The sons of Ezora, in 1 Es 9³⁴, take the place of the strange name Machnadebai (or Mabnadebai, AVm) in Ezr 10⁴⁰, where there is no indication of a fresh family. The first part of the phrase in Es (*ἐκ τῶν υἱῶν*), representing an original כְּבָנֵי, seems to show that the name in the canonical book is due to the running together of two or more words; it is, in any case, a proof that 1 Es is independent of the Greek Ezra, which has Μαχαδραβοῦ.

H. ST. J. THACKERAY.

EZRÁ (עֶזְרָא).—1. The famous leader connected with Israel's Return. Our sources of information concerning him are Ezr 7-10, Neh 8-10, and the apocryphal books.* Some writers have preferred the apocr. 1 Esdras to the canonical Ezra, but on quite insufficient grounds.† The apocr. books are useful in showing the views held about Ezra at a later time, but we must in the main rely upon the canonical books.

E. is called the priest, the priest-scribe, and in 2 Es the prophet. He was of a priestly family, but, as his work was chiefly that of the scribe, that designation gradually supersedes the others. E. represents in a way the transition from the prophet to the scribe, but his prophetic functions are not conspicuous except in the apocr. literature.‡

The Exile had been a period of considerable literary activity. One of the greatest prophets heralded the deliverance of Cyrus (Deutero-Isaiah); Ezekiel had produced his book in Babylonia, drawing up an elaborate scheme for the new state, which he declared would arise upon the ruins of the old; and many noble psalms come from this time. But the period was characterized not so much by the creation of a new literature as by the study of what already existed. E. the 'ready scribe in the law of Moses' was not a mere copyist, nor the author of the law, but a diligent student of the law.

E. longed to go to Jerus. and put the law into effect there, to establish a real hagiocracy, 'the law' being the supreme authority in civil and religious affairs alike. Artaxerxes was not so tolerant of foreign religions as Cyrus had been, nevertheless E. won his goodwill, and secured a royal edict, clothing him with ample authority to carry out his purpose. This edict has been preserved in Aramaic (Ezr 7¹²⁻²⁶); and while many regard this as a Jewish version, it is in the main trustworthy.§ All Jews who felt so inclined were free to depart from Babylon; E. was authorized to carry the offerings for the temple made by the king and by the Jews; to purchase sacrificial animals, and to use the rest of the money as he and his brethren saw fit; to draw upon the royal treasury in the province of Syria for further necessary supplies; to exempt the temple officers and servants from the Persian tax; to appoint officers to execute the law of God, teaching such as were unacquainted with it; and to enforce the law of God and of the Persian king by penalty even to fines, imprisonment, banishment, or death.

In the year B.C. 458 E. gathered a caravan of some 1800 males, including 38 Levites who had been persuaded to join the company. E. had said so much to the king about God's ample protection to His servants that he was ashamed to ask for the

usual escort. After fasting and praying for a safe journey, the company set out, and in four months reached the holy city.

E. did not find a community ready and eager for the new government which he was authorized to establish. Many of the people were prosperous (Hag 1⁹), but there was not that spirit of simple devotion to the God of Israel which the zealous E. regarded as essential. E. was informed that many Jews, including even priests and princes, had taken foreign wives. He knew the story of Solomon's decline (1 K 11); he perceived the danger now of a relapse into idolatry; above all, he feared the consequences of further disobedience of the law of God (Dt 7⁸). Shecaniah, as the representative of the people who had been much moved by the prayer which E. poured forth in their presence (9⁶⁻¹⁵), proposed that the people should put away the foreign wives and their children. E. accepted the proposition, and exacted an oath on the spot that the offenders would comply with this agreement. A decree was issued by the princes and elders that all the people should assemble at Jerus. within three days, under penalty of confiscation of goods and excommunication. But the assembly found the task too great to be accomplished in an open-air meeting during a severe winter storm, and the matter was referred to a divorce court, with E. at its head.* After three months' labour, and not without opposition apparently (Ezr 10¹⁵ RV),† the work of the court was finished, and many innocent women and children were cast out, as Hagar and Ishmael had been.

The account of E.'s formal institution of the law is found in Neh 8-10. Neh. had come to Jerus. in B.C. 444. His first work was the rebuilding of the walls. According to the compiler of Ezr-Neh (see further on the BOOKS OF EZR AND NEH), it was after this event that E. read the law to the people assembled at Jerus., and obtained their pledge to observe it. It is singular that E., who had brought the law to Jerus. for the purpose of making it the code of the community, should not have promulgated it sooner. It may be that Stade is right in supposing that E. had aroused the hostility of the people by the compulsory divorce, and that the times were not ripe before (*Gesch.* ii. 173 f.); or it may be that the chronology is not exact, as the compilation was made long after the events described, and the description of the reading of the law interrupts Nehemiah's narrative (cf. 7⁴⁻⁵, 11¹⁻²).‡

On the second day's reading the people heard the directions for observing the feast of booths. Steps were taken at once to celebrate this feast, and the reading of the law was continued on each day of its observance. Two days later a great fast was held, the people separating themselves from strangers, and confessing their sin. E. gave utterance to a remarkable prayer, § praising God for His great goodness to Israel, deploring the apostasy and disobedience of the people, and tracing the past misfortunes of the nation, as well as their present condition of vassalage, to their great sins. ||

The relation of E. and Neh. is one of the perplexing problems of this period. Neh. in his memoirs mentions E. but once (12³⁶). ¶ In the E. portions of Neh, Nehemiah is mentioned but once (8⁹).**

* Reading, after Ewald (*Hist.* v. 142 n. 4), לֵךְ וְיָקֵם לָךְ, Ezr 10¹⁶.

‡ On this reading of the law see Trumbull's *Yale Lectures on the Sunday School*, 1888, p. 7.

§ Following LXX, which prefixes the words 'and Ezra said' to 9⁶. On this passage see EZRA-NEHEMIAH, BOOKS OF.

¶ E. established the canonicity of the Pent. by those readings; see *OTJC* p. 171.

** The Ezra of Neh 12¹⁻¹³ 33 is another person.

*** The best Gr. versions lack the title Tirshatha (8⁹); 1 Es has the title, but lacks the name (9¹⁹); Lagarde's ed. agrees with Heb. The Neh. of 10 is the same as that of Ezr 2².

There is scant justification for Ewald's statement that 'the chronicler unites these two men very closely in his representations' (*Hist.* v. 161). E. and Nehemiah were granted high authority in the Judæan colony, and that in the same sphere. Yet Nehemiah entirely ignores E.* Their purposes were different, it is true, one desiring to promote especially the religious welfare of the colony, the other the political; but among the Jews these spheres overlapped or rather interlaced at all points. It is probable that E.'s chief work in Jerus. was accomplished before Nehemiah's arrival.†

E. made a lasting impression upon the Jewish people. The development of the later Jewish life followed the lines laid down by him. This is due, not so much to his keen foresight in forecasting the future, as to the fact that his influence shaped Jewish life and thought in a way from which it never wholly departed. He gave the law an authority which it had never had before in Jewish history. This zeal was contagious, and accounts for that enthusiasm for the letter of the law which characterizes later ages.

EZRA AND NEHEMIAH, THE BOOKS OF.—

There is much gain in treating these two books together. They present similar problems; they deal with the same period; they were originally one in the Jewish canon; and they were put into their present form by the same hand.

That Ezr-Neh constituted but one book in the early Jewish canon is indisputable. The Massoretes have appended notes to the end of each book of OT, stating the number of verses, etc. There are no such notes at the end of Ezr, but those at the end of Neh include both books: 'the book of Ezr contains 635 verses, and the middle verse is רַבִּין עֲלֵיהֶם תְּפַנֵּן' (Neh 3³²). The Massoretic sections show that our two books were regarded as one, one section being Ezr 8³⁵-Neh 2¹.! The twenty-two sacred books do not allow Neh to be reckoned as a separate book. The Talm., in giving the origin of the various books, says that 'Ezra wrote his book,' and does not mention Neh, manifestly including it with Ezr. In LXX the two are included under Esdras B in Swete's ed.; under Esdras A in the ed. of Lagarde. §

Ezr-Neh precedes Ch in the Heb. Bible, but follows it in the LXX. The illogical order of the Heb. has been attributed to the earlier acceptance of Ezr-Neh into the canon. It is by no means certain that the present Heb. order is original. The OT was divided into three portions. At the end of each portion the Massoretes placed notes similar to those found after these separate books. The notes on the Kethubim or Hagiographa are found at the end of Ezr-Neh, not at the end of Ch. Moreover, as Ezr-Neh is a continuation of Ch, and in its present form has come from the same hand, it is altogether unlikely that the original arrangement was so unmindful of chron. order.

A. CONTENTS.—A review of the following outline reveals the striking fact that Ezr-Neh is far from a complete history of the restoration. We find rather a short sketch of a few important events in that history. There are long periods,—one of more than a half-century (515 to 458),—about which our book is absolutely silent. The whole time covered by this book, from the return of the first exiles in 537 to the second visit of Neh. in 432 is more than a cent., but as a matter of fact the actual time covered by the narrative is scarcely more than one-tenth of this time.

* See Wellhausen, *Isr. u. Jüd. Gesch.* p. 168 n.; Kuenen, *Critique de L'Ancien Test.* p. 510.

† There is an article in *TSBA* ii. pt. 1, in which the writer argues from the chronology that E. and Neh. came to Jerus. together. The argument is more ingenious than convincing.

‡ See Baer, *Libri Danielis Ezrae et Neh.* pp. 130, 133; Jos. c. 4². i. 8.

§ See further Oettli, 'Die Gesch. Hagiogr. und d. Buch Daniel,' 1889, in Strack and Zöckler's *Kurzgef. Kom.*; Cornill, *Einleit*² 45; *PRE*² iv. 332 ff.; Ryle, *Canon of OT*, 134 f.

I.—(1) Ezr 1-4^s.—The return of the first company of exiles; the register of the heads of houses; the setting up of the altar; the establishment of the sacrifices; the efforts to rebuild the temple, and the opposition of the Samaritans, B.C. 537. (2) Ezr 5, 6.—Stimulated by the prophets Hag, and Zec., the people begin the rebuilding of the temple under the lead of Zerubbabel and Joshua; their enemies try to stop the Jews, but Darius respects the decree of Cyrus, and the temple is completed in his sixth year, B.C. 515. (3) Ezr 7-10.—The return of Ezra and his company with a firman from Artaxerxes; the divorcing of the foreign wives, B.C. 458. (4) 4^s-23.—Successful efforts of the enemies of Judah to prevent the rebuilding of the city walls, mainly in the reign of Artaxerxes Longimanus, B.C. 465-425.

II.—(1) Neh 1-7^{3a}.—Neh., learning of the bad condition of affairs in Jerus., obtains permission from Artaxerxes to go to Judah as its governor, and to rebuild its walls. He reaches Jerus., inspects the walls by night, organizes the people for the work, and, in spite of the vigorous opposition of the enemies of Judah, succeeds in fortifying the city by the complete reconstruction of its walls, B.C. 444. (2) 7^{3b}-10.—Ezra promulgates the law, and the people 'seal unto it,' B.C. 444. (3) 11-12³⁰.—Lists of those who dwelt in Jerus., and of the Levites who had come to Jerus. with Zerubbabel. (4) 12⁷-13².—The dedication of the walls; regulation of the temple services, B.C. 443. (5) 13⁴-31. Nehemiah's second visit to Jerus., and the reforms accomplished at that time, B.C. 432.

B. SOURCES.—Modern criticism has shown that Heb. literature, like other Sem. literature,* is usually the result of compilation. No trained critical eye is required to see that the book under discussion has reached its present form by compilation from several different sources, and it is not difficult to analyze the book into its constituent elements, though it is not always possible to trace these elements back to their origin. In some cases we must be content with probabilities, and in others must confess ignorance. In the analysis of the book the results will be clearer if we follow an order which disregards the present arrangement of chapters.

The casual reader will not fail to notice that considerable portions, especially of Neh, are written in the first person. The 'I' refers to Ezra everywhere in Ezr, and to Nehemiah everywhere in Neh. The first person is used in Ezr 7²⁷-9¹⁵, Neh 1-7^{3a} 12²⁷-43 13⁴-31. These are portions of memoirs written by Ezra and Neh, respectively. They are for the most part preserved in their original form. It is evident that considerable parts of the memoirs have been lost. Ezra's narrative has no proper beginning; he came to Jerus. to establish the law, but his own narrative tells us nothing about the accomplishment of this design. Neh.'s narrative breaks off abruptly; the sequel to 7⁵ is not found in his account; 13⁴ begins *in medias res*; 13⁶ must originally have had another connexion. But, imperfect as they are, these personal records of the two great leaders in the restoration of the Jewish state are of the greatest value. For convenience these memoirs will hereafter be designated by the symbols E and N respectively.†

The other portions dealing with the work of Ezra and Neh. are not original parts of their memoirs, though in part based on them. Ezr 7¹-10 is an introduction to the story of Ezra written by the compiler. For Ezra is spoken of in the third person: the genealogy of Ezra omits his immediate ancestors, Seraiah, who is named as his father, having been put to death by Nebuchadnezzar in 586; Ezra would hardly have spoken of himself as 'an expert scribe'; this introduction anticipates matter found in E. (See further in Driver, *LOT*⁶ p. 549).

Ezr 7¹²-26 is the firman which Artaxerxes gave Ezra as his authority for governing the Jewish colony. V.¹¹ is an introduction due to the compiler. The letter itself is in Aramaic, and held by many to be in its original form. Such a document would naturally be written in Aram., and the Jewish colouring, which is so apparent in the edict of Cyrus (Ezr 1²-5), is not conspicuous in this

* Sayce, *HCM* c. 2.

† So Kautzsch, *Die Heilige Schrift des AT.*

passage. Cornill's statement that 'in details it is of such specific Jewish colouring that it at least must have been strongly retouched,* is not justified by facts; and Driver's, that 'it may have been cast into its present form by one familiar with the terminology of the Jewish sacred books,† is quite consistent with the view that we have the orig. edict signed by the king, in the preparation of which it is not inconceivable that Ezra himself may have had a hand. At all events, its preservation was probably due to its incorporation by Ezra in his memoirs, for the thanksgiving with which E. begins is naturally connected with the royal edict.

Ezr 10 is the proper continuation of the preceding section of E, but Ezra is spoken of in the third person. All efforts to explain this change of person as due to Ezra have been hopeless failures.‡ The force of the fact lies in the change taking place right in the middle of the narrative without any explicable cause. Moreover, we find one conspicuous anachronism: a room in the temple is called after Jehohanan, the son of Eliashib (10⁶); but Eliashib was a prominent priest in 432 (Neh 12²² 13⁴), and a room could not have been called his son's in 458.§ Yet there are points of resemblance with E. The passage is probably a revision and abbreviation of E, the work of the compiler.

Neh 7^{73b}-10. Of this portion 9⁶-10³⁰ is regarded by Stade|| as an original portion of E. The prayer 9⁶-8⁸ is suited to Ezra, and the words prefixed in the LXX 'and Ezra said' may be an original note of the compiler's to explain his extract from E. The remainder of the section, 7^{73b}-9⁶, is usually accounted for in the same way as Ezr 10, to which it bears striking resemblance. There is room for grave doubt about the chronology.¶ There is practically no guide except the position of the passage. A comparison of 7⁷³ and Ezr 3¹ shows that the compiler has made a false connexion of this passage with N, and he does not appear to have been an expert in chronology. The section took its present form long after the events described, so that confusion of order was easily possible. Sayce has pointed out that the names in Neh 10 are for the most part found also in Ezr 2.** He regards this section as the work of 'a layman,' and not a priest like Ezra, since he classes himself with 'the people' (19³², 37, 38). ††

Neh 11-12²⁶ is made up of lists extracted from the temple registers, with explanatory notes by the compiler. Ch. 11 is closely connected with 7³, and may be based on N. König says that ch. 11 'might indeed have been incorporated by Neh. into his writings,' but that 12¹-26 'on account of Jaddua (12²²) falls into the time of Alexander the Great.' ‡‡

Neh 12⁴⁴-13³ cannot be from N, for it uses the expression 'in the days of Neh.' (12⁴⁷), as of a time long past. König admits that 12⁴⁴-47 comes from a later hand, but holds that N begins with 13¹ instead of 13⁴, as most critics maintain. W. R. Smith, *OTJC*² p. 427 n., suggests that 13¹-2 originally stood between Ezr 10⁶-10.

There remains for consideration Ezr 1-6. Ch. 1 is very likely due to the compiler, though he may have used written sources. . . Vv. 1-3^a are found also in 2 Ch 36²². The differences are very slight,

* *Einkl.* p. 264. See also Kuenen, *Critique de L'A. T.* p. 507, for details of the alleged colouring.

and are due to accident in copying, Vv. 2-4 contain the edict of Cyrus. From a comparison with the inscriptions of Cyrus,* it appears to be strongly coloured by Jewish ideas. Cyrus attributes his success to Merodach, not to J'.

2¹-3^{1a} is found also in Neh 7⁶⁻⁷³. In the latter place it is appended to Nehemiah's memoirs with this preface: 'And I found the book of the genealogy of those who first came up: and I found written in it' (7⁶). There are more than a hundred variations in the two versions. The numbers esp. differ oftener than they agree.† Such variation is always found in duplicates. Cf. Pss 14 and 53, Ps 18 and 2 S 22. This does not destroy identity of origin. It appears from the large number of such lists that the Jews were in the habit of keeping registers of important names. From such a register the Chronicler has incorporated the list into its present place. These lists have been but poorly preserved in the transmission of the original documents, as we find many errors wherever we have data to test them. This list was already a part of a narrative when copied by Neh., since both versions end with narrative. This ending in Ezr introduces the assembling at Jerus. for the setting up of the altar, in Neh the assembling for the promulgation of the law.

3¹⁻⁴ is very generally assigned to the Chronicler (so Cornill, Schrader, Ryssel, Driver, etc. For the grounds of this see LOT⁸ 547 f.).

4⁶. These are two fragments from unknown sources. They cannot be from the Chronicler, for they are out of joint with the context. V. 6 contains a statement about an accusation made against the Jews in the beg. of the reign of Xerxes. There is no hint of this elsewhere. 4⁷ may have been placed here on the supposition that it was introductory to the passage following, but we shall see that this is not so. There is no reason, however, to doubt the genuineness or authenticity of these verses.

4⁸⁻⁶¹⁸. This passage is written in the Aram. language, and is a portion of a more or less complete history of these times written originally in Aramaic.‡ The compiler, finding his best sources for this period in Aramaic, incorporated considerable portions without translation. In its present arrangement, however, the course of the history is very much obscured, as will be more fully pointed out below. The section falls into two parts, both of which present critical problems of considerable intricacy. For convenience these problems will be discussed in this connexion.

4⁸⁻²⁴. According to the present arrangement of our book, this part describes the securing of a decree from Artaxerxes to stop the rebuilding of the temple. But, as a matter of fact, the passage has nothing to do with the temple, and is evidently misplaced. According to 4⁷ Bishlam, Mithredath, Tabeel, and the rest of his companions 'wrote a letter to king Artaxerxes in Aramaic.' This letter is not the one found in the verses following, for that was written by Rehum the chancellor and Shimshai the scribe; moreover, the letter which begins with v. 11 is overloaded with introductions in the Aram. passage vv. 8-10. Since Artaxerxes reigned from 465 to 425, this passage can have nothing to do with the times of Zerubbabel. The correction of Xerxes v. 8 to Cambyzes (reigning 529-522), and Artaxerxes to Gomates (pseudo-Smerdis), § is out of the question, since the contents agree with the date assigned in the text. The letter says that the Jews are rebuilding the rebellious and bad city, and have finished the walls, and repaired the foundations. It further declares that if this city is rebuilt and the walls finished, the Jews will rebel and refuse to pay tribute, 'and in the end it will endamage the king.' The building of the temple cannot be the point of attack, for that would not signify rebellion. If the temple were the matter at issue, the Jews would have appealed to the decree of Cyrus as they did later. The king's answer agrees with this view. He orders

that this city be not built, until a decree shall be made by him, but makes no allusion to the temple. If a royal decree had been issued forbidding the rebuilding of the temple, the people would have had ample excuse for their neglect when Haggai reproaches them so sharply. . . Zerubbabel and Joshua would scarcely have ventured to renew the work on the temple with such a decree in force. Finally, Tattenai would not have failed to make use of such a good weapon if it had been at hand.

The passage refers to an attempt to rebuild the walls of the city, which must have occurred in the first part of the reign of Artaxerxes before the coming of Nehemiah. 'The Jews which have come up from thee' (12) refers either to Ezra and his company, or to some other band concerning which the history is silent. V. 24 does refer to the building of the temple, and is the effort of the compiler to harmonize the passage with the history with which he has erroneously connected it.*

5, 6. This section gives a consistent account of the rebuilding of the temple, but difficulties arise in its relation to ch. 3, and to Hag and Zec. In 3¹⁻⁷ we are told that Joshua and Zerub. set up the altar soon after the arrival of the first pilgrims. The required sacrifices were at once started. Then the actual work of rebuilding the temple was begun (3⁸). The text is somewhat confused, but it is clear that the writer says that the foundations of the temple were laid at this time; see esp. v. 10 'and the builders laid the foundation of the temple of J'''. The work thus begun was stopped by the adversaries, who 'weakened the hands of the people of Judah, and troubled them in building, and hired counsellors against them, to frustrate their purpose, all the days of Cyrus king of Persia, even until the reign of Darius king of Persia' (44. 5).

Hag. and Zech., contemporary prophets under whose inspiration the work of rebuilding was taken up and carried to completion, give no hint anywhere that the temple building was but the resumption of a task already begun and laid aside with good reason. Hag. speaks of 'the house that lieth waste' (14. 9); he attributes the unprosperous condition to the neglect of the temple; he denies the validity of the excuse that the time was not suitable. The unsuitableness of the time pleaded by the people does not refer to the hostility of their neighbours, but to their poverty. But some of this prophet's utterances go further. He says: 'Lay to heart from this day back to the time before one laid stone upon a stone in the temple of J'' (21⁵)—a time evidently within his recent experience. He gives the date upon which the foundation was laid in a prophecy delivered that very day; 'from this day forward, from the twenty-fourth day of the ninth month, from the day that the foundation of J''s temple is laid' (21⁸).

Zech. says: 'The hands of Zerub. have laid the foundation of this house: his hands shall also finish it' (4⁹), referring to the laying of the foundation just accomplished. Two years later he said: 'Let your hands be strong, ye that hear in these days these words from the mouths of the prophets, which were in the day that the foundation of the temple of J'' of hosts was laid' (8⁹). The prophets must have been Hag. and himself.

A large part of the letter sent to Darius is taken up with the defence of the Jews. They urge that they were only doing what Cyrus had authorized. Sheshbazzar had been appointed governor, and he came to Jerus., 'and laid the foundations of the house of God which is in Jerus.; and since that time even until now hath it been in building, and yet it is not completed' (Ezr 5¹⁶). Hag 2³ shows the contempt for the new temple felt by those old men, who still remembered the glory of the temple of Solomon. We find the same feelings expressed in Ezr 3¹²⁻¹³. It seems impossible that these two passages do not refer to the same event.

In Ezr 5¹ we read that 'Zerub. and Josh. stood up and began to build the house of God.' Nothing is said about completing a work begun before; the inference is plainly that a new task was taken up. The question of Tattenai in v. 3, 'Who gave you a decree to build this house?' † and his subsequent action imply not a resumption of a work which had been forcibly stopped, but the coming up of a new issue. The passage in 5¹⁶ already quoted, which may appear to harmonize with the resumption theory, does not do so, for it proves too much; its statement that the temple had been in process of building ever since the decree of Cyrus had been issued, is contrary to all that we know from other sources. It may be a sufficient explanation of this inaccuracy to note that it is contained in the letter, and Tattenai may have misunderstood the Jews, who might have said that from the time of Cyrus they had purposed to build the temple, but had not been able to do so. König holds that Ezr 3¹⁻⁴ contains fragments which, by tradition, have been received into the original picture of the temple-building story. It is quite possible that we have here, in fact, poorly preserved fragments of an orig. Heb. account of the rebuilding of the temple. The passage would then be parallel with the Aram. section cc. 5, 6; and in that case the troublesome passage 4⁸⁻²³ would not be seriously out of place; that is, it originally would

* Sayce's view that v. 24 properly follows v. 5, 'as indicated by the grammatical construction of the original Chaldee,' and that the whole passage is introduced here episodically, is quite untenable. See his *Introd.* p. 22.

† The words following 'and to finish this wall' do not support the view of an earlier work on the temple. מְבִנֵּי הַיָּמִין rendered 'wall' is a word of doubtful meaning. Kautzsch, *Gram. des Bib. Ar.* § 62, suggests the emendation מ'שן 'foundations' as v. 18. Bleek held that the word refers to the walls of the city. *Eint.* p. 207. Bertheau-Ryssel interprets after LXX the wooden framework for the building.

* See *RP*, new ser. v. 144 ff.

† The sum-total in each case is the same, but varies by 12,000 from the sum of the detailed numbers. (See further Kuenen, *Ret. Lev.* ii. 178).

‡ On Renan's view that the Aram. section is from the Targums, see *Expos. Times*, iv. 546.

§ Ewald advocated this position, *Hist.*, Eng. tr. iv. 106.

have stood just before the beginning of the history of Ezra. Its present position would simply be further evidence of the limited critical insight of the compiler. For further discussion of this question, see König, *Einl.* p. 281 ff.; Driver, *LOT*⁵ p. 547 (where other references will be found); Benzinger, *Heb. Archäol.* p. 400.

To this Aramaic portion a fragment is added in Hebrew, 6¹⁹⁻²². It is peculiar in that it applies the term 'king of Assyria' to Darius. It may be due to the Chronicler, who felt the importance of the celebration of the Passover festival after the dedication of the new temple.

We have seen above that the books under consideration were originally one in the Jewish canon. The editor who put the material into its present shape undoubtedly left the book as a unit. This editor, however, found the process of compilation already begun. He did not find all the various sources scattered and independent, but they were already gathered in two main documents, the material having clustered about the stories of the two chief figures in the community. The last editor may have rearranged his sources acc. to his own ideas; he probably made additions from other sources, and we fear omitted portions which we should appreciate more than he did; certainly, he made additions from his own pen. The convincing evidence of the existence of two separate books before the last revision, is found in the presence of the duplicate lists *Ezr* 2 and *Neh* 7. The lists were already a fixed part of the narrative in which they are imbedded, so that the Chronicler could not omit either one without disjointing his narrative. The list may have been attached to *N* by *Neh.* himself, though it is more likely that a later hand, who felt the propriety of the connexion, is responsible for the addition. When the material was collected for the life of Ezra and the time preceding, the list was naturally placed where it properly belongs.

The first part of these books was undoubtedly the genuine memoirs *E* and *N*. To these, other material was added from time to time, to complete as far as possible the history of the restoration. It is highly probable that *Neh* 8-10, which we have seen reason to believe a revised edition of portions of *E*, was originally a part of the Bk. of Ezra, and was later transferred from chron. considerations. In the apocr. *Esdras*, which is preferred by some writers to the canonical *Ezr.*,* a brief account of the promulgation of the law follows immediately the story of the great divorce (see *1 Es* 9³⁷).

There can be little doubt that the final editor of *Ezr-Neh* was the author of the Bk. of Chronicles.† He gathered material, and prepared a history, written acc. to his own point of view from Adam to Nehemiah. His work was one long piece, *Ezr-Neh* being a part of Chronicles. But the latter had a considerable struggle to get into the canon. The Chronicler's novel treatment of the history, already covered by other books, did not win favour at once. But *Ezr-Neh* was the only source of information for the important period of the restoration. Moreover, the Chronicler's peculiar methods were not conspicuous in the later history. In fact, his Bk. of Chronicles is an attempt to read the conditions of the later times into the earlier. The later portion was therefore separated from the earlier, and found its place in the canon. In the separation, a few verses were retained in each part (*Ezr* 1^{1-2a}, 2 Ch 36^{22f.}).

The hist. value of these books is very great; for they stand alone for an important epoch, and they contain documents of great importance. But all parts are not equally reliable. The Chronicler was not a discriminating critic. He uses his sources

as if all were alike trustworthy. Naturally, *E* and *N* are the most reliable. The personal narrative of eye-witnesses and principal participants is of the highest value. Next in importance as hist. sources are the memoirs which have been worked over by the compiler, designated by Kautzsch *e* and *n*: *e Ezr* 10, *Neh* 8-10; *n Neh* 11³⁻³⁵ (acc. to Kautzsch). Of great value also are the Aram. documents in *Ezr* 4⁸⁻⁶ 18 7¹²⁻²³. The other sources are too far corrupted from their original form to be of primary value.

Notwithstanding the inferior trustworthiness of some portions, and the incompleteness of the whole, it is possible with the aid of the prophetic and poetic literature of the period to form a tolerably clear and connected idea of the times.* If much is lacking which we should like to know, that is but common to all periods of history, and there is compensation in the preservation of precious original documents. The case would be different if the Chronicler had worked over the whole of *E* and *N*, so that we could only infer their existence, and if he had translated and revised the Aram. documents.

[Since the above was in type, the question of the credence due to the Chronicler's narrative and of the historicity of the Jews' Return under Cyrus has been discussed afresh by Kusters in the *ThT* (1897), 518 ff. See also the *Expos. Times*, viii. (1897), 71, 200, 268, 320, 351 (the last by Van Hoonacker), ix. 66.—EDITOR.]

EZRAH (עֲזָרָה, AV *Ezra*).—A Judahite (1 Ch 4¹⁷). See GENEALOGY.

EZRAHITE (עֲזָרָהִי, LXX Ἰσραηλιτῆς).—A name given to Heman in the title of Ps 88, and to Ethan in Ps 89. It is used also of Ethan in 1 K 4³¹, where LXX (B) reads Ζαβετῆς. It is best understood as = Zerachite, cf. 1 Ch 2⁶, in which Ethan and Heman are termed sons of Zerah. A double tradition concerning Ps 88 appears to be embodied in the title; it is called a 'Psalm-song of the Korahites,' and 'a meditation by Heman the Ezrahite.' There were also a Heman and an Ethan, Merarites, of the tribe of Levi, according to 1 Ch 15¹⁷; the Ezrahites belonged to the tribe of Judah. W. T. DAVISON.

EZRI (עֲזָרָי).—David's superintendent of agriculture (1 Ch 27²⁶).

EZRIL (B Ἐζριελ, A -l, AV *Esril*), 1 Es 9³⁴; AZAREL in *Ezr* 10⁴¹.

* On the value of these books, see Ryle, *Ezra and Neh.* Introd. § 11.

* See Sayce, *HCM* p. 537.

† See the able discussion by Reuss, *Das Alte Test.* p. 8 ff.

F

FABLE is usually defined (with Dr. Johnson in his life of Gay) to be 'a narrative in which beings, irrational and sometimes inanimate, are, for the purposes of moral instruction, feigned to act and speak with human interests and passions'; and hence, as such beings do not present analogies to man in the spiritual region, it differs from other tropes (see ALLEGORY) in that its lessons are confined to the sphere of practical worldly prudence. Accepting this prevailing usage, we find (and the rarity is not surprising) but two instances of fable in sacred literature: (1) Jotham's fable of the trees choosing their king (Jg 9⁸⁻¹⁵); and (2) the fable of the thistle and the cedar of Lebanon, in the answer of Jehoshaphat to Amaziah (2 K 14⁹). In neither of these cases, however, is the story described by any appellation. Indeed the word *fable* does not occur in the canonical OT, nor is *μῦθος* (its Apoc. and NT equivalent) certainly found in the LXX, except in Sir 20¹⁹ ('a man without grace is as a tale out of season'), where in the next verse *παραβολή* appears as the parallel, 'a wise saw.' The compound *μυθολογος*, *author of fables*, is used in Bar 3²³; and here the parallel, *searcher out of understanding*, suggests a similar interpretation. Accordingly, we may conclude that the nearest approach in the OT to the idea of *μῦθος* is found in *māshāl*, the *dark saying, parable, proverb, adage*, in which Orientals clothed their deeper thoughts (Ps 49⁴ 78², Ezk 17²), and which sometimes appears to stand for a *warning example* (Jer 24⁹ [Judah] 'a reproach and a proverb' *παραβολή*, LXX). This does not differ materially from the Homeric and almost purely poetical use of *μῦθος*,—found once or twice also in Plato,—from which the connotation of truth had not yet been entirely banished.

But in Greek prose, as a rule, and even occasionally in poetry as early as that of Pindar (O. 1. 47, N. 7. 34), *μῦθος* was the Latin *fabula*, connoting *fiction*, sometimes (in opposition to *πλάσμα*) spontaneously growing, as, in religious tradition, the *myth* of god or hero (Plato, *Legg.* 9. 865 D); sometimes deliberately composed, like Aesop's Fables (Plato, *Phaed.* 60 C), and then opposed to *λόγος*, the historic story, or to *ἀλήθεια*, actual fact (Plato, *Phaed.* 61 B; Aristot. *Hist. An.* 9. 12). It is to this usage that the NT *μῦθος* allies itself (1 Ti 1⁴ 47, 2 Ti 4⁴, Tit 1¹⁴, 2 P 1¹⁶).

In 2 P 1¹⁶ the word apparently bears the general sense of *fiction*, 'what we tell you as to the power and coming of the Lord is not cunningly devised fiction, but sober truth.' But the *fables* referred to in the Pastoral Epp. as already endangering the soundness of the faith and the health of the churches in Ephesus and Crete, are of a special kind. They are 'Jewish' (Tit 1¹⁴); they are 'profane and anile' 1 Ti 4⁷ (cf. Plat. *Rep.* 1. 350); they are connected with *genealogies*, 1 Ti 1⁴ (cf. Plato, *Tim.* 22 A, as to the offspring of Deucalion and Pyrrha), with *fightings about the law* (Tit 3⁹) and with *commandments of men* (Tit 1¹⁴). The two last expressions and the epithet *Jewish* find some explanation in the rigid asceticism of abstaining from meats and forbidding to marry (1 Ti 4³), which was doubtless founded upon Jewish law, and was a characteristic of that side of Gnosticism which was afraid of matter, even as licence (Tit 1¹⁵⁻¹⁶) was the characteristic of that other side which affected to despise its power; the 'genealogies' remind us of the worship of angels

at Colosse (Col 2¹⁸), and the Gnosticism which bridged the gulf between God and the world by means of angelic intermediaries generated from the *pleroma* and from one another; and when we read also elsewhere in these epistles of the 'gnosis falsely so-called' (1 Ti 6²⁰), of the 'resurrection past already' (2 Ti 2¹⁸), of the 'enchanters' (2 Ti 3¹³), and of the 'doctrines of demons' (1 Ti 4¹), we are irresistibly drawn towards the belief that the *fables* of these epistles are closely akin to the teachings of Ophite Gnosticism—that earliest Gnosticism of Asia Minor, which was a strikingly similar mixture of Jewish and heathen speculation, ritual, and practice. See Gnosticism.

LITERATURE.—Cremer, *Bib.-Theol. Lex. s. μῦθος* and *γενεαλογία*; Trench, *Parables*, p. 2; Goebel, *Parables of Jesus*, 6 ff.; Moore, *Judges*, 244 ff.; *Encyc. Brit.* 9 and Smith, *DE³ s.v.*; and see ALLEGORY; on the 'fables' of Past. Epp. see Lightfoot, *Biblical Essays*, p. 411 ff.; (on the other side—that the heresy is simply Judaistic—Hort, *Judaistic Christianity*, Lect. 7).

J. MASSIE.

FACE is AV tr. of 1. נָס, for which RV in several instances substitutes more exact renderings, such as 'nose' (Gn 24⁴⁷), 'nostrils' (Ezk 38¹⁸). 2. עַיִן, lit. 'eye' (e.g. Ex 10⁵⁻¹⁵, Nu 22⁵ 'the face of the earth'). RV rightly gives 'eyes' instead of 'face' in 1 K 20³⁸⁻⁴¹, 2 K 9³⁰, Jer 4³⁰. 3. עַיִן very frequent both in a lit. and a metaphorical sense (e.g. עַיִן עַל 'upon the face of'). The shewbread (see BREAD, p. 318^b) was called עַיִן עֹרֵף, lit. 'bread of the face, i.e. presence' (see next paragraph). With a personal pronoun 'my (thy, his, etc.) face' may be simply a circumlocution for 'me (thee, him, etc.)'. Hence the substitution by RV of 'them' for 'their face' in Ex 14¹⁹, and of 'thee' for 'thy face' in Gn 30³³, Dt 9³ 28⁷. Conversely, in Jer 17¹⁸ AV has 'thee' and RV 'thy face.'

The face or countenance as the noblest part of the person was used to mean *presence*, and is often so translated. From the implied invitation or permission to approach (Est 4⁶), it came to mean *favour, acceptance*. On the other hand, the withheld or averted face was equivalent to disapproval or rejection (Ps 13¹ 27⁹ 88¹⁴ 143⁷ etc.). Such favour was called the light of the countenance, giving life and refreshment like that of the sun (Ps 89¹⁵ etc.). Among the Arabs, a fit of anger or the sudden effect of hearing bad news is called the darkening of the sky on the face. To 'respect persons' is generally עֵינֵי פְּנֵי, but in Dt 17¹⁷ 16¹⁹, Pr 24²³ 28²¹ it is עֵינֵי רֵבִיר, lit. to recognize the presence of one (sc. unjustly).

To spit in the face was the strongest possible expression of scorn and aversion (Nu 12¹⁴, Dt 25⁹, Job 30¹⁰, Is 50⁶, Mt 26⁶⁷ 27³⁰, Mk 10³⁴ 14⁶⁵, 15¹⁹, Lk 18³²). In heated altercation, an Oriental often uses an ejaculation which means 'I spit in your face,' at the same time spitting on the ground at the feet of the person he is quarrelling with. Modesty, humility, worship, self-abasement, are expressed by the veils of women (Gn 24⁶⁵), the reverential shrouding of the face with the mantle (1 K 19¹³), the wings with which the seraphim covered the face (Is 6²), and the face bowed to the ground (Gn 42⁶ etc.). To have the face covered by another, as in the case of Haman (Est 7⁸), was a sign of doom; the napkin drawn over the face and wound round the head was part of the covering of the dead (Jn 11⁴⁴ 20⁷).

G. M. MACKIE.

FACT.—A 'fact' (Lat. *factum*) is any act or deed, good or bad; and this was the commonest

meaning of the word till about the beginning of the present century. Thus Spenser, *FQ* i. iv. 34—

'But, when the furious fit was overpast,
His cruel facts he often would repent.'

Similarly Bunyan, *PP* (Clar. Pr. ed. p. 42), 'falling down upon his knees, he [Christian] asked God forgiveness for that his foolish fact.' So T. Adams, *II Peter* (Pur. Divines), p. 3, 'Theodosius excused a foul fact, because David had done the like.' This is the meaning in 2 K 10 (heading) 'Jehu by his letters causeth seventy of Ahab's children to be beheaded: he excuseth the fact by the prophecy of Elijah'; and 2 Mac 4³⁶ 'Certain of the Greeks that abhorred the fact also' (Gr. *συμμοσπονηροῦντων καὶ τῶν Ἑλλήνων*, RV 'the Greeks also joining with them in hatred of the wickedness.' This is the only example of *συμμ.*, though *μοσπονηρέω* is found 2 Mac 4⁴⁰ [A. -εῖω] 8⁴). The present use of 'fact' for something that has actually occurred, an undeniable truth, though quite classical for *factum*, and belonging to all the Romanic equivalents (Fr. *fait*, It. *fatto*, Sp. *hecho*), is not found in English before 1632.

J. HASTINGS.

FAIN is properly 'glad,' as Dyke, *Worthy Commun.* 56, 'Then full faine wilt thou be to have Christ Jesus receive thy soule'; or 'gladly,' as Jn 12²¹ Tind. 'Syr, we wolde fayne se Jesus.' But the commonest meaning has always been 'glad under the circumstances,' and that is its meaning in AV: Job 27²² 'he would fain flee out of his hand' (יִקַּח יָמָיו, AVm 'in fleeing he would flee'); 1 Mac 6²⁴ 'they were fain to disperse themselves' (ἐσκορπίσθησαν, RV 'they were scattered'); Lk 15¹⁶ 'he would fain have filled his belly with the husks that the swine did eat' (ἐρεθόμεναι). Cf. Shaks. *Lear*, iv. vii. 38—

'and wast thou fain, poor father,
To hovel thee with swine, and rogues forlorn,
In short and musty straw?'

From this the word easily slipped into the sense of 'obliged,' 'compelled,' as in *Pref.* to AV 'he was fain to make this answer, I cannot [read the book] for it is sealed'; Is 1⁷ Cov. 'Youre londe lieth waist . . . and ye must be fayne to stonde and loke upon it'; and Defoe, *Crusoe*: 'When the tide was out, I got most of the pieces of cable ashore, and some of the iron, though with infinite labour; for I was fain to go for it into the water, a work which fatigued me very much.'

To the three examples in AV, RV adds two: Lk 13³¹ 'Herod would fain kill thee' (θέλει σε ἀποκτείνειν); AV 'will kill thee,' the tr³ of all previous Eng. VSS [Wyc. 'will slay thee']; and Ac 26²⁸ 'With but little persuasion thou wouldst fain make me a Christian' (Ἐν ὀλίγῳ με πείθεισ Christianὸν ποιῆσαι); AV 'Almost thou persuadest me to be a Christian,' following TR γενέσθαι for ποιῆσαι).

The reading, ποιῆσαι or γενέσθαι, is discussed in WH 'Select Readings,' *ad loc.* The best argument for ποιῆσαι is its difficulty: to simplify the construction, γενέσθαι may have been taken in from the next verse.

The translation is, on either reading, nearly impossible. The AV is a combination of the Geneva NT (1557), 'Almost thou persuadest me to become a Christian,' and the Bishops', 'Somewhat thou perswadest me to be a Christian.' But it gives an unknown sense to ἐν ὀλίγῳ, besides following the less probable γενέσθαι. The RV is new, and is got (1) by mentally supplying πῶς (?) 'labour' after ἐν ὀλίγῳ; (2) by translating πείθεισ 'wouldst fain,' so as to bring out the sense, which it certainly has, of 'attempt to persuade'; and (3) by supplying ἔσθαι before ποιῆσαι. It is adversely criticised by Field, *Ōtium Norm.* iii. *ad loc.* But Rendall, *Acts of Apoc. in Greek and English* (1897), accepts it, rendering, 'At little cost thou wouldst fain persuade me to make me a Christian!' The exclamation mark is intended to suggest the irony in Agrippa's voice.

J. HASTINGS.

FAINT.—From *feint* the ptp. of Old Fr. *feindre* to feign, faint signified first 'feigned,' 'pretended,' as Earl Rivers, *Dictees*, 144, 'He that loueth the

with feynt loue.' But it passed early into the sense of weak: whether (1) as a purely physical state, as Gn 25²⁹ 'Esau came from the field, and he was faint' (הָיָה, so 25³⁰, Dt 25¹⁸, Jg 8⁴, Is 29⁸; הָיָה 1 S 14^{28, 31}, 2 S 21¹⁵; הָיָה 1 S 30^{10, 21}; הָיָה 2 S 16², Is 40²⁹; ἐκλύομαι 1 Mac 3¹⁷); or (2) as chiefly moral, almost='cowardly,'* which occurs only in the phrase faint-hearted, Dt 20⁸ (לֵב רַךְ, lit. 'soft-hearted'); Is 7⁴ (לֵב רַךְ לֵב רַךְ, RV 'neither let thine heart be faint'), Jer 49²³ (לֵב רַךְ, RV 'they are melted away'), Sir 4⁹ (μὴ ὀλιγοψυχίης, so 7¹⁰); or (3) as spiritual, through sorrow, Jer 8¹⁸, La 1²² (both לֵב רַךְ) 1¹³ 5¹⁷ (both לֵב רַךְ), or calamity, Is 1⁵ (לֵב רַךְ).

The verb is derived from the adj. It is used in the foregoing senses, and also in the modern physical sense of 'swoon' (Dn 8²⁷, Ad. Est 15⁷). Faintness is used physically in Ad. Est 15¹⁵ and spiritually in Lv 26³⁶. J. HASTINGS.

FAIR.—1. *Beautiful*, as Sus v. 2 'a very fair woman' (καλὴ σφόδρα); Sir 24¹⁸ 'I am the mother of fair love' (τῆς ἀγαπήσεως τῆς καλῆς). So frequently in OT; but in NT only Ac 7²⁰ [Moses] 'was exceeding fair' (δοξέτος τῷ θεῷ, lit. 'fair to God,' see under EXCEEDING). The adj. occurs also He 11²³ and again of Moses; AV 'proper'; RV 'goodly,' the word in Ex 2³ where the Heb. is טוֹב ('good'). 2. *Unspotted*, Zec 3^{3, 4, 5} 'a fair mitre' (טוֹב). Cf. Pr. Bk. (1532) 'a fayre white lynnenn clothe'; Ezk 1⁷ Cov. 'fayre scoured metall'; Wesley (1737), *Works*, i. 46, 'a paper book; all the leaves thereof were fair, except one.' Wyclif's tr. of Zec 3⁵ is (1382) 'a cleene cappe' (1388, 'a cleene mytre'); Douay, 'a cleane mitre.' Coverdale gives 'fair,' and the other VSS follow him. Amer. RV restores 'clean.' 3. *Plausible*, Gal 6¹² 'to make a fair show' (ἐνπροσωπήσαι); elsewhere only of speech. In Sir 6⁸ 'fair speaking' is used in a good sense, 'a fair-speaking tongue will increase kind greetings' (εὐλαλος). The modern form 'fair-spoken' had also a good meaning once, as Capgrave (1460), *Chron.* 81, 'He was . . . fayre-spokyn, but he spak but seldom.'

In Ezk 27^{12-14, 16, 19, 22-27} 'fairs,' i.e. markets, is used in AV (after Wyc. in v. 12 and Geneva throughout) as tr. of Heb. מַרְכָּאִים, which is evidently 'wares' as AV has it in v. 38, the only other occurrence of the word. RV gives 'wares' (wh. see) throughout. J. HASTINGS.

FAIR HAVENS (Καλοὶ Λιμένες), one of the places mentioned in connexion with St. Paul's voyage to Rome (Ac 27⁸⁻¹²), is a small bay, two leagues E. of Cape Matala, on the S. coast of Crete. There does not seem to have been a town at the place, but there was one near it, called Lasea. Neither Fair Havens nor Lasea is mentioned in classical writings, but the former name survives in the modern Gr. dialect as Λιμένας Καλοῦς, and archaeological research has confirmed the identity of both places. It has been suggested that the name is euphemistic, and the fact that an attempt was made to reach Phœnix, the modern Lutro, a considerable distance W. along the coast, in the circumstances mentioned in Ac, adds emphasis to the statement that the haven was not commodious to winter in. On the other hand, it proved a welcome shelter to St. Paul and those who were with him, for a considerable time, at a most critical part of their voyage. The difference between Fair Havens and Phœnix was, that while the former was sheltered only from the N. and N.W. winds, the latter was 'the only secure harbour in all winds on the S. coast of Crete.' W. MUIR.

FAIRS.—See FAIR, WARES.

* Cf. H. Smith, *Works*, ii. 219, 'The faint spies that went to the land of Canaan.'

FAITH.—I. THE PHILOLOGICAL EXPRESSION OF FAITH.—The verb 'to believe' in AV of OT uniformly represents the Heb. אָמַן, Hiph. of אָמַן, except, of course, in Dn 6²³ where it represents the corresponding Aramaic form. The root, which is widely spread among the Semitic tongues, and which in the word 'Amen' has been adopted into every language spoken by Christian, Jew, or Mohammedan, seems everywhere to convey the fundamental ideas of 'fixedness, stability, steadfastness, reliability.' What the ultimate conception is which underlies these ideas remains somewhat doubtful, but it would appear to be rather that of 'holding' than that of 'supporting' (although this last is the sense adopted in *Oxf. Heb. Lex.*). In the simple species the verb receives both transitive and intransitive vocalization. With intransitive vocalization it means 'to be firm,' 'to be secure,' 'to be faithful,' and occurs in biblical Hebrew only in the past participle, designating those who are 'faithful' (2 S 20¹³, Ps 121³¹). With transitive vocalization it occurs in biblical Hebrew only in a very specialized application, conveying the idea, whether as participle or verbal noun, of 'caretaking' or 'nursing' (2 K 10¹⁻⁵, Est 2⁷, Ru 4¹⁵, 2 S 4¹, Nu 11¹², Is 49²³, La 4⁵; cf. 2 K 18¹⁶ 'pillars' and [the Niphal] Is 60⁴), the implication in which seems to be that of 'holding,' 'bearing,' 'carrying.' The Niph. occurs once as the passive of transitive Qal (Is 60⁴); elsewhere it is formed from intransitive Qal, and is used very much in the same sense. Whatever holds, is steady, or can be depended upon, whether a wall which securely holds a nail (Is 22^{23, 25}), or a brook which does not fail (Jer 15¹³), or a kingdom which is firmly established (2 S 7¹⁶), or an assertion which has been verified (Gn 42²⁰), or a covenant which endures for ever (Ps 89²⁸), or a heart found faithful (Neh 9⁸), or a man who can be trusted (Neh 13¹³), or God Himself who keeps covenant (Dt 7⁹), is אָמַן. The Hiphil occurs in one passage in the primary physical sense of the root (Job 39²⁴). Elsewhere it bears constantly the sense of 'to trust,' weakening down to the simple 'to believe' (Ex 4³¹, Ps 116¹⁰, Is 7⁹ 28¹⁶, Hab 1⁵). Obviously it is a subjective causative, and expresses the acquisition or exhibition of the firmness, security, reliability, faithfulness which lies in the root-meaning of the verb, in or with respect to its object. The אָמַן is therefore one whose state of mind is free from faintheartedness (Is 7⁹) and anxious haste (Is 28¹⁶), and who stays himself upon the object of his contemplation with confidence and trust. The implication seems to be, not so much that of a passive dependence as of a vigorous active commitment. He who, in the Hebrew sense, exercises faith, is secure, assured, confident (Dt 28⁶⁶, Job 24⁵², Ps 27¹³), and lays hold of the object of his confidence with firm trust.

The most common construction of אָמַן is with the preposition אֶל, and in this construction its fundamental meaning seems to be most fully expressed. It is probably never safe to represent this phrase by the simple 'believe'; the preposition rather introduces the person or thing in which one believes, or on which one believingly rests as on firm ground. This is true even when the object of the affection is a thing, whether divine words, commandments, or works (Ps 106¹² 119⁶⁶ 78³²), or some earthly force or good (Job 39¹² 15²¹ 24²², Dt 28⁶⁶). It is no less true when the object is a person, human (1 S 27¹², Pr 26²⁸, Jer 12⁵, Mic 7⁹) or superhuman (Job 4¹⁸ 15¹³), or the representative of God, in whom therefore men should place their confidence (Ex 19⁹, 2 Ch 20²⁰). It is above all true, however, when the object of the affection is God Himself, and that indifferently whether or not the special exercise of faith adverted to is rooted in a specific occasion (Gn 15⁶, Ex 14³¹, Nu 14¹¹ 20¹², Dt 1³², 2 K

17⁴, 2 Ch 20²⁰, Ps 78²², Jon 3⁵). The weaker conception of 'believing,' seems, on the other hand, to lie in the construction with the preposition בְּ, which appears to introduce the person or thing, not on which one confidently rests, but to the testimony of which one assentingly turns. This credence may be given by the simple to every untested word (Pr 14¹⁵); it may be withheld until seeing takes the place of believing (1 K 10⁷, 2 Ch 9⁶); it is due to words of the Lord and of His messengers, as well as to the signs wrought by them (Ps 106²⁴, Is 53¹, Ex 4^{8, 9}). It may also be withheld from any human speaker (Gn 45²⁶, Ex 4¹⁻⁸, Jer 40¹⁴, 2 Ch 32¹⁰), but is the right of God when He bears witness to His majesty or makes promises to His people (Is 43¹⁰, Dt 9²³). In this weakened sense of the word the proposition believed is sometimes attached to it by the conjunction וְ (Ex 4⁵, Job 9¹⁶, La 4¹²). In its construction with the infinitive, however, its deeper meaning comes out more strongly (Jg 11²⁰, Job 15²², Ps 27¹²), and the same is true when the verb is used absolutely (Ex 4³¹, Is 7⁹ 28¹⁶, Ps 116¹⁰, Job 29²⁴, Hab 1⁵). In these constructions faith is evidently the assurance of things hoped for, the conviction of things not seen.

No hiphilate noun from this root occurs in OT. This circumstance need not in itself possess significance; the notions of 'faith' and 'faithfulness' lie close to one another, and are not uncommonly expressed by a single term (so *pietas, fides*, faith). As a matter of fact, however, 'faith,' in its active sense, can barely be accounted an OT term. It occurs in AV of OT only twice: Dt 32²⁰ where it represents the Heb. אָמַן, and Hab 2⁴ where it stands for the Heb. אָמַן; and it would seem to be really demanded in no passage but Hab 2⁴. The very point of this passage, however, is the sharp contrast which is drawn between arrogant self-sufficiency and faithful dependence on God. The purpose of the verse is to give a reply to the prophet's inquiry as to God's righteous dealings with the Chaldeans. Since it is by faith that the righteous man lives, the arrogant Chaldean, whose soul is puffed up and not straight within him, cannot but be destined to destruction. The whole drift of the broader context bears out this meaning; for throughout this prophecy the Chaldean is ever exhibited as the type of insolent self-assertion (17^{11, 16}), in contrast with which the righteous appear, certainly not as men of integrity and steadfast faithfulness, but as men who look in faith to God and trustingly depend upon His arm. The obvious reminiscence of Gn 15⁶ throws its weight into the same scale, to which may be added the consent of the Jewish expositors of the passage. Here we have, therefore, thrown into a clear light the contrasting characteristics of the wicked, typified by the Chaldean, and of the righteous: of the one the fundamental trait is self-sufficiency; of the other, faith. This faith, which forms the distinctive feature of the righteous man, and by which he obtains life, is obviously no mere assent. It is a profound and abiding disposition, an ingrained attitude of mind and heart towards God which affects and gives character to all the activities. Here only the term occurs in OT; but on this its sole occurrence it rises to the full height of its most pregnant meaning.

The extreme rarity of the noun 'faith' in OT may prepare us to note that even the verb 'to believe' is far from common in it. In a religious application it occurs in only some thirteen OT books, and less than a score and a half times. The thing believed is sometimes a specific word or work of God (La 4¹², Hab 1⁵), the fact of a divine revelation (Ex 4⁵, Job 9¹⁶), or the words or commandments of God in general (with אֶל Ps 106¹² 119⁶⁶). In Ex 19⁹ and 2 Ch 20²⁰ God's prophets

are the object of His people's confidence. God Himself is the object to which they believingly turn, or on whom they rest in assured trust, in some eleven cases. In two of these it is to Him as a faithful witness that faith believingly turns (Dt 9²³, Is 43¹⁰). In the remainder of them it is upon His very person that faith rests in assured confidence (Gn 15⁶, Ex 14³¹, Nu 14¹¹ 20¹², Dt 1³², 2 K 17¹⁴, 2 Ch 20²⁰, Ps 78²², Jon 3⁵). It is in these instances, in which the construction is with α , together with those in which the word is used absolutely (Ex 4³¹, Is 7⁹ 28¹⁶, Ps 116¹⁰), to which may be added Ps 27¹³ where it is construed with the infinitive, that the conception of religious believing comes to its rights. The typical instance is, of course, the great word of Gn 15⁶, 'And Abram believed in the LORD, and he counted it to him for righteousness'; in which all subsequent believers, Jewish and Christian alike, have found the primary example of faith. The object of Abram's faith, as here set forth, was not the promise which appears as the occasion of its exercise; what it rested on was God Himself, and that not merely as the giver of the promise here recorded, but as His servant's shield and exceeding great reward (16¹). It is therefore not the assensive but the fiducial element of faith which is here emphasized; in a word, the faith which Abram gave β when he 'put his trust in God' ($\epsilon\pi\iota\sigma\tau\epsilon\upsilon\epsilon\nu\ \tau\omega\ \theta\epsilon\omega$, LXX), was the same faith which later He sought in vain at the hands of His people (Nu 14¹¹, cf. Dt 1³², 2 K 17¹⁴), and the notion of which the Psalmist explains in the parallel, 'They believed not in God, and trusted not in his salvation' (Ps 78²²). To believe in God, in the OT sense, is thus not merely to assent to His word, but with firm and unwavering confidence to rest in security and trustfulness upon Him.

In the Greek of the LXX $\pi\iota\sigma\tau\epsilon\upsilon\epsilon\nu$ takes its place as the regular rendering of אָמֵן , and is very rarely set aside in favour of another word expressing trust (Pr 26²⁵ $\pi\epsilon\lambda\theta\epsilon\sigma\theta\alpha\iota$). In a few cases, however, it is strengthened by composition with a preposition (Dt 1³², Jg 11²⁰, 2 Ch 20²⁰, cf. Sir 1¹⁵ 2¹⁰ etc., 1 Mac 1³⁰ 7¹⁶ etc., $\epsilon\mu\pi\iota\sigma\tau\epsilon\upsilon\epsilon\nu$; Mic 7⁵, $\kappa\alpha\tau\alpha\pi\iota\sigma\tau\epsilon\upsilon\epsilon\nu$); and in a few others it is construed with prepositions ($\epsilon\nu\ \tau\upsilon\alpha$, Jer 12⁶, Ps 78²², Dn 6²³, 1 S 27¹², 2 Ch 20²⁰, Mic 7⁵, Sir 35²¹; $\epsilon\pi\iota\ \tau\upsilon\alpha$, Is 28¹⁶ (?), 3 Mac 2⁷; $\epsilon\pi\iota\ \tau\upsilon\alpha$, Wis 12²; $\epsilon\iota\varsigma\ \tau\upsilon\alpha$, Sir 38³¹; $\kappa\alpha\tau\alpha\ \tau\upsilon\alpha$, Job 4¹⁸ 15¹⁵ 24²²).

It was by being thus made the vehicle for expressing the high religious faith of OT that the word was prepared for its NT use. For it had the slightest possible connexion with religious faith in classical speech. Resting ultimately on a root with the fundamental sense of 'binding,' and standing in classical Greek as the common term for 'trusting,' 'putting faith in,' 'relying upon,' shading down into 'believing,' it was rather too strong a term for ordinary use of that ungenial relation to the gods which was characteristic of Greek thought, and which was substantively expressed by $\pi\iota\sigma\tau\iota\varsigma$ —the proper acknowledgment in thought and act of their existence and rights. For this $\nu\omicron\mu\iota\zeta\epsilon\nu$ was the usual term, and the relative strength of the two terms may be observed in their use in the opening sections of Xenophon's *Memorabilia* (I. i. 1 and 5), where Socrates is charged with not believing in the gods whom the city owned ($\nu\omicron\mu\iota\zeta\epsilon\nu\ \tau\omicron\upsilon\varsigma\ \theta\epsilon\omicron\upsilon\varsigma$), but is affirmed to have stood in a much more intimate relation to them, to have trusted in them ($\pi\iota\sigma\tau\epsilon\upsilon\epsilon\nu\ \tau\omicron\upsilon\varsigma\ \theta\epsilon\omicron\upsilon\varsigma$). Something of the same depth of meaning may lurk in the exhortation of the Epinomis (930 C), $\pi\iota\sigma\tau\epsilon\upsilon\sigma\alpha\varsigma\ \tau\omicron\upsilon\varsigma\ \theta\epsilon\omicron\upsilon\varsigma\ \epsilon\lambda\chi\omicron\upsilon$. But ordinarily $\pi\iota\sigma\tau\epsilon\upsilon\epsilon\nu\ \tau\omicron\upsilon\varsigma\ \theta\epsilon\omicron\upsilon\varsigma$ appears as the synonym of $\nu\omicron\mu\iota\zeta\epsilon\nu\ \tau\omicron\upsilon\varsigma\ \theta\epsilon\omicron\upsilon\varsigma$, and imports merely the denial of atheism (Plut. *de Superst.* ii.; Arist. *Rhet.* ii. 17). It was only by its adoption by the writers of the LXX to express

the faith of OT that it was fitted to take its place in NT as the standing designation of the attitude of the man of faith towards God.

This service the LXX could not perform for $\pi\iota\sigma\tau\iota\varsigma$ also, owing to the almost complete absence of the noun 'faith' in the active sense from OT; but it was due to a Hellenistic development on the basis of OT religion, and certainly not without influence from Gn 15⁶ and Hab 2⁴ that this term, too, was prepared for NT use. In classical Greek $\pi\iota\sigma\tau\iota\varsigma$ is applied to belief in the gods chiefly as implying that such belief rests rather on trust than on sight (Plut. *Mor.* 756 B). Though there is no suggestion in this of weakness of conviction (for $\pi\iota\sigma\tau\iota\varsigma$ expresses a strong conviction, and is therefore used in contrast with 'impressions'), yet the word, when referring to the gods, very rarely rises above intellectual conviction into its naturally more congenial region of moral trust (Soph. *Oed. Rec.*, 146, 147). That this, its fuller and more characteristic meaning, should come to its rights in the religious sphere, it was necessary that it should be transferred into a new religious atmosphere. The usage of Philo bears witness that it thus came to its rights on the lips of the Greek-speaking Jews. It is going too far, to be sure, to say that Philo's usage of 'faith' is scarcely distinguishable from that of NT writers. The gulf that separates the two is very wide, and has not been inaptly described by saying that with Philo, faith, as the queen of the virtues, is the righteousness of the righteous man, while with St. Paul, as the abnegation of all claim to virtue, it is the righteousness of the unrighteous. But it is of the utmost significance that, in the pages of Philo, the conception is filled with a content which far transcends any usage of the word in heathen Greek, and which is a refraction of the religious conceptions of OT. Fundamental to his idea of it as the crowning virtue of the godly man, to be attained only with the supremest difficulty, especially by creatures akin to mortal things, is his conception of it as essentially a changeless, unwavering 'standing by God' (Dt 5³¹),—binding us to God, to the exclusion of every other object of desire, and making us one with Him. It has lost that soteriological content which is the very heart of faith in OT; though there does not absolutely fail an occasional reference to God as Saviour, it is, with Philo, rather the Divinity, $\tau\omicron\delta\ \delta\epsilon\upsilon$, upon which faith rests, than the God of grace and salvation; and it therefore stands with him, not at the beginning but at the end of the religious life. But we can perceive in the usage of Philo a development on Jewish ground of a use of the word $\pi\iota\sigma\tau\iota\varsigma$ to describe that complete detachment from earthly things, and that firm conviction of the reality and supreme significance of the things not seen, which underlies its whole NT use.

The disparity in the use of the terms 'faith' and 'believe' in the two Testaments is certainly in a formal aspect very great. In contrast with their extreme rarity in OT, they are both, though somewhat unevenly distributed and varying in relative frequency, distinctly characteristic of the whole NT language, and oddly enough occur about equally often (about 240 times each). The verb is lacking only in Col, Philem, 2 P, 2 and 3 Jn, and the Apocalypse; the noun only in the Gospel of John and 2 and 3 Jn: both fail only in 2 and 3 Jn. The noun predominates not only in the epistles of St. Paul, where the proportion is about three to one, and in St. James (about five to one), but very markedly in the Epistle to the Hebrews (about sixteen to one). In St. John, on the other hand, the verb is very frequent, while the noun occurs only once in 1 Jn and four times in the Apocalypse. In the other books the proportion between the two is less noteworthy, and may

fairly be accounted accidental. In OT, again, 'faith' occurs in the active sense in but a single passage; in NT it is the passive sense which is rare. In OT in only about half the instances of its occurrence is the verb 'to believe' used in a religious sense; in NT it has become so clearly a technical religious term, that it occurs very rarely in any other sense. The transitive usage, in which it expresses entrusting something to someone, occurs a few times both in the active (Lk 16¹¹, Jn 2²⁴) and the passive (Rev 3³, 1 Co 9¹⁷, Gal 2⁷, 1 Th 2⁴, 1 Ti 1¹¹, Tit 1³); but besides this special case there are very few instances in which the word does not express religious believing, possibly only the following: Jn 9¹⁸, Ac 9²⁶, 1 Co 11¹⁸, Mt 24^{23, 24}, Mk 13²¹, 2 Th 2¹¹, cf. Ac 13⁴¹ 15¹¹, Jn 4²¹, 1 Jn 4¹. The classical construction with the simple dative which prevails in the LXX retires in NT in favour of constructions with prepositions and the absolute use of the verb; the construction with the dative occurs about forty-five times, while that with prepositions occurs some sixty-three times, and the verb is used absolutely some ninety-three times.

When construed with the dative, πιστεύειν in NT prevalently expresses believing assent, though ordinarily in a somewhat pregnant sense. When its object is a thing, it is usually the spoken (Lk 1²⁰, Jn 4⁵⁰ 5⁴⁷ 12³⁸, Ro 10¹⁶, cf. 2 Th 2¹¹) or written (Jn 2²² 5⁴⁷, Ac 24¹⁴ 26²⁷) word of God; once it is divine works which should convince the onlooker of the divine mission of the worker (Jn 10³⁸). When its object is a person it is rarely another than God or Jesus (Mt 21^{25, 32}, Mk 11³¹, Lk 20⁵, Jn 5⁴⁶, Ac 8¹², 1 Jn 4¹), and more rarely God (Jn 5²⁴, Ac 16³⁴ 27²⁵, Ro 4²⁽¹⁷⁾, Gal 3⁶, Tit 3³, Ja 2²³, 1 Jn 5¹⁰) than Jesus (Jn 4²¹ 5^{38, 46} 6³⁰ 8^{31, 45, 46} 10^{37, 38} 14¹¹, Ac 17³, 2 Ti 1¹²). Among these passages there are not lacking some, both when the object is a person and when it is a thing, in which the higher sense of devoted, believing trust is conveyed. In 1 Jn 3²³, for example, we are obviously to translate, not 'believe the name,' but 'believe in the name of his Son, Jesus Christ,' for in this is summed up the whole Godward side of Christian duty. So there is no reason to question that the words of Gn 15⁶ are adduced in Ro 4³, Gal 3⁶, Ja 2²³ in the deep sense which they bear in OT text; and this deeper religious faith can scarcely be excluded from the belief in God adverted to in Ac 16³⁴, Tit 3³ (cf. Jn 5²⁴), or from the belief in Jesus adverted to in 2 Ti 1¹² (cf. Jn 5³⁸ 6³⁰), and is obviously the prominent conception in the faith of Crispus declared in Ac 18³. The passive form of this construction occurs only twice—once of believing assent (2 Th 1¹⁰), and once with the highest implications of confiding trust (1 Ti 3¹⁶). The few passages in which the construction is with the accusative (Jn 11²⁸, Ac 13⁴¹, 1 Co 11¹⁸ 13⁷, 1 Jn 4¹⁶) take their natural place along with the commoner usage with the dative, and need not express more than crediting, although over one or two of them there floats a shadow of a deeper implication. The same may be said of the cases of attraction in Ro 4¹⁷ and 10¹⁴. And with these weaker constructions must be ranged also the passages, twenty in all (fourteen of which occur in the writings of St. John), in which what is believed is joined to the verb by the conjunction *ὅτι*. In a couple of these the matter believed scarcely rises into the religious sphere (Jn 9¹⁸, Ac 9²⁶); in a couple more there is specific reference to prayer (Mk 11^{23, 24}); in yet a couple more it is general faith in God which is in mind (He 11⁶, Ja 2¹⁹). In the rest, what is believed is of immediately soteriological import—now the possession by Jesus of a special power (Mt 9²³), now the central fact of His saving work (Ro 10⁹, 1 Th 4¹⁴), now the very hinge of the Christian hope (Ro 6⁸), but prevail-

ingly the divine mission and personality of Jesus Himself (Jn 6⁶⁹ 8²⁴ 11^{27, 42} 13¹⁹ 14¹⁰ 16^{27, 30} 17^{3, 21} 20³¹, 1 Jn 5¹⁻⁵). By their side we may recall also the rare construction with the infinitive (Ac 15¹¹, Ro 14²).

When we advance to the constructions with prepositions, we enter a region in which the deeper sense of the word—that of firm, trustful reliance—comes to its full rights. The construction with *ἐν*, which is the most frequent of the constructions with prepositions in the LXX, retires almost out of use in NT; it occurs with certainty only in Mk 1⁵, where the object of faith is 'the gospel,' though Jn 3¹⁵, Eph 1¹³ may also be instances of it, where the object would be Christ. The implication of this construction would seem to be firm fixedness of confidence in its object. Scarcely more common is the parallel construction of *ἐπί* with the dative, expressive of steady, resting repose, reliance upon the object. Besides the quotation from Is 28¹⁶, which appears alike in Ro 9³³ 10¹¹, 1 P 2⁶, this construction occurs only twice: Lk 24²³, where Jesus rebukes His followers for not 'believing on,' relying implicitly upon, all that the prophets have spoken; and 1 Ti 1¹⁶, where we are declared to 'believe on' Jesus Christ unto salvation, i.e. to obtain salvation by relying upon Him for it. The constructions with prepositions governing the accusative, which involve an implication of 'moral motion, mental direction towards,' are more frequently used. That with *ἐπί*, indeed, occurs only seven times (four of which are in Ac). In two instances in Ro 4, where the reminiscence of the faith of Abraham gives colour to the language, the object on which faith is thus said relyingly to lay hold is God, described, however, as savingly working through Christ—as He that justifies the ungodly, He that raised Jesus our Lord from the dead. Elsewhere its object is Christ Himself. In Mt 27⁴² the Jewish leaders declare the terms on which they will become 'believers on' Jesus; in Ac 16³¹ this is the form that is given to the proclamation of salvation by faith in Christ—'turn with confident trust to Jesus Christ'; and appropriately, therefore, it is in this form of expression that those are designated who have savingly believed on Christ (Ac 9⁴² 11¹⁷ 22¹⁹). The special NT construction, however, is that with *εἰς*, which occurs some forty-nine times, about four-fifths of which are Johannine and the remainder more or less Pauline. The object towards which faith is thus said to be reliantly directed is in one unique instance 'the witness which God hath witnessed concerning his Son' (1 Jn 5¹⁰), where we may well believe that 'belief in the truth of the witness is carried on to personal belief in the object of the witness, that is, the Incarnate Son Himself.' Elsewhere the object believed on, in this construction, is always a person, and that very rarely God (Jn 14¹, cf. 1 Jn 5¹⁶, and also 1 P 1²¹, where, however, the true reading is probably *πιστοῦς εἰς θεόν*), and most commonly Christ (Mt 18⁶, Jn 2¹¹ 3^{16, 18, 36} 4³⁹ 6^{29, 35, 40} 7^{5, 21, 38, 39, 43} 8³⁰ 9^{35, 36} 10⁴² 11^{25, 26, 45, 48} 12^{11, 37, 42, 44, 44, 46} 14^{1, 12} 16⁹ 17²⁰, Ac 10⁴³ 14²³ 19⁴, Ro 10^{14, 14}, Gal 2¹⁶, Ph 1²⁹, 1 P 1⁸, 1 Jn 5¹⁰, cf. Jn 12³⁶ 11²² 2²³ 3¹⁸, 1 Jn 5¹³). A glance over these passages will bring clearly out the pregnancy of the meaning conveyed. It may be more of a question wherein the pregnancy resides. It is probably sufficient to find it in the sense conveyed by the verb itself, while the preposition adjoins only the person towards whom the strong feeling expressed by the verb is directed. In any event, what these passages express is 'an absolute transference of trust from ourselves to another,' a complete self-surrender to Christ.

Some confirmation of this explanation of the strong meaning of the phrase *πιστεύειν εἰς* may be

derived from the very rich use of the verb absolutely, in a sense in no way inferior. Its absolute use is pretty evenly distributed through the NT, occurring 29 times in John, 23 times in Paul, 22 times in Acts, 15 times in the Synoptics, and once each in Hebrews, James, 1 Peter, and Jude; it is placed on the lips of Jesus some 18 times. In surprisingly few of these instances is it used of a non-religious act of crediting,—apparently only in our Lord's warning to His followers not to believe when men say "Lo, here is the Christ," or "here" (Mt 24^{23, 26}, Mk 13²¹). In equally surprisingly few instances is it used of specific acts of faith in the religious sphere. Once it is used of assent given to a specific doctrine—that of the unity of God (Ja 2¹⁹). Once it is used of believing prayer (Mt 21²²). Four times in a single chapter of John it is used of belief in a specific fact—the great fact central to Christianity of the resurrection of Christ (Jn 20^{8, 25, 29, 30}). It is used occasionally of belief in God's announced word (Lk 1⁴⁶, Ac 26²⁷), and occasionally also of the credit given to specific testimonies of Jesus, whether with reference to earthly or heavenly things (Jn 3^{12, 12, 15^o}, Lk 22⁶⁷), passing thence to general faith in the word of salvation (Lk 8^{12, 12}). Twice it is used of general soteriological faith in God (Jude⁵, Ro 4¹⁸), and a few times, with the same pregnancy of implication, where the reference, whether to God or Christ, is more or less uncertain (Jn 1⁷, Ro 4¹¹, 2 Co 4^{13, 13}). Ordinarily, however, it expresses soteriological faith directed to the person of Christ. In a few instances, to be sure, the immediate trust expressed is in the extraordinary power of Jesus for the performance of earthly effects (the so-called 'miracle faith'), as in Mt 8¹³, Mk 5^{36, 9^{23, 24}}, Lk 8⁵⁰, Jn 4^{48, 11⁴⁰}; but the essential relation in which this faith stands to 'saving faith' is clearly exhibited in Jn 4⁴⁸ compared with v. 53 and 9³⁸, and Jn 11⁴⁰ compared with v. 15 and 12³⁰; and, in any case, these passages are insignificant in number when compared with the great array in which the reference is distinctly to saving faith in Christ (Mk 9^{42, 15³²} [Jn 3¹⁵], Jn 3^{18, 41, 42, 53, 54, 63⁶, 47, 64, 64, 9³⁸} 10^{25, 26, 11¹⁵, 12³⁹, 14²⁹, 16³¹, 19³⁵, 20³¹}, Ac 2^{44, 44, 52} 5¹⁴ 8^{13, 11²¹} 13^{12, 39, 48, 14¹, 15^{5, 7, 17^{12, 34}, 18^{8, 27}, 19^{2, 16}, 21^{20, 25}}, Ro 1^{16, 3²²} 10^{4, 10} 13^{11, 15¹³}, 1 Co 1^{21, 3⁵, 14²², 15^{2, 11}}, Gal 3²², Eph 1^{13, 19}, 1 Th 1^{7, 2^{10, 13}}, 2 Th 1¹⁰, He 4³, 1 P 2⁷). A survey of these passages will show very clearly that in the NT 'to believe' is a technical term to express reliance on Christ for salvation. In a number of them, to be sure, the object of the believing spoken of is sufficiently defined by the context, but, without contextual indication of the object, enough remain to bear out this suggestion. Accordingly, a tendency is betrayed to use the simple participle very much as a verbal noun, with the meaning of 'Christian': in Mk 9⁴², Ac 11²¹, 1 Co 1²¹, Eph 1^{13, 19}, 1 Th 1^{7, 2^{10, 13}} the participial construction is evident; it may be doubted, however, whether *ο πιστεύσας* is not used as a noun in such passages as Ac 2^{44, 43}, 2 Th 1¹⁰, He 4³; and in Ac 5¹⁴ *πιστεύοντες* is perhaps generally recognized as used substantively. Before the disciples were called 'Christians' (Ac 11²⁶, cf. 26²⁸, 1 P 4¹⁶) it would seem, then, that they were called 'believers,'—those who had turned to Christ in trusting reliance (*οι πιστεύσαντες*), or those who were resting on Christ in trusting reliance (*οι πιστεύοντες*); and that the undefined 'to believe' had come to mean to become or to be a Christian, that is, to turn to or rest on Christ in reliant trust. The occasional use of *οι πιστοι* in an equivalent sense (Ac 10⁴⁵, Eph 1¹, 1 Ti 4^{3, 12}, 1 P 1²¹, Rev 17¹⁴), for which the way was prepared by the comparatively frequent use of this adjective in the classically rare active sense (Jn 1²⁷, Ac 16¹, 1 Co 7¹⁴, 2 Co 6¹⁵, Gal 3⁹, 1 Ti 4^{10, 5¹⁶} 6², Tit 1⁶), adds weight to}

this conclusion; as do also the use of *ἀπιστοι* of 'unbelievers,' whether in the simple (1 Co 6^{8, 7¹²⁻¹⁵, 10²⁷} 14²²⁻²⁴, 1 Ti 5⁸) or deepened sense (2 Co 4^{4, 6^{14c}}, Tit 1¹⁵, cf. Jn 20²⁷, Mt 17¹⁷, Mk 9¹⁹, Lk 9⁴¹), and the related usage of the words *ἀπιστία* (Mk 9²⁴ (16¹⁴), Mt 13⁵⁸, Mk 6⁹, Ro 4²⁰ 11^{20, 23}, 1 Ti 1¹³, He 3^{12, 19}), *ἀπιστέω* (Mk 16^{11, 16}), Lk 24^{11, 41}, Ac 23²⁴, 1 P 2⁷), and *ὀλιγοπιστος* (Mt 6³⁰ 8²³ 14³¹ 16⁸, Lk 12²⁸), *ὀλιγοπιστία* (Mt 17²⁰).

The impression which is thus derived from the usage of *πιστεύειν* is only deepened by attending to that of *πίστις*. As already intimated, *πίστις* occurs in NT very rarely in its passive sense of 'faithfulness,' 'integrity' (Ro 3⁸ of God; Mt 23²³, Gal 5²², Tit 2¹⁰, of men; cf. 1 Ti 5¹² 'a pledge'; Ac 17³¹ 'assurance'; others add 1 Ti 6¹¹, 2 Ti 2^{22, 310}, Philem⁵). And nowhere in the multitude of its occurrences in its active sense is it applied to man's faith in man, but always to the religious trust that reposes on God, or Christ, or divine things. The specific object on which the trust rests is but seldom explicitly expressed. In some six of these instances it is a thing, but always something of the fullest soteriological significance—the gospel of Christ (Ph 1²⁷), the saving truth of God (2 Th 2¹³), the working of God who raised Jesus from the dead (Col 2¹², cf. Ac 14^{9, 3¹⁶}), the name of Jesus (Ac 3¹⁶), the blood of Jesus (Ro 3²⁵), the righteousness of Jesus (2 P 1¹). In as many more the object is God, and the conception is prevalently that of general trust in God (Mk 11²², Ro 14²², 1 Th 1⁸, He 6¹, 1 P 1²¹, cf. Col 2¹²). In most instances, however, the object is specified as Christ, and the faith is very pointedly soteriological (Ac 20^{21, 24²⁴, 26¹⁸}, Gal 2^{16, 16, 20}, Ro 3^{22, 26}, Gal 3^{22, 26}, Eph 1^{15, 3^{12, 4¹³}, Ph 3⁹, Col 1^{4, 25}, 1 Ti 1^{14, 3^{13, 15}}, 2 Ti 1^{13, 3¹⁵}, Philem⁵, Ja 2¹, Rev 2^{13, 14¹²}). Its object is most frequently joined to *πίστις* as an objective genitive, a construction occurring some seventeen times, twelve of which fall in the writings of Paul. In four of them the genitive is that of the thing, viz. in Ph 1²⁷ the gospel, in 2 Th 2¹³ the saving truth, in Col 2¹² the almighty working of God, and in Ac 3¹⁶ the name of Jesus. In one of them it is God (Mk 11²²). The certainty that the genitive is that of object in these cases is decisive with reference to its nature in the remaining cases, in which Jesus Christ is set forth as the object on which faith rests (Ro 3^{22, 26}, Gal 2^{16, 16, 20, 3²²}, Eph 3^{12, 4¹³}, Ph 3⁹, Ja 2¹, Rev 2^{13, 14¹²}). Next most frequently its object is joined to faith by means of the preposition *ἐν* (9 times), by which it is set forth as the basis on which faith rests, or the sphere of its operation. In two of these instances the object is a thing—the blood or righteousness of Jesus (Ro 3²⁵, 2 P 1¹); in the rest it is Christ Himself who is presented as the ground of faith (Gal 3²⁶, Eph 1¹⁵, Col 1^{4, 1 Ti 1^{14, 3¹³}}, 2 Ti 1^{13, 3¹⁵}). Somewhat less frequently (5 times) its object is joined to *πίστις* by means of the preposition *εἰς*, designating, apparently, merely the object with reference to which faith is exercised (cf. especially Ac 20²¹); the object thus specified for faith is in one instance God (1 P 1²¹), and in the others Christ (Ac 20^{21, 24²⁴, 26¹⁸}, Col 2⁵). By the side of this construction should doubtless be placed the two instances in which the preposition *πρός* is used, by which faith is said to look and adhere to God (1 Th 1⁸) or to Christ (Philem⁵). And it is practically in the same sense that in a single instance God is joined to *πίστις* by means of the preposition *ἐπί* as the object to which it restingly turns. It would seem that the pregnant sense of *πίστις* as self-abandoning trust was so fixed in Christian speech that little was left to be expressed by the mode of its adjunction to its object.}

Accordingly, the use of the word without specified object is vastly preponderant. In a few of such instances we may see a specific reference

to the general confidence which informs believing prayer (Lk 18⁸, Ja 1⁶ 5¹⁵). In a somewhat greater number there is special reference to faith in Jesus as a worker of wonders—the so-called 'miracle faith' (Mt 8¹⁰ 9². 22. 29 15²⁸ [17²⁰] [21²¹], Mk 2⁵ 4⁴⁰ 5³⁴ 10⁵², Lk 5²⁰ 7⁹ 8²⁵. 48 17¹⁹ 18⁴², Ac 3¹⁶ 14⁹)—although how little this faith can be regarded as non-soteriological the language of Mt 9², Mk 2⁵, Lk 5²⁰ shows, as well as the parallelism between Lk 7⁵⁰ (cf. 8⁴⁸ 17¹⁹) and Mt 9²², Mk 5³⁴. The immense mass of the passages in which the undefined *πίστις* occurs, however, are distinctly soteriological, and that indifferently whether its implied object be God or Christ. Its implied reference is indeed often extremely difficult to fix; though the passages in which it may, with some confidence, be referred to Christ are in number about double those in which it may, with like confidence, be referred to God. The degree of clearness with which an implied object is pointed to in the context varies, naturally, very greatly; but in a number of cases there is no direct hint of object in the context, but this is left to be supplied by the general knowledge of the reader. And this is as much as to say that *πίστις* is so used as to imply that it had already become a Christian technical term, which needed no further definition that it might convey its full sense of saving faith in Jesus Christ to the mind of every reader. This tendency to use it as practically a synonym for 'Christianity' comes out sharply in such a phrase as *οἱ ἐκ πίστεως* (Gal 3⁷⁻⁹), which is obviously a paraphrase for 'believers.' A transitional form of the phrase meets us in Ro 3²⁸, *τὸν ἐκ πίστεως Ἰησοῦ*; that the Ἰησοῦ could fall away and leave the simple *οἱ ἐκ πίστεως* standing for the whole idea, is full of implications as to the sense which the simple undefined *πίστις* had acquired in the circles which looked to Jesus for salvation. The same implications underlie the so-called objective use of *πίστις* in the NT. That in such passages as Ac 6⁷, Gal 1²³ 3²³ 6¹⁰, Ph 1²⁵, Jude 3. 20 it conveys the idea of 'the Christian religion' appears plain on the face of the passages; and by their side can be placed such others as the following, which seem transitional to them, viz.: Ac 16⁵, 1 Co 16¹³, Col 1²³, 1 Ti 1¹⁹ 4¹. 6 5⁸, Tit 1¹³, and, at a slightly further remove, such others as Ac 13⁸, Ro 1⁵ 16²⁶, Ph 1²⁵, 1 Ti 3⁹ 6¹⁰. 12, 2 Ti 3⁴, Tit 1⁴ 3¹⁵, 1 P 5⁹. It is not necessary to suppose that *πίστις* is used in any of these passages as *doctrina fidei*; it seems possible to carry through them all the conception of 'subjective faith conceived of objectively as a power,'—even through those in Jude and 1 Timothy, which are more commonly than any others interpreted as meaning *doctrina fidei*. But this generally admitted objectivizing of subjective faith makes *πίστις*, as truly as if it were understood as *doctrina fidei*, on the verge of which it in any case trembles, a synonym for 'the Christian religion.' It is only a question whether 'the Christian religion' is designated in it from the side of doctrine or life; though it be from the point of view of life, still 'the faith' has become a synonym for 'Christianity,' 'believers' for 'Christians,' 'to believe' for 'to become a Christian,' and we may trace a development by means of which *πίστις* has come to mean the religion which is marked by and consists essentially in 'believing.' That this development so rapidly took place is significant of much, and supplies a ready explanation of such passages as Gal 3²³⁻²⁵, in which the phrases 'before the faith came' and 'now that faith is come' probably mean little more than before and after the advent of 'Christianity' into the world. On the ground of such a usage, we may at least re-affirm with increased confidence that the idea of 'faith' is conceived of in the NT as the characteristic idea of Christianity, and that it does not import mere

'belief' in an intellectual sense, but all that enters into an entire self-commitment of the soul to Jesus as the Son of God, the Saviour of the world.

II. THE HISTORICAL PRESENTATION OF FAITH. —It lies on the very surface of the NT that its writers were not conscious of a chasm between the fundamental principle of the religious life of the saints of the old covenant and the faith by which they themselves lived. To them, too, Abraham is the typical example of a true believer (Ro 4, Gal 3, He 11, Ja 2); and in their apprehension 'those who are of faith,' that is, 'Christians,' are by that very fact constituted Abraham's sons (Gal 3⁷, Ro 4¹⁶), and receive their blessing only along with that 'believer' (Gal 3⁹) in the steps of whose faith it is that they are walking (Ro 4¹²) when they believe on Him who raised Jesus our Lord from the dead (Ro 4²⁴). And not only Abraham, but the whole series of OT heroes are conceived by them to be examples of the same faith which was required of them 'unto the gaining of the soul' (He 11). Wrought in them by the same Spirit (2 Co 4¹³), it produced in them the same fruits, and constituted them a 'cloud of witnesses' by whose testimony we should be stimulated to run our own race with like patience in dependence on Jesus, 'the author and finisher of our faith' (He 12²). Nowhere is the demand of faith treated as a novelty of the new covenant, or is there a distinction drawn between the faith of the two covenants; everywhere the sense of continuity is prominent (Jn 5²⁴. 46 12³⁸. 39. 44, 1 P 2⁵), and the 'proclamation of faith' (Gal 3²⁻⁵, Ro 10¹⁶) is conceived as essentially one in both dispensations, under both of which the law reigns that 'the just shall live by his faith' (Hab 2⁴, Ro 1¹⁷, Gal 3¹¹, He 10³⁸). Nor do we need to penetrate beneath the surface of the OT to perceive the justice of this NT view. Despite the infrequency of the occurrence on its pages of the terms 'faith,' 'to believe,' the religion of the OT is obviously as fundamentally a religion of faith as is that of the NT. There is a sense, to be sure, in which all religion presupposes faith (He 11⁶), and in this broad sense the religion of Israel, too, necessarily rested on faith. But the religion of Israel was a religion of faith in a far more specific sense than this; and that not merely because faith was more consciously its foundation, but because its very essence consisted in faith, and this faith was the same radical self-commitment to God, not merely as the highest good of the holy soul, but as the gracious Saviour of the sinner, which meets us as the characteristic feature of the religion of the NT. Between the faith of the two Testaments there exists, indeed, no further difference than that which the progress of the historical working out of redemption brought with it.

The hinge of OT religion from the very beginning turns on the facts of man's sin (Gn 3) and consequent unworthiness (Gn 3²⁻¹⁰), and of God's grace (Gn 3¹⁶) and consequent saving activity (Gn 3⁴ 4⁹ 6⁸. 18¹). This saving activity presents itself from the very beginning also under the form of promise or covenant, the radical idea of which is naturally faithfulness on the part of the promising God with the answering attitude of faith on the part of the receptive people. Face to face with a holy God, the sinner has no hope except in the free mercy of God, and can be authorized to trust in that mercy only by express assurance. Accordingly, the only cause of salvation is from the first the pitying love of God (Gn 3¹⁵ 8²¹), which freely grants benefits to man; while on man's part there is never question of merit or of a strength by which he may prevail (1 S 2⁹), but rather a constant sense of unworthiness (Gn 32¹⁰), by virtue of which

humility appears from the first as the keynote of OT piety. In the earlier portions of the OT, to be sure, there is little abstract statement of the ideas which ruled the hearts and lives of the servants of God. The essence of patriarchal religion is rather exhibited to us in action. But from the very beginning the distinctive feature of the life of the pious is that it is a life of faith, that its regulative principle is drawn, not from the earth but from above. Thus the first recorded human acts after the Fall—the naming of Eve, and the birth and naming of Cain—are expressive of trust in God's promise that, though men should die for their sins, yet man should not perish from the earth, but should triumph over the tempter; in a word, in the great promise of the Seed (Gn 3¹⁵). Similarly, the whole story of the Flood is so ordered as to throw into relief, on the one hand, the free grace of God in His dealings with Noah (Gn 6⁸⁻¹⁸ 8¹⁻²¹ 9⁸), and, on the other, the determination of Noah's whole life by trust in God and His promises (Gn 6²² 7⁵ 9²⁰). The open declaration of the faith-principle of Abraham's life (Gn 15⁶) only puts into words, in the case of him who stands at the root of Israel's whole national and religious existence, what not only might also be said of all the patriarchs, but what actually is most distinctly said both of Abraham and of them through the medium of their recorded history. The entire patriarchal narrative is set forth with the design and effect of exhibiting the life of the servants of God as a life of faith, and it is just by the fact of their implicit self-commitment to God that throughout the narrative the servants of God are differentiated from others. This does not mean, of course, that with them faith took the place of obedience: an entire self-commitment to God which did not show itself in obedience to Him would be self-contradictory, and the testing of faith by obedience is therefore a marked feature of the patriarchal narrative. But it does mean that faith was with them the precondition of all obedience. The patriarchal religion is essentially a religion, not of law but of promise, and therefore not primarily of obedience but of trust; the holy walk is characteristic of God's servants (Gn 5²² 24 6⁹ 17¹ 24⁴⁰ 48¹⁵), but it is characteristically described as a walk 'with God'; its peculiarity consisted precisely in the ordering of life by entire trust in God, and it expressed itself in conduct growing out of this trust (Gn 3²⁰ 4¹ 6²² 7⁵ 8¹⁸ 12⁴ 17²³ 21¹² 22). The righteousness of the patriarchal age was thus but the manifestation in life of an entire self-commitment to God, in unwavering trust in His promises.

The piety of the OT thus began with faith. And though, when the stage of the law was reached, the emphasis might seem to be thrown rather on the obedience of faith, what has been called 'faith in action,' yet the giving of the law does not mark a fundamental change in the religion of Israel, but only a new stage in its orderly development. The law-giving was not a setting aside of the religion of promise, but an incident in its history; and the law given was not a code of jurisprudence for the world's government, but a body of household ordinances for the regulation of God's family. It is therefore itself grounded upon the promise, and it grounds the whole religious life of Israel in the grace of the covenant God (Ex 20²). It is only because Israel are the children of God, and God has sanctified them unto Himself and chosen them to be a peculiar people unto Him (Dt 14¹), that He proceeds to frame them by His law for His especial treasure (Ex 19⁵; cf. Tit 2¹⁴). Faith, therefore, does not appear as one of the precepts of the law, nor as a virtue superior to its precepts, nor yet as a substitute for keeping them; it rather

lies behind the law as its presupposition. Accordingly, in the history of the giving of the law, faith is expressly emphasized as the presupposition of the whole relation existing between Israel and J^h. The signs by which Moses was accredited, and all J^h's deeds of power, had as their design (Ex 3¹² 4¹ 5. 8. 9 19⁴ 9) and their effect (Ex 4⁸¹ 12²⁸ 34 14³¹ 24³ 7, Ps 106¹²) the working of faith in the people; and their subsequent unbelief is treated as the deepest crime they could commit (Nu 14¹¹, Dt 1³² 9²³, Ps 78²² 32 106²⁴), as is even momentary failure of faith on the part of their leaders (Nu 20¹²). It is only as a consequent of the relation of the people to Him, instituted by grace on His part and by faith on theirs, that J^h proceeds to carry out His gracious purposes for them, delivering them from bondage, giving them a law for the regulation of their lives, and framing them in the promised land into a kingdom of priests and a holy nation. In other words, it is a precondition of the law that Israel's life is not of the earth, but is hid with God, and is therefore to be ordered by His precepts. Its design was, therefore, not to provide a means by which man might come into relation with J^h, but to publish the mode of life incumbent on those who stand in the relation of children to J^h; and it is therefore that the book of the law was commanded to be put by the side of the ark of the covenant of the LORD, that it might be a witness against the transgressions of Israel (Dt 31²⁶).

The effect of the law was consonant with its design. Many, no doubt, looked upon it in a purely legalistic spirit, and sought, by scrupulous fulfilment of it as a body of external precepts, to lay the foundation of a claim on God in behalf of the nation or the individual, or to realize through it, as a present possession, that salvation which was ever represented as something future. But, just in proportion as its spirituality and inwardness were felt, it operated to deepen in Israel the sense of shortcoming and sin, and to sharpen the conviction that from the grace of God alone could salvation be expected. This humble frame of conscious dependence on God was met by a twofold proclamation. On the one hand, the eyes of God's people were directed more longingly towards the future, and, in contrast with the present failure of Israel to realize the ordinances of life which had been given it, a new dispensation of grace was promised in which the law of God's kingdom should be written upon the heart, and should become therefore the instinctive law of life of His people (Jer 24⁷ 31³¹, Ezk 36²⁵; cf. Ezk 16⁶⁰, Jl 3, Hos 2⁹). It lay in the very nature of the OT dispensation, in which the revelation of God was always incomplete, the still unsolved enigmas of life numerous, the work of redemption unfinished, and the consummation of the kingdom ever yet to come, that the eyes of the saints should be set upon the future; and these deficiencies were felt very early. But it also lay, in the nature of the case, that the sense of them should increase as time passed and the perfecting of Israel was delayed, and especially as the whole national and religious existence of Israel was more and more put in jeopardy by assaults from without and corruption from within. The essence of piety came thus to be ever more plainly proclaimed as consisting in such a confident trust in the God of salvation as could not be confounded either by the unrighteousness which reigned in Israel or by J^h's judgments on Israel's sins,—such a confidence as, even in the face of the destruction of the theocracy itself, could preserve, in enduring hope, the assurance of the ultimate realization of God's purposes of good to Israel and the establishment of the everlasting kingdom. Thus hopeful waiting upon J^h became more and more the centre of Israelitish

piety, and Jⁿ became before all 'the Hope of Israel' (Jer 14⁸ 17¹³ 50⁷, cf. Ps 71⁵). On the other hand, while thus waiting for the salvation of Israel, the saint must needs stay himself on God (Is 26³ 50¹⁰), fixing his heart on Jⁿ as the Rock of the heart (Ps 73²⁶), His people's strength (Ps 46¹) and trust (Ps 40⁴ 65⁵ 71⁵, Jer 17⁷). Freed from all illusion of earthly help, and most of all from all self-confidence, he is meanwhile to live by faith (Hab 2⁴). Thus, along with an ever more richly expressed corporate hope, there is found also an ever more richly expressed individual trust, which finds natural utterance through an ample body of synonyms bringing out severally the various sides of that perfect commitment to God that constitutes the essence of faith. Thus we read much of trusting in, on, to God, or in His word, His name, His mercy, His salvation (תַּשׁוּבָה), of seeking and finding refuge in God or in the shadow of His wings (תַּשׁוּבָה), of committing ourselves to God (לִּבְיָ), setting confidence (בְּיָ) in Him, looking to Him (תַּשׁוּבָה), relying upon Him (בְּיָ), staying upon Him (תַּשׁוּבָה), setting or fixing the heart upon Him (לִּבְיָ), binding our love on Him (תַּשׁוּבָה), cleaving to Him (תַּשׁוּבָה). So, on the hopeful side of faith, we read much of hoping in God (תַּשׁוּבָה), waiting on God (תַּשׁוּבָה), of longing for Him (תַּשׁוּבָה), patiently waiting for Him (תַּשׁוּבָה), and the like.

By the aid of such expressions, it becomes possible to form a somewhat clear notion of the attitude towards Him which was required by Jⁿ of His believing people, and which is summed up in the term faith. It is a reverential (Ex 14²¹, Nu 14²¹ 20¹²) and loving faith, which rests on the strong basis of firm and unshaken conviction of the might and grace of the covenant God and of the trustworthiness of all His words, and exhibits itself in confident trust in Jⁿ and unwavering expectation of the fulfilment of, no doubt, all His promises, but more especially of His promise of salvation, and in consequent faithful and exclusive adherence to Him. In one word, it consists in an utter commitment of oneself to Jⁿ, with confident trust in Him as guide and saviour, and assured expectation of His promised salvation. It therefore stands in contrast, on the one hand, with trust in self or other human help, and on the other with doubt and unbelief, despondency and unfaithfulness. From Jⁿ alone is salvation to be looked for, and it comes from His free grace alone (Dt 7⁷ 8¹⁸ 9⁵, Am 3², Hos 13⁵, Ezk 20⁶, Jer 39¹⁸, Mal 1²), and to those only who look solely to Him for it (Is 31¹ 57¹³ 28¹⁶ 30¹⁵, Jer 17⁷ 39¹⁸, Ps 118⁸ 146³ 20⁷, 1 S 17⁴⁵, Ps 28²⁵ 11²⁸, Job 22²³⁻²⁴ 31²⁴, Ps 52⁹). The reference of faith is accordingly in the OT always distinctly soteriological; its end the Messianic salvation; and its essence a trusting, or rather an entrusting of oneself to the God of salvation, with full assurance of the fulfilment of His gracious purposes and the ultimate realization of His promise of salvation for the people and the individual. Such an attitude towards the God of salvation is identical with the faith of the NT, and is not essentially changed by the fuller revelation of God the Redeemer in the person of the promised Messiah. That it is comparatively seldom designated in the OT by the names of 'faith,' 'believing,' seems to be due, as has been often pointed out, to the special place of the OT in the history of revelation, and the adaptation of its whole contents and language to the particular task in the establishment of the kingdom of God which fell to its writers. This task turned on the special temptations and difficulties of the OT stage of development, and required emphasis to be laid on the majesty and jealousy of Jⁿ and on the duties of reverence, sincerity, and patience. Meanwhile, the faith in Him which underlies these

duties is continually implied in their enforcement, and comes to open expression in frequent paraphrase and synonym, and as often in its own proper terms as is natural in the circumstances. Especially in the great crises of the history of redemption (Gn 15, Ex 4⁵ 19⁹, Is 7) is the fundamental requirement of faith rendered explicit and prominent.

On the coming of God to His people in the person of His Son, the promised Messianic King, bringing the salvation, the hope of which had for so many ages been their support and stay, it naturally became the primary task of the vehicles of revelation to attract and attach God's people to the person of their Redeemer. And this task was the more pressing in proportion as the form of the fulfilment did not obviously correspond with the promise, and especially with the expectations which had grown up on the faith of the promise. This fundamental function dominates the whole NT, and accounts at once for the great prominence in its pages of the demand for faith, by which a gulf seems to be opened between it and the OT. The demand for faith in Jesus as the Redeemer so long hoped for, did indeed create so wide a cleft in the consciousness of the times that the term faith came rapidly to be appropriated to Christianity and 'to believe' to mean to become a Christian; so that the old covenant and the new were discriminated from each other as the ages before and after the 'coming of faith' (Gal 3²³⁻²⁵). But all this does not imply that faith now for the first time became the foundation of the religion of Jⁿ, but only suggests how fully, in the new circumstances induced by the coming of the promised Redeemer, the demand for faith absorbed the whole proclamation of the gospel. In this primary concern for faith the NT books all necessarily share; but, for the rest, they differ among themselves in the prominence given to it and in the aspects in which it is presented, in accordance with the place of each in the historical development of the new life; and that is as much as to say in accordance with the historical occasion out of which each arose and the special object to subserve which each was written.

Indeed, the word 'to believe' first appears on the pages of the NT in quite OT conditions. We are conscious of no distinction even in atmosphere between the commendation of faith and rebuke of unbelief in Exodus or the Psalms and the same commendation and rebuke in the days just before the 'coming of faith' (Lk 12⁴⁰⁻⁴⁵); these are but specific applications of the thesis of prophetism, expressed positively in 2 Ch 20²⁰ and negatively in Is 7⁹. Already, however, the dawn of the new day has coloured the proclamation of the Baptist, the essence of which Paul sums up for us as a demand for faith in the Coming One (Ac 19⁴), and which John reports to us (Jn 3³⁶). In the synoptic report of the teaching of Jesus, the same purpose is the dominant note. All that Jesus did and taught was directed to drawing faith to Himself. Up to the end, indeed, He repelled the unbelieving demand that He should 'declare plainly' the authority by which He acted and who He really was (Mt 21²⁸, Lk 22⁶⁷); but this was only that He might, in His own way, the more decidedly confound unbelief and assert His divine majesty. Even when He spoke of general faith in God (Mk 11²²), and that confident trust which becomes men approaching the Almighty in prayer (Mt 21²² || Mk 9²⁴, Lk 18⁸), He did it in a way which inevitably directed attention to His own person as the representative of God on earth. And this accounts for the prevalence, in the synoptic report of His allusions to faith, of a reference to that exercise of faith which has sometimes been somewhat sharply divided from saving faith under the name of 'miracle faith' (Mt 8¹⁰⁻¹³ || Lk 7⁹; Mt 9²; Mt

9²² || Mk 5²⁴, Lk 8⁴⁸; Mt 9^{28, 29}; Mt 15²¹; Mt 17²⁰ || Mk 9²⁰; Mt 21^{21, 22}, cf. Lk 17⁶; Mk 4⁴⁰; Mk 5³⁶ || Lk 8⁵⁰; Mk 10⁵² || Lk 18⁴²; Lk 7¹⁹). That in these instances we have not a generically distinct order of faith, directed to its own peculiar end, but only a specific movement of that entire trust in Himself which Jesus would arouse in all, seems clear from the manner in which He dealt with it,—now praising its exercise as a specially great exhibition of faith quite generally spoken of (Lk 7⁹), now pointing to it as a manifestation of that believing to which 'all things are possible' (Mk 9²³), now connecting with it not merely the healing of the body but the forgiveness of sins (Mt 9²), and everywhere using it as a means of attaching the confidence of men to His person as the source of all good. Having come to His own, in other words, Jesus took men upon the plane on which He found them, and sought to lead them through the needs which they felt, and the relief of which they sought in Him, up to a recognition of their greater needs and of His ability to give relief to them also. That word of power, 'Thy faith hath saved thee,' spoken indifferently of bodily wants and of the deeper needs of the soul (Lk 7⁵⁰), not only resulted, but was intended to result, in focusing all eyes on Himself as the one physician of both body and soul (Mt 8¹⁷). Explicit references to these higher results of faith are, to be sure, not very frequent in the synoptic discourses, but there are quite enough of them to exhibit Jesus' specific claim to be the proper object of faith for these effects also (Lk 8^{12, 13} 22³², Mt 18⁶ || Mk 9⁴², Lk 7⁵⁰), and to prepare the way for His rebuke, after His resurrection, of the lagging minds of His followers, that they did not understand all these things (Lk 24^{25, 45}), and for His great commission to Paul to go and open men's eyes that they might receive 'remission of sins and an inheritance among the sanctified by faith in Him' (Ac 26¹⁸).

It is very natural that a much fuller account of Jesus' teaching as to faith should be given in the more intimate discourses which are preserved by John. But in these discourses, too, His primary task is to bind men to Him by faith. The chief difference is that here, consonantly with the nature of the discourses recorded, much more prevailing stress is laid upon the higher aspects of faith, and we see Jesus striving specially to attract to Himself a faith consciously set upon eternal good. In a number of instances we find ourselves in much the same atmosphere as in the Synoptics (4^{21 sq.} 43 sq. 9³⁵); and the method of Jesus is the same throughout. Everywhere He offers Himself as the object of faith, and claims faith in Himself for the highest concerns of the soul. But everywhere He begins at the level at which He finds His hearers, and leads them upward to these higher things. It is so that He deals with Nathanael (1⁵¹) and Nicodemus (3¹²); and it is so that He deals constantly with the Jews, everywhere requiring faith in Himself for eternal life (5^{24, 25, 38} 6^{35, 40, 47} 7³⁸ 8²⁴ 10^{25, 36} 12^{44, 46}), declaring that faith in Him is the certain outcome of faith in their own Scriptures (5^{46, 47}), is demanded by the witness borne Him by God in His mighty works (10^{25, 36, 37}), is involved in and is indeed identical with faith in God (5^{25, 38} 6^{40, 45} 8⁴⁷ 12⁴⁴), and is the one thing which God requires of them (6²⁹), and the failure of which will bring them eternal ruin (3¹⁸ 5³⁸ 6⁶⁴ 8²⁴). When dealing with His followers, His primary care was to build up their faith in Him. Witness especially His solicitude for their faith in the last hours of His intercourse with them. For the faith they had reposed in Him He returns thanks to God (16²⁷), but He is still nursing their faith (16²¹), preparing for its increase through the events to come (13¹⁹ 16²⁹), and with almost passionate eagerness claiming it at their hands (14^{1, 10, 11, 12}).

Even after His resurrection we find Him restoring the faith of the waverer (20²⁹) with words which pronounce a special blessing on those who should hereafter believe on less compelling evidence—words whose point is not fully caught until we realize that they contain an intimation of the work of the apostles as, like His own, summed up in bringing men to faith in Him (17^{20, 21}).

The record in Ac of the apostolic proclamation testifies to the faithfulness with which this office was prosecuted by Jesus' delegates (Ac 3^{22, 23}). The task undertaken by them was, by persuading men (Ac 17⁴ 28²⁴), to bring them unto obedience to the faith that is in Jesus (Ac 6⁷, Ro 1⁵ 16²⁶, cf. 2 Th 1⁸, 2 Co 10⁶). And by such 'testifying faith towards our Lord Jesus Christ' (Ac 20²¹, cf. 10⁴³) there was quickly gathered together a community of 'believers' (Ac 2⁴⁴ 4^{4, 32}), that is, of believers in the Lord Jesus Christ (Ac 5¹⁴ 9⁴² 11¹⁷ 14²³), and that not only in Jerus. but beyond (8¹² 9⁴² 10⁴⁵ 11²¹ 13⁴⁸ 14¹), and not only of Jews (10⁴⁵ 15¹ 21²⁰) but of Gentiles (11²¹ 13⁴⁸ 14¹ 15⁷ 17^{12, 34} 18²⁷ 19¹⁸ 21²⁶). The enucleation of this community of believers brought to the apostolic teachers the new task of preserving the idea of faith, which was the formative principle of the new community, and to propagate which in the world, pure and living and sound, was its chief office. It was inevitable that those who were called into the faith of Christ should bring into the infant Church with them many old tendencies of thinking, and that within the new community the fermentation of ideas should be very great. The task of instructing and disciplining the new community soon became unavoidably one of the heaviest of apostolic duties; and its progress is naturally reflected in their letters. Thus certain differences in their modes of dealing with faith emerge among NT writers, according as one lays stress on the deadness and fruitlessness of a faith which produces no fruit in the life, and another on the valuelessness of a faith which does not emancipate from the bondage of the law; or as one lays stress on the perfection of the object of faith and the necessity of keeping the heart set upon it, and another on the necessity of preserving in its purity that subjective attitude towards the unseen and future which constitutes the very essence of faith; or as one lays stress on the reaching out of faith to the future in confident hope, and another on the present enjoyment by faith of all the blessings of salvation.

It was to James that it fell to rebuke the Jewish tendency to conceive of the faith which was pleasing to J' as a mere intellectual acquiescence in His being and claims, when imported into the Church and made to do duty as 'the faith of our Lord Jesus Christ, the Glory' (2¹). He has sometimes been misread as if he were depreciating faith, or at least the place of faith in salvation. But it is perfectly clear that with James, as truly as with any other NT writer, a sound faith in the Lord Jesus Christ as the manifested God (2¹) lies at the very basis of the Christian life (1⁸), and is the condition of all acceptable approach to God (1⁶ 5¹⁵). It is not faith as he conceives it which he depreciates, but that professed faith (Λέγη, 2¹⁴) which cannot be shown to be real by appropriate works (2¹⁸), and so differs by a whole diameter alike from the faith of Abraham that was reckoned unto him for righteousness (2²³), and from the faith of Christians as James understood it (2¹ 1⁸, cf. 1²²). The impression which is easily taken from the last half of the second chapter of James, that his teaching and that of Paul stand in some polemic relation, is nevertheless a delusion, and arises from an insufficient realization of the place oc-

cupied by faith in the discussions of the Jewish schools, reflections of which have naturally found their way into the language of both Paul and James. And so far are we from needing to suppose some reference, direct or indirect, to Pauline teaching to account for James' entrance upon the question which he discusses, that this was a matter upon which an earnest teacher could not fail to touch in the presence of a tendency common among the Jews at the advent of Christianity (cf. Mt 3⁹ 7²¹ 23³, Ro 2¹⁷), and certain to pass over into Jewish-Christian circles: and James' treatment of it finds, indeed, its entire presupposition in the state of things underlying the exhortation of 1²². When read from his own historical standpoint, James' teachings are free from any discord with those of Paul, who as strongly as James denies all value to a faith which does not work by love (Gal 5⁶, 1 Co 13², 1 Th 1³). In short, James is not depreciating faith: with him, too, it is faith that is reckoned unto righteousness (2²³), though only such a faith as shows itself in works can be so reckoned, because a faith which does not come to fruition in works is dead, non-existent. He is rather deepening the idea of faith, and insisting that it includes in its very conception something more than an otiose intellectual assent.

It was a far more serious task which was laid upon Paul. As apostle to the Gentiles he was called upon to make good in all its depth of meaning the fundamental principle of the religion of grace, that the righteous shall live by faith, as over-against what had come to be the ingrained legalism of Jewish thought now intruded into the Christian Church. It was not, indeed, doubted that faith was requisite for obtaining salvation. But he that had been born a Jew and was conscious of the privileges of the children of the promise, found it hard to think that faith was all that was requisite. What, then, was the advantage of the Jew? In defence of the rights of the Gentiles, Paul was forced in the most uncompromising way to validate the great proposition that, in the matter of salvation, there is no distinction between Jew and Gentile,—that the Jew has no other righteousness than that which comes through faith in Jesus Christ (Gal 2¹⁵ 2¹⁶), and that the Gentile fully possesses this righteousness from faith alone (Gal 3⁷ 2¹⁶); in a word, that the one God, who is God of the Gentiles also, 'shall justify the circumcision by faith, and the uncircumcision through faith' (Ro 3³⁰). Thus was it made clear not only that 'no man is justified by the law' (Gal 2¹⁶ 3¹¹, Ro 2¹³), but also that a man is justified by faith apart from law-works (Ro 3²⁸). The splendid vigour and thoroughness of Paul's dialectic development of the absolute contrast between the ideas of faith and works, by virtue of which one peremptorily excludes the other, left no hiding-place for a work-righteousness of any kind or degree, but cast all men solely upon the righteousness of God, which is apart from the law and comes through faith unto all that believe (Ro 3²¹ 2²²). Thus, in vindicating the place of faith as the only instrument of salvation, Paul necessarily dwelt much upon the object of faith, not as if he were formally teaching what the object is on which faith savingly lays hold, but as a natural result of his effort to show from its object the all-sufficiency of faith. It is because faith lays hold of Jesus Christ, who was delivered up for our trespasses and was raised for our justification (Ro 4²⁵), and makes us possessors of the righteousness provided by God through Him, that there is no room for any righteousness of our own in the ground of our salvation (Ro 10⁹, Eph 2⁸). This is the reason of that full development of the object

of faith in Paul's writings, and especially of the specific connexion between faith and the righteousness of God proclaimed in Christ, by which the doctrine of Paul is sometimes said to be distinguished from the more general conception of faith which is characteristic of the Epistle to the Hebrews. This more general conception of faith is not, however, the peculiar property of that epistle, but is the fundamental conception of the whole body of biblical writers in OT and in NT (cf. Mt 6²⁵ 16²³, Jn 20²⁹ 31, 1 P 1⁵), including Paul himself (2 Co 4¹³ 5⁷, Ro 4¹⁶⁻²² 8²⁴); while, on the other hand, the Epistle to the Hebrews, no less than Paul, teaches that there is no righteousness except through faith (10³⁸ 11⁷, cf. 11¹).

That in the Epistle to the Hebrews it is the general idea of faith, or, to be more exact, the subjective nature of faith, that is dwelt upon, rather than its specific object, is not due to a peculiar conception of what faith lays hold upon, but to the particular task which fell to its writer in the work of planting Christianity in the world. With him, too, the person and work of Christ are the specific object of faith (13⁷⁻⁸ 3¹⁴ 10²²). But the danger against which, in the providence of God, he was called upon to guard the infant flock, was not that it should fall away from faith to works, but that it should fall away from faith into despair. His readers were threatened not with legalism but with 'shrinking back' (10³⁹), and he needed, therefore, to emphasize not so much the object of faith as the duty of faith. Accordingly, it is not so much on the righteousness of faith as on its perfecting that he insists; it is not so much its contrast with works as its contrast with impatience that he impresses on his readers' consciences; it is not so much to faith specifically in Christ and in Him alone that he exhorts them as to an attitude of faith—an attitude which could rise above the seen to the unseen, the present to the future, the temporal to the eternal, and which in the midst of sufferings could retain patience, in the midst of disappointments could preserve hope. This is the key to the whole treatment of faith in the Epistle to the Hebrews—its definition as the assurance of things hoped for, the conviction of things not seen (11¹); its illustration and enforcement by the example of the heroes of faith in the past, a list chosen and treated with the utmost skill for the end in view (11); its constant attachment to the promises (4¹ 2 6¹² 10³⁶ 38 11⁹ 13³⁹); its connexion with the faithfulness (11¹¹, cf. 10²³), almightiness (11¹⁹), and the rewards of God (11²⁶ 28); and its association with such virtues as boldness (3⁶ 4¹⁶ 10¹⁹ 36), confidence (3¹⁴ 11¹), patience (10³⁶ 12¹), hope (3⁶ 6¹¹ 18 10²³).

With much that is similar to the situation implied in Hebrews, that which underlies the Epistles of Peter differs from it in the essential particular that their prevailing Gentile readers were not in imminent danger of falling back into Judaism. There is, accordingly, much in the aspect in which faith is presented in these epistles which reminds us of what we find in Hebrews, as, for example, the close connexion into which it is brought with obedience (1 P 1² 2² 2⁷ 3¹ 4¹⁷), its prevailing reference to what is unseen and future (1 P 1⁵ 7-10 21), and its consequent demand for steadfastness (5⁹, cf. 1⁷), and especially for hope (1²¹, cf. 1³ 1³ 3⁵ 15). Yet there is a noteworthy difference in the whole tone of the commendation of faith, which was rooted, no doubt, in the character of Peter, as the tone of his speeches recorded in Acts shows, but which also grew out of the nature of the task set before him in these letters. There is no hint of despair lying in the near background, but the buoyancy of assured hope rings throughout

these epistles. Having hearkened to the prophet like unto Moses (Dt 18^{15, 19}, Ac 3^{22, 23}), Christians are the children of obedience (1 P 1⁴), and through their precious faith (1 P 1⁷, 2 P 1⁴) possessors of the preciousness of the promises (1 P 2⁷). As they have obeyed the voice of God and kept His covenant, they have become His peculiar treasure, a kingdom of priests and a holy nation (Ex 19⁵, 1 P 2⁹). Naturally, the duty rests upon them of living, while here below, in accordance with their high hopes (1 P 1¹³, 2 P 1⁹). But in any event they are but sojourners and pilgrims here (1 P 2¹¹ 1¹⁷), and have a sure inheritance reserved for them in heaven (1⁴), unto which they are guarded through faith by the power of God (1⁵). The reference of faith in Peter is therefore characteristically to the completion rather than to the inception of salvation (1^{5, 9} 2⁵, cf. Ac 15¹¹). Of course this does not imply that he does not share the common biblical conception of faith: he is conscious of no difference of view from that of OT (1 P 2⁹); and, no less than with James, with him faith is the fountain of all good works (1 P 1^{7, 21} 5⁹, 2 P 1⁹); and, no less than with Paul, with him faith lays hold of the righteousness of Christ (2 P 1⁴). It only means that in the circumstances of his writing he is led to lay special emphasis on the reference of faith to the consummated salvation, in order to quicken in his readers that hope which would sustain them in their persecutions, and to keep their eyes set, not on their present trials, but, in accordance with faith's very nature, on the unseen and eternal glory.

In the entirely different circumstances in which he wrote, John wished to lay stress on the very opposite aspect of faith. For what is characteristic of John's treatment of faith is insistence not so much on the certainty and glory of the future inheritance which it secures, as on the fulness of the present enjoyment of salvation which it brings. There was pressing into the Church a false emphasis on knowledge, which affected to despise simple faith. This John met, on the one hand, by deepening the idea of knowledge to the knowledge of experience, and, on the other, by insisting upon the immediate entrance of every believer into the possession of salvation. It is not to be supposed, of course, that he was ready to neglect or deny that out-reaching of faith to the future on which Peter lays such stress: he is zealous that Christians shall know that they are children of God from the moment of believing, and from that instant possessors of the new life of the Spirit; but he does not forget the greater glory of the future, and he knows how to use this Christian hope also as an incitement to holy living (1 Jn 3²). Nor are we to suppose that, in his anti-Gnostic insistence on the element of conviction in faith, he would lose sight of that central element of surrendering trust which is the heart of faith in other portions of the Scriptures: he would indeed have believers know what they believe, and who He is in whom they put their trust, and what He has done for them, and is doing, and will do, in and through them; but this is not that they may know these things simply as intellectual propositions, but that they may rest on them in faith and know them in personal experience. Least of all the NT writers could John confine faith to a merely intellectual act: his whole doctrine of faith is rather a protest against the intellectualism of Gnosticism. His fundamental conception of faith differs in nothing from that of the other NT writers; with him, too, it is a trustful appropriation of Christ and surrender of self to His salvation. Eternal life has been manifested by Christ (Jn 1⁴, 1 Jn 1^{1, 2} 5¹¹), and he, and he only, who has the Son has the life (1 Jn 5¹²). But in the conflict

in which he was engaged he required to throw the strongest emphasis possible upon the immediate entrance of believers into this life. This insistence had manifold applications to the circumstances of his readers. It had, for example, a negative application to the antinomian tendency of Gnostic teaching, which John does not fail to press (1 Jn 1⁵ 2^{4, 15} 3⁶): 'whosoever believeth that Jesus is the Christ is begotten of God' (1 Jn 5¹), and 'whosoever is begotten of God doeth no sin' (1 Jn 3⁹). It had also a positive application to their own encouragement: the simple believer was placed on a plane of life to which no knowledge could attain; the new life received by faith gave the victory over the world; and John boldly challenges experience to point to any who have overcome the world but he that believes that Jesus is the Son of God (1 Jn 5^{4, 5}). Accordingly, it is characteristic of John to announce that 'he that believeth hath eternal life' (Jn 3³⁶ 5²⁴ 6^{47, 54}, 1 Jn 3^{14, 15} 5^{11, 12, 13}). He even declares the purpose of his writing to be, in the Gospel, that his readers 'may believe that Jesus is the Christ, the Son of God, and that, believing, they may have life in his name' (20³¹); and in the First Epistle, that they that believe in the name of the Son of God 'may know that they have eternal life' (1 Jn 5¹³).

III. THE BIBLICAL CONCEPTION OF FAITH.—By means of the providentially mediated diversity of emphasis of the NT writers on the several aspects of faith, the outlines of the biblical conception of faith are thrown into very high relief.

Of its *subjective nature* we have what is almost a formal definition in the description of it as an 'assurance of things hoped for, a conviction of things not seen' (He 11¹). It obviously contains in it, therefore, an element of knowledge (He 11⁶), and it as obviously issues in conduct (He 11⁸, cf. 5⁹, 1 P 1²²). But it consists neither in assent nor in obedience, but in a reliant trust in the invisible Author of all good (He 11²⁷), in which the mind is set upon the things that are above and not on the things that are upon the earth (Col 3², cf. 2 Co 4¹⁶⁻¹⁸, Mt 6²⁵ 16³³). The examples cited in He 11 are themselves enough to show that the faith there commended is not a mere belief in God's existence and justice and goodness, or crediting of His word and promises, but a practical counting of Him faithful (11¹⁴), with a trust so profound that no trial can shake it (11³⁵), and so absolute that it survives the loss of even its own pledge (11¹⁷). So little is faith in its biblical conception merely a conviction of the understanding, that, when that is called faith, the true idea of faith needs to be built up above this word (Ja 2^{14ff}). It is a movement of the whole inner man (Ro 10^{9, 10}), and is set in contrast with an unbelief that is akin, not to ignorance but to disobedience (He 3^{18, 19}, Jn 3³⁶, Ro 11^{20, 30} 15³¹, 1 Th 1⁸, He 4^{6, 2}, 1 P 1^{7, 8} 3^{1, 20} 4¹⁸, Ac 14^{2, 1} 19⁹), and that grows out of, not lack of information, but that aversion of the heart from God (He 3¹²) which takes pleasure in unrighteousness (2 Th 2¹²), and is so unsparingly exposed by our Lord (Jn 3¹⁹ 5⁴⁴ 8⁴⁷ 10²⁶). In the breadth of its idea, it is thus the going out of the heart from itself and its resting on God in confident trust for all good. But the scriptural revelation has to do with, and is directed to the needs of, not man in the abstract, but sinful man; and for sinful man this hearty reliance on God necessarily becomes humble trust in Him for the fundamental need of the sinner—forgiveness of sins and reception into favour. In response to the revelations of His grace and the provisions of His mercy, it commits itself without reserve and with abnegation of all self-dependence, to Him as its sole and sufficient Saviour, and thus, in one act, empties itself of all

claim on God and casts itself upon His grace alone for salvation.

It is, accordingly, solely from its *object* that faith derives its value. This object is uniformly the God of grace, whether conceived of broadly as the source of all life, light, and blessing, on whom man in his creaturely weakness is entirely dependent, or, whenever sin and the eternal welfare of the soul are in view, as the Author of salvation in whom alone the hope of unworthy man can be placed. This one object of saving faith never varies from the beginning to the end of the scriptural revelation; though, naturally, there is an immense difference between its earlier and later stages in fulness of knowledge as to the nature of the redemptive work by which the salvation intrusted to God shall be accomplished; and as naturally there occurs a very great variety of forms of statement in which trust in the God of salvation receives expression. Already, however, at the gate of Eden, the God in whom the trust of our first parents is reposed is the God of the gracious promise of the retrieval of the injury inflicted by the serpent; and from that beginning of knowledge the progress is steady, until, what is implied in the primal promise having become express in the accomplished work of redemption, the trust of sinners is explicitly placed in the God who was in Christ reconciling the world unto Himself (2 Co 5¹⁹). Such a faith, again, could not fail to embrace with humble confidence all the gracious promises of the God of salvation, from which indeed it draws its life and strength; nor could it fail to lay hold with strong conviction on all those revealed truths concerning Him which constitute, indeed, in the varied circumstances in which it has been called upon to persist throughout the ages, the very grounds in view of which it has been able to rest upon Him with steadfast trust. These truths, in which the 'Gospel' or glad-tidings to God's people has been from time to time embodied, run all the way from such simple facts as that it was the very God of their fathers that had appeared unto Moses for their deliverance (Ex 4⁶), to such stupendous facts, lying at the root of the very work of salvation itself, as that Jesus is the Christ, the Son of God sent of God to save the world (Jn 6⁸⁹ 8²⁴ 11²¹. 42 13¹⁹ 16²⁷. 30 17⁸. 21 20³¹, 1 Jn 5¹⁵), that God has raised Him from the dead (Ro 10⁶, 1 Th 4¹⁴), and that as His children we shall live with Him (Ro 6⁸). But in believing this variously presented Gospel, faith has ever terminated with trustful reliance, not on the promise but on the Promiser,—not on the propositions which declare God's grace and willingness to save, or Christ's divine nature and power, or the reality and perfection of His saving work, but on the Saviour upon whom, because of these great facts, it could securely rest as on One able to save to the uttermost. Jesus Christ, God the Redeemer, is accordingly the one object of saving faith, presented to its embrace at first implicitly and in promise, and ever more and more openly until at last it is entirely explicit and we read that 'a man is not justified save through faith in Jesus Christ' (Gal 2¹⁶). If, with even greater explicitness still, faith is sometimes said to rest upon some element in the saving work of Christ, as, for example, upon His blood or His righteousness (Ro 3²⁵, 2 P 1¹), obviously such a singling out of the very thing in His work on which faith takes hold, in no way derogates from its repose upon Him, and Him only, as the sole and sufficient Saviour.

The *saving power* of faith resides thus not in itself, but in the Almighty Saviour on whom it rests. It is never on account of its formal nature as a psychic act that faith is conceived in Scripture to be saving,—as if this frame of mind or attitude of heart were itself a virtue with claims on God

for reward, or at least especially pleasing to Him (either in its nature or as an act of obedience) and thus predisposing Him to favour, or as if it brought the soul into an attitude of receptivity or of sympathy with God, or opened a channel of communication from Him. It is not faith that saves, but faith in Jesus Christ: faith in any other saviour, or in this or that philosophy or human conceit (Col 2¹⁶. 18, 1 Ti 4¹), or in any other gospel than that of Jesus Christ and Him as crucified (Gal 1⁸. 9), brings not salvation but a curse. It is not, strictly speaking, even faith in Christ that saves, but Christ that saves through faith. The saving power resides exclusively, not in the act of faith or the attitude of faith or the nature of faith, but in the object of faith; and in this the whole biblical representation centres, so that we could not more radically misconceive it than by transferring to faith even the smallest fraction of that saving energy which is attributed in the Scriptures solely to Christ Himself. This purely mediatory function of faith is very clearly indicated in the regimens in which it stands, which ordinarily express simple instrumentality. It is most frequently joined to its verb as the dative of means or instrument (Ac 15⁹ 26¹⁸, Ro 3²⁸ 4²⁰ 5² 11²⁰, 2 Co 1²⁴, He 11³. 4. 5. 7. 8. 9. 11. 17. 20. 21. 23. 24 || 27. 28. 29. 30. 31); and the relationship intended is further explained by the use to express it of the prepositions *ἐκ* (Ro 1¹⁷. 17 3²⁵. 30 4¹⁶. 16 5¹ 9³⁰. 32 10⁶ 14²³. 23, Gal 2¹⁶ 3⁷. 8. 9. 11. 12. 27. 28 5⁵, 1 Ti 1⁵, He 10³⁸, Ja 2²⁴) and *διὰ* (with the genitive, never with the accusative, Ro 3²². 25. 29, 2 Co 5⁷, Gal 2¹⁶ 3¹². 26 3⁷, 2 Ti 3¹⁵, He 6¹² 11²³. 39, 1 P 1⁵),—the fundamental idea of the former construction being that of source or origin, and of the latter that of mediation or instrumentality, though they are used together in the same context, apparently with no distinction of meaning (Ro 3²⁵. 26. 30, Gal 2¹⁶). It is not necessary to discover an essentially different implication in the exceptional usage of the prepositions *ἐν* (Ac 3¹⁶, Ph 3⁹) and *κατά* (He 11⁷. 13, cf. Mt 9²⁰) in this connexion: *ἐν* is apparently to be taken in a quasi-temporal sense, 'on faith,' giving the occasion of the divine act, and *κατά* very similarly in the sense of conformability, 'in conformity with faith.' Not infrequently we meet also with a construction with the preposition *ἐν* which properly designates the sphere, but which in passages like Gal 2²⁰, Col 2⁷, 2 Th 2¹³ appears to pass over into the conception of instrumentality.

So little indeed is faith conceived as containing in itself the energy or ground of salvation, that it is consistently represented as, in its *origin*, itself a gratuity from God in the prosecution of His saving work. It comes, not of one's own strength or virtue, but only to those who are chosen of God for its reception (2 Th 2¹³), and hence is His gift (Eph 6²³, cf. 2⁸. 9, Ph 1²⁹), through Christ (Ac 3¹⁶, Ph 1²⁹, 1 P 1²¹, cf. He 12²), by the Spirit (2 Co 4¹³, Gal 5⁵), by means of the preached word (Ro 10¹⁷, Gal 3². 9); and as it is thus obtained from God (2 P 1¹, Jude 3, 1 P 1²¹), thanks are to be returned to God for it (Col 1⁴, 2 Th 1³). Thus, even here all boasting is excluded, and salvation is conceived in all its elements as the pure product of unalloyed grace, issuing not from, but in, good works (Eph 2⁸⁻¹²). The place of faith in the process of salvation, as biblically conceived, could scarcely, therefore, be better described than by the use of the scholastic term 'instrumental cause.' Not in one portion of the Scriptures alone, but throughout their whole extent, it is conceived as a boon from above which comes to men, no doubt through the channels of their own activities, but not as if it were an effect of their energies, but rather, as it has been finely phrased, as a gift which God lays in the lap of the soul. 'With the heart,' indeed, 'man believeth unto righteousness'; but this be-

lieving does not arise of itself out of any heart indifferently (Mt 13¹), nor is it grounded in the heart's own potencies; it is grounded rather in the freely-giving goodness of God, and comes to man as a benefaction out of heaven.

The effects of faith, not being the immediate product of faith itself but of that energy of God which was exhibited in raising Jesus from the dead and on which dependence is now placed for raising us with Him into newness of life (Col 2¹²), would seem to depend directly only on the fact of faith, leaving questions of its strength, quality, and the like more or less to one side. We find a proportion, indeed, suggested between faith and its effects (Mt 9²⁹ 8¹³, cf. 8¹⁰ 15²³ 17²⁰, Lk 7⁹ 17⁶). Certainly there is a fatal doubt, which vitiates with its double-mindedness every approach to God (Ja 1⁶⁻⁸, cf. 4⁸, Mt 21²¹, Mk 11²³, Ro 4²⁰ 14²³, Jude 22). But Jesus deals with notable tenderness with those of 'little faith,' and His apostles imitated Him in this (Mt 6^{30f.} 20 14³¹ 16³ 17²⁰, Lk 12²⁸, Mk 9²⁴, Lk 17⁵, cf. Ro 14¹⁻², 1 Co 8⁷, and see DOUBT). The effects of faith may possibly vary also with the end for which the trust is exercised (cf. Mk 10⁵¹ *ἵνα ἀναβλέψω* with Gal 2¹⁶ *ἐπιστρέψαμεν ἵνα δικαιωθῶμεν*). But he who humbly but confidently casts himself on the God of salvation has the assurance that he shall not be put to shame (Ro 11¹¹ 9³³), but shall receive the end of his faith, even the salvation of his soul (1 P 1⁹). This salvation is no doubt, in its idea, received all at once (Jn 3³⁶, 1 Jn 5¹²); but it is in its very nature a process, and its stages come, each in its order. First of all, the believer, renouncing by the very act of faith his own righteousness which is out of the law, receives that 'righteousness which is through faith in Christ, the righteousness which is from God on faith' (Ph 3⁹, cf. Ro 3²² 4¹¹ 9³⁰ 10³⁻¹⁰, 2 Co 5²¹, Gal 5⁵, He 11⁷, 2 P 1¹). On the ground of this righteousness, which in its origin is the 'righteous act' of Christ, constituted by His 'obedience' (Ro 5¹⁸⁻¹⁹), and comes to the believer as a 'gift' (Ro 5¹⁷), being reckoned to him apart from works (Ro 4⁹), he that believes in Christ is justified in God's sight, received into His favour, and made the recipient of the Holy Spirit (Jn 7³⁹, cf. Ac 5³²), by whose indwelling men are constituted the sons of God (Ro 8¹³). And if children, then are they heirs (Ro 8¹⁷), assured of an incorruptible, undefiled, and unfading inheritance, reserved in heaven for them; and meanwhile they are guarded by the power of God through faith unto this gloriously complete salvation (1 P 1⁴⁻⁵). Thus, though the immediate effect of faith is only to make the believer possessor before the judgment-seat of God of the alien righteousness wrought out by Christ, through this one effect it draws in its train the whole series of saving acts of God, and of saving effects on the soul. Being justified by faith, the enmity which has existed between the sinner and God has been abolished, and he has been introduced into the very family of God, and made sharer in all the blessings of His house (Eph 2^{13f.}). Being justified by faith, he has peace with God, and rejoices in the hope of the glory of God, and is enabled to meet the trials of life, not merely with patience but with joy (Ro 5¹⁴). Being justified by faith, he has already working within him the life which the Son has brought into the world, and by which, through the operations of the Spirit which those who believe in Him receive (Jn 7³⁹), he is enabled to overcome the world lying in the evil one, and, kept by God from the evil one, to sin not (1 Jn 5¹⁹). In a word, because we are justified by faith, we are, through faith, endowed with all the privileges and supplied with all the graces of the children of God. (See further the articles on the several stages of the saving process.)

LITERATURE.—Schlatter, *Der Glaube im NT* (includes a section on 'Der Glaube vor Jesus') is the most comprehensive work on the biblical idea of faith. The general subject is also treated by Lutz, *Biblische Dogmatik*, 312; H. Schultz, 'Gerechtigkeit aus dem Glauben im A. u. NT' (in *JDTA*, 1862, p. 510); Hofmann, *Schriftbeweis*, i. 381; Riehm, *Lehrbr. d. Hebräerbr.* 709; Cremer, *Bib. Theol. Lex. v. πίστις, πίστις*; Hatch, *Essays in Biblical Greek*, 83. For OT, cf. the relevant sections in the treatises on *OT Theology*, especially those of Oehler, H. Schultz, Riehm, Dillmann; and the commentaries on the passages, especially Delitzsch on Genesis and Habakkuk. For NT, cf. Luther, 'Zw^o und *πίστις* im NT' (in *JDDTh*, 1872, p. 182), and the relevant sections in the general treatises on *NT Theology*, especially those of Neander (*Pflanzung*, etc.), Schmid, Reuss, Weiss, Beyschlag, Holtzmann, and in the treatises on the theology of the several NT writers, such as Wendt, *The Teaching of Jesus*; Usteri, *Paulinischer Lehrbegr.*; Pfeiderer, *Paulinismus*; Stevens, *The Pauline Theology*; Lipsius, *Paulinische Rechtfertigungslehre*; Schnedermann, *De fidei ratione ethica Paulina*; Hausleiter, 'Was versteht Paulus unter christlichem Glauben?' (in *Greifswalder Studien*, p. 159); Riehm, *Lehrbegr. d. Hebräerbr.*; Reuss, 'Die Johan. Theologie' (in *Beiträge zur d. Theol. Wissenschaft*, i. 56); Köstlin, *Lehrbegr. Johann.*; Weiss, *Der Johann. Lehrbegr.*; Stevens, *The Johannine Theology*; Weiss, *Der Petrin. Lehrbegr.*; also such commentaries as Rückert on *Romans*; Sanday, *Headlam on Romans*; Lightfoot on *Galatians*; Haupt on *1 John*; Mayor on *James*; Spitta on *James*. The whole body of doctrinal discussion may be reviewed in De Moor, *Commentarius in J. Marckii Compendium*, iv. 287 f.; cf. also John Ball, *A Treatise of Faith* (3rd ed. London, 1637); Julius Köstlin, *Der Glaube, sein Wesen, Grund und Gegenstand* (1859), and *Der Glaube und seine Bedeutung für Erkenntnis, Leben und Kirche* (1891). For some interesting historical notes, see Harnack, 'Die Lehre von der Seligkeit allein durch den Glauben in der alten Kirche' (in *Zeitschrift. f. Theol. u. Kirche*, 1895, p. 88); E. König, *Der Glaubensact des Christen* (1891); and for a general survey, Cunningham, *Historical Theology*, ii. pp. 56 ff.

B. B. WARFIELD.

FAITHLESS occurs only Mt 17¹⁷, Mk 9¹⁹, Lk 9⁴¹, Jn 20²⁷, and always in the sense of 'unbelieving' (*ἀπίστος*). So Shaks. describes Shylock (*Mer. of Ven.* II. iv. 37) as 'a faithless Jew,' i.e. not 'untrustworthy,' but 'infidel,' an unbeliever in Christianity.

J. HASTINGS.

FALCON.—RV tr. of *פֶּה אַיָּהּ*, Lv 11¹⁴, Dt 14¹³ (AV 'kite'), Job 28⁷ (AV 'vulture'). See GLEDE, HAWK, KITE, VULTURE.

G. E. POST.

FALL.—In the sense of *happen*, 'fall' is both a Heb. and an Eng. idiom. It occurs Ru 3¹⁸ 'Sit still, my daughter, until thou know how the matter will fall'; and 2 Es 13³⁸ 'such things as fall in their seasons.' Cf. Mt 18¹³, Wyc. 'if it fall that he find it,' and Shaks. *Jul. Cæs.* III. i. 243—

'I know not what may fall; I like it not.'

Fall away is used in two senses. 1. To lose a position of goodness or of grace. The Greek is either *ἀφίστημι*, Sir 16⁷ 'the old giants who fell away in the strength of their foolishness' (RV 'revolted'), Lk 8¹⁵ 'in time of temptation fall away'; or *παραιστανω* which occurs in the LXX of Est 6¹⁰, Wis 6⁹ 12³, Ezk 14¹³ 15⁸ 18²⁴ 20²⁷ 22⁴, and 2 Mac 10⁴ [A], and once in NT, He 6⁸ 'it is impossible for those who were once enlightened . . . if they shall fall away, to renew them again unto repentance,' where the meaning is more than is found in the LXX, not merely falling into grievous sin, but renouncing the faith of Christ wholly (see Davidson, *in loc.*). 'A falling away' (RV 'the falling away') is the Eng. tr. of *ἡ ἀποστασία*, 2 Th 2³, on which see MAN OF SIN. 2. To 'fall away to,' varied with 'fall to,' or 'fall unto' (2 K 7⁴ 'let us fall unto the host of the Syrians'), is to desert to an enemy. It is again both a Heb. and an Eng. idiom. See 2 K 23¹¹=Jer 52¹⁵, 1 Ch 12¹⁹ *bis*, Jer 21⁹ 37¹³⁻¹⁴ 38¹⁹, as well as 1 S 29³, where the Heb. (if *לָ* or *לָי* is added after LXX *πρὸς με*) is the same, always some part of *לָ* to fall. For the Eng. cf. Shaks. *Henry VIII.* II. i. 129—

'Where you are liberal of your loves and counsels,
Be sure you be not loose; for those you make friends,
And give your hearts to, when they once perceive
The least rub in your fortunes, fall away
Like water from ye.'

Again, *Henry VIII.* III. iii. 209—

'And as for Clarence, as my letters tell me,
He's very likely now to fall from him.'

J. HASTINGS.

FALL (*παράπτωμα*, a word used of Adam's transgression in Wis 10³, though not restricted to this anywhere in OT or NT).—Few chapters of the Bible have affected religious speculation more continuously and more deeply than the chapter which records the temptation and the weakness of primeval man. It would be out of place here to discuss all the topics which arise out of Gn 3, as to do so would be to write a treatise on Christian Theology. We can only consider—(i.) the character of the record, and its relation to other accounts of man's primitive state, which have come down to us from early times; (ii.) the influence of the story of Paradise and the Fall upon Hebrew belief as to man's destiny and his condition in the sight of God; (iii.) the inferences drawn by the NT writers, and notably by St. Paul, from the story of Adam's sin, read in the light of Christ's redemption. It will be impossible to give more than the briefest summary (iv.) of the interpretations of St Paul's doctrine of the Fall which have most widely affected Christian thought; but something must be said, in conclusion, (v.) of the bearing of modern theories of the origin and development of man upon the general doctrine of the Fall explained in Scripture and received by the Church.

i. We briefly recapitulate the leading points of the narrative in Gn 2⁴-3, which forms the first section in Gn incorporated from the source described by critics as the Prophetic Code (J). Adam and Eve, the parents of the human family, are represented as living in innocence and peace in a fair garden where sin had not entered, and where death had no power, for in its midst stood the Tree of Life, of which they were permitted freely to eat. The fruit of one tree alone, the Tree of the knowledge of good and evil, was forbidden to them; and death was declared to be the penalty of disobedience. But their happy condition of purity and of fellowship with God did not remain undisturbed. The serpent seduced the woman to disobey the divine command; she, in turn, tempted her husband to his fall. And then came upon the guilty pair the consciousness of sin and the fear of the divine wrath, which they vainly tried to evade by excuses for their fault. The voice of God is heard, pronouncing a curse upon the serpent, and declaring a perpetual strife between it and mankind; the man and the woman, for their sin, are for ever subjected to pain in the fulfilment of their destiny, the woman in her childbearing, the man in his daily labour for daily bread. They are both expelled from Eden, and the Cherubim guard its gates against them, lest, eating of the tree of life, they should live for ever. The picture, however, is lightened by one ray of hope; for the seed of the serpent shall not finally prevail over the seed of the woman. 'It shall bruise thy head,' though 'thou shalt bruise his heel.'

Traditions of a state of primeval innocence, of man's fall from his pristine purity, and of the consequent entrance of death into the world, have, it is said, been gathered by travellers from races far removed from Hebrew literature or its sources.* Striking parallels to Gn 3 are to be found in the Zoroastrian legends as to the beginning of man's career. Yima, the first man, is said to have passed his days in a primeval paradise. But after a time he committed sin, was cast out of Paradise, and delivered up to the serpent (identified with an evil spirit), who finally brought about his death. A

* See Baring Gould's *Legends of OT Characters*, i. 26-39, and the references there given.

later version of the story is told in connexion with the first pair Maslia and Mashyana. The lying spirit grew bold, and, presenting himself a second time, brought them fruits, which they ate. As a punishment, of the hundred privileges they formerly enjoyed only one was left to them.* Few of the parallel stories that are adduced are, however, so exactly recorded as these; and we are inclined to believe that the similarities to the Bible narrative are often overstated. The fact that many people in many lands have sought to explain the existing disorders in the world as the consequence of man's lapse from a higher condition is deeply significant, and we shall return to it again. But the details of the legends in which such belief is embodied are not, as a rule, interesting save to the curious student of folk-lore, and they throw little light upon Scripture. It is to Assyria and the East that we naturally look for illumination. And it has been pointed out that the mythology of Babylonia and Assyria presents some curious parallels to the story of the serpent in the garden of which we read in Gn 3. On Assyrian inscriptions are found the names *Diglat* = Hiddekel, and *Bura* = Euphrates, in connexion with the word *Idinu* or 'field,' which is identified with Eden. Coniferous sacred trees appear frequently on Assyr. bas-reliefs and Bab. representations of a mythological character. On a Bab. stone cylinder, now in the British Museum, two human figures are depicted with a serpent behind them, having their hands stretched out towards the fruit that hangs from a neighbouring tree.† And the serpent figure is conspicuous in the legend of the Chaldean tablets in which the evil serpent, Tiamat, is overthrown by Merodach. (See COSMOGONY, p. 505.) If the third Creation Tablet were not so extremely difficult to decipher as it is reported to be (partly in consequence of its fragmentary condition), it is probable that we should be able to trace in the story which it records even more striking similarities to the Scripture narrative. But Oriental scholars are not as yet entirely in agreement as to the translation of some of the more interesting portions of it; and the inferences that may be derived from the passage now to be cited must therefore be regarded as somewhat uncertain. The following is the rendering of Boscauwen ‡:—

'In sin one with the other in compact joins,
The command was established in the garden of the God,
The Asnan (fruit) they ate, they broke in two;
Its stalk they destroyed;
The sweet juice which injures the body.
Great is their sin. Themselves they exalted;
To Merodach their Redeemer he appointed their fate.'

If this translation be trustworthy, we have here something very like the biblical story of the forbidden fruit; but the rendering given by Pinches differs in some significant particulars. We recall, for our warning, that an inscription interpreted by Geo. Smith as a Bab. version of the story of the Fall turned out, when closely examined by Oppert, to be a hymn to the Creator.§ Making all due allowances, however, for uncertainty of translation, it seems probable, when we bear in mind the affinity of the earlier Creation Tablets to Gn 1, as well as the other points of contact with

* Compare Lenormant, *Histoire Ancienne de l'Orient*, i. 30 ff.

† There is a photograph of this in Boscauwen's *Bible and the Monuments*, p. 89. It is to be borne in mind that there is nothing to suggest that the figures are not both males. And, as Schrader (*KAT*² p. 37) points out, a specific feature of the Bible narrative, viz. that the woman gave the fruit to the man, is not indicated.

‡ *Babylonian and Oriental Record*, iv. 251. Another translation by Pinches is given at p. 32. See also Sayce, *Ancient Monuments*, 65, 104; and Davis, *Genesis and Semitic Tradition*, p. 65, who questions the accuracy of Boscauwen's rendering, and urges that we have here no true parallel to the Genesis narrative. § See, for original, Delitzsch, *Assyrische Lesestücke*², p. 91.

the story of Eden to which we have adverted, that a legend of the fall of man, resembling in external features the account of Gn 3, was widely spread in Mesopotamia. Indeed, in another passage cited by Boscawen we are inevitably reminded of the victory over the serpent of Gn 3¹²—

'Tiamat, whom he had bound, then turned backward;
So Bel trampled on the belly of Tiamat;
With his club unstung he smote her brain,
He broke it, and caused her blood to flow;
The north wind bore it away to secret places.'*

There is nothing to surprise reason or to embarrass faith in the fact—if it be a fact—that traditional beliefs about the origins of human history should have been utilized in a purified form by the compiler of the Pent. or taken up into the Prophetic Code. It must be remembered that the period with which we are dealing is strictly prehistoric, and also that legendary history is not necessarily false or misleading. The truly remarkable circumstance is, that the early narratives in Gn are free from the extravagant and grotesque mythological accretions which generally gather round ancient beliefs among primitive peoples; and that every touch in these narratives as we have them conveys a deep religious truth. The 'inspiration of selection' is a phenomenon which every candid student of Scripture must recognize; and nowhere is its presence more instructive than in the first pages of OT, which present the early history of man in a form that can be understood by the simplest, and yet may be studied with spiritual benefit by the wisest of mankind.

We believe, then, that we have in the biblical record of the Fall a purified form of legendary narrative concerning man's early history which had wide currency among Semitic peoples. In an uncritical age it was interpreted literally, and it has been counted historical for many generations by the majority of those, whether Jews or Christians, who accept the authority of the OT. But another method of interpretation, viz. the allegorical, has had many adherents. Thus, of the account of the Fall, Philo asserts: *ἔστι δὲ ταῦτα οὐ πλάσματα μύθων, οἷς τὸ ποιητικὸν καὶ σοφιστικὸν χερσὶ γέρονος, ἀλλὰ δείγματα τύπων ἐπ' ἀλληγορίαν παρακαλοῦντων κατὰ τὰς δι' ὑπονοειῶν ἀποδόσεις* (*De mundi opificio*, § 56), i.e. 'These things are not mere fabulous myths, but rather types shadowing forth some allegorical truth.' And, accordingly, he explains that Adam represents the rational and Eve the sensuous part of man, the serpent being the symbol of pleasure. The Christian teachers of Alexandria, Clement and Origen, favoured this allegorical mode of interpretation; but Tertullian and Irenæus defended the literal truth of the narrative, as also did Augustine, who did not, however, reject the typical significance of OT history; and through the scholastic philosophy it passed into the dogmatic theology of the Reformation. But the opinion that, however the story was intended to be taken by the compiler of the Bk. of Genesis, it might be interpreted as a parable of spiritual truth, has been defended by great names in every age of the Church.†

There are, then, these several methods of interpretation—(1) that the narrative of the Fall is literal history; (2) that it is a legend, which conveys truth under mythological disguise; (3) that it is, and was only intended to be, an allegory. The first and third can hardly be adopted in the present condition of exegesis, and it is probable that the second view of the narrative is that which is now most generally accepted by those who have studied the subject. That the biblical form of the legend should represent the facts as they actually

* *Bible and the Monuments*, p. 90.

† See an interesting note in Coleridge's *Aids to Reflection*, p. 171 (ed. Bohn).

took place more closely than the parallel stories which have been collected from the literature of the ancient world, is not surprising to any believer in the unique character of Scripture; but it is not to be forgotten that it is the great religious truths which underlie the narrative that are of real importance, and these are brought out in the Bk. of Genesis in a quite unique fashion.

ii. The allusions in OT to the story of Gn 3 are few and uncertain. If the rendering of the RV may be pressed, there are indeed two undoubted references to the Fall, viz., 'If like Adam I covered my transgressions' (Job 31³³), and, 'But they like Adam have transgressed the covenant' (Hos 6⁷). But it seems that, at least in the former passage, *אָרָם* should be rendered 'after the manner of men,' and this rendering would also be admissible in Hos 6⁷; so that we have to look elsewhere for allusions to the Paradise narrative on which stress may be laid. The 'garden of Eden' is mentioned several times by the prophets of the Captivity (Ezk 28¹³ 31⁹, Is 51³, cf. Jl 2²); and the Bk. of Proverbs occasionally mentions a 'tree of life' (see esp. Pr 3¹⁸ 11³⁰). Ps 90⁸ and Ec 12⁷ have been supposed to take up the language of Gn 3¹⁹. It is possible also that we have a reminiscence of the curse upon the serpent (Gn 3¹⁴) in Mic 7¹⁷ 'They shall lick the dust like a serpent,' and in Is 65²⁵ 'Dust shall be the serpent's meat,' though the latter passage may be derived from Micah. The conception of a personal tempter of mankind appears in the story of Job and also in 1 Ch 21¹ (see also Zec 3¹); but it is not until a later period that we come upon any explicit identification of 'Satan' or the 'Adversary' with the 'serpent,' the first trace of such being Wis 2²⁴. Cf. also Rev 12⁹ and Ro 16²⁰ 'The God of peace shall bruise Satan under your feet shortly,' which manifestly has reference to Gn 3¹⁵.*

So far, then, as the language of OT is concerned, we have not convincing evidence that the story of the Fall as given in Gn 3 was much in the thoughts of the sacred writers. But were we to conclude, therefore, that the doctrine of a Fall formed no part of their religious beliefs, we should be seriously mistaken. If there is one idea which is throughout conspicuous in OT, it is the idea of *sin*. No other nation of antiquity was possessed with so intense a consciousness of the wickedness of mankind, and of the sin of man as an offence against God. 'Behold, I was shapen in iniquity; and in sin did my mother conceive me' (Ps 51⁵). 'There is none that doeth good, no, not one' (Ps 14³). These and many similar passages express the abiding sense of the Hebrew race, that man, as he is, is not in the condition which his Creator purposed for him. The contrast between such a conception of man and that, e.g., present to the mind of a Greek, who viewed man as in his normal, healthy state, is only to be accounted for by a belief such as that which is presupposed and taught in the story of the Fall.

That this belief was, as a matter of fact, definitely, if not consistently, connected with the Paradise narrative in the later ages of Hebrew national life, is proved by the testimony of the books called *Apocrypha* and the literature of the Roman period. This testimony is so important that it will be well to present it in some detail.

(a) It is unnecessary to multiply passages which speak of the *depravity of human nature*; but 2 Es 4¹ 'How can he that is already worn out with the corrupted world understand incorruption?' is significant. Cf. also 2 Es 7²⁸.

(b) This depravity was traced to Adam's fall. The classical passage is 2 Es 3²¹⁻²². The seer has

* It may be observed that the temptation of the Second Adam by the devil (Mt 4, Lk 4) explains beyond doubt who was understood by the serpent which tempted the first Adam.

been speaking of the creation of Adam, his dwelling in Paradise, the one commandment which he transgressed, and the consequent entrance of death into the world. He goes on: 'For the first Adam, bearing a wicked heart, transgressed, and was overcome; and not he only, but all they also that are born of him. Thus disease was made permanent; and the law was in the heart of the people along with the wickedness of the root; so the good departed away, and that which was wicked abode still.' Again: 'A grain of evil seed was sown in the heart of Adam from the beginning, and how much wickedness hath it brought forth unto this time!' (2 Es 4³⁰). And once more: 'O thou Adam, what hast thou done? for though it was thou that sinned, the evil is not fallen on thee alone, but upon all of us that come of thee' (2 Es 7^{12b}). In this late book are recognized the moral consequences of Adam's sin; in the much earlier work of Ben-Sira there is an allusion to the curse of Gn 3¹⁹ 'Great travail is created for every man, and a heavy yoke is upon the sons of Adam' (Sir 40³).

(c) That sin came through the *woman* is explicitly stated in Sir 25²⁴ 'From a woman was the beginning of sin, and because of her we all die.'

(d) That man's seduction was due to the serpent, now for the first time in Jewish literature identified with Satan, is alluded to in Wis 2²⁴ 'By the envy of the devil death entered into the world.'

(e) The connexion between *death* and *sin* is not so clearly conceived, and there was, apparently, no consistent doctrine on the subject;* but the generally prevailing view seems to have been that of 2 Es 3⁷ 'Unto him thou gavest thy one commandment: which he transgressed, and immediately thou appointedst death for him and in his generations.' Cf. also Wis 2²⁴, Sir 25²⁴. The same view is found in the *Apocalypse of Baruch* (xvii. 3, xxiii. 4) and in the *Book of Enoch* (xcviii. 4).

(f) Side by side with passages such as these we have others not less significant, which assert the *personal responsibility* of the sinner. *E.g.* 'They that inhabited the city did evil, in all things doing as Adam and all his generations had done: for they also bare a wicked heart' (2 Es 3²⁵). Cf. also 2 Es 8⁵⁹ and 9¹¹, and, above all, *Apoc. Baruch* liv. 19: 'Non est ergo Adam causa, nisi animæ suæ tantum; nos uero unusquisque fuit animæ suæ Adam.'

It might be urged that 2 Es is a very late book, perhaps belonging to Christian times; but, at all events, that the author of the chapters from which our quotations are drawn was a non-Christian Jew is tolerably certain. And thus we may use the book in support of our conclusion that the Jews, at least from the Captivity onward, conceived of the sin of Adam as having left a permanent trace from the effects of which all mankind were suffering and to suffer.

iii. When we come to the NT, and especially to the Pauline Epistles, we find that this doctrine of the effects of Adam's fall receives at once explanation and relief in the facts of the Incarnation and the Atonement. If we take the points in the order followed in the last section, we see (a) that the universal depravity of mankind is everywhere presupposed, and is the basis of the argument of the Ep. to the Romans. To (b) we shall return again, and only cite here 1 Co 15²² 'As in Adam all die, so also in Christ shall all be made alive.' (c) finds illustration in two passages: 'the serpent beguiled Eve in his craftiness' (2 Co 11³), and 'Adam was first formed, then Eve; and Adam

was not beguiled, but the woman being beguiled hath fallen into transgression' (1 Ti 2¹⁴). (d) St. Paul refers to the 'bruising of Satan' in Ro 16²⁰; and the devil is spoken of as 'a murderer from the beginning' in Jn 8⁴⁴. Cf. also 1 Jn 3⁸⁻¹². We then come to (e), as to which the classical passage in NT is Ro 5¹²⁻²¹. A commentary on these difficult verses cannot be written here; but certain broad principles laid down by St. Paul, who is undoubtedly following and interpreting the narrative in Gn 3, can hardly be mistaken.* That through one man sin entered into the world is his starting-point. Death came through sin (cf. Ro 6²³ and Ja 1¹⁵); and hence death is the common lot of man, first, because of his own personal sin; and, secondly, because it is part of the inheritance which Adam has transmitted to his descendants. At the same time, St. Paul is careful to insist (f) that man's personal responsibility for his own acts, and for his own acts alone, remains unimpaired. He does not supply any theory by which the two complementary truths of man's inherited tendency to evil and man's free will may be reconciled; but he leaves them side by side as equally parts of the doctrine which it has been given him to teach. And he goes on to show that the distinctive feature of the gospel is that 'if by the trespass of the one the many died, much more did the grace of God, and the gift by the grace of the one man, Jesus Christ, abound unto the many.' Thus the theology of St. Paul is inextricably bound up with the doctrine of the Fall. The whole point of the comparison and contrast of the first and second Adam is lost, if the destinies of the human race were not deeply affected by a backward step at the beginnings of human history, if it be not true that man's growth in holiness may be described as a recovery effected through grace.

iv. The interpretations of St. Paul's language which have from time to time been accepted by Christians are various; and they depend in part on the view that is taken as to the state of un-fallen man, and the divine intention for him. It would be agreed by most theologians that, to use the language of the Church, the 'original righteousness' of which Adam was deprived, was, although in part natural, yet in part *supernatural*. That is to say, he is represented as divinely endowed with a virtuous character, without any such bias towards evil as we experience in ourselves. This is what constituted the unique perversity and heinousness of the first sin, and it is because of this that his sin is counted a 'fall' from a higher spiritual condition. His sin had a disturbing influence on the whole future development of the race, but the character of the disturbance has been differently estimated in different schools of thought. Speaking broadly, the Greek view was simply that the 'original righteousness' of the race was lost; the effect of Adam's sin was a *privatio*, an impoverishment of human nature which yet left the power of the will unimpaired. But the Latin writers who followed Augustine took a darker view of the consequences of the Fall. It is, for them, a *depravatio nature*; the human will is disabled; there is left a bias towards evil which can be conquered only by grace. And this is, undoubtedly, nearer to the language of Scripture than the former mode of representing the facts; but it was not always remembered, *e contra*, in Augustinian theology that the 'image of God' remained in man even after the Fall (Gn 9⁶). It is therefore contrary to Scripture to represent man as *wholly* corrupt. And a deep

* See Edersheim, *Life and Times of Jesus the Messiah*, i. 165 ff.

* For St. Paul's argument, as also for the witness of the *Apocrypha* to the doctrine of man's corruption, see Sanday-Headlam, *Romans* (ch. v.).

and serious question arises here as to the relation between the Fall and the Incarnation. It may well be, as the Scotists taught, that it is unjustifiable to represent the high destiny which man may find in Christ as an after-thought in the divine counsels. The Incarnation may have been, for anything we can tell, the predestined climax of humanity, independently of human sin. Bearing these considerations in mind we return to Ro 5¹²⁻²¹, and the various theories which have been proposed in explanation. They may be classified thus—*

(a) It is urged that St. Paul's language requires us to conceive of the human race as *in Adam* potentially, in the same sense as the oak is in the acorn. Hence, for what he did, we may be counted responsible. The race, not the individual, is the true unit; it is with this unit that God deals. Thus, *e.g.*, David sinned in numbering Israel, but his people were the sufferers from the divine punishment. The words of our Lord in Lk 13²⁻⁴ suggest to us that there is such a thing as *national* responsibility, apart from the guilt of individuals. Most apposite of all, Levi is said to have paid tithes 'through Abraham' (He 7⁹⁻¹⁰). And in this conception of the solidarity of mankind there is, beyond question, a profound truth which is becoming more intelligently and sincerely accepted as the social teaching of the Incarnation is being opened out. 'As in Adam all die, so also in Christ shall all be made alive' (1 Co 15²²), are words which point to the unity of the human race as the root of the universality both of sin and of redemption. But we must be careful not to state this so as to do violence to our God-given sense of justice. This is the fault, *e.g.*, of teaching like that of Jonathan Edwards, who spoke of a psychological no less than a physical unity between Adam and his posterity. Ultimately based, as in Augustine, on a mistranslation of Ro 5¹² (*in quo* as the rendering of ἐφ' ᾧ) and on the adoption in the Vulg. of the word *imputare*, familiar from its use in the courts of Roman law, this teaching may readily become either ultra-mystical or ultra-rationalistic. It becomes ultra-mystical, if the unity of the human race be so spoken of as to conceal the all-important fact that it is only for a person that morality has any intelligible meaning. It becomes ultra-rationalistic, when the phrases 'imputation of sin' and the correlative 'imputation of righteousness' are used as if sin and righteousness were transferable from one person to another. Sin is predicable only of a *person*, not of human *nature*; and the warning of Ezekiel, 'The soul that sinneth, it shall die,' needs to be ever kept in view. St. Paul does not teach that we are accomplices in Adam's sin or partakers of his guilt without a co-operation of our own will, although it be at the same time awfully true that we inherit from him a degraded nature. The abiding truth in the interpretation given by Augustine of St. Paul's teaching as to the Fall, is the truth of the unity of mankind. In this Adam is τῆς τοῦ μέλλοντος.

(b) Again, the effect of Adam's fall upon his posterity has been explained by speaking of Adam as *representative* of the race. 'The covenant was made with Adam as a public person, not with himself only, but for his posterity.' But the question arises, How could Adam, in justice, bind his posterity to a covenant of which they were not cognizant? A federal compact of this sort could only bind us, if we had empowered Adam to act on our behalf. And if it be urged that in Adam's case we should have done the same as he, and therefore may justly be punished for what he did, it may be replied that this is a gratuitous assump-

tion, which goes perilously near to depriving the original transgression of moral blame by representing it as inevitable. Here is an important consideration which must not be overlooked. All profitable speculation on the subject of the Fall must recognize frankly its voluntary character. Adam was not necessitated to act as he did; otherwise his action would not involve moral responsibility.

(c) We come, then, to the view which is at once most widely accepted and most consonant to all the facts. It is, substantially, the view expounded by John of Damascus. We inherit from our first parents a degraded nature, so degraded that it is for us much harder to overcome sin than it was for Adam. For this inherited depravity of nature we are not responsible; we have inherited it in spite of ourselves. Hence the world is in a 'state of ruin,' and can be remedied only through grace. But we are not, therefore, *guilty*; guilt is incurred only when the evil is voluntarily embraced, when we take up Adam's sin by repeating it, as it were, in our own persons. The rule of Augustine, *Peccatum poena peccati*, continually receives verification. Coleridge has pressed this view somewhat further. 'It belongs,' he says, 'to the very essence of the doctrine that in respect of original sin every man is the adequate representative of all men' (*Aids to Reflection*, p. 194). And he holds that Adam's fall is a typical experience repeated afresh in every son of Adam. *Mutato nomine, de te fabula narratur*. The corruption, he urges, 'must be self-originated.' There is an important sense in which this is true; but it is not the whole truth. It is deficient in recognition of the far-reaching character of the first sin. We are not at all in the same spiritual condition as that of the first man; we do not enter on the conflict with evil on the same terms. Our whole attitude to God is different from that of Adam, although we be still 'sons of God.' As the schoolmen put it, in the case of Adam the *person* corrupted the *nature*; with us it is the *nature* which corrupts the *person*. Man is still free, but man is *sick* with a sickness which is displeasing to the All-pure; and for healing of this sickness only a supernatural remedy will suffice. As our Lord taught in the Sermon on the Mount (cf. also Mt 15¹⁹), the real seat of sin is within, the heart is the seat of the moral life (cf. Ps 73³⁷, Pr 4²³), although the translation of thought into act involves a fresh and distinct step in responsibility.* The advocates of the more rigorous Augustinian doctrine have been accustomed to designate this view as semi-Pelagianism; but it is free from the essential fault of the teaching of Pelagius, on which we say a final word.

(d) Pelagius is represented as having held that the infant enters on life crippled in no appreciable degree by any inherited infirmity or waywardness of the will. He begins the world with powers sufficient to cope with the machinations of the evil one. And thus, in so far as he does wrong, it is his own fault; in so far as he does right, he is deserving of approbation. It would seem that Pelagius and his disciples seriously underestimated the influence of Adam's fall on human nature at large. That this nature as corrupt and the seat of sin must be of itself and when unregenerate displeasing to the All-holy, they did not perceive with clearness. And though men, happily, do not always push their opinions to their logical conclusions, the result of such teaching as this would be the denial of any need of grace or of redemption.†

v. We pass on to the question, How far is the

* See for a fuller classification, Schaff in Lange's *Romans* (Eng. tr. p. 191).

* See Hort's *Life and Letters*, ii. 330 f.; see also i. 78.

† See Neander's *Church History*, iv. 331 ff.

doctrine of the Fall affected by modern theories as to the evolution of the human species from lower and less developed types? It has been too often hastily assumed that the belief in the continuity of animal forms is inconsistent with belief in any special prerogative of man, and is still more incompatible with a doctrine which represents his history as having been retrogressive at one point. But neither of these positions can be established.

The doctrine of the evolution of species is not yet to be counted as more than an extremely probable hypothesis, by which the phenomena of life and growth become intelligible. Many details are, as yet, very obscure, and the laws of inheritance have not by any means been clearly and fully expounded. See HEREDITY. And the application of this doctrine to the descent of man is beset with peculiar difficulties, which cannot be said, as yet, to have been solved. But we are, nevertheless, content in this article to treat of the subject of man's early history in the light of this wonderful law. Evolution may not be the final word of science as to the laws of growth; but it expresses well the results to which investigation has so far attained. We conceive, then, of primeval man as a creature descended from brute ancestors, some of whom he closely resembled in instinct and habit as well as in structure. But there was one marked difference. In him there was present the faculty of self-consciousness; he was conscious of a reason which can make provision for a foreseen future, and of a will which is not necessarily determined by the strongest physical desire. Man is made *in the image of God*, although his bodily lineage be that of the ape-like creatures whom he sees round him. If we may illustrate the facts of his growth by a mathematical illustration, we shall say that the curve of his progress is a continuous curve, upon which he has come to a critical point. At this critical point the curvature seems to change its character; in other words, the man finds himself possessed of faculties which are not, so far as he can judge, the direct product of his former history. They are, to use at once the simplest and the truest words, the gift of God. There may be, perhaps, absolute and visible continuity between the bodily form of the man and of the higher apes; but continuity cannot be so exactly traced in his mental development. There has been a *μετάβασις εἰς ἄλλο γένος*, however it has come about. Henceforth he is not only an animal, but a man. If it be said that it is not scientific to postulate a *saltus* of this kind, it may be asked, Why not? The law of continuity is not a fetish before which we are called to prostrate ourselves; it is nothing more than a convenient working hypothesis, which we find it necessary to desert in this instance, as in others where it will not serve our purpose. And, indeed, it is by no means certain that to the Supreme Mind there is here apparent any breach of continuity whatever. The law may be obeyed, in fact, though the sequence may not be within our observation.

A creature thus emerging from a lower animal condition, even though endowed with the divine gifts of self-conscious reason and free will, would not, indeed, be perfect. He would be, at the earliest stage of a new period of growth, already raised above the ape, but still far removed from the civilized European of modern life. But then we remark that the narrative of Genesis nowhere describes the first man as perfect. When South said that 'Aristotle was but the rubbish of an Adam, and Athens but the rudiments of Paradise,'* he was not drawing his picture from Scripture. Neither OT nor NT speak of Adam as

perfect, though they speak of him as innocent and pure (cf. Ec 7²⁹). And this was perceived by early Christian commentators. Theophilus of Antioch says that God placed Adam in Paradise διδοὺς αὐτῷ ἀφορμὴν προκοπῆς ὅπως αὐξάνων καὶ τέλειος γενόμενος, κ.τ.λ. (*Ad Autol.* ii. 24); and Clement of Alexandria states (*Strom.* vi. 12. 96) that Adam 'was not made perfect in respect of his constitution, but in a fit condition to receive virtue.'* This relation to God has been well described as not a state of perfection or a mere disposition, but 'a living commencement which contained within itself the possibility of a progressive development and a fulfilment of the vocation of man.'†

Such a state of things is so far removed from anything of which we have experience that we find ourselves continually at fault in the effort to imagine or to describe it. But we must, at least, suppose it to have been a condition in which man obeyed freely the law of that nature to which he had attained; the ideas 'right' and 'wrong' hardly presented themselves to his mind with full meaning, for 'the knowledge of good and evil' was not yet his. It may well have been that the image of God was a gift only germinally bestowed and gradually realized. Man did not come all at once into his splendid inheritance. In the Paradise narrative he is depicted as still at an early stage in his history. He is represented as living a life of communion with God, conscious, as it would seem, that he 'ought' to obey the laws of God, which, as yet, were presented in the simplest and most elementary form; but the consciousness of moral obligation could only be half realized where the knowledge of evil was not present. So far there is nothing in the story which would conflict with the teaching of science, whether physical or mental. In his primitive condition, man would have been able to recognize only the simplest moral commands. He was forbidden to taste of the fruit of 'the tree of the knowledge of good and evil': for so perilous an experience he was not prepared. And, in the absence of temptation from without, it was perhaps possible that this state of purity should have continued. The man's nature, though not developed to perfection, though not strong with the discipline which time and experience bring, was perfectly balanced; and in obeying its dictates he would obey the dictates of his Creator.

How into such a world could evil enter? That is the question which has vexed philosophy from generation to generation. It is a question to which no final or complete answer has been given. But the record of revelation at least puts the difficulty one step further back; it points to the region where the solution is to be sought. In the Bible the fall of the angels precedes the fall of man (Jude⁶). Temptation came into human life through the machination of a spirit of evil distinct from man. The invitation to sin came from the serpent in the garden, and it took the form of a suggested violation of the command known to be divine. Sin is not an indigenous product, but is brought in *ab extra*, somewhat as it has been suggested that life was first brought to the earth in a meteoric stone. According to the Bible, the origin of evil is to be sought outside human nature.

We are not now in a region where science has anything to tell us. We have only the brief phrases of Scripture as our guide. And it will be observed that we cannot say positively that the temptation would not have been self-suggested, as the man grew in faculty and in strength, had there been no malign influence external to himself.

* See Gibson, *Thirty-Nine Articles*, p. 366.

† Martensen, *Christian Dogmatics*, § 78.

* Sermon on Gn 127.

We do not know, and cannot know. What is told is this. The man was in a state of innocence and purity, and the suggestion to sin came, as a matter of fact, in the first instance from a personal agency of evil outside the domain of his own will.

Here, then, is ignorance of evil dispelled, whichever course the man adopted. For the conscious refusal of evil, no less than its acceptance, would in a measure involve a knowledge of evil. An apostolic writer speaks of the *τέλειος*, or perfect man, as one 'who by reason of use has his senses exercised to discern good and evil' (He 5¹⁴). True, there would be no personal realization of evil were it not consciously embraced. But its existence must henceforward be definitely conceived. And we may notice that whether man yielded to the temptation or overcame it, in any case he would have advanced a step in knowledge. To yield was a spiritual fall; to resist would have been a spiritual rise. But in any case the new experience would be an intellectual rise. This is a principle which has formed the starting-point of some remarkable speculations as to the Fall both in mediæval and modern times. The philosopher Erigena seems to have had a confused perception of this truth when he taught that sin was relatively necessary for the development of human nature. Schiller, again, interpreted the Fall as the necessary transition of reason from the state of nature to that of culture. The necessity of evil is a prominent feature in the Hegelian philosophy, according to which the life of the world is conceived as inevitably developing itself through antagonism and conflict. This is the *Divina Commedia* of human history, the perpetual tragedy of life. And theologians have pointed out that in Scripture itself the origin of the arts of civilization and of peace is traced to fallen and not to unfallen man. Tubal-cain, 'the forger of every cutting instrument in brass and iron,' and Jubal the father of musicians, are the descendants of Cain (Gn 4^{21, 22}). The truth which seems to underlie speculations such as these is that man would not begin to progress rapidly, in an intellectual point of view, until he became conscious of the resistance to his energies which evil presents. But this consciousness would not have been less intense had he overcome the temptation which assailed him instead of yielding to it. It is only the man who has successfully battled with evil that is conscious of its full strength, for upon him alone has it spent all its powers. And thus to assert that *sin* was relatively necessary for the development of human nature, is to confuse the yielding to temptation with the experience of it. Had primeval man been strong when evil presented itself, we know not to what heights of intellectual, as of spiritual excellence, the race might not have now attained. In this view only is it true that the first temptation marks the 'beginning and the foundation of the development of *mind*, the birth of man's intellectual nature.'^{*}

We find, then, that the doctrine of the Fall, when subjected to examination, is in no way inconsistent with the theory of the evolution of man from lower types, and his growth 'from strength to strength' as the centuries have gone by. There has been a continuous intellectual development. When the pre-Adamite ancestor of the human family was fitted to receive the divine gift of reason, it was granted to him. Like Christ, Adam came *in the fulness of time*, when all things were ready. Up to this point the evolution had been unconscious; henceforward it was to be conscious, and partly assisted by voluntary effort.

^{*} See Matheson, *Can the Old Faith live with the New*, p. 219 ff., where the argument of this paragraph is developed at length.

And the first experience of evil, explicitly recognized as evil, would afford a fresh starting-point for his growth. For such experience of evil, as has been said, would in any event—whether it was conquered or the conqueror—involve a rise in the intellectual scale. Had it been overcome, as it might have been overcome (for the act of Adam is represented as one of free choice), there would have been a rise in the spiritual scale as well. But in the event there was intellectual growth, accompanied by a descent to a lower spiritual level, from which it would be impossible for man to rise without the aid of divine grace. And so the Incarnation and the Atonement mark in the history of mankind a crisis as real, and introduce a force as potent, as when God *created man in His own image*.

Such a view of man's progress is in the strictest harmony alike with the Bible and with the teaching of modern science. For it is to be remembered that what science teaches us is that the history of man has been a history of development, but it does not and could not teach that this development has proceeded along the best conceivable lines.* It is no postulate of modern philosophy that this is the best of all possible worlds. And the Christian doctrine, that man as he presents himself to us in history and in life, though his education through the centuries has been divinely ordered, is not in the condition which was the divine intention for him, is a doctrine which receives verification from daily observation. The divine will has been thwarted, so to speak, by the perversity of the human will. And this has been recognized as the key to the problem of evil by men of all races and creeds. For what is the spectacle which the world of men presents? Newman has described it well in a splendid passage of his *Apologia* (ch. v.): 'To consider the world in its length and its breadth, its various history, the many races of man, their starts, their fortunes, their mutual alienation, their conflicts; and then their ways, habits, governments, forms of worship; their enterprises, their aimless courses, their random achievements and acquirements, the impotent conclusion of long-standing facts, the tokens so faint and broken of a superintending design, the blind evolution of what turn out to be great powers or truths, the progress of things, as if from unreasoning elements, not towards final causes, the greatness and littleness of man, his far-reaching aims, his short duration, the curtain hung over his futurity, the disappointments of life, the defeat of good, the success of evil, physical pain, mental anguish, the prevalence and intensity of sin, the pervading idolatries, the corruptions, the dreary, hopeless irreligion, that condition of the whole race, so fearfully yet exactly described in the apostle's words, "having no hope and without God in the world,"—all this is a vision to dizzy and appal; and inflicts upon the mind the sense of a profound mystery, which is absolutely beyond human solution. What shall be said to this heart-piercing, reason-bewildering fact? I can only answer, that either there is no Creator, or this living society of men is in a true sense discarded from His presence.' The 'outcast man' is, in short, the Great Exception. While every other living thing is striving for its good, man alone is found choosing what he knows to be for his hurt. And so to the believer in God his own experience confirms the eternal truth of the doctrine of the Fall. As Pascal says, 'De sorte que l'homme est plus incon-

* See Gore, *Lux Mundi*¹⁰, pp. 535, 536, and the passage there cited from Aubrey Moore's *Evolution and Christianity*: 'the change which took place at the Fall was a change in the moral region; but it could not be without its effect elsewhere. Even the knowledge of nature becomes confused without the governing truth of the relation of man to God.'

cevable sans ce mystère, que ce mystère n'est inconcevable à l'homme.' That doctrine is indeed a *datum* of revelation; but it harmonizes well with what we know of ourselves and of others. There has been somewhere a backward step in the history of man, who was at the first created 'very good.' And the teaching of St. Paul about sin, stated in terms of the story of Gn 3, but based on the broad ground of observation and experience, gives, as we have seen, the *rationale* of this fact, and brings it into line with the revelation of the gospel. There are two points on which it is necessary to add a few concluding remarks.

(1) St. Paul, following Gn 2¹⁷ and 3¹⁹, states that death came through sin (Ro 5¹²⁻¹⁴). It is tolerably plain that by 'death' he means physical death, although it has been interpreted of the death of the soul (see Sanday, *in loc.*). And he here seems to come into collision with natural science, which teaches that death must have been known upon the earth long before the human species appeared. For ages before the creation or evolution of man, death in the case of the lower animals must have been a necessary concomitant and condition of life. It is not apparent, however, that this touches St. Paul's argument; for he is speaking of the death of *man*. And in the case of man it may well be that had he remained faithful to the law of his being, as communicated to him by his Creator, death would have had no dominion over him. As has been said already, of the condition of primeval man we have little information; it was so utterly unlike anything of which we have experience that confident statements would be out of place. But, at all events, the death of a being made *in the image of God* is a phenomenon of an order entirely different from the death of a beast. Death is the portion of the latter; it is part of the divine intention for him. Not so, for man. For him there is a further destiny in store. And his sin, as it involves alienation from God, involves the withdrawal of that higher life which has been the assurance of immortality. We do not assert of Adam the *non posse mori*, but the *posse non mori*, as long as his fellowship with God, the source of life, was unbroken. But sin reduced him to the state of a lower animal, and thus man became the prey of death. It may well be that, as has been surmised by many of the profoundest of Christian philosophers, there is some intimate connexion between moral evil and physical decay for a composite being such as Scripture represents man to be. And in the Fall of Adam his whole race were thus involved; death passed upon them, not indeed as a *punishment* for something which a remote ancestor had done, but as the inevitable *consequence* of the sin of the head of the race. They inherit a degraded nature, which is subject to the laws of physical dissolution as is the nature of a beast. But 'man's normal condition, according to the OT, is not mortality, with the possibility of attaining immortality by a later gift; but life in God's fellowship, with the possibility of losing it and falling into a condition of an existence which is not life.'* It is not by any means clear that it is within the power of natural science to negative this view.

(2) What may prove a more serious difficulty arises in connexion with the origin of the human race from a single pair, which seems to be presupposed in St. Paul's exposition of the parallelism between Adam and Christ. True, the unity of the race is not disproved by science; and it is believed by many on purely scientific grounds to be more probable than the hypothesis that mankind are descended from several pairs. But if the latter doctrine should command at any time the assent of the scientific world, it would be necessary to

modify in some degree what has been said. This article has been written on the assumption that there is nothing contradictory to science in the doctrine of the unity of the human race as descended from common parents. This is certainly the doctrine expounded by St. Paul. But it is a matter which comes within the province of science; and should it ever be disproved, it would be necessary to admit that the apostle was using an illustration not scientifically apt in all respects. It must be observed, however, that in essentials nothing would have to be changed. The great truths, that sin began with the beginning of our race, that its baneful influence has been transmitted from generation to generation, that it is as widespread as mankind itself, that it cannot be eradicated without a gift of grace, are unaffected whether 'Adam' be taken as the name of a single individual, or as a term descriptive of the forefathers of the human species. The universality of sin is a sufficient indication that human nature has been corrupted at its base, whether by the fall of one or of several; and it would still remain true that 'as in Adam all die, so in Christ shall all be made alive.' So much it has been deemed necessary to say, although at present the balance of evidence seems distinctly to favour the doctrine that mankind are descended from one common stock, and so to confirm the analogy drawn out by St. Paul. See also ADAM, ATONEMENT, JUSTIFICATION, HEREDITY, PARADISE, SACRIFICE, SIN.

LITERATURE.—In addition to the books already mentioned, the following may be consulted with profit: Ryle, *Early Narratives of Genesis*; Orr, *Christian View of God and the World*; Laidlaw, *The Bible Doctrine of Man*; Müller, *Christian Doctrine of Sin*. The subject is discussed in all treatises on Systematic Theology.

J. H. BERNARD.

FALLOW-DEER.—This word occurs in the AV among the clean animals (Dt 14⁵), and in the list of game furnished for Solomon's daily table (1 K 4²³). In each list 'ayyâl, zēbi, and yahmâr occur in the same order. The first is correctly translated, both in AV and RV, *hart* (see HART). The second is incorrectly tr. in AV *roe buck*, and correctly in RV *gazelle* (see GAZELLE). The third is incorrectly tr. in AV *fallow-deer*, and, we think, correctly in RV *roe buck* (see ROEBUCK).

G. E. POST.

FALSE WITNESS.—See LYING, OATH.

FAME.—The Gr. word φήμη (from φημί, to declare, say) was used for a divine voice, oracle, and then for a report or common saying. The Lat. word *fama*, beginning, where φήμη left off, with rumour or report, added to that the meaning of reputation or renown. The Eng. word 'fame,' though it once had all the meaning of Lat. *fama*, now retains only the sense of renown or celebrity. Thus in modern Eng. 'fame' is never a fair equivalent for φήμη.

That in 1611 'fame' had the meaning (1) of report, and (2) also of renown, is certain. Thus: (1) Sir T. Elyot, *The Governour*, 1531 (Croft's ed. ii. 291), says, 'all Greece was in great fear for the fame that was sprad of the commynge of the Persians with an infinite armye.' So Tindale's tr. of Mt 24⁹ (ed. of 1534) is, 'Ye shall heare of warres, and of the fame of warres' (Gr. ἀκοάς; Wyc. 'openyouns'; Tind. 1526 'noyse'; Cran. 'tidinges'; Rhem. 'bruites'; Gen., Bish., AV, RV 'rumours'). And Bacon (*Adv. of Learning*, ii. xxiii. 19) says, 'General fame is light, and the opinions conceived by superiors or equals are deceitful; for to such men are more masked; *verior fama e domesticis emanat.*' Again (2) in Shaks. (*Troilus and Cressida*, III. iii. 228), Achilles says—

'I see my reputation is at stake;
My fame is shrewdly gored';

* Salmon, *Christian Doctrine of Immortality*, p. 220.

and in *Henry V.* III. ii. 13, Pistol sings, 'And sword and shield, In bloody field, Doth win immortal fame'; to which the Boy replies, 'Would I were in an ale-house in London! I would give all my fame for a pot of ale and safety.'

In AV both meanings appear, but the former most frequently. The only manifest examples of the meaning 'renown' are 1 K 4³¹, 1 Ch 14¹⁷ 22²⁵, Zeph 3¹⁹, where the Heb. is *shēm* 'a name.' When the Heb. is *shēma'* (Nu 14¹⁵, 1 K 10¹, 2 Ch 9¹, Job 28²², Is 66¹⁹), *shōma'* (Jos 6²⁷ 9⁴, Jer 6²⁴), or *shēmū'ah* (1 K 10⁷, 2 Ch 9⁶), the meaning is not very distinctly marked, but the Heb. words are properly report, tidings (lit. 'hearing'); and in Job 28²² (RV 'rumour') as well as in Jer 6²⁴ that is manifestly the sense. It is evident also that in the only remaining OT passage, Gn 45¹⁶ (where the Heb. is *kōl*, lit. 'voice'), the sense is report. In NT that sense is probably the only one that occurs. The Gr. words are (1) *φήμη*, Mt 9²⁶, Lk 4¹⁴, the only examples of the word, which is nearly as rare in LXX (Pr 16² [for *shēmū'ah*], 2 Mac 4³⁰, 3 Mac 3², 4 Mac 4²²), with the verb *διαφημίζω*, Mt 9²¹ (*διεφήμισαν αὐτόν*, 'they . . . spread abroad his fame'); Wyc. 1380 'thei . . . defameden hym,' 1388 'thei . . . diffameden hym,' from Vulg. *diffamaverunt eum*). (2) *ἀκοή*, lit. 'hearing,' Mt 4²⁴ 14¹, Mk 1²³ (RV always 'report'). (3) *ἦχος*, 'echo,' Lk 4²⁷ the only occurrence of this meaning (RV 'rumour'). (4) *λόγος*, 'word,' Lk 5¹⁵ (RV 'report'), which has this meaning also in Mt 28¹⁵, Jn 21²⁸ (EV 'saying'). In Apoc., on the other hand, we find only 1 Mac 3²⁶⁻⁴¹, both with the mod. sense of renown (Gr. *ὄνομα*, 'name').

RV adds Jer 50⁴⁸ (Heb. *shēma'*) for AV 'report.' 'Fame' is the Wyclifite trⁿ of 1388 here, 'report' having come from the Geneva Bible of 1560.

J. HASTINGS.

FAMILIAR.—'Familiar spirit' is the tr. in EV of Heb. *'ōbh* wherever it occurs (except Job 32¹⁹ where in plu. it means 'skin-bottles,' EV 'bottles,' RVm 'wine skins'), on which see Driver on Dt 18¹¹ and art. DEMON; also Van Hoonacker, 'Divination by 'Ob,' in *Expos. Times*, Jan. 1898. 'Familiar' has in this phrase the sense of the Lat. *familiaris*, belonging to one's family, and so to oneself, ready to serve one as a *famulus* or servant. The oldest example in *Oxf. Eng. Dict.* is Stow, *Chron.* (1565) 107, 'A familiar spirit which hee had . . . in likeness of a Catte.' But it is found in Geneva Bible of 1560, 1 S 28⁷ ⁶ etc., whence it passed into AV. Similar phrases seem to be older, as *Prose Legends in Anglia*, viii. 146 (14—), 'Hir famylier aungel thet hadde hir in kepyng'; and Capgrave, *Chron.* 25 (1460), 'That same familiar devel.'

In Jer 20¹⁰ we find the subst. 'familiars' (Lat. *familiares*), 'All my familiars watched for my halting,' for which RV gives 'familiar friends' as the same Heb. is tr. in Ps 41⁹ AV and RV.

The Heb. is lit. 'man (or men) of my peace.' It occurs also Jer 38²², Ob 7. The most instructive occurrence is no doubt Ps 41⁹, and the meaning is there at least not simply 'acquaintances, those to whom I should give the ordinary salutation, Peace be with you' (Streane); but rather, as Cheyne, those who are specially attached to me by a covenant.

Illustrations of the subst. 'familiars' are Knox, *Hist.* 38, 'they would chop their familiars on the cheeke with it [the New Testament]'; and Hos 10¹⁴ Cov. 'All thy stronge cities shalbe layed waist, euen as Salmana was destroyed with his familiars.'

J. HASTINGS.

FAMILY.—i. SCOPE, TERMS, AND DATA.—The term *family* is used in many different senses: (a) For larger or smaller groups of persons connected by blood or marriage, from the family in the narrowest sense—a man with his wives and children, and sometimes his mother—to the widest

aggregate of kinsfolk between whom relationship is traced—the clan, tribe, nation, or even the human race. (b) In a looser sense for communities living in close and permanent intercourse, from the household—including dependants as well as kinsfolk—to the clan, etc., including persons not of the main stock. (c) In various fig. senses with which we are not concerned here. OT recognizes and connects the groups denoted by *family* in (a) and (b), but has no single term for them; still less has it any term corresponding to the Eng. *family*. *בַּיִת* *house*, approaches most closely to the range of meaning of *family* in (a) and (b); in Gn 7¹ Noah with his wife and sons and daughters-in-law are called his *house*; we have also the *house* of David 2 S 3¹, of Levi (i.e. tribe) Nu 17³, of Israel (i.e. the nation) Ex 16³¹. In P and Ch *בָּתָּר*, RV *fathers' house*, is a technical term for a subdivision of a tribe. The origin of these terms in the concrete dwelling connects them with (b), cf. similar use of *טֵנֶת* *tent*, in Ps 78²⁷ 83⁶. So also *הֶקְדָּשִׁים*, EV *family*, is explained (Ges., Fuerst) as etymologically a *union*, obsolete *אָרַב* *to join*, but Buhl connects with Arab. *sapaha*, *to pour out*, and with *הֶקְדָּשׁ*. 'ר is strictly a *clan*, and is used in P and late writings (Nu 2, etc.) for the largest division of a tribe; but its meanings also range from the clan to the tribe (Jg 13²) and the nation (Jer 33²⁴). Other terms are derived from the physical tie between kinsfolk, and connect with (a), *זָרַע* *seed* (Gn 12⁷), *עֵצ* *bone* (Gn 29¹⁴), *בָּשָׂר* *flesh* (Gn 29¹⁴), *בָּשָׂר* *flesh* (Lv 18¹²), with its derivative *בָּשָׂרָה* (Lv 18¹⁷), in the sense of blood-relation; the compounds of *בָּר* *bear*, *beget*, *בְּרִיָּה* *offspring* (Gn 48⁶), *kinsfolk* (Gn 31⁸), *בְּרִיּוֹת* *clans* (Nu 1²⁰). Also, young children collectively are *רַגְלָיִם* *take quick short steps*. *אֵלֶּיָּה* (Ezk 11¹⁵) is a misreading (Cornill, etc. *i.l.*).

This brief statement as to terms shows how the family was bound up with all the social and political arrangements of Israel. Hence it is difficult to draw any natural line of division between the family and other social and political groups, whose institutions are expressed in terms of the family, and derived in fact or theory from it. Moreover, it is often maintained that the idea of the family originated in a social group larger than and different from that consisting of a single man with his dependent women and children. If this is in any measure true, the relations between the family (in the narrower modern sense) and the larger social groups will be still more complicated. This article will be confined, as far as possible, to the family proper, and the larger social groups will be dealt with in the art. TRIBE; but it will be necessary to make some allusion to the relations of the family to the clan, etc.

The data for our subject are the narratives of the family life, esp. of the patriarchs, of Ruth, of David, and of Tobit; the laws dealing with the family; and the various allusions to the subject. OT narratives are, of course, valid authorities for the manners of the times in which they originated, whatever view may be held as to their historicity. Unfortunately, however, both narratives and—in a less degree—laws mostly treat of royal, noble, or wealthy families and their slaves, and we have little direct information as to the poorer free Israelites. Doubtless, the same general principles governed family life amongst all classes, and the wealthy families and their dependants constituted a large proportion of the population; but we have always to bear in mind that the familiar OT pictures are concerned chiefly with certain classes, and that for other cases we must allow for the effect of inferior rank and smaller means.

ii. MEMBERS.—The members of a Heb. family or household included some or all of the following:

the man, as supreme head of the household; his mother, if residing with him after the death of his father; his wives; his concubines; the wives' children; the concubines' children; children of other women, e.g. Jephthah (Jg 11¹); daughters-in-law; sons-in-law, for example, Jacob with Laban; other free Isr. relatives, friends, or dependants; *gerim* or resident foreigners, EV 'the stranger that is within thy gates' (see GER); male and female slaves, Isr. and foreign, home-born and purchased. Thus the ancient Heb. was larger than the modern family; polygamy increased the number of women and children dependent on a single man; married sons and their families often remained in their father's household; the insecurity of primitive life led individual resident aliens, etc., to attach themselves to households.

(a) *Husband's Mother*.—מִתְּוֹתָם *hāmōth*, AV and RV *mother-in-law*. In Mic 7⁶ (quoted Mt 10²⁵, Lk 12⁵³) the *hāmōth* is perhaps the wife of the living head of the household; in Ru, Naomi, herself a widow, is the *hāmōth* of widows. But the *hāmōth* attained special importance and dignity when, after the death of her husband, her son became the head of the family. She was then the most important and influential woman in the household; a man had many wives, only one mother; he had been trained in deference and obedience to his mother; his wives were his property, and absolutely subject to his authority. They had often been selected by his mother, e.g. Ishmael's wife by Hagar (Gn 21²¹, cf. 2 Es 9⁴⁷). In the history of the families best known to us—the royal houses of Isr. and Judah—there are numerous indications of the exalted position of the mother of the reigning king. She bears the title מִתְּוֹתָם *mistress*. Her name is regularly given in the paragraph describing an accession, while nothing is said about the wives. Maacah, Jezebel, Athaliah, and Nehushta (2 K 24^{8, 12, 13}, cf. Jer 22²⁶) appear as exercising great influence in the reigns of their sons. The analogy of modern Eastern life fully warrants us in taking the position of the queen-mother as representing that of the mother of the head of any ordinary family. Sometimes a widow herself appears as head of a household, e.g. Micah's mother (Jg 17¹⁰), Naomi in Ru, the Shunammite (2 K 8¹⁻⁶), Tobit's grandmother (To 1⁸); cf. also the position of the mother of our Lord during His ministry.

(b) *Husband, Wives and Concubines*.—The generic terms אִישׁ, אִשָּׁה *man*, אִשָּׁה *woman*, are commonly used for husband and wife, as in most languages. This usage recognizes the fundamental nature of sexual characteristics. In spite of the similarity of the two words, *Oxf. Heb. Lex.* speaks of 'the impossibility of deriving אִשָּׁה and אִשָּׁה from the same root'; consequently, all deductions based on the reference of the two words to the same root are without any true foundation. The husband is אֲדֹנָי *master*, as supreme over his wives, who are slaves acquired by capture in war (Dt 21¹⁰⁻¹⁴), or by purchase (Gn 34¹⁶, Ex 22¹⁶, Dt 22²⁹, Ru 4¹⁰). It would be misleading to apply the term 'freewoman' to any Israelitess, except perhaps to a widow. Even in the Mishna, 'women, slaves, and children' are constantly grouped together, e.g. *Berachoth*, iii. 3, and 'a woman is always under the authority of her father until she is placed under the authority of her husband,' *Ketuboth*, iv. 3. The wife as in subjection to the *ba'al* is *be'alāh* (Is 54¹). The rights of a husband over his wives were limited by affection and custom, by the terms of the marriage covenant or contract (Gn 31^{49, 50}, To 7¹⁴), by the influence of the wife's family, also by certain specific laws. The marital supremacy involved the right of divorce at the husband's discretion. This is laid down in Dt 24¹, which, however, imposes

certain vague and obscure conditions, probably intended to discourage capricious divorce (Benzinger, *Heb. Arch.* 346). Is 50¹, Jer 3⁸ show that it was usual to give the divorced woman קְרִיאתָה 'a bill of divorce,' doubtless that she might be able to resist any attempt on his part to reclaim his rights over her, a divorced woman being in a sense an emancipated slave. Dt forbids a man to divorce his wife, if he has falsely charged her with unchastity before marriage (22^{13, 19}), or if he himself seduced her and had been compelled to marry her in consequence (22^{28, 29}). These enactments and the protest in Mal 2¹⁶ point to a frequency of divorce. A wife could not divorce her husband (Benzinger, 341). Other limitations of the husband's rights were that he might not marry a sister of one of his living wives (Lv 18¹⁸); if a man hears his wife make a vow and does not disallow it at once, he may not do so afterwards (Nu 30¹¹). Even if a woman has been purchased from her parents as a concubine (אִשָּׁה) and he does not wish to retain her, he may not sell her to strangers; he must either let her kinsfolk buy her back, or betroth her to one of his sons. If he takes another wife or concubine, he must either maintain the first in her full rights, or let her go free without payment (Ex 21⁷⁻¹¹). Even a captive who has been taken to wife may not be sold as a slave, but if sent away must be dismissed free of payment (Dt 21^{10a}). Similarly, in modern Arabia it is held disgraceful to sell a concubine. The rights of a wife would necessarily include those of a concubine.

No very clear information is given as to the relative status of wives and concubines. אִשָּׁה *woman*, is sometimes used as a general term for a wife or concubine (Gn 30⁴); sometimes for wife as distinguished from concubine (1 K 11³). The words אִשָּׁה (in Hex., chiefly ED), אִשָּׁה (in Hex., chiefly JP), and אִשָּׁה, seem to be practically synonymous when used of concubines. In households where the person of every female slave was—with few exceptions—at the disposal of the master (Benzinger, 162), and where the relative status of the women depended chiefly on his favour, definite and nicely graduated distinctions were impossible. Amongst modern Mohammedans, a man may cohabit with any of his female slaves who is a Mohammedan, a Christian, or a Jewess; and, conversely, he cannot have as a slave a woman whom he acknowledges to be within the prohibited degrees of marriage (Lane, *Arabian Nights*, i. 55, 56). The only definite advantage claimed by wives over concubines is that their children should inherit a larger share, or even the whole, of their father's property, e.g. Sarah's claim for Isaac (Gn 21¹⁰). Nevertheless the wife, because her position was the result of her husband's favour, and was often guaranteed by powerful relatives, would often enjoy superior consideration, and exercise a greater influence. Sarah, Rachel, and Leah had slave-girls, אִשָּׁה (shēphāhōth), who were their own property; and when these became concubines, they were still under the authority of their mistresses. Polygamy is both recognized by the law and described in the history; nearly all the kings and judges of whom we have particulars have a large harem. Acc. to Justin (*Trypho*, 134), even in his time Jewish teachers permitted each man to have four or five wives (cf. Jos. *Ant.* xvii. i. 2; Mishna, *Kedushin*, ii. 7, etc.). But considerations of expense and the approximately equal numbers of the two sexes place narrow limits on polygamy. Nowack (*Heb. Arch.* i. 159) points out that Abraham and Elkanah have two wives, that אִשָּׁה 'adversary' is a technical term for one of two wives, and that Dt 21^{15a} speaks of two wives, one beloved, the other hated. He thinks that such

bigamy would be very common. In the nature of the case, a large proportion of the population must have been monogamous; cf. the cases of Adam (Gn 2²²⁻²⁴), Noah and his sons (6¹⁸ 7¹³ 8¹⁸), Lot (19¹⁵), Isaac, and Joseph. Probably, the monogamy of these patriarchs is narrated as an example. The family quarrels arising out of polygamy are sufficiently illustrated from the familiar examples of Sarah and Hagar, Rachel and Leah, Hannah and Peninnah, and the family history of David (cf. Sir 37¹¹ 26⁷ where ἀντιζήλον = ἡρις). On the other hand, Heb. family life must be judged from the point of view of the ancient East, and not from that of the modern West. From the former, there was nothing immoral in polygamy, and the status of wives and concubines was neither regarded by others nor felt by themselves to be humiliating. The acrostic on the Capable Woman, *‘esheth hayil* (Pr 31¹⁰⁻³¹), testifies to the honourable position of the faithful wife.

We have little information as to the marriages of slaves; apparently, the tie between them was not very binding. A couple who had come into a master's possession as a married couple were to be released together at the end of six years; but if, after a man became a slave, his master married him to another slave, and children were born, the man either went away alone, or remained a slave for the sake of his family (cf. MARRIAGE, WOMAN).

(c) *Parents and Children.*—The etymologies of אב father, אִמָּה mother, are quite uncertain; they are common to most Sem. languages, are apparently connected with the terms for father and mother in the Aryan and other families of languages, and are probably older than the triliteral roots. אִם son and its fem. אִמָּה have been somewhat improbably connected with אָבָה to build; they too, also, are probably older than the triliteral roots. The father was supreme over the children; he could dispose of the daughter in marriage (Gn 29), [but (Lv 19²⁹) he might not make her a prostitute], and arrange his son's marriage (Gn 24), or sell his children as slaves (Ex 21⁷)—where, however, the father is forbidden to sell his daughter to a stranger (Neh 5⁹). The power of life and death is attested by the proposed sacrifice of Isaac, the case of Jephthah's daughter, and the practice of sacrificing children to Molech (Lv 18²¹ 20²⁻⁵, 2 K 23¹⁰, Jer 32³⁵). The utmost respect and obedience to both father and mother are insisted on in Ex 20¹², Lv 19³, Dt 5¹⁶, Pr 1⁸ 6²⁰ 19²⁶ 20²⁰ 23²² 28²⁴ 30¹¹⁻¹⁷, cf. Ezk 22⁷, Mic 7⁶. Similarly, Ex 21¹⁵⁻¹⁷, Lv 20⁹ direct that any one smiting or cursing father or mother shall be put to death; Dt 27¹⁶ invokes a curse upon any one who is disrespectful to father or mother. Pr 13²⁴ etc. insist on the duty of strict domestic discipline, though doubtless the 'rod' may be understood as including other chastisement besides corporal punishment (cf. Pr 17¹⁰). Dt 21¹⁸⁻²¹ directs that a stubborn and rebellious son, a glutton and a drunkard, is to be stoned to death by his fellow-citizens, on the testimony of his father and mother given before the elders. Such laws really imposed limits on the authority of the father; he must not himself put his son to death, but must procure his punishment by a public legal process. The constant co-ordination of father and mother in such passages practically places the mother on the same level with the father with regard to the children. Indeed, polygamy makes each mother much more important to her own children than their father is. In a polygamous family, each mother and her children form a sub-family,—Jacob's wives and concubines have separate tents (Gn 31²⁸),—the management of which is in the hands of the mother. Hence the early education and training of children was

mostly given by the mother. Children were named by the mother, e.g. Jacob's sons (Gn 29, 30); sometimes also by the father, e.g. Ishmael (Gn 16¹⁵), Isaac (Gn 21³). The long period of suckling—infants were not weaned till the second or third year—must have constituted an added bond between mother and children. The religious instruction appointed in Ex 12²¹⁻²⁷ 13⁸⁻⁹, Dt 4⁹ 6⁷. 20²⁻²⁵ 11¹⁹ would probably be given by the mother. The sayings of king Lemuel (Pr 31¹⁻⁹) were taught him by his mother. On the other hand, Pr constantly refers to the *māsār* (RV 'instruction') of the father, as well as to the *tôrāh* (RVm 'teaching') of the mother (1⁸). Acc. to the rank and wealth of the family, the care of the children would devolve in whole or in part on female slaves. Rebekah (Gn 24⁵⁹) and Joash ben-Ahaziah (2 K 11²) had each a foster-mother *mēneṯeth* (RV 'nurse'), though Rebekah, at any rate, had a mother living. Mephibosheth ben-Jonathan had an *‘ōmeneth* (RV 'nurse,' 2 S 4⁴). The grandmother, on either side, would, by all analogy, have much to say about the training of the children; Naomi became the *‘ōmeneth* of Ruth's baby (Ru 4⁶). We also have the masculine *‘ōmēn* (RV 'nursing father,' Nu 11¹², Is 49²³). From the analogy of the guardians of the sons of Ahab (2 K 10¹⁻⁵), and of Nathan (2 S 12²⁵), this would appear to have been a kind of tutor or *παδαγωγός*. Schools for children are first mentioned in Josephus (*Ant.* xv. x. 5) and Mishna (*Shab.* i. 3). Acc. to Talm. Jerus. (*Kethub.* viii. 11) the first school for children was established by Simeon ben-Shetach, a century before Christ (Stapfer, 141); acc. to Talm. Bab. *Baba Bathra* (Nowack, i. 172), a system of schools in every town was established by Jesus ben-Gamla, who became high priest in A.D. 64. In such schools reading and writing would be taught; any other instruction would mainly consist of committing Scripture, etc., to memory, by repeating passages after the teacher.

(d) *Brothers and Sisters.*—The circumstances of Israelite life—the need of labour to till the soil, and of warriors to defend the homestead from the raids of neighbouring tribes, rendered a large family a great blessing (Ps 127⁴⁻⁵). The natural checks—war, famine, and pestilence—prevented all danger of over-population. The labour of girls in the household, the price that might be obtained for them as wives or concubines, and the alliances with powerful neighbours that might result from their marriages, gave a certain value to daughters; but the Isr. father's chief desire was for sons; it was the first-born sons who were sacred to J^h (Ex 22²⁹). The physical token—circumcision—of the national covenant with J^h is such as can be borne only by males; a mother is unclean for 14 days after bearing a daughter, but only for 7 after the birth of a son. Daughters are very rarely mentioned by name.

Each sub-family of full brothers and sisters, the children of one mother, had interests of its own, which clashed with those of the other sub-families. Domestic friction was specially strong in the numerous smaller households where there were two wives, e.g. Hannah and Peninnah [cf. the term אָרְיָה (Dt 21¹⁵⁻¹⁷), and for two wives in a large household, Sarah and Hagar]. The relative status of the sub-families depended on the family relationships of the mother, the favour shown her by her husband, and in some measure on her being wife or concubine. We have already seen that claims were sometimes made that the children of a wife should oust those of a concubine from all or part of their share of the family inheritance. But these claims are not sustained by any legal ordinance or even by any general custom. The sons of Jacob's concubines rank as ancestors of tribes. It is true

that they are reckoned in a sense as children of their mothers' mistresses, but the same was true of Ishmael, who was excluded from the seed of the promise. There was no difference of legitimacy in our sense between the sons of wives and concubines; even Jephthah, the son of a *zōnāh* or prostitute, is brought up in his father's house, and his expulsion is evidently regarded as an act of unjust violence (Jg 11¹⁻⁷) (Benzinger, 148, 135). Apparently, all a man's acknowledged children were legitimate, without regard to the status of their mother. The bastard, *mamzēr* (Dt 23³ [EV²], Zec 9⁶), is generally regarded as the offspring of incest or adultery (Dillm. and Driver on Dt 23³). Possibly, however, *mamzēr* may include children of prostitutes, whose fathers were unknown or did not acknowledge them.

In earlier times polygamous sub-families were so distinct that brothers married half-sisters, e.g. Abraham and Sarah (Gn 20¹²). In 2 S 13¹³ Tamar thinks that David would certainly sanction her marriage with her half-brother. Such unions are, however, forbidden by Lv 18⁹.

The same causes which rendered the mother more important to her children than the father, often rendered the brothers the special guardians of their full sisters, e.g. Laban of Rebekah, Simeon and Levi of Dinah (Gn 34), Absalom of Tamar. So, children often maintained a close connexion with their mother's family, Jacob (Gn 27⁴⁸), Abimelech ben-Gideon (Jg 9¹), Absalom (2 S 3³, 13²⁷).

The sons were the heirs, but in the absence of sons the daughters might inherit, and after the daughters other male relatives in order of kinship (Nu 27¹⁻¹¹). A special birthright and a larger share of the inheritance were given to the first-born, both in the history (Gn 49³) and the law (Ex 22²⁹); but the *bēkhōrah*, or right of the first-born, was not purely a matter of priority of birth, it might be sold, e.g. by Esau to Jacob, or bestowed on a younger son by a partial father, Dt 21¹⁷—which forbids such a practice. Side by side, however, with the first-born, the youngest son constantly appears as the object of special favour, both from God and his parents, e.g. Abraham, Isaac, Bethuel, Jacob, Joseph, Ephraim, Moses, David, Solomon (cf. HEIR).

(e) *Married Children, Daughters-in-law, Sons-in-law*.—A married son would remain part of the father's family, though not necessarily of his household, while the father lived. He would still be in some measure subject to his authority. The patriarchs were married men with families when Isr. went down into Egypt, but Jacob was still the head of the family (cf. Job 1). So the daughter-in-law joined her husband's family and came under the authority of her father-in-law (To 10¹²), to whom she was subject even after her husband's death, e.g. Judah and Tamar (Gn 38). If her father-in-law was dead, she belonged to her brother-in-law or husband's next-of-kin (Dt 25⁵, Ru 3¹³), or might remain with her mother-in-law (Ru 1⁶). Sometimes, however, a man joined his wife's family, at any rate for a time, and fell under the authority of his father-in-law, e.g. Jacob (Gn 29-31), Moses (Ex 22²⁰⁻²² 4¹⁸, cf. Gn 24⁵; see § v.).

(f) *Other free Dependents*.—Doubtless, more distant relatives, cousins, etc., friends and free servants, would sometimes form part of the family in the narrower sense; but we have hardly any information on the subject. Little is said as to hired servants; probably they were hired only for short periods, and did not form part of the employer's family. Micah's Levite, indeed, was hired to be a priest permanently at a regular stipend, 'and the young man was unto him as one of his sons' (Jg 17¹¹). The resident alien, *gēr* (RV 'stranger'), *tōshābh* (RV 'stranger' or 'sojourner'), is constantly referred to, and is commended to the good

offices of the Israelites. The *gēr* is mentioned in close connexion with the other dependent members of the household (Ex 20¹⁰, Lv 25⁵). He seems to have placed himself under the protection of the family rather than the clan; he probably rendered some services in return for protection and sustenance, and may often have been a hired servant; he was evidently a familiar figure in Isr. society. The *gēr* was united to his hosts by close ties. His legal status and personal safety depended upon their protection, and they were bound by the sacred obligations of Eastern hospitality to care for him as for one of their own kin. He was entitled to the Sabbath rest (Ex 20¹⁰), and to eat the passover if he became circumcised (Ex 12⁴⁸). See GER, HIRED SERVANT, STRANGER.

(g) *Slaves*.—The slave was substantially one of the family. The master's authority over him did not differ essentially from that over wives and children, and the wife was purchased like the slave. Conversely, a female slave might become a concubine, and a male might marry his master's daughter (1 Ch 24³⁵), or become his heir (Gn 15³). Slaves were circumcised and ate the passover. The *yērah bayith*, or home-born slave, would have the closest, and the purchased Isr. slave, who had to be released at the end of six years, the loosest ties to his master's family. We gather, however, from Jer 34¹⁴ that the custom of releasing Isr. slaves was not strictly observed. See SLAVE.

iii. *MUTUAL RESPONSIBILITY*.—In primitive times the family, in a narrower or wider sense, was the efficient social organization; and such functions of modern government as were discharged at all were represented by the mutual claims and duties of kinsfolk. Many laws and customs of Isr. are a legacy from this primitive system. In ancient times the only protection for life or property lay in men's willingness to defend and avenge their kinsmen. This right and duty is still recognized in OT; the next-of-kin, *gō'el*, must punish his kinsman's murderer, marry his widow if the deceased was childless, and may inherit his property. See GOEL, and section on Levirate Marriage under MARRIAGE. One would suppose that this strong sense of family duty would have led kinsfolk to provide for destitute relatives. But men were often obliged to sell themselves or their children for slaves, and widows and orphans are constantly spoken of as poor, helpless, and oppressed. Doubtless, the ordinary calamities—drought, dearth, famine, pestilence, invasion—would often ruin whole clans at the same time; but it is also clear that family feeling was no adequate substitute for legal provision for the poor.

iv. *FAMILY RELIGION*.—As the nation had its religious symbol of circumcision, its sanctuaries, sacrifices, priests, and festivals, so the family had its special *sacra*. According to Benzinger, 137, and Nowack, 154, following Stade, etc., the Israelite family was essentially a society bound together by common religious observances, *Cultgenossenschaft*. Thus, in the patriarchal narratives, the patriarchs, as head of the family, erect altars and offer sacrifices; similarly, the passover was a family rite, observed in the home, often, of course, temporary. In 1 S 20²⁹ we read of clan-sacrifice, *zebah mish-pāhāh*, at Bethlehem. The family burying-place is sacred (Gn 23). Benzinger and Nowack see in the cutting off of the hair and the self-mutilation forbidden in Dt 14¹⁶, Lv 19^{27, 28}, remains of ancient ancestor worship; cf. the practice of necromancy (1 S 28). Teraphim are usually understood to have been images or symbols of ancestors. In later times the instruction directed to be given in Dt 6 would be matter for the family; and the regulations as to ceremonial cleanness

tended to make the whole personal and family life a continuous series of religious observances. The later system, however, differed from the former in that in primitive times each family had rites peculiar to itself, in later times all families practised the same rites.

v. EARLY HISTORY OF THE FAMILY.—Under the monarchy, the family was constituted under the headship of the father, who was supreme over wives and children, and primogeniture was recognized in the transmission of authority (royal, priestly, etc.) and property. The Hex. traces these institutions back to the origin of the human race in Adam and Eve; at the same time it preserves many incidents which have been held to point to an altogether different state of affairs in early times. It is maintained by W. R. Smith and others that the head of the family was originally the mother (mother-right, matriarchate), and that descent was traced only through the mother. Marriage was then polyandrous (of which the levirate marriage is supposed to be a relic), and *be'ena* marriage, in which the man becomes one of the wife's family, and goes into her tent (cf. § 7 and Gn 22^d), as opposed to *ba'al* marriage, where the wife enters her husband's family. This view is based partly on parallels amongst other primitive peoples, and esp. amongst the Arabs; and partly on various traces in OT, some of which have been already mentioned. In connexion with this theory, it has also been maintained that exogamous totem-clans existed in ancient Israel. Such clans are united by the use of a common badge, connected with some animal or plant after which the clan was named; intermarriage between members of the clan is regarded as incest, and the totem may not be eaten. One example cited is the clan Caleb (dog), the dog being unclean (Dt 14th), and its flesh forbidden food. Even if it should ultimately be proved that such theories are partly true, it is clear that *be'ena* marriages and totemism were obsolete and forgotten in historic Israel, and that they can be traced only in customs whose original significance was no longer understood.

vi. THE FAMILY IN APOCR. AND NT.—Throughout the Bible, but esp. in the later books of OT, in Apocr., and in NT, the sacred history refers incidentally to the family institutions of numerous Gentile nations; but any general treatment of these would be beyond the scope of biblical archaeology. Various subjects raise special questions of this nature, and these are dealt with in the articles on those subjects.

Our data do not point to any regular development in the later history of the Jewish family. Its character and principles were as permanent as social institutions mostly are in the East. Features of OT family life reappear in Apocr., NT, and Talm., and still persist amongst modern Arabs and Syrians. The family history of the Herods is very similar to that of David.

The Pent.—some of whose laws embody the most primitive customs of Israel—remained to the last the authoritative code of Judaism. Probably, however, much of the Pent. legislation was always a mere counsel of perfection, and other portions were obsolete in NT times. Often discussions in the Talm. are purely academic arguments on regulations which had no bearing on actual life. But if there was no continuous development of Jewish life, it would still vary with varying circumstances. For instance, under a strong, well-organized government, like that of some of the Jewish kings, of the Herods and the Romans, the jurisdiction of the head of the family and private blood-revenge would be controlled and limited. The settlement of a large Gentile population in Pal.,

and the dispersion of the Jews throughout the ancient world, would sometimes modify, sometimes also accentuate, the observance of Jewish customs. Probably, Western influences reinforced the tendency to monogamy, which we have already noticed in OT. It is doubtful whether 1 Ti 3^{2, 12}, Tit 1⁶ inculcate monogamy, cf. 1 Ti 5⁹. Our Lord's limitation of divorce (Mt 5^{31, 32}) followed the teaching of Shammai.

LITERATURE.—For the early history of the family, W. R. Smith, *Kinship and Marriage in Early Arabia*, and 'Animal Worship and Animal Tribes among the Arabs and in OT' in *Journ. of Philology*, vol. ix.; J. F. McLennan, *Primitive Marriage*, and the essay on 'Totem-Clans in OT' in Joseph Jacobs' *Studies in Bibl. Archaeology*; Bertholet, *Die Stellung d. Isr. u. Jud. z. d. Fremden*, esp. pp. 1-80. For the Bible history, the sections on the Family, and the laws of Marriage, Divorce, Parents and Children, etc., in Ewald, *Alterthümer*³ (Eng. tr. *The Ant. of Isr.* from 1st ed. 1844); Kell, *Handb. der Bibl. Arch.*² 1875; Benzinger, *Heb. Arch.* 1894; Nowack, *Lehrb. der Heb. Arch.* 1894; J. F. McCurdy, *Hist. Proph. and the Monuments*, ii. 36-77; Dillmann and Driver on the passages from Pent., for OT; Schiller, *HJP*, for NT; also art. in Herzog's *RE*; Schenkel's *Biblex.*; Riehm's *HWB*.

W. H. BENNETT.

FAMINE (צָרָה, לָמוּס) in Syria and Egypt in past times may be attributed to four causes—

- i. Want of water, i.e. rainfall or inundations, in due season.
- ii. Destruction of corn and fruit by hail and rain out of season.
- iii. " of all growing crops by locusts and caterpillars.
- iv. " of food supplies by the hand of man.

i. Owing to the want of water in due season the famine might be widespread in extent, but in other cases it would be only partial and local. In the train of famine always comes sickness, which develops into pestilence and other scourges according to the intensity of the want and privation to which the people and flocks and herds are subjected. In prehistoric times famines may have been due to a failure of rain at any time of the year, as the people were dependent upon the spontaneous vegetation for the sustenance of themselves, their herds, and their flocks; but, after agriculture was introduced, the severity of famines could be much mitigated by storing up reserves of corn, thus enabling the bulk of the people to live independently of their herds and flocks; and famines would result more from the failure of rain in due season, that is to say, at the time when it was required for the early growth of the corn. For the plenteous years cf. Lv 26^{4c}. 'Then I will give your rains in their season, and the land shall yield her increase, and the trees of the field shall yield their fruit. And your threshing shall reach unto the vintage, and the vintage shall reach unto the sowing time; and ye shall eat your bread to the full, and dwell in your land safely.' The opposite condition of things is described in Lv 26^{19f}. 'And I will make your heaven as iron and your earth as brass; and your strength shall be spent in vain: for your land shall not yield her increase, neither shall the trees of the land yield their fruit.' In countries which depend upon the natural rainfall for the growth of cereals, and not upon irrigation and inundations, recurrence of rain in due season is a matter of the utmost importance; and scarcity of wheat and barley may be due, not to any want of rain, but to its fall at a wrong season—for example, in summer time, instead of during the winter and spring.

The Wilderness of the Wanderings or Desert of Arabia Petraea, in common with those east of Pal., differs greatly from Syria and Egypt in its food supplies; but it is only in comparison with the extraordinary fertility of Syria and Egypt that it can be considered as a desert. It has, from the earliest time, consisted of arid tablelands, mountainous districts, and sandy dunes, intersected by fertile valleys and plains and cultivable tablelands, and its present parched and barren condition is due in a great measure to the action of the Turkish Government in drawing a revenue from the destruction of trees. There are in all directions ruins of vineyards and terraces on the slopes of hills, indicating former cultivation; and there are yet tablelands where corn is cultivated, and plains where there are thousands of date trees. The nomadic tribes do not exist

solely on the produce of their herds and flocks, but from the earliest historic times have used corn for food, and have cultivated corn for themselves, either in conjunction with neighbouring villages or by means of slave labour. There is a scanty herbage at all times over a great portion of this wilderness, and in January and February water and grasses are found everywhere, and the flocks can roam about at will. During November, December, and March there are dense mists and fogs and heavy dews, which saturate the shrubs and even deposit moisture on the rocks, so that flocks do not require to go to water. These mists depend upon the direction of the wind, and alternate with intense droughts. As the summer advances the pasture is confined principally to the broad water-courses, which give good herbage for many weeks: as the drought increases the inhabitants are reduced to great straits, having to live with their flocks on pastures many miles (sometimes twenty miles) from water. The flocks are driven over to the water once or twice a week, and a small quantity is brought back for the use of the encampment. These nomads and their flocks are of the most hardy nature, and can go without water for many hours or even for days; but they live for a portion of each year on the borderland of famine, and a very little extra scarcity brings on such want and privations that they, with their flocks, either move on to more favoured localities or die.

Egypt has always been remarkable for its extreme fertility, and is well watered everywhere (Gn 13¹⁰). It is not directly dependent on rainfall, the annual flooding of the river Nile inundating nearly the whole land and making the cultivation of the soil, as a general rule, a yearly certainty: a land where 'thou sowedst thy seed, and wateredst it with thy foot, as a garden of herbs' (Dt 11¹⁰). These inundations are caused by the rainfall over the districts where the Nile rises, and they fail at rare intervals. This exposes the land to drought, and famine ensues from want of corn, and in a minor degree the pasturage also fails.

The extraordinary fertility of the Promised Land is constantly alluded to in the Bible: 'a land of hills and valleys, and drinketh water of the rain of heaven' (Dt 11¹¹). 'I will give the rain of your land in its season, the former rain, and the latter rain, that thou mayest gather in thy corn, and thy wine, and thine oil' (v. 14). Its soil is of a very rich description, and formerly clothed the hillsides in terraces, though now, for the most part, it lies at the bottom of the valleys. Although Pal. has been dependent mainly on its rainfall, its streams have been utilized largely for irrigation purposes in the plains and in the Jordan Valley, and on the banks of the Jordan itself the rich soil is subject to inundations in the spring (Jos 3¹⁵).

The first famines mentioned in the Bible are those which occurred in the times of Abraham and Isaac (Gn 12¹⁰ 26¹). In the first case, Abraham went down into Egypt to sojourn there; in the second case, Isaac was about to do the same, but, being warned by God, went to Gerar to reside with Abimelech, king of the Philistines. It may be assumed that these famines were only partial in their extent.

The famine which took place in the time of Jacob was one of great extent, as it included Syria, Egypt, and the sources of the Nile, and was one of great severity and long duration; it is recorded that 'there was famine in all lands' (Gn 41⁵⁴). It lasted seven years, and was remarkable as having been preceded by seven years of plenty, which being foretold by Joseph, the Egypt. Government was enabled to gather up sufficient corn, not only to buy up all the lands and cattle of the Egyptians and to supply the people, but also to sell corn to foreigners. 'And all countries came into Egypt to Joseph for to buy corn; because the famine was sore in all the earth' (Gn 41⁵⁷). It is to be noted, however, that this is a famine restricted to want of corn, and that there is no indication that there was great want of pasturage. The sons of Jacob were able to take their asses to and from Egypt without difficulty. Waggoners were sent to bring up Jacob and his households. 'And their father Israel said unto them, If it be so

now, do this; take of the choice fruits of the land in your vessels, and carry down the man a present, a little balm, and a little honey, spicery, and myrrh, nuts and almonds' (Gn 43¹¹). 'And they took their cattle, and their goods, which they had gotten in the land of Canaan, and came into Egypt' (Gn 46⁶).

Famines are mentioned in the time of the judges (Ru 1¹), and in the time of king David (2 S 21¹), but it is not until the time of Elijah that any account is given of the failure of the pasturage and springs. 'There shall not be dew nor rain these years, but according to my word' (1 K 17¹). 'And Ahab said unto Obadiah, Go through the land, unto all the fountains of water, and unto all the brooks: peradventure we may find grass and save the horses and mules alive, that we lose not all the beasts' (18²). Amongst the signs of the end in Jesus' eschatological discourse are 'famines in divers places' (Mt 24⁷, Mk 13⁸, Lk 21¹¹). For the famine referred to in Ac 11²⁸, see CLAUDIUS.

ii. A graphic description of destruction of crops by hail is given Ex 9^{23, 31, 32}. 'The LORD sent thunder and hail, and fire ran down unto the earth; and the LORD rained hail upon the land of Egypt.' 'And the flax and the barley were smitten, for the barley was in the ear, and the flax was balled. But the wheat and the spelt were not smitten; for they were not grown up.' The unusual occurrence of thunder and rain in the time of wheat harvest is accentuated in 1 S 12¹⁶.

iii. The effect of the destruction of crops by plagues of locusts is depicted Ex 10¹⁵. 'For they covered the face of the whole earth, so that the land was darkened; and they did eat every herb of the land, and all the fruit of the trees which the hail had left; and there remained not any green thing, either tree or herb of the field, through all the land of Egypt.' Again, Jl 1⁴. 'That which the palmer-worm hath left hath the locust eaten; and that which the locust hath left hath the canker-worm eaten; and that which the canker-worm hath left hath the caterpillar eaten.' (See Driver, *ad loc.*)

iv. The most terrible results of famine related in the Bible are due to the hand of man; and this was well recognized by king David. 'And David said unto Gad, I am in a great strait; let us fall now into the hand of the LORD; for his mercies are great: and let me not fall into the hand of man' (2 S 24¹⁴). 'And he shall eat the fruit of thy cattle, and the fruit of thy ground, until thou be destroyed: which also shall not leave thee corn, wine, or oil, the increase of thy kine, or the young of thy flock, until he have caused thee to perish' (Dt 28³¹). 'And thou shalt eat the fruit of thine own body, the flesh of thy sons, and of thy daughters, which the LORD thy God hath given thee, in the siege, and in the straitness, wherewith thine enemies shall straiten thee' (v. 53). 'And there was a great famine in Samaria: and, behold, they besieged it, until an ass's head was sold for fourscore pieces of silver, and the fourth part of a cab of dove's dung for five pieces of silver' (2 K 6²⁹). 'And she answered, This woman said unto me, Give thy son, that we may eat him to-day, and we will eat my son to-morrow' (v. 28).

Josephus, in his *Antiquities* and *Wars of the Jews*, gives several accounts of the horrible atrocities which took place during the famines in besieged cities, but in no account does he give such distressing details as in the story of the last siege of Jerus. by Titus, in which he sums up that 'neither did any other city ever suffer such miseries' (*Wars*, v. x. 5). This account of Josephus is considered to be a description of the fulfilment of the prophecy by our Lord (Mt 24²¹), 'For then shall be great tribulation, such as hath

not been since the beginning of the world until now, no, nor ever shall be,' and is the history of the last famine connected with the Bible.

In the Bible there is no allusion to horrors and privations due to famine such as occur periodically in the world at the present time in the overcrowded portions of China and India.

C. WARREN.

FAMISH. — Occurring but four times in all, 'famish' is thrice used transitively. Zeph 2¹¹ 'he will famish all the gods of the earth' (רָחַק, lit. as AVm 'will make lean'); Gn 41⁵⁵ 'And when all the land of Egypt was famished, the people cried to Pharaoh for bread' (וַתִּשְׁתָּחֲוּ); Is 5¹³ 'their honourable men are famished' (בָּהִירֵי קִמְיָם, lit., as AVm and RVm, 'their glory are men of famine,' but the reading is doubtful, see esp. Driver on Dt 32²⁴). This transitive use of 'famish' may be illustrated by Coverdale's tr. of J11²⁰ 'the shepe are fameszshed away,' and Shaks. *Tam. of Shrew*, iv. iii. 3—

'What, did he marry me to famish me?'

Tit. Andron. v. iii. 179—

'Set him breast-deep in earth, and famish him';

and Milton, *PL* xii. 78—

'Thin air
Above the clouds will pine his entrails gross,
And famish him of breath, if not of bread.'

The intrans. occurrence is Pr 10⁸ 'The Lord will not suffer the soul of the righteous to famish.' The Heb., translated 'suffer to famish,' is the same (though in Hiphil) as in Gn 41⁵⁵, and scarcely means more than 'cause to hunger'; so that the statement loses some of its comfort under the Eng. translation, if it does not even lose all its point.

J. HASTINGS.

FAN, FANNER.—Fan is used both as verb and as substantive. 1. As verb (Heb. נָחַף in *Qal*) Is 41¹⁶ 'Thou shalt fan them [the mountains and hills], and the wind shall carry them away'; Jer 4¹⁴ for purifying; 15⁷ for chastisement; and (same Heb. in *Piel*) Jer 51². Amer. RV has 'winnow' throughout. 2. As subst. 'a winnowing-machine,' Is 30²⁴, Jer 15⁷ (מְנַחֵף); Mt 3¹², Lk 3¹⁷ (πύλον). *Fanner* occurs only in Jer 51² 'I will send unto Babylon fanners, that shall fan her, and shall empty her land.' The Heb. of the Massoretic pointing (מְנַחֵף) means 'strangers,' and so RV after Ewald and others. But the VSS (LXX. Pesh. Targ. Vulg.) point the Heb. differently (מְנַחֵף), and gain the word-play. Cheyne thinks the prophet possibly intended to suggest both meanings. The Eng. tr. may be traced from the Vulg. *ventilatores*, through Cov. 'fanners,' whom Geneva, Bishops', Douay, and AV all follow. So also Luther (*Worfler*), and Rothstein in Kautzsch; and the French translators Ostervald and Segond (*van-neurs*). See AGRICULTURE.

J. HASTINGS.

FANCY is used as a verb absolutely in Sir 34⁹ 'And the heart fancieth, as a woman's heart in travail' (φαντάζεται; a verb which occurs elsewhere in LXX only Wis 6¹⁶, 'showeth herself,' and in NT only He 12²¹ τὸ φανταζόμενον, AV 'the sight,' RV 'the appearance'). The previous Eng. Versions from Wyc. have 'fantasie' as a subst. (Douay 'phantasie'), AV is the first to use the verb, and to spell 'fancy.*' The *Oxf. Eng. Dict.* gives only one example of 'fancy' used absolutely, Locke (1698) 'we rather fancie than know.'

J. HASTINGS.

FAR.—1. 'Far' is often used in AV as an adj. qualifying 'country,' as Is 8⁹ 'all ye of far countries' (בְּלֵל קְרִיבֵי-אֶרֶץ); Zec 10⁹ 'they shall remember me in far countries' (בְּקְרִיבֵי-אֶרֶץ). Twice it

* On the spelling Trench (*Study of Words*, 301) may be quoted: "When 'fancy' was spelt 'phant'asy,' as by Sylvester, in his translation of Du Bartas, and other scholarly writers of the 17th cent., no one could doubt of its identity with 'phantasy,' as no Greek scholar could miss its relation with φαντασία."

qualifies other substantives, Dt 29²² 'a far land' (אֶרֶץ רְחֹקָה); Mk 13³⁴ 'a man taking a far journey' (ἀνθρώπος ἀποδημιός, RV 'sojourning in another country'). Modern usage would probably require 'distant,' as Aldis Wright suggests. Certainly as an adj. 'far' was once used more freely than it is now: thus, Bp. Barlowe, *Dialogue* (1531), ed. of 1897, p. 35, 'Now to compare these fruities unto the actes of these Lutheran factyons, ye shall fynde a farre difference.' In Mt 21³³ 25¹⁴, Mk 12¹, Lk 20⁹, where the Greek is ἀποδημιέω and AV has 'go into a far country,' RV more accurately translates 'go into another country.' But the same Greek is rendered by AV 'took his journey' in Mt 25¹², by RV 'went on his journey'; and in Lk 15¹³, where the Greek is more fully ἀπεδήμησεν εἰς χώραν μακράν, AV renders 'took his journey unto a far country,' and RV retains.

2. Notice the phrases: (a) *thus far*, Jer 48⁴⁷ 'Thus far is the judgment of Moab,' 51⁶⁴ 'Thus far are the words of Jeremiah' (both אֶרֶץ-יְהוּדָה, and Lk 22⁶¹ 'Suffer ye thus far' (ἕως τούτου). (b) *So far forth*—'to such an extent,' 1 Es 1⁵² (ἕως οὗ). (c) *Be it far from or far be it from*. This phrase, which comes from Wyclif (esp. ed. 1388) after Vulg. *absit hoc*, occurs eight times in AV of OT as the translation of *háliláh*, a substantive formed from *hálal*, to profane, with locative suffix, therefore lit. *ad profanum*! to the unholy! The passages are Gn 18^{25 bis}, 1 S 20³⁰ 20⁹ 22¹⁵, 2 S 20^{20 bis} 23¹⁷, Job 34¹⁰. [Elsewhere the same Heb. expression occurs Gn 44^{7, 17}, Jos 22²⁹ 24¹⁶, 1 S 12²³ 14⁴⁵ 20³, Job 27⁵, where it is tr. 'God forbid' (AV and RV); also (combined with יהוה) 1 S 24⁹ 26¹¹, 1 K 21³ 'the LORD forbid'; and (combined with אֱלֹהִים) 1 Ch 11¹⁹ 'My God forbid.'] In Apoc. the same Eng. phrase is found, 1 Mac 13⁵ 'be it far from me' (μή μοι γένοιτο); and in NT Mt 16²² 'Be it far from thee, Lord' (Ὁ θεός σοι, where θεός γένοιτο is understood, as RVm 'God have mercy on thee').

The Lord is 'far from the wicked' (Pr 15²⁹), but He is 'nigh unto all them that call upon him' (Ps 145¹⁸); so the Psalmists frequently cry, 'Be not far from me' (22^{1, 11, 19} 27⁹ 35²² 38²¹ 71¹²), for in His presence is fulness of joy (Ps 16¹¹). St. Paul taught the Athenians that He is 'not far from every one of us' (Ac 17²⁷), yet it is by the blood of Christ that we are 'made nigh' (Eph 2¹³), so that we are encouraged and enabled to 'draw near with a true heart in fulness of faith' (He 10²²).

J. HASTINGS.

FARE, FAREWELL.—To 'fare,' from Anglo-Saxon *faran* (Ger. *fahren*, Gr. *πορεύομαι*), is to 'travel,' to 'go,' as Spenser, *FQ* i. x. 63—

'But let me here for aye in peace remaine,
Or streight way on that last long voyage fare.'

Then comes the meaning 'get on' well or ill, as 1 S 17¹⁸ 'look how thy brethren fare' (אִתְּךָ רָאָה, lit. 'visit thy brethren [and inquire] as to their wellbeing' [cf. Gn 37¹⁴, 2 S 11⁷]; Cov. 'loke how thy brethren do,' Wyc. 'thi britheren thou shalt visite, if thei right doon'); Sir 3²⁶ 'A stubborn heart shall fare evil at the last' (κακωθήσεται, RV 'fare ill'); 32²⁴ 'he that trusteth in him shall fare never the worse' (οὐκ ἐλαττωθήσεται, RV 'shall suffer no loss'); 2 Mac 9²⁰ 'If ye and your children fare well'; 11²⁸ 'If ye fare well' (both ἐρρωσθε). The perf. pass. of the Greek verb found in the two last-quoted passages (ἐρρωσθην) was used in the imperative sing. (ἐρρωσο) or plu. (ἐρρωσθε) as a formula for closing a letter, lit. 'be strong, prosper.' This formula is accordingly expressed by the word **farewell** in English. In Ac 15²⁹, where the verb is plu., the older form is retained in AV and RV 'fare ye well'; but in 23³⁰, where the verb is sing., AV has 'Farewell' (RV with most edd. omits). Once 'farewell' is the tr. of *χαίρειν*, 2 Co 13¹¹ 'Finally, brethren, farewell' (RVm 'rejoice' or 'be

perfected'). 'Fare ye well' is the tr. of most previous VSS from Tind., but Wyc. 'ioie ye,' Cov. 'reioyse,' Rheims 'reioyce' (after Vulg. *gaudete*), and it is probable that the Gr. χαίρειν is inadequately represented by the Eng. 'farewell,' since it never lost the sense of 'rejoice,' by slipping into a mere formality of speech, as the Eng. word has done. See Lightfoot on Ph 4^a.

In Lk 16¹⁹ ('fared sumptuously every day') the Eng. word 'fared' is probably to be taken in a sense that is still common, 'feed,' 'be entertained with food.' Wyclif's tr. is 'eete every dai schynngli' (after Vulg. *epulabatur quotidie splendide*), Coverdale's 'fared deliciously every daye.' Cov. was repeated by Cranmer and the Geneva of 1557; but the Gen. of 1560 gives 'fared wel and delicately,' the Bishops' 'fared very deliciously,' the Rhemish 'fared magnifically.' Now it is true that neither 'fared' nor 'sumptuously' is restricted to taking food. In More's *Utopia* (ii. 8, Lupton's ed. p. 264) we read, 'Thither they sende furth some of their citezeins as Lieutenantes, to lye theire sumptuously lyke men of honour and renowne'; and Sir T. Elyot (*The Governour*, 1531, ii. 192, Croft's ed.) says, 'Many mo princes and noble men of the Romanes . . . made solempne and sumptuose playes in honour of their goddes.' But it is possible that it was a passage in the last-named work that suggested the tr. of AV, and in that passage the sense of feed or feast is unmistakable: (ii. 336) 'The noble emperour Augustus . . . fared sumptuously and delicately, the cite of Rome at that tyme being vexed with scarcitie of grayne.' If that is the meaning of AV, it is inadequate to express the original (αὐφραίνιμος καθ' ἡμέραν λαμπρῶν), where the verb means to 'make merry' (Lk 12¹⁹ 15²³, 24. 29. 32 and elsewhere), and the adverb (of which this is the only occurrence in biblical Greek) means 'brilliantly' (the adj. is often applied to dress, Lk 23¹¹, Ac 10³⁰, Ja 2² 3, Rev 19¹⁸), so that the tr. is literally 'making merry every day brilliantly.' Luther's tr. is *lebte alle Tage herrlich und in Freuden*; Weizsäcker, *genoss sein Leben alle Tage im Glanze*; Ostervald, *se traitoit bien et magnifiquement*; Oltramare, *faisait brillante chere*; Segond, *menait joyeuse et brillante vie*; RYm 'living in mirth and splendour every day.' RV has given 'sumptuous fare' for AV 'delicate fare' in Sir 29²² (Gr. ἰδίσματα λαμπρά).

J. HASTINGS.

FARTHING.—See MONEY.

FASHION (*facere*, to make, *faction-em*, a making, It. *fazione*, Old Fr. *façon*, Old Eng. *facioun*). There are some old uses in AV, and they are all retained in RV.

1. The *make* or *shape* of a thing: Ex 26³⁰ 'thou shalt rear up the tabernacle according to the fashion thereof which was showed thee in the mount.' The Heb. (מִשְׁפָּטִי *mishpāt*) is the ordinary word for the decision of a judge, hence due or right measure, even in cases not decided by judging, right proportion (1 K 4²⁸ [Heb. 5⁸] 'charge'; Jer 30^{18b} of a city, 'manner,' rather weak; Is 40¹⁴, in creation—giving each part its due place and function). In Ex 26³⁰ it seems to be used as synonymous with מִבְּנֵי (from בָּנָה to build, so 'building,' 'make'), which is employed in the parallel passages Ex 25⁹, 40, and is there tr^d 'pattern.' This Heb. word *mishpāt* developed much as the Eng. word 'fashion' has done. In Gn 40¹⁸ and elsewhere it signifies manner or custom, and in 2 K 1⁷ outward appearance. It is tr^d 'fashion' also in 1 K 6²⁸, Ezk 42¹¹ (in both of parts of a building). Wyclif's word in Ex 26³⁰ is 'saumpler.'

In 2 K 16¹⁰ 'king Ahaz sent to Urijah the priest the fashion of the altar,' the Heb. is דְּמֻתָּהּ (*dēmūth*) (from דָּמָה to be like), a common word in Ezk for the external appearance. Here it is probably a drawing or model. Cf. 2 Ch 4³ 'the similitude (*i.e.* images) of oxen.'

The remaining Heb. word is תְּכֻנָּתָהּ (*tēkhūnāh*) (from תָּכַן to set up), Ezk 43¹¹ 'show them the form of the house and the fashion thereof.' The Heb. is probably here the arrangement or fittings. Wyclif has 'the figure of the hous, and makynge (1388 'bilydng') thereof.' 'Forme and fashion' come from Coverdale.

In Wis 16²⁵ 'even then was it altered into all fashions,' the meaning seems to be (as Deane), that the manna changed its taste according to the palate of the eater, and fire modified its nature according to its Maker's will (Gr. *eis πάντα*, RV 'into all forms').

In NT we find 'fashion' with this meaning only Ac 7⁴⁴ 'Our fathers had the tabernacle of witness in the wilderness, as he had appointed, speaking unto Moses, that he should make it according to the fashion that he had seen' (τύπος, as LXX in Ex 25⁴⁰, RV 'figure').*

2. The *appearance* of a thing, as Ja 1²⁴ Tind. 'For assone as he hath loked on him silfe, he goeth his waye, and forgetteth immediatlie what his fassion was.' So in AV, Lk 9²⁹ 'as he prayed, the fashion of his countenance was altered' (Gr. τὸ εἶδος τοῦ προσώπου αὐτοῦ). Especially outward visible appearance in contrast with inner reality, as Shaks. *Merch. of Venice*, iv. i. 18—

'Shylock, the world thinks, and I think so too,
That thou but leadst this fashion of thy malice
To the last hour of act; and then 'tis thought
Thou'lt show thy mercy and remorse more strange
Than is thy strange apparent cruelty.'

1 Co 7³¹ 'the fashion of this world passeth away,' and Ph 2⁸ 'being found in fashion as a man, he humbled himself.' The Gr. is σχῆμα, whose meaning is fully discussed in the Commentaries. See also Trench, *NT Syn.* pp. 252–258; Gifford, *Incarnation*, p. 22 ff.; *Expos. Times*, viii. 391 f. The English is perhaps more emphatic (in expressing mere outward appearance) than the Greek. In 1 Co 7³¹ Wyc. and the Rhemish have 'figure' after Vulg. *figura*; Tind. introduced 'fashion' ('fassion'), and the other VSS followed him. In Ph 2⁸ 'fashion' is not found before AV. Wyc. translates Vulg. (*habitus*) literally, 'habyt' (1386 'abite'); Tind. Cov. and Cran. give 'apparel'; Gen. 1557 'appearance,' 1560 'shape,' as Tomson and Rhem. NT; Bish. 'figure.'

3. In Ja 1¹¹ AV has retained from Tind. 'the flower thereof falleth, and the grace of the fashion of it perisheth,' where the Gr. is πρόσωπον, 'face.' So in Old Eng. 'fashion' was used literally for the face, as *Pilgr. Lyf Manhode* (1430), iii. xxxviii. 155, 'She shadwde hire visage and hire facioun vnder hire hood.' Cf. Lk 12⁵⁶ Tind. 'Ypocrites ye can skylle of the fassion of the erth, and of the skye' (πρόσωπον; Wyc., Rhem., AV, RV, 'face').

4. *Manner*: 2 Es 4²⁵ 'How long shall I hope on this fashion?' (*sic*, RV after the Syriac, 'How long are we here?'); 5²³ 'They that be born in the strength of youth are of one fashion' (*alii sunt*); Wis 2¹⁵ 'his ways are of another fashion' (ἐξήλλαγμαί, RV 'of strange fashion'); 14¹⁹ 'he . . . forced all his skill to make the resemblance of the best fashion' (ἐπὶ τὸ κάλλιον, RV 'toward a greater beauty'); Mk 2¹² 'We never saw it on this fashion' (οὕτως). So in Pref. to AV 'they did not cast the streets, nor proportion the houses in such comely fashion, as had been most sightly and convenient'; and Shaks. *Hamlet*, i. iii. 111—

'My lord, he hath importuned me with love,
In honourable fashion.
Ay, fashion you may call it; go to, go to.'

5. *Manners and customs*: 2 Mac 4⁹ 'a place for exercise, and for the training up of youth in the fashions of the heathen' (the Gr. is simply ἐφηβίαν, *i.e.* youth, hence RV 'and form a body of youths to be trained therein'); 4¹⁸ 'the height of Greek fashions' (ἀκμή τοῦ Ἑλληνισμοῦ, RV 'an extreme of Greek fashions'); 6⁸ 'that they should observe the same fashions' (ἀγωγὴν, RV 'conduct').

The verb to fashion is of frequent occurrence. In OT and Apoc. it has always the sense of give shape to, form. But the word was formerly used in the sense of 'transform,' *i.e.* change the form or fashion into something else. Thus Tindale, *Obedience of a Christian Man*, 97b, 'When a man fealeth . . . him selfe . . . altered and fasioned lyke vnto

* In He 8⁵ the same quotation is made, and adheres still more closely to the LXX of Ex 25⁴⁰, but the Eng. (AV and RV) is 'pattern,' as it has been since Tindale.

Christe'; H. Smith, *Sermons* (1592), 'Fashion thyself to Paul.' In NT there are two examples of this meaning: Ph 3²¹ 'Who shall change our vile body, that it may be fashioned like unto his glorious body' (σύνμορφος; RV 'that it may be conformed to the body of his glory'); 1 P 1¹⁴ 'not fashioning yourselves according to the former lusts' (συναχηματίζουνοι). J. HASTINGS.

FAST.—1. Fast is frequently used in AV both as adj. and adv. in the sense of *firm, secure*, as Ps 33² 'thine arrows stick fast in me'; Ps 65⁶ 'Which by his strength setteth fast the mountains'; Pr 4¹³ 'Take fast hold of instruction'; 2 Es 2¹⁵ 'Mother, embrace thy children, and bring them up with gladness, make their feet as fast as a pillar' (*confirma pedes eorum*, RV 'establish their feet'); Ac 16²⁴ 'Who . . . thrust them down into the inner prison, and made their feet fast in the stocks' (ἡσφαλισατο). Cf. Chaucer, *Anelida and Arcite* (Skeat's Student's ed. p. 117)—

'Almighty God, of trouthe sovereign,
Wher is the trouthe of man? who hath hit sleyn?
Who that hem loveth shal hem fynde as fast
As in a tempest is a roten mast.'

2. In reference to sleep, *sound*, as Jg 4²¹ 'he was fast asleep and weary' (RV 'in a deep sleep'; see RVM and Moore, *in loc.*). 3. *Close, near*, only Ru 2^{8, 21, 23}, as 2⁸ 'abide here fast by my maidens.' Cf. Milton, *PL* ii. 725—

'the snaky sorceress that sat
Fast by Hell-gate, and kept the fatal key.'

In every case 'fast' is used to bring out the force of the verb or adj. used in the original; there is never a separate word for it in the Hebrew or the Greek.

J. HASTINGS.

FASTING.—Often described in OT (esp. in P, where it is practically a technical term) by phrase 'to afflict the soul,' שָׁמַר נַפְשׁוֹ (Lv 16^{29, 31} 23^{27, 32}, Nu 29⁷ 30⁸, Ps 35¹³, Is 58^{3, 5, 10}), tr. by LXX in the passages in Nu by κακοῦν τὴν ψυχὴν, in the others by ταπεινοῦν τὴν ψυχὴν, for which see also Jth 4², and which may be assumed to have this precise reference, and not a more general one at Sir 2¹⁷ 7¹⁷. The phrase does not denote primarily spiritual humiliation, even as the proper accompaniment of fasting. It has a physical meaning. This will be perceived if the material sense in which 'soul' was in early times used be remembered (cf. for a similar expression Ps 69¹¹). The more literal terms נָסַח 'to fast,' נָסַח 'fasting,' are also common in OT. In NT the words are νηστεύειν and νηστεία.

(A) IN THE OT.—1. *The practice of fasting (a) in the times before the Captivity.*—The one regular fast, the institution of which is ascribed to this period, is that of the Day of Atonement (Lv 16^{29, 31} 23²⁷⁻³², Nu 29⁷, Jer 36⁶).^{*} But there are many examples of fasts on special occasions, dictated by the sense of having transgressed, or of calamity, present or impending. Such a fast is inspired by Samuel (1 S 7⁶); enjoined by Jehoiakim and the princes (Jer 36⁸); hypocritically by Jezebel (1 K 21^{9, 12}). In like manner individuals are moved to fast—David when his child is smitten with sickness (2 S 12^{16, 21-23}), Ahab on hearing his doom (1 K 21²⁷).

The abstinence from food or drink for forty days by Moses on the Mount (Ex 34²⁸), and by Elijah (1 K 19⁸), seem to be recorded rather as extraordinary or miraculous occurrences than as fasts purposely undertaken.

(b) *After the Captivity.*—Additional regular fasts now appear, the memorials of the times of bitter shame and calamity through which the nation had passed. Four are enumerated in Zec 8¹⁹, cf. 7^{3, 5}. (a) 'The fast of the fourth month' (Tammuz). On the 9th of this month, the Chal-

* For the question whether the observance of the Day of Atonement was known in pre-exilic times, see p. 199^b of this vol.

dæans broke into the city (Jer 39² and 52^{6, 7}). According, however, to Talm. tradition the fast in this month was observed on the 17th, on which day the breaking of the tables of the law by Moses is said to have occurred, and also the cessation of the daily offering in consequence of the famine during the siege by the Chaldæans. It was held also that later the day was further desecrated through the burning of the law by Antiochus Epiphanes (in Talm. called Apostemus), and his introduction of an idol into the Holy Place. (β) 'The fast of the fifth month' (Ab). The destruction of the temple took place according to 2 K 25⁵ on the 7th, according to Jer 52¹² on the 10th of this month. The 9th was, however, the day which was observed, at all events according to the Talmud. The destruction of the second temple is said to have taken place on the same day; and the announcement was believed to have been made on this day also to the generation of Isr. who came out of Egypt that they should not enter Canaan. (γ) 'The fast of the seventh month' (Tisri), possibly held in commemoration of Atonement; the extinction of the government left in Jerusalem under Gedaliah took place in this month through his assassination (2 K 25²⁵). This, acc. to tradition, happened on the 3rd of Tisri. (δ) 'The fast of the tenth month' (Tebet). On the 10th of this month the siege by Nebuch. began (2 K 25¹, Jer 52⁴). The reference in Ezk 24^{1, 2} shows how the habit of marking it by a fast might arise.

From the Talm. we learn that, in the times for which it can be taken as evidence of the practice to which the prophet refers, the 9th of Ab was regarded as by far the most important, and that its observance was then universally binding. We should infer from Zec 7 and 8 that it always held this position of pre-eminence. The people ask only (7³) whether they need continue to observe this fast. In the answer of God through the prophet, first one other fast is coupled with it (7⁵), then all four of the fasts that had been instituted in consequence of their calamities are mentioned (8¹⁹). It is probable that the three not referred to in the people's question were not regarded as of such strict obligation, and therefore not felt to be onerous. The prophet, on the other hand, names them all, because the principles on which he insisted applied to all equally. According to the Talmud those three were, after they had ceased to be kept, reintroduced subsequently to the destruction of the second temple; and it was taught that they need be observed only at times when the Jews were oppressed or were suffering calamities (cf. Brück, *Pharisäische Volkstitten und Ritualien*, p. 45 ff.). Jewish interpreters seem to have understood Zec.'s words (8¹⁹) as giving a dispensation from the observance of the fasts in the interval between the restoration and the destruction of the second temple (Brück, *ib.*).

We may perhaps find a trace of the institution of one other regular fast in OT—in the Bk. of Esther. That book explains the origin of the Feast of Purim, and in Rabbinic times the celebration of that feast was accompanied by a fast in commemoration of the fasting of Esther, Mordecai, and the people (41^{-3, 15-17}). There may be an allusion to this part of the commemoration in 9³¹ end.

Naturally, there is no lack in the period from the Captivity onwards of instances of fasts on special occasions. Of such as the whole people joined in we have, in addition to the one in Est just referred to, Ezr 8²¹⁻²³, Neh 9¹; and as examples of fasts by individuals, Neh 1⁴, Dn 9³. The references to fasting in the Apocr. are not so numerous as might have been expected, and do not throw much additional light upon the history of the practice (To 12⁸, 1 Mac 3⁴⁷, 2 Mac 13¹²).

2. *The manner of observing fasts.*—There can be little doubt that, in accordance with usual Oriental practice, fasting involved complete abstinence from food. The period for the Day of Atonement was 'from even till even' (Lv 23³²). No work was to be done (Lv 16^{29, 31} 23³², Nu 29⁷). There are allusions also to the use of sackcloth and ashes (Dn 9³, Jon 3⁶ etc.). Abstinence of another kind was also required, referred to in 1 Co 7⁵ (TR): various

passages of OT might be quoted in confirmation, though none very distinctly connected with fasts. It is spoken of plainly in the Talmud.

3. *The purpose of fasting.*—W. R. Smith observes (*RS*², p. 434), 'The usage of religious fasting is commonly taken as a sign of sorrow, the worshippers being so distressed at the alienation of their god that they cannot eat; but there are very strong reasons for believing that in the strict Oriental form, in which total abstinence from meat and drink is prescribed, fasting is primarily nothing more than a preparation for the sacramental eating of holy flesh.' It is difficult, however, to discover traces of this view in OT. There we find fasting employed simply as a sign of mourning (1 S 31¹³), or with the evident object of deprecating divine wrath, or winning divine compassion. Its suitability cannot well be explained in either of these connexions, except on the ground that it is often a natural effect of grief, and may therefore be purposely employed as a sign of it. In its religious use such a mute expression of sorrow would be an act of contrition for sin, or appeal for heavenly aid in distress. A superstitious idea of its efficacy was, no doubt, often entertained; but the particular form of error which the prophets found it necessary to condemn was the ordinary one of the formalist, who fails to perceive that his external observances can have no value when dissevered from purity and righteousness of life (Is 58³⁻⁷, Jer 14¹⁰⁻¹³, Zec 7, 8).

(B) IN THE NT.—1. *The Jewish practice.*—There is an allusion in Ac 27⁹ to 'the Fast,' which was so *par excellence*, i.e. the Day of Atonement. But the chief point which we learn from NT is that by this time frequent additional fasts had become customary with those in Judaism who desired to lead a specially religious life, e.g. Anna (Lk 2³⁷). Again, the Pharisee in the parable says, 'I fast twice in the week' (Lk 18¹²). The allusion is to the two weekly fast-days, Thursday and Monday, on the former of which days Moses was said to have gone up into the Mount, and on the latter to have come down from it. Mention is made of them frequently in the Talmud. There is also an interesting reference to them in the *Didache* 8¹, where Christians are bidden not to fast with the hypocrites on the second and fifth days of the week, but on the fourth and on Friday. Further, the question asked of Jesus by the disciples of John and of the Pharisees (Mt 9¹⁴, Mk 2¹⁸, Lk 5³³), reveals the interesting fact that teachers who had gathered about them bands of scholars, used to give to their disciples special rules on the subject.

2. *The teaching of Jesus.*—There are two passages only, but those significant ones. (a) That in the Sermon on the Mount (Mt 6¹⁶⁻¹⁸). Our Lord's whole aim here appears to be to secure perfect purity and simplicity of intention, a 'fasting unto God' (cf. Zec 7⁵) in the fullest and deepest sense. This would be the most effectual cure for every error, practical or even intellectual (comp. His teaching on almsgiving and prayer, Mt 6¹⁻¹⁶, and see art. on former).

(b) His answer to the question of the disciples of John and of the Pharisees (Mt 9¹⁴⁻¹⁷, Mk 2¹⁸⁻²², Lk 5³³⁻³⁹). This answer throws light on His whole method and aim. To understand it we must bear in mind the question which called it forth. There is no reason to believe that either our Lord or His disciples failed to keep any day of fasting which was generally observed by religious members of the class of artisans and small tradesmen in Galilee, such as the Day of Atonement. But He had imposed upon them no frequent additional fasts. He defends them from the stricture passed on them, and in so doing replies to the criticism of His own teaching, which was

implied, by setting forth the principles on which He acted. He refrained from prescribing forms, not that He condemned them as mischievous or useless, but because it would have been the wrong end at which to begin. The course which He adopted was alone fitting, in view of the far-reaching change of character and thought which He designed to effect.

The precise force of the distinction which Jesus drew between the days while the bridegroom was present and those when he should be removed, deserves to be marked. The time of His presence on earth was a Messianic time, a foretaste of the restitution of all things. The thought that fasting would be discontinued in Messiah's days was already familiar to the Jewish mind. The language of Zec suggested it (3¹⁹), and thus, as it is interesting to note, Jesus added emphasis to the claim to be the Messiah, which He virtually made in referring to Himself as the bridegroom, by what He said as to the unsuitability of requiring fasts from His disciples then. We may believe also that He wished them afterwards to look back to the time that they accompanied with Him as one of joy. But His clear prevision that the perfect fulfilment of the promise was not yet at hand, and that a period of sadness and trial would intervene before it, is not less remarkable, and His words unquestionably imply that there would be a place for fasting in the coming dispensation. Further, the inference which has frequently been drawn from them by Protestant commentators, that in the Christian Church fasting was to be practised only when dictated by special feelings of sorrow, and hence that it was to be a matter of individual choice, confined to occasions of widespread and exceptional calamity, hardly seems to be justified; for He characterizes broadly the difference between two whole periods.

On the other hand, in the parables which follow, and in His line of conduct, to which attention had been directed, He plainly shows that He intended questions of outward observance to be judged with reference to new principles which he inculcated, and that He left them to be decided by His Church under the guidance of the Spirit Who should come in His name (but see Hort, *Jud. Chr.* p. 24).

This intention was shown alike by what He did and did not conform to in the religious usages around Him. We have noticed that the keeping of the law of Moses was not in question on the occasion under consideration. But in point of fact His attitude to that law, the respect for it which He encouraged by word and example, His silence as to its approaching abrogation, were based on the same principle as the non-imposition of new forms. He intended the rites of the Mosaic law to be set aside or changed only as the result of a new spiritual growth.

3. *The practice of the early Church.*—The chief instances are before solemn appointments (Ac 13², 14²³). St Paul alludes to his fasts (2 Co 6⁵ 11²⁷). It is somewhat difficult, however, to decide whether he is speaking of voluntary or involuntary ones. Perhaps both are included. The connexion of words seems rather to suggest voluntary fasts in the former passage, and involuntary ones in the latter. In places TR has an allusion to fasting where it is wanting according to the best evidence (Mt 17²¹, Mk 9²⁹, Ac 10³⁰, 1 Co 7⁵). This corruption of the text may have been due to the increasing value which was set on fasting in the Christian Church with the lapse of time. See further, FEASTS AND FASTS.

In the Oxyrhynchus fragment discovered by Grenfell and Hunt, the 2nd Logion contains the words *ἰὰν μὴ νηστεύσῃ τὸν κόρπον, οὐ μὴ εἰσέλθῃ τὴν βασιλείαν τοῦ θεοῦ*. The construction and the meaning of the saying are both difficult: Harnack (*Die jüngst entdeckten Sprüche Jesu*, 3 ff.) contends for a metaphorical sense of the word 'fast.' Amongst other discussions of the sense of this Logion we may refer to Grenfell and Hunt's *editio princeps* of the ΑΟΓΙΑ ΙΗΣΟΥΤ (10 ff.), Redpath (*Expositor*, Sept. 1897, p. 225), Heinrici in *ThLZ* (21st Aug. 1897), Swete (*Expos. Times*, Sept. 1897, p. 546 ft.).

V. H. STANTON.

FAT.—See FOOD and SACRIFICE.

FAT.—As a verb 'fat' is now nearly displaced by 'fatten.' It occurs in Sir 26¹³ 'The grace of a wife delighteth her husband, and her discretion will fat his bones' (πιαρεῖ, RV 'fatten'); and the ptep. 'fatted' in 1 K 4²³ ('fatted fowl', Heb. פָּרָרִים, see FOWLS), Jer 46²¹ ('fatted bullocks', RV 'calves of the stall'), Lk 15^{23, 27, 30}; to which RV adds 1 S 28²⁴ 'a fatted calf' (AV 'a fat calf').

J. HASTINGS.

FAT.—Fat, meaning a large vessel for holding liquids, has been displaced by 'vat' in literary

English. The difference between the spellings, says Skeat (*Etymol. Dict. s.v.*) is one of dialect only, 'fat' being northern and 'vat' southern. Fat occurs in AV, J1 2²⁴ 'the fats shall overflow with wine and oil,' and 3¹⁸ (both בָּטָן); in the compound 'winefat' in Is 63² (בָּטָן), Mk 12¹ (ὀπολήριον), AV 1611 'wine fat' as two words; and 'pressfat' (1611 'presse-fat') Hag 2¹⁶ (בָּטָן).

RV gives 'vats' in J1 (see Driver's note, *ad loc.*), though in Pr 3¹⁰ it changes 'presses' of AV into 'fats' (בָּטָן). 'Winefat' of Mk 12¹ is made 'winepress,' and 'pressfat' of Hag 2¹⁶ 'winefat' (not by Amer. RV). Amer. RV prefers 'winevat' to winefat in Is 63². See WINE. J. HASTINGS.

FATE.—See WILL.

FATHER.—See FAMILY and GOD.

FATHOM.—See WEIGHTS AND MEASURES.

FATLING.—A fatling is an animal, especially a young animal, fattened for slaughter. It is the tr^d of three Heb. and one Greek word. (1) *Mēri'*, plu. *mēri'im*, 2 S 6¹³, Is 11⁶, Ezk 39¹⁸; which is elsewhere tr^d 'fat cattle' (RV 'fatlings'), 1 K 19. 19. 22; 'fed beasts' (so RV), Is 1¹¹; 'fat beasts' (so RV), Am 5²². (2) *Mēlīm*, Ps 66¹⁵; which elsewhere occurs only Is 5¹⁷ tr^d 'fat ones,' AV and RV. (3) *Mishnīm*, 1 S 15⁹, which means 'seconds,' of a second, inferior sort (as AVm). But that is plainly not the meaning here. Hence the text is generally amended into *mashmannim* (מַשְׁמַנִּים), which is found in Neh 8¹⁰, and means 'fat things,' 'delicacies' (EV 'the fat'). This is the reading followed by EV, and it has the support of Targ. Syr. and Arab. VSS. But Driver (*Notes on Sam.* p. 94) prefers to read *hasshēmēnīm*, which occurs (in the sing.) in Ezk 34¹⁶ (and elsewhere), and is tr^d 'the fat.' He then renders 'the best of the flocks and the herds, even the fat ones and the lambs' ($\text{מִן הַבְּרֵייתֵי הַבָּקָר וְהַצֹּאן וְהַכֹּשֶׁתִּים}$). (4) *σιωρά* (lit. 'fed with grain'), Mt 22⁴ 'my oxen and my fatlings are killed' (Tindale's tr^d; Wyc. 'my bolis [bulls] and my volatilis [fowls]'; after Vulg. *tauri mei et altilia*). To those RV adds (5) *bēr'āh*, Ezk 34³ 'the fatlings' for AV 'them that are fed': the word is an adj., and is tr^d 'fat' in v. 20 ('fat cattle' AV and RV), it is the 'fat' kine of Pharaoh's dream (Gn 41). J. HASTINGS.

FAUCHION.—Jth 13⁶ 'she . . . took down his fauchion from thence,' and 16⁹ 'the fauchion passed through his neck' (AV 1611 'fauchin,' RV 'scimitar'). The Greek is *ἀκνᾶκης* (in 16⁹ Ἄ has *ἀκνᾶκις*, to which Hatch and Redpath give a sep. entry in their *Concord to the Sept.*), but with a query, found only here. The *ἀκ.*, a word of Persian origin, is often used in Herodotus to describe a short sword. See SWORD. The Eng. word was originally the name of 'a broad sword more or less curved on the convex side'; but in later use and in poetry signified a sword of any kind. J. HASTINGS.

FAULT.—A fault is properly a defect or shortcoming (*fallitus*, late Lat. ptcp. of *fallere*, to fail, come short, Old Fr. *faute**) either of material things, as Ld. Berners, *Froissart*, l. clix. 193, 'They had gret fant in their hoost of vitayle'; or from a recognized standard of physical beauty, workmanship, or moral rectitude. The defect expressed by 'fault' is in AV almost always moral, but the larger meaning, shortcoming in any sense, is

* *Faute* is the more accurate spelling, the *l* being inserted from the influence of It. *fatta* and Lat. *fallere*, although the *u* stands, of course, for the *l*. In the Psalter of 1539 the spelling is always *faute*, though modern editions of the Pr. Bk. spell *fault*. In AV of 1611 it is *fault* always.

seen in Rev 14⁵ 'they are without fault before the throne of God' (ἀμωμοί , RV 'without blemish'); cf. Jude 2⁴ 'faultless' (ἀμώμους , RV 'without blemish'). In 1 Co 6⁷ the least degree of moral blame is expressed (Gr. ἡττημα , RV 'defect,' RVm 'loss').

Craik (*Eng. of Shaks.* p. 124) says, 'The word *fault* formerly, though often signifying no more than it now does, carried sometimes a much greater weight of meaning than we now attach to it.' And he gives as an example *Jul. Cæs.* i. iii. 5—

'Who ever knew the heavens menace so?
Those that have known the earth so full of faults.'

To which may be added *Tit. Andron.* v. ii. 173—

'You killed her husband, and for that vile fault
Two of her brothers were condemned to death.'

See also *Rom. and Jul.* iii. iii. 25—

'O deadly sin! O rude unthankfulness!
Thy fault our law calls death.'

And Milton, *PL* xii. 337—

'Whose foul idolatries, and other faults
Heapt to the popular sum, will so incense
God, as to leave them.'

This greater freedom in the use of 'fault' enabled AV to retain Coverdale's tr^d of Gn 41⁹ 'This daye do I remembre my fawte,' though Wyc. had 'I knowleche my synne,' and the Heb. (נִשְׁפָּת) is some thirty times translated 'sin.' Other words usually tr^d 'sin' are occasionally rendered *fault*, as נִשְׁפָּת (vb.) Ex 5¹⁶; * יָצָא 2 S 3³, Ps 59⁴. Again, in Dt 25² נִשְׁפָּת , which is everywhere else tr^d 'wickedness,' is tr^d 'fault,' although all previous VSS had either 'sin' (Wyc. Douay) or 'trespass' (Cov. Gen. Bish.); RV gives 'wickedness.' And παράπτωμα tr^d 'trespass' Mt 6^{14. 15}, Mk 11^{25. 26}, 2 Co 5¹⁹, Eph 2¹, Col 2¹³; 'offence' Ro 4²⁵ 5^{15. 16. 17. 18. 20}; 'fall' Ro 11^{11. 12}; and 'sin' Eph 1^{7. 25}, Col 2¹³, is tr^d 'fault' 2 Co 5¹⁹, Ja 5¹⁶: RV gives 'trespass' always, except Ro 11¹¹ 'fall,' marg. 'trespass.'

'Make no fault,' a very rare expression, is found Sir 9¹³ (μὴ πλημμελήσης , RV 'commit no fault').

In the trial before Pilate, St. John thrice uses *aitia* (18³⁸ 19^{4. 6}), and St. Luke thrice *aition* (23^{4. 14. 22}). Except in Lk 23²² ('cause') AV renders in each case by 'fault'; but the meaning of both words is 'ground for committal,' 'legal cause for prosecution.' RV gives 'crime' in Jn, leaving Lk as in AV.

Faulty is now nearly confined to the expression of physical defects. In 2 S 14¹³ (צָרָא adj.), Hos 10² (צָרָא vb. = be held guilty) it is used as the expression of moral wrong, RV 'guilty.' J. HASTINGS.

FAVOUR.—Favour is of frequent occurrence in Shakespeare and elsewhere in the sense of *personal appearance*, and then as simply meaning the *face* (cf. COUNTENANCE and CHEER). Thus Spenser, *FQ* v. vii. 39—

'She knew not his favour's likeliness,
For many scarres and many hoary heares,
But stood long staring on him mongst uncertain fears.'

More, *Utopia* (Robinson's tr^d, Lumby's ed. p. 19), 'whom by his favourite and apparell furthwith I judged to be a mariner.' Shaks. *As You Like It*, iv. iii. 87—

'The boy is fair,
Of female favour.'

Bacon, *Essays*, 'Of Beauty' (Gold. Treas. ed. p. 176, l. 17), 'In *Beauty*, that of Favour, is more then that of Colour.'

It is sometimes said that Ps 45¹² 119⁵⁶, Pr 19⁶ 29²⁶ are examples of this meaning. But, though the Heb. (פָּנָה) there tr^d 'favour,' is literally 'face,' favour or goodwill is clearly the meaning. In the adjectives 'well-favoured' and 'ill-favoured,' however, we find this meaning, as Gn 29¹⁷ 'Rachel was

* The correct tr. of נִשְׁפָּת נִשְׁפָּת is doubtful. If the vb. be taken as 3rd sing. fem. (*Oxf. Heb. Lex.*) the meaning will be 'thy people is at fault' (but נִשְׁפָּת is nowhere else fem., not even in Jg 13⁷, see Moore, *ad loc.*); if as 2nd sing. masc., 'thou wilt wrong thy people' (so Pesh. LXX, $\text{ἀδικήσεις τὸν λαόν σου}$). This is accepted by Siegfried-Stade, who punctuate נִשְׁפָּת . Socin (in Kautzsch's *AT*) pronounces the MT unintelligible.

beautiful and well favoured' (נָתַן קָרָאָה, lit. 'fair to be seen.' So **evilfavouredness**, Dt 17¹ קָרָה רָע, lit. 'evil thing').

In Jos 11²⁰ *favour* means scarcely more than *mercy*, 'for it was of the LORD to harden their hearts, that they should come against Israel in battle, and that he might destroy them utterly, and they might have no favour' (חָנּוּן: in Ezr 9⁸ the meaning is the same, but EV give 'grace'; everywhere else the Heb. word means 'intreaty'). Cf. Elyot, *The Governour*, ii. 298, 'And they, which by that lawe were condemned, were put to dethe without any fauour.' J. HASTINGS.

FAVOUR.—The interest of the biblical use of this word resides chiefly in its relation to the term *grace*. It has not, like that term, obtained any doctrinal significance. While χάρις in the LXX (Vulg. *gratia*) is its prevailing equivalent, it is used only six times in NT to tr. that word (see also Lk 1²⁸ κεχαριστωμένη, 'highly favoured'; marg. 'graciously accepted' or 'much graced'). Grace, in fact, while including favour, implies much more. And it comes as a free gift ('*Gratia, nisi gratis sit, non est gratia*'), while favour may be won or deserved. To obtain favour is to please, to show favour is to be pleased.

In OT the distinction is, however, hardly perceptible. The instinct of the translators led them, it is true, to avoid the adjective 'favourable' as a rendering of חָנּוּן ('gracious') used only of God (with the one possible exception of Ps 112⁴. See Cheyne, *The Book of Psalms, in loc.*), but the verb חָנַן and its other derivatives are often represented by 'favour.' Thus חָנַן, 38 times rendered 'grace,' is 26 times tr^d 'favour.' Nor is the sense of *strengthening help*, so prominent in the former word, altogether absent from the latter. (See Ps 5¹² 'with favour wilt thou compass him as with a shield.')

Eight other Heb. roots, implying *kindness, goodwill, pity*, are represented in the AV by 'favour.' The most frequent of these is רָצוֹן = acceptance, rendered 15 times 'favour.' For רַחֵם *loving-kindness*, 'favour' is employed only 3 times.

The LXX vary much more than the Eng. tr., the idea of *pity* pronouncing itself in ελεος, while that of *goodwill* comes out in εὐδοκία, θέλημα, πρόσωπον (φίλις). So in the Vulg. we find *miseritordia, voluntas, vultus*. A. S. AGLIN.

FEAR.—For the theology of Fear see next article. Some obsolete or archaic uses deserve notice.

1. Following the Heb. idiom, 'my fear,' 'thy fear,' etc., stands for the 'fear of me,' 'of thee,' etc.: Ex 23²⁷ 'I will send my fear before thee' (פִּיִּיךָ, RV 'my terror'); Job 9³⁴ 'let not his fear terrify me' (פִּיִּיךָ, RV 'his terror'); Jer 2⁹ 'my fear is not in thee' (פִּיִּיךָ). Similarly Ps 90¹¹ 'even according to thy fear, so is thy wrath' (פִּיִּיךָ, RV 'according to the fear that is due unto thee,' so Perowne; Del.* Cheyne, 'the fear of thee,' with the same meaning; De Witt, 'But who has yet learned the power of Thine anger, And Thy wrath as measured by the reverence due Thee?'); Is 63¹⁷ 'O LORD, why hast thou made us to err from thy ways, and hardened our heart from thy fear?' (פִּיִּיךָ, so RV; Del. 'so that we fear thee not,' evidently the genitive of the object; Orelli, 'that it fears not thee'); Mal 1⁶ 'if I be a master, where is my fear?' (פִּיִּיךָ). Earlier VSS contained this idiom yet oftener, as Gn 9² Wyc. (1382) 'yours fear and yours trembling be upon alle the beestis of erthe' (1388 'yours drede and trembling,' AV 'the fear of you and the dread of you'). 2. After another Heb. idiom

* The suffix, says Delitzsch, is either the genitive of the subject, i.e. according to Thy fearfulness (פִּיִּיךָ), as in Ezk 11⁵; or of the object, 'acc. to the fear that is due unto thee.' The latter way of taking it is more natural in itself (cf. v. 8, Ex 20²⁰, Dt 2²⁵), and here characterizes the knowledge that is so rarely found as a knowledge that is determined by the fear of God and truly religious.

'fear' is used for the object of fear, that which is feared: Gn 31⁴² 'the God of Abraham, and the fear of Isaac' (פִּיִּיךָ, RV 'Fear,' as a proper name: but to personify is to miss the idiom, of which Spurrell (*Notes on the Text of Gen.*) gives examples from Pesh. Targ. etc.), so v. 8³, Ps 31¹¹ 'I was a reproach among all mine enemies, but especially among my neighbours, and a fear to mine acquaintance' (פִּיִּיךָ); Is 24¹⁸ 'he who fleeth from the noise of the fear shall fall into the pit' (פִּיִּיךָ); Ps 53⁵ 'There were they in great fear, where no fear* was' (פִּיִּיךָ); Pr 1²⁶ 'I will mock when your fear cometh' (פִּיִּיךָ); Is 8^{12, 13} 'neither fear ye your fear, nor be afraid. Sanctify the Lord of Hosts himself; and let him be your fear, and let him be your dread' (פִּיִּיךָ . . . פִּיִּיךָ); Ps 34⁴ 'I sought the Lord, and he heard me, and delivered me from all my fears' (פִּיִּיךָ); Pr 10²⁴ 'The fear of the wicked, it shall come upon him' (פִּיִּיךָ); Is 66⁴ 'I also will choose their delusions, and bring their fears upon them' (פִּיִּיךָ). Cf. Pr 10²⁹ Cov. 'The waye of the LORD geueth a corage vnto ye godly, but it is a feare for wicked doers'; Herbert, *The Temple*, 120, l. 29—

'Call in thy death's-head there, tie up thy fears.'

3. There are two kinds of fear, a 'slavish feare, and a sonlike feare' (Hieron, *Works*, i. 130). The latter is now used only of our relation to God. But it was formerly applied to the reverence due to any superior, as Ro 13⁷ 'Render to all their dues: tribute to whom tribute is due; custom to whom custom; fear to whom fear.' Cf. Knox, *Hist.* 194, 'we deny neither Toll, Tribute, nor fear, to her [the Queen Regent] nor her officers.' Ascham (*Toxophilus*, B. fol. 35, ed. 1545) says that a priest should have 'a bodye ful of manlye authoritie to fear ill men.' 4. The article being formerly used freely with abstract nouns, we find 'a fear,' Ezk 30¹³ 'I will put a fear in the land of Egypt' (פִּיִּיךָ, RV retains); Ad. Est 15⁸ 'in a fear' (ἀγωνισίας, RV 'in an agony').

In the quotation from Ascham above, the verb to fear is used in the active sense of put fear into, terrify. This meaning, though it occurs but once in AV, is common in the earlier VSS and in Eng. writers of the time.

Thus Lv 26³⁶ Wyc. 'the sown of a fleynge leef shal fere hem'; Dn 4¹¹ Cov. 'O Balthasar, let neither the dreame ner the interpretation thereof feare thee'; 2 Co 10⁹ Gen. 1560, 'This I say that I may not seme as it were to feare you with letters' (so Wyc.). Cf. Elyot, *The Governour*, i. 247, 'the good husbando, whan he hath sowen his grounde, setteth up cloughtes or thredes, which some call shailles, some blenchars, or other like showes, to feare away birdes, which he foreseeth redy to deuoure and hurte his corne.' So Foxe, *Actes and Mon.* i. 436 (ed. 1583), 'A wonderfull and terrible earthquake fell through out al England: wherupon diuers of the suffraganes being feared by the strange and wonderfull demonstration, doubting what it should meane, thought it good to leaue of from their determinate purpose'; Spenser, *FQ* ii. xii. 25—

'For all that here on earth we dreadfull hold,
Be but as bugs to fearen babes withall,
Compared to the creatures in the seas enthrall.'

More, *Utopia* (Rob. tr., Lumby's ed. p. 145, l. 25), expresses his ideal of toleration in the words, 'They also which do not agree to Christes religion, feare no man from it, nor speake against any man that hath received it.' Tindale, *Works*, i. 7, says Scripture is 'a comfort in adversity that we despair not, and feareth us in prosperity, that we sin not'; and *Expositions*, 148, 'fearing you with the bug of excommunication.' From Shaks. take *Tam. of Shrew*, i. ii. 205—

'Have I not in a pitched battle heard
Loud larums, neighing steeds, and trumpet's clang?
And do you tell me of a woman's tongue,
That gives not half so great a blow to hear
As will a chestnut in a farmer's fire?
Tush! tush! fear boys with bugs.'

* Earle (*Psalter of 1539*, p. 291) says that in this example 'fear' is used in the ancient sense of *FLEA*, sudden alarm, shock of danger. But that sense seems to have been dropped very early, long before the days of Coverdale, who first uses 'fear' here (Wyclif as usual having 'dread'), and the Heb. is the same as in the other passages quoted above.

Davies quotes from Bp. Andrewes (v. 8), 'Knowing that we fear honour and power, though it last but for a small time, He feareth us with One whose honour and power lasteth for ever, where the neuter and active senses of the word are found together.'

The example in AV is Wis 17⁹ 'For though no terrible thing did fear them; yet being scared with beasts that passed by, and hissing of serpents, they died for fear' (ἐφόβει, RV 'affrighted'). A Heb. idiom is expressed in the phrase 'fear before,' which occurs 1 Ch 16³⁰, Ps 96⁹, Ec 8^{12, 13}, Hag 1¹². Thus Ps 96⁹ 'O worship the Lord in the beauty of holiness: fear before him, all the earth' (יִירָאוּ אֶת־יְהוָה, RV 'tremble before him'). The verb is used in a grammatical misconception in Is 57¹¹ 'And of whom hast thou been afraid or feared,' which is rectified in RV 'And of whom hast thou been afraid and in fear?'

Fearful in older Eng. meant 'greatly fearing' as well as 'greatly to be feared.' Both senses are used in AV and retained in RV. 1. Dt 20⁸ 'What man is there that is fearful and fainthearted?' (תָּרֵס); Jg 7³ 'fearful and afraid' (אָרַס); Is 35⁴ 'Say to them that are of a fearful heart, Be strong, fear not' (אֲרַסְתֶּם, lit. 'hasty of heart,' as RVm); Mt 8²⁶ 'Why are ye fearful, O ye of little faith?' (δειλός; so Mk 4⁴⁰, Rev 21⁸ [all]); Sir 21^{2, 22¹⁸}, 1 Mac 3⁶, 2 Mac 8¹³. Cf. Adams, *II Peter*, 55, 'If thou lovest God, thou wilt be fearful to offend him, careful to please him'; and Chapman, *Homer's Iliads*, xxiii. 740—

'On the shore, far-off, he caus'd to raise
A ship-mast; to whose top they tied a fearful dove by th' foot,
At which all shot.'

2. Ex 15¹¹ 'Who is like thee, glorious in holiness, fearful in praises, doing wonders?' (נִרְאָה בְּתִפְלוֹתָיִם, lit. 'feared [in] praises'; usually understood 'to be feared even when praised'; Kalisch, 'awful in praises,—the qualities which are mentioned in praising Him fill the mind with awe and reverence'; in Kautzsch, *Du furchtbarer in Ruhmes-thaten*, 'fearful in deeds of praise'; the last, or *Oxf. Heb. Lex.* 'terrible in attributes that call for praise,' being best); Dt 28²⁸ 'that thou mayest fear this glorious and fearful name, THE LORD THY GOD' (אָרַסְתֶּם); Lk 21¹¹ 'fearful sights' (TR φόβηρα, edd. φόβηθρα, RV 'terrors'); He 10²⁷ 'a certain fearful looking for of judgment' (φοβερός; so v. 31, but in 12³¹ 'terrible,' RV 'fearful': φ. is always used of that which *inspires* fear); 2 Es 8²² 12⁸ 15¹³, 2 Mac 1²⁴. Cf. Melville, *Diary* (Wod. p. 271), 'The ministerie of Mr. Robert Bruce was verie steadable and mightie that yeir, and divers yeirs following, maist comfortable to the guid and godly, and maist feirfull to the enemies.' 'Awful' and 'dreadful' have both meanings also.

Fearfully is found only in Ps 139¹⁴ 'I am fearfully and wonderfully made' (נִרְאָה וְנִפְלְאוֹתַי, * Del. "'I am wonderfully come into being under fearful circumstances," i.e. circumstances that excite a shudder, sc. of astonishment'; Cheyne, 'graced so fearfully and gloriously').†

Fearfulness has in the earlier VSS both the meanings of fearful, as Ezk 30¹⁸ Cov. 'a fearfulness will I sende into the Egipcians londe'; 2 Mac 15²³ Cov. 'sende now also thy good anell before us (o LORDE of heavens) in the fearfulness and drede of thy mightie arme.' But in AV 'fearfulness' means always the feeling of fear, apprehension, timidity: Ps 55⁵, Is 33¹⁴ 21⁴, 2 Es 5¹⁴ 11⁴⁰ 15²⁷.

* See Davidson, *Syntax*, § 71. Rem. 2.

† See Cheyne's whole note (*Book of Psalms*, p. 352); it is particularly good. He says, 'Hitzig considers such a burst of admiration inappropriate to the case of human birth. But why? Take the production of a human hand. Why should not a sensitive poet thrill, like Browning's heroine (*James Lee's Wife*, viii.), at—

"The beauty in this—how free, how fine
To fear almost"?

RV adds Wis 17⁸ 'These were themselves sick with a ludicrous fearfulness' (καταγέλαστον εὐλάβειαν, AV 'fear worthy to be laughed at').

J. HASTINGS.

FEAR.—As in Eng., so in Heb. and in Gr. the same words are used to express emotions of fear which differ widely in their ethical character. At one end of the scale we have the fear of the LORD, which is the beginning of wisdom (Ps 111¹⁰) and the whole duty of man (Ec 12¹³); at the other end that fear of pain, shame, or death, which is craven, servile, and selfish, and which is often rebuked in Scripture. But it is impossible to draw any sharp line between the two kinds of fear, for in the imperfection of human character one motive shades off into another. Once even, by a bold anthropomorphism, God Himself is said to fear in the lower sense of the word (Dt 32²⁷, see Driver's note).

The fear which is merely self-regarding ought not to exist in a rational being who knows that God is his Father and understands enough to trust Him. Perfect love casteth out fear (1 Jn 4¹⁸). But man, as he is, fears the forces of nature, which he does not understand or cannot control, because he does not trust God's providence. And he fears his fellow-man, because he is aware that brotherly instincts have grown weak with the sense of the loss of God's Fatherhood. 'Thus conscience doth make cowards of us all.' When Adam fell, he was afraid because he was naked (Gn 3¹⁰), and he felt he could no longer face God: thus fear of God took its rise in the violation of peaceful fellowship with Him. Similarly, Cain violates human fellowship, and fears man because he is an outlaw and God's curse is upon him (Gn 4¹²⁻¹⁴). Fear is thus the natural consequence of misdoing (Pr 28¹), and, accordingly, is sometimes expressly said to be inflicted as a punishment (Lv 26¹⁷, Dt 28²⁵⁻²⁶). The effect of selfish fear is to unman the coward, he loses spirit (Jos 2¹¹; for the same phrase used in a higher sense, see 1 K 10⁵): such men are to be rejected from active service in the army, lest the infection of their timidity spread (Dt 20⁸, Jg 7³). Courage is especially needed in a prophet (Jer 1⁸, Ezk 3⁹). Fear is to be overcome by faith in God (Ps 112⁷⁻⁸). In Rev 21⁸ the fearful are numbered with the unbelieving among the most grievous sinners.

The nobler fear has no thought of danger to self, so that the fear of God is the very opposite to the fear of man (Is 8¹²⁻¹³, Mt 10²⁸); but it arises from the sense of the nearness of some higher and holier being. Thus the beasts fear man (Gn 9²), and man fears angels and spirits, and, above all, God. To fear the LORD (the phrase occurs far more often with J' than with Elohim) means rather to feel awe of what He is, than fear of what He might do. It is fear of a Person (J' is God's personal name), of His character, dignity, and holiness, rather than of His power or works. The fear of the LORD is to hate evil (Pr 8¹³). Fear in the better sense of the word is the mainspring of religion, and 'to fear' is constantly used as signifying 'to worship,' whether the object be the true God or the gods of the heathen (e.g. 2 K 17³⁵⁻³⁶). Thus, too, Jacob, when dealing with Laban, calls J' the Fear of his father Isaac (Gn 31^{42, 53}), that is, the object of his worship and religious awe. This kind of fear is so far removed from the lower sort, that it is one of the distinguishing qualities given by God's Spirit to the Messianic King (Is 11²⁻³, the spirit of the fear of the LORD), and the prayers of the Incarnate Son were heard because of His godly fear (He 5⁷).

But men are only gradually trained to the level of this holy and disinterested fear. They often have to be taught to fear God at all, even in the lower sense; and this lesson is enforced by divine

punishments (1 S 12¹⁸), just as civil punishments teach men the authority of the law through fear (Dt 13¹¹). It is possible to trace progress in the conception of fear taught in the Bible. Thus at Sinai the people fear the fire (Ex 20¹⁸⁻²⁰); but at Horeb the prophet is taught to look for God in the still small voice rather than in the fire and tempest (1 K 19¹²); and Ezekiel is told not to crouch before God, but to stand upon his feet when God speaks to him (Ezk 2⁴). So in the NT boldness towards God is inculcated as much as fear, Christ having opened up the way of access for all who are united to Him: see Eph 3¹², He 4¹⁶ 10¹⁹, 1 Jn 2²⁸ 3²¹ 4¹⁷ (cf. Ro 8¹⁵ contrast bet. spirit of bondage and of adoption). But Christ does not encourage the idea that it is as yet possible to supersede the motive even of selfish fear; He gives grave warnings of the consequences that will follow sin hereafter, and, while He tells His 'friends' not to fear men, He bids them emphatically to fear Him who hath power to cast into hell (Lk 12⁴⁻⁵).

In Ac 'one that feareth God' is often used technically to mean a proselyte, even though uncircumcised (Ac 10²). This is also the meaning of the word *σεβόμενος*, one that worshippeth God, also translated 'devout.' See COURAGE, REVERENCE.

W. O. BURROWS.

FEASTS AND FASTS.—It will be convenient to divide this article * into four parts—

- I. Feasts connected with the institution of the Sabbath.
- II. The great Historical Festivals, Passover, Pentecost, and Tabernacles.
- III. The Minor Festivals.
- IV. The Fast of the Day of Atonement and the Minor Fasts.

I. FEASTS CONNECTED WITH THE INSTITUTION OF THE SABBATH.

(1) The Sabbath. (2) The New Moon. (3) The Feast of Trumpets on the 1st day of the Sabbatical month. (4) The Sabbatical year. (5) The Jubilee year.

The sacred number 7 dominates the cycle of religious observances. Every 7th day was a Sabbath. Every 7th month was a sacred month. Every 7th year was a Sabbatical year. After 7 times 7 was the year of Jubilee. The Feast of the Passover, with the Feast of Unleavened Bread, began 14 days (2×7) after the beginning of the month, and lasted 7 days. The Feast of Pentecost was 7 times 7 days after the Feast of the Passover. The Feast of Tabernacles began 14 days (2×7) after the beginning of the month and lasted 7 days. The 7th month was marked by (1) Feast of Trumpets on the 1st day. (2) Fast of Atonement on the 10th day. (3) Feast of Tabernacles from the 15th day to the 21st. The days of 'Holy Convocation' were 7 in number—2 at the Passover, 1 at Pentecost, 1 at the Feast of Trumpets, 1 at the Day of Atonement, 1 at the Feast of Tabernacles, and 1 on the day following, the 8th day. (Willis, *Worship of the Old Covenant*, pp. 190, 191).

(1) *The Sabbath*, שַׁבָּת, שַׁבְּתוֹן, *σάββατον*.—In Am 8⁵, 2 K 4²²⁻²³, Is 1¹³, Hos 2¹¹ it is connected with the *New moon*. Probably, the Sabbath was originally regulated by the phases of the moon, and thus occurred on the 7th, 14th, 21st, and 28th days of the month, the new moon being reckoned as the first Sabbath. 'Among the Assyrians the first twenty-eight days of every month were divided into four weeks of seven days each, the seventh, fourteenth, twenty-first, and twenty-eighth days respectively being Sabbaths, and there was a general prohibition of work on these days' (George Smith, *Assyrian Eponym Canon*, 19f., quoted by Wellhausen, *Prolegomena*, 112, and

Schultz, *OT Theol.* i. 204, who also mentions the primitive Delphic custom of giving oracles on the 7th day as the day dedicated to Apollo). Schultz also points out that it is a mistake to derive the name Sabbath from the planet Saturn, which the Rabbis call 'Shabbti,' and thus to bring the Sabbath holiday into connexion with the Chaldee worship of the planets. 'The naming of the days after certain planet-gods can hardly be so old as the Sabbath holiday.'

For the Sabbath law see Ex 16²³⁻³⁰ (P and J), 20⁸ (E), 23¹² (J), 31¹³⁻¹⁶ (P), 34²¹ (JE), 35² (P), Lv 19³ (H), 23³ (P), 26² (H), Nu 15³²⁻³⁶ (P), 28⁹⁻¹⁰ (P), Dt 5¹²⁻¹⁵. In Ex 20⁸ (E) it is to commemorate God's seventh day of rest at the creation. In Dt 5¹²⁻¹⁵ it commemorates the redemption of Israel from Egypt. On the Sabbath the daily morning and evening sacrifice—the 'continual sacrifice'—of a lamb as a burnt-offering was doubled. There is no evidence of Sabbath observance in the days of the Patriarchs. There is little evidence of Sabbath observance before the time of the Exile (Jer 17²⁰⁻²⁷, Ezk 20^{12, 13, 16, 20}, Is 56²⁻⁶ 58¹³). Greater strictness marks the post-exilic period (Neh 8⁹⁻¹² 10³¹ 13¹⁵⁻²²). For the 39 kinds of work prohibited by the Rabbis on the Sabbath, and for many other actions and employments which cannot be summed up under any of them which were also forbidden, see Schürer, *HJP* II. ii. 96-105, cf. 1 Mac 2^{34-38, 39-42}, 2 Mac 5²⁵ 8²⁸⁻²⁹ 12³⁸ 15³¹, Mt 12¹⁻¹⁸, Mk 3¹⁻⁵, Lk 6⁸⁻¹⁰ 13¹⁰⁻¹⁷ 14¹⁻⁶, Jn 5¹⁻¹⁸ 9¹⁴⁻¹⁶. Sabbath-breaking was punishable with death (Nu 15^{32ff.} (P), Ex 31^{14ff.} (J)), cf. Ex 16⁵ (J), where the Manna ceases on the Sabbath, and Ex 35² (P), where no fire is to be lighted. According to the testimony of Josephus, the high priest, although legally bound to officiate only on the Day of Atonement, yet actually officiated, as a rule, every Sabbath day, and on the occasion of the New Moons or other festivals in the course of the year (Jos. *BJ* v. v. 7).

(2) *The New Moon* (1) חַדְשׁ הַיָּרֵךְ, (2) חַדְשׁ הַיָּרֵךְ, (3) חַדְשׁ הַיָּרֵךְ, (4) חַדְשׁ הַיָּרֵךְ, *νομήνια*.—Closely associated with the Sabbath (see above). 'When under the influence of the Chaldee method of dividing time, the course of the moon with its four phases was adopted as the unit of time measurement, the new moon and the 7th day were naturally regarded as the chief divisions of time, and therefore as holy days' (Schultz, *OT Theol.* i. 204). From 2 K 4²³ it would appear that the prophets were in the habit of gathering the people around them, and perhaps of granting inquirers and suppliants an audience at new moons and on Sabbaths. At every new moon the number of burnt-offerings was largely increased; and in addition a kid of the goats was to be offered for a sin-offering (Ex 40²⁻¹⁷ (P), Nu 10¹⁰ (P) 28¹¹⁻¹⁵ (P) 29⁶ (P), 1 S 20^{5, 6, 29}, 1 Ch 23³¹, 2 Ch 2⁴, 2 Ch 29¹⁷, Ps 81^{3, 4}, Is 1^{13, 14}, Hos 2¹¹, 1 Es 5^{52, 53, 57}, 8⁹ 9^{16, 17, 37}, 1 Mac 10²⁴, Col 2¹⁶).

(3) *The Feast of Trumpets* on the 1st day of the Sabbatical month, וְקִרְיַת תְּרִיבָה, *μηνιαίους σαλπύγγων*.—The 7th month—Tisri—was the sacred month. On the new moon of the 7th month—the Feast of Trumpets—additional burnt-offerings were sacrificed (Nu 29¹⁻⁶ (P), Lv 23^{24, 25} (P)).

(4) *The Sabbatical Year*, שַׁבְּתוֹן לְאָרְץ, *σάββατα ἀνάπαυσις τῆς γῆς* (Ex 23^{10, 11} (J), Lv 25^{1-7, 20, 22} (H), Lv 26³²⁻³⁵ (H), Dt 15¹⁻¹¹ 31⁹⁻¹³).—The Sabbatical year represented a still further consecration of time to God. The land was to keep a Sabbath. The fields were neither to be tilled nor reaped. 'Nature is to be set free, as it were, from the service which mankind exacts from her, and to be left entirely to herself. Only what she voluntarily offers is to be taken, and that not for any selfish purpose' (Schultz, *OT Theol.* i. 363). Hebrew slaves were to be set free unless they wished to remain in service (Ex 21²⁻⁶ (J)). A harvest was to

* The article is general. Fuller details will be found under the articles on the separate Feasts and Fasts. See also the article FASTING.

be given *gratis* to the poor of the people (Ex 23¹⁰⁻¹¹ (J)). Release from debt is prescribed (Dt 15¹⁻⁶). In Ex 23 (J) the arrangement is made for man; it is a limitation for the common good of private rights of property in land,—in fact, for the benefit of the landless, who in the 7th year are to have the usufruct of the soil; in Lv 25 (H) the arrangement is for the sake of the land,—that it may rest, if not on the 7th day, at least on the 7th year; and for the sake of the Sabbath,—that it may extend its supremacy over nature also (Wellhausen, *Prolegomena*, 118). At the F. of Tabernacles at the commencement of the Sabbatical year, the whole law was read in the hearing of the people (Neh 8¹³⁻¹⁸). The 70 years' captivity and the land's desolation were regarded as making up for the unobserved Sabbaths of the land (*Camb. Comp. to the Bible*, p. 412) (2 Ch 36²¹, Jer 34¹⁴⁻²²). After the return from exile Nehemiah bound the Jews by a covenant to keep them (Neh 10³¹).

(5) *The Year of Jubilee* * דְּרֹר, אֶפְסֹס, יוֹבֵל, ἐνιαυτὸς ἀφέσεως σημασία (Lv 25³⁻⁵⁵ 27¹⁷⁻²⁴).—Peculiar to P. As the Sabbatical year corresponded with the 7th day, so the year of Jubilee corresponded with the 50th, *i.e.* Pentecost. 'As the fiftieth day after the seven Sabbath days is celebrated as a closing festival of the forty-nine days' period, so is the fiftieth year after the seven Sabbatic years, as rounding off the larger interval; the seven Sabbaths falling on harvest time, which are usually reckoned specially (Lk 6¹), have, in the circumstance of their interrupting harvest work, a particular resemblance to the Sabbatic years which interrupt agriculture altogether. Jubilee is thus an artificial institution superimposed upon the years of fallow, regarded as harvest Sabbaths after the analogy of Pentecost' (Wellhausen, *Prolegomena*, 119). There were two main elements in the Jubilee—the emancipation of the Hebrew slave, and the return of mortgaged property to its hereditary owner. Cf. 2 Ch 36²¹, Jer 34^{8-14, 15, 17}, Ezk 46¹⁷, Is 61^{1, 2} 63⁴, Lk 4¹⁸⁻²¹. But in Jer the term דְּרֹר used in Lv 25¹⁰ is applied only to the 7th year. The year of Jubilee was proclaimed by the sound of a trumpet on the Day of Atonement (Lv 25⁹).

II. THE GREAT HISTORICAL FESTIVALS.†—As the new moon and the Sabbath were lunar feasts, the Passover (with the Feast of Unleavened Bread), Pentecost, and Tabernacles were solar festivals, *i.e.* festivals which followed the seasons of the year. 'Three times in the year shalt thou hold pilgrimage unto me, three times in the year shall all thy men appear before J', the God of Israel' (Ex 23^{14, 17} (J), 34²³ (JE), Dt 16¹⁶).

(1) *The Passover* פֶּסַח, פֶּסַחָא. *The Feast of Unleavened Bread* חֲמִשָּׁתַּת יָמֵי, ἑσπέρῃ τῶν ἀζύμων.—The Passover, though followed by the Feast of Unleavened Bread (*Mazzôth*), was distinct from it both in its origin and in its observance. In Ex 12 and 13 two narratives are combined. Ex 12¹⁻¹³ (P) refer to the Passover, 12¹⁴⁻²⁰ (P) refer to the seven days' F. of *Mazzôth*, 12²¹⁻²⁷ (JE) refer to the Passover, 12⁴³⁻⁵⁰ (P) refer to the Passover, 13³⁻¹⁰ (JE) refer to *Mazzôth* (Driver, *LOT*, 25). Josephus distinguishes the Passover from the F. of *Mazzôth* (*Ant.* III. x. 5), 'The F. of Unleavened Bread succeeds that of the Passover, and falls on the fifteenth day of the month, and continues seven days' (cf. Lv 23^{5, 6} (P), Nu 28^{16, 17} (P)). But in

* דְּרֹר in Lv 25¹⁰ refers to the 'liberty' of Sabbatical year, in Jer 34^{8, 15, 17} to the liberty of slaves in 7th year of service, in Ezk 46¹⁷ prob. to Jubilee. In Is 61¹¹ its use is figurative.

† The distinctive feature of these פֶּסַח is that they are not merely religious festivals like those of the 'sacred seasons' (פֶּסַחֵינוּ), but imply, like the Arab. *haj* (same word), a pilgrimage to a sanctuary (see Driver, *Deut.* 188 ff.).

Mk 14¹⁻¹², Lk 22¹ they are practically identified. 'The Passover and the Feast of Unleavened Bread form a double festival, just as the Day of Atonement and the Feast of Tabernacles do. It is undoubtedly as a direct preparation for the F. of Unleavened Bread that the Passover is celebrated on the evening before the latter feast begins' (Schultz, *OT Theol.* vol. i. p. 364) [Lv 23⁵⁻⁸ (P) 10-14 (H), Nu 9²⁻¹⁴ (P) 28¹⁶⁻²⁵ (P) 33³ (P), Dt 16^{1-8, 16}]. The parallelism between the feast of the first month and the feast of the seventh month should be noticed. The tenth day of the first month, for choosing the Lamb, is parallel to the tenth day of the seventh month, the Day of Atonement. The Passover on the fourteenth day of the first month and the seven days' F. of *Mazzôth* are parallel to the eight days of the F. of Tabernacles. The Passover, which was a sacrificial feast (Ex 12²⁷), was observed on the fourteenth day of the first month, Abib (the month of ears, because in it the ears of wheat first appear), later Nisan (Est 3⁷, Neh 2¹). The Feast of Unleavened Bread was the opening as Pentecost was the closing festivity of the seven weeks' 'joy of harvest' (Dt 16⁹, Lv 23¹⁰ (H)). Passover and *Mazzôth* must be distinguished. Wellhausen (*Prolegomena*, 87 ff.) has shown how the Passover פֶּסַח points back to the sacrifice of the firstlings (Ex 34¹⁸ (JE) 13¹² (JE), Dt 15¹⁹ (JE), 16¹ (JE)). It is because J' smote the firstborn of Egypt and spared those of Israel that the latter thenceforward are held sacred to Him. Because Pharaoh refuses to allow the Hebrews to offer to their God the firstlings of cattle that are His due, J' seizes from him the firstborn of men. On the origin of the Paschal ritual and its connexion with Arabian and other customs, see W. R. Smith, *RS*, 227, 280, 344, 345, 406, 431, 464, 465; Schultz, *OT Theol.* i. p. 364; Cobb, *Origines Judaicae*, 138. 'In the three great festivals we can plainly discern relics of the customs which preceded their legal institution. In the first (the Passover) we can distinguish the earlier belief, out of which the offering of the firstlings of the flock sprang, from the enactments which are proper to the institution of the Passover.' Cf. also for the feasts generally W. R. Smith, *The Prophets of Israel*, new ed. pp. 56, 384 ff., where he clearly, after Wellhausen,* proves that the chief occasions of worship in Israel (*Mazzôth*, Pentecost, and Tabernacles) were the agricultural feasts, just as among the Canaanites and other ancient nations. The real starting-point for a study of Jewish sacred feasts is Gn 4² (J), 'Abel was a shepherd, and Cain was a husbandman. And in process of time it came to pass that Cain brought of the fruit of the ground an offering unto the LORD; and Abel also brought an offering of the firstlings of his sheep.' 'It is,' says Wellhausen (*Proleg.* p. 89), 'out of the simplest, most natural, and most widespread offerings, those of the first-fruits of the flock, herd, and field, the occasions for which recur regularly with the seasons of the year, that the annual festivals took their rise. The Passover corresponds with the firstlings of Abel the shepherd, the other three (*Mazzôth*, Pentecost, and Tabernacles) with the fruits presented by Cain the husbandman; apart from this difference, in essence and foundation they are all precisely alike.' Thus the Passover in its origin must be distinguished from the three agricultural feasts. It was a sacrificial feast, and had nothing to do with agriculture or harvest. The name 'sacrifice' (זָבַח) is distinctly applied to it (Ex 12²⁷ (JE) 34²⁶ (JE), cf. 1 Co 5⁷). In Nu 9⁷⁻¹³ (P) it is a *korban* or offering (קָרְבָּן). Like the peace-offerings, the chief part of it was eaten by the worshippers;

* 'Not only in the Jahwistic but also in the Deuteronomic legislation the festivals rest upon agriculture, the basis at once of life and of religion' (*Proleg.* p. 91).

like the sin-offerings, there was an element of atonement in it (2 Ch 30¹⁶ 35¹¹ refer to the sprinkling of the blood of the Passover); like the burnt-offerings, it was whole—no bone of it was broken; it was roast with fire—anything left was burnt with fire. In the two accounts of the Passover in Ex 12, several points of importance are omitted in the first, e.g. the character of the lamb, and the manner in which it was to be eaten; fresh points are added in the second, e.g. the hyssop, the basin, and that none were to leave their houses till the morning.

On each of the seven days of the F. of *Mazzóth*, which followed the Passover, 2 young bullocks and 1 ram and 7 lambs of the first year were offered as burnt-offerings, with their meal and drink-offerings, together with a goat for a sin-offering and the continual, i.e. daily burnt-offering (Nu 28¹⁹⁻²⁵ (P)). On the second day of *Mazzóth*—Abib (Nisan) 16th—a sheaf of the new corn was offered as a wave-offering, together with a lamb of the first year for a burnt-offering (Lv 23¹⁰⁻¹⁴ (H)). The first and last days of the feast—the 15th and 21st days of the month—were days of ‘holy convocation,’ in which no servile work might be done (Lv 23⁷ (P)).

There are few references to the Passover in OT (Nu 9 (P), Jos 5¹⁰⁻¹² (P), 2 Ch 30. 35, Ezr 6¹⁹, 1 Es 1¹. 6. 8. 9. 12. 17. 19. 20. 21. 22 7^{10. 12}). In NT see Mt 26². 17. 18. 19, Mk 14¹. 12. 14. 16, Lk 2¹. 22¹. 7. 8. 11. 13. 15, Jn 2^{18. 23}. 6⁴. 11⁵⁵. 12¹. 13¹. 18^{28. 39}. 19¹⁴, Ac 12⁴, 1 Co 5⁷, He 11²⁸. Later Jewish ordinances distinguish between the so-called ‘Egyptian Passover,’ that is, as it was enjoined for the first night of its celebration, and the ‘permanent Passover,’ as it was to be observed by Israel after their possession of the land of promise (Edersheim, *Bible History*, vol. ii.). On the later additions to the Paschal ceremonial, e.g. the recitation of the history of redemption, the four cups, the Hallel (Ps 113–118), the *Chagigáh*, etc., see Edersheim, *The Temple: its Ministry and Services at the Time of Jesus Christ*, chs. xi. xii.; and for the Feast of Unleavened Bread, see ch. xiii. of the same.

(2) *The Feast of Pentecost*.—(i.) פֶּנֶתֶחַת הַשָּׁבִיעַת, *éporh ésbdomádon*, the Feast of Weeks (Ex 34²² (JE), Dt 16¹⁰); (ii.) חַגְּהָרְבִיזִים, *éporh therisimou*, the Feast of Harvest (Ex 23¹⁶ (J)); (iii.) יוֹם הַהַרְבֵּשׁוֹת, *h é héméra tón néon*, the Day of Firstfruits (Nu 28²⁶ (P); cf. Ex 22²⁹ (J) 23¹⁹ (J) 34²⁶ (JE)). Fifty days after the offering of the Paschal wave-sheaf, the Feast of Pentecost, or Weeks, or Harvest, was kept on or about the 8th of Sivan, the third month. It lasted a single day (Dt 16⁹⁻¹²). The day was a day of ‘holy convocation’ (Lv 23²¹ (P)). The feast marked the completion of the corn harvest, and according to the later Jews it commemorated the giving of the law (Edersheim, *The Temple*, etc., ch. xiii. p. 225). It closed the New Year holiday season. The sacrifices were similar to those offered on the seven days of the F. of *Mazzóth* (Nu 28²⁶⁻³¹ (P)). The characteristic ritual of this feast was the offering and waving of two leavened loaves of wheat flour, together with a sin-offering, burnt-offerings, and peace-offerings (Lv 23¹⁶⁻²⁰ (H)). As a wave-sheaf was offered at *Mazzóth*, which marked the commencement of harvest, as the consecration of the firstfruits, so two wave-loaves were offered at Pentecost, which marked the completion of the corn harvest. The feast is not referred to in OT, but see 2 Mac 12³², Ac 2¹. 20¹⁶, 1 Co 16⁸ (cf. Edersheim, *The Temple*, pp. 225–231).

(3) *The Feast of Tabernacles*.—חַגְּשֻׁכָּת, *éporh sknón*, F. of Tabernacles or Booths (Lv 23³⁴, Dt 16¹³); חַגְּמִצְוֵה, *éporh sunneléias* (Ex 23¹⁶), *éporh sunagwghs* (Ex 34²²), the F. of Ingathering. This feast was observed from the 15th to the 22nd of Tisri (the seventh month), following closely upon

the Fast on the 10th day of the month—the Day of Atonement. It marked the completion of the harvest of fruit, oil, and wine, and historically it commemorated the wanderings in the wilderness. It was the harvest-home at the close of the year, when people came ‘from the villages and towns to the fruit gardens to live in booths, and enjoy a happy autumn holiday’ (Ex 23¹⁶ (J) 34²² (JE), Lv 23^{34-36. 39-44} (PH), Nu 29¹²⁻⁴⁰ (P), Dt 16¹³⁻¹⁵ 31¹⁰⁻¹³). The sacrifices at this feast were far more numerous than at any other. On each of the seven days 1 kid of the goats was offered as a sin-offering, and 2 rams and 14 lambs as a burnt-offering. Also 70 bullocks were offered on the seven days, beginning with 13 on the first day and diminishing by one each day until on the 7th day 7 were offered (Nu 29¹²⁻³⁴). After the seven days a solemn day of ‘holy convocation’ was observed (‘the last day, that great day of the feast,’ Jn 7³⁷), which marked the conclusion, not only of the Feast of Tabernacles, but of the whole cycle of the festival year. On this day 1 bullock, 1 ram, and 7 lambs were offered as a burnt-offering, and 1 goat for a sin-offering (Nu 29³⁵⁻³⁸). The feast is alluded to in 1 K 8² 12³², 2 Ch 5³ 7^{8a}, Ezr 3⁴, Neh 8¹⁴⁻¹⁸, Zec 14¹⁶⁻¹⁹, Jn 7¹⁻¹⁰. On the later ceremonies connected with the feast, e.g. the procession to Siloam to fetch water and its solemn libation at the altar (Jn 7³⁷), the singing of the Hallel (Ps 113–118), the daily processions round the altar, and the sevenfold repetition on the seventh day (Ps 118²⁸), the lighting of the four great golden candelabra in the court of the women (Jn 8¹³), the singing of Ps 105. 29. 50. 94. 81. 82, and the public reading of the law on the first day of the week in the Sabbatical year, see Edersheim, *The Temple*, etc., ch. xiv. pp. 232–249; Westcott on *St. John*, notes on ch. 7³⁷ 8¹². [On the *daily service*, which formed the *substratum* of the *entire worship of the Temple*, the morning and evening sacrifices which were offered on every Sabbath and every festival day, see Schürer, *HJP* ii. 273–299.]

III. THE MINOR FESTIVALS.—(1) *The Feast of Purim* (פֶּרִים, *φρουαί*).—In 2 Mac 15³⁶ it is called *h Marдохαϊκή héméra*, ‘Mordecai’s Day.’ It is said to have been instituted by Mordecai to commemorate the overthrow of Haman and the failure of his plots against the Jews (Est 3⁷ 9¹⁵⁻³²). It was held on the 14th and 15th of the month Adar (the twelfth month). The 13th of Adar—‘the day of Nicanor’—originally a feast to commemorate his death (1 Mac 7⁴⁹, 2 Mac 15³⁶), at a later time became a fast—‘the Fast of Esther’—in preparation for the Feast of Purim, which was of a very joyous character. De Lagarde (followed by Schultz, *OT Theol.* p. 431, and *Encycl. Brit.* 9th ed. vol. xx. p. 115) thinks that the feast which dates from the Persian period is itself of Persian origin, Purim being derived from the Persian *Furdigan* (Pördigān, Pārdiyān) the *φουρμαία* and *φουρδία* of one of the Greek recensions of Esther pointing to a form *φουρδαία* instead of Purim.

Edersheim identifies the F. of Purim with the unnamed feast in Jn 5¹, ‘for no other feast could have intervened between December (Jn 4³⁵) and the Passover (Jn 6⁴), except that of the “Dedication of the Temple,” and that is specially designated as such (Jn 10²²) and not simply as a Feast of the Jews’ (*The Temple*, etc., p. 291). On the evening of the 13th of Adar the whole Book (*Megillah* or Roll) of Esther was read at the synagogue service, to keep the memory of the great deliverance by Esther alive, ‘the children raising their loudest and angriest cries at every mention of the name of Haman, the congregation stamping on the floor, with Eastern demonstrativeness, and imprecating from every voice the curse, “Let his name be blotted out, the name of the wicked shall

rot." Year by year in the Nazareth synagogue Jesus must have seen and heard all this, and how the reader tried to read in one breath the verses in which Haman and his sons are jointly mentioned, to show that they were hanged together' (Geikie, *The Life and Words of Christ*, i. 226). Edersheim (*The Life and Times of Jesus the Messiah*, i. 229) speaks of the 'good cheer and boisterous enjoyments' of the Feast of Purim, some of its customs 'almost reminding us of our fifth of November.'

(2) *The Feast of the Dedication of the Temple* (הגדלה, נהגה נהגה, *Éγκαινία*, 1 Mac 4⁵⁵⁻⁵⁹, 2 Mac 10⁶⁴; *φάρα*, *Jos. Ant.* XII. vii. 7).—It was instituted by Judas Maccabæus in B.C. 164, when the temple which had been desecrated by Antiochus Epiphanes was once more purified and re-dedicated to the service of J'. It commenced on the 25th of Chislev (the ninth month), and lasted for eight days. 'All through the land the people assembled in their synagogues, carrying branches of palm and other trees in their hands, and held jubilant services. No fast or mourning could commence during the feast, and a blaze of lamps, lanterns, and torches illuminated every house, within and without, each evening. In Jerusalem the temple itself was thus lighted up. The young of every household heard the stirring deeds of the Maccabees, to rouse them to noble emulation, and with these were linked the story of the heroic Judith and the Assyrian Holofernes' (Geikie, *The Life and Words of Christ*, vol. i. p. 225). It will be noticed that in four particulars the Feast of the Dedication resembled the Feast of Tabernacles, (1) in its duration of eight days; (2) in the chanting of the Hallel (Pss 113-118); (3) in the practice of carrying palm branches; (4) in the illumination of the temple. Edersheim, in *The Life and Times of Jesus the Messiah*, ii. 227 f., thinks that the first three particulars were derived from the Feast of the Tabernacles, and that the last (the temple illumination) passed from the Feast of the Dedication into the observances of the Feast of Tabernacles. The date of the Feast of the Dedication, the 25th of Chislev, some hold to have been adopted by the ancient Church as that of the birth of our blessed Lord—Christmas—the dedication of the true temple, which was the body of Jesus (Jn 2¹⁹) (Edersheim, *The Temple*, etc., p. 293, and 'Christmas a Festival of Jewish Origin' in *The Leisure Hour* for Dec. 1873). The F. of the Dedication is mentioned in Jn 10²².

(3) *The Feast of Wood Offering* or of the *Wood-carriers*, *ξύλοφορίων* (*Jos. BJ.* II. xvii. 6), on the 15th of Abib—being the last of the nine occasions on which offerings of wood were brought for the use of the temple (cf. Neh 10³⁴ 13³¹).

The Feast of the Reading of the Law (1 Es 9⁶⁰, Neh 8⁹); *The Feast of Nicanor* on the 13th of Adar (1 Mac 7⁴⁹); *The Feast of the Captured Fortress* on the 23rd of Iyyar (the second month) (1 Mac 13⁵⁰⁻⁵²); and *The Feast of Baskets*, evidently 'never attained to any real religious significance' (see Schultz, *OT Theol.* i. 431, and Edersheim, *The Temple*, etc., 295 f., on the Feast of Wood Offering).

IV. FASTS.—(1) *The Day of Atonement*.—*וַיִּזְכֹּר יְהוָה, הַיּוֹם הַזֶּה עֵלֶיךָ יְהוָה, הַיּוֹם הַזֶּה עֵלֶיךָ יְהוָה*, lit. Day of the Coverings or Atonements (Lv 16 (P) and 23²⁷⁻³² (H), Ex 30¹⁶ (P), Nu 29⁷⁻¹¹ (P)). It was the only fast day prescribed by the law (Lv 23²⁷ (H)). In the Talmud it is called 'The Day' (*הַיּוֹם*); in the NT it is called 'the fast,' *ἡ νηστεία* (Ac 27⁹). The sacrifices were threefold: (1) the ordinary daily sacrifices; (2) the special expiatory sacrifices of the day; (3) the festive sacrifices (Nu 29⁷⁻¹¹). The characteristic feature of the day was the offering of the sin-offering of atonement by the high priest alone (Lv 16³³)—not in his gorgeous official dress, but in the

simple white linen robes of purity and consecration (Lv 16^{4, 29, 31, 23^{27, 32}, Nu 29⁷).}

The order of proceedings is given in Lv 16. In vv. 3-10 we have the general outline, in vv. 11-23 the details, which were as follows: (1) The killing of the bullock by the high priest as a sin-offering for himself and his house; (2) the burning of incense in the Holy of Holies by the high priest; (3) the sprinkling of the mercy-seat (*ἱλαστήριον ἐπιθεμα*) with the blood of the priest's sin-offering; (4) the casting lots upon the goats of the people's sin-offering, one goat for J', one for Azazel (*זִיזְוּ*, *Philo*, 'The one goat is given to "the fugitive creature," and the lot which it received is named in the prophecy "sent away" [referring to *ἀποτομπαῖον* by which the LXX tr. *זִיזְוּ*], because it is persecuted, expelled, and driven far away by wisdom.' Willis, 'Azazel, the name of a personal being, in opposition to J', the personal name of God.' Schultz, 'Some powerful being to whom the animal is assigned, and to whom it is sent with the now forgiven guilt of the reconciled people. . . . This being must be conceived of as strange and unholy. . . . An Aramaic name for an unclean and ungodlike power, which has its abode in the wilderness, in the accursed land outside the sacred bounds of the camp.' Watson in *Camb. Comp. to the Bible*, 'Azazel, the completely separate one, the evil spirit regarded as dwelling in the desert'). See AZAZEL. (5) The killing of the goat of the people's sin-offering by the high priest; (6) the sprinkling of the mercy-seat with the blood of the people's sin-offering; (7) the sprinkling of the blood of each sin-offering on the golden altar of incense and before it seven times; (8) atonement for the court and altar of burnt-offering; (9) confession of sin over the live goat, and his dismissal into the wilderness to Azazel; (10) resumption by the high priest of the gorgeous robes of his office; (11) the offering of burnt-offerings and burning the fat of the sin-offerings; (12) the burning of the sin-offerings without the camp (He 13¹⁰⁻¹²). The chief purpose of the Day of Atonement was to preserve the holiness of the sanctuary as a fit place of meeting between God and man. There were five subjects of atonement: (1) The Holy Sanctuary (*i.e.* the Holy of Holies); (2) the Tent of Meeting (*i.e.* the Holy Place); (3) the altar (*i.e.* of burnt-offering); (4) the priest; (5) all the congregation.

It is significant that there is no mention of the Day of Atonement until Sir 50⁵². Zec 3⁹ is doubtful. In Neh 8 it might have been expected. Neh 7^{73b-9³⁸} records (1) the observance of the Feast of Trumpets on the first day of the seventh month of the year B.C. 444; (2) the celebration of the Feast of Tabernacles, including the reading of the books of the law day by day, from the 15th to the 22nd of the same month; (3) the observance of a day of general fasting and prayer on the 24th day of the same month. Either the 24th day was observed in place of the Day of Atonement on the 10th day, or the latter had not yet been appointed. It is difficult to avoid the latter alternative. 'This *testimonium e silentio* is enough; down to that date (B.C. 444) the great day of the Priestly code (now introduced for the first time) had not existed' (Wellhausen, *Prolegomena*, p. 111). For the references in the NT see Ro 3²⁵ (*ἱλαστήριον, ἡμερα*), He 2¹⁸ 4¹⁴⁻¹⁶ 5¹⁻¹⁰ 6^{19, 20} 7²²⁻²⁸ 8¹⁻⁶ 9¹¹⁻¹⁵ 13¹⁰⁻¹² 1 Jn 2² 4¹⁰ (*λασμός*) (Willis, *Worship of the Old Covenant*, pp. 201-214; Edersheim, *The Temple*, etc., ch. xvi. pp. 263-288). See further, ATONEMENT (DAY OF).

(2) *Other Fasts*.—The Day of Atonement was the only fast day prescribed by the law. But we read of individual and national fasts in Jg 20²⁶, 1 S 7⁶ 31¹³, 2 S 12¹⁶, 1 K 21^{9, 12, 27}, Jon 3^{5, 7, 8}, Jer 14¹² 36^{6, 9}, La 2¹⁰, Jl 1¹⁴ 2^{12, 15}, Is 58³⁻⁷, Neh 9^{1st}, Est 4¹⁶, Dn 10³, 1 Mac 3⁴⁷. Two passages in Zec call for comment,

SYNOPSIS OF FEASTS AND FASTS.

7³⁻⁵ and 8¹⁹. In 7³⁻⁵ Zechariah, in answer to an inquiry put to him by the men of Bethel about fasting, declares that J^h demands no fasts, but only observance of His moral commands. Two fasts had been in observance in the 5th and 7th months for seventy years,—the fast of the 5th month (9th Abib), in memory of the destruction of the city and temple by fire (2 K 25³); and the fast of the 7th month (2nd Tisri), in memory of the murder of Gedaliah and the annihilation of all that remained of the Jewish state (Jer 41). In ch. 8 he pictures the Messianic future, when the fast days will become seasons of gladness and cheerful feasts. He adds to 7³⁻⁵ two other fasts: the fast of the 4th month (17th Tammuz), in memory of the capture of Jerusalem (Jer 39²), and the fast of the 10th month (10th Tebeth), in memory of the commencement of the siege of Jerusalem by Nebuchadrezzar (2 K 25¹). Zechariah knows nothing of 'the Fast'—the Day of Atonement. Later fasts 'came into a position co-ordinate with the feasts, and became a stated and very important element of the ordinary worship' (Wellhausen, *Prolego-*

mena, 112). Fasting degenerated into formalism and self-righteousness. In the NT cf. Mt 6^{16a} 9¹⁴, Mk 2^{18a}, Lk 5^{33a} 18¹², Ac 27⁹, 2 Co 6⁶ 11²⁷. After the destruction of Jerusalem by Titus, the system of fasts received such an impulse that it was necessary to draw up a list of the days on which fasting was forbidden. The present Jewish calendar contains twenty-two fast-days, besides the Day of Atonement, the Fast of Esther, and the four fasts of Zec 8¹⁹ (Eldersheim, *The Temple*, etc., pp. 297-301).

LITERATURE.—Eldersheim, *The Temple: its Ministry and Services*, 144-300, *The Life and Times of Jesus the Messiah*; Geikie, *The Life and Words of Christ*; Wellhausen, *Prolegomena*, 83-120; Schultz, *OT Theology*, i. 189, 196, 202, 359-369, 372, 402.
